This company was organized in 1848, with a capital stock of $50,000. From time to time it has increased its capital stock, until now and for several years last past it has had a capital stock of $2,000,000. I have no desire to give to the Senate any figure or any estimate or any calculation that is not absolutely correct, and I should be pleased at any time during the course of my remarks, if I give any figures that are wrong or that any Senator wants to question or any Senator doubts, to have him interrupt me at any time for the honest purpose of getting the real truth before the Senate of the United States.

I am going to be very brief. I am not going into all the details that might well be gone into in searching the history of this corporation, unless as a result of questions that may be asked it is necessary to go further into details.

I have here a report made to the Senate on the 7th day of July, 1886, by Senator Spooner, from the Committee on the District of Columbia. It seems that in 1886 the Committee on the District of Columbia made a considerable investigation into the affairs of the Washington Gas Light Co. If it were not for taking up too much of the time of the Senate, I should like to quote at length from this report. It is a very valuable report, giving a great deal of valuable information that was gleaned by this committee from an investigation; but for fear some Senator may think that is ancient history, I am only going to refer briefly to some of the things therein contained.

Senator Spooner, on page 3 of that report, in referring to some of the capital stock of this company, uses the language I am about to read. By the way, it is well to remember that at one time in the history of this company they burned up all of their books, so that it is perhaps an impossibility to get all of the information pertaining to their history, their growth, and their manufacture and sale of gas, because all the evidence was at one time destroyed.

On page 3 Senator Spooner uses this language:

> It is difficult to resist the suspicion arising from an examination of the sums hereinbefore given as alleged increase of capital from 1872 to 1883, aggregating $800,000, that they represent nothing else than stock dividends, however called, in addition to the large money dividends from time to time declared and paid by the company.

He finds that they have been paying dividends, most of them at rates that I think everybody will concede are away beyond what a public-utility corporation of this kind ought to be allowed to earn. Let me read some of them.

In 1855 they paid 10 per cent on $500,000 capital. In 1856 they paid 10 per cent. In 1857 they paid 10 per cent. In 1858 they paid 10 per cent. In 1859 they paid 10 per cent. In 1860 they paid 10 per cent. In 1861 they paid 10 per cent. In 1862 they paid 10 per cent. And in 1863 they paid 10 per cent.

I am giving these figures to show that even though you concede that 10 per cent was a reasonable return that the corporation should be allowed to have, they have at least been getting through practically all the years that have passed a sufficient return, so that there ought to be no excuse whatever for a larger dividend and allowance.

In 1862, 10 per cent; in 1863, 10 per cent. It is alleged, says Senator Spooner, that no dividends were paid in 1864 and 1865. Whether this is true or not, I can not tell. In February, 1866, 5 per cent was paid on $500,000, and, in August, 5 per cent was paid on $1,000,000. In 1867, 10 per cent was paid. In 1868, 10 per cent, and in 1869, 20 per cent on $1,000,000 capitalization.

## WOMAN SUFFRAGE.

The VICE PRESIDENT. The morning hour having expired, the Chair lays before the Senate the unfinished business, which will be stated.

The SECRETARY. A joint resolution (S. J. Res. 1) proposing an amendment to the Constitution of the United States extending the right of suffrage to women.

Mr. OWEN. Mr. President, those who are in favor of this proposal of woman suffrage are desirous, apparently, that it shall be delayed to some future time.

Mr. THOMAS. The Senator is mistaken.

Mr. OWEN. I certainly am mistaken with regard to the Senator from Colorado.

Mr. THOMAS. I want the Senate to proceed to a vote upon the joint resolution.

Mr. WILLIAMS. If the Senator will pardon me, I will say that I have received a letter from one of the two branches of the woman-suffrage management. I have left it in my office. I will bring it over later if I can put my hands upon it. In this letter they direct me to inform the Senate that they do not agree with the other branch, and that they want the matter voted on. I do not know which branch is in control.

Mr. SMOOT. I wish to say to the Senator that the National Woman Suffrage Association desire a vote upon the joint resolution as soon as possible. There are some who have expressed an opinion to the effect that they would very much prefer to have a vote delayed, but the National Woman Suffrage Association have expressed, not only once, but time and time again, their desire to have a vote taken at as early a date as possible.

Mr. OWEN. I was not aware of the activity of this controversy, otherwise I should not have risen to make a suggestion to postpone the matter, as it is obvious that it would be useless, because there would be objection made, and one objection would defeat the suggestion I had intended to make.

Mr. SMOOT. I ask that the unfinished business be temporarily laid aside.

Mr. POMERENE. Can the Senator or any Senator inform us as to when we will be permitted to vote on this subject?

Mr. SMOOT. We would have been permitted to vote before this time if it had not been for the appropriation bill.

Mr. THOMAS. I did not hear the inquiry of the Senator from Ohio.

Mr. POMERENE. I simply asked as to when we might be permitted to vote on the joint resolution.

Mr. THOMAS. That depends upon the bill now under consideration. We have given way to that because of the exigency which existed with reference to the appropriation bill. I do not think that we ought to be charged with delay on account of that fact.

The VICE PRESIDENT. The joint resolution is before the Senate and open to amendment.

Mr. SMOOT. I ask that it be temporarily laid aside.

The VICE PRESIDENT. Is there objection?

Mr. WILLIAMS. What is the request?

The VICE PRESIDENT. The request is that the joint resolution shall be temporarily laid aside.

Mr. SMOOT. I will say to the Senator from Mississippi that we would be delighted to go on with it this afternoon, and the only reason why we ask to have it laid aside is that the appropriation bill may be finished.

The VICE PRESIDENT. Without objection, Senate joint resolution No. 1 is temporarily laid aside. What is the pleasure of the Senate?

Mr. NORRIS. I ask that the District of Columbia appropriation bill be proceeded with.

Mr. SMITH of Maryland. We are very anxious to finish the appropriation bill.

The VICE PRESIDENT. By unanimous consent, the Chair lays before the Senate the District of Columbia appropriation bill.

## DISTRICT OF COLUMBIA APPROPRIATION BILL.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 10523) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1915, and for other purposes.

The VICE PRESIDENT. The Senator from Nebraska will proceed.

Mr. NORRIS. Mr. President, at the time when I was interrupted I was giving the dividends, and I had just given the dividend of the company for 1869. In 1870 it was 10 per cent, in 1871 the dividend was 15 per cent, in 1872 it was 15 per cent, in 1873 it was 15 per cent, in 1874 it was 55 per cent, in 1875 it was 20 per cent, in 1876 it was 65 per cent, in 1877 it was 15 per cent, and in 1878 it was 15 per cent.

Mr. OWEN. Is that the per cent on a capital of $1,000,000?

Mr. NORRIS. That is the per cent on the capital stock.

Mr. OWEN. Of $1,000,000?

Mr. NORRIS. Well, the amount first was $500,000. At the time of which I am speaking it was $1,000,000 and over. I will give all the details before I get through, as to just when it was increased.

Mr. GALLINGER. I will ask the Senator if the dividend is upon the original price of the stock?

Mr. NORRIS. No; the dividend, of course, is always fixed on the par value of the stock. I think it is the same with every corporation. I do not know of any exception.

Mr. GALLINGER. The Senator stated a few days ago that they made a dividend of 24 per cent last year?

Mr. NORRIS. Yes.

Mr. GALLINGER. As a matter of fact, upon the selling price of the stock the dividend was only 5 or 6 per cent.

Mr. NORRIS. That is true of every corporation.

Mr. GALLINGER. So, if the Senator had bought a share of stock a year ago he would have gotten 5 per cent?

Mr. NORRIS. Exactly. That is true of every corporation with stock. I will come to the selling price of the stock later on. The dividend is always figured on the par value of the stock.

In 1879 the dividend was 15 per cent; in 1880 it was 15 per cent. The treasurer of the company stated in a letter to Senator Spooner—I am still reading from Senator Spooner's report—and to the Hon. Samuel J. Randall, February 25, 1881, that "for the 31½ years the average of cash and stock dividends has been 16⅝ per cent." That is practically 17 per cent for 31 years. I want to quote a little further from Senator Spooner's report, from which I have been reading thus far. He shows that these dividends were made as shown by the figures of the gas companies themselves, but the investigation of his committee showed him that the figures were not always accurate. They had sometimes been at a loss to know just how to cover up the immense profits that they were making, and he calls attention in this report to one item as an illustration in the way in which some of the expenses were increased on the books above what was legitimately proper. He says:

> The committee is not satisfied with the testimony as to the cost of coal. It is for the interest of the company to carry its accounts so as to swell before the public eye the cost of the commodity which they sell. The committee feels justified in making this suggestion by the fact that in its investigation it has been developed that in this account 15 cents, or thereabouts, per ton of coal for handling after delivery to the gas company is figured as an element in the "cost of coal," and that the same item is also included in the "wages" account.

He gives this only as an illustration, and says in substance in his report that if they had had the ability to summon witnesses and to go into a thorough investigation they would undoubtedly have been able to find a great many other instances where this kind of bookkeeping had taken place. But, notwithstanding this, the enormous dividends I have read you were made.

It is interesting in connection with this subject, not as bearing alone on the question of gas, but on other public-utility activities, to notice what the committee thought even in 1886. Mr. Spooner says on page 12:

> It is not certain to the committee that the time may not come, if indeed it has not already arrived, when the best interest of the Government as a gas consumer and of the people of the District require that the United States should acquire, by purchase or condemnation, if it may lawfully do the latter, the plant of the Washington Gas Light Co. and supply gas to the inhabitants of the city and for Government uses, as it now controls the water supply. The people are certainly entitled to have put into operation in this city for their benefit the best and most approved appliances and methods for making gas cheap and pure, whatever revolution that may require in the methods now here in use. Economy and the public health alike demand it.
>
> The committee has not felt justified in recommending at this time, with its present information, that the Government enter upon the manufacture and sale of gas in this city. It is suggested here as a remedy which may be employed, if abuses under the present system shall call for it, but the committee have thought before a step so radical would be warranted, an investigation of a more thorough and scientific kind than it has been able under this resolution to make should be conducted and the testimony reported to Congress. It is hoped that the Washington Gas Light Co. will, with the patronage and under reasonable regulation by the Government, so use its exclusive privileges in this growing city as to afford a healthful and satisfactory illuminating gas at prices which shall be fair to the people and which shall bring to the company a reasonable measure of profit. More than this the company has no right to ask. With less than this the public will not be, and ought not to be, content.

I call the attention of the Senate to those prophetic words uttered in 1886 by Senator Spooner, saying, in substance, we are proposing to give to this company now another opportunity to make good, another trial to treat the public fairly and give to the public and the consumers of gas in the District the benefit of reduced prices, fair prices, and if they do not do so, it will become the duty of the Government to take over the business and operate it.

Mr. GALLINGER. Mr. President——

Mr. NORRIS. I yield to the Senator.

Mr. GALLINGER. Can the Senator inform the Senate as to the price that was charged for gas when the Spooner report was made as compared with the present price?

Mr. NORRIS. It was above a dollar—I think $1.50.

Mr. GALLINGER. It is now 85 cents.

Mr. NORRIS. It is now $1.

Mr. GALLINGER. It has been reduced to 85 cents.

Mr. NORRIS. It is $1, with a rebate of 15 cents if paid within a certain time, 10 days, I think; so you can call it 85 cents, if you desire.

Mr. GALLINGER. There was a time when, I think, the citizens of the District of Columbia paid about $10 for gas. I think if the Senator will look back——

Mr. NORRIS. There has been no time since 1848 down to this minute, March 13, 1914, when, in my judgment, they have not been paying almost, if not quite, twice too much, according to the figures that the gas company give—their own figures.

Mr. GALLINGER. But the citizens of the District of Columbia are getting gas at a little more than one-half what the citizens of Nebraska are paying for it. How does the Senator account for the discrepancy?

Mr. NORRIS. Well, I can account for that. If the gas company is making 24 per cent on its investment and charging a rate that is high enough to make that in the District of Columbia, it is no defense to say that out in Nebraska, where they pay about three times as much for coal, in cities that are smaller, they are charging a great deal more.

The Senator the other day referred to the gas in my home town, a village compared to Washington, a town of about 5,000 people. The gas company went in there only a few years ago, because we have a system of electric lighting that is used almost exclusively, and they have not a profitable business now in gas. I pay when I am at home for anthracite coal from $13 to $15 a ton.

This same report here, made in 1886, in a part which I did not read, goes into the question of the cost. They produced an expert here, who testified before them, showing what the cost of gas was at that time. His name was Vanderpoel, a coal-gas expert. He figures the net cost of pure coal gas per thousand feet to be 35.8 cents. I will later on give what the actual cost of gas was in Washington. I presume there are many other cities where the people are paying as exorbitant prices as they are here; but I submit, Mr. President, that it is no defense if I am arrested for stealing a horse that I should offer before the jury the fact that the Senator from Washington had stolen a horse and was not punished for it.

Mr. GALLINGER. No one has suggested anything of that kind.

Mr. NORRIS. Not with reference to the horse, but in reference to the price of gas the Senator did.

Mr. GALLINGER. The Senator did not.

Mr. NORRIS. Then I misunderstood him.

Mr. GALLINGER. The Senator from Missouri [Mr. REED] a few days ago, in discussing this subject, said gas could be made in a small place cheaper than in a large place.

Mr. NORRIS. The Senator from New Hampshire must not charge up to me what the Senator from Missouri claims. I never said that.

Mr. GALLINGER. No.

Mr. NORRIS. I know. I think the Senator will admit that you can not go out on the plains of Nebraska that he is referring to, where they pay a high price for gas, and manufacture gas in a city of from three to five thousand people as cheaply as it can be manufactured in the city of Washington, almost at the mouth of the coal mines.

Mr. GALLINGER. That depends on the kind of gas that is manufactured. The Senator will do me the credit to say that my suggestion the other day about the Senator's home town was brought out by the observation made by the Senator from Missouri.

Mr. NORRIS. Yes.

Mr. GALLINGER. I will now say to the Senator that so far as gas manufactured in Washington is concerned it has been pronounced by experts as among the best manufactured in the world, of a higher candlepower than is necessary, and I think much higher than is required in the State of Nebraska; that the gas is almost entirely so-called water gas, in which enormous quantities of oil are used; that only about 10 per cent of it is coal gas and 90 per cent of it is gas in which oil is used, which makes the best gas on earth.

Mr. NORRIS. They use a great deal of oil, I notice from the report of the gas company, and a great deal of coal. I do not know that it is material for the purpose of this discussion, but the proportion is about half and half.

Mr. GALLINGER. It is about 10 per cent of coal and 90 per cent of the other kind.

Mr. NORRIS. In one of the reports I have here I notice in the testimony referred to by Senator Spooner it is stated that it is about half and half.

Mr. GALLINGER. That was so at that time.

Mr. NORRIS. And in the last report of the gas company they show it about the same. Now, Mr. President, I want to submit this proposition, and if it is wrong I should like to have some Senator correct it. A corporation like the Washington Gas Co., given a monopoly within a certain territory, with a right to use the streets of the city, that belong to the public, ought to be allowed to make no more on the investment of its capital than a reasonably fair return. If that is wrong, then

my argument is based upon an erroneous hypothesis. If that is wrong, I should like to have some Senator now rise in his place and tell me what is right instead of that, if he can.

Mr. GALLINGER. Mr. President, we will soon have undoubtedly under the operation of the Public Utilities Commission, which some of us were active in creating, a valuation placed upon all these public utilities. The Washington Gas Light Co., I think, about two years ago called in some of the most famous experts in the country, and they, I apprehend, were not prejudiced men, who made a valuation of that property, and upon that valuation the company is paying between 5 and 6 per cent.

I will add that that valuation is filed with the Interstate Commerce Commission.

Mr. NORRIS. Yes; I have the valuation claimed by the company; but I will show presently that a large amount of that value was paid by the people who paid an exorbitant and unreasonable price for gas. I undertake to show, and I do not believe the Senator from New Hampshire will dispute it, that if the gas company charges, we will say, enough to make it possible for them to pay a dividend of 10 per cent on a certain amount of capital stock, whatever it may be, that that will be at least a large enough return, so that no man could say that it was unreasonably small. If they were allowed to make 10 per cent, that would certainly be a very large return on their investment. Nobody could object to that on account of its being too small, at least. But if in addition to that 10 per cent they were allowed to charge enough for what they sold to the public in a city like this so that they could lay aside 50 per cent more, and with that 50 per cent build additions, extensions, without ever putting a dollar into it themselves, they ought not to be allowed, then, the next year to come in and say, "Now, our property is more valuable, and we must get a fair return and dividend on this extension"—not one that they paid for, but that the public paid for. That is what happened in this case. That is what happened all the way through.

Mr. GALLINGER. Is not that what happens in every manufacturing concern in the world?

Mr. NORRIS. It may be the case with a manufacturing concern, but owning a plant and manufacturing anything that goes into commerce is an entirely different corporation from a public-utility corporation that is given by law not only the right to use the property of the public, its streets and its alleys, but is given a monopoly, an exclusive right, within certain defined limits, to manufacture and sell goods to the public. That is a different proposition from a corporation organized, we will say, to manufacture clothing, that must come into competition with everybody else that wishes to go into the business.

Mr. GALLINGER. Mr. President——

Mr. NORRIS. I yield to the Senator.

Mr. GALLINGER. The Senator is courteous in yielding. I want simply to say that I gave a good many months, coming from my home for that purpose during one recess of Congress, to framing with help a public-utilities-commission measure. That utilities commission has jurisdiction over this gas company and can fix the price of gas, subject to appeal, of course, as it sees proper.

Now, Mr. President, I rose to say to the Senator that I will not interrupt him again——

Mr. NORRIS. I have no objection to the Senator interrupting me at any time. I am very glad to have him do so.

Mr. GALLINGER. But when the Senator gets through I will take two or three minutes to make a simple statement about what has been done, so far as this gas company is concerned, during the time I have been a member of the committee that had more or less jurisdiction over that corporation.

Mr. REED. Mr. President——

The PRESIDING OFFICER (Mr. POINDEXTER in the chair). Does the Senator from Nebraska yield to the Senator from Missouri?

Mr. NORRIS. I yield to the Senator from Missouri.

Mr. REED. I desire to ask the Senator from New Hampshire a question. If the Public Utilities Commission have absolute jurisdiction over the question of the price of gas, upon what pretext do they compel the people of Georgetown to pay more than the people of Washington are compelled to pay?

Mr. GALLINGER. Mr. President, I will answer that by saying that the Public Utilities Commission has scarcely got to work yet. We made a small appropriation for the board. It is proposed to make a much larger appropriation this year, and under that appropriation they will proceed to ascertain the value of these properties and have the data upon which to fix the price. That is my answer to the Senator.

The board is undoubtedly constituted of most excellent men, and from my knowledge of those men I will say that they are men who are inclined to take a pretty strong position against monopolies or against placing any burdens upon the people in this District which they ought not to bear.

Mr. REED. The bill was passed and the commission created, I think, about a year ago, and a commission for any town would get busy in 30 days to ascertain the cost of the plant, its value, and the cost of producing gas, if it is a live commission.

Mr. POMERENE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Ohio.

Mr. NORRIS. I yield to the Senator. I will say, however, I hope Senators will not go into a discussion as to these two gas companies, because it is not pertinent to the amendment that I have offered.

Mr. POMERENE. I simply desire to make a suggestion to the Senator from Missouri. I know from personal interviews with one of the commissioners that their work as a Public Utilities Commission has been very much hampered, because they were not provided with the necessary funds to do this work, and in my judgment the fault lies with Congress, in not providing the necessary funds, rather than with the commission.

Mr. REED. Will the Senator from Nebraska pardon me just one word? A public utilities commission required to pass upon a question of this kind, having the example of one gas company furnishing gas in this very city for 85 cents, does not need to spend much time investigating it. It ought to spend a few minutes writing an order and do the investigating afterwards.

Mr. NORRIS. Mr. President, I did not intend to discuss the public-utilities proposition, but I want to say, since it has been brought up, I have great confidence in the members of the Public Utilities Commission, and I have no doubt but that in due time, when the money is furnished, it will go to the bottom and make an investigation of this corporation. But the amendment that I have offered, at least as far as that amendment goes, can be ascertained by the report of the gas company itself. I would not ask any Senator to vote for the amendment if he did not believe, taking the figures of the gas company, that they demonstrate that this amendment is fair.

You will notice also that the amendment makes provision for the Public Utilities Commission and provides that nothing in it shall be construed as in any way taking away their power to make a further reduction. If you will permit them to bring in only a fair return, and for the sake of argument let us say that the return is 10 per cent, there is not any question on earth but that if you will limit the price of gas so that they shall make only 10 per cent on the money they have invested in this business, the price might be reduced 10 or 15 cents lower than the price named in the amendment.

Now, Mr. President, coming to a more modern date, I have here the report of the gas company for the year ending December 31, 1906. I find that they paid a dividend of 10 per cent and set aside a surplus of $170,879.83. A peculiar thing has occurred there. I have not gone back in these reports further than the year 1906. I wish Senators would give attention particularly to this point. They had issued what they called in their report "dividend certificates of indebtedness"—$2,600,000 were issued without one cent of consideration.

Bear in mind that their capital stock at that time was $2,600,000—the same as it is now. I am speaking now of 1906. They gave to every stockholder a certificate, showing that the gas company was indebted to him to the amount of the stock that he held; in other words, they practically doubled their capital stock by issuing those certificates. Those certificates bore 6 per cent interest. So, while their own returns show that their stockholders had received a dividend of 10 per cent, in reality they had received a dividend of 16 per cent, for every stockholder got not only his 10 per cent dividend but he got 6 per cent interest on his certificate of indebtedness, equal in amount to the stock he held, for which he had not paid one red cent.

The next year, 1907, taking their own report—and I am arguing now entirely from their figures—they had again paid a dividend of 10 per cent and also 6 per cent additional to every stockholder on his share of the $2,600,000 of certificates of indebtedness still outstanding, making a dividend of 16 per cent on the capital stock. In addition to all this they made extensions amounting to $130,602.44, which was increasing the value of their property, but it was not doing it with their money. In addition to this enormous dividend of 16 per cent which they took from the consumers of gas—over $130,000, which they invested in extensions—they also set aside for depreciation that year $144,068.96. Think of that one year's transactions now—16 per cent dividend, extensions for more than $130,000, and over $144,000 set aside for depreciation,

every cent of it coming out of those who paid for gas that they consumed in their homes.

Now, let us take the next year, Mr. President, which was 1908. The same thing again happened as to dividends. A dividend of 10 per cent was then paid, and 6 per cent interest was also paid on $2,600,000 of those certificates of indebtedness, making another dividend of 16 per cent. That year, in addition, they made extensions of over $323,000. They added that much to the value of their property; and on the theory, I judge, of the Senator from New Hampshire, the next year they would be entitled to charge to the consumer of gas enough to make a dividend on that money which the consumers gave to them. They set aside that year for depreciation over $155,000.

The next year was the year 1909. They then paid a dividend of 20 per cent, and they were still paying interest on this $2,600,000 of certificates of indebtedness for which the stockholders had not paid a cent, making a dividend that year of 26 per cent. They set aside as a surplus that year $238,355.03.

The next year was 1910. They paid a dividend that year of 13½ per cent; they set aside as a surplus $106,796.51; they set aside for depreciation $64,251.02. They did that year another thing different from what they had done the year before. I described to you how this $2,600,000 of certificates of indebtedness had been issued. I will illustrate it in this way: If the Senator from Kansas [Mr. BRISTOW] had owned $100 worth of the stock, they would have given him a certificate of indebtedness for $100. During the preceding years they had all the time been paying him 6 per cent on that certificate, though he had never paid a cent for it.

The holders of the stock had for several years carried these certificates of indebtedness, for which they had paid nothing. It was only one method of covering up an extra dividend to the stockholders. They had been receiving 6 per cent all the time. That year they did a remarkable thing. They took up these certificates of indebtedness; and if the Senator from Kansas had had $100 worth of stock and $100 worth of certificates of indebtedness they would have given him a hundred dollars for the certificate. So they had not only taken from the consumers of gas a sufficient amount of money to pay interest on this certificate of indebtedness, that represented nothing in the world but water, but that year they changed the water into pure gold, paid it out in cash, and issued bonds in place of it. So from that time on, instead of carrying the certificates of indebtedness, they have been carrying bonds; so that they gave to their stockholders that year, if you figure it out and put it in plain English, a dividend of 13½ per cent and another dividend of 100 per cent, because every stockholder had just as large an amount of certificates of indebtedness as he had of stock. They paid it out in full. This, in reality, made a dividend of 113½ per cent. That was the year 1911.

Now we come to 1912. That year the company paid a dividend of 24 per cent. They built extensions, in addition to that, out of the money that they received from the sale of gas, amounting to $172,821.18, and they set aside for depreciation $64,660.60.

Mr. President, the Senator from New Hampshire interrupted me a while ago and asked me what the people here were paying for gas away back in 1886, and I stated that it was over a dollar; but at that time I think Congress passed a law limiting the price to $1. I have the average price of gas which they sold in 1912, the year I am speaking of, when they paid a dividend of 24 per cent. They then built additions amounting to over $172,000; they set aside over $64,000 for depreciation, and got 83 cents and 74 mills as the average price of gas. So what has been true in thousands of other cases we find to have been true here, that when you reduce the price of a commodity which a corporation of this kind sells you increase the number of consumers and the amount that the individual consumer uses, and you increase the revenue and increase the dividends; so that, while they had reduced the price of gas——

Mr. NELSON. How much?

Mr. NORRIS. To 83 cents; that is what it averaged on the whole. They sold a good deal of it for more than a dollar; but probably most of it was sold for 85 cents; but all of the gas which they sold averaged a little over 83 cents for 1,000 cubic feet.

Now, mark you, Senators, I am discussing their report. Anybody can send to the document room and get the report for any of these years and obtain from them the same figures. They are, however, not given as I have given them; you have to figure them out sometimes, which makes it a little difficult for you to get at the real facts, but they are all there. There is not anything that I have stated here that is not demonstrated by their own reports.

The facts are that they have had difficulty for more than 60 years in covering up their enormous income and trying to keep from the public the knowledge of the profits which they really make.

Now, we come to 1913, the last year for which we have a report. We find by that report that they have again paid a dividend of 24 per cent; that they have increased by extensions the value of their property over $161,000; that they have set aside for depreciation over $37,000; and that the average price of gas was a little over 82 cents per thousand cubic feet. That is the last report that has been made.

Mr. President, I want, as I promised a while ago that I would, when some Senator interrupted me, to give you the history of the increase of the capital stock and just how it was paid in. This company was organized in 1848 with a capital stock of $50,000, $37,500 of which was paid in cash and $7,500 of the stock was issued without any consideration. In 1852 the capital stock was increased $300,000, and the increase was paid in cash. In 1858 the capital stock was again increased by $150,000, all paid in cash. In 1866 the capital stock was increased by $500,000, all paid in water; it was purely a stock dividend.

I want to say, however, in connection with that matter, that the books were burned, and there is nothing definite about it. As I think I showed—I do not remember—from the committee report, made in 1886, it appears that the books of this company were destroyed. They were purposely destroyed; in fact, they got $100 for the books. They took all the books that they had—made a clean sweep of everything—and sold them to a paper-manufacturing company for $100. They thus blotted out the past entirely; so that there is a good deal of mystery back of that, as to just what the books would show if we had them. It is said, however—and I want to be fair to them—that, as to that $500,000 stock dividend, two years before they had not paid any dividend. Former Senator Spooner said in his report that that statement was doubtful, and he was unable to say whether it was true.

In 1872 they added $200,000 more to their capital stock, all paid in cash. In 1876 they added $300,000 to their capital stock, paid in cash. In 1882 they added $500,000. That was paid in cash. In 1896 they added $600,000, all of which was water. That was the stock dividend that I have had something to say about in the past.

Mr. BRISTOW. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Kansas?

Mr. NORRIS. I yield.

Mr. BRISTOW. Does the Senator know whether the money which was paid in cash for this additional stock was expended in betterments of the property, or was there a "melon-cutting" of some kind among the stockholders—a dividing up of this money in the company's treasury as a result of the sale of this stock?

Mr. NORRIS. Back of the time when the books were destroyed there is not any evidence one way or the other, excepting what might be surmised from some things that have happened and from what former Senator Spooner said in his report, but I can not give the Senator from Kansas directly the information for which he asks, except in so far as I have given it. There are other things connected with the matter. I want the Senator to remember that the figures I am giving are from the company's own reports. No Senator can tell what an impartial and thorough investigation which would go behind the company's own reports might show; but this appears from their own showing——

Mr. McCUMBER. Mr. President——

Mr. NORRIS. I yield to the Senator.

Mr. McCUMBER. I merely want to ask the Senator if the $500,000, which he says was issued without any cash being paid, was out of a surplus which had been accumulated, or for what purpose was it issued?

Mr. NORRIS. It was simply a stock dividend as the others were. The company had too much money in their hands, and they had to do something with it. If the Senator heard the beginning of my remarks, he will recall that I said that at one time they paid dividends as high as 65 per cent. Of course that did not look well on the books; the public would have become worked up about it, and they would have begun to protest about the price of gas.

Mr. McCUMBER. Then, this additional $500,000 really meant a surplus which they had gathered, and was paid out in new stock.

Mr. NORRIS. Yes, sir. Now, adding up the columns of figures, we find that the company have a capital stock of $2,600,000, of which $1,492,500 has been paid in cash, and the balance, $1,107,500, is made up either of water or of stock dividends, whatever you please to call it; at any rate, it was not paid in by

the stockholders, though the dividends have been paid on a capital of $2,600,000. Last year the company paid 24 per cent on that valuation, although the stockholders never put in more than $1,492,500 of that capital, if they paid in that much.

Mr. STERLING. What was the total capitalization?

Mr. NORRIS. Two million six hundred thousand dollars. I believed I promised, when some Senator interrupted me awhile ago, to give the actual cost of the gas manufactured during the last year.

Mr. GALLINGER. Mr. President——

Mr. NORRIS. Will the Senator allow me to finish this statement before he interrupts me?

Mr. GALLINGER. Certainly.

Mr. NORRIS. After I have done that I will be glad to yield to the Senator. I will say that this computation which I am about to give was not made by me; it was made by Mr. Williams, who is the statistician of the Public Utilities Commission of the District of Columbia. He assures me that he has made it entirely from the figures in the reports of the gas company itself, and he tells me that anybody can deduce the same figures by making the computation from the reports of the gas company. His figures include all of the items of expense which they claim, and on this basis he says that the actual cost of producing 1,000 cubic feet of gas in 1913 was 47.26 cents.

I gave those figures the other day when the Senator from Missouri [Mr. REED] was speaking, and the Senator from New Hampshire [Mr. GALLINGER] interrupted and said that they did not include the distribution cost. I told him that I thought they did; but the Senator was so emphatic about it that I did not wish to dispute him; so I again took the matter up with Mr. Williams, the statistician, and he told me that these figures cover every item of expense, including distribution cost, and, more than that, they make an allowance of 7 cents on each 1,000 cubic feet of gas for the depreciation of the plant.

Mr. GALLINGER. I will ask the Senator if the cost he has given includes overhead charges?

Mr. NORRIS. It includes overhead charges and everything else.

Mr. GALLINGER. I think there is not a gas company in the world that would not like to employ that man and have him make gas for them at that rate.

Mr. NORRIS. That may be; but, Mr. President, if you will take the figures the gas company give and the per cent of dividends they have paid, you must reach the conclusion that they are making gas at a cost which is away down below what they are selling it for, and that they are receiving an enormous profit of 24 per cent, even taking their own figures, which at least would not be unfavorable to the gas company.

Mr. Williams, the same statistician, also gives me figures as to the average price received for the gas consumed. You must remember that in the manufacture of gas there is a certain per cent that is lost by leakage, also lost through bills that can not be collected, and from other causes; but taking all of the losses, whether caused by leakage, by unpaid bills, or otherwise, the figures show that the company has received for the gas which they manufactured, whether it has run away in leaks, whether it has been given away, whether it was used by themselves, or paid for or sold and the charges therefor uncollected—they have received during 1913 for all of the gas they have manufactured 74.38 cents for each 1,000 cubic feet. That, as I have said, includes loses of all kinds, and it shows an average profit on all the gas which they have manufactured, whether or not it was lost, of 27.12 cents on each 1,000 cubic feet.

Here is something else about these figures which I want to call to your attention. While they include the total cost, the distribution charges, and everything else, there are other sources of income of the gas company which are not included in the figures of profit I have given. They sell a great deal of coke and other articles.

Mr. McCUMBER. May I ask the Senator a question right there?

Mr. NORRIS. Let me finish this first. They have received during the last year $26,754.17 for coke, $5,010.77 for tar, and $2,252.89 for ammoniacal liquors, making a total, as I figure it, of $33,308.95. That is not included in the figures which I have given you—and it is all clear profit—but the cost of producing all these things is included in the figures which I have given you. Now I yield to the Senator from North Dakota.

Mr. McCUMBER. I merely want to ask the Senator whether the costs were increased very materially by excessive salaries in the management, as is often the case in corporations? If the Senator could tell us what are the salaries of the president, vice president, and other high officials, I should be glad to have the information.

Mr. NORRIS. I have seen a memorandum of the amounts paid for salaries during the last year, and I do not think they are very exorbitant; but, of course, these reports do not give the salaries. As I have said to the Senator, I have been basing my argument entirely on the reports. For instance, since the Senator has mentioned it, I will call his attention to one item in the report for the year 1912, as follows: "Administrative expenses, including law expenses, $81,689.83." That is as nearly as I can give it to the Senator. It is not itemized. It may be all right, but to me it looks pretty big; and there are a good many other items here which, if Senators would run through them, they would probably be apt to think quite large; but I have not gone into them, because, as I have said, I am basing the deductions which I have made entirely on the company's own figures. I am taking them at their face value. We would find perhaps some interesting things if we went behind the returns.

Mr. GALLINGER. Mr. President——

Mr. NORRIS. I yield to the Senator from New Hampshire.

Mr. GALLINGER. The Senator would find one interesting thing at least, and that is that during that year an investigation was forced upon this corporation which cost them a great deal of money. Some of the newspapers in this city would not publish a line of it without being paid so much per line, and a great many thousand dollars were paid into the coffers of the newspapers of Washington in that way. That was their way of treating the matter. The Senator would find that out if he investigated the matter.

Mr. NORRIS. I would be glad to find that out; I would be glad to go into that if the gas company would furnish it in their reports, but I do not think there is anything in the item which I have read to indicate that that is the case.

Now, I should like to say to the Senator from New Hampshire, on the newspaper proposition, that up to—I do not know when; I could find it here if I would take the time—but up to a few years ago, at least, the proprietor of one of the greatest newspapers in Washington was also president of this gas company, and I judge that while he was running a newspaper with one hand and the gas company with the other he was not letting the newspaper hurt the gas company very much. It might have been one way of covering up some of the dividends to have said to the gas company, "Let us pay for a lot of advertising in this newspaper; we only take it out of one pocket and put it into the other."

Mr. GALLINGER. I feel very sure, Mr. President, that that newspaper did not do that.

Mr. NORRIS. I am not saying that they did; but I say, if the Senator is going into suppositions, as he did about the newspapers at least, that one of the leading newspapers—and I presume the leading newspaper—was owned by the same man who was running the gas company.

On that point I should like to say, Mr. President, right here that we have seen in the Washington newspapers for the last several weeks a great deal about taxation. Some of the people have been worked up to the point of hysterics, and perhaps their fears may be well founded. I am not going to argue that proposition; I may be with them when it comes to a vote; I am willing to consider the question, at least. But I am only using it here as an illustration, because the Senator has called my attention to the manner in which the newspapers have abused this gas company.

Mr. GALLINGER. Oh, no.

Mr. NORRIS. I understood the Senator to say that they did; that they held up the gas company and made them buy advertising matter.

Mr. GALLINGER. The gas company paid for the report of the hearing as advertising matter.

Mr. NORRIS. Very well. They treated the gas company a good deal like the newspapers frequently treat political candidates who are running for office.

Mr. GALLINGER. Yes; and I think that is wrong.

Mr. NORRIS. I have always thought so when I was running for office, at any rate.

A committee of 100 has been appointed to call on Members of Congress, and all the newspapers of Washington for several weeks have been filled with arguments against a bill which has passed the House of Representatives, or was about to pass that body—I do not know whether it has passed or whether they thought it might pass—but, at any rate, a question of taxation is involved, and they have been saying "Congress is going to increase our taxes." All the newspapers are worked up about it; the people of Washington are worked up about it; they are excited about it; but, Mr. President, if Congress were to pass that bill and enact it into law it would not increase what the taxpayers of Washington have to pay more than one-

twentieth of what they have paid, erroneously and wrongfully I believe, to this gas company for the last 60 years. We do not hear the newspapers crying out against this gas company now. We do not see the newspapers calling the attention of Congress to the fact that this gas company, with a capital stock nearly half of which is made up of stock dividends, is paying a dividend of 24 per cent besides various other things; and yet the people of this District have paid, and are paying, more to this gas company above a reasonable and fair profit on the money invested than they would pay on account of increased taxes in the lifetime of every man who lives in the limits of the District if the bill which they are now fighting were passed.

A year or two ago, Mr. President, we became excited—and I was one of those in that category—about the loan sharks in Washington. We enacted a law limiting the blood money which the loan sharks could take from the unfortunate victims who were often compelled to borrow money from them. We limited the amount of interest which the loan sharks could collect. Washington was worked up about the matter. Recently cases have been commenced in court against the so-called loan sharks to bring about a just punishment. I was one of those who helped to pass the bill; I did what I could to get it enacted; I believed it was right, and I am not complaining of that law; but all the money which the loan sharks ever took from the people of Washington would not be a drop in the bucket compared with the enormous amount of excess charges that the people who consume gas in this District have paid for 60 years to the Washington Gas Light Co. We hear nothing about that, although the stockholders of the gas company, a great big corporation, having a monopoly by law over most of the District, receive a return on an average of from 20 to 50 per cent, with stock dividends sometimes, as in the instance of their certificates of indebtedness, amounting to 100 per cent; and in other instances, quite a number of years back, it is true, of 62 per cent, and other great dividends of 50 per cent, 20 per cent, 25 per cent, and 24 per cent. That has become almost a common, every-day occurrence. The loan sharks have not been in it with this gas company. The gas company is charging over 2 per cent a month now. You do not allow the loan shark to do that. In addition you give the gas company the use of the public streets and a monopoly in the city. The loan shark has competition and has no exclusive use of the streets. An ordinary loan shark will hold up both hands and surrender when he runs up against this gas company.

Where have these enormous amounts come from, Mr. President? They have come from the poor people of this District, whom we ought to be here to protect. Are we making a model city of this Capital, as we boast we would like to do, when we will give to a corporation a monopoly of this kind? It seems to me the responsibility is on us. Are we going still to remain idle here and let a corporation that for 60 years has been carrying on this business continue to do this?

Mr. President, I have asked that the price of gas be reduced to 75 cents per 1,000 cubic feet. As I said in the beginning, if, instead of getting 85 cents during the last year, when they did charge that, they had received 75 cents they would have made a dividend of more than 14 per cent, according to their own figures. Then what is the danger of cutting it down during this next year to 75 cents per 1,000 cubic feet, when by that time the Public Utilities Commission will be able to finish their work and will undoubtedly reduce it still lower?

I am aware that the Senator can give statistics of other cities showing a higher rate. That is true. I have no doubt of that. There are some cities that pay a lower rate, and I have some here on my desk that I could give, but I did not consider it the right thing to do, because I started out on this proposition: I am going to take their own figures and assume that they are all right, and if they are all right these deductions must follow. It is a mathematical proposition. There is not any possibility of getting away from it. That being true, we can afford to take the step, it seems to me, of reducing the price at least to 75 cents per thousand cubic feet.

Mr. GALLINGER. Mr. President, as I understand the matter, a point of order has been made by the Senator from Maryland [Mr. SMITH] against the proposed amendment. In view of that fact, I shall take but two or three minutes.

Mr. NORRIS. Does the Senator from Maryland intend to insist upon his point of order?

Mr. SMITH of Maryland. I do.

Mr. NORRIS. Then, if the Senator from New Hampshire will permit me, is the Senator from New Hampshire going to address himself to the amendment offered by me?

Mr. GALLINGER. For a few moments.

Mr. NORRIS. Very well.

Mr. GALLINGER. Mr. President, this gas controversy is an old matter. The so-called Spooner report has been the text for a great many speeches precisely such as the Senator from Nebraska has made to-day. Since that investigation, which was somewhat famous in its time, I think at least half a dozen other investigations of this gas company have been held. Just what they found, I do not know. I was associated, I think, as a member of a committee, with one of those investigations; and while it was evident that the gas company had in its early days and perhaps in its relatively later days made larger profits than it ought to have made, it did not appear at any of those investigations that it had done all of the wicked things that the Senator from Nebraska has pointed out.

I wish to say, in passing, that the District of Columbia is being used as an experiment station by Senators who come from States where they pay twice as much for gas as is paid in the District of Columbia to make speeches, I suppose, for home consumption. I do not know what other purpose they can have in view. It is a prolific field for oratory.

Mr. NORRIS. Mr. President, will the Senator from New Hampshire yield to me for a moment?

Mr. GALLINGER. Certainly.

Mr. NORRIS. I should like to suggest to the Senator that his supposition in my case is entirely erroneous. If he has any idea that I am moved here by any other desire than to do some good to the people of the District who consume gas, I should like to have him say it in explicit terms instead of indirectly.

Mr. GALLINGER. I spoke in general terms. The Senator can attach to my words any meaning he chooses. I think if the Senator should go to McCook, Nebr., where he lives, and go before the common council, if they have one, and declaim against those people being compelled to pay a dollar and a half for gas when the citizens of the District of Columbia get it for 85 cents, he might be doing a service to his own city and his own people.

Mr. BRISTOW. Mr. President——

The VICE PRESIDENT. Does the Senator from New Hampshire yield to the Senator from Kansas?

Mr. GALLINGER. I do.

Mr. BRISTOW. I feel that the reference of the Senator from New Hampshire to the Senator from Nebraska——

Mr. GALLINGER. I do not yield for that purpose. The Senator from Nebraska can take care of himself without any help from the Senator from Kansas.

Mr. BRISTOW. That is quite true; and if the Senator declines to yield now——

Mr. GALLINGER. I do decline for that purpose.

Mr. BRISTOW. I will take my own time to express my views on the Senator's reference.

Mr. GALLINGER. The Senator can do that.

When I became a member of the Committee on the District of Columbia—and I am gratified to know that I am not a member of that committee now—in Georgetown the consumers of gas were paying a dollar and a half per thousand cubic feet, and in the city of Washington proper a dollar and twenty-five cents. The late Senator McMillan was chairman of the committee at that time, and after a long hearing an item was placed in the bill reducing the price of gas in Washington 5 cents per year for five years, so that in five years it was reduced to $1.

Since that time I was somewhat actively connected with that committee for a good many years as chairman, and it was my constant endeavor to secure a fair reduction in the price of gas from year to year. The consequence has been that in Georgetown it has been reduced from a dollar and a half to $1, and in the city of Washington proper from a dollar and a quarter to 85 cents.

It may be that the reduction has not been sufficient, but it has seemed to me to be a very considerable reduction—40 per cent at least. I think if we allow this matter to go along, it being now in the hands of the Public Utilities Commission, if it shall be found that the facts warrant it, and not simply upon the figures presented in a speech here which have been furnished to the Senator by somebody, the price of gas will be further reduced in the District of Columbia. It ought to be done, however, upon a careful, honest, and impartial inquiry, and not merely upon the wishes of some individual or some body of men.

I have alluded to the price of gas here. I put in the Record the other day a table showing that gas is being furnished in Washington cheaper than in most other cities of the United States of the same size, and very much cheaper than in the cities of the United States with a smaller population. It may be that we ought not to regard that as controlling in any way. I do not contend that we ought to regard it as controlling, and yet it is a circumstance that we can not entirely ignore.

In New Hampshire we have an active public utilities commission; a commission that does not spare corporations; that goes into their affairs with a great deal of earnestness and zeal; and it has been looking into the price of gas in New Hampshire, more or less. It has found—and no present complaint is being made about it—that the average price of gas in New Hampshire is $1.10 per 1,000 cubic feet. At a time when we were paying in New Hampshire from $1.30 to $1.50 per 1,000 cubic feet, an emissary was sent into the State of New Hampshire, imported from the State of Iowa and financed in the city of Washington, to defeat me for reelection on the ground that I was a friend of the gas company of the District of Columbia. Of course, however, he did not find any comfort when he confronted a community where they were paying $1.30 and $1.50 for gas, as compared to less than $1 in the District of Columbia; and in due time he folded his tent and returned to his home, and I was reelected, notwithstanding that I was pictured in a certain Boston newspaper in great headlines, paid for at so much a line, as a "friend of the Gas Trust."

I have no relations to the gas company. I have never received a favor from them in my life. I never expect to. I want them to be compelled to furnish their gas at as cheap a rate as they can furnish it and pay a fair return to the men and women who have invested their money in that property.

The Senator talks about a 24 per cent dividend last year. Why, a widow came into my office two weeks ago and said that she had bought some gas stock two years ago, I think, and that she was receiving between 5 and 6 per cent dividend on it; and she said she thought it was not a fair dividend, because it was said they were making a much larger dividend than that. Upon the present price of gas stock—and I apprehend it is not excessive; it is on the market; it is listed—between 5 and 6 per cent is being paid at the present time.

Mr. President, I do not know that I ought to say more. As I said a moment ago, this matter is in the hands of the Public Utilities Commission. They will be given $110,000 in the deficiency bill, as I understand, to carry on their work. We voted them $40,000 when the commission was created. It was not enough. There are men, earnest men—the Senator from Nebraska knows them—who, I think, entertain the view, very likely, that these corporations ought to be compelled to furnish service cheaper than they do at the present time.

In this connection it is interesting to note that Senators come here from cities where they pay a straight 5-cent car fare, and they get car fare here for 4½ cents, with underground construction, which costs three times as much as the construction in some of the cities from which they come, and yet they complain about the extortions of the street car companies of the city of Washington. It is a favorite theme. I do not sympathize with it. I do not believe that after all the people of the country will be very much moved to believe that extortions are practiced here to the extent that is being pictured.

I have suggested that in New Hampshire we pay, net, $1.10, and from that up to $1.30 and $1.40, at the present time, for gas. I consume it in my home in Concord. I consume it in my home here. I wish it were cheaper there. I wish it were cheaper here. Yet we are not going to cheapen it by oratory, and, of course, we are not going to cheapen it by putting, or trying to put, an amendment on an appropriation bill which will go out on a point of order.

The Senator says they pay more for coal in Nebraska than they do in Washington. That is true, no doubt. They pay less for oil in Nebraska, however, than they do in Washington. The gas here is made almost exclusively from oil, 90 per cent, and it is very expensive.

Here the gas companies are required by law to supply gas of 22 candlepower. It is an excessive rate. In London they have 14 candlepower; in Boston they have 16; but in Washington we compel the companies by law to make gas of 22 candlepower, and it costs money to give that excessive lighting power. Last year their candlepower averaged 22.87. The gas is inspected every day by a Government inspector, and they are kept up to the prescribed candlepower, and they are fined if for a single day it falls below the standard. In Nebraska and in New Hampshire the candlepower required is less than 20, as compared with 22 here. That is never taken into consideration, however, as of course it would be and will be if there is ever a careful investigation made of all the facts connected with the manufacture and distribution of gas in the District of Columbia.

I think the Senator is right in saying that it costs more to manufacture gas in a small town than it does in the District of Columbia. I think I was right the other day when I said it costs less in New York City than it does in the city of Washington, although the Senator from Missouri [Mr. REED] challenged that statement. Why should it not?

Take Broadway, in New York. Take the downtown section of New York. Why, in a quarter of a mile they have more gas meters there than there are in half the District of Columbia. It may cost a little more to put mains in those streets, but it certainly costs less to distribute the gas, because in a single building 35 stories high there is as much gas distributed as there is in the whole of the city from which the Senator from Nebraska comes, I apprehend; and it is very cheap distribution.

Mr. President, I know there is not any argument in it, and yet it is well enough to call attention to the fact that in the State of Nebraska the lowest price at which gas is furnished in any city is $1.15, and it runs from that up to $1.90. I hope the people of Nebraska are getting their gas as cheaply as they ought to get it. If they are not, I hope a movement will be made in Nebraska to compel cheaper gas to be furnished to the citizens of that great State.

I might say more, Mr. President, but it is not necessary. My position in Washington has been utterly and absolutely misrepresented in certain quarters. I think I know who is agitating this question at the present time, but it is inconsequential what people say about me when I am discharging my duty. I shall continue as long as I remain here, be it longer or shorter, to try to hold the balance even between the consumer on the one hand and the producer on the other. I try to do that; and if that is doing injustice to anybody, I am willing to suffer the penalty.

Mr. McCUMBER. Mr. President, before the Senator takes his seat, may I ask him if he challenges the statement made by the Senator from Nebraska that the actual cost of producing gas here is about 47 cents per thousand feet?

Mr. GALLINGER. Mr. President, I am not a gas expert.

Mr. McCUMBER. I assumed the Senator had some information on the point.

Mr. GALLINGER. I chance to have friends who know a great deal about the question of gas, and I know the statement has been challenged. It has been challenged before the Committee on the District of Columbia within 10 years. It was challenged in a hearing that we had there. I can not turn to it now. I think probably it is not an absolutely correct statement. I have an impression, from what I know about the matter, that the cost of manufacturing gas in the District of Columbia is larger than the figure at which it has been placed by the Senator from Nebraska. It seems to me inconceivable that the statement can be correct. If it is correct, if that covers all the charges—overhead charges, manufacture, distribution, and all the other charges—I think the price of gas can be reduced to some extent in this District. Yet, in addition to the mere matter of the cost of the gas, there must be considered other matters which go into the calculation, which of course would be brought out only after a very careful and impartial investigation.

I assume that the amendment will go out on a point of order, and I think I ought not to detain the Senate further.

Mr. SMITH of Maryland. I ask for the ruling of the Chair on the point of order.

Mr. NORRIS. I will concede that the amendment I have offered is subject to a point of order. If the Senator from Maryland insists on the point of order, I will withdraw the amendment, and I will offer one that is not subject to a point of order. I send it to the desk.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. At the end of line 15, page 104, it is proposed to add:

**No part of any money appropriated by this act shall be used for payment to the Washington Gas Light Co. for any gas furnished by said company at a rate in excess of 70 cents per 1,000 cubic feet of gas so furnished for use in any of the public buildings of the United States or the District of Columbia.**

Mr. NORRIS. Mr. President, this amendment, of course, is not subject to a point of order, because it only applies to the appropriation in this bill. It fixes the amount at 70 cents instead of 75, because it is a great deal easier for the gas company to collect from the Government of the United States and from the District of Columbia, to which appropriations are made by this bill, at the rate of 70 cents than it would be to collect at the rate of 75 cents from private consumers, where they have to make out bills to every one every month.

While I am on my feet I wish to say just a word in reply to what the Senator from New Hampshire has said. He seemed to think this amendment was an attack on the Senator from New Hampshire.

Mr. GALLINGER. Oh, no; I did not think that.

Mr. NORRIS. If the Senator did not think it, he came very near saying it at various times in the course of his remarks.

The fact is that it is unbecoming, it seems to me, for the Senator from New Hampshire to charge, as he did at least indirectly, that in offering this amendment I was moved by the fact that I wanted to make political capital out of it at home, that such amendments were offered for the purpose of circulating out home. I assured him at the time he made the remark that there was not any such intention. I can only give my word to the Senator, of course, that I was moved only by a desire, however foolish it may be, to benefit the consumers of gas in the District of Columbia.

I wish to say to the Senator, however, that he has not produced and he can not produce a single iota of evidence to show that this amendment was offered with the motive he attributes to it or that ever in my public life have I offered such an amendment. If the remark had come from some one who was a politician rather than a statesman you could understand why such a charge might be expected; but coming from the Senator from New Hampshire, who even this day has had his name assigned to a hospital, that is going to be erected here, for his statesmanship and his guardianship of the District of Columbia, it seems to me it comes with poor grace.

He starts out, too, by saying: "Why, out in McCook, where the Senator lives, they pay a dollar and a half for gas." The same statistics which he read, if he had read them further to the Senate, would have shown that there were only 250 consumers of gas in that city.

Mr. GALLINGER. That is all.

Mr. NORRIS. In the city of Washington, in the case of this company about which we were talking, there were during the year 1913—and I take it that is exclusive of the Government business and the District business—56,941 meters. The total number of consumers' meters in use December 31, 1912, was 56,941. Yet the Senator wants to compare the price of gas here with a little town where they have to pay from $13 to $15 a ton for coal. That may be a good argument from the Senator's point of view.

For the sake of the argument, however, let us assume that I am moved by improper motives in offering this amendment. Let us assume that the insinuations of the Senator from New Hampshire are true, and that I want to make political capital in some distant place out of some amendment that I am offering here in the Capital City of Washington. Suppose I am that kind of a man; does it make any difference with the facts I have produced? Is that an answer to the argument that the Washington Gas Light Co. are charging an exorbitant rate to the people here who give them a monopoly of the business? Shall we say for them, if it has been demonstrated from their own figures that this rate ought to be cut down, "You must not cut it down, because the man who makes the motion is not moved by the Christian spirit that he ought to possess"?

Why, Mr. President, in all the argument I made I made no reference to the Senator from New Hampshire, except to answer his interruptions. It strikes me that it comes with poor grace from a man of his experience to attribute to me motives that never existed and that were never thought of. It is a common thing, if a lawyer has no evidence to back up his case, for him to put in his time trying the prosecuting witness or abusing the other lawyer; but it is not evidence, it is not logic, and it is not becoming to a Senator of the United States.

The Senator from North Dakota asked the Senator from New Hampshire whether he had anything to say about these figures. I gave the source of my information as to the cost. I told the Senator from North Dakota just where I got it. The other day, when I gave the figures, the Senator from New Hampshire said they did not include overhead charges; and if you heard him say it, and were here when he said it, you know that the way he said it was such that no man would dare dispute him without being subject to criticism. It had a finality and an emphasis about it that simply said: "Oh, no; that does not include it," although I said it did. "No, it does not"; and nobody dared dispute it, of course. I had to submit to it.

Mr. GALLINGER. Mr. President——

Mr. NORRIS. But the expert who did the figuring tells me that it does include it. It includes taxes——

Mr. GALLINGER. Mr. President, will the Senator permit me?

Mr. NORRIS. Yes.

Mr. GALLINGER. I asked the Senator in the first place if it included distribution. The Senator said he did not know; he was inclined to think it did. I suggested that I was inclined to think it did not, and that was all there was to it.

Mr. NORRIS. If the Senator will read in the RECORD just what happened, and it is right before him on the desk, he will find that he has not stated it correctly now.

Mr. GALLINGER. I wish the Senator would put it into the RECORD to-morrow morning, and then I will read it.

Mr. NORRIS. It is in the RECORD now, right on the Senator's desk.

Mr. GALLINGER. It is in some RECORD. I do not know what RECORD it is in.

Mr. NORRIS. It is in the CONGRESSIONAL RECORD.

Mr. GALLINGER. Of course it is in the CONGRESSIONAL RECORD, but I have not that particular CONGRESSIONAL RECORD before me.

Mr. NORRIS. The Senator will find, if he will read the CONGRESSIONAL RECORD, that he has not given a correct statement.

Mr. GALLINGER. I think I have given a correct statement.

Mr. NORRIS. Mr. President, if you even quoted it from the RECORD, it would not give all that was said, because it was the way it was said. It would have been necessary to have a kodak and phonograph to have gotten it all right.

Mr. GALLINGER. I have my way of saying things, which compare favorably with the way the Senator from Nebraska says them.

Mr. NORRIS. Even though the Senator from Nebraska has not a good way of stating things, that is no defense. That is the same kind of way the Senator is defending this gas company. He insists somebody else is charging more at some other place; that they are doing worse elsewhere than they are here, and therefore we should let them alone.

On this amendment, if there is to be no further debate, I want a yea-and-nay vote. I ask for the yeas and nays.

Mr. GALLINGER. Mr. President, I will take only a moment to say that my observation concerning criticisms that were made in speeches in Congress on matters relating to the District of Columbia was a general observation. I have in mind that we were held up for over two years in making a much-needed improvement in the District of Columbia in connection with the street railroads by a gentleman who lives in a congressional district where they had 4 miles of horse railroad in the entire district. But he held us up for two years and discussed matters regarding the District of Columbia, showing that the people were very greatly oppressed here, and hence the much-needed improvements that the companies themselves wanted to make at an expenditure of a million dollars could not be authorized.

Mr. SMITH of Maryland. Mr. President, in regard to the amendment of the Senator from Nebraska, it seems to me that the interest he is trying to serve would not be served by the amendment. The Government uses very little gas. Of course his amendment does not affect the gas that is served to the people of the District of Columbia.

As I before said, my judgment is that this is no place to fix the price of commodities, and we are not in a position to judge at what price they can be served. We have not the proper information to come to a conclusion as to how low a price at which they can be served. The object for which the Public Utilities Commission was created was to investigate these prices and to ascertain whether the people are being imposed upon.

I want to say to the Senator that so far as I am concerned nobody will go further than I to see that the people get proper consideration and proper treatment at the hands of any of these corporations. I think myself that they should be compelled to furnish gas at as low a price as they can with proper and due consideration for the stockholders, but I do not think this is the place to fix prices. I think it would be a mistake to put any such amendment on the bill, and I hope it will not prevail.

Mr. NORRIS. In answer to the Senator's statement that this would not reach the ordinary consumer of gas here, I want to say that is true, and if the Senator would withdraw his point of order on the other amendment that would reach the consumer. I am sorry we can not reach the consumer.

Mr. SMITH of Maryland. The reason I have given is a sufficient answer.

The VICE PRESIDENT. The point of order has been ruled on and sustained, and the Senator from Maryland could not withdraw it if he wanted to do so.

Mr. NORRIS. The figures given me by one of the clerks of the Public Utilities Commission as to the amount of gas used by the Government and the District show that for 1913 there was paid on account of the District buildings where gas was used $13,842.77 and on account of the United States Government $53,368.66, making a total of $67,211.43. If next year's consumption were the same as this year's, that would be the amount of gas to which it would apply.

Mr. BRISTOW. Let me inquire, does that include the price paid for street lamps?

Mr. NORRIS. No; they are paid for under lamp contracts, at so much a lamp, I understand.

Mr. BRISTOW. Mr. President, it is an interesting argument when the Senator from Maryland [Mr. SMITH] criticizes the amendment that is now pending, offered by the Senator from Nebraska, because it does not reach the consumer and protect him from an excessive charge, when the Senator from Maryland made a point of order against an amendment that did reduce the price to the consumer, and was himself responsible for the inability of the Senator from Nebraska to protect the consumers of the District of Columbia from the excessive charges.

Mr. SMITH of Maryland. I will say to the Senator that I would have made the point of order under any condition. I do not think this is the proper place to consider prices. As I said before, there is a Public Utilities Commission that has been created for that purpose, and it is their duty to see that the people are properly dealt with. For that reason I would make the point of order, if for no other. This is not the proper place to consider it because we have not the proper information.

Mr. BRISTOW. I do not doubt that the Senator would have made the point of order under any circumstances if it would prevent the reduction of the price of gas to the consumers in the District of Columbia.

Mr. SMITH of Maryland. I want to say to the Senator that I am in favor of a reduction in the price of gas if it can be made, and he has no right to make any such declaration as that. I have——

The VICE PRESIDENT. Just one moment. The Chair can not permit language such as the Senator from Kansas just used with reference to the Senator from Maryland.

Mr. BRISTOW. I should like to invite the Chair to state why the Senator from Kansas can not use that language.

The VICE PRESIDENT. It is imputing improper motives to the Senator from Maryland.

Mr. BRISTOW. What motives did I impute? I would like to inquire of the Chair.

The VICE PRESIDENT. The Senator from Kansas said he had not any doubt but that the Senator from Maryland would make the objection if it resulted in a reduction of the price of gas to the people of the District.

Mr. BRISTOW. Does the Chair say that that is improper language?

The VICE PRESIDENT. The Chair will say that in Indiana a statement of that kind would be considered to be offensive. In Kansas it may not be so considered.

Mr. BRISTOW. I am glad to know that in Indiana there is such a keen sense of propriety.

The VICE PRESIDENT. The Chair has ruled, and it is the duty of the Chair to enforce the rule.

Mr. KENYON. Mr. President——

Mr. BRISTOW. I appreciate the courtesy and good temper of the Chair to-day. I yield to the Senator from Iowa.

Mr. KENYON. Apropos of the suggestion that this bill is not the proper place to fix the price of gas, does the Senator from Kansas see how it can then be a proper place to provide for a merger of the gas companies and a condemnation suit by one company against another.

Mr. BRISTOW. If it is proper for me to express my opinion as to that, with the kind permission of the Chair, I would say I think it would be much more in order to reduce the price of gas than to merge these two corporations and enable them to continue these extravagant prices and earn these extravagant dividends.

I have discovered in my brief service here that all of us, when we attempt to legislate on an appropriation bill, are perfectly willing that the legislation shall be made, provided it is in harmony with our views as to what ought to be done. Legislation goes through on nearly every appropriation bill. If a point of order is not made, it is taken for granted that it is in order, and it goes through. If a Senator is opposed to the legislation, then he undertakes to prevent the legislation by a point of order, and the fact that he makes a point of order is evidence that he is opposed to the legislation. If he is not opposed to the legislation, he never makes the point of order. That is well known to every Senator here. But it seems under this new rule just announced, if a suggestion is made——

Mr. MARTIN of Virginia. Mr. President——

The VICE PRESIDENT. Does the Senator from Kansas yield to the Senator from Virginia?

Mr. BRISTOW. I do.

Mr. MARTIN of Virginia. If the Senator will permit me, I will call his attention to a fact to which I am sure he has not adverted, and it has some relation to the matter under discussion. The urgent deficiency bill, which has passed the House, contains an appropriation of $100,000 to enable the Public Utilities Commission to make a physical valuation of all the public utilities in the city of Washington. It is, of course, the commencement of an effort to secure proper charges for all the public utilities to be paid by those who use them.

That provision is in the bill as passed by the House and, as far as I can control it, it will be provided for in the report of the bill to the Senate.

Mr. BRISTOW. I want to commend the proposition that is contained in the bill referred to by the Senator from Virginia [Mr. MARTIN]. I think it is very proper legislation, and I am heartily in favor of it, but under the showing that has been made by the Senator from Nebraska [Mr. NORRIS] and the presentation of facts that are undisputed, that this gas company is now earning 24 per cent on a capitalization half of which is water, and that this reduction could be made without reducing its earnings below what any public-utilities commission or any court would say would be entirely adequate, I do not think the fact of that provision in another bill is any reason why it is not perfectly proper for us to make the reduction suggested in the pending bill. The Senator from New Hampshire [Mr. GALLINGER], when I sought to interrupt him and file a protest against the imputations he was casting upon the Senator from Nebraska [Mr. NORRIS], in a somewhat spirited manner took me off the floor and declined further to yield, stating that the Senator from Nebraska was abundantly able to take care of himself. This the Senator from Nebraska has demonstrated entirely to my satisfaction. I am very glad indeed the Senator from New Hampshire, in his exceedingly courteous manner, did decline further to yield to me, because the Senator from Nebraska has handled the case much better than I could have done. I want to state, though, if I may be permitted under the new rules announced for this body, that the statement that the average rate on gas in New Hampshire, which is probably 500 miles from the coal fields, a State embracing a number of small cities, is higher than it is in the city of Washington is very poor evidence as to the value of gas in this city. It is on a parallel with the Senator from New Hampshire citing McCook, Nebr., where coal is hauled for hundreds of miles and where the consumers of gas are comparatively very few as a comparison with those in the District of Columbia.

But really the thing in which I am most interested and in which I feel that Congress, and especially the Senate, should have taken an interest years ago, is the development of the electric power at Great Falls. I have been asked to-day why it is that, with one of the finest water powers in America within 15 miles of the capital, it is running to waste, not utilized year after year, when enough electric power could be created from the waterfalls there to supply a half dozen cities like Washington and run the street railways and everything else.

Mr. NORRIS. Mr. President——

The VICE PRESIDENT. Does the Senator from Kansas yield to the Senator from Nebraska?

Mr. BRISTOW. I do.

Mr. NORRIS. In this connection I should like to say to the Senator that a bill is now pending before the District of Columbia Committee making provision for the building of proper dams and the development of that power.

Mr. BRISTOW. How long has it been there?

Mr. NORRIS. I am not finding fault with the committee, because I understand the report on it has not come in. It has been there ever since the 12th day of January, I think.

Mr. BRISTOW. Of this year?

Mr. NORRIS. Of this year. It proposes to carry out the report that was made by one of the Army engineers in pursuance of a provision of law that we passed a couple of years ago providing for the investigation and making plans and specifications, and so forth, all of which has been done under that law. The bill carrying out the estimates of the Army engineers is now pending before the District Committee, awaiting a report, I understand, from the commissioners, who themselves have not reported on it.

Mr. BRISTOW. I am pleased to know that legislation along that line has been started, because I never have visited Great Falls and looked at the magnificent rapids but what I wondered why it is that they lie there year after year unused when the possibilities are simply enormous. The power, the heat, and the light that they could furnish the people of this section of the country if that power were utilized is very great. In this modern day of electrical development it certainly ought not to be permitted to remain in an unused state much longer.

Mr. BORAH. Mr. President——

The VICE PRESIDENT. Does the Senator from Kansas yield to the Senator from Idaho?

Mr. BRISTOW. I do.

Mr. BORAH. I was going to suggest to the Senator from Kansas that probably the power capacity of the falls are being preserved for posterity, like millions of power capacity in the West are being preserved for posterity.

Mr. BRISTOW. I think they are being preserved, and if they go unused it is a preservation for posterity.

Mr. WEEKS. Mr. President——

Mr. BRISTOW. I yield to my friend from Massachusetts.

Mr. WEEKS. I will ask the Senator from Kansas if it had occurred to him in case the power which might be developed from the Great Falls is so valuable why some private company had not undertaken the building of a dam and the development of a power plant there?

Mr. BRISTOW. I am not able to answer the Senator.

Mr. WEEKS. I do not know anything about it.

Mr. MARTINE of New Jersey. Mr. President, I think I can, in part, answer the Senator's question. The railroad corporations own a large interest, a controlling interest in the upper Potomac Falls. That same proposition came to my mind. I visited the spot last year and thought immediately why it was that right here, at the threshold of the city, there should not be power and illumination obtained, why the Great Falls should be running to waste with a natural condition when the development of this power would require a comparatively small expenditure of money. I made that inquiry and the answer came to me that it is under control of the railroad company; that, in fact, it owned the land and the water privileges there.

Mr. WEEKS. It seems to me incomprehensible that that can be entirely correct. I would like to have the Senator from New Jersey let us know from whom he obtained that information.

Mr. MARTINE of New Jersey. I can not state that, for I did not learn, but my information came from parties who were there in actual possession of the property for such purposes as were going on, a sort of amusement park. I made the inquiry on two occasions, and that was the information that came to me.

Mr. NORRIS. Mr. President——

The VICE PRESIDENT. Does the Senator from Kansas yield to the Senator from Nebraska?

Mr. BRISTOW. I yield to the Senator.

Mr. NORRIS. I should like to say as to the proposition suggested by the Senator from Massachusetts that the Senator from New Jersey is in part correct, although I do not believe that the railroad company own what might be called a controlling interest. They own considerable property there. The Government itself already owns and has rights there and quite a large number of private parties, I understand. I gather from ordinary conversation with those who have been investigating the proposition under the statute passed by Congress that the Government's interests up there are quite large already.

Mr. WEEKS. I know nothing about the subject, but to the casual observer it would seem that there is sufficient power there to be very useful in developing the resources of the District and surrounding territory. But that not having been done led me to the conclusion that there was something about the engineering conditions with which I was not familiar and that there were reasons why the power had not been developed.

Mr. NORRIS. Mr. President——

Mr. BRISTOW. I yield to the Senator from Nebraska.

Mr. NORRIS. I should like to suggest further to the Senator from Massachusetts that the report of the Army engineer recommends the carrying out of a program that he has mapped out. He has carried it out in detail, even to the extent of providing plans and specifications for depots of distribution of the electricity that shall be developed at the falls and brought down to the city. His report, by the way, is one of the most accurate measurements, as far as waterfall is concerned, that has taken place anywhere in the United States. The river has been accurately measured for 15 years, and there are tables in that report that are accessible to every Senator giving the average flow, showing where under the plan—and there are several plans—a dam should be constructed, its cost, the amount of power that could be developed, the average flow of water over the dam, developing power, I will say, in round numbers, as I remember it now, running up to a maximum of something over 99,000 horsepower and down to the lowest, something over 8,000 horsepower, that, on the driest day in the driest year for 15 years, would be the minimum, with an average development of somewhere in the neighborhood of between 60,000 and 65,000 horsepower.

Mr. BRISTOW. I brought up this matter because I would like to have an opportunity to aid as far as my capacity goes in the forwarding of legislation which will develop that power. I think the Government ought to have all the power. If the corporations, railroads or any other kind, have interests there, they ought to be condemned for the use of the Government and let the Government develop this power. It certainly offers the finest opportunity for usefulness in the industrial line that is before Congress to-day or that is possible within our supervision at least.

One of the reasons why I arose to indulge in this discussion at all was to make inquiries in regard to why that power had not been utilized. I am pleased to know that the Senator from Nebraska is so well informed upon the subject and has given it the attention he has. I know in the near future we will hear from him further along that line.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Nebraska [Mr. NORRIS].

Mr. NORRIS. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHAMBERLAIN (when his name was called). I have a general pair with the junior Senator from Pennsylvania [Mr. OLIVER]. In his absence I withhold my vote.

Mr. GALLINGER (when his name was called). I have a general pair with the junior Senator from New York [Mr. O'GORMAN], which I transfer to the junior Senator from Maine [Mr. BURLEIGH], and vote "nay."

Mr. LEA of Tennessee (when his name was called). I have a general pair with the senior Senator from South Dakota [Mr. CRAWFORD]. I am not at liberty to vote, and therefore withhold my vote.

Mr. MYERS (when his name was called). In the absence of my pair, the junior Senator from Connecticut [Mr. MCLEAN], I withhold my vote.

Mr. SUTHERLAND (when his name was called). I again announce my pair with the Senator from Arkansas [Mr. CLARKE], who is absent. Not knowing how he would vote on this question, I withhold my vote.

Mr. THOMAS (when his name was called). I have a pair with the senior Senator from New York [Mr. ROOT]. On this question I transfer that pair to the junior Senator from Nevada [Mr. PITTMAN] and vote "yea."

Mr. CLAPP (when Mr. TOWNSEND's name was called). The junior Senator from Michigan [Mr. TOWNSEND] is absent on business of the Senate. He has a general pair with the junior Senator from Arkansas [Mr. ROBINSON].

Mr. WARREN (when his name was called). I will ask if the senior Senator from Florida [Mr. FLETCHER] has voted?

The VICE PRESIDENT. He has not.

Mr. WARREN. I am paired with that Senator and I therefore withhold my vote.

Mr. WEEKS (when his name was called). I have a general pair with the junior Senator from Kentucky [Mr. JAMES]. Not knowing how he would vote on this question, I withhold my vote.

Mr. WILLIAMS (when his name was called). I have a pair with the senior Senator from Pennsylvania [Mr. PENROSE]. I transfer that pair to the Senator from Florida [Mr. BRYAN]. I was requested to state that the Senator from Florida [Mr. BRYAN] is detained from the Senate by necessary emergent business of the Senate itself. I vote "nay."

The roll call was concluded.

Mr. KERN (after having voted in the affirmative). I have a general pair with the senior Senator from Kentucky [Mr. BRADLEY]. I observe that he is not present. I transfer that pair to the Senator from Illinois [Mr. LEWIS] and permit my vote to stand.

Mr. THOMAS (after having voted in the affirmative). Since announcing the transfer of my pair the junior Senator from Nevada [Mr. PITTMAN] has entered the Chamber. I therefore withdraw my vote.

Mr. SHEPPARD. I wish to announce the necessary absence of my colleague [Mr. CULBERSON] and to state that he is paired with the Senator from Delaware [Mr. DU PONT].

Mr. SAULSBURY. I transfer my pair with the junior Senator from Rhode Island [Mr. COLT] to the senior Senator from Maine [Mr. JOHNSON] and vote "nay."

Mr. DU PONT. I have a general pair with the senior Senator from Texas [Mr. CULBERSON]. I transfer that pair to the senior Senator from Massachusetts [Mr. LODGE] and vote "nay."

Mr. THORNTON. I desire to announce the absence of the Senator from Alabama [Mr. BANKHEAD] on official business.

Mr. THOMAS (after having voted in the affirmative). I transfer my pair to the Senator from South Carolina [Mr. SMITH] and allow my vote to stand.

Mr. LEA of Tennessee. I will transfer my pair with the Senator from South Dakota [Mr. CRAWFORD] to the junior Senator from Arizona [Mr. SMITH] and vote "nay."

Mr. WEEKS. I transfer my pair to the junior Senator from Rhode Island [Mr. COLT] and vote "nay."

The result was announced—yeas 32, nays 17, as follows:

YEAS—32.

| | | | |
|---|---|---|---|
| Ashurst | Hollis | Martine, N. J. | Sheppard |
| Borah | Hughes | Nelson | Shively |
| Bristow | Jones | Norris | Smith, Ga. |
| Chilton | Kenyon | Overman | Sterling |
| Clapp | Kern | Page | Thomas |
| Gore | La Follette | Perkins | Thompson |
| Gronna | Lane | Poindexter | Tillman |
| Hitchcock | McCumber | Shafroth | Vardaman |

NAYS—17.

| | | | |
|---|---|---|---|
| Brandegee | Gallinger | Saulsbury | Weeks |
| Burton | Lea, Tenn. | Smith, Md. | Williams |
| Dillingham | Martin, Va. | Stephenson | |
| du Pont | Pittman | Swanson | |
| Fall | Ransdell | Thornton | |

NOT VOTING—46.

| | | | |
|---|---|---|---|
| Bankhead | Cummins | O'Gorman | Smith, Mich. |
| Bradley | Fletcher | Oliver | Smith, S. C. |
| Brady | Goff | Owen | Smoot |
| Bryan | James | Penrose | Stone |
| Burleigh | Johnson | Pomerene | Sutherland |
| Catron | Lee, Md. | Reed | Townsend |
| Chamberlain | Lewis | Robinson | Walsh |
| Clark, Wyo. | Lippitt | Root | Warren |
| Clarke, Ark. | Lodge | Sherman | West |
| Colt | McLean | Shields | Works |
| Crawford | Myers | Simmons | |
| Culberson | Newlands | Smith, Ariz. | |

So the amendment of Mr. NORRIS was agreed to.

Mr. LANE. I offer an amendment to the provision of the bill beginning in line 10 on page 26. I move, in line 11, after the word "relaying," to strike out the word "asphalt," and after the word "pavement," in the same line, to strike out down to and including the date "1904" in line 17, and to insert "except to the lowest responsible bidder upon free and open competition."

The VICE PRESIDENT. The Secretary will state the amendment.

Mr. LANE. In regard to this amendment I shall not take much time.

Mr. HUGHES. I should like to understand the Senator's amendment.

Mr. LANE. I will explain it.

Mr. HUGHES. Does the Senator intend to strike out the inhibition against paying more than $1.80 per square yard for this character of pavement?

Mr. LANE. No; I wish to strike out the word "asphalt" and the other words I have indicated, and to provide for letting the contract to the lowest bidder. This provision apparently seems to confine the District to the laying of asphaltum pavements.

Mr. HUGHES. As I understand the provision, it only attempts to deal with asphalt pavements, and no other. If any other kind of pavement is desired, this provision would not apply to it. It simply says that where an asphaltum pavement is to be laid the District shall not pay more than $1.80 per square yard, but it does not confine the District to the laying of asphalt pavements. Under this language any kind of pavement could be laid, but the provision is that if asphalt pavements are laid the District shall not pay more than $1.80 per square yard for the work.

Mr. LANE. The objection I have to that portion of the provision is that it does not specify or give sufficient information as to the character of the asphalt pavement, but proposes to pay the same price for relaying asphalt pavements as was paid for putting them down originally.

Mr. HUGHES. I will call the attention of the Senator from Oregon to the fact that the provision does not fix the price of this pavement; that it simply states the maximum price.

Mr. LANE. It states the maximum price for both laying and relaying.

Mr. HUGHES. It states the same maximum for both.

Mr. LANE. The same maximum. Under this provision the District can pay $1.80 for relaying a street with asphaltum after the concrete base has already been put in place and after the grading has been done. The grading and the concrete base constitute fully half the cost. If the bill makes any provision different from that, I do not properly understand it. It seems to me that all of the hard-surface streets in the city are of asphaltum, with the exception of a few basalt or Belgian blocks and some composite block pavements.

Mr. SMITH of Maryland. I will say to the Senator from Oregon that the District of Columbia has machinery of its own for repairing the pavements and that the pavements are repaired by the District with that machinery. Of course the District does not pay $1.80 per cubic yard, but only what it costs through their own machinery. That is the amount they pay.

Mr. LANE. But is not this a continuation of the policy and a confinement of this District to use asphalt for paving?

Mr. SMITH of Maryland. I do not so consider it. It only fixes the price which shall not be exceeded. It provides that no asphalt paving shall be done at a price exceeding $1.80 per square yard.

Mr. LANE. Does the price of $1.80 apply to the relaying, the resurfacing?

Mr. SMITH of Maryland. It applies to the new pavements. The Senator will allow me to say that the District itself repairs the pavements. As I have stated, they have machinery for that purpose.

Mr. LANE. Well, Mr. President, the point I wish to make is this: In laying a new pavement it is necessary to first grade the street; in the second place, it is necessary to put down a concrete base; and then, upon the top of that, it is necessary to put down the surfacing material. The specifications for that work may vary. You can put down any depth, any thickness of the surfacing material that you care to. I think 6 inches is what is considered the best type of that character of pavement.

Mr. SMITH of Maryland. I will say to the Senator from Oregon that this work is always done under the supervision of the District engineer, and it has to be done in a certain way and under certain conditions.

Mr. LANE. That is the point I wish to make, that it leaves it optional with the engineer to pay the same price for resurfacing that is paid for originally laying down a pavement.

Mr. MARTIN of Virginia. Mr. President, if the Senator from Oregon will excuse me, I am very sure he is mistaken in that. All this work is done after bids have been invited, and the contract is given to the lowest responsible bidder. The specifications are made by the engineering department and bids are invited for the work.

Mr. LANE. Mr. President, that was another point I wished to make, that it leaves the matter open, so that they may or may not accept the lowest bid, so far as anything contained in the bill shows to the contrary; and the same compensation is allowed for resurfacing a street, which is about a third of the cost, as is allowed for the entire paving of the street.

Mr. MARTIN of Virginia. The Senator is certainly mistaken about that. That is a matter which depends on the bidding. There is a maximum point beyond which they can not go; and the price at which the work is done depends upon the bids that are made for it. I repeat, bids are invited, and the commissioners give the contract to the lowest bidder, if he is responsible and able to carry on the work.

Mr. LANE. The language of the bill is that—

> Under appropriations contained in this act no contract shall be made for making or relaying asphalt pavement at a higher price than $1.80 per square yard.

Mr. MARTIN of Virginia. That is true. Unless, however, somebody bids under that price the work can not be done; they can not go above that, but the price actually paid depends upon the bids.

Mr. LANE. That is the outside limit. It is proposed, in my opinion, to pay too much for relaying the pavements. That may be a proper expenditure for paving a street in the first place, but there should be a difference in the sum allowed for that work and the sum allowed for relaying a street.

Mr. MARTIN of Virginia. We are not allowing any particular price. The price, I repeat, is fixed by the bidding.

Mr. LANE. Then, what objection would you have to changing it so that the clause will provide that these contracts shall be given to the lowest responsible bidders, after free and open competition, and cutting out the word "asphalt"?

Mr. MARTIN of Virginia. There is a general law to that effect now. That is the law of the land to-day.

Mr. LANE. If I am mistaken about that, I will withdraw the amendment.

Mr. HUGHES. I think the Senator from Oregon is mistaken. The law already provides for it.

Mr. LANE. Mr. President, I do not think the law does provide for it, though I do not wish to question, and I do not question, any man's word. I have a great deal of respect for the Senator's opinion, but as I came down the street this morning I saw a workman digging up one section of a street for the purpose of making repairs upon it or something of the kind. It was one of the streets with a surface covering of asphaltum, and on that street, at Thirteenth, off New York Avenue, the asphalt covering did not exceed 2 inches in thickness. I do not believe that an asphaltum surface of 2-inch thickness placed on top of

a base is worth $1.80 per square yard. I will say to the Senator from Maryland that I think there should be a 6-inch surface.

Mr. SMITH of Maryland. The price paid is $1.45½.

Mr. LANE. You propose to pay $1.80.

Mr. SMITH of Maryland. No; they can not exceed that; and whoever is the lowest bidder gets the contract, if he is responsible. I repeat, the contract goes to the lowest responsible bidder.

Mr. LANE. Very well. I will accept the assurance of the Senators and withdraw the amendment.

Mr. OWEN. I should like to ask the Senator what are the words "or relaying" interpreted to mean?

Mr. SMITH of Maryland. The government of the District, as I have stated, has machinery of its own for repairing the streets, and they use that machinery for that purpose.

Mr. OWEN. I asked for an interpretation of the words "or relaying."

Mr. SMITH of Maryland. I presume it might be as expensive in some cases to relay as it would be to make a new pavement; and in that case it is a question of how small a bid they can get. The work, of course, would go to the lowest bidder.

Mr. GALLINGER. Mr. President, if the Senator in charge of the bill will permit me, a few years ago we entirely removed the pavement from Pennsylvania Avenue, and, of course, it was relaid. I apprehend a case of that kind is meant.

Mr. OWEN. Including the base?

Mr. GALLINGER. I do not know about that.

Mr. OWEN. The base is a very important part of the cost of the construction.

Mr. GALLINGER. Yes.

Mr. OWEN. And I wish to know whether the words "or relaying" are intended to put the price, regardless of the base, at $1.80 a square yard as the maximum price? If so, it is entirely too high.

Mr. GALLINGER. Two years ago we made an appropriation for a portable asphalt plant, which is now being used for all ordinary repairs of streets in the District of Columbia.

Mr. LANE. Mr. President, I wish to remind the Senator from New Hampshire that the provision under consideration relates to work done under contract, and not work done by the District plant.

Mr. GALLINGER. I understand that; that is the language of the House provision. I am not quite sure whether or not it follows the language of former appropriation bills, but I do know that those in authority in the District are guarding its finances very carefully, and that they would not pay for the ordinary relaying of a pavement as much as they would pay for making it in the first place. Perhaps the language is unfortunate; I do not know how that may be; but I feel justified in saying to the Senator that they do not pay for repairs of any kind as much as they do for original work.

Mr. LANE. Mr. President, on the assurance of the Senator, I withdraw the amendment. Now, I wish to offer another amendment; and I do not think it will take long to dispose of it.

The VICE PRESIDENT. Has the Senator withdrawn his first amendment?

Mr. LANE. I withdraw it on the assurance of the Senator that the point raised by me is covered and that the city is safeguarded.

On page 58, beginning in line 3, there is an appropriation of $450,000 for the new Central High School. In line 6, in that item, I move to strike out "grading of an athletic field, construction of retaining walls, and construction of an athletic stadium," so that the item will read:

> Toward the construction of the new Central High School on the site purchased for that purpose and toward grading and other work necessary to prepare the site, $450,000.

This is a matter which I brought up some time ago. I submitted an amendment in relation to this subject on February 18. I appeared before the committee and urged my reasons for the proposed amendment. I will state them here to the Senate.

In the first place, the site which has been selected for the new Central High School is not fortunately located, in my opinion, particularly in view of the fact that so large an expenditure is involved. There is a total authorization for this structure of $1,200,000, and the school is designed to take care of some 1,200 students, as I understand.

Mr. GALLINGER. Of 2,500.

Mr. LANE. Twenty-five hundred; that is one of the objections I have to it. The new building is to be located between Thirteenth and Fourteenth Streets on the top of a hill. Lying to the east of it, within a half mile, are the grounds of the Soldiers' Home, which cover several hundred acres and extend perhaps for a mile or even farther; I do not know how far. Just below those grounds and immediately adjacent to them is the filtration plant of the city, which covers a large number of acres. The children who live on the other side of these grounds, in order to reach the new school, will have to make a journey clear around and then back halfway up again to reach this location. The people upon the east side of the city are in the same condition; they are far removed from the new high school, and it will cost many of the children double carfare to reach the school. Such an expenditure will be taken out of the pockets of people who are the least able to afford it.

Over to the west of this school, within a distance of a half or three-quarters of a mile—not farther than three-quarters of a mile, I think—is Rock Creek Park, which extends for 2 or 3 miles in a direction somewhat parallel to the Soldiers' Home grounds. The children living upon the other side of that beautiful tract of land must also journey around it to reach the new high school. It seems to me wrong to appropriate twelve hundred thousand dollars for a school building for 2,500 children which is inaccessible to a majority of the children of the city on account of its geographical location. I think it is too much money to be expended in that location. There should be a high school there, but one to accommodate several hundred children, and not several thousand, would be ample, instead of the large high school proposed to be constructed. At the time we are authorizing the expenditure of this sum for the Central High School there are hundreds and hundreds of children over to the east who are deprived of adequate high-school facilities.

Mr. MARTIN of Virginia. Mr. President, if the Senator will permit me, I merely want to call his attention to the fact, of which he perhaps is not advised, that the new building for the Central High School has already been authorized. This bill does not contain an authorization for the construction of the building, but a law passed at the last session of Congress contained an authorization for the acquirement of a site and the construction of this building at a cost of not exceeding $1,200,000, of which $300,000 were actually appropriated. The land has been bought and considerable work has been done. This is simply an additional appropriation of $450,000 to carry out what a law passed at the last session of the last Congress authorized to be done.

So far as the eastern part of the city is concerned, there is an additional school provided for there. I think it was authorized in the District appropriation bill of last year; but, at any rate, there is an appropriation of $150,000 for that school in this bill.

The provision under discussion does not involve the commencement of a project; the project has been adopted after discussion and an act of Congress has been passed providing for the purchase of the ground and the construction of the building, the entire cost not to exceed $1,200,000.

Mr. SMITH of Georgia. Mr. President, I should like to ask the Senator if he is correct in the suggestion that the last District appropriation bill provided for a high school in the eastern part of the city?

Mr. MARTIN of Virginia. It is provided for in this bill.

Mr. SMITH of Georgia. I was under the impression that the last appropriation bill provided only for one great Central High School.

Mr. MARTIN of Virginia. That is correct; but the pending bill provides for an Eastern High School in the eastern part of the city.

Mr. SMITH of Georgia. Mr. President, I should like to say that when the item for the Central High School was before the Senate in the last Congress I sought to point out the mistake of erecting such a building and the folly of making such a large appropriation for that purpose. I urged then that, instead of providing for one enormous building, we should authorize a site to be acquired in the northeast and divide the appropriation so that we could have two new high schools instead of one high school. I was then told that one large high school would be very much better than two; that the one proposed would be all we would need for a long time; but now, after authorizing this enormous appropriation for the new Central High School, at the very next session of Congress we are asked to add an appropriation for another high school. If there is any possible way left to stop the excessive appropriation for the very large new Central High School and to build two high schools instead of one, I wish the committee would point it out to us and give us a chance to do it.

Mr. MARTIN of Virginia. I will call the Senator's attention to the provision made in the present bill, which has met the approval of the Senate:

> For the purchase of a site for a new Eastern High School, to be located east of Tenth Street east and north of D Street south, $150,000, or so much thereof as may be necessary.

Mr. SMITH of Georgia. Now, I should like to ask the chairman of the committee, can we not stop the appropriation for the

other building? It is useless to erect the enormous high-school building authorized at the last session of the Sixty-second Congress if we are also going to build a high school in the eastern section of the city.

Mr. SMITH of Maryland. Mr. President, I will say to the Senator that that matter was decided last year. I understand that the Senator was opposed to it; but I also understand that the plans and specifications have been prepared and the contract has been let for the construction of this school. It is one of those things that can not be taken back.

Mr. SMITH of Georgia. Then we ought not to erect the new high school in the eastern section of the city, but ought to stand by what we have done and only have one new high school.

Mr. SMITH of Maryland. We also felt that they needed a school in the eastern section. Statistics show that in the year 1920 there will be over 2,000 pupils in the new high school, or more than enough to fill the building about to be constructed.

Mr. SMITH of Georgia. In 1920?

Mr. SMITH of Maryland. Yes; we do not build for a day only, but we have to look somewhat into the future.

Mr. GALLINGER. The situation is this: We have now an Eastern High School, a Western High School, and a Central High School. The Central High School is entirely inadequate, and the provision now under consideration is intended to remove that difficulty. I want to corroborate what the Senator from Maryland has said, that the plans for the new Central High School have been prepared, the ground has been paid for, and a contract for building the school has been let. The Eastern High School is badly crowded; it is located in an old building; and we propose in this bill to grant an appropriation to purchase a site recommended by the commissioners and by the board of education, so that they will have in due time a school adequate for their wants. The Western High School, which is in Georgetown, is a magnificent school building; it is not now overcrowded, but it is comparatively full. The McKinley Manual Training School is full to repletion, and the same, I think, is true of the Armstrong Manual Training School. We have a number of large school buildings in this District, and the only question that can arise about the Central High School is whether it is wise to build so large a school. I think it is. The population in that section of the city is growing by leaps and bounds. It is a white population almost exclusively, running to the north and northwest.

I would limit the time to a greater extent than has the Senator from Maryland in charge of the bill. He says that in 1920 the new Central High School will be full, while I am satisfied that long before that time it will be housing 2,500 pupils. We have a magnificent lot, and ought to have a very fine school building on that location.

Mr. SMITH of Georgia. Mr. President——

Mr. MARTIN of Virginia. Mr. President, if the Senator from Georgia will excuse me, before he resumes I desire to call his attention to a statement made by Mr. Blair, president of the Board of Education of the District of Columbia, in which he says that before this new building is completed it will barely be sufficient; that it will be full of pupils.

Mr. SMITH of Georgia. When is it expected to be finished?

Mr. MARTIN of Virginia. It will take several years, of course, to construct a building of that size. Here is the statement of Mr. Blair:

> The wisdom of Congress has been demonstrated by the subsequent developments in our school system, and the estimates of the principal of the Central High School, who, of course, is interested in this proposition; of the principal of the Business High School, who has a school which is already crowded; of the principal of the Technical High School, who knows the conditions at his school; and of the principal of the Eastern High School, who is anxious to have a new school; all of them unite in this, that when we get this 2,500-pupil school built and equipped and ready to open we will practically be in a position where the high-school population of the District will fill the building, and more than fill it.

Mr. SMITH of Georgia. Mr. President we ought not to commence any high-school building that can not be constructed in a year. The idea of erecting a high school for the District which will take seven years to complete in itself involves a plan of construction which is extravagant; but I do not know that there is anything now that can be done to remedy what I think was the blunder of the last Congress.

I do not believe in high schools for 2,500 pupils; I believe in high schools of reasonable size; and I believe they should be reasonably distributed and placed in locations for the most convenient use of the people of the District. I only call attention to this to justify what I said during the last Congress, that this large high school would not meet the demand of the city; that the eastern section of the city would ask at once for an additional high school, and it ought to have had a part of the appropriation that was then being made. There ought not to have been so large an amount authorized to construct the very large high school about to be erected, but we should have erected a school to accommodate a thousand pupils, which would have been ample for the time being, and when it became inadequate we ought to build another.

Mr. SMITH of Maryland. I will say to the Senator, however, that the superintendent of schools believes that this new school will be filled in a few years; in fact, by the time it is completed. I do not know how long it will take to complete it, though I presume it will take several years; but he says it will not be too large, and that a school of the size designed is required to accommodate the children who will go there. To be conservative, I said that in about 1920 I thought the school would be filled, but the superintendent of schools says that by the time it is completed there will be a sufficient number of scholars attending the new school to fill it. If that is the case, why do we want to make it any smaller?

Mr. SMITH of Georgia. Because the children would be better handled by not massing so many together.

Mr. SMITH of Maryland. There are schools in this country that accommodate more than 2,500.

Mr. SMITH of Georgia. Yes; there are, but I think the sanest educators disapprove them. The sanest educators approve schools of reasonable size.

Mr. SMITH of Maryland. This is half the size of quite a number that are in use in the country now.

Mr. SMITH of Georgia. There is no necessity at all for such a very large school in a city of this kind. Land is not very expensive here. Land spreads all around us; and if, instead of building such a school, we should follow the policy of putting high schools around the edge of the city, convenient and in the direction of growth of population, and build them of reasonable size instead of such an extravagant size, I should think it would be far better for the District. Of course, that is past, and I suppose it can not be helped, whether I was right or wrong.

Mr. MARTIN of Virginia. That is just what I was going to submit to the Senate.

Mr. LANE. I yield to the Senator.

Mr. MARTIN of Virginia. Is it not necessary, in order to have effective work, that some consistent and continuous policy shall be adopted? The Senator must bear in mind that this item was put in at the last session of Congress. The Congress then determined to have one high-school building, to cost $1,200,000, and appropriated $300,000 to commence the work. The work has been commenced, the lot has been bought, and some contracts have been made. An estimate comes in to the Appropriations Committee asking for an additional $450,000 on that $1,200,000 undertaking, and we are asked to appropriate it.

Was the Appropriations Committee to undertake to revise the action of the last session of Congress? What could the Appropriations Committee do but recommend the appropriation to carry out the policy which the Congress had adopted? It had settled this controversy between different schools of thought in respect to the size which a public-school building should be, and had fixed upon a building that will cost, together with the lot, $1,200,000. We have simply recommended the appropriation of $450,000 in addition, as I say, to the $300,000 appropriated at the last session of Congress, in order that the will of Congress might be carried out.

If this policy is to be stopped and to be changed it ought to be done, but I do not see how it can be properly done at all. I think it is essential that we should have a continuous policy to carry out plans and purposes of this sort. If a change is to be made it will take a carefully prepared repeal of existing laws and the substitution of new laws.

I look upon it as entirely impracticable. I think there is nothing remaining for the Congress to do but to carry out the purpose which it has started out upon, and make the appropriation for a building to cost, in all, $1,200,000.

As to the eastern part of the city, we find there is a necessity for additional school facilities there, and we are trying to provide them in this bill as well as we can. We think there ought to be an additional school building there. I think the Government is able to provide all the school buildings that are needed. Educational opportunities ought not to be provided in a stinted or in a meager way. We need an additional building in the eastern part of the city, and we recommend the appropriation of $150,000 in addition to the large high school, and the Senate has approved it.

Mr. SMITH of Georgia. The Senate has already approved the appropriation?

Mr. MARTIN of Virginia. The appropriation of $150,000 for the Eastern High School; yes.

Mr. SMITH of Georgia. That has been passed on in Committee of the Whole?

Mr. MARTIN of Virginia. Yes; in Committee of the Whole. It was passed on by the House and also approved by the Senate in Committee of the Whole.

Mr. LANE. That is subject to amendment?

Mr. MARTIN of Virginia. It is subject to amendment. It will be when it gets in the Senate. It has been agreed to by the Senate in Committee of the Whole, though.

Mr. LANE. Mr. President, I have procured some very interesting information this afternoon in regard to this matter, if nothing else. It seems that that is about all I shall get out of it. However, I am deeply grateful for that.

I have ascertained now that this matter has already been decided upon, and that contracts have been let. I introduced this amendment on February 18, and it was referred to the committee. Later along, just a few days ago, I was called before the committee to speak in behalf of my amendment, and I received no such information from them at that time. They did not tell me that the matter had gone too far for me to talk on the amendment; but they listened to me, more or less patiently, and did not give me the information which would have saved me the expenditure of my time here.

At the time I submitted this amendment, or shortly after that, a report came in here from the school commissioners who have charge of this subject. It was in favor of the plan I submitted. I was informed, on what I think is good authority, that no contracts had been let at that time. I should like to ask whether or not it is true that these contracts have been entered into since I introduced my amendment, for I wrote and asked the commissioners to delay entering into binding contracts until such time as this matter might be taken up in the Senate, for the reason that there was question as to the legality of the act. I stated that this appropriation had been made without an estimate from any quarter, asking for the appropriation of any such sum, coming to either House; that the appropriation was some four or five hundred thousand dollars in excess of any estimate which up to that time had ever been submitted to either House of Congress, and I understand that that is not the proper way of passing appropriation bills.

Mr. MARTIN of Virginia. I will say to the Senator that the law was signed by the President on the 4th day of March, 1913. That law, when approved on the 4th day of March, 1913, authorized the ground to be purchased and the contracts to be entered into for all of these buildings, provided they did not exceed in the aggregate $1,200,000.

I hear, though I can not vouch for it, that a contract has been made for the entire construction. I do not know whether that is true or not, or when it was made; but I do know that since the 4th day of March, 1913, full authority has existed for entering into contracts amounting in the aggregate to $1,200,000.

Mr. LANE. I wish to say that I should have appreciated that information if I had had it sooner. I should have thanked the Senator very much for it if it had come a little earlier; it would have saved me this trouble.

Is it a fact, and is it a custom of this body, that appropriations can be lawfully made in excess of estimates, and that they become operative and good law? Is that true?

Mr. MARTIN of Virginia. It is not the custom. It is very difficult to get Congress to agree to appropriations that have not been estimated for, but Congress has the full power to do it. I have no doubt in this case the estimates were made; but Congress has the full power to authorize a building that costs $1,200,000 even if there have been no estimates.

I have no doubt, however, as I say, that there were estimates showing that this ground and these buildings would cost $1,200,000. It is customary to have estimates made before the laws are enacted, and I have no doubt such was the case, and that Congress acted with full information before it, and authorized this expenditure of not exceeding $1,200,000.

Mr. LANE. I am also informed, on what seems good authority, that this sum of $1,200,000 was not authorized either by the House or by the Senate, but was fixed up by the conference committee, and then was adopted by both Houses. Now, is that a legal and lawful way of appropriating money?

I am inquiring in order to find out. There is a lot of information floating around here that a person can pick up if he is attentive and has time enough. I want to gather this unto myself and find out if this is really the way in which we do business here. Does the Senator know anything about that?

Mr. MARTIN of Virginia. This estimate was regularly made.

Mr. LANE. It was?

Mr. MARTIN of Virginia. Oh, yes. It came to the committee in the Book of Estimates in the regular manner; and the committee acted with that estimate before it, that they needed $450,000 additional to pay for work under this authorization of the last session, on the 4th day of March, 1913. It was duly estimated for, and we acted with that before us.

Mr. LANE. Then I will acknowledge that I have received information which is not correct.

Now I wish to offer another amendment to the item about this little $150,000 school over here on the east side.

The VICE PRESIDENT. This amendment is not yet disposed of, unless it is withdrawn.

Mr. LANE. It does not seem to be in order, Mr. President. It "died a-borning."

The VICE PRESIDENT. Oh, yes; the amendment is in order.

Mr. LANE. I will withdraw it. If it is a fact that it can have no effect upon this legislation, I want to withdraw it, of course.

Mr. SMOOT. The Senator can offer his amendment if he wants to.

Mr. WILLIAMS. What page of the bill is it on?

Mr. LANE. Page 58. I wanted to strike out that language and divide this fund up afterwards so that other high schools can be built in other portions of the city. That was the amendment I offered.

What is the parliamentary procedure in regard to this, Mr. President? Has the law gone into effect so far that it can not be amended in this manner? Is that the ruling?

The VICE PRESIDENT. The Chair has not made any ruling at all.

Mr. LANE. That seems to be the opinion of all the more learned and experienced Senators. If not, then I will insist upon the amendment.

Mr. MARTIN of Virginia. I made no point of order against the amendment offered by the Senator from Oregon.

Mr. LANE. I want it voted upon, then. I want the Senate to vote upon it, if the Secretary will kindly state it. Before that is done, however, I wish to say a few words further, and I shall be brief.

I think it is a mistake to expend so large a sum for a large building, and to concentrate so many children under one roof, when there are other sections of the city that are in need of the same school facilities, and the same amount of money would provide for all of them. It is my opinion that the children will be better cared for, they will come out much better men and women, if they are kept closer to the home influence. I believe forcing poor people, who can ill afford it, to pay double car fares, which many of them will have to do, to ride upon the cars from half to three-quarters of an hour to reach this school, and put in that much time again to return to their homes, is a useless waste of money and of time and not for their good. I believe that for the larger interest of the city, which is growing in different directions, this fund should be divided up, and four high schools can be built with the money with better advantage to the city. In fact, that was the recommendation of the board of school commissioners itself and in line with their recommendations. They wished that done, and I think it ought to be done.

I submit this amendment, and I should like to have a vote on it.

Mr. SMOOT. Mr. President, I do not know whether the Senator knows it or not; but I am informed, and I think reliably informed, that the contract has already been agreed to and let for constructing this high-school building.

Mr. LANE. When was that done?

Mr. SMOOT. I have not the date here; but I am quite sure that if the Senator will make an examination, he will find that the contract has been entered into.

Mr. LANE. Since this amendment was introduced?

Mr. SMOOT. No. I think under the law the contract was entered into, and I believe it will be binding on the District. I do not believe the Senator ought to offer this amendment at this time, although I admit that it is in order, for the reasons stated. I am quite sure that the party informing me is correct in saying that the contract has been agreed to and executed; and if so, the Senate of the United States certainly should not adopt this amendment.

Mr. SMITH of Georgia. The newspapers published the statement about two weeks ago, and of course it was accurate, that the contract was let the day before, long after the resolution introduced by the Senator from Oregon was pending before the committee.

Mr. LANE. I wish to say to the Senator that I took the trouble of writing to the commissioners, and asked them to withhold the awarding of the contracts or the consideration of bids until after this matter was settled in the Senate.

Mr. SMOOT. Mr. President, the resolution of the Senator did not pass, and the District officials certainly could not take that as a direction from Congress. I believe the Senator ought to withhold this amendment. I do not believe he ought to offer it now, because of the fact that, the contract having been executed, it would be an improper thing to do.

Mr. LANE. The District will not forfeit over $50,000 or $60,000 if it has to pay the architects their fees for completing the plans, whereas the city of Washington and the District of Columbia and the Government will be a hundred thousand dollars ahead if they will adopt this amendment, change the type of the building, and put high schools in different portions of the city. It will mean the difference between an education and no education for hundreds of children. It will mean giving the opportunity for an education to hundreds of children who never will receive it if this bill goes through. It means that difference. They will be denied the opportunity, for the reason that they will not be able to bear the expense or give the time. In the larger interest of the city, the loss of the architect's fee of fifty or sixty thousand dollars, or whatever it may be, will be the least of the evils; so I will insist upon the submission of my amendment to this body for its decision.

I ask for a vote on the amendment.

The VICE PRESIDENT. The Secretary will state the amendment.

The SECRETARY. On page 58, line 6, after the word "site," it is proposed to strike out the words "grading of an athletic field, construction of retaining walls, and construction of an athletic stadium," and to insert in lieu thereof the following:

*Provided, however*, That the appropriation of $1,200,000 authorized by the act of March 4, 1913, entitled "An act making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1914," etc., for the erection of a central high-school building in the city of Washington, D. C., be divided, $750,000 thereof to be applied to the erection of a central high-school building on the site at the corner of Eleventh and Clifton Streets NW., heretofore acquired under authority of Congress, and that the remaining $450,000, or so much thereof as may be necessary, be applied under the direction of the Board of Commissioners of the District of Columbia to the purchase of a site, preparation of plans, and erection of a high-school building in the eastern section of Washington, in accordance with the general plan outlined in Senate Document No. 329, Sixty-third Congress, second session.

The VICE PRESIDENT. The question is on agreeing to the amendment.

Mr. LANE. Mr. President, I will say that there is an appropriation made here, later along, for a high school in the eastern portion of the city; that is, it is an appropriation of $150,000 merely for the purchase of a site. Is not that true?

Mr. MARTIN of Virginia. That is correct.

Mr. LANE. We could save some of this money by striking out that provision a little later, which I am going to ask to have done. We will be money ahead, for the reason that the city already owns plenty of land over here immediately adjoining the present high school, without expending a dollar for a site. I am informed by a number of citizens who live over in that part of the city that such is the condition. If that is true, here we have another opportunity to save money.

The VICE PRESIDENT. The question is on agreeing to the amendment. [Putting the question.] By the sound the noes appear to have it. The noes have it and the amendment is rejected.

Mr. LANE. The noes got it all right. I have no doubt at all of that.

Now, Mr. President, I will offer another amendment, on page 59, to strike out lines 1, 2, and 3, and insert in lieu thereof the following:

For the preparation of plans and the construction of a modern building for a new Eastern High School on reservation No. 13, located between B and E and Nineteenth and Twentieth Streets SE., Washington, D. C., $150,000.

The argument advanced to me—and this has been submitted to me by people who live over in that section of the city—is that the District already owns a tract of land there of quite a number of acres, that if a building should be constructed at the location called for in this amendment there would be plenty of room around the building for carrying out agricultural experiments or playgrounds, and that in many ways it is a superior location. I am informed that it is not far from the present location and only two blocks from the car line, and that in every way it will save the city money and afford better facilities.

Mr. SMITH of Maryland. I understand that the location the Senator is proposing is down near the asylum and jail and almshouse. Is that the place?

Mr. LANE. I am informed that the jail and the almshouse have been moved away, or are about to be moved away, and that the ground and the buildings there will be vacant.

Mr. SMITH of Maryland. I was down there the other day, and the jail is there now, the asylum is there now, and the almshouse is there now. Has the Senator ever been down there himself?

Mr. LANE. No; I must say I have not.

Mr. SMITH of Maryland. I thought the Senator had not.

Mr. GALLINGER. The smallpox hospital and the crematorium are there, also.

Mr. SMITH of Maryland. I wish to say, Mr. President——

Mr. LANE. Just a minute. I will yield the floor in a minute.

Mr. SMITH of Maryland. All right.

Mr. LANE. I am like the committee in that respect. I have not visited this locality. I was informed the other day, when I was before the committee, that they had never visited the site where they are going to spend $1,200,000. I am just as ignorant about this site as they were about that. Now, if the Senator wishes, I will yield to him.

Mr. SMITH of Maryland. I wish to say, so far as this site is concerned, that I have been there and have visited it, and I think it would be absolutely impossible to locate a school there. It is a site down here near the river, a long distance away, where the jail, the almshouse, the asylum, and the crematorium are located. It is entirely unsuitable as a site for a high-school building. I am satisfied that the Senator never has been there, or he would not for a moment consider the place.

In regard to the location that has been selected by the committee, it is a location that has been recommended by the school board and by the Commissioners of the District of Columbia. I am free to say, so far as I am concerned, that I do not know anything about the location. We were informed, however, that it was the proper location; the amount of money that we have recommended here has been asked for by the District Commissioners, and the place has been recommended by the school authorities.

Mr. WILLIAMS. What are you going to do with the existing Eastern High School Building?

Mr. GALLINGER. I have an impression that it has been suggested that it can be used for other educational purposes. I do not know exactly what they are, but manifestly we can not erect a new building on that site without destroying the old one.

Mr. WILLIAMS. I thought perhaps an addition could be made to the old one.

Mr. GALLINGER. It is altogether worn out and inadequate. It is not capable of economical reconstruction.

Mr. WILLIAMS. How much land belonging to the Government is there where the present Eastern High School is?

Mr. GALLINGER. As I recall, not very much.

Mr. WILLIAMS. My recollection is that there are 2 or 3 acres.

Mr. LANE. I am informed that there are 2 or 3 acres.

Mr. GALLINGER. That may be so.

Mr. WILLIAMS. When I used to live over here one of my boys went there, and I have an idea that it is a pretty large place. I have not seen it for I do not know how long. It struck me that it would be rather bad business to go out and buy a site if we could possibly utilize anything we already have. The present building is very conveniently located for an Eastern High School, and I thought perhaps we could add to the building that exists there more easily than to construct an entirely new building.

Mr. GALLINGER. That has been discussed more or less. This Eastern High School matter is not a new one. The contention for a new Eastern High School building has been before us for six or eight years, and it has been gone over. I know I have myself inquired what use they could put the old school building to, and while I can not definitely state what the proposition was it was stated that it could be utilized in other ways.

Mr. WILLIAMS. Of course if it can be utilized, that is different. I do not want to be misunderstood. So far from opposing these appropriations, they are in line with my own thought. I should like to see Washington have four or five great high schools, and I should not care a cent if they cost a million dollars apiece. I think it would be a very much more profitable investment than half of one battleship, and redound very much more to the prosperity and improvement of the people. I should like to see them, and I should like to see each one of them built up into a regular little college, and a good college at that. I should like to see the Federal City itself set the example in educational matters for all the country; but I do think that wherever we have land we ought to try to use it instead of purchasing new sites.

Mr. GALLINGER. I will say, if the Senator will permit me, that I am personally acquainted with the site mentioned in the bill, and it is admirable in every way. I feel sure that if the Senator from Oregon should visit the site he suggests he would not urge it. It is a Government reservation on the Eastern

Branch, or Anacostia River. There is a jail there which we probably could not duplicate short of a million or two million dollars, and I do not know where we would put it if we did duplicate it. There is the Washington Asylum and Hospital, that must remain there for a while. There are other buildings, including a smallpox hospital and a crematorium. The reservation is in every way, according to my notion, not well located for a high school. It is at the extreme end of the eastern section of the city. It runs right down to the river. There is a cemetery of some considerable note, the Congressional Cemetery, in the immediate vicinity; and at the present time there are no car tracks reaching within half a mile of it.

I feel sure that if the Senator should go there he would not urge that such a site be selected for an Eastern High School.

Mr. LANE. All right. I was assured, Mr. President, that the penal institutions and the almshouse either had been removed or were about to be removed; that the hospital was in a dilapidated condition, that the Senate had declared it to be almost a nuisance, and that it was about to be removed; that in the event these institutions were removed there would be buildings left there the construction of which had cost the Government some $400,000, and that by a little alteration they could be made useful for the purposes of the schools. If that is not the case, however, I will withdraw the amendment and substitute another one for it.

Mr. SMITH of Maryland. I will say that the jail, the asylum, the crematorium, and the cemetery are all there at this time, and in all probability they will remain there indefinitely.

Mr. LANE. Then I will withdraw the amendment and substitute one proposing to strike out lines 1, 2, and 3, on page 59, and to insert in lieu thereof:

For the preparation of plans and the construction of an addition to the Eastern High School, located near the corner of Pennsylvania Avenue and Eighth Street SE., $150,000.

Now, there is where the idea of the Senator from Mississippi [Mr. WILLIAMS] comes in. Here is a piece of property already owned by the Government, which has a school building on it. There are two acres of land in the tract, so that there is plenty of room to build an addition. This will save the expenditure of this other money and will accommodate the people of that district as well as a new location, to which, as well as I can estimate, they are pretty generally opposed.

I have had interviews with members of the civic association there, which takes a great interest in this matter. They have urged me to call it to the attention of the Senate and to pray that you will give them an opportunity to have a school in a more desirable location and save the expenditure of this money, which they claim to be unnecessary.

Mr. MARTIN of Virginia. I will ask the Senator if he does not think a proposition of that sort ought to have been offered in the Senate and referred to the Committee on Appropriations, so that it could be investigated? Nobody knows anything about it now. I do not know about it. I have not the slightest particle of information about it.

Surely the Senator does not want the Senate to make an appropriation of $150,000 and locate a public school here without any human being except himself knowing anything about it. I do not know whether the Senator went and visited this site or whether he has examined it at all, but surely the Senate can not be expected to agree to it without any information.

The committee ought to have had an opportunity to investigate the matter. If the Senator had sent his amendment to the committee, the committee would have investigated it, and would have been prepared to tell the Senate something about it. As it is, the committee can not tell the Senate a thing about it.

Mr. LANE. I was under the impression that we act a good deal of the time here without much information on the subject which we have under consideration. I did not consider that to be a valid objection to putting it in here at the last hour. I know I have been swallowing items in this whole bill and statements in regard to it about which I knew nothing.

Mr. MARTIN of Virginia. I will ask the Senator if he has himself examined this location personally?

Mr. LANE. I know where it is.

Mr. MARTIN of Virginia. Has the Senator examined it?

Mr. LANE. I have not given a particular examination. I have taken that largely through representations——

Mr. MARTIN of Virginia. The Senator is asking the Senate to appropriate $150,000——

Mr. LANE. As an addition to the present high school, where the Government already owns the ground, instead of going off, as you are intending to do, and spending $150,000 for a new location.

Mr. MARTIN of Virginia. This $150,000 is appropriated under an estimate officially made and certified to the committee.

Mr. LANE. You are paying $150,000 for a site, without furnishing a cent for the building, whereas under my proposition we have the site now, and it will only cost $150,000 for the building. That is the whole case. It seems to me that as an economical proposition it is good business.

Mr. WARREN. Mr. President——

The VICE PRESIDENT. Does the Senator from Oregon yield to the Senator from Wyoming?

Mr. LANE. I yield.

Mr. WARREN. I do not wish to take the Senator off the floor, but I was about to make a point of order against the amendment. It has not been estimated for and has not been reported from any committee.

Mr. LANE. I will accept the ruling.

The VICE PRESIDENT. The bill is before the Senate in Committee of the Whole and open to amendment.

Mr. MCCUMBER. On page 61, under the head of "Metropolitan police," line 15, I move to strike out the numerals "$1,500" and to insert in lieu thereof "$1,800."

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 61, line 15, where it reads "11 captains, at $1,500 each," it is proposed to strike out "$1,500" and in lieu insert "$1,800."

Mr. MCCUMBER. Mr. President, as bearing upon this particular amendment I wish to call attention to the fact that we have provisions here for 13 lieutenants, at $1,320 per year each; 1, at $1,250; 7 privates of class 3, at $1,200 each; 107 privates of class 2, at $1,080 each; and 56 privates of class 1, at $900 each. These sums, ranging from $900 to $1,500 per annum, represent the compensation that we pay the police force in the city of Washington.

I find that we are paying in most of our departments to the average high-school boy and girl as he or she enters the Government service a minimum salary of $900 per year, and it is increased up to about $1,200 or $1,400 a year in a very short time.

I think there is not a Senator here who will not agree with me that $900 is not a proper compensation for a policeman doing the work that he is compelled to do. Remember that these men must work early and late; that in blizzards, in storms, they must perform their duty; and that their duties are sometimes very hazardous and never very agreeable.

I know it has often been said if these men do not want the positions let them resign and other persons will take the position at those prices, but, Mr. President, that is not the standard we have fixed in providing compensation in other departments. We have not taken advantage of the necessitous condition of people to give them the lowest possible value for the services for which they may be employed. On the contrary, our rule has been right along to pay a reasonable and fair compensation.

I know of no class of men in any city in the United States who are superior to the members of the Metropolitan police. On the contrary, I believe on the average in intelligence, standing, capacity, education, and so forth, those in the Metropolitan police service are superior to those employed in any other city in the United States. Yet the compensation upon the whole I think is very much lower than in any other large city in the country.

Mr. President, we must remember that these men are not right out of school. They are men who have reached the age of discretion. They could not hold their places unless they had. They are men, as a rule, who have families to support. I submit that their compensation certainly ought to be as high as that of the boy or girl just out of school in one of our great departments.

I am not at all in harmony, and never have been in harmony, with the gradations that have been fixed in the police service or in any other method by which we have made our gradations for fixing the compensation of those employed in the Government service. The steps in the gradation are altogether too large. I can see no reason for jumping from $900 up to $1,200 and then to $1,500 and, finally, to $4,000 for a superintendent. I admit that after a man has served it may be a year or so upon the police force he may be more competent and may be worth more than one who has served a single year, and that we might give a little additional compensation because of that longer service; but if one has not proved himself as good as the best within one year, he probably never will be able to do it. Therefore there ought not to be any gradation beyond at least one year's service, and we ought to have a higher grade than that at present fixed by law.

In justice, Mr. President, to these men, I am asking for the adoption of the amendment, and if it is allowed I will then move to raise the compensation of all the others to $1,800 per annum.

Mr. SMITH of Maryland. Mr. President, however much I dislike to differ with the Senator from North Dakota or refuse to grant what he may desire, I will state that there has been no estimate for this amount, and therefore I shall have to raise the point of order against the amendment. We have no estimates whatever for it in any way.

Mr. McCUMBER. Mr. President, I think that that has been ruled on before affirmatively. However, I have my doubts about the correctness of the ruling that has been made upon that proposition. I suppose it is governed by Rule XVI of the Rules, which provides:

And no amendments shall be received to any general appropriation bill the effect of which will be to increase an appropriation already contained in the bill—

This, of course, will increase it—

or to add a new item of appropriation, unless it be made to carry out the provisions of some existing law, or treaty stipulation, or act, or resolution previously passed by the Senate during that session; or unless—

These are the exceptions—

or unless the same be moved by direction of a standing or select committee of the Senate—

Of course the amendment does not come within that rule—

or proposed in pursuance of an estimate of the head of some one of the departments.

The only question upon the latter clause is as to the estimate. I understand there has been an estimate by the department for the cost of the service of the Metropolitan police. Therefore the amendment would not be subject to the point of order that there had been no estimate. The only way the Senator from Maryland could ask that it come within the rule would be, possibly, that the amendment would make the appropriation a little greater than the estimate.

Mr. SMITH of Maryland. I wish to say to the Senator that the official estimate from the department is 11 captains, at $1,500 each.

Mr. McCUMBER. All I want the Senator to admit is that there is an estimate, and then I want the ruling of the Chair upon the proposition whether when there is an estimate it precludes an amendment increasing the amount estimated. If we could make an amendment that would cut down an estimate, can we not also move an amendment to raise it? Are we bound to follow the estimate or at least make that estimate the limit to which we may go in an appropriation?

Mr. SMITH of Maryland. I will say to the Senator that these estimates are made and the aggregate is the whole amount of money necessary. If we were allowed to amend these matters and go beyond the estimates, there is no telling to what point we would reach or where the money would come from to pay for the appropriations.

Mr. McCUMBER. Then the Senator would say that Congress is limited in its power in making appropriations to an estimate made by an executive department?

Mr. SMITH of Maryland. I think the rule is very clear.

Mr. McCUMBER. I can hardly conceive that that is the rule.

Mr. WARREN. The Senator ought not to state it in that way. It is simply that it is not in order to offer something that neither has an estimate nor has the report of the committee, but which raises the amount. Estimates have been made specifically as to each case, as to the salary, and so forth.

Mr. McCUMBER. I think the Senator is mistaken as to the rule. The rule is in the alternative; that is, there must either be a report or it must be "proposed in pursuance of an estimate of the head of one of the departments." The estimate has been made, and the only question wherein I differ from the statement made by the Senator is whether when an estimate has been made we are by the rules precluded from making an appropriation by an amendment beyond the estimate. If we are precluded from increasing the estimate, then we by our rules have necessarily given over the power of making appropriation to the executive department.

Mr. WARREN. Not at all, Mr. President, because an amendment can be submitted and go to a committee. If the committee does not act, then the amendment can still perhaps be offered; but the Senator might say we were debarred from passing a bill because under the rules it is required that it shall first go to a committee. The idea is that if we did not have these rules all kinds of legislation would be done upon propositions presented by individual Senators rather than have it go under the rules to a committee.

Mr. McCUMBER. Mr. President, if I may just answer in a word, as I understand the rule, an amendment is not in order unless the same be moved by direction of a special or select committee of the Senate or proposed in pursuance of an estimate, and so forth. I do not care to longer delay the Senate, but I insist, if that is the construction of the rule, then that rule precludes the Senate from exercising its legislative authority in increasing an appropriation beyond the estimate.

The VICE PRESIDENT. The Chair is clearly of the opinion that the point of order is well taken. The Chair does not care to rule on all the reasons set out in the rule inhibiting the increase of an appropriation, but in the ruling the Chair will say that the bill now contains the entire estimate made by the department. The Chair would be of the opinion that if the committee had allowed these men only $900, the estimate being for $1,500, the Senator from North Dakota could have proposed an amendment, because there had already been an estimate to the extent of $1,500. But the amount of the estimate now having been granted by the committee, the Chair is of the opinion that the point of order is well taken.

Mr. McCUMBER. I think that is the same reason that has been heretofore given for the same ruling. I am not challenging it, although I still think it does infringe upon the authority of the Senate to act as a legislative body.

Now, I am going to offer several amendments that might be divided, but, as undoubtedly the same objection would be made to each one, I will submit them as one, and then the objection can apply to all of them and save that much time. But I wish to make a record of them.

On the same page, page 61, line 23, I move to strike out "$1,320" and insert in lieu thereof "$1,800," and on line 25, to strike out "$1,250" and insert in lieu thereof "$1,800."

On page 62, line 1, in the clause relating to the seven privates of class 3, I move to strike out "$1,200" and to insert in lieu thereof "$1,800."

In the provision for 107 privates of class 2, in line 2, page 62, I move to strike out "$1,080" and insert in lieu thereof "$1,800," and in the third line, relating to 56 privates of class 1, at $900, I move to strike out "$900" and insert in lieu thereof "$1,200."

Mr. SMITH of Maryland. I make the same point of order. None of those amounts have been estimated for.

The VICE PRESIDENT. The Chair sustains the point of order.

Mr. WILLIAMS. There is a motion pending that I offered yesterday. It occurs on page 5041 of the RECORD. My motion is to recommit to the District of Columbia Committee all of the bill beginning on line 5, page 17, down to and including line 20, page 18, with instructions to so amend the same as to strike out all appropriations for maintenance or purchase of passenger automobiles, except for the fire department and the police department and the emergency health service.

I want to get permission to amend the motion by putting after the word "automobiles" the words "or carriages drawn by horses." In that event it will read to recommit that part of it with instructions to so amend the same as to strike out all appropriations for maintenance or purchase of passenger automobiles or carriages drawn by horses, except for the fire department, the police department, and the emergency health service.

I do not want to talk about it at any length, because yesterday I said what I wanted to say. I wish to add only that I have thought this the best method to go about it, because the Committee on the District of Columbia can find out at once just in what departments these automobiles and carriages are used by officials, and they can strike out that number, whatever it is, and leave the number that is thought by them to be necessary for emergency work in the fire department, the police department, and the health service.

I do not care to add any more to the discussion. I just desire a vote.

Mr. SMITH of Maryland. I hope the motion will not prevail. It seems to me that if this is a matter which is wrong, it should be corrected, but——

Mr. WARREN. If the Senator from Maryland will allow me, as I understood the motion of the Senator from Mississippi [Mr. WILLIAMS], it was to recommit, with instructions, a part of the bill. I know of no rule under which we can recommit a part of a general appropriation bill with instructions and pass the remainder of the bill. Of course, if the Senator moves to strike out a part of the bill, we can pass on that motion.

Mr. WILLIAMS. It may be, Mr. President, that the parliamentary point made by the Senator from Wyoming [Mr. WARREN] is correct and that a recommittal of the bill with instruc-

tions to amend this part of it would be necessary, but I do not think so. I think we can recommit this part of the bill, and the bill would go over until the committee reported upon this part of it. If, however, the Chair rules otherwise, I shall change the motion so as to make it read to recommit the bill with instructions to amend that part of it beginning with a certain line and ending with a certain line.

Mr. SMITH of Maryland. Mr. President, I was going on to say that I hope that this bill or any part of it will not be recommitted. It has been considered by the Senate and its various items have been passed upon. It seems to me if the Senator from Mississippi wants any change in the manner and mode of transportation in the District of Columbia, there is another way to accomplish that object. If the Senator desires to do so, he may offer a resolution providing for the appointment of a commission to investigate these matters, so as to ascertain what is best to be done. I do not think, however, that this bill ought to be recommitted to the Appropriations Committee, or that any part of it should be so recommitted, and I hope it will not be.

Mr. WILLIAMS. Mr. President, I, of course, am well aware of the fact that if I introduced a separate bill or resolution upon this subject and had it sent to a committee, it would not be considered, but that that would be the end of it. I do not know of any way to get at these reforms except when appropriation bills are under consideration, when considerations of these questions can be forced.

I think we are all agreed that this use of automobiles by officials has grown into an abuse; I think we are all agreed that we ought to begin to reform it; and if I thought this was to be the be-all and the end-all of it I would not make this motion; but I expect upon each appropriation bill which is brought here—the naval bill, the military bill, and the remainder of them—to offer amendments similar to this, so that we may eliminate this entire abuse in order that there shall be no longer public officials using automobiles and carriages purchased by the public, mainly for the purpose of carrying them to their offices and back, and partially for social and other purposes, which are certainly not within the purview of the appropriation power of the Congress of the United States.

I do not know any other way to get at it except this. If I knew, or if I could get the information myself, I would now move to strike out the three automobiles used in this department, the two used in the other, and the one used in the other, but I have not the information and I can not get it. The committee can get it; the committee can ascertain it in a telephone conversation, if it does not already know it, in 30 minutes at the Municipal Building, and it can furnish the information. So I merely lay down the rule to guide them, to wit: Strike out all of the appropriations for the maintenance or purchase of the automobiles except for these three departments, where it is evident that there are occasions when quick service must be had—the fire department, the police department, and the emergency health department. It can be done very easily, and will merely cause the postponement of final action upon the bill until to-morrow. The committee can get the information to-morrow morning before the Senate meets and come back here with it.

Mr. WARREN. If the Senator from Mississippi will permit me, I will say that I think the only way to reach his object is for the Senator either to move to strike out the language and let us vote directly on that motion or to recommit the entire bill. There is, however, another way to reach it. It can be reached in all the other bills where the same matter comes up.

Mr. WILLIAMS. I can not hear the Senator's suggestion.

Mr. WARREN. I say it can be reached on other appropriation bills as to all of these appropriations for the various departments.

I think I ought to say to the Senator that there has formerly been a great deal of discussion on this matter, and undoubtedly there has been more or less use of these vehicles for private purposes as to the general transportation in the departments; but when we came to ask officially, by resolution duly passed here, from every department the exact number of vehicles which they had, we found the number a great deal less than had been reported. The information came in here tabulated and went to the Committee on Appropriations. The automobiles that are now being provided for are to take the places of horses and carriages, so that they are not additional vehicles, as a general thing. It is true that there is one automobile added in this bill, but as to the others, they are to take the place of the horse-drawn vehicles for personal transportation and of horse trucks.

Mr. WILLIAMS. If the Senator please, I wish to do away with the horse-drawn vehicles for the transportation of officials themselves, as well as the automobiles. I do not want one to take the place of the other; I want to do away with both.

Mr. WARREN. That being true, I presume the Senator desires his motion to apply to the departments as well as to the District of Columbia?

Mr. WILLIAMS. Yes.

Mr. WARREN. So that there are other bills on which it would be just as important to put this restriction and where it would be just as effective as upon this bill.

Mr. WILLIAMS. But I can not introduce a resolution upon this appropriation bill to apply to all the departments, nor could I introduce upon another appropriation bill a resolution to apply to this. I have to take each bill as it comes. If the Senator please, the situation is this: I can not move to strike out without running the risk of striking out certain motor vehicles which are used for truck purposes, for the transportation of material. I do not want to strike that out; I think it is wise to use them; I think they are much cheaper than the horse-drawn vehicles for that purpose.

Mr. VARDAMAN. Mr. President, I should like to ask the Senator from Wyoming a question. I understood him to say that, in response to a resolution passed by this body, lists of the vehicles used by the different departments, or, rather, the automobiles used by them, have been furnished to the Senate.

Mr. WARREN. Lists were furnished.

Mr. VARDAMAN. At what time?

Mr. WARREN. It was something more than a year ago. I saw the returns here yesterday. They were in the hands of the Senator from Kansas [Mr. BRISTOW].

Mr. VARDAMAN. Do those lists embrace all the departments?

Mr. WARREN. They embrace all the departments and subdivisions of the departments. The lists were very complete.

Mr. VARDAMAN. I should like very much to see those lists, Mr. President. I agree most heartily with my colleague [Mr. WILLIAMS] that this is an inexcusable expense and should be stopped. I can see no more reason for supplying automobiles to the Commissioners of the District of Columbia, or to the heads of the different departments, than there is for supplying automobiles to the United States Senators. And no Senator would dare provoke the wrath of his constituents by proposing to have the Government furnish automobiles for Senators. It is an unwarranted prodigality of public funds; and I agree with the senior Senator from Mississippi that now is the time to begin the pruning. It is unfortunate that a little more pruning had not been done before this. If it had, the abuse would not have grown to such rank proportions.

Mr. BRISTOW. Will the Senator from Mississippi yield to me?

Mr. VARDAMAN. I yield to the Senator from Kansas.

Mr. BRISTOW. I desire to say that the information to which the Senator from Wyoming [Mr. WARREN] refers was furnished the Senate two years ago, in 1912. I think we ought to have the information up to date. I am in thorough accord with the senior Senator from Mississippi [Mr. WILLIAMS] on the subject.

Mr. THOMAS. Mr. President——

Mr. VARDAMAN. I yield to the Senator from Colorado.

Mr. THOMAS. I merely want to say that I quite agree with the two Senators from Mississippi, and I want to support this motion. It is a very small matter, in my judgment, however, compared to some of the appropriations which have been passed here without even a division.

Mr. VARDAMAN. I want to say in reply to that, Mr. President, that there is no item upon this bill more indefensible; I do not care how small it is—that is not the question—if it is not justified in law, in morals, and good policy, it ought to be cut off.

Mr. THOMAS. I would like to inquire of the Senator if he is aware of the fact that this bill increases the salaries of the commissioners $1,000 a year?

Mr. VARDAMAN. I understand it does. I have been unfortunate, Mr. President, in the fact that I have been sick and compelled to be absent——

Mr. THOMAS. That is an item quite as indefensible as this, as they were appointed with the full understanding that they were to serve for a certain amount, and we have given them $1,000 a year more.

Mr. VARDAMAN. Certainly there seems to be no limit to our liberality.

Mr. THOMAS. None whatever.

Mr. VARDAMAN. Absolutely none; and I am growing very tired of it.

Mr. THOMAS. In addition to that, we supply each one of them with an automobile and with a chauffeur.

Mr. VARDAMAN. As I said a moment ago, I have been detained from the Senate on account of illness until this morning. I am very much in favor of cutting off this needless lagniappe that the Government officers are enjoying, and I for one am going to insist hereafter that the gentlemen who hold these places shall either ride on the street cars or furnish their own conveyances.

Mr. President, in performing the functions of United States Senator we are executing a sacred trust committed to us by our masters—the people. We must be just, but to trench upon the generous in matters of appropriating public funds would carry us far beyond the limits of our authority and make us traitors to the constituents who sent us here.

Mr. WILLIAMS. Mr. President, I wish to amend the proposition by putting it in a better shape. Instead of moving to recommit that portion of the bill I wish to move to insert the following:

That no money appropriated by this act shall be used for the maintenance or purchase of passenger automobiles or carriages drawn by horses, except for the fire department, the police department, and the emergency health service.

That overcomes the difficulty suggested by the Senator from Wyoming and brings the question squarely before the Senate.

Mr. SMITH of Maryland. Mr. President, it seems to me that this is rather a summary way of getting at a matter of this kind. I am of the impression that probably there are irregularities in this respect, but automobiles have been purchased and carriages have been purchased, and what are you going to do with them?

Mr. WILLIAMS. Sell them.

Mr. SMITH of Maryland. Well, you can do that——

Mr. WILLIAMS. That is what we did with the Senate horses and wagons which we did not need. You have 31 of those automobiles in the service of the District of Columbia, and everybody knows that is too many.

Mr. SMITH of Maryland. There may be too many, and I presume there are too many, but at the same time it is the mode of transportation; it is the mode of doing business that this age of progress warrants.

Mr. VARDAMAN. Mr. President, if the Senator from Maryland will yield to me for a moment——

Mr. SMITH of Maryland. I yield the floor.

Mr. VARDAMAN. I suggest, if the Senator thinks we have too many, that he adopt the suggestion made by my colleague, take the matter under advisement, and discover whether or not there are too many and whether we can not dispense with a few of them.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Mississippi [Mr. WILLIAMS].

Mr. VARDAMAN. I ask for the yeas and nays.

The VICE PRESIDENT. Is the request for the yeas and nays seconded?

Mr. WILLIAMS. What did the Chair decide as to the amendment?

The VICE PRESIDENT. The Chair had no opportunity to decide. Is the request for the yeas and nays seconded?

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). I have a general pair with the Senator from New Mexico [Mr. FALL], and therefore withhold my vote.

Mr. GALLINGER (when his name was called). I transfer my pair with the junior Senator from New York [Mr. O'GORMAN] to the junior Senator from Maine [Mr. BURLEIGH] and vote "nay."

Mr. KERN (when his name was called). I have a pair with the Senator from Kentucky [Mr. BRADLEY], which I transfer to the Senator from Louisiana [Mr. THORNTON], and vote "yea."

Mr. LEA of Tennessee. I have a general pair with the senior Senator from South Dakota [Mr. CRAWFORD]. In his absence, I withhold my vote.

Mr. MYERS (when his name was called). In the absence of my pair, the junior Senator from Connecticut [Mr. MCLEAN], I withhold my vote.

Mr. SMITH of Georgia (when his name was called). I have a pair with the senior Senator from Massachusetts [Mr. LODGE]. I transfer that pair to the junior Senator from South Carolina [Mr. SMITH] and vote "yea."

Mr. THOMAS (when his name was called). I transfer my pair with the senior Senator from New York [Mr. ROOT] to the senior Senator from Nevada [Mr. NEWLANDS] and vote "yea."

Mr. WILLIAMS (when his name was called). I transfer my pair with the senior Senator from Pennsylvania [Mr. PENROSE] to the Senator from Illinois [Mr. LEWIS] and vote "yea."

The roll call was concluded.

Mr. WARREN. I transfer my standing pair with the Senator from Florida [Mr. FLETCHER] so that he may stand paired with the Senator from Idaho [Mr. BORAH], and I vote "nay."

Mr. JAMES. I transfer the pair I have with the junior Senator from Massachusetts [Mr. WEEKS] to the Senator from Tennessee [Mr. SHIELDS] and vote "nay."

Mr. CLAPP. I desire to announce that the senior Senator from Michigan [Mr. TOWNSEND] is absent on the business of the Senate and that he is paired with the Senator from Arkansas [Mr. ROBINSON].

Mr. SMITH of Arizona. I desire to announce the absence of the Senator from Alabama [Mr. BANKHEAD] on account of important business.

Mr. REED (after having voted in the affirmative). When I voted I had forgotten that my pair, the Senator from Michigan [Mr. SMITH] was absent from the city. I transfer my pair with that Senator to the Senator from Ohio [Mr. POMERENE] and will allow my vote to stand.

The result was announced—yeas 28, nays 19, as follows:

YEAS—28.

| | | | |
|---|---|---|---|
| Ashurst | Kern | Poindexter | Sterling |
| Bristow | La Follette | Reed | Thomas |
| Clapp | Lane | Shafroth | Thompson |
| Gore | McCumber | Sheppard | Tillman |
| Gronna | Norris | Shively | Vardaman |
| Jones | Overman | Smith, Ga. | West |
| Kenyon | Owen | Smoot | Williams |

NAYS—19.

| | | | |
|---|---|---|---|
| Brady | Gallinger | Martin, Va. | Smith, Ariz. |
| Brandegee | Hughes | Martine, N. J. | Smith, Md. |
| Bryan | James | Page | Swanson |
| Catron | Johnson | Perkins | Warren |
| Dillingham | Lee, Md. | Pittman | |

NOT VOTING—48.

| | | | |
|---|---|---|---|
| Bankhead | Cummins | Myers | Shields |
| Borah | du Pont | Nelson | Simmons |
| Bradley | Fall | Newlands | Smith, Mich. |
| Burleigh | Fletcher | O'Gorman | Smith, S. C. |
| Burton | Goff | Oliver | Stephenson |
| Chamberlain | Hitchcock | Penrose | Stone |
| Chilton | Hollis | Pomerene | Sutherland |
| Clark, Wyo. | Lea, Tenn. | Ransdell | Thornton |
| Clarke, Ark. | Lewis | Robinson | Townsend |
| Colt | Lippitt | Root | Walsh |
| Crawford | Lodge | Saulsbury | Weeks |
| Culberson | McLean | Sherman | Works |

The VICE PRESIDENT. A quorum has not voted.

Mr. MYERS. Mr. President, as it appears that it is necessary for me to vote in order to make a quorum, I shall vote. I am permitted to do so under those circumstances.

Mr. WILLIAMS. The Senator can not vote now, after the result has been announced.

Mr. MYERS. I had no way of knowing that my vote would be necessary to make a quorum.

Mr. WILLIAMS. But under the rules the Senator can not vote after the result is announced.

Mr. MYERS. Is that the fact, Mr. President? May I not vote now?

The VICE PRESIDENT. The Chair is of the opinion that a Senator can not vote after the announcement of the result is made. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Hollis | Myers | Smith, Ga. |
| Brady | Hughes | Norris | Smith, Md. |
| Bristow | James | Overman | Smoot |
| Bryan | Johnson | Owen | Sterling |
| Catron | Jones | Page | Swanson |
| Chilton | Kenyon | Perkins | Thomas |
| Clapp | Kern | Pittman | Thompson |
| Dillingham | La Follette | Poindexter | Vardaman |
| Fall | Lane | Reed | Warren |
| Gallinger | Lee, Md. | Shafroth | West |
| Gore | McCumber | Sheppard | Williams |
| Gronna | Martin, Va. | Shively | |
| Hitchcock | Martine, N. J. | Smith, Ariz. | |

The VICE PRESIDENT. Fifty Senators have answered to the roll call. A quorum of the Senate is present. The question is on the amendment of the Senator from Mississippi [Mr. WILLIAMS].

Mr. DILLINGHAM. I should like to have the amendment stated from the desk.

The VICE PRESIDENT. The Secretary will state the amendment.

The SECRETARY. On page 18, after the words "District of Columbia," on line 21, it is proposed to insert:

*And provided further*, That no money appropriated by this act shall be used for the maintenance or purchase of passenger automobiles or carriages drawn by horses except for the fire department, the police department, and the emergency health service.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. GALLINGER (when his name was called). I again announce the transfer of my pair to the junior Senator from Maine [Mr. BURLEIGH] and will vote. I vote "nay."

Mr. KERN (when his name was called). I transfer my pair with the senior Senator from Kentucky [Mr. BRADLEY] to the junior Senator from Illinois [Mr. LEWIS] and will vote. I vote "yea."

Mr. REED (when his name was called). I transfer my pair with the senior Senator from Michigan [Mr. SMITH] to the junior Senator from Ohio [Mr. POMERENE] and will vote. I vote "yea."

Mr. SMITH of Georgia (when his name was called). I transfer my pair with the senior Senator from Massachusetts [Mr. LODGE] to the junior Senator from South Carolina [Mr. SMITH] and will vote. I vote "yea."

Mr. THOMAS (when his name was called). I transfer my pair to the senior Senator from Nevada [Mr. NEWLANDS] and will vote. I vote "yea."

Mr. WARREN (when his name was called). I announce the same arrangement of pairs, so that the senior Senator from Florida [Mr. FLETCHER] will stand paired with the senior Senator from Idaho [Mr. BORAH], and will vote. I vote "nay."

Mr. WILLIAMS (when his name was called). I transfer my pair with the senior Senator from Pennsylvania [Mr. PENROSE] to the senior Senator from Louisiana [Mr. THORNTON] and will vote. I vote "yea."

The roll call was concluded.

Mr. JAMES. I have a general pair with the junior Senator from Massachusetts [Mr. WEEKS], which I transfer to the junior Senator from Tennessee [Mr. SHIELDS] and will vote. I vote "nay."

Mr. SMITH of Arizona. I again announce the absence of the senior Senator from Alabama [Mr. BANKHEAD] on account of important business.

The result was announced—yeas 29, nays 21, as follows:

YEAS—29.

| | | | |
|---|---|---|---|
| Ashurst | Jones | Poindexter | Thomas |
| Bristow | Kenyon | Reed | Thompson |
| Chilton | Kern | Shafroth | Vardaman |
| Clapp | La Follette | Sheppard | West |
| Fall | Lane | Shively | Williams |
| Gore | McCumber | Smith, Ga. | |
| Gronna | Norris | Smoot | |
| Hitchcock | Overman | Sterling | |

NAYS—21.

| | | | |
|---|---|---|---|
| Brady | Hughes | Myers | Smith, Md. |
| Bryan | James | Owen | Swanson |
| Catron | Johnson | Page | Warren |
| Dillingham | Lee, Md. | Perkins | |
| Gallinger | Martin, Va. | Pittman | |
| Hollis | Martine, N. J. | Smith, Ariz. | |

NOT VOTING—45.

| | | | |
|---|---|---|---|
| Bankhead | Cummins | Oliver | Stephenson |
| Borah | du Pont | Penrose | Stone |
| Bradley | Fletcher | Pomerene | Sutherland |
| Brandegee | Goff | Ransdell | Thornton |
| Burleigh | Lea, Tenn. | Robinson | Tillman |
| Burton | Lewis | Root | Townsend |
| Chamberlain | Lippitt | Saulsbury | Walsh |
| Clark, Wyo. | Lodge | Sherman | Weeks |
| Clarke, Ark. | McLean | Shields | Works |
| Colt | Nelson | Simmons | |
| Crawford | Newlands | Smith, Mich. | |
| Culberson | O'Gorman | Smith, S. C. | |

So Mr. WILLIAMS's amendment was agreed to.

Mr. THOMAS. Mr. President, when the bill comes into the Senate I want to reserve, for a separate vote, the amendments offered by the committee found on line 5, 6, and 7 of page 2 of the bill.

The VICE PRESIDENT. That reservation will be made.

The bill was reported to the Senate as amended.

The VICE PRESIDENT. The question is on concurring in the amendments made as in Committee of the Whole, reserving the amendments on lines 5, 6, and 7 of page 2.

The amendments were concurred in.

The VICE PRESIDENT. The question is on concurring in the first amendment reserved, which will be stated.

The SECRETARY. On page 2, line 5, after the words "two commissioners, at," the Senate, as in Committee of the Whole, agreed to strike out "$5,000" and insert "$6,000."

The VICE PRESIDENT. The question is on concurring in the amendment made as in Committee of the Whole. [Putting the question.] By the sound the noes seem to have it.

Mr. GALLINGER. Mr. President, I may be obtuse, but I did not quite understand the form of the question.

The VICE PRESIDENT. The question was on agreeing to the amendment made as in Committee of the Whole.

Mr. GALLINGER. Concurring in the committee amendment on those lines?

The VICE PRESIDENT. Concurring in the committee amendment on those lines.

Mr. GALLINGER. I hope the vote will be taken again.

The VICE PRESIDENT. The question is on concurring in the committee amendment made as in Committee of the Whole. [Putting the question.] By the sound the noes seem to have it.

Mr. WILLIAMS. I call for the yeas and nays.

The yeas and nays were not ordered.

The VICE PRESIDENT. The amendment is not concurred in.

The SECRETARY. In line 7, on page 2, the Senate, as in Committee of the Whole, agreed to strike out "$5,000" and insert "$6,000," so as to read:

Engineer commissioner, so much as may be necessary to make salary $6,000.

The VICE PRESIDENT. The question is on concurring in the amendment made as in Committee of the Whole. [Putting the question.] The noes seem to have it. The noes have it.

Mr. WILLIAMS. I ask for the yeas and nays.

The yeas and nays were not ordered.

The VICE PRESIDENT. The amendment is not concurred in. The bill is still in the Senate and open to amendment. If there are no further amendments, the question is, Shall the amendments be engrossed and the bill be ordered to a third reading.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. SMITH of Maryland. I move that the Senate request a conference with the House of Representatives on the bill and amendments, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to, and the Vice President appointed Mr. SMITH of Maryland, Mr. LEA of Tennessee, and Mr. GALLINGER conferees on the part of the Senate.

## WOMAN SUFFRAGE.

Mr. WILLIAMS. Mr. President, earlier in the day a statement was made that the elements in this country in favor of passing the joint resolution to amend the Constitution to force States to accept woman suffrage wanted a delay and a postponement of the vote. I said that one branch of them had written to me to say that they wanted no postponement, but that at that time the letter was in my office. I have since gotten the letter from the office, and I ask that it be read.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read as requested.

Mr. WILLIAMS. Before the letter is read I want to say that the chairman of that branch is Mrs. Medill McCormick; that one of the very distinguished members of the committee is Mrs. Helen Gardener, whom we all know as a very intellectual, bright woman, and another is Mrs. Desha Breckinridge, of Lexington, Ky., who stands very high. I think they perhaps speak as much for the woman rights sentiment as any other ladies in the country. Now I ask that the letter be read.

The Secretary read as follows:

WASHINGTON, D. C., *March 11, 1914.*

DEAR SENATOR: In view of the fact that a discussion has arisen between the two national suffrage associations as to when we desire a vote to be taken on the pending amendment, I wish to explain that the National American Woman Suffrage Association, which I have the pleasure of representing, is desirous of having a vote immediately upon the close of the debate.

We shall appreciate any assistance you may be able to render us.

Sincerely, yours,

RUTH HANNA MCCORMICK,
*Chairman Congressional Committee,*
*National American Woman Suffrage Association.*

## NOTICES OF BUSINESS, ETC.

Mr. THOMAS. Mr. President, in order to accommodate the Senator from North Dakota [Mr. MCCUMBER] I wish to give notice that on Wednesday, the 18th of March, instead of the 16th, as previously stated, following the routine morning business, I shall address the Senate on the joint resolution (S. J. Res. 117) relating to waters of the Rio Grande in Colorado and appropriations thereof for irrigation, and authorizing the State of Colorado to institute suit against the Secretary of the Interior to determine its rights to appropriate, and so forth.

Mr. SMITH of Arizona. In this connection I should like to say to the Senator from Colorado that in looking over the notices already given I gave notice that I would make a motion immediately after the morning business on that day to call up the irrigation bill. I gave that notice this morning, and I gave it with reference to the time that had been set by the Senator from Colorado for the speech he purposes to make. Inasmuch as I am very anxious to get away from town on matters of some importance to me, I was desirous of having that bill disposed of before I left. While I am very adverse to taking up any of the time of the Senate, as a matter of accommodation to me I should like very much to have the Senator adhere to his former notice if he can do so without inconvenience to himself.

Mr. THOMAS. I could do it without inconvenience to myself, Mr. President, but I can only do it by inconveniencing the Senator from North Dakota. He has not completed his speech on a subject upon which he addressed the Senate some days ago. I do not want to interfere with the convenience of the Senator from Arizona in the slightest degree, but at the same time I should like to have this notice prevail unless it very seriously inconveniences him.

Mr. McCUMBER. I understand that the purpose is to adjourn over from to-day until Monday. That being the purpose, I will give notice then that I shall ask the Senate to allow me to finish my address on Senate bill 120, providing for a system of grain inspection and grading, immediately after the close of the morning business on Monday.

Mr. KERN. I was about to express a hope that the Senate may adjourn until Monday, but whether it does or not will depend upon the action of the Senate in executive session. I understand that there is an important matter to come before the Senate in executive session, which if disposed of will enable us to adjourn until Monday.

Mr. McCUMBER. I will change my notice and state that I shall ask the Senate to permit me to finish my address on the next day the Senate is in session immediately after the close of the morning business.

Mr. SWANSON. Mr. President, I hope the Senate will not adjourn until Monday. There are a great many bills on the calendar which many of us want to have considered. We can not get consideration for them in the morning hour. I hope we will be able to have a session at some time when the calendar can be taken up. For about a month the calendar has not been gone through a single time.

I for one think that when a committee works and reports bills that are considered to be of public interest and they are placed on the calendar they ought to be considered. There is a disposition to put aside the calendar every day, and then when a time comes when we may consider the calendar, when no special measure is pressing, we adjourn over from Friday until Monday. I think the calendar is entitled to some consideration. It is becoming crowded. For a month now I have been very anxious that it should be considered. There are bills upon it that ought to be considered at this session of Congress. I hope some arrangement will be made by which the calendar can be called at some time. We have been here for the entire session and the calendar has not been gone through with.

Mr. THOMAS. Personally I have no desire to adjourn over until Monday; I am willing to do so to accommodate others; but if there is no adjournment over, then, of course, the notice which I gave a moment ago is unnecessary. My understanding was that there had been an agreement reached whereby when the Senate adjourned to-day it would adjourn until Monday. If I am mistaken about that, I am not to blame for it.

Mr. SHAFROTH. I hope that a motion to adjourn over until Monday will be made and that it will prevail. We have a number of committees that meet to-morrow. I have one that I expect will be in session all day. Not only that, but there has been an accumulation of matters on every Senator's desk and it is almost imperative that we should have one day to attend to business outside.

Mr. SWANSON. I should like to ask the Senator what is the use of a committee considering and reporting a bill if the bill is never to be considered after it reaches the calendar?

Mr. SHAFROTH. There will be plenty of time to consider the bills on the calendar.

Mr. SWANSON. There will not be if we expect to adjourn any time this summer. Every time a request is made in the morning hour for the consideration of the calendar, it is pushed aside for the consideration of some special bill; and then every time when the Senate may be considered to be free to consider the calendar, the Senate adjourns over until Monday. The calendar is congested, and some of us want to have the bills on it considered.

Mr. SHAFROTH. That situation will clear itself because, when the time comes, Senators will agree to set a time when a vote shall be taken.

Mr. SWANSON. We can not agree on a time for a vote to be taken on the calendar; it will have to be called. We have not gone through with it this session. It has been considered for a few minutes, but it has not been gone through with.

EXECUTIVE SESSION.

Mr. SHIVELY. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 18 minutes spent in executive session the doors were reopened.

ADJOURNMENT TO MONDAY.

Mr. KERN. I move that when the Senate adjourns to-day it adjourn to meet on Monday next.

The motion was agreed to.

Mr. KERN. I move that the Senate adjourn.

The motion was agreed to, and (at 6 o'clock and 30 minutes p. m.) the Senate adjourned until Monday, March 16, 1914, at 12 o'clock meridian.

## CONFIRMATIONS.

*Executive nominations confirmed by the Senate March 13, 1914.*

THIRD ASSISTANT SECRETARY OF STATE.

William Phillips to be Third Assistant Secretary of State.

RECEIVER OF PUBLIC MONEYS.

Jacob A. Mayer to be receiver of public moneys at Havre, Mont.

REGISTER OF LAND OFFICE.

Frank Langley to be register of the land office at Coeur d'Alene, Idaho.

SURVEYOR GENERAL.

I. C. Thoresen to be surveyor general of Utah.

PROMOTIONS AND APPOINTMENTS IN THE NAVY.

Commander Robert W. McNeely to be a commander.

Lieut. John C. Fremont, jr., to be a lieutenant commander.

Lieut (Junior Grade) Earle J. Johnson to be a lieutenant.

Lieut. Col. John A. Lejeune to be a colonel in the Marine Corps.

Maj. Wendell C. Neville to be a lieutenant colonel in the Marine Corps.

Capt. Harry Lee to be a major in the Marine Corps.

Albert L. Bass to be an assistant surgeon in the Medical Reserve Corps.

Boatswain Niels A. Johnsen to be a chief boatswain.

Boatswain Isidor Nordstrom to be a chief boatswain.

POSTMASTERS.

COLORADO.

L. D. Conant, Monte Vista.

MICHIGAN.

Michael Doherty, Escanaba.

MISSISSIPPI.

Newton D. Goodwin, Gulfport.

Mrs. Lallie H. Humphreys, Greenwood.

WYOMING.

A. N. Hasenkamp, Laramie.

## HOUSE OF REPRESENTATIVES.

FRIDAY, *March 13, 1914.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Father in heaven, we hail with gratitude every rebuke for sin, every commendation for righteousness, since both spring from the same loving heart and are administered for our eternal good. The one is loss, the other gain; the one discord, the other harmony; the one alienation, the other home; the one hell, the other heaven. May we be apt scholars, avoiding the one, seeking the other, that the peace which passeth understanding may possess our souls. In Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed bills and a joint resolution of the following titles, in which the concurrence of the House of Representatives was requested:

S. 1739. An act to reserve certain lands and to incorporate the same and make them a part of the Caribou National Forest Reserve;

S. 2337. An act to create the coast guard by combining therein the existing Life-Saving Service and Revenue-Cutter Service;

S. 4172. An act authorizing the Secretary of the Interior to issue a patent to that portion of land, being a fractional block, bounded on the north and east by Bayou Cadet, on the west by Cevallos Street, and on the south by Intendencia Street, in the old city of Pensacola, in the State of Florida;

S. 4173. An act authorizing the Secretary of the Interior to issue a patent to lot No. 306 in the old city of Pensacola, Fla.; and

S. J. Res. 121. Joint resolution authorizing the Secretary of War to furnish one United States garrison flag to William B. Cushing Camp, No. 30, Sons of Veterans.

SENATE BILLS AND JOINT RESOLUTION REFERRED.

Under clause 2 of Rule XXIV, Senate bills and a joint resolution were taken from the Speaker's table and referred to their appropriate committees as indicated below:

S. 4173. An act authorizing the Secretary of the Interior to issue a patent to lot No. 306 in the old city of Pensacola, Fla.; to the Committee on the Public Lands.

S. 4172. An act authorizing the Secretary of the Interior to issue a patent to that portion of land, being a fractional block, bounded on the north and east by Bayou Cadet, on the west by Cevallos Street, and on the south by Intendencia Street, in the old city of Pensacola, in the State of Florida; to the Committee on the Public Lands.

S. 1739. An act to reserve certain lands and to incorporate the same and make them a part of the Caribou National Forest Reserve; to the Committee on the Public Lands.

S. 2337. An act to create the coast guard by combining therein the existing Live-Saving Service and Revenue-Cutter Service; to the Committee on Interstate and Foreign Commerce.

S. J. Res. 121. Joint resolution authorizing the Secretary of War to furnish one United States garrison flag to William B. Cushing Camp, No. 30, Sons of Veterans; to the Committee on Military Affairs.

ORDER OF BUSINESS.

Mr. LEVER. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 13679, the Agricultural appropriation bill.

Mr. HELVERING. Mr. Speaker, before putting that motion, I would like to ask unanimous consent, in view of the fact that we have given way to the Agricultural bill, that the pension bill be brought up immediately after the conclusion of the Agricultural bill, unless it would come on Monday, Wednesday, or Friday.

The SPEAKER. What kind of a pension bill is it? Which committee reports the pension bill the gentleman refers to?

Mr. HELVERING. The Committee on Invalid Pensions.

Mr. RUSSELL. Mr. Speaker, this, under the rules, is pension day, and I have yielded to the Committee on Agriculture.

The SPEAKER. The Chair did not know that the gentleman had yielded.

Mr. RUSSELL. The gentleman from Kansas [Mr. HELVERING] is asking to do it now.

The SPEAKER. What is the request of the gentleman from Kansas?

Mr. HELVERING. I say, Mr. Speaker, in view of the fact that we are yielding our rights this morning, I ask unanimous consent that the pension bill be considered——

The SPEAKER. Is it a pension bill or pension bills?

Mr. HELVERING. An invalid-pension bill.

The SPEAKER. The Chair knows; but is it one bill or more?

Mr. HELVERING. One bill, comprising a number of cases.

The SPEAKER. The gentleman from Kansas [Mr. HELVERING] asks unanimous consent that, this being pension day, immediately after the disposition of the Agricultural bill, unless it comes on Monday, Wednesday, or Friday, the pension bill from the Committee on Invalid Pensions be taken up and considered.

Mr. MANN. Mr. Speaker, reserving the right to object, the Committee on Pensions also has an omnibus bill on the calendar, and if one is considered the other ought to be.

Mr. MURDOCK. I suggest to the gentleman from Kansas [Mr. HELVERING] that he couple them together in his request.

Mr. HELVERING. I include both of them, Mr. Speaker.

The SPEAKER. The gentleman from Kansas includes in his request a bill from the Committee on Invalid Pensions and also a bill from the Committee on Pensions.

Mr. DIES. Mr. Speaker, I would like to inquire of the chairman of the Committee on Pensions what kind of a pension bill is coming up from the Committee on Pensions? I am not speaking now of the Committee on Invalid Pensions.

Mr. SHERWOOD. An omnibus pension bill, containing about 50 names.

Mr. SPARKMAN rose.

The SPEAKER. For what purpose does the gentleman from Florida rise?

Mr. SPARKMAN. For the purpose of gaining some information about this measure. I would like to ask the gentleman how long, in his judgment, it will take to dispose of these two measures?

Mr. HELVERING. I do not suppose it would take over an hour. I was proposing to ask for 30 minutes for general debate.

Mr. SHERWOOD. Not to exceed an hour.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

CAPT. FRANK PARKER.

Mr. RAGSDALE. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from South Carolina rise?

Mr. RAGSDALE. To make a request of the chairman of the Committee on Agriculture to withhold his motion for a moment in order that I may ask that a matter be taken up by unanimous consent.

The SPEAKER. What does the gentleman from South Carolina [Mr. LEVER] say?

Mr. LEVER. I withhold the motion temporarily.

Mr. RAGSDALE. I would like, Mr. Speaker, to take up by unanimous consent Senate bill 746.

Mr. HAMLIN. State what it is.

Mr. RAGSDALE. It is a bill giving the right of exemption to Capt. Parker to go to the School of War, in France. He was already there, and the bill that was passed in this body ordered him away.

This bill was unanimously passed, as I understand, in the Senate. It went before the Committee on Military Affairs here, and was unanimously indorsed by that committee, and it has the indorsement of Gen. Wood and of former Secretary of War Stimson and the War Department generally. I ask that this bill be passed.

The SPEAKER. The gentleman from South Carolina [Mr. RAGSDALE] asks unanimous consent to take up the bill and consider it. Is there objection?

Mr. SISSON. Mr. Speaker, I do not know what the bill is. Let it be reported.

The SPEAKER. The Clerk will report it.

The Clerk read as follows:

An act (S. 746) for the relief of Capt. Frank Parker.

*Be it enacted, etc.*, That nothing contained in the proviso under the heading "Pay of officers of the line" in the act approved August 24, 1912, entitled "An act making appropriation for the support of the Army for the fiscal year ending June 30, 1913, and for other purposes," shall be held to apply to the service of Capt. Frank Parker, United States Army, for the period necessary for him to complete his present tour of duty at L'Ecole de Guerre, France.

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object——

Mr. LEVER. Mr. Speaker, I was about to reserve the right to object myself for the purpose of ascertaining about how long the gentleman thinks it will take to get the bill through. If it is going to consume very much time, I shall have to object, because it is very important that the Agricultural bill be gotten through.

Mr. RAGSDALE. Mr. Speaker, I do not think it will take more than five minutes.

Mr. MANN. I am afraid it will.

Mr. RAGSDALE. Then if there is to be objection on the part of the minority, I will withdraw the request. I understood this morning, however, that there would not be.

Mr. MANN. I have not objected as yet.

Mr. McKENZIE. Mr. Speaker, reserving the right to object, I hope there will not be any objection on this side of the House, because this certainly is a very meritorious measure and it ought to be passed now.

Mr. MANN. This is to waive in a particular case a law passed in the last Congress. I think it would require some discussion as to the law and policy of starting in immediately after we have passed a law to waive it in individual cases.

Mr. RAGSDALE. If the gentleman will permit me, I would like to state that Capt. Parker has been duly assigned to this place by the Government. I would like to read the short letter that came from the War Department on the subject under date of January 15, 1913. It reads as follows:

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF STAFF,
*Washington, January 15, 1913.*

DEAR SENATOR TILLMAN: Replying to your letter with reference to Capt. Parker, the facts in this case are as follows:

Capt. Parker has spent practically the last six years in Camp Columbia, Cuba; 1906 to 1909 in command of his own troops (F) of the Eleventh Cavalry; 1909 to 1912 in active and actual command of a troop of cavalry organized, armed, equipped, and instructed as a regular troop of United States Cavalry (Troop A, Rural Guard). Therefore his service during practically the last six years has been troop duty in its true sense.

His service has been such as to merit favorable consideration of his case, with a view to allowing him to finish his course at the Ecole de Guerre of France, upon which he was engaged until relieved under recent orders. I have reason to believe that he will be admitted to the school and allowed to finish his course if his status were such as to permit him to return.

I should be very glad to see this officer finish his course, as he has spent a great deal of time and energy in preparing for it, and it is a course which should be of great value to Capt. Parker and to the service of which he is a member.

Very sincerely,

HENRY L. STIMSON.

Hon. BENJAMIN R. TILLMAN,
*United States Senate, Washington, D. C.*

Now, the facts are, briefly, these: He was assigned to this duty, but under this rule he has had to resign. Unless he can be reinstated—in a very short period of time his successor will have to be named—it will absolutely preclude him from getting the right to which we think he is entitled and which we think he deserves.

This has been unanimously reported by the Military Committee; and, as stated in the letter I have just read, he has been in active duty with his command. It is only technically that he is barred from these rights. Ordinarily I would not object to the fullest discussion; but in view of the fact that I would like to get this through by the first of April at the outside, it seems to me it ought to be disposed of at once.

Mr. LLOYD. Mr. Speaker, I am quite sure that this House at this time is anxious to proceed with the consideration of the Agriculture appropriation bill, and therefore I object.

CHANGE OF REFERENCE.

Mr. LEVER. Mr. Speaker, before moving to go into the Committee of the Whole House on the State of the Union, I ask for a change of reference of Senate bill 533, to consolidate certain forest lands in the Ochoco National Forest, Oreg., which bill has been improperly referred to the Committee on Agriculture. I make this request at the suggestion of the chairman of the Committee on the Public Lands.

The SPEAKER. The Clerk will report the title of the bill.

The Clerk read the title of the bill.

The SPEAKER. What action does the gentleman wish to have taken?

Mr. LEVER. To change the reference of this bill from the Committee on Agriculture to the Committee on the Public Lands.

The SPEAKER. The gentleman from South Carolina asks unanimous consent to discharge the Committee on Agriculture from the further consideration of Senate bill 533, and to refer the same to the Committee on the Public Lands. Is there objection?

There was no objection.

AGRICULTURAL APPROPRIATION BILL.

Mr. LEVER. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 13679, the Agricultural appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 13679, the Agricultural appropriation bill, with Mr. HAMLIN in the chair.

Mr. SHREVE. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Pennsylvania offers an amendment, which the clerk will report.

The Clerk read as follows:

Page 47, line 24, after the word "nuts," strike out "$55,000" and insert in lieu thereof "$58,000."

Mr. SHREVE. Mr. Chairman, I offer this amendment for the purpose of restoring to the grape belt, on the southern shore of Lake Erie, in Erie County, Pa., a station which was removed during 1913. For many years the Government has maintained a station at North East for the purpose of studying insect pests in the vineyards. I can safely say that the fact that the vineyard business is alive to-day is entirely owing to the Government assistance which we have had. Mr. Johnson was stationed there for many years, and he seems to have had a faculty of studying out ways to combat all the insect pests. He did this up to the time that he left the service, which was entirely of his own accord. During the last year the grape-berry moth has infested this district. I will say that this moth can be found in all parts of the world. In fact, last year the entomologist of France, Mr. Marechal, came to this country and visited our district for the purpose of investigating the grape-berry moth. Even Mr. Johnson himself, in an article which he published at the end of his labors in 1912, declared that he knew nothing about it, that the grape-berry moth had been largely misunderstood. In this article he says (Bulletin 116):

The grape-berry moth (*Polychrosis viteana* Clem.) is an insect enemy of the grape of long standing in the vineyards of the Lake Erie Valley. Since the first reports of its serious injury to the grape crop near Hudson, Ohio, in 1868, it has been an almost continual menace to grape production in vineyards located along the shores of Lake Erie from Sandusky, in Ohio, eastward into Pennsylvania and New York. Most of the data dealing with this insect cover a series of life-history records and field experiments conducted during the seasons from 1907 to 1909, inclusive, in connection with the investigations of the grape-root worm and other insect pests of the grapevine which have been carried on at North East, Pa., by the section of the Bureau of Entomology engaged in deciduous fruit insect investigations under the direction of Mr. A. L. Quaintance.

* * * * * * *

During the seasons of 1907 and 1908 the investigation of the grape-root worm occupied the greater part of the time of the force engaged in the study of grape pests. For this reason the life-history studies covering those seasons were rather fragmentary. During the season of 1909, however, the junior author devoted the greater share of his time to a detailed study of the life history of this pest. From the records secured by him in this relation the data covering the various stages of a large number of individuals, presented under the topic of "Seasonal history for 1909," have been compiled.

Recommendations offered for the control of this insect in regard to the time and manner of making spray applications are based upon the data obtained in the study of the life history and habits of the grape-berry moth during this investigation, correlated with the field experiments and observations covering that period. Since these life-history studies have shown considerable deviations from those previously recorded in regard to the time of appearance of certain stages of the insect and in the number of broods each season, it has been necessary to revise our ideas somewhat as to the relative importance of the spray applications formerly recommended; and since suitable opportunities have not presented themselves for a thorough trial of this revised spray schedule, some of the recommendations along this line are offered rather in the form of suggestions than as definitely demonstrated and proved methods.

* * * * * * *

At the present state of our knowledge of the habits of this pest and of the methods that have been suggested and employed for its control it is impossible to recommend any one method which of itself has given results that are as satisfactory as could be wished.

Mr. Johnson says that they have been in error in their studies and investigations of the proper means of eradicating this pest. Now, in my own district, where we have 10,000 or 15,000 acres of grapes, the damage last year amounted to several hundred thousand dollars, and I have a number of telegrams from our people which I wish to read. The first is from Mr. George E. Pierce, who is a wholesale dealer in grapes:

NORTH EAST, PA., *March 6, 1914.*

M. W. SHREVE, *Washington, D. C.:*

I understand there is a movement to reestablish a Government station in this county. I investigated grape pests. Please use your utmost efforts in its favor. Some of the best located and cultivated vineyards are being cut down on account of berry moths, and the pests are spreading rapidly. The output is decreasing. The acreage in the township is 7,000. My shipments in 1912 were 550 carloads; in 1913, 100 carloads.

GEORGE E. PIERCE.

I have also received the following telegrams:

NORTH EAST, PA., *March 6, 1914.*

Hon. MILTON W. SHREVE,
*Washington, D. C.:*

Grape industry in urgent need of expert help to find way to control pests that threaten its ruin. Do everything possible to secure the help needed. You know from personal knowledge grape crop is decreasing, whereas to supply markets a substantial gain is required.

A. I. LOOP.

NORTH EAST, PA., *March 7, 1914.*

Hon. MILTON W. SHREVE,
*House of Representatives, Washington, D. C.:*

If the Government withdraws its assistance and support, this great grape belt will be ruined, as was the Ohio belt. We can not combat the numerous pests alone. Many vineyards are now being torn out owing to ravages of berry moth and other insects. We need an expert permanently.

JAMES B. STULL.

These telegrams show something of the serious loss we have sustained in that district. Some of the largest manufacturers of grape juice are located in this district, particularly Mr. Welch. Here is what that company says on the subject:

WESTFIELD, N. Y., *March 6, 1914.*

Hon. MILTON W. SHREVE,
*House of Representatives, Washington, D. C.:*

Grape growers of this belt facing serious problem in keeping up quality of grapes and tonnage per acre. It is not too late to check this alarming tendency, but we greatly need additional help to study conditions and spread knowledge among growers. Recommend an expert stationed at North East.

THE WELCH GRAPE JUICE CO.

Mr. MANN. Mr. Chairman, we understand there has been a largely increased demand for grape juice recently. [Laughter.]

Mr. LEVER. Mr. Chairman, I desire to say that the gentleman from Pennsylvania [Mr. SHREVE] has brought this matter to my attention, and he demonstrated to my satisfaction that the work he desires to have done is a work that ought to be done. It is a new line of investigation which has developed since these estimates were submitted. Inasmuch as the gentleman is asking for only $3,000, which will be sufficient to employ one expert to make an investigation, after having consulted with some of my colleagues on both sides of the aisle, I have no objection to the amendment.

Mr. HAWLEY. I concur in the statement of my colleague from South Carolina.

Mr. MANN. With the assistance of Mr. Bryan, the gentleman seems likely to get his amendment inserted in the bill. [Laughter.]

The amendment was agreed to.

The Clerk read as follows:

For investigations of insects affecting cereal and forage crops, $104,500.

Mr. RUSSELL. Mr. Chairman, this amendment, proposing to increase the appropriation $10,000, is not offered simply as the basis for a speech, but I offer it in good faith, believing that it is very important to the constituency that I represent as well as to the farmers in the surrounding States. I am only asking to restore to the bill the estimate of the Agricultural Department.

This service that is now being successfully carried on by and through the Entomology Bureau of the Agricultural Department was, as I understand, established about 17 years ago, and I confess that until within the last few years I and a great many others were somewhat skeptical of its success and value; but later information has convinced me that it is not only successful in many of its investigations but has proven of inestimable value to the agricultural interests of the country, by either exterminating or reducing the number of pestiferous insects or by teaching the farmers how to better protect themselves from their ravages.

I visited the Panama Canal Zone last year, where I had understood that formerly mosquitoes infested the country to such an extent as to make life there intolerable, and that the spread of disease caused by them was very alarming and the death rate very high. I was in the Canal Zone 10 days in the latter part of May and the first days of June, and did not see a mosquito during the time, nor many other insects of any character. Their extermination had been accomplished by the United States medical authorities that had in charge the work of sanitation, which I have no doubt has saved the lives of hundreds of our employees and made possible the completion of the Panama Canal at an earlier date. This actual demonstration and other information has convinced me of the practical utility of the Bureau of Entomology.

If this bureau is furnishing useful service to the agricultural interests of the United States, as I am convinced that it is, I insist that its laboratories or field stations should be located where they are most needed and where they will do the most good.

The district that I represent is in the heart of the Mississippi Valley, bordering upon the Mississippi River opposite the mouth of the Ohio River. The fertility of its soil and its productiveness is not surpassed by any other part of the Mississippi Valley or of the country, and the same may be said of the States that surround and adjoin that district, namely, Arkansas, Tennessee, Kentucky, and Illinois. Southern Illinois—that is only separated from my district and from the county in which I live by the Mississippi River—is known as Egypt, because we are taught in the Bible that in time of famine the Canaanites went down into Egypt to buy corn.

We have for the last four years exported from this country farm products to the value of more than a billion dollars per year, enough to pay the current expenses of running this Government, and we all understand that cotton, corn, and wheat constitute the chief agricultural products that are exported. All of these staple commodities are produced in great abundance in the district I represent.

One county of my district—Dunklin County—produced more than 30,000 bales of cotton in 1913.

The last statistics that I am able to obtain at this moment giving the production of other products in Missouri are for the year 1909. I find that in that year the county in which I reside, Mississippi County, produced 1,152,808 bushels of corn. Scott County produced 508,800 bushels of wheat; Pemiscot County, 5,963 tons of alfalfa; Howell County, 10,041 barrels of apples; and Oregon County, 319,934 baskets of peaches.

These six counties are all is the district that I represent, and I may say that the other 10 counties of that district are equally as productive in their respective lines. I feel safe in saying that if I had a later table of statistics it would show a large increase of production in the more recent years.

Last year the farmers of my district found that some insect—at that time supposed to be cutworm—was doing very serious damage to the growing corn in that section, and upon the urgent request of more than a hundred prominent citizens interested in Agriculture I succeeded, through the courtesy and efficiency of the officers in charge of the Entomology Bureau, in obtaining the services of an expert, Mr. Vernon King, who was sent there from the field station at Wellington, Kans. Upon his first visit he was unable to ascertain the cause of the great destruction of the crops and went away without giving much encouragement. However, the people, finding that their corn was being very seriously damaged, requested his return, and when he came the second time found an insect, a peculiar species of wireworm, that was destroying many acres of growing corn.

I am not able now to state the remedy that he applied nor the extent of benefit realized from his efforts, but he was there several months, and the farmers of that section believed that he rendered very valuable service and are anxious to have located in that part of the country a laboratory or a field station, believing that it will be a great protection to growing crops and of great value to the people.

I received recently the following letter from the Assistant Secretary of Agriculture relative to the investigation of this expert, which I ask to include as a part of my remarks.

DEPARTMENT OF AGRICULTURE,
*Washington, March 10, 1914.*

Hon. J. J. RUSSELL,
*House of Representatives, Washington, D. C.*

SIR: In response to your telephone request to Prof. F. M. Webster, in charge of cereal and forage insect investigations, Bureau of Entomology, for information relative to the work of Mr. Vernon King on certain insects attacking corn in southeastern Missouri and northeastern Arkansas, I would say that this investigation was taken up early in May, 1913, in response to a request from you, which request was accompanied by two petitions from nearly 100 of your constituents explaining the situation and the great losses that had previously been sustained, and urging that an expert from the Bureau of Entomology be detailed to investigate the source of these ravages and devise means for prevention of the same.

In response to this request Mr. Vernon King, at that time attached to the entomological field station at Wellington, Kans., was instructed by wire to proceed to Charleston, Mo., and to thoroughly investigate the cause of these depredations. From the meager information we were able to obtain the difficulty was supposedly, as stated by farmers, due to attack of cutworms. On his arrival on the ground and taking up the investigation Mr. King was not able to find cutworms in any numbers in the fields, and a continued search during the month of May did not reveal either the presence of these pests or any indications of their probable future occurrence. He was therefore instructed to return to his field station.

On June 2, however, Mr. King received a letter from Charleston, Mo., relative to an 80-acre field of corn, half of which had been totally destroyed after his leaving that point. He was at once hurried back to Charleston and soon found that these ravages were not due to cutworms at all, but to an entirely different insect, a peculiar species of wireworm, whose work on the roots of corn is so obscure and elusive as to almost entirely deceive farmers as to the true nature of the insect involved. But in one case Mr. King detected 47 of these destroyers attacking one hill of corn. The insect involved is one that has never been heretofore known to cause serious injuries, and its connection with these ravages came as an entire surprise. For this reason we know comparatively little about the pest or its habits and we were, therefore, at that time helpless to suggest measures of relief. Beginning, therefore, with the 6th of June Mr. King continued his investigations for the entire summer, remaining until the 13th of December, when he returned to his field station.

At present our information in regard to this pest is that it frequently destroys 50 to 75 per cent of the corn crop over considerable areas and that it winters in the fields. The work of the pest in the fields is shown in the accompanying photographs, 1 and 2, and the effect of its attacks on the individual corn plant is shown by photographs 3 and 4.

Later investigations of Mr. King show that the ravages of this pest are much more widely spread than we at first supposed, while owing to its confusion with other insects farmers have not understood its nature and have therefore not been able to devise means for its prevention.

Very respectfully,

B. T. GALLOWAY,
*Assistant Secretary.*

There is to-day no field station of that sort in Missouri and, as I understand, none in Illinois, Kentucky, or Arkansas, and the nearest stations to that country are located at Nashville, Tenn., and Wellington, Kans., the latter place being from where the expert was sent to us, probably 400 miles away.

I am exceedingly anxious as a Representative of a great agricultural district located in the very center of the fertile valley of the Mississippi to have this amendment adopted, in the hope of having a field station established somewhere in that section of the country, and I hope that my friend the able and efficient chairman of this Agricultural Committee, whose faithful work to the cause of agriculture I take pleasure in commending, will consent to the adoption of this amendment.

Mr. RUBEY. Mr. Chairman, as a member of the Committee on Agriculture I hesitate to ask for an increase in an item in the bill which we have reported, but I want to say in this connection that this is to my mind one of the most important items in the bill. It has reference to the eradication of those insects which affect corn, wheat, oats, and all of the staple grain products of agriculture. I want to call the attention of the committee to this fact, and emphasize it, that the Department of Agriculture, when it sent its estimates to the committee, asked for an appropriation of $114,000 for this work. Not only that, but in the increase it asks of $24,000 it sets out every item of expenditure and states exactly how it proposes to carry on this work. I called the attention of the Committee on Agriculture to the great demand that is being made for this kind of work from all over the country. I sincerely trust, in view of the fact that more than $400,000,000 are lost every year on account of insects which work upon these grains, that our chairman will consent to this increase, and that it will be allowed. The Department

of Agriculture in making its estimates studies very carefully what it wants, and if we adopt the amendment offered by the gentleman from Missouri [Mr. RUSSELL], we will not then be appropriating one cent more than the department has asked for this work. I sincerely trust that it will be agreed to.

Mr. LEVER. Mr. Chairman, the committee thought it had given very careful consideration to this bill, I say frankly, however, that the gentleman from Missouri [Mr. RUSSELL], after the bill was made up came to me, as chairman of the committee, and produced the evidence that he has submitted this morning, and I felt then that if I had had that evidence before the committee before the bill was made up I would not have objected to allowing the estimates of the department. Again, as I said in reference to the Pennsylvania item, I have consulted my colleagues on both sides, as far as possible, and I think I can say that it is agreeable to the committee that the amendment be allowed.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Missouri.

The amendment was agreed to.

The Clerk read as follows:

For investigations of insects affecting southern field crops, including insects affecting cotton, tobacco, rice, sugar cane, etc., and the Argentine ant, $49,000.

Mr. THOMAS. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 48, line 5, strike out "$49,000" and insert "$59,000."
Also, line 5, after the semicolon, add the following words:
"*Provided*, That of this sum $18,000 is to be expended for investigation of insects affecting tobacco, of which $2,000 shall be available for immediate use."

Mr. LEVER. Mr. Chairman, on the amendment I reserve the point of order.

Mr. THOMAS. Mr. Chairman, before I proceed I ask unanimous consent to revise and extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. THOMAS. Mr. Chairman, I also ask unanimous consent to withdraw from the amendment the proviso.

The CHAIRMAN. The gentleman from Kentucky asks unanimous consent to modify his amendment by withdrawing the proviso. Is there objection?

Mr. MANN. Mr. Chairman, reserving the right to object, I will ask to have the amendment reported as it would be if modified.

The CHAIRMAN. Without objection, the Clerk will report the amendment.

The Clerk read as follows:

Page 48, line 5, strike out "$49,000" and insert "$59,000."

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

[Mr. THOMAS addressed the committee. See Appendix.]

Mr. STAFFORD. A parliamentary inquiry, Mr. Chairman. How much time has the gentleman from Kentucky remaining?

The CHAIRMAN. None at all. His time has expired.

Mr. BYRNS of Tennessee. Mr. Chairman, I hope the amendment of the gentleman from Kentucky [Mr. THOMAS] will prevail. I know something of the importance of this particular section of the bill to the tobacco grower. Like my friend from Kentucky [Mr. THOMAS] I have had some personal experience in the tobacco fields, and am familiar with the difficulties which confront the tobacco grower. There is no more serious trouble with which the tobacco grower has to contend than that of the hornworm. It constitutes possibly the greatest expense in the cultivation of tobacco. It is estimated that it costs probably $10, and even more in some years, per acre to keep the tobacco clear of the hornworm. By reason of the fact that in the last few years farm labor has increased in price, and it is more difficult now for the farmer to procure labor, the farmers have found it necessary to resort to some other expedient in order to get rid of this great pest. They found it necessary to try some sort of an insecticide, and first began the use of Paris green; but it has been found, as the result of several years' experience, that while Paris green does a great deal toward destroying the hornworm it results frequently in seriously damaging portions of the tobacco. And I am not sure but that the damage done as the result of the use of Paris green sometimes outweighs or equals the amount of money saved in protecting the tobacco from the worm.

Mr. HELM. Mr. Chairman——

The CHAIRMAN. Will the gentleman from Tennessee yield to the gentleman from Kentucky?

Mr. BYRNS of Tennessee. I will.

Mr. HELM. Will the gentleman tell what is the difference between arsenate of lead—that the gentleman from Kentucky [Mr. THOMAS], my colleague, has described as an efficacious remedy for these worms—and Paris green?

Mr. BYRNS of Tennessee. I was just about to state, Mr. Chairman, that in recent years the Government has been conducting experiments for the purpose of finding some insecticide to take the place of Paris green, some remedy which will serve to rid the tobacco of the hornworm and at the same time not result in seriously injuring the tobacco.

Mr. LEVER. Let me call my friend's attention to the fact that Paris green affects the leaf of the tobacco, while this new insecticide does not do so at all.

Mr. BYRNS of Tennessee. Precisely. It has been found that Paris green results in injuring areas of the lower tobacco leaves; also that when it is driven down by the rain from the leaf and accumulates in between the stalk and the leaf of the tobacco it frequently causes the leaf to fall from the stalk. As a result of these experiments by experts on the part of the Government, it has been discovered that by the use of the proper amount of arsenate of lead this injury will not result, and that as good, if not better, results can be obtained, in so far as the worm is concerned.

For some time Prof. A. C. Morgan has been located at Clarksville, Tenn., in the district I have the honor to represent, making investigations in the effort to find some remedy which will relieve the tobacco farmer of this horn worm. He is a man of splendid ability and has worked diligently and faithfully, and I am happy to say has by repeated experiments discovered that arsenate of lead, a combination of lead and arsenic, if applied in the proper way and the proper quantities, will destroy the worm and save the farmer much labor and expense. You gentlemen who have not worked in the tobacco fields as I have, and who do not know the amount of labor involved, can hardly appreciate the importance of this to the farmer. I have sometimes thought that the tremendous importance of this industry and the great number of our citizens who are engaged in it is not fully appreciated by Members of Congress. More than 20 States grow tobacco. In 1909 there was a tobacco acreage of more than one and one-quarter of a million, producing over 1,000,000,000 pounds, with a value of over $104,000,000. Tobacco paid in as a revenue to the Government over $70,000,000. We are asking you to increase this appropriation by only a very small amount, and certainly no class of our citizens has greater claims than the splendid tobacco farmers of Tennessee and Kentucky and other States.

In the State of Tennessee over 100,000 acres of tobacco are cultivated nearly every year, in the aggregate; most of it in the district I represent. Possibly the acreage in the State of Kentucky will be three or four times that amount. And when I state that from $3 to $6 per acre can be saved to each tobacco grower by the proper use of this insecticide, you gentlemen can easily estimate the amount of money that will be saved to the tobacco growers in those two States alone if the department and its corps of experts are given sufficient money to demonstrate to the farmer how they should use this arsenate of lead, what quantity should be used, and how it shall be applied. It is for that purpose that we ask that this amendment be adopted.

The CHAIRMAN. The time of the gentleman from Tennessee [Mr. BYRNS] has expired.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that debate on this paragraph and all amendments thereto be closed in 10 minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that debate on this paragraph and all amendments thereto be closed in 10 minutes.

Mr. GOOD. Mr. Chairman, reserving the right to object, I desire to offer an amendment as a new paragraph. That would not apply?

Mr. LEVER. No.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. BARKLEY. Mr. Chairman, I am in hearty sympathy with the purposes of this amendment, and in order to show the House the necessity for it I want to describe the work of the tobacco worm just briefly. In the months of February and March the farmer who raises tobacco burns and sows what he calls a plant bed. He burns it with brush and logs, as large or as small an area as he may see fit, and then pulverizes the soil after it is burned completely, and then sows the tobacco seed.

Now, as soon as the tobacco plants come up in this tobacco bed it is necessary for the farmer to cover the top of it with canvas in order to keep insects from destroying the bed of plants before he replants it. After he has replanted his tobacco in the spring, after the soil has been prepared, when it gets about 10 or

12 leaves high, then he is compelled to top the tobacco so as to make it spread out and make the leaves larger and heavier, so that the substance of the plant will be diverted into the leaves that remain upon the stalk.

Now, this horn tobacco worm grows to be about the size of your finger, and it is almost matured within a week after it is hatched. The tobacco worm, as my colleague [Mr. THOMAS] has explained, gets under the tobacco leaf, which makes it necessary for the farmer to raise each individual leaf and discover whether there is a tobacco worm under it or on the stalk or anywhere about the tobacco plant. If he overlooks one, before he can get around to that plant again that worm will have matured, and from a week to two weeks can consume from one to two whole leaves of tobacco on that plant.

The tobacco worm is exactly of the same color as the tobacco leaf, which makes it difficult for the farmer to discover it, and if the worm is permitted to mature he goes down the stalk of the tobacco and burrows in the ground, and remains there during the winter, and he comes out the next spring a tobacco fly, and flies around over the farm and deposits eggs, which hatch other tobacco worms, which go on hatching out and producing tobacco worms in an endless chain. So that it makes it necessary for the farmer to resort to some other method of killing this tobacco worm besides going to the tedious process of looking under and over each leaf in order to discover whether one is existing there on the plant. As has been explained here, realizing the absolute impossibility on the part of the man who is looking for these tobacco worms to discover all of them and thereby with his fingers mash their heads and kill them, as they are compelled to do, they have resorted to the use of Paris green, which not only injures the tobacco plant and leaf but also is calculated to injure human life by reason of tobacco chewers chewing the leaf when it is matured. As is stated here, the Department of Agriculture has discovered a remedy in this arsenate of lead, which is not injurious to the plant and does not injure the users of tobacco; and it seems that $18,000 is not a sufficient amount of money, in view of the great amount of revenue that the Government obtains from tobacco, with which to undertake to get rid of this tobacco worm, which is the pest of the tobacco farmer.

As I stated a moment ago, if the farmer overlooks one worm, in a week's time that worm will be able to destroy the value of from one-tenth to one-twentieth of the tobacco plant, because if the worm strips the tobacco leaf of all the substance and leaves nothing but the stem, that reduces the price of the tobacco and the value of the farmer's crop, and in addition reduces the revenue that the Government obtains from the tobacco. So that from a financial standpoint the Government can well afford to appropriate this sum to help eradicate this pest.

Mr. NORTON. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Kentucky yield to the gentleman from North Dakota?

Mr. BARKLEY. I do.

Mr. NORTON. Will the gentleman tell the House, if he knows, how much his State has appropriated or is spending along this line?

Mr. BARKLEY. I do not know exactly how much. The department of agriculture of the State of Kentucky is appropriating a sum of money for that purpose and carrying on work along that line, but by reason of the limitations that are placed upon it, it is unable to accomplish the work that the Federal Government should be able to accomplish. And, besides, I will state to the gentleman, the State of Kentucky gets no revenue into its treasury out of the tobacco crop, even after it is matured.

Mr. NORTON. The gentleman does not know that they are expending any particular amount?

Mr. BARKLEY. I do not know what they are expending, but they are carrying on experiments for that purpose to the limited extent that they are permitted under the law.

Mr. NORTON. The State of Kentucky levies a tax against the tobacco, does it not?

Mr. BARKLEY. Oh, no. The only way in which tobacco can be taxed is when the farmer has been unable to sell it before the assessor comes around, and then it might be assessed as other personal property is assessed. All property in the State of Kentucky must be assessed as of the 1st of September, but at that time the tobacco crop is in the field and therefore is not taxable. For many years the Tobacco Trust reduced the price of tobacco so that the farmer could hardly pay his taxes on other property. I hope the amendment will prevail.

Mr. BYRNS of Tennessee. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Tennessee [Mr. BYRNS] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. RUSSELL. Mr. Chairman, I ask leave to revise and extend my remarks, made this morning. I want to incorporate a letter.

The CHAIRMAN. The gentleman from Missouri [Mr. RUSSELL] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. LEVER. Mr. Chairman, in answer to the suggestion of the gentleman from Kentucky [Mr. THOMAS] as to the amount of money that is expended by the State of Kentucky in this tobacco work, I will say that I have ascertained the amount, and it is about $1,500.

Mr. THOMAS. Mr. Chairman, I will ask the gentleman from South Carolina if it is not a fact that over $3,000,000 in revenue is collected on the tobacco raised in the State of Kentucky and paid into the Federal Treasury?

Mr. LEVER. I have not those figures in hand, but I am sure the gentleman makes an accurate statement of it.

Mr. THOMAS. The amount is over $3,000,000, paid on the tobacco crop of Kentucky.

Mr. TREADWAY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from South Carolina yield to the gentleman from Massachusetts?

Mr. LEVER. I do.

Mr. TREADWAY. I understand that this increase of appropriation under this item is largely with the intention of benefiting the tobacco growers in studying insects that interfere with tobacco growing. The chairman of the Committee on Agriculture stated that this work is done in cooperation with agricultural experiment stations, with agricultural colleges, and with individuals, and that it is done in Tennessee, in Kentucky, in Florida, in Virginia, and Pennsylvania. I would like to call his attention to the fact that there are extensive fields of tobacco in Connecticut, and likewise in western Massachusetts, the section of the State which I have the honor to represent. I desire to inquire whether or not this appropriation will apply equally to the tobacco grown in western Massachusetts and elsewhere, even though there are no stations designated in the list that the gentleman read?

Mr. LEVER. Undoubtedly that is true. Undoubtedly it would be available for work wherever the department thinks a necessity has arisen.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from South Carolina yield to the gentleman from Illinois?

Mr. LEVER. Certainly.

Mr. MADDEN. Is there any provision in this bill for the study of potato bugs?

Mr. LEVER. I do not know that any special provision is made, but the language of the appropriation bill is so broad that they could do it, and, in fact, they are doing it. Yes; I recall now that they are spending quite a little sum of money for the study of potato bugs.

Mr. MADDEN. What do they do in connection with the study of potato bugs?

Mr. LEVER. If the gentleman will glance down a few lines on page 48 of the bill, he will find this paragraph:

> For investigations of insects affecting truck crops, including insects affecting the potato, sugar beet, cabbage, onion, tomato, beans, peas, etc., and insects affecting stored products, $41,500.

Mr. MADDEN. What does the department do with the information it obtains as the result of these studies? Does it write a pamphlet and send it out to the agricultural communities, giving them the information as to how to get rid of potato bugs?

Mr. LEVER. I am prepared to give the gentleman all the information he desires about this potato-bug business——

Mr. MADDEN. I would be glad to have it——

Mr. LEVER. But I suggest that the gentleman allow us to reach that item in its order.

Mr. MADDEN. Very well.

Mr. BARKLEY. Is it not a fact that the word "southern" there is merely a description of the crop, and not a geographical limitation?

Mr. LEVER. Yes; undoubtedly.

Mr. Chairman, these gentlemen have been exceedingly praiseworthy this morning, but that would not entirely affect the position of the committee on this amendment, except for the fact that four delegations in Congress have talked to me about this proposition. First of all, the gentleman from Kentucky [Mr.

THOMAS] appeared before the committee and made a very earnest plea for this work. Then the gentleman from Virginia [Mr. MONTAGUE] did likewise, and the gentleman from Tennessee [Mr. BYRNS] and the gentleman from Florida [Mr. CLARK] have explained to me personally about it, and I got into communication with Dr. Howard, of the Bureau of Entomology, and inquired of him if he thought there was any great necessity for this line of work. His reply was that they had discovered this new insecticide by which the horn worm could be destroyed without injuring the quality of the tobacco itself, and that he desired sufficient funds to employ a few men to bring this insecticide to the attention of the people in the various tobacco districts of the country. In view of that statement and in view of the interest manifested in it by these gentlemen from the various tobacco districts, speaking for the committee, I shall not object to this amendment.

Mr. HELM. Will the gentleman yield?

Mr. LEVER. Yes; I yield.

Mr. HELM. The insecticide that the farmers have been accustomed to use commonly is Paris green, which is a composition of arsenic and copper, as I understand.

Mr. LEVER. Yes.

Mr. HELM. This insecticide that the department has discovered is a composition of arsenic and lead. The buyers of tobacco——

The CHAIRMAN. The time of the gentleman has expired. All time has expired.

Mr. HELM. I ask unanimous consent for one minute.

The CHAIRMAN. All time has expired. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. THOMAS. Mr. Chairman, I ask unanimous consent to incorporate in my remarks an article by Mr. A. C. Morgan, published in the Southern Field Planter. Mr. Morgan is connected with the Bureau of Entomology. This article is upon the subject which we have been discussing.

The CHAIRMAN. The gentleman from Kentucky asks unanimous consent to extend his remarks in the RECORD by incorporating the article that he indicates. Is there objection?

There was no objection.

Mr. GOOD. Mr. Chairman, I offer the following amendment:

The CHAIRMAN. The gentleman from Iowa offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 48, at the end of line 5, add a new paragraph, as follows:

"To enable the Secretary of Agriculture to meet the emergency caused by the introduction of the Argentine corn weevil through the importation of corn from Argentina to the United States, by conducting such experiments as may be necessary to determine the best method of controlling and destroying this pest, and by establishing and maintaining a quarantine against further spread in such manner as he shall deem best, in cooperation with the authorities of the different States concerned and with the several State experiment stations, including rent outside of the District of Columbia, the employment of labor in the city of Washington and elsewhere, and all other necessary expenses, $100,000."

Mr. LEVER. Mr. Chairman, I reserve a point of order on that amendment.

The CHAIRMAN. The gentleman from South Carolina reserves a point of order.

Mr. GOOD. Mr. Chairman, if this amendment which I have offered is adopted it will accomplish two things. First, ti will enable the Secretary of Agriculture to make a scientific investigation and study of the Argentina corn weevil, a pest that has recently been introduced into the United States and which threatens the prosperity of one of the most important industries in this country. In the second place, it will give the Secretary of Agriculture authority to quarantine against the spread of this pest. Already this morning we have adopted an amendment increasing the appropriation for the purpose of aiding in the eradication of the wireworm, another enemy of corn.

This Argentine corn weevil is an entirely new proposition. Scientists must admit that it is different from the weevil that attacks the corn in our Southern States. By experimenting it has been discovered that the damage caused by the southern corn weevil has to a large extent been removed by the propagation of flint corn in those localities. It was found that the white corn was very attractive to the weevil, which would destroy it, and that by the introduction of the flint corn and yellow dent corn damage by the weevil has practically been removed. But the corn that is coming into the United States to-day from Argentina containing this weevil is flint and yellow dent corn, the very kind of corn that the weevil in the Southern States does not attack. I have here a statement from a paper printed in Iowa, to the effect that samples of corn from Argentina contained in a glass jar and placed in a window in the sun show where the weevil has eaten its way out of the kernels, and the small weevils can be seen in the jar with the naked eye. Samples of corn imported from Argentina contain a small hole in the kernel, and by cutting open the kernel it is found that the weevil has eaten up a good part of the starch contained in it.

Mr. Chairman, the corn crop in this country is the largest of our agricultural products. In 1912 we produced 3,125,000,000 bushels. Last year we had about three-fourths of a crop and produced 2,447,000,000 bushels. I have here the report of the Secretary of Commerce, issued under date of March 9, 1914, in which he states that—

In the fiscal year 1912 only 23,909 bushels of corn arrived in the United States from Argentina. In the three months of October, November, and December, 1913, however, imports of Argentina corn rose to 4,102,598 bushels, while official reports indicate even larger arrivals during January and February of the present year.

Last year Argentina's yield of corn was sufficient, not only to supply her home demand but to export to this and other countries 280,000,000 bushels. The corn crop that is now ripening in Argentina is one of the largest crops ever produced in that country. It is estimated that of this crop Argentina will have a surplus for export of 500,000,000 bushels, or an export surplus of more than twenty-two times the total corn crop of the State of Kansas for 1913. Yet in 1907 Argentina, with 7,000,000 acres planted to corn, only produced in the entire country 70,000,000 bushels. The weevil destroyed the crop. The average yield per acre was only 10 bushels that year.

Mr. MADDEN. Does the gentleman think a scientific study of the movement of this corn from Argentina would prevent its coming here?

Mr. GOOD. I think a scientific investigation of this weevil, together with authority given the Secretary of Agriculture to quarantine against its spread, can prevent its introduction and spread; and if it is necessary the Secretary of Agriculture could by the adoption of my amendment stop the importation of corn carrying these weevils altogether. And why should we not stop the importation of corn which contains those pests that will attack the greatest product of our farms—a product having a value every year aggregating more than $1,500,000,000. I think Congress should not hesitate to amend the law so that Argentine corn containing this pest can not be imported into the United States.

The CHAIRMAN. The time of the gentleman has expired.

Mr. GOOD. I ask unanimous consent to continue for five minutes.

The CHAIRMAN. The gentleman from Iowa asks unanimous consent for five minutes more. Is there objection?

There was no objection.

Mr. GOOD. When this appropriation bill was before the House last year I offered a modest little amendment of $250,000 for the purpose of eradicating hog cholera. Some of the gentlemen on that side of the aisle laughed at the proposition and the amendment was lost. The bill at that time did not carry a dollar in specific terms for the eradication of hog cholera. But when the hog cholera spread over this country last year, resulting in the loss of more than $100,000,000 to the farmers, the Committee on Agriculture at last came to the rescue and reported a bill this year appropriating $500,000 for the eradication of hog cholera. That bill just recently passed the House without a dissenting vote. I believed then that the passage of that amendment last year would have been an economy to the Government. While this may seem a large appropriation, I believe it will be economical to adopt this amendment to-day and prevent at the very outset the importation into this country of a dangerous pest that threatens the prosperity of 12,500,000 people engaged in agriculture in the United States. If we do not act now, but wait until this pest is firmly established, the loss to our farmers will be staggering, while the expense to the Government to eradicate it will be enormous.

Mr. McKENZIE. Will the gentleman yield?

Mr. GOOD. I will.

Mr. McKENZIE. Was this danger from the corn weevil apparent last year when we were considering the appropriation bill?

Mr. GOOD. When we passed the appropriation bill last year there was a duty on corn of 15 cents a bushel, which practically prevented the importation of corn. We only received 23,000 bushels of corn from Argentina for the whole year of 1912, and now we have received, in less than three months, under free trade in corn, 4,125,000 bushels from Argentina. Why this large importation? In the first place, we have taken off all the duty on corn that comes to our ports from Argentina and other countries. Then, too, the regular freight rate on corn from Buenos Aires to New York City is only 5 cents a bushel, and tramp steamers carry corn all the way from Argentina to New York

City for 3 cents a bushel, less than one-half of the freight rate on corn from Omaha to Chicago. These are the reasons that make large importations of corn possible, and with large importations of corn containing these pests the situation becomes alarming.

Mr. LINTHICUM. Will the gentleman yield?

Mr. GOOD. I will.

Mr. LINTHICUM. Could not this insect be got rid of by fumigating the corn, placing it in cribs above the ground and fumigating it with formaldehyde?

Mr. GOOD. I think not. This is difficult to answer. This weevil might be exterminated in the way suggested. Scientists claim that it finds its way into the ear of corn just before it reaches the roasting-ear stage. It lays the egg, and the egg produces the weevil, the weevil being found in the kernel. The weevil may remain in the corn all winter, living on the food product, and when it becomes warm the weevil eats its way out, leaving the kernel with much of the starch consumed.

Mr. LINTHICUM. The Agricultural Department has recommended that method of procedure in the South—the use of formaldehyde.

Mr. GOOD. I do not know about that; no one seems to know much about this pest. This is the reason we should have an investigation. If we had knowledge of this pest—its habits of life, and the best way to destroy it—I would not offer this amendment to provide for an investigation.

Mr. MADDEN. If the gentleman will allow me, would not the best way to eradicate the evil be in this case to restore the tariff on corn.

Mr. GOOD. That, of course, would eradicate it. This appropriation would give the Secretary of Agriculture the power to place a quarantine on corn that contains the weevil, and I think that would eradicate it.

Mr. WILLIS. Will the gentleman yield?

Mr. GOOD. Yes.

Mr. WILLIS. Does not the gentleman think that the weevil thrives best under a Democratic administration?

Mr. GOOD. It was never introduced into the country until a Democratic administration put corn on the free list, and when they put corn on the free list and tramp steamers give a freight rate of 3 cents a bushel from Buenos Aires to New York, a means was afforded of introducing this pest, which may add to the farmer's difficulties.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HAUGEN. I ask that the gentleman have five minutes' more time, I want to ask him a question.

The CHAIRMAN. The gentlemen from Iowa asks unanimous consent that his colleague's time be extended five minutes. Is there objection?

There was no objection.

Mr. HAUGEN. I wish to call the gentleman's attention to this item: Does not the gentleman think that the appropriation in this item is sufficient to accomplish the work that he speaks of?

Mr. GOOD. I went to the Agricultural Department and learned that there is not a dollar in this bill for the investigation of Argentina corn weevil.

Mr. HAUGEN. I think the gentleman is mistaken.

Mr. GOOD. The Agricultural Department has other projects on which it will expend this appropriation. The chairman of the committee to-day recognized that fact and consented to an amendment of $10,000 for another purpose. It was necessary to have $10,000 for wire worm. Now, if there had been $10,000 of the $104,000 available for that purpose, it would not have been necessary for the gentleman from Missouri [Mr. RUSSELL] to secure the adoption of his amendment to provide for the eradication of the wire worm.

Mr. HAUGEN. The committee understands that this appropriation authorizes any work that may be contemplated by the department. If the gentleman has outside information that the committee has not and the department has not, I submit that the proposition should receive consideration, if it is a new matter.

Mr. GOOD. It is an entirely new matter that has not been called to the attention of the Secretary of Agriculture until very recently.

Mr. CLARK of Florida. Will the gentleman yield?

Mr. GOOD. Yes.

Mr. CLARK of Florida. I understood the gentleman to say that the weevil flourished better under Democratic administration.

Mr. GOOD. I did not say that. That question was asked me, however.

Mr. CLARK of Florida. I wanted to ask the gentleman if an animal with the characteristics of the weasel would not flourish better under the Republican administration?

Mr. GOOD. Mr. Chairman, I have offered this amendment in good faith. I object to gentlemen on either side of the House trying to laugh out of existence amendments that are offered here in behalf of an industry of 12,500,000 people. You laughed at them when you passed the tariff bill in response to your demand for cheap farm produce. You admitted then that the removal of the duty on farm produce would lower the prices which the farmer would get for his products, but said that the farmer would be able to buy farm machinery cheaper. Six months have elapsed since the enactment of the Underwood bill and there is not a gentleman on that side of the House or anywhere else who can point to a dealer in the United States who is selling farm machinery a penny cheaper than he sold it for a year ago. Being personally interested in the subject, a few days ago I wrote to an implement dealer making inquiry as to what reduction had been made in farm machinery since the passage of the Underwood bill, and here is his reply to my letter, which bears the date of February 27, 1914:

> In reply to your favor of the 24th instant, will say the Underwood tariff has not lowered the price of farm machinery yet. We are paying higher prices for same than last year. The farmer seems to be getting the worst of it, as his produce is on the decline.

You were correct, however, in your prophecy that the removal of the duty on farm produce would lower the price which the farmer would receive. How much the removal of the duty of 15 cents a bushel on corn has lowered the price is difficult to say. We do know, however, that the importation of more than 4,000,000 bushels of Argentine corn in the months of October, November, and December, 1913, was followed by a reduction in the market price of corn in this country of all the way from 10 cents to 15 cents per bushel. A reduction of this kind at that season of the year, when farmers usually expect a raise in price, is unprecedented and can be chargeable to but one thing, and that is the removal of the duty on corn.

A comparison with the price which the farmer receives for his corn this year with the price he received last year proves absolutely nothing. It is unfair and dishonest to say to the farmer that if he is getting as much per bushel for his corn in 1913 as he did in 1912 he ought to be satisfied. In 1913 the farmer only raised three-fourths of a crop and naturally would receive considerable more per bushel. Following this logic, if by the importation of Argentine corn containing a weevil this pest shall further reduce the farmer's yield of corn, you say he ought not to complain if he receives as much per bushel in the future as he did in 1912. The following excerpt from a letter just received well illustrates what has happened:

> ———, of Tipton, a young Democrat—his father and grandfathers on both sides were Cedar County Democrats: I know them all—I understand has announced that he will not stand for any more of it. He was offered 65 cents for his corn in the field, but he thought it was going up to 75 cents. He refused to take it. He had to sell for around 53 or 55 cents. He told one of my friends that he went home and told his wife that he was in favor of protecting his own interest and not helping Argentina.

That a most serious situation confronts the American farmer because of the removal of this duty is apparent. The danger to the agriculturist is well pointed out in a recent editorial in the Washington Post, which I shall append to my remarks.

The lot of the farmer who raises corn is not an easy one. He has much to contend against. The natural drawbacks incident to his own land and climate offer enough discouragements. He must contend with poor seed corn and after the seed is planted must protect it from the squirrels and the birds until the seed germinates, and even then the tender shoots are often most inviting to the cutworm. After a season's successful contest with weeds and native insects he has seen his crop devastated by storm or ruined by drought or swept away by flood. This year he suffered a shortage of more than 678,000,000 bushels because of drought, and by the time he had safely harvested his corn he was brought face to face with the proposition that the removal of the duty had brought about a decrease in the market price of at least 10 cents per bushel. This decrease meant a loss to the farmers of the United States of approximately $245,000,000. In the State of Iowa alone it meant a loss of approximately $34,000,000, but this is not the full measure of his loss by reason of the removal of the duty on corn. If the fears of many of our farmers that the importation of this weevil will become a menace to the corn raiser should become a reality, no one can even approximate the loss which the American corn raiser will sustain by reason of the removal of the tariff on corn.

The amendment I have offered appropriates only $100,000 for the Secretary of Agriculture to make an investigation with regard to this pest and, if necessary, to quarantine against its spread in the corn belt. This appropriation bill which we are considering contains some very remarkable provisions. On page 11 we have an appropriation for the eradication of scabies in sheep and cattle and the inspection of southern cattle, and so

forth, of $625,530. Another provision on the same page reads as follows:

For all necessary expenses for the eradication of southern cattle ticks, $400,000.

On page 19 of this bill we appropriate $378,240 for the study and demonstration of the best methods of meeting the ravages of the cotton-boll weevil. On page 49 of this bill is an item, which will be adopted without discussion, appropriating $297,540 to prevent the continued spread of the gypsy and brown-tail moths. More than two and a half millions of dollars is carried in this appropriation bill for study, investigation, and eradication of the pests and insects which affect plant and animal life; and yet when the greatest agricultural industry in the country is threatened by this new pest, which our good Democratic friends by their votes and policies have introduced into this country, they oppose appropriating a single penny to study its habits and, if possible, ascertain the best method to prevent its spread and for its eradication.

Mr. JACOWAY. Will the gentleman yield?

Mr. GOOD. Yes.

Mr. JACOWAY. I would like to ask how he came to the conclusion that it would take $100,000 to carry on this scientific investigation?

Mr. GOOD. Well, it is a new problem. Of course, I do not know what it may require to make this investigation. I hope that our farmers may never be bothered with this pest, but, as I said a moment ago, we are producing in the United States between two and three billion bushels of corn every year; we are raising corn in many of the States of the Union, and the Secretary of Commerce now tells us that there is being imported into this country from Argentina corn to the extent of 4,000,000 bushels in three months, and that the indications are that it will come in in larger quantities in the future. I have called the attention of the committee to the fact that some of this corn contains the Argentine corn weevil, and I submit that the appropriation should be in some proportion to the damage this enemy might do if it should attack our cornfields. I can not tell how much it will take, but I have faith enough in your Secretary of Agriculture to think that he will not expend a single dollar more than is necessary. If it is not necessary to do anything, then nothing will be expended. This is your child, not ours, and you ought to welcome the aid offered from this side of the House to prevent your program of free trade in farm produce from becoming even more obnoxious to our farmers than it now is. I think the situation is dangerous enough so that we ought to appropriate enough to permit the Secretary of Agriculture to make a scientific investigation on this subject and if necessary to quarantine against this threatened pest. [Applause.]

[From the Washington Post, Mar. 12, 1914.]

AGRICULTURAL PROSPECTS.

The farm reserves of wheat, corn, oats, and other staples are surprisingly heavy this year, as the Government report is viewed in the grain markets. No official explanation of the presence of such quantities of foodstuffs in the bins so late in the year has been given out, but the absence of demand for wheat and corn for export is the reason assigned by western shippers—that is, the American farmer refuses to part with his surplus, the prices for which are not to-day, as in former years, fixed at home. Liverpool and Buenos Aires have become the price fixers, and the ruling quotations are at a point which enables shippers to fill orders from coast cities at a lower figure by importing the supplies than by drawing upon Chicago.

With 225,000,000 bushels of newly harvested Argentine corn available for export, the immediate outlook for our corn growers is most discouraging. Unless there is a change for the better within a year or two, the grain growers will be in the same boat with the sugar-beet and sugar-cane growers, when, two years hence, Cuba's 2-cent raw sugar will go on the free list.

Judging from the prospect of keen competition between Argentina and Australia when the Panama Canal puts the latter in easy communication with our Atlantic ports, the corn and wheat belts in the great West will be as ready for Government assistance in finding a new occupation as are the Louisiana planters and other prospective beneficiaries of the pending Lever Agricultural bill, carrying an item of $50,000 for experiments and demonstrations in live-stock production in sugar-cane and cotton districts. Who does not perceive, in the light of what we have already experienced, that putting wheat and corn and oats on the free list must prove as ruinous to such branches of agricultural industry as such action is in the case of sugar?

Argentina has as yet only undersold the American farmer by a small margin—just enough to make it an object to import her products, and meet every concession on our part by setting a new low mark—but once that country comes in competition with the cheap products of other countries, prices will be slashed to the bottom. Eventually the new tariff will prove as revolutionary a factor in many, if not all, of the Northern States as in Louisiana, and probably even more far-reaching.

Mr. LEVER. Mr. Chairman, this is an amendment to appropriate $100,000 to investigate the Argentine corn weevil, which has been described here as a new insect in this country. My information from the Bureau of Entomology is to the effect that the life history of this insect is well known to entomologists, and that the insect not only appears in Argentina, but that it is likely to appear anywhere that corn or grain or rice is kept in storage. It seems to develop itself under storage conditions.

Mr. TOWNER. Will the gentleman yield?

Mr. LEVER. Yes.

Mr. TOWNER. Is it not true that it develops and becomes active under conditions where the climate is warm, such as you have in the Southern States?

Mr. LEVER. I have no information about that. But it may bear out the gentleman's suggestion to state that in Argentina the name was not the corn weevil, but the rice weevil.

Mr. TOWNER. I would state for the information of the gentleman that I understand that it does develop particularly and peculiarly in the warm countries, and, as the gentleman says, after the corn is stored it develops in that way.

Mr. LEVER. So that, inasmuch as this insect not only is likely to come to this country from Argentina, but is likely to develop under our own conditions at any time, it does seem to me that an appropriation of $100,000 is a large sum of money for the purpose. Again, if my friend from Iowa [Mr. GOOD] will examine the item above, which is for the investigation of insects affecting cereal and forage crops, he will find there an appropriation of $104,500, which was increased this morning by $10,000, and every dollar, every single penny, of that $114,500 is available to the Secretary of Agriculture for such use as he desires to make of it in connection with insects affecting cereal and forage crops. If the Secretary of Agriculture comes to the conclusion that this Argentine weevil is creating an emergency in this country, he will concentrate his fire in that direction and use some of this appropriation for that purpose. I would say, further, to the gentleman that the chairman of this committee, as, I think, every Member of the House knows, is disposed to be probably too liberal in matters of this kind; but I think I ought to say, in justice to the committee and in justice to myself, that the gentleman from Iowa did not bring this to the attention of the committee, and we have no information whatever from the department on the subject, except what little information I had from my clerk over the telephone just now. I would dislike very much to put the committee in the attitude of agreeing to a proposition of which we have so little information.

Mr. MADDEN. Mr. Chairman, I would suggest a compromise of $50,000. That would not be an unreasonable sum.

Mr. LEVER. Oh, I could not do that.

Mr. HAUGEN. Mr. Chairman, I would ask the gentleman from Iowa where he gets his information?

Mr. GOOD. Some of the commercial organizations in Iowa have passed resolutions concerning it. My attention was first called to it after the estimates were made up. The chairman of the committee is entirely right. I have not spoken to him, and did not call the attention of the Department of Agriculture to it until about a week ago, because I did not know much about it myself. I have been investigating it since that time, and I want to say that I think the chairman of the committee will recognize that in making up the estimates the department did not estimate for more than $104,500, and the committee reported out an amount that it thought was actually necessary to bear the expenses of the work before them. This is a new work.

The CHAIRMAN. The time of the gentleman from South Carolina has expired.

Mr. LEVER. Mr. Chairman, I ask unanimous consent to proceed for three minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. LEVER. Mr. Chairman, I want to repeat, however, that every dollar of the $114,500 carried in the item above is available to the Secretary for use in this line of work, if the Secretary of Agriculture believes that the emergency is great enough to justify him in doing that. Of course he would have to withdraw from some other lines of work, but the projects of the Department of Agriculture are constantly changing with the changing necessities of the situation. The committee has no information as to the widespread area in which this Argentina weevil occurs, how much damage it is doing, how we can find out how much money will be necessary to fight it. If we appropriate a dollar here we will be appropriating it in the dark.

Mr. HAUGEN. Mr. Chairman, in view of the fact that this has been called to the attention of the committee at this time, and is evidently a new matter, and is worthy of consideration, knowing the gentleman's generosity in this direction and his always giving due consideration to worthy projects, would he not be willing to allow a reasonable increase, say $25,000, or whatever might be deemed necessary to carry on the work?

Mr. LEVER. Mr. Chairman, I will make this promise to both gentlemen from Iowa. If the gentleman from Iowa [Mr. GOOD]

will introduce a separate bill, I will call the committee together immediately after we finish the consideration of this appropriation bill, get the experts before the committee, and find out the situation; and if it appears from the testimony that there is an emergency, I will very promptly, if the committee is willing so to do, report that bill to the House and try to get it through.

Mr. GOOD. Mr. Chairman, the gentleman recognizes the fact that there is already more legislation outlined for this House than it will be able to discharge in the next six months, and that a bill such as he refers to, however meritorious it might be, coming in at this late hour of the session, very likely would not get very far; and if it did not fail here of consideration, it would likely not receive consideration at the other end of the Capitol.

The CHAIRMAN. The time of the gentleman from South Carolina has again expired.

Mr. HAUGEN. Mr. Chairman, I ask unanimous consent that his time be extended for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. LEVER. Mr. Chairman, I want to call attention to the fact that the hog-cholera bill, and also the agriculture extension bill, carrying an appropriation of $3,400,000, were passed under suspension of the rules. I could easily put this bill upon the Suspension Calendar, and I believe, if it is an emergency proposition that can be shown to the House, that we would have no difficulty in passing it under suspension of the rules. I call the gentleman's attention to this further fact, that unless this money is made immediately available in this bill it does not become available until the beginning of the next fiscal year, so that if it is really an emergency matter, I think the gentleman's proper course and best course is the one I suggest.

Mr. HAUGEN. Mr. Chairman, I suggest the quickest way would be to amend this bill, and if it is necessary to make the money immediately available, do so. I believe that the gentlemen will agree with me that there is an emergency—that the weevil is here. Of course, if it is found not to exist, the appropriation would not be expended. I think the gentleman from Iowa [Mr. GOOD] has made a showing that the weevil exists, and that we should provide for this emergency to some extent. Of course, it is an entirely new matter, and I suggest a reasonable appropriation. I think the gentleman from Iowa will agree to an appropriation less than $100,000, and I would like to know what he thinks is actually required.

Mr. GOOD. I will state to the gentleman from Iowa that I recognize the fact that the chairman of this committee has been extremely liberal, and I was in hopes of getting this pressing matter in the bill by appealing to his liberality.

Mr. LEVER. I wish the gentleman had done so before he came on the floor and had given the members of the committee any information he possibly could.

Mr. GOOD. I went over to see the gentleman yesterday, as he recalls, but he was very busy at the time, and my time was taken up, so it is hardly my fault that I have not been able to confer with the gentleman. I will say I believe, because of the seriousness of the situation, we ought not to consider less than $50,000. If nothing is necessary, in the information of the Secretary, nothing would be expended; but it will give protection to this great industry, and if you are going to give protection there it must be for a considerable amount of money.

Mr. LEVER. Let me make a suggestion to the gentleman, and it is this: That we temporarily pass this amendment over without prejudice, and in the meantime perhaps I can get in touch with the department and get some information in reference to the existing situation. The gentleman can very well see how embarrassing it is to me to allow any appropriation whatever without some information from the experts of the department.

Mr. HAUGEN. I trust the gentleman from Iowa will agree to that suggestion.

Mr. MANN. If this request is to be made, I ask to have the amendment again reported; and I would like to take the floor for a moment.

The CHAIRMAN. The request has not yet been made.

Mr. MANN. I understand that; but pending that, the gentleman has yielded the floor.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. I would like to have the amendment again reported.

The CHAIRMAN. Without objection, the amendment will be again reported.

There was no objection.

The amendment was again reported.

Mr. MANN. Mr. Chairman, the item to which reference has been made for investigation of insects affecting cereal and forage crops, which was $104,500 and which has been increased this morning by $10,000, I think is not available for the purpose covered in the amendment, although the gentleman from South Carolina stated the fact was so. Possibly it is within the power of the Secretary of Agriculture to use it, and yet where the Secretary of Agriculture has made an estimate for a particular purpose and has indicated in his estimates to the committee the method by which he proposes to spend that money and the purposes for which the money is to be used it would be entirely contrary to the ethics of the business for the Secretary to divert that money and use it for some other purposes although it might be covered by the scope of the authority in the appropriation act. I do not think that the Secretary would be justified. For instance, this morning we increased the appropriation by $10,000. Now, the Secretary could have used the money for the purpose for which that $10,000 will be used, which is already covered in the bill, but he would not be justified in doing it. Gentlemen will remember a year or so ago we were threatened with the invasion of the Mediterranean fly, called in this bill the Mediterranean fruit fly, and hastily, by the way, we enacted legislation for the purpose of preventing the invasion of the Mediterranean fruit fly from the Hawaiian Islands to California or elsewhere in the United States. If we are threatened with the new corn weevil coming from Argentina, a weevil which is not now in the United States, considering the importance of the corn grown in the United States, we would be very neglectful if we failed to exercise every possible precaution to prevent that weevil obtaining a hold in the United States.

Mr. LEVER. Will the gentleman yield?

Mr. MANN. Yes.

Mr. LEVER. Does the gentleman have any information that the Argentina weevil is not in the United States now?

Mr. MANN. I have no information upon the subject.

Mr. LEVER. The gentleman made a positive statement in regard to that.

Mr. MANN. I said "if."

Mr. LEVER. I beg the gentleman's pardon.

Mr. MANN. The gentleman from Iowa said it was a different weevil from the weevil that attacked the corn in the South, where we have the flint corn, and that this weevil was a weevil which did attack flint corn. I take it that if it attacks flint corn that it will probably attack the dent corn, the softer varieties of corn. Is there anyone here who would question the desirability of keeping out some of the imported pests which now attack the various crops of the United States? Is there anyone here who would question the propriety of keeping out some of the imported weed seed which originally came from abroad, but which have now spread all over the United States? That is where we get the most of our weeds in the fields. If we can by adopting precautions now keep out this weevil, we ought to do it. It will be too late after the weevil has come in and been disseminated throughout the United States. Many millions of dollars then will not accomplish what a few thousand dollars will accomplish now.

Mr. WILLIS. Mr. Chairman, I desire to offer an amendment to the amendment. I have not the language before me, but it is to strike out $100,000 and insert in lieu thereof $50,000.

Mr. GREEN of Iowa. Will the gentleman yield for a suggestion?

Mr. WILLIS. Certainly.

Mr. GREEN of Iowa. That is, to add to that that the same shall be immediately available.

Mr. MANN. That is not in order.

Mr. WILLIS. That is right.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment to the amendment. Strike out the figures "$100,000" and insert in lieu thereof "$50,000."

Mr. WILLIS. Now, Mr. Chairman, in support of this amendment I desire to say that it seems to me that these facts which have been presented by the gentleman from Iowa [Mr. GOOD], who has given very careful attention to this matter, are worthy of the most careful consideration by the committee at this time. As the gentleman from Illinois [Mr. MANN] has just said it is quite probable that an expenditure of a few thousand dollars now might avoid the expenditure of many hundreds of thousands of dollars by the Government later on with an attendant loss to the farmers of this country perhaps running into many millions of dollars.

The illustration that was given here a little while ago concerning the hog-cholera proposition is a good one. I think it is quite likely if we had listened to the wise suggestion of the gentleman from Iowa [Mr. GOOD] a year or two ago, and had made the appropriation as he urged then for the eradication of hog cholera, it would not have been necessary to make so large an

appropriation as we recently did in this House, and we should have avoided the loss of many millions of dollars to the farmers of this country. Now, not speaking in a partisan sense, I wish to say that there is not any doubt that under the existing tariff law there is a large importation of corn from Argentina, and as long as we have free trade in farm products that importation, most unfortunately for the American farmer, is likely to increase. I think there is no serious doubt but that there is grave danger of the introduction of this corn weevil by means of this importation. Of course the best remedy for this condition would be the enactment of a protective tariff on farm products. But it seems to me that just now is the time when we ought to act, if the present system of free trade in farm products is to continue, just as the importation is beginning and just as this pest is being introduced.

Mr. LEVER. Will the gentleman yield?

Mr. WILLIS. Certainly.

Mr. LEVER. Has the gentleman any information that the pest is not already in this country and has not been in this country for years?

Mr. WILLIS. The information, I will say, that I have is similar, although not nearly so complete, as the information possessed by the gentleman from Iowa, namely, that it is not the same pest that we have here, and it is quite a different corn weevil from that which has infested the corn of certain of the Southern States.

Mr. LEVER. I understand from the gentleman from Iowa [Mr. GOOD] that the department itself was not entirely sure whether there was any difference between this insect and the corn weevil in the South; that they had not made up their minds as to that. I thought the gentleman probably had investigated it.

Mr. WILLIS. No; I have not that information. I wish I had. But I do have this information, that whereas the corn weevil in this country has not heretofore attacked the flint corn it does successfully attack this corn which is raised in the Argentine, which is flint corn. I think that that statement of fact will not be assailed by anyone. Now, that being the case, I believe we can afford to act at this time, when we have the opportunity, to prevent the introduction of this evil and pest, which, if it comes here, will cost the farmers of the country nobody knows how many millions of dollars, and will work hardship on all our people by decreasing our food supply. Right now at the beginning of it, when we have the opportunity, I think we ought to make a reasonable appropriation to stop this pest. Some objection has been made to the amount proposed to be appropriated in the amendment offered by the gentleman from Iowa. Though I think money appropriated for extermination of insect pests and disease is well expended, I have offered the amendment to reduce the amount to $50,000 in order to meet that objection.

I recognize the fact that the chairman of the Committee on Agriculture and the membership of the committee are vigilant in the public interest and are liberal in granting appropriations for the extermination of all insect pests and plant diseases that are deleterious to the interests of the farmer. But this matter has come up just recently—since the new tariff law went into effect. They had no opportunity, of course, as the chairman said, to pass upon it; but here we have these facts now, and, as the gentleman from Iowa [Mr. GOOD] said, it does not seem to me it would be feasible to propose that this should be included in a special bill to be introduced. Everybody familiar with procedure here knows that at this stage of the proceedings it will be hardly possible to give favorable consideration to a measure on that subject introduced now. I think, in fairness to all, we ought to make some appropriation. And, as I started to say a moment ago, I recognize that the chairman of the Committee on Agriculture is entirely fair, and there is no disposition on the part of anyone to question his sincerity and ability, but I do believe we ought to appropriate $50,000, as contemplated in this amendment.

Mr. TOWNER. Mr. Chairman, it seems to me we ought to consider this question in a reasonable way, in the light of our present knowledge. It is true that this knowledge has come to us at a late date, but, nevertheless, the requirement for immediate action is certainly very great. We have it stated by the press that there is a surplus of corn in Argentina for export, estimated at 288,000,000 bushels. We know, if that be true, that a very large portion of that surplus will come to the United States, and Mr. Chairman, if that large importation should come, and if, as will be the case, it will be distributed throughout this country, if it shall carry with it the danger of infesting all of the corn crop, the most important crop that is raised and the largest in money value in this country, then certainly the emergency is upon us, not in the future, but now. We ought to act now. If we shall appropriate $100,000 or $50,000 for the purpose of protection against the introduction of the Argentine corn weevil into this country, and it shall not be necessary, certainly it shall not be used, but we ought to make it available. The emergency is upon us now. We know enough now to realize that this is a real danger. It is not an imaginary one. Even with our meager information, we know that the introduction into this country of the Argentine weevil is a menace to our home production, and for that reason we ought to do everything we can to protect ourselves.

And let me say to gentlemen on the other side, those who represent Southern States, you are doing everything in your power now to increase the production of corn in your sections, and, I will say, with remarkable success. I congratulate you upon that fact. And this is a danger that will probably be a menace peculiarly to your section of the country, because, as I am informed now, this weevil develops in a southern country, where the climatic conditions favor it, much more readily than it does in the North. It may develop in the North. It may be a menace to the entire corn-growing section of the United States, but it is peculiarly a menace to you in the South, and certainly, for your own protection, you ought to be as anxious to do everything possible as we are. We who represent the great corn-growing States represent, of course, a larger interest than perhaps you do. This bill appropriates $49,000 for the investigation of insects affecting cotton, rice, tobacco, and sugar cane; for insects affecting forests, $49,000; for insects affecting tropical and subtropical fruits, $20,100; for investigation of the Mediterranean fruit fly, $33,200; to prevent the spread of the gypsy and brown-tail moths, $297,540; and many other like appropriations. It is not unreasonable that in behalf of the corn growers of the United States we should ask that at least $50,000 be made available for their protection.

It seems to me, Mr. Chairman, that this matter is so great a menace that we ought certainly to act, and act now, when we have the power and the opportunity and before it is too late. The day may come, as has been suggested here, when it will require millions for the extirpation of a pest that now can be prevented from being introduced by the expenditure of a few thousand dollars.

Mr. GREEN of Iowa rose.

The CHAIRMAN (Mr. PALMER). The gentleman from Iowa is recognized.

Mr. LEVER. Mr. Chairman, I would like to ask unanimous consent that all debate on this paragraph and amendments thereto close in eight minutes.

The CHAIRMAN. The gentleman from South Carolina [Mr. LEVER] asks unanimous consent that all debate on this paragraph and amendments thereto close in eight minutes. Is there objection?

There was no objection.

The CHAIRMAN. The gentleman from Iowa is recognized.

Mr. GREEN of Iowa. Mr. Chairman, the gentleman from South Carolina [Mr. LEVER] has stated, and stated properly, that we have not as full information in relation to this subject as we would desire, nor such information as we ordinarily have when we act upon an item of such importance or when we appropriate this amount of money.

But unfortunately, Mr. Chairman, an emergency confronts us, and it is a matter of such great importance, the value of the corn crop at this moment on the farms being above a billion dollars, that we can not afford to take the risk of passing it by and permitting by chance, or by our failure to act at this time, the introduction of some new noxious insect into this country that will be the destruction of this crop of such enormous value—the greatest agricultural interest, by itself, of any that we have. The time to act, as has been stated here, is now, lest this insect, like some others, like the gipsy moth and other insects that have been imported from Europe——

Mr. EAGLE. And the boll weevil from Mexico——

Mr. GREEN of Iowa. Yes; and, as the gentleman from Texas says very properly, like the boll weevil that came from Mexico, before it gets a foothold here. Let us not take the risk when, by appropriating a few thousand dollars now, we might do away with this great danger that threatens this important crop at this time.

Mr. LEVER. Mr. Chairman, when I spoke before I did not have any definite information from the Department of Agriculture as to this proposition. Since that time the clerk of the Committee on Agriculture has gotten into communication with the Assistant Secretary of Agriculture, Dr. Galloway, and Dr. Galloway has gotten into communication with the entomologist of the department. The Assistant Secretary informs me that this pest is well known in this country and is scattered all over it from one end of it to the other, and has been here

for many, many years; that no emergency exists whatever; that no reason for a quarantine against Argentine corn, or any other corn for that matter, exists; that this insect is liable to show itself in any section of the country where corn is stored or where other grain is stored.

Mr. GOOD. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from South Carolina yield to the gentleman from Iowa?

Mr. LEVER. Yes; I yield.

Mr. GOOD. The State of Iowa produced last year, 1913, something over 338,000,000 bushels of corn, and in the year before, 1912, 432,000,000 bushels. That is about the average production. I was born and raised in that State, and was born and raised on a farm, and I never saw a corn weevil in my life. I never until about a month ago heard of a corn weevil in the State of Iowa.

Mr. LEVER. Mr. Chairman, I can not yield to the gentleman to make a speech in my time.

So, after all, the gentleman is not in any great danger, because, repeating again the information we got from the people in the Department of Agriculture, who ought to know, this weevil has been in this country for years, is spread over a very large area, and there is no emergency existing at this time. If an emergency did exist, the Assistant Secretary informed me that he could meet the emergency with funds from some other item in this bureau.

Now, with those facts before me and before the Committee of the Whole, I do not believe that this committee would be justified, nor would I be justified, in accepting this amendment; and for those reasons, Mr. Chairman, I feel constrained—in fact, I feel it my duty—to make a point of order against the amendment.

Mr. MANN. Why is it subject to a point of order?

Mr. LEVER. It is subject to a point of order, but I will withdraw the point of order and have a vote on it.

Mr. MANN. How is it subject to a point of order?

Mr. LEVER. If I had the amendment in my hand, I think I could point out why it is subject to a point of order.

Mr. MANN. I think it is not subject to a point of order.

The CHAIRMAN. Is the point of order withdrawn?

Mr. LEVER. I will withdraw it, but I think I could convince my friend that it is probably subject to a point of order.

The CHAIRMAN. The gentleman from South Carolina withdraws his point of order.

Mr. SELDOMRIDGE. Mr. Chairman, I would like to request that the amendment be again reported.

The CHAIRMAN. Without objection, the amendment will be again reported.

The amendment was again read.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Ohio [Mr. WILLIS] to the amendment offered by the gentleman from Iowa [Mr. GOOD].

The question was taken, and the amendment to the amendment was rejected.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Iowa.

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. MANN. Mr. Chairman, I demand a division.

The committee divided; and there were—ayes 34, noes 37.

Mr. MANN. Mr. Chairman, I ask for tellers.

Tellers were ordered; and the Chairman appointed Mr. GOOD and Mr. LEVER to act as tellers.

The committee again divided; and the tellers reported—ayes 41, noes 44.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For investigations of insects affecting forests, $54,790.

Mr. JOHNSON of Washington. Mr. Chairman, out West much confusion exists as to the method of distributing the 25 per cent of the money received by the forest reserve counties from the sale of Government timber in those counties. I also receive many inquiries in regard to the distribution of the 10 per cent, which is allowed in addition to the 25 per cent. I desire to make clear the method of distribution, as it has been reported to me by Chief Forester H. S. Graves.

The communities within and adjacent to the national forests receive assistance from the Government in the construction of public improvements in two ways—first, a portion of the receipts from the national forests is paid directly to the counties within which said forests are situated, to be used for road and school purposes; and second, the Forest Service, out of funds at its disposal, constructs roads, trails, telephones, and other permanent improvements.

THE 25 PER CENT FUND.

By the act of May 23, 1908 (35 Stat., 260), 25 per cent of all receipts from the national forests, from whatever source, is returned to the States to be expended "for the benefit of the public schools and public roads of the county or counties in which the forest reserve is situated."

The act further provides that the money shall be distributed in proportion to the area of national forest land within the county. The total amount for each State is paid over at the end of the fiscal year to the treasurer of the State and thereafter passes from the jurisdiction of the Government. The unit of distribution for this fund is the county, and the Federal Government has no responsibility whatever in the expenditure of the money.

THE GENERAL APPROPRIATION.

In addition to the direct payment as shown above, the Department of Agriculture has two funds handled by the Forest Service which are used for the construction of permanent improvements within the national forests. These are the general "improvement fund" and the "10 per cent road fund." The improvement fund is for the "construction and maintenance of roads, trails, bridges, * * * and other improvements necessary for the proper and economical administration, protection, and development of the national forests." This fund is a lump-sum appropriation for all of the national forests and is distributed among them by the Forest Service in accordance with what appear to be the relative needs of the several forests. The national forest is the unit of distribution for this fund, and the Secretary of Agriculture, through the Forest Service, is solely responsible for the allotment and use of the money.

In the Agricultural appropriation bill for this year, 1914, which has just been passed, the improvement fund is placed at $400,000. As stated just above, this sum may be distributed as thought best by the Bureau of Forestry.

THE 10 PER CENT FUND.

Now comes the next step in the distribution of money.

The Agricultural bill also provides that an additional 10 per cent of the receipts from the national forests shall be available for the construction and maintenance of roads and trails within the national forests "in the States from which such proceeds are derived." This amount is not turned over to the State or county authorities, but is expended under the direction of the Secretary of Agriculture by the Forest Service. The unit of distribution for this fund is neither the national forest nor the county, but the State. The act further provides that the "Secretary of Agriculture may, whenever practicable, * * * secure the cooperation or aid of the proper State or Territorial authorities."

In accordance with this provision Mr. Graves writes me that the Forest Service has attempted to secure the cooperation of local communities, and in several instances has submitted its list of proposed projects and allotments therefor to the governors of the States for comment or suggestion, in order that the program which the service has attempted to carry out might have the cordial support of the local authorities.

Mr. Graves says:

The responsibility, however, for the selection of projects and the allotment and expenditure of funds rests solely on the Secretary of Agriculture through the Forest Service.

HOW IT WORKS OUT.

Now, then, concerning the expenditure of money in that part of the Rainier Forest Reserve near Randle, Mr. Graves says there is apparently a misapprehension as to the authority of the Forest Service over the expenditure of moneys from the 10 per cent fund for permanent improvements within the national forests.

With respect to the other matters mentioned, Mr. Graves says the facts are substantially as follows:

On July 10, 1913, and before information was at hand of the exact amounts which would be available for road building out of the 10 per cent fund for the State of Washington, the acting forester mailed to the governor of the State a list of the projects upon which it was proposed to expend funds and the tentative allotments for these projects. Among these projects was one for the expenditure of $1,000 in the construction of a road up the Cowlitz Valley from Randle, and another for $1,000 for a bridge across the Cowlitz River.

On August 25 the lieutenant governor telegraphed his approval of the projects and allotments, and on the following day wrote a letter in detail with respect to them. When the reports of the actual receipts from the national forests in the State of Washington were received it was found that the amount was somewhat less than the total given in the tentative estimates of July 10.

ROAD AND BRIDGE PLANS CUT DOWN.

Furthermore, steps had been taken for the elimination from the Rainier National Forest of that portion of the Cowlitz Valley on which

the proposed road would be constructed. The elimination has been approved by this department and is awaiting final action in the Interior Department.

For these reasons the list of projects of July 10 was revised and on September 4 resubmitted to the governor for his information, and mention was specifically made of the abandonment of the Cowlitz Valley road and bridge, and the reasons therefor. On September 15 Gov. Lister expressed his approval of the changes which had been made.

Later, on the recommendation of the district forester, $1,000 of general improvement money was allotted for the construction of the bridge across the Cowlitz River.

Mr. Graves concludes that it is his understanding that the money has been expended and the bridge built.

SMALL SUM FOR SURVEYS.

In addition to the $400,000 given by Congress for the general improvement fund, there is provided for classification and survey of agricultural lands in forest reserves $185,000. This is an increase of $85,000, and should advance this line of work. The total, however, is a small sum when one considers the great area over which it must be spread. Then on top of the $400,000 and the $185,000 comes the direct appropriations for salaries and maintenance in the 162 reserves of the Western States. These direct appropriations run from $860 for a little forest reserve in Nevada, probably treeless, to $41,440 for the Coeur d'Alene Reserve in Idaho. The average direct appropriation per reserve is $11,147, and, as before stated, there are 162 reserves.

DIRECT APPROPRIATIONS FOR WASHINGTON FORESTS.

The direct appropriations for the reserves in the State of Washington are this year as follows:

| | |
|---|---|
| Chelan National Forest | $9,130 |
| Columbia National Forest | 17,880 |
| Colville National Forest | 9,210 |
| Kaniksu National Forest (partly in Idaho) | 26,690 |
| Okanogan National Forest | 14,800 |
| Olympic National Forest | 25,650 |
| Rainier National Forest | 15,400 |
| Snoqualmie National Forest | 18,860 |
| Washington National Forest | 13,130 |
| Wenatchee National Forest | 9,330 |
| Total | 160,080 |

Now, that sum, $160,000, is not large—certainly not large enough for much headway or advancement. It is provided by the people of the whole United States. That small sum—and whatever the Forest Service in its wisdom sees fit to put into the 10 great forest reserves of the State of Washington out of the general appropriation of $400,000—is all we get from the five and one-half millions appropriated for the Bureau of Forestry in this agricultural appropriation bill. The total sum, $5,500,000, is a gigantic slice out of the $19,000,000 agricultural appropriation—more than one-fourth of the "pie" which has been cut by the generous Committee on Agriculture. The most of the sum goes for salaries and upkeep of a great bureau.

Washington's direct share is $160,000—a mere fraction, for it is hardly necessary to say that the 25 per cent of sales and the additional 10 per cent come back to us for sales in our own localities. This was concisely stated by Senator FALL, during a colloquy with Senator SHAFROTH, as follows:

Senator FALL. The Senator says that certain counties derive revenue from the forest reserves. From whence is that revenue obtained, except from the people of that locality who use the forest reserves? The great Government of the United States is giving you nothing. It is what your own people, in your own locality, in your own State, have paid in for the preservation of the Government reserves; and you get back 25 per cent of the money which your local people pay in, not outsiders. Then, to make up the difference, to make up the 25 per cent—in fact, to make up 100 per cent of the difference—they come here every year and secure from Congress an appropriation for the support of that very reserve. So the people of the United States, instead of benefiting by these reserves, are taxed to support them; and the people of the locality, instead of being benefited, are merely getting back 25 per cent of the money which they themselves paid into the Treasury.

The Clerk read as follows:

For investigations, indentification, and systematic classification of miscellaneous insects, including the study of insects affecting the health of man and domestic animals, household insects, and the importation and exchange of useful insects, $54,280.

Mr. MANN. Mr. Chairman, I move to strike out the last word. May I ask the gentleman what is the reason for inserting, under this item for the investigation of miscellaneous insects, the language, "identification and systematic classification?"

Mr. LEVER. The statement of Dr. Howard is in this language. The question was asked:

Is there any special reason for that new language?
Dr. HOWARD. No; it simply makes it plainer.

That is the only testimony we have. I presume it more nearly designates the character of the work that they are doing.

Mr. HAWLEY. Will the gentleman yield?

Mr. MANN. Yes.

Mr. HAWLEY. The department is importing from foreign countries a great many insects which are the natural parasites of insects that are the enemies of fruits and crops in this country; and I suppose that new language is inserted in order that they may identify scientifically the particular species they want to attack, in order to know what insects to procure from abroad.

Mr. MANN. That is hardly the case. They identify them now.

Mr. LEVER. The language is not necessary to give them that authority by any means?

Mr. MANN. No; not at all.

Mr. LEVER. I think the only reason for estimating for it at all is that that may be set out in the bill.

Mr. MANN. I know they do the work now, and I did not know but there had been some ruling of the comptroller or auditor to the effect that they could not do it any more.

Mr. LEVER. Oh, no. They want to describe their work more accurately; that is all.

The CHAIRMAN. If there be no objection, the pro forma amendment will be considered as withdrawn.

Mr. MOORE. Mr. Chairman, I offer the amendment which I send to the Clerk's desk.

The Clerk read as follows:

Page 48, line 21, after the figures "$54,280," insert:
"*Provided*, That $10,000 of this sum shall be applied to the investigation and suppression of the mosquito."

Mr. MOORE. Mr. Chairman, I have prepared two amendments, this being one of them, and the other being:

*Provided*, That the Department of Agriculture shall cooperate with such States as may have provided by appropriation for the investigation and suppression of the mosquito.

Mr. Chairman, for several sessions I have been endeavoring to have Congress take cognizance of this question. This amendment proposes no increase in the appropriation, but instructs the department to inquire concerning the mosquito and to aid in its suppression. It gives specific directions to the department to consider the question of the mosquito. The aggregate appropriation here for the investigation of a variety of insects amounts to $427,370. It is almost entirely for insects that affect the field and the farm, fruits and flowers, products of the soil, and so forth. There is no provision whatever for investigating or identifying or classifying or suppressing those insects that affect the health of man except as to a part of $54,280.

Mr. LEVER. If the gentleman from Pennsylvania will permit me, I desire to say that the Bureau of Entomology is now doing considerable work along the very line of his amendment. I read from the project statement of the bureau:

The investigation of malaria-carrying mosquitoes was begun by a study of the prevalence of these species and malaria on a typical plantation in Madison Parish, La. By cooperation of the owners of the property it will be possible to determine accurately the importance of malaria-bearing mosquitoes in connection with agriculture.

Mr. MOORE. That seems to be an investigation only in the State of Louisiana.

Mr. LEVER. Then in the reasons submitted for the increase asked I find this language also:

The increase for which the estimate is submitted is intended for use in the cooperative work against the house fly, which has been begun, and to enable the bureau to meet the demands made upon it for careful study of the malaria-bearing mosquito.

Mr. MOORE. May I ask the gentleman whether that investigation is carried on anywhere else than in that State?

Mr. LEVER. I have no information as to that. I presume not, however.

Mr. MOORE. What objection has the gentleman to accepting the amendment proposed, which does not increase the appropriation, but simply gives a direction to the department?

Mr. LEVER. I will answer the gentleman frankly. If I had had the time to go into it as thoroughly as I wished to do, I would not have permitted this language in the bill, which gives authority to the Bureau of Entomology to study insects that affect the health of man; because I believe if they do that you are going to see a duplication of the work of the Public Health Service. I believe we ought to concentrate as far as possible in one department the lines of work that that department is doing. Now, the Public Health Service is doing a great deal of work along these lines, and I think has an appropriation of about $200,000. I will ask my colleague [Mr. JOHNSON of South Carolina], who is on the committee which appropriates for the Public Health Service, if that is not correct?

Mr. JOHNSON of South Carolina. The appropriation is more than that.

Mr. LEVER. My colleague from South Carolina informs me that the appropriation is more than that, to study those insects which affect the health of man. Now, why should we build up in the Department of Agriculture another public-health service? I will say to the gentleman from Pennsylvania very frankly that when the bill comes in next year, if I can prevent it, this authority will not be carried in the bill again.

Mr. MOORE. If the gentleman will permit me to suggest it, the activity of the mosquito goes beyond the health of man. It drives man from the field in more instances than one, and there are certain sections of the country that are to a large extent devastated because the mosquito is active there and because very little has been done to exterminate it.

Mr. LEVER. The gentleman knows of no disease of animals other than man that is caused by the mosquito, does he?

Mr. MOORE. I do not know, except that investigations have shown that the mosquito does carry disease.

Mr. LEVER. Affecting animals other than man?

Mr. MOORE. They affect poultry, if the gentleman refers to that.

Mr. LEVER. Sheep, cattle, and horses.

The time of Mr. MOORE having expired, by unanimous consent it was extended five minutes.

Mr. GREEN of Iowa. Will the gentleman yield for a suggestion?

Mr. MOORE. Yes.

Mr. GREEN of Iowa. The mosquito is very injurious to animals as well as to man. I do not know whether it conveys diseases, but it is a well-known fact to those who pasture stock that if you can get away from mosquitoes the animals put on flesh much more rapidly and the pasturage is much more valuable.

Mr. MOORE. I think that is entirely true, and I thank the gentleman from Iowa, who is better versed in agriculture than I am, for making the statement. This is the only place in the bill where anything is done for the health of man. The bill purports to be entirely for agriculture itself, which is proper. But I was calling the attention of the committee to the fact that the farmer, the human being, has to abide wherever cattle abide and wherever vegetation grows or wherever agriculture develops, and if the mosquito is pestiferous in any section that tends to affect the welfare of agriculture itself, because if man does not thrive agriculture does not thrive and live stock does not thrive, so there is a collateral interest there, if not a very direct connection.

I think that my amendment might be accepted by the gentleman from South Carolina, since it does not affect the appropriation. On page 65 of the bill provision is made to enable the Secretary of Agriculture to aid in the development of reclamation projects. That might be held to be in the nature of a move to suppress the mosquito, because reclamation projects would help to drive the mosquito out.

Mr. LEVER. I want to say to the gentleman that if the committee thought it would bear that construction it would not be in the bill.

Mr. MOORE. If Dr. Gorgas was correct in his treatment of the mosquito in Panama, why not try to meet it in other sections where the drainage of swamp areas will help to alleviate the mosquito nuisance?

Mr. LEVER. No one denies that.

Mr. MOORE. The amendment that I offer proposes that a portion of the $54,000 appropriated for investigations, identification and systematic classification of insects, including "the study of insects affecting the health of man and domestic animals," which is largely theoretical, which goes into the books and bulletins largely—that at least $10,000 of that sum, not raising the amount appropriated a dollar, shall be applied by the department to the specific investigation of the mosquito.

Mr. LEVER. It had not been called to my attention until just now, but I am afraid the gentleman's amendment is going to have exactly the opposite effect to that which he desires. To put it another way, I think the gentleman is going to reduce the amount of the appropriation now used for this purpose. I hold in my hand the project book of the Bureau of Entomology, and I find, under the head of "Study of insects affecting the health of man," they spent, in 1913, $2,402.02 for the study of insects affecting the health of man, among which is the malarial mosquito. And for 1914 they have allotted $15,000 for that work, and in the estimate for 1915 in this bill they have allotted $20,000. Now, the gentleman ought to stay by the mosquito and not cut the appropriation.

Mr. MOORE. But it does not appear from the gentleman's statement that that applies to the mosquito itself. It applies to other insects affecting the health of man. That may be the house fly or the bedbug. I want a specific application to that common, that well-known nuisance, the mosquito.

Mr. LEVER. It applies to the house fly, the malaria-carrying mosquito, the stable fly, and the Rocky Mountain spotted fever tick.

Mr. MOORE. The gentleman has confirmed what I said; the bulk goes to the investigation of other insects than the mosquito. I simply ask that a part of this money be specifically spent for the purpose of investigating the mosquito.

[The time of Mr. MOORE having expired, by unanimous consent he was given three minutes more.]

Several States have undertaken to suppress the nuisance on their own account, but the gentleman is aware of the fact that the mosquito does not abide within the limits of any one State. It is an interstate nuisance. It may originate in Delaware, but it goes into Pennsylvania and Maryland. It may originate in Louisiana, but it connects up with other States. Therefore it is a nuisance that can not be entirely controlled or suppressed by a State.

What is the Federal Government doing to aid the States in the suppression of this nuisance? It spreads everywhere; it is a nuisance everywhere; it interferes with business everywhere; and it certainly disturbs the comfort of people everywhere. It has been indicated in this discussion that it affects the well-being of animal life in that stock and poultry do not grow as rapidly as they would if they were not harassed by the mosquito.

What is the Federal Government doing to aid the State of New Jersey, which makes a direct appropriation for this purpose? The Government has splendid machinery and facilities for determining the origin and effect of the mosquito. Why not cooperate with the States and get rid of it?

Mr. CANDLER of Mississippi. Does not the treatment of the mosquito in Panama and its eradication show that we can get rid of it?

Mr. MOORE. The project there might be too large for one State to undertake. But if it was a good thing there, why is it not tried out in Louisiana or New Jersey?

Mr. CANDLER of Mississippi. It might be a good thing anywhere. If we have the information how to do it, why appropriate money to get more information?

Mr. MOORE. If we know, why spend any money at all? We seem to be spending $54,000 for the purpose of finding out. We are spending money for the study, and spending no money at all to effect a remedy.

Mr. CANDLER of Mississippi. The purpose of the study is to find out how to eradicate it.

Mr. MOORE. But how are we going to get results? The mosquito comes and bites just as hard and is just as much of a nuisance after we have investigated him as he was before. We want results.

Mr. SISSON. Mr. Chairman, I want to ask the chairman of the committee a question.

Mr. LEVER. I yield to the gentleman.

Mr. SISSON. Is this not an absolute duplication of work done by the Marine Hospital Corps or the Public Health Department?

Mr. LEVER. I made that statement a moment ago.

Mr. SISSON. Did the Committee on Agriculture consider the amount of money that is being expended in that department for this particular investigation?

Mr. LEVER. Twenty thousand dollars. I made the statement a moment ago. The gentleman was evidently in the cloakroom at the time. If my attention had been called to this line of work sooner, this item would not have gone into the bill, or the bill would not have come upon the floor with the item in it, because I do believe it is a duplication of the work of the Public Health Service. In the future it will not come in this bill if I can prevent it.

Mr. SISSON. Mr. Chairman, I want to say this: That it has been my purpose within the last few months to look somewhat into the various appropriation bills, and that is why I interrupt the committee at this time. You will find in the various departments of this Government work of this kind duplicated many times. I do not mean this particular character of work, but other characters of work are being duplicated repeatedly in various departments, and it seems to me that, in respect to all of these different appropriation bills, the chairmen of the committees or the clerks of the committees, or some machinery at any rate, ought to be put into force for the purpose of eliminating duplication of work. Why should there be instrumentalities established with certain overhead charges which could be eliminated if all of this work could be done in one department and under one direction?

Mr. LEVER. Mr. Chairman, I will state to the gentleman that the thought has been in mind for quite a while that it would be money well spent if we created a commission of some description to go through all these various lines of work of these various departments and point out to Congress where the work is duplicated.

Mr. SISSON. Mr. Chairman, if the gentleman will permit this suggestion, I think if the chairmen of the various com-

mittees that appropriate money would get together at the beginning of some Congress, after the estimates shall have been submitted, and go through the bills, those chairmen of the various committees, without the appointment of a commission, could accomplish a great deal of work along the line of the elimination of duplication of work.

Mr. LEVER. That is undoubtedly true and it is a very good suggestion.

Mr. SISSON. And my only purpose in rising was to make that suggestion to the chairman of the committee, and he might be the chairman of the committee to initiate that work in the next Congress, because, if something is not done, it will be found that there are numbers of items duplicated in the various appropriation bills.

Mr. LEVER. Mr. Chairman, I desire now to be heard on the merits of the amendment. This is an amendment to set aside $10,000 of this appropriation for the study of the mosquito.

It is a matter which has engaged the attention and thought of the gentleman from Pennsylvania [Mr. MOORE] for several years. I would like greatly to accommodate him, but, as I have suggested, we are already using $20,000 of this item for the study of insects affecting the health of man, and I take it that the department, in making its allotment, will make the allotment upon the ground of the urgency of the situation.

Mr. MOORE. Does the gentleman know whether the department cooperates in any way with any States that already make appropriations for the suppression of the mosquito?

Mr. LEVER. The statement was made that the department in its investigation in Louisiana is cooperating with the State authorities.

Mr. MOORE. I do know that the State of New Jersey makes an appropriation for this purpose, and I want to know whether the officials in the State of New Jersey obtain any of the benefits of the Federal governmental investigation?

Mr. LEVER. I will say to the gentleman that the Government is cooperating in this work of the study of insects affecting the health of man with the authorities in the District of Columbia, at New Orleans with the authorities of the State of Louisiana, in Texas at Dallas, in Montana at Ravalli and Missoula Counties, and in South Carolina at Spartanburg.

Mr. MOORE. I think, in all fairness, the work ought to be extended into other States, because the mosquito is just as bad on the Great Lakes as it is on the Atlantic coast or in the Southern States.

Mr. LEVER. If this were the only department of the Government which is making these investigations, I would feel inclined to favor the amendment of the gentleman from Pennsylvania, because I believe that it is the province of the Government to make these studies of the malaria-bearing mosquitoes, which are very greatly affecting the health of man; but the Public Health Service is doing that work. It was created to do that kind of work, and I do not believe that we should attempt to build up duplication of service in these various departments of the Government. I think the suggestion of the gentleman from Mississippi [Mr. SISSON] is a very good suggestion, and something ought to be done to prevent a continuance of duplication of work. Hence I am opposed to the amendment of the gentleman from Pennsylvania, and I ask for a vote.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Pennsylvania.

The question was taken, and the amendment was rejected.

Mr. MOORE. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Amend, page 48, line 21, after the figures "$54,280," insert "*Provided*, That the Department of Agriculture shall cooperate with such States as may have provided by appropriation for the investigation and suppression of the mosquito."

Mr. LEVER. Mr. Chairman, on that I reserve the point of order.

Mr. MOORE. Mr. Chairman, I have offered this amendment, notwithstanding the remarks of the chairman of the Committee on Agriculture, in order that I might say a word of approval of what has been said both by him and the gentleman from Mississippi with regard to a cooperative method of preventing duplication of appropriations. We ought not to have duplication. It makes no difference whether these pestiferous insects that affect the health of man and animals are investigated by the Medical Department of the Government or by the Department of Agriculture, but they ought to be investigated by somebody, and we ought to have the benefit of the scientific knowledge for which we pay so much, and we ought not to pay twice for that knowledge. My point in offering this amendment is to draw attention to the fact that certain States have undertaken to make this kind of mosquito investigation on their own account, but that it is manifestly impossible for any one State to control the situation. There must be Federal cooperation, just as there is in the case of the Mediterranean fly, the boll weevil, the gypsy brown-tail moth, and the Argentine ant, or any of these nuisances on account of which we make appropriations.

And in view of the statement of the gentleman from South Carolina that the Committee on Agriculture in the future may resolve that the mosquito is none of its business, I hope that at least some committee may eventually take cognizance of it.

Mr. LEVER. Mr. Chairman, I think I am safe in assuring the gentleman from Pennsylvania that this item with this language carrying this authority will not be in the next year's Agriculture appropriation bill.

Mr. MOORE. Very well, that will bring it squarely up to the medical authorities.

Mr. LEVER. Mr. Chairman, I make the point of order.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

Preventing spread of moths: To enable the Secretary of Agriculture to meet the emergency caused by the continued spread of the gypsy and brown-tail moths by conducting such experiments as may be necessary to determine the best methods of controlling these insects; by introducing and establishing the parasites and natural enemies of these insects and colonizing them within the infested territory; by establishing and maintaining a quarantine against further spread in such manner as he shall deem best, in cooperation with the authorities of the different States concerned and with the several State experiment stations, including rent outside of the District of Columbia, the employment of labor in the city of Washington and elsewhere, and all other necessary expenses, $297,540.

Mr. HUMPHREY of Washington. Mr. Chairman, I ask unanimous consent to extend my remarks by inserting in the RECORD a list of the Democrats who are Members of the present Congress who voted for the present law permitting American ships engaged in the coastwise trade to pass through the Panama Canal without the payment of tolls.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to extend his remarks in the RECORD by inserting certain data which he indicated. Is there objection?

Mr. MOORE. Mr. Chairman, I make a similar request.

Mr. CANDLER of Mississippi. Why not include everybody?

Mr. FOSTER. Mr. Chairman, reserving the right to object, is this matter already in the RECORD?

Mr. HUMPHREY of Washington. The newspapers are very much interested in it and the public would like to see a list of those who——

Mr. BARTLETT. What is the proposed list the gentleman desires to publish?

Mr. HUMPHREY of Washington. I propose to publish a list of the Democratic Members of Congress who voted——

Mr. BARTLETT. Democrats, for what?

Mr. HUMPHREY of Washington. In favor of American ships engaged in coastwise trade passing through the Panama Canal without the payment of tolls. I give also the attitude of three Members of the present Cabinet. I thought that would be of interest to the country to know, especially in view of the fact we are going to vote on that matter soon.

Mr. FOSTER. That is already in the RECORD?

Mr. MANN. No; it is not in the RECORD, except one would have to go over it and pick it out.

Mr. CANDLER of Mississippi. Why does the gentleman limit it to Democrats? Why does he not put in Republicans and everybody else?

Mr. BARTLETT. I believe I had the gentleman's permission to interrupt him.

Mr. HEFLIN. Regular order, Mr. Chairman.

The CHAIRMAN. The regular order is, Is there objection to the request of the gentleman from Washington?

Mr. BARTLETT. Mr. Chairman, reserving the right to object——

Mr. LEVER. Mr. Chairman, I ask for the regular order.

Mr. HUMPHREY of Washington. I will yield to the gentleman from Georgia [Mr. BARTLETT] if I can yield.

The CHAIRMAN. The regular order has been demanded, and the question is, Is there objection?

Mr. FOSTER. Mr. Chairman, reserving the right to object——

Mr. LEVER. I object, Mr. Chairman.

Mr. BARTLETT. I did not intend to object myself.

The Clerk read as follows:

For the maintenance of the Montana National Bison Range and other reservations under supervision of the Biological Survey, including construction of fencing, wardens' quarters, shelters for animals, landings, roads, trails, bridges, ditches, telephone lines, rockwork, bulkheads, and other improvements necessary for the economical administration and protection of the reservations, and for the enforcement of section 84 of the act approved March 4, 1909, entitled "An act to codify, revise, and amend the penal laws of the United States," $21,000, of which sum $2,500 may be used for the purchase, capture, and transportation of game for national reservations.

Mr. MANN. Mr. Chairman, I move to strike out the last word.

Mr. LEVER. If I may get the attention of the gentleman from Illinois.

Mr. MANN. The gentleman can always have my attention.

Mr. LEVER. I desire at this point, as I explained awhile ago, to ask unanimous consent that the gentleman from Ohio [Mr. SHERWOOD] may address the committee for 20 minutes.

Mr. MANN. Mr. Chairman, of course I shall not object to that. I just sent for the gentleman from Wyoming [Mr. MONDELL], who is engaged in the Committee on Appropriations and who is interested in the next paragraph.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that the gentleman from Ohio [Mr. SHERWOOD] may be permitted to address the committee for 20 minutes. Is there objection? [After a pause.] The Chair hears none. [Applause.]

Mr. SHERWOOD. Mr. Chairman, I desire to apologize to the committee for asking for the time. I am called upon to perform the most solemn and sacred duty of my life, and can not be here to-morrow when this fisheries treaty is coming up under a special rule. I represent a district on the south shore of Lake Erie that is more interested in this treaty than any other district in the United States. The treaty has been amended by the Committee on Foreign Affairs, and if the amendment stands as agreed upon by the Committee on Foreign Affairs I am paired to vote for the treaty. If the amendment is stricken out, then I am paired to vote against the treaty. This is the paragraph that has been amended:

48. TRAP NETS PROHIBITED.

No concealed movable trap net shall be used in these treaty waters. On and after January 1, 1916, no trap net of any kind shall be used for the capture of fish in these treaty waters.

This is the amendment agreed upon by the Committee on Foreign Affairs this morning:

Section 1, page 3, after line 3, strike out the words "January 1" and insert the words "March 1: *Provided also*, That the enforcement of regulation No. 48 is suspended pending revision by the International Fisheries Commission and the approval of said revision by Congress; but the commission shall have the right to regulate the construction and operation of trap nets."

I will say that this amendment meets the approval of the United States Fish Commissioner, Dr. Smith.

Before discussing the features of this highly important measure I desire, on behalf of my constituents along the south shore of Lake Erie, to thank the distinguished chairman of the Committee on Foreign Relations, the gentleman from Virginia [Mr. FLOOD], and the committee he so ably presides over for the kindness and consideration shown our interests in this bill.

The Government fish hatcheries of Lake Erie are located at Put-in-Bay, in the district I represent, also the Ohio State fish hatchery. That splendid group of historic islands near the spot where Commodore Perry fought the most signal naval battle ever fought on fresh water, Put-in-Bay Island, lies about 16 miles from shore, and this group of islands—North Bass, Middle Bass, and Put-in-Bay, emerald gems that rise above the bosom of Lake Erie—are peopled by a class of citizens not excelled in intelligence, enterprise, and patriotism in the United States. And these islanders are lake fishermen, grape and fruit growers. Not only are the finest and most wholesome food fishes caught in the waters around these islands, but the finest peaches and the most luscious grapes are here produced. These islands have a peculiar charm and attractiveness, especially in the early autumn, when the fields, which are all gardens, are in the brilliant glow of vineyard and vintage. The fishing industry in my district and the adjoining district east, on the south shore of Lake Erie, is an important element of food supply. The international treaty we are now called upon to ratify abolishes all trap-net fishing. The number of trap nets operated along this shore in 1913 was 4,058; money invested, $650,000; fish caught, 10,407,500 pounds; value, $457,000; 1,200 men employed directly. The trap-net catch was 65 per cent of the total catch of fish in Ohio waters in Lake Erie.

The bill as now amended allows temporarily continuation of the trap-net industry, or until the further action of Congress. We have agreed to accept this concession. The trap net was originally discriminated against. Many think this device an ingeniously contrived trap different from and more destructive than other nets and devices. The facts are that there is nothing in trap-net fishing that differs materially from pound-net or fyke-net fishing, both of which are permitted under this treaty now under consideration. The manner of catching fish in trap nets is identical with that of the pound net, both of which are so constructed as to permit the escape of the small or undersized fish. Fyke nets are used in the shallow waters of Sandusky Bay, and is a small net. Trap nets are so constructed that they may be submerged, being closed at the top, while pound nets are open at the top and supported by stakes forming a circle and projecting out of the water. This is the chief difference, except that pound nets are larger and more expensive of operation. Both nets have what is known as leaders. This is a netting set perpendicular in the water and running out some distance from shore, which serves to guide the fish into the nets. Right now and here I want to refute the statement that the waters of Lake Erie are being depleted of their food supply of fish. The efficient work done by the United States and Ohio State Hatcheries maintained at Put-in-Bay, Ohio, is strikingly evidenced by the remarkable fact that of the principal species propagated artificially—whitefish, herring, and blue pike—there is a greater supply in Lake Erie to-day than at any time in the past 25 years. This is proved by the greatly increased catch of these kinds of fish in the same nets and same localities. In some localities the increase has been more than 400 per cent within recent years. In the Ohio State Hatchery alone more than a thousand million fry are produced annually. A "fry" is a minnow just escaped from the egg and not able to take care of itself in the water. If only 4 per cent of these grow to maturity it adds annually more than 50,000,000 pounds of fish to the supply of Lake Erie from this one hatchery alone.

The Ohio waters of Lake Erie are peculiarly adapted to the propagation of fish, both natural and artificial. Here are the best spawning grounds of the whole Great Lakes system. The billions of little fishes produced in the two hatcheries at Put-in-Bay are placed in the waters, and many of them find their way into the deeper waters on the Canadian side of the international boundary line, there to be caught by Canadian fishermen in pound and gill nets and brought over to be sold to the ultimate consumer in the United States. Again let me call your attention to the fact that a large amount of the spawn that is developed in the fish hatchery of Ohio is bought of the Canadian fishermen and paid for by the State of Ohio, and when this spawn is hatched into fry, which means a fish which has emerged from the egg, he goes into deep water and becomes the prey of the Canadian fishermen, and as long as we in the State of Ohio maintain a hatchery on the south shore of Lake Erie, and the Government of the United States maintains its extensive hatchery at Put-in-Bay, and the Canadians establish no fish hatchery on the north shore of Lake Erie, this condition of affairs is bound to exist, whether the treaty under consideration is ratified or otherwise.

It is agreed by all interests on the south shore of Lake Erie that this treaty forbidding trap-net fishing in Lake Erie is solely in the interest of Canadian fishermen. And the American commissioner, Dr. Smith, admitted in my presence not five days ago that there is now no objection to trap-net fishing. It is also agreed that this bill, unless amended, will ruin all the trap-net fishermen on the south shore of Lake Erie and practically confiscate their property.

As to the cost of carrying into effect the provisions of this treaty, I have made some investigation. I will take the eastern group of waters: Passamaquoddy Bay and St. Croix River, between New Brunswick and State of Maine, will probably require at least two patrol boats; Lake Memphemagog, in northern Vermont, one patrol boat; Lake Champlain, between New York and Vermont, extending into Canada, one patrol boat; Lake Ontario one patrol boat; Lake Erie two boats; Lake St. Clair one boat; waters connecting Lakes Erie and St. Clair one boat; waters connecting Lakes St. Clair and Huron one boat; Lake Huron two boats; St. Marys River one boat; and Lake Superior three boats. This completes the Great Lakes system, so called. Lake of the Woods, between northern Minnesota and Canada, will require one boat; Rainy Lake and Rainy River one boat. Take the Pacific group, including Washington Sound, Strait of Juan de Fuca, Strait of Georgia, and Puget Sound, and four boats at least will be required. The Government would be required to build 20 patrol boats at the cost of $25,000 each. The cost of maintenance of each of these boats, estimated by what it is costing Ohio now for her patrol boat in Lake Erie waters, at least $20,000 a year. Then there is a question of maintenance, of repairs, and manning these boats. Each boat would require a captain, a pilot, two wheelsmen, first and second engineer, two firemen, one oilman, besides the deck crew. I have made an estimate of these costs per year, based upon the cost of the Ohio boat now in Lake Erie waters, and a million dollars per year I believe to be a fair estimate.

It is estimated that 90 per cent of the fish caught in Canadian waters affected by this treaty are sold in the United States. In the deeper waters of the north part of Lake Erie trap-net fishing is not practical, while in the south part, in the more shallow waters trap nets are practical and have, therefore, come into

general use. If trap nets were abolished by law, it would not only put our Ohio fishermen out of business, but it would also give to Canadian fishermen a very important advantage.

The principal opposition to the use of trap nets on Lake Erie at the time this treaty was negotiated came from the sporting fishermen, who fish with rod and line and who are interested in black bass. But since the laws of Ohio and other States, as well as those of Canada, prohibit the catching of black bass except with hook and line, all sensible opposition to trap nets has now ceased.

The revenue derived from fees for licenses on trap nets in the Lake Erie fishing district of Ohio amounts to more than $20,000 annually, which is used in maintaining the Ohio State fish hatchery at Put-in-Bay.

Regulation 45 prohibits fishing with nets in Lake Erie within one-half mile of the international boundary line. This regulation is disadvantageous to the fishermen on the south shore of Lake Erie. During the summer months, when the sun is ardent, fish naturally take toward the cooler and deeper waters in the middle and north part of the lake, and for this reason this one-half mile strip of United States waters extending the whole length of the lake is of great importance to the fishermen on the south shore. In view of these conditions, this is manifestly an unfair regulation, especially when the artificial propagation of fish by the United States and State of Ohio is considered. For instance, the water boundary line is only a few miles north of North Bass Island in Lake Erie, and as we move north to the Canada shore the water grows rapidly deeper to the depth of 70 feet. All the more wholesome and palatable and nutritious fishes, especially the whitefish, take naturally to deep water. The whitefish is a noncombatant, and not a fighter like the black bass and grass pike. Hence the whitefish, as soon as able to go it alone from the United States and the Ohio fish hatcheries, takes to the deeper Canadian waters. Canada has no fish hatchery on Lake Erie. Hence, in any event, we are breeding fish largely for the benefit and profit of Canadian fishermen.

The revocation of the half-mile limit would result in considerable gain to Ohio fishermen on the south shore of Lake Erie. I will say that the Committee on Foreign Affairs at a meeting this morning refused to amend the bill in that particular.

Much has been said about the preservation of that valuable fish, the sturgeon, in these international waters. It is to be regretted that this fish seems to be doomed to extinction. Our efforts ought to be directed more toward the protection and artificial propagation of the more important food fishes, those which from their very nature always have constituted and always will constitute the great bulk of supply to an ever-increasing demand. Sturgeon can not be successfully propagated artificially, and if they could the great length of time required for a sturgeon to grow makes it impossible to prevent their ultimate extinction.

All alimentary scientists agree that a fish diet is the best and most potent brain feeder; and the Lake Erie whitefish, when properly larded, leads all the rest in brain nourishment. With all the great and perplexing problems now pending in this Congress, the question of a higher quality of brain evolution should appeal to every Member on this floor as of the most vital moment. [Applause.]

The CHAIRMAN (Mr. HENSLEY). The time of the gentleman has expired.

Mr. MANN. Mr. Chairman, I would like to make an inquiry of the gentleman from South Carolina [Mr. LEVER] in reference to this national bison range in Montana. How many bison do we have now? It goes against my feelings, by the way, to say "bison," because when they were plentiful we called them "buffalo."

Mr. LEVER. On what page is that?

Mr. MANN. On page 50, the paragraph now under consideration.

Mr. LEVER. I would say to the gentleman from Illinois [Mr. MANN] that I asked that question of the witness before the committee, Dr. Henshaw, in this language:

> How many bison have you in your herds altogether?
>
> Mr. HENSHAW. We have exactly 96 on the Montana range; we have just transported 14 animals to the South Dakota range, and we have 10 in Nebraska. They are all in fine order, and the Montana herd, particularly, is increasing at a very rapid rate, the increase being over 200 per cent for the first four years, which is exceedingly high.
>
> The CHAIRMAN. You think, then, you can save this animal from extinction?

He replied:

> I do not think there is any doubt at all about the future of the bison. I think it is absolutely safe. There is, of course, a possibility that on any one of these ranges some contagious disease might break out and endanger that one herd. We now have three under our jurisdiction.

Mr. MANN. What good does it do? Have we not enough? What good does it do to increase that herd 200 per cent in four years, which seems like a remarkable reproduction?

Mr. LEVER. Well, I will say to the gentleman from Illinois that the bison is a great American animal. It is fast becoming extinct.

Mr. MANN. It is increasing in numbers now.

Mr. LEVER. That is very true; but it would have been extinct if we had not taken care of it; and the committee thinks that we ought to preserve the species.

Mr. MANN. I am not criticizing that. What are we going to do with the increase now? Here is a remarkable productivity.

Mr. LEVER. I take it that if the increase becomes large enough, these animals will be turned out on the range to shift for themselves.

Mr. MURDOCK. They would not last very long.

Mr. MANN. They have them on the range in some places, do they not; for instance, in Yellowstone Park?

Mr. LEVER. Yes; in Yellowstone Park. But all the bison in this country are under control.

Mr. MANN. What good are they after they are turned out on the range?

Mr. LEVER. They are good to eat.

Mr. MANN. Well, not very.

Mr. LEVER. I have never eaten any myself, I will say frankly.

Mr. HOWARD. Their hides are good to make shoes from.

Mr. LEVER. The gentleman from Georgia suggests the hides are fine for shoes and things like that.

Mr. MANN. Nobody would use the shoes. I suppose some of us can remember—at least I can—when we could get a good buffalo hide for about $1.50, or a buffalo coat.

Mr. SLOAN. Did you ever eat a buffalo steak? They are good.

Mr. MANN. Yes. But nobody who eats good meat will eat it. The gentleman has a good imagination, and anyone with imagination can eat any kind of meat, but give me a good corn-fed ox.

Mr. LEVER. I wish this to go into the RECORD—from Dr. Henshaw:

> The total number of bison is about 3,500, of which about 1,700, including 345 in Government herds, are in captivity in the United States at the present time.

Mr. MURDOCK. Will the gentleman yield? How many bison are on this range which is designated in this paragraph?

Mr. LEVER. Ninety-six.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

> For investigating the food habits of North American birds and mammals in relation to agriculture, horticulture, and forestry, including experiments and demonstrations in destroying noxious animals, and for investigations and experiments in connection with rearing of fur-bearing animals, including mink and marten, $65,000: *Provided*, That of this sum $15,000 shall be used for the destruction of ground squirrels on the national forests: *And provided further*, That of this sum not more than $5,000 may be used in investigating the disease of wild ducks in the Salt Lake Valley region of Utah.

Mr. MONDELL. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Wyoming offers an amendment, which the Clerk will report.

The Clerk read as follows:

> Page 51, line 8, strike out "$65,000" and insert "$85,000."

Mr. MONDELL. Mr. Chairman, my amendment proposes to increase by $20,000 the appropriation under this head. This appropriation is used for investigating the food habits of North American birds and mammals in relation to agriculture and horticulture, for experiments and demonstrations in destroying noxious animals, and for investigations and experiments in connection with rearing of fur-bearing animals; $15,000 of it is specifically appropriated for the destruction of ground squirrels in the national forests.

My object in increasing the sum by $20,000 is to enable the Biological Survey to make experiments and demonstrations in extermination of the rodent commonly known as the prairie dog. But few people realize the destructive character of the American prairie dog. In these days, when we are endeavoring to increase the food supply of the Nation, I know of no way in which we can accomplish that by Government aid to such an extent, with the same expenditure, that we can by clearing the range of the prairie dog.

There are approximately 350,000,000 acres of unentered public land, mostly in the intermountain States. It would be difficult to form an intelligent opinion of the proportion in that area that is inhabited by the prairie dog, but I think it would be an entirely conservative estimate to say that 50,000,000 acres is

inhabited by that rodent. The prairie dog is the most gregarious of all rodents and the most destructive. He lives in villages, and in the area covered by his villages, and for a considerable surrounding area, nothing that affords feed for live stock is allowed to grow. In other words, the area of the prairie-dog towns of the intermountain country are barren and worthless so far as producing anything for grazing animals is concerned.

Mr. MANN. Will the gentleman yield to a question for information? When these prairie dogs have eaten up all the roots or vegetation, what do they do then? I mean in a locality such as the gentleman has described?

Mr. MONDELL. They seem in a way to be fairly intelligent conservationists. I think they seldom destroy the roots sufficiently to prevent the growth of enough grass to keep the villages going. They generally eat the grass as fast as it grows and to a very considerable extent eat the roots, but not to an extent, as a general thing, to prevent reproduction of the grasses. It takes some time to restore the grasses to a normal growth, however, after the dogs are killed or driven out. As they eat the grass on the ground they occupy, they forage farther and farther out onto the surrounding territory, so that when you approach a dog town you pass from a region having a fairly good growth of grass to one without any grass whatever, for as fast as the grass grows on the dog town the dogs eat it—constantly eat the tender grass as it comes up.

As the settler goes upon those lands he destroys the dogs upon his own land, but he constantly suffers from the incursion of the prairie dog from the surrounding territory; and oftentimes you will see a green field mowed as clean as though it had been struck by a Kansas cyclone, with no living vegetation upon it.

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. MONDELL. Mr. Chairman, I would like to have five minutes more, if I may.

The CHAIRMAN. The gentleman from Wyoming asks unanimous consent to proceed for five minutes more. Is there objection?

There was no objection.

Mr. MONDELL. I think it is a moderate estimate, as I said a moment ago, to place the territory denuded yearly by the prairie dog at 50,000,000 acres. Assuming that this area, if it produced its ordinary growth of grass, would feed one steer to 50 acres—and that is more than a moderate estimate—the prairie dogs are each year destroying grass enough to feed a million steers.

Mr. MURDOCK. Mr. Chairman, will the gentleman yield for a question?

Mr. MONDELL. I will.

Mr. MURDOCK. Has the State of Wyoming taken any steps to eradicate prairie dogs?

Mr. MONDELL. We have paid bounties for the destruction of noxious and predatory animals for years—I think at one time for dogs.

Mr. MURDOCK. With what result?

Mr. MONDELL. With the result that the appropriation was very quickly used up. [Laughter.]

Mr. MURDOCK. And the prairie dogs not diminished?

Mr. MONDELL. We have been diminishing the prairie dogs very greatly. The settlers kill the prairie dogs on their own lands and on the adjacent public domain to a certain extent. Last year one small settlement of stockmen in my State spent $2,800 for the destruction of prairie dogs. We do not expect the Federal Government to kill all the prairie dogs on the range, although last year $12,000 was expended for killing them on the forest reserves, and the department estimates that with the expenditure of this sum they saved grass worth $150,000; so that, in my judgment, it was a very excellent expenditure.

Several years ago the department began to experiment in the development of methods for the destruction of these animals. They developed a formula, which has been very generally adopted—a strychnine formula. They also developed a formula using a certain chemical which, placed in the hole, produced a poisonous gas that killed the dog.

Mr. MURRAY of Oklahoma. What is called the "Prairie Dog Sure Shot" is an effective remedy.

Mr. MONDELL. Now, the condition attending the application of these remedies is that they must be applied with very great care, and they must be applied just at the right time, and the farmer oftentimes makes a failure in applying them. What we desire to have the department do is to demonstrate at widely separated points in the range country the effectiveness of these destructive agencies, and we believe that with the expenditure of a reasonable amount of money the stockmen and the farmers will be so assisted and encouraged that within a few years we can very largely destroy these creatures throughout the entire range country and make a range for thousands and hundreds of thousands of farm animals.

Mr. PLATT. Mr. Chairman, will the gentleman yield for a question?

The CHAIRMAN. Does the gentleman yield to the gentleman from New York?

Mr. MONDELL. I do.

Mr. PLATT. When you get these animals nearly all destroyed will not the Government be buying a national park to keep them still in existence, as in the case of the buffaloes?

Mr. MONDELL. The Government will not at any suggestion of mine.

I hope the committee may see its way clear to accept this small addition to the appropriation. It will be of very great value in our country. It will be utilized from Texas to Montana, and from Nebraska to California; and under this appropriation demonstrations can be made that within a few years ought to give us millions of acres of grasslands where there is to-day practically no vegetation.

The CHAIRMAN. The time of the gentleman from Wyoming has again expired.

Mr. LEVER. Mr. Chairman, the matter to which the gentleman from Wyoming [Mr. MONDELL] calls attention is recognized by the Committee on Agriculture to present a very important problem. It was estimated to the committee a few years ago that the country was losing annually something like $25,000,000 on account of the destructive characteristics of the prairie dogs.

Mr. MURRAY of Oklahoma. Oh, the gentleman has got that too high.

Mr. LEVER. That may be. But we feel that if we have discovered a remedy for these pestiferous little animals it would not be a waste of public money to use it in demonstrating the method. The amount that the gentleman from Wyoming asks, however, in the judgment of the chairman of the committee, is entirely too high, because the work is new work, and it must be organized and put on its feet. I wonder if the gentleman would not agree to an increase of $10,000 instead of $20,000? Then I think there would be no objection.

Mr. MONDELL. I think the department could use $20,000 to advantage; but I agree with the gentleman that this is new work, and if the committee would agree to an increase of $10,000 I believe it would make a good start, and I think I should be satisfied.

Mr. SMITH of Idaho. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from South Carolina yield to the gentleman from Idaho?

Mr. LEVER. I do.

Mr. SMITH of Idaho. While we have no prairie dogs in Idaho, we have another animal there that is equally destructive, and that is the jack rabbit. There are millions and millions of these rabbits in the Rocky Mountain country, and anyone going a few miles from a settlement to found a new homestead finds it almost impossible to raise crops without being constantly on the alert for these animals, which destroy the grain fields and the alfalfa fields.

The Department of Agriculture has been making some experiments in Idaho, and has made some progress in destroying these jack rabbits in certain localities. In view of the fact that these jack rabbits are scattered over almost as large an area as the prairie dogs, and in view of the fact that the department is already interested in their extermination and is cooperating with the people there, I think the sum of $20,000 ought to be added to this appropriation.

Mr. LEVER. I will say to the gentleman that we made some inquiry about the method being used for the destruction of the jack rabbit, and the gentleman in charge of that work, Dr. Fisher, told us:

Dr. FISHER. We are using oats at the present time, for the simple reason that poisoned alfalfa is dangerous to stock and sheep. We are now making little corrals of a few feet broad and perhaps 20 or 30 feet long, and we put the alfalfa in them so that the rabbits can get into the corral and larger animals will be kept out; and in that way we can kill them over a considerable area.

Mr. HOWELL. That method can be employed only during the winter months?

Dr. FISHER. Poisoning is most economical and effective then, when green food is lacking.

Mr. HOWELL. Rabbits are most destructive in my State while the crop is growing in the early spring.

Dr. FISHER. It is for that reason that the rabbits should be destroyed in winter. We find that rabbits like oats better than anything else in the way of grain, and this grain can be used generally in a district, even in unfenced lands. We have to consider the safety of the stock

The department is now doing some work in this direction, and I could not agree to increase this appropriation any more than $10,000. I hope the gentleman will not press his amendment in its present form. If the gentleman [Mr. MONDELL] will modify his request, and if no member of the committee makes any objection to it, I shall not object.

Mr. MONDELL. I ask unanimous consent to amend my amendment by making the sum $75,000 instead of $85,000.

The CHAIRMAN. The gentleman from Wyoming asks unanimous consent to modify his amendment. The Clerk will report the amendment as modified if there be no objection.

The Clerk read as follows:

Page 51, line 1, strike out $65,000 and insert $75,000.

The amendment was agreed to.

Mr. MURDOCK. Mr. Chairman, I move to strike out the last word, for the purpose of asking the gentleman from South Carolina a question. The last proviso in this paragraph is this:

*And provided further*, That of this sum not more than $5,000 may be used in investigating the disease of wild ducks in the Salt Lake Valley region of Utah.

I should like to ask the gentleman what this disease is, and what is the purpose of protecting these wild ducks? It was stated here a few minutes ago that the Government is trying to do away with the jack rabbit, and here is an attempt to preserve the wild duck.

Mr. LEVER. The testimony before the committee is to this effect. The gentleman from Utah [Mr. HOWELL], who is a member of the committee and who comes from the State where this destructive disease occurs among the wild ducks, made this statement:

I want to present to the committee at the proper time a condition that prevails at Salt Lake. Hundreds of thousands of ducks for the last four years have been visited by some malady that has baffled all the skill we were able to bring to bear to combat it. It occurs from the middle of September to the middle of October, along the marshes of the Great Salt Lake. The game warden of Utah has told me that during the last four years there has been something over 400,000,000 wild ducks that have died in this unknown manner, and it is a matter of very serious concern to the people of the Great Salt Lake Basin, involving the loss of over $1,000,000 a year in wild game. I would like at the proper time to ask the committee to make provision for the investigation of this condition.

Mr. FOSTER. Who counted those ducks?

Mr. CANDLER of Mississippi. The game warden counted them.

Mr. FOSTER. I did not believe there were that many ducks in the whole world. [Laughter.]

Mr. LEVER. Then the Assistant Secretary of Agriculture, Dr. Galloway, who was present, made this statement:

Mr. Chairman, that matter has been before the department. Arrangements have been made to have the Biological Survey, which handles wild-game work, make a survey of the situation, and it is proposed to take up the investigation next spring. It will be necessary perhaps to have a little laboratory located out there, because we have not been able to secure any very definite information as to the cause of the trouble from an examination of the birds sent in here to the department.

Mr. MURDOCK. Is there anything in the hearings which shows that the preservation of the wild duck is in the interest of agriculture? I ask this question; I have asked it before. I should like to know what is the object of preserving these wild ducks?

Mr. LEVER. The gentleman from Kansas has asked me that question privately on several occasions. As far as I have been able to ascertain there is no specific language in this bill which makes the connection that the gentleman is seeking to make between agriculture and wild ducks, but the gentleman realizes, of course, that there is a number of items carried in this bill which do not affect agriculture any more than the wild duck does. For instance, we are carrying an item here for the protection of migratory game birds, which, in my judgment, ought never to have been put upon this bill. We carry in this bill also a number of other items which in no way affect agriculture.

Mr. MURDOCK. Then, as a matter of fact, the preservation of the wild duck has nothing to do with agriculture?

Mr. LEVER. Oh, I think not. But in my judgment it is a very valuable thing to protect the wild duck, because he is a great game fowl.

Mr. MURDOCK. But he does prey upon the farmers' crops?

Mr. LEVER. In Kansas, where he can not find any water.

Mr. MURDOCK. We are trying to get the right to shoot him in Kansas, but by a Federal regulation we are barred from doing it.

Mr. STEPHENS of Texas. Mr. Chairman, I see there is an appropriation here of $15,000 for the destruction of ground squirrels in the national forests. Is that for the protection of the persons who have farms within the national forests, or is it for the preservation of the health of the general public, to prevent the spread of the bubonic plague?

Mr. LEVER. That is the purpose of the appropriation, to prevent the spread of that plague.

Mr. STEPHENS of Texas. Would the gentleman have any objection to inserting after the word "squirrels" in line 10, page 51, the words "and prairie dogs on the national forests"?

That would come directly under the agricultural provision, and in my judgment would make this a much better bill. I will state further that the reason for putting this prairie-dog provision in here is that the national forests are rented to stockmen, and the Government is deriving revenue from the grazing lands within these forests, and it would add vastly to the value of these national forests as grazing lands if we were to kill these prairie dogs.

Mr. LEVER. Evidently the gentleman from Texas was not here a moment ago when we were considering the amendment offered by the gentleman from Wyoming [Mr. MONDELL]. We have just increased this appropriation $10,000 for the purpose of handling the prairie-dog situation.

Mr. STEPHENS of Texas. I was not here when that was done.

Mr. LEVER. I would not like to have anything further inserted in the bill than what we have already put in.

Mr. BARTLETT. The gentleman says that $15,000 is to be used for the destruction of the ground squirrel because they carry bubonic-plague germs. Does the gentleman know that there is a large sum of money expended by the Public Health Service for the destruction of these animals in California?

Mr. LEVER. I will say that my information is to this effect: The Public Health Service, under the direction of that very distinguished South Carolinian, my friend, and one of the most distinguished men in this country, Dr. Rupert Blue, discovered some years ago the cause of bubonic plague—that it was communicated by the bite of a flea. This flea seems to be indigenous to these squirrels, and there has been no authority, as we understand so far, for anybody to use any public money to go into the national forests and use it for the destruction of these squirrels until this was put in the bill several years ago.

Mr. BARTLETT. What part of the national forests is this expended in?

Mr. LEVER. Largely in California.

Mr. BARTLETT. That is what I say. Nobody esteems Surg. Gen. Blue more than I do. I know him personally, and his character is of the highest, personally and professionally. I am not calling attention to this to minimize the work, but Congress, in the appropriation bills that come from the Appropriations Committee, in the urgent deficiency bill passed this session of Congress, and others, have appropriated large sums for this identical purpose of destroying the squirrels which carry the flea that carries the germ of bubonic plague.

Mr. LEVER. That may be. I made a statement this morning that there was a number of lines of duplicating work being carried on by the various departments, and, as far as I was able, I would try to remedy it.

Mr. BARTLETT. The gentleman might say that there are innumerable instances.

Mr. LEVER. As far as I am concerned, I stand ready to prevent any duplication. I will state an example. A demand was made, and the department estimated for it, for work now done by the Health Service in reference to the oyster. As soon as it came to my attention I investigated it, called for the Public Health Service officials, found out what they were doing, and ascertained that the work which the Department of Agriculture wanted to do was already being done by the Health Service, and I cut it out. Now, if the gentleman will permit this appropriation to stand, I will promise a careful examination of this matter next year.

Mr. BARTLETT. California ought to do something itself toward this matter. The Public Health Service, as I say, has spent a large sum of money in doing this very thing which the gentleman proposes to do by this item.

Mr. LEVER. That is true; the Public Health Service has done a wonderful work in discovering the cause of the spotted fever in Montana, and yet we discovered recently that the Department of Agriculture, through the Bureau of Entomology, is duplicating the work. I propose in the next bill that comes from the committee to look into the situation carefully, and if convinced myself, and the committee agrees with me, that the Agricultural Department is duplicating work of the Health Service, I promise the gentleman from Georgia that none of these items will appear in the next bill.

Mr. BARTLETT. The gentleman will render a great service to the United States if he does that. I do not mean to say

that this department has been doing as much duplication work as some of the other departments, but there is place after place where specific work is being done by three bureaus, with a duplication of the work and three times as much money spent for printing and other things as is necessary.

Mr. LEVER. I will say that with my little experience in handling this department of the Government, which I think is doing as little duplicate work as any department, I believe that a proper investigation would develop lines of duplication going on in the Government service that if done away with might save millions of dollars to the public service.

Mr. McKENZIE. Will the gentleman yield?

Mr. LEVER. I will.

Mr. McKENZIE. Will the gentleman tell us briefly how this money is expended for killing the squirrels.

Mr. BARTLETT. First, catch the squirrel.

Mr. LEVER. I will say to the gentleman that I do not have any direct information at hand, but my recollection of the testimony before the committee several years ago is to the effect that the method is by the use of poison.

Mr. McKENZIE. That is done by men employed in the Forestry Service?

Mr. LEVER. Yes; by the forest rangers, and the like of that. I would not be certain of that. Of course, the gentleman understands that it is a difficult matter to keep all of these things in one's head.

Mr. McKENZIE. I realize that.

Mr. TOWNER. Will the gentleman allow me to call his attention to the fact that the language in regard to the squirrel destruction reads, "shall be used for the destruction of ground squirrels on the national forests"? I think the word "on" should be "in."

Mr. LEVER. The gentleman is a better grammarian than I am, but this language has been submitted by the department from time to time.

Mr. TOWNER. As I understand it, these squirrels can not climb trees and could not very well be on the forest reserve.

Mr. LEVER. They could not very well be in the ground. I think the language had better stand.

The Clerk read as follows:

For all necessary expenses for enforcing the provisions of the act approved March 4, 1913 (37 Stat. L., pp. 847 and 848), relating to the protection of migratory game and insectivorous birds, $50,000.

Mr. FOWLER and Mr. BARTLETT rose.

Mr. FOWLER. Mr. Chairman, I reserve a point of order against the paragraph.

Mr. LEVER. I desire to have the point of order settled.

Mr. BARTLETT. I intended to move to strike it out.

Mr. LEVER. I call attention to the fact that the language is not subject to a point of order. It is an appropriation to carry out an existing statute. I would like to have the point of order settled. I call the Chair's attention to the fact that the migratory game law was passed by Congress last year. The language of the bill was put in on the floor of the Senate, and the conferees finally agreed to it; the language in question is only for the purpose of carrying out the provisions of this act, which is now a statute of the United States.

Mr. FOWLER. Mr. Chairman, I wish the gentleman would read that act.

Mr. LEVER. I will say to the gentleman that I have read it not once, but a dozen times. Does the gentleman want me to read it to the Chair?

Mr. FOWLER. Yes.

Mr. LEVER. The act goes through two or three pages of printed matter.

Mr. FOWLER. Oh, no; it does not. It is a short paragraph.

Mr. LEVER. The gentleman evidently has not read the act. I will read it to the Chair:

All wild geese, wild swans, brant, wild ducks, snipe, plover, woodcock, rail, wild pigeons, and all other migratory game and insectivorous birds which in their northern and southern migrations pass through or do not remain permanently the entire year within the borders of any State or Territory, shall hereafter be deemed to be within the custody and protection of the Government of the United States, and shall not be destroyed or taken contrary to regulations hereinafter provided therefor.

The Department of Agriculture is hereby authorized and directed to adopt suitable regulations to give effect to the previous paragraph by prescribing and fixing closed seasons, having due regard to the zones of temperature, breeding habits, and times and line of migratory flight, thereby enabling the department to select and designate suitable districts for different portions of the country, and it shall be unlawful to shoot or by any device kill or seize and capture migratory birds within the protection of this law during said closed seasons, and any person who shall violate any of the provisions or regulations of this law for the protection of migratory birds shall be guilty of a misdemeanor and shall be fined not more than $100 or imprisoned not more than 90 days, or both, in the discretion of the court.

The Department of Agriculture, after the preparation of said regulations, shall cause the same to be made public, and shall allow a period of three months in which said regulations may be examined and considered before final adoption, permitting, when deemed proper, public hearings thereon, and after final adoption shall cause the same to be engrossed and submitted to the President of the United States for approval: *Provided, however*, That nothing herein contained shall be deemed to affect or interfere with the local laws of the States and Territories for the protection of nonmigratory game or other birds resident and breeding within their borders, nor to prevent the States and Territories from enacting laws and regulations to promote and render efficient the regulations of the Department of Agriculture provided under this statute.

The language in the bill is nothing more or less than the language in the act.

The CHAIRMAN. Is that the statute referred to in this paragraph in the bill?

Mr. LEVER. Yes; it is. This is an appropriation to carry out existing law.

Mr. FOWLER. Mr. Chairman, I submit that the chairman of the Committee on Agriculture has read the statute correctly.

Mr. LEVER. Surely the gentleman would not think that I would read it otherwise?

Mr. FOWLER. No; certainly not; and the gentleman could not construe my language any other way. I have never on the floor of this House questioned the integrity of a Member in discussing any matter, and certainly, with the high respect I have for the chairman of the Committee on Agriculture, it is impossible for me to question his motives and sincerity.

Mr. Chairman, nowhere in this act is there any provision whatever giving authority to appropriate money. When this act is boiled down to its essence, it means nothing more or less than an act prohibiting the killing of certain migratory birds.

The CHAIRMAN. As the Chair understood the reading of the statute, it enjoins upon the department the enforcement of that law.

Mr. FOWLER. It does—rules and regulations—that is true; but the act itself is an act fixing a penalty for the violation of a statute.

The CHAIRMAN. If that duty is imposed on the Agricultural Department—and this is a provision for all necessary expenses for enforcing the provisions of the act—it is not for the Chair to determine whether the amount carried is too much or too little or whether any of it is needed, but does not that statute authorize Congress to make an appropriation of whatever expenses would be needed in the enforcement of that law?

Mr. FOWLER. I think not, Mr. Chairman. It is a statute prohibiting the killing of migratory birds and fixing a penalty for its violation. It is true that it confers upon the Agricultural Department the powers to fix rules and regulations concerning the killing or the destruction of migratory birds. It places in the Government—or attempts to—the ownership of migratory birds, and that does not confer upon Congress any authority to make an appropriation whatever. I think the Chair has in view a question which he desires to submit, and I always desire to be courteous and to conform to the wishes of the Chair.

The CHAIRMAN. The Chair was simply going to ask the gentleman this question: If the duty is laid upon the Department of Agriculture to see that this statute is enforced, and if the statute prohibits the killing of birds, may there not be some expense attached to the enforcement of that statute? And if any expense is attached to that, would not Congress, under the law, be authorized to make an appropriation to meet that expense?

Mr. FOWLER. That is an inference to be drawn by each individual as he deems proper. This law now is carried out by a proclamation of the President, and I must say in justice to the people and to all concerned that the proclamation is so complicated that it can not be understood by the citizens of the States. There is not a Member of Congress on the floor of this House who understands the proclamation, and I challenge the wisdom of the combined membership to understand the proclamation regulating the killing of migratory birds. I repeat that there is nowhere in that statute read by the distinguished chairman of the Committee on Agriculture a provision authorizing the appropriation of money, and before an appropriation can be properly made there must be an authorization. If we were proposing to construct a bridge across Rock Creek, first there should be a statute authorizing the construction of the bridge, and in that statute there should be an authorization for an appropriation. But here is an act which is criminal in its nature, a penal statute prohibiting the killing of migratory birds, and fixing a penalty for doing it. Nowhere in this statute is there any provision authorizing Congress to make an appropriation for the purpose of doing anything with the act, and I say the point of order ought to be sustained.

The CHAIRMAN. The Chair is ready to rule.

Mr. MANN. Mr. Chairman, I would like to be heard for just a moment. My colleague from Illinois [Mr. FOWLER] makes an erroneous construction of the rule which is quite natural for one who has not carefully examined paragraph 2 of Rule XXI. The only limitation upon these amendments in the way of appropriations is in paragraph 2 of Rule XXI, and that provides that no amendment shall be in order, and so forth, for any expenditure not previously authorized by law. My distinguished colleague repeatedly used the language, "no appropriation authorized by law." There is quite a difference between an authorization of expenditure and an authorization of appropriation. The passage of an act directing that something shall be done is an authorization of the expenditure for that work, and that is all that is necessary. We sometimes put into laws a provision authorizing an appropriation. It is rather crudely done when it is done, because that is not the purpose of the bill; and you may search the statute through and you will very seldom find that anybody has been so green as to say that when you direct that a thing shall be done you are authorized to pay for it.

Mr. FOWLER. My colleague from Illinois [Mr. MANN] cites Rule XXI. The section which he read applies to amendments offered to appropriation bills, and if he had scrutinized it a little more carefully than he has done he would have known better. With his 15 or 16 or 17 years of service here in the House, he has come to the conclusion that all of the wisdom in this House is centered around one hub, and that he is that hub. Unfortunately for him, there are a few spokes around here in this House that have something to do with the wheel. It is the wheel as much as the hub that bears up the vehicle and renders it useful. It is the wheel that carries the load as much as the hub. [Applause.]

Mr. MADDEN. What about fellies?

Mr. FOWLER. And its framework is supported by the wheel. Mr. Chairman——

The CHAIRMAN. Does the gentleman desire to be heard further? The Chair is ready to rule.

Mr. FOWLER. My colleague from Illinois [Mr. MANN]——

Mr. GARNER. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. GARNER. I understood the Chair to state he was ready to rule. Unless the gentleman has something——

The CHAIRMAN. The Chair has no disposition to shut off anyone, but the Chair is ready to rule.

Mr. GARNER. I have no desire to cut the gentleman off, but——

Mr. FOWLER. Mr. Chairman, if the Chair has fully made up his mind on this question without further discussion or further hearing upon the matter, of course I will cheerfully yield the floor, but I do not want to be taken off the floor of the House by some man who does not know any more than I do. [Laughter and applause.]

The CHAIRMAN. The Chair does not know to whom the gentleman from Illinois refers. If the gentleman refers to the Chair the Chair desires to say that he has no disposition to take the gentleman off the floor without discussion for a reasonable time.

Mr. FOWLER. I desire to submit I did not refer to the Chair at all, because it is presumed that the Chair knows all of the parliamentary laws.

The CHAIRMAN. A very rash presumption in this instance.

Mr. FOWLER. Now, Mr. Chairman, I see my colleague from Illinois, the hub, wants to hub again, and I am perfectly willing for him to hub as much as he wants to until he gets done hubbing.

Mr. MANN. Mr. Chairman, my colleague stated I read the wrong rule. I stated before the gentleman was not familiar with the rules. He said I read the rule in reference to amendments and not in reference to items in the bill. I call his attention to paragraph 2 of Rule XXI, which reads as follows; and I hope that my colleague will let it saturate finally some way into the inner recesses of his brain, so that he will remember:

> No appropriation shall be reported in any general appropriation bill or be in order as an amendment thereto for any expenditure not previously authorized by law.

That is the only rule there is on the subject. If my colleague, who is making points of order frivolously so often, would once in a while look at the rules themselves he would know so much more than he now does that he would not persist in his course.

The CHAIRMAN. The Chair is ready to rule. The present occupant of the chair does not——

Mr. FOWLER. Mr. Chairman, just one parting word on this proposition. [Laughter.]

Mr. MADDEN. Does my colleague intend to indicate that he is going to have a parting word with his colleague?

Mr. FOWLER. I am going to submit to my colleague from Illinois [Mr. MANN] that he get up a school, a night school, for the purpose of elevating somebody up as high as he thinks he is in parliamentary law.

Mr. LEVER. Mr. Chairman, I ask for a ruling.

The CHAIRMAN. The present occupant of the chair does not claim to be an expert parliamentarian, but he is very clear upon this proposition. The law specifically imposes upon the Agricultural Department the duty of enforcing the law referred to in this particular paragraph, and that carries with it undoubtedly the implication that Congress can and will furnish whatever money is necessary to carry out the duties imposed upon the department or bureau. It appears to the Chair that it would be a monstrous proposition to think of in any other way, and therefore the point of order is overruled.

Mr. BARTLETT. Mr. Chairman, I move to strike out the paragraph beginning with line 22, page 51, and ending on line 2, page 52.

The CHAIRMAN. The gentleman from Georgia moves to strike out the paragraph.

Mr. BARTLETT. That strikes out the whole paragraph.

Mr. LEVER. Mr. Chairman, before the gentleman begins I desire to ask unanimous consent that all debate on this motion of the gentleman from Georgia, or amendments to his amendments, shall be closed in 15 minutes.

Mr. FOSTER. Make it 30 minutes.

Mr. BARTLETT. This question never has been before this House.

Mr. HILL. Mr. Chairman, I object.

The CHAIRMAN. The proposition has not been stated.

Mr. HILL. I thought the request was for 15 minutes.

Mr. LEVER. Mr. Chairman, I modify my request by asking unanimous consent that all debate on the amendment and amedments thereto be closed in 30 minutes.

Mr. FOWLER. Mr. Chairman, reserving the right to object——

The CHAIRMAN. Wait a moment, until the Chair puts the request. The gentleman from South Carolina asks unanimous consent that all debate on this paragraph and all amendments thereto close in 30 minutes. Is there objection?

Mr. FOWLER. Mr. Chairman, reserving the right to object, I desire to know who will control that time?

Mr. LEVER. The Chair will control that, under the rules.

Mr. FOWLER. I desire to know if I can have five minutes of that time.

Mr. LEVER. You will have to address yourself to the Chair.

The CHAIRMAN. The Chair feels that a member of the committee should have precedence in recognition. Without that, if the gentleman rises and addresses the Chair he will certainly be recognized. Is there objection?

Mr. SELDOMRIDGE. Reserving the right to object, I would like to ask the chairman of the committee if the motion which he has made includes amendments to the paragraph as well as the paragraph?

Mr. LEVER. My motion is on the paragraph and all amendments thereto.

Mr. MANN. Thirty minutes?

Mr. LEVER. Yes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. BARTLETT. Mr. Chairman, this appropriation is to carry into effect the provisions of a bill known as the "McLean bill," which had never been discussed on the floor of this House, and on which a fair vote has never been taken here. The bill passed the Senate more as a compliment to Senator McLean than anything else. It came over here and was never considered by the Committee on Agriculture, and was never before this House for consideration. When the Agricultural appropriation bill went back to the Senate, it was bodily put in the Agricultural appropriation bill as an amendment. That conference report was brought in here about 4 o'clock one morning before the House adjourned on the 4th of March, and was put through under those conditions.

Mr. MURDOCK. Does the gentleman mean to say there was no discussion of the amendment?

Mr. BARTLETT. I mean to say there was no discussion of this bill, because it was never before the House except as a Senate amendment. The House disagreed to it and it went back to conference, and it was put upon this bill by the conferees agreeing to it, without its ever having been considered by this House or discussed or voted upon, except in that way, during the closing hours of the session.

Mr. Chairman, I do not desire to take up more than my share of the time. I am opposed to this appropriation because it is an unconstitutional expenditure of public money. We were told when the bill came here it required only $10,000 to carry it into effect. That amount of money was appropriated by Congress in the original bill. Now, the estimate submitted to the Committee on Agriculture, or to Congress, by the Secretary of Agriculture for the ensuing year was $100,000, and this committee has only recommended half of that sum, with the department declaring that it will not be a sufficient amount. I desire to call your attention to the estimates made by this department for the enforcement of this law for the ensuing year, as follows:

| | |
|---|---|
| Salaries (lump fund) | $65,000 |
| Travel, station, and field expenses | 32,000 |
| Stationery | 300 |
| Rent (outside District of Columbia) | 1,000 |
| Telegraph, telephone, and postage | 100 |
| Miscellaneous supplies, services, etc | 1,000 |
| Reserve | 600 |
| Total expenditures (lump fund) | 100,000 |

They propose to appoint in the various States 48 game inspectors or wardens. They wanted to give them $3,000 a year each, but under this you will have to give them $1,500. So you are to have most of this money expended by payments in the various States of inspectors, men to hunt down alleged violators of the law, who have a right to believe that under our form of government this General Government has no authority or power to invade the States and enact purely police regulation laws for the protection of game. [Applause.]

Mr. MURDOCK. Will the gentleman yield?

Mr. BARTLETT. Yes.

Mr. MURDOCK. In some of the States of the West they have issued licenses to hunters which extend three or four years in advance. Are those licenses affected legally by the passage of this bill?

Mr. BARTLETT. They are not affected legally, because this national game law is not worth the paper it is written on. In exercising the sovereign power to regulate by police regulation the killing of game, we must have to conform to the supreme law of the land. Fortunately for this country, this kind of despotism—because that is what it is—will not be permitted to be enforced unless the Supreme Court shall see fit to retrace its steps from a decision made by them in the One hundred and sixty-first United States Supreme Court Reports, page 533, known as the Connecticut case—the case of Geer against Connecticut. In that case, in an opinion delivered by Chief Justice White, it says:

> The preservation of such animals as are adapted to consumption as food or to any other useful purpose, is a matter of public interest; and it is within the police power of the State, as the representative of the people in their united sovereignty, to make such laws as will best preserve such game and secure its beneficial use in the future to the citizens, and to that end it may adopt any reasonable regulations, not only as to time and manner in which such game may be taken and killed but also imposing limitations upon the right of property in such game after it has been reduced to possession. Such limitations deprive no person of his property, because he who takes or kills game had no previous right of property in it, and when he acquires such right by reducing it to possession he does so subject to such conditions and limitations as the legislature has seen fit to impose. (See, also, State v. Northern Pacific Express Co., 58 Minn., 403.)

The CHAIRMAN. The time of the gentleman has expired.

Mr. BARTLETT. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent for five minutes more. Is there objection?

There was no objection.

Mr. MONDELL. Mr. Chairman, will the gentleman yield?

Mr. BARTLETT. Of course, I will.

Mr. MONDELL. The gentleman is also familiar with the case of Ward against Race Horse?

Mr. BARTLETT. Yes; but I did not get to that, because this is so much to the point, and I do not know that I will have the time to even read this.

Mr. MONDELL. That is a later case, and I think so much stronger.

Mr. BARTLETT. I thank you; but this is so much in point that I wish to read this:

> So, also, in Magner v. The People (97 Ill., 320, 333) the Supreme Court of Illinois said:
>
> "So far as we are aware, it has never been judicially denied that the Government under its police powers may make regulations for the preservation of game and fish, restricting their taking and molestation to certain seasons of the year, although laws to this effect, it is believed, have been in force in many of the older States since the organization of the Federal Government. * * * The ownership being in the people of the State, the repository of the sovereign authority, and no individual having any property rights to be affected, it necessarily results that the legislature, as the representative of the people of the State, may withhold or grant to individuals the right to hunt and kill game or qualify or restrict, as in the opinions of its members will best subserve the public welfare. Stated in other language, to hunt and kill game is a boon or privilege, granted either expressly or impliedly by the sovereign authority—not a right inherent in each individual, and consequently nothing is taken away from the individual when he is denied the privilege at stated seasons of hunting and killing game. It is, perhaps, accurate to say that the ownership of the sovereign authority is in trust for all the people of the State, and hence by implication it is the duty of the legislature to enact such laws as will best preserve the subject of the trust and secure its beneficial use in the future to the people of the State. But in any view, the question of individual enjoyment is one of public policy and not of private right."
>
> See also Ex parte Maier (103 Cal., 4476); Organ v. The State (56 Ark., 270). It is indeed true that in State v. Saunders (19 Kans., 127) and Territory v. Evans (2 Idaho, 634) it was held that a State law prohibiting the shipment outside of the State of game killed therein violated the interstate commerce clause of the Constitution of the United States, but the reasoning which controlled the decision of these cases is, we think, inconclusive, from the fact that it did not consider the fundamental distinction between the qualified ownership in game and the perfect nature of ownership in other property, and thus overlooked the authority of the State over property in game killed within its confines and the consequent power of the State to follow such property into whatever hands it might pass with the conditions and restrictions deemed necessary for the public interest.
>
> Aside from the authority of the State, derived from the common ownership of game and the trust for the benefit of its people which the State exercises in relation thereto, there is another view of the power of the State in regard to the property in game, which is equally conclusive. The right to preserve game flows from the undoubted existence in the State of a police power to that end, which may be none the less efficiently called into play, because by doing so interstate commerce may be remotely and indirectly affected. Kidd v. Pearson (128 U. S. 1); Hall v. De Cuir (95 U. S., 485); Sherlock v. Alling (93 U. S. 99, 103); Gibbons v. Ogden (9 Wheat., 1). Indeed the source of the police power as to game birds (like those covered by the statute here called in question) flows from the duty of the State to preserve for its people a valuable food supply. Phelps v. Racey (60 N. Y., 10; Ex parte Maier, ubi sup.; Magner v. The People, ubi sup., and cases there cited. The exercise by the State of such power, therefore, comes directly within the principle of Plumley v. Massachusetts (155 U. S. 461, 473). The power of a State to protect by adequate police regulation its people against the adulteration of articles of food (which was in that case maintained), although in doing so commerce might be remotely affected, necessarily carries with it the existence of a like power to preserve a food supply which belongs in common to all the people of the State, which can only become the subject of ownership in a qualified way and which can never be the object of commerce except with the consent of the State and subject to the conditions which it may deem best to impose for the public good.

Mr. MURDOCK. Wherein does he show that the National Government can not invade this field?

Mr. BARTLETT. Because this man in this case made the point that dead game—not only the living game, but the bodies of game, dead—when shipped from Connecticut out of the State could not be interfered with by the State of Connecticut because it would interfere with commerce and because the act was in conflict with the interstate-commerce clause of the Constitution; and the court said that that sort of game, and laws passed to protect it, by preventing the shipment outside of the State of the bodies of dead game was not interstate commerce, but was subject solely to the law of the State where it was killed; that it did not come under the commerce clause of the Constitution, but came within the great police powers of the State to regulate game.

Mr. MANN. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Georgia yield to the gentleman from Illinois?

Mr. BARTLETT. I yield.

Mr. MANN. The gentleman knows we have a national law on that subject, enacted only a few years ago?

Mr. BARTLETT. The gentleman has reference to the Lacey law, with respect to transportation of game?

Mr. MANN. Yes. There are several laws on the subject. Has the gentleman any decision of any court denying the constitutionality of those laws?

Mr. BARTLETT. I think the Lacey law is upheld by the courts.

Mr. MANN. Those laws are directly contradictory to the gentleman's position.

Mr. BARTLETT. That is the trouble about this miserable bill. Congress, in dealing with this subject, has never had an opportunity to deliberate or an opportunity to discuss the question as to whether it is a legitimate exercise of power by Congress, and we are now confined to a 20-minute discussion of the question.

Mr. Chairman, this is but another attempted invasion of the rights of the States by the General Government. It was at one time thought that the Democratic Party, founded upon the principle of protecting the States in the exercise of their local authority, was the chief defender of this great principle of State rights and local self-government. But I find myself very frequently, Mr. Chairman, in a state of lonesomeness when I undertake to call attention to the police powers of the States to regulate matters of this sort, when an attempt is made by Congress to take charge of them. And, Mr. Chairman, if we are to continue to progress and progress along these lines and

invade the rights of the States in every particular; if we are to have national game laws and every other kind of laws to regulate the affairs of the States, their morals as well as their general welfare, then let us abolish the sovereignties of these 48 different States and have all the power lodged here, all the appropriations made here, from this great big, overflowing Treasury, which can be filled at will simply by increasing the taxes upon the people.

The CHAIRMAN. The time of the gentleman from Georgia has expired.

Mr. FOWLER. Mr. Chairman, I agree with the gentleman from Georgia [Mr. BARTLETT] that this is an invasion of the rights reserved to the States. I think it is an attempt without due deliberation on the part of the House to usurp for the Federal Government the authority which I do not believe was conferred upon it by the Constitution. The rules and regulations which have been promulgated for the purpose of carrying into effect this statute so conflict with the laws of the various States that no citizen can tell whether he is bound by the laws of any State, by a license which he carries in his own pocket and for which he paid his own money, or by the proclamation issued by the Chief Executive of the Nation.

Mr. Chairman, the people of Illinois have undertaken to regulate by wise laws the killing of game birds and game animals in my State, and they have done it with that degree of certainty which, in my judgment, will afford sufficient protection for their future propagation and conservation.

Mr. Chairman, I undertook to get some information from the Department of Agriculture for the benefit of inquiring citizens of my own district and my own State, and I have gone there some two or three different times, and on each occasion a different construction has been placed upon the proclamation of the Executive; I have never had a like construction placed upon it. In other words, Mr. Chairman, I have been told that the "open season" for killing ducks and geese in my territory is the same as that prescribed by the statute of Illinois. Then I have read carefully the proclamations and the provisions prescribed for carrying into effect this Federal law, and I can not harmonize them with the instructions of the Department of Agriculture. I do not believe there is anyone in authority to-day who knows just when a duck or a goose can be killed on the Mississippi River, or the Ohio River, or in any State in the Union.

Now, Mr. Chairman, I believe in giving Congress all the authority that is provided for in the Constitution of the United States, with a liberal construction of the terms thereof; but I am bitterly opposed to the United States, through Congress, undertaking to extend its jurisdiction over those subjects which are not within the powers granted to the Federal Government by the Constitution. Why, if this law is carried into effect, it will require in the future an appropriation as big as the appropriation for the Army, or as big as the appropriation for the Navy. It is an entering wedge to a squandering of the public funds which will rise to such enormous degrees in the future that it will be appalling to the most unsuspecting citizen within the United States. [Applause.]

The provisions of this act can be enforced in the Federal courts; and anyone who knows anything about Federal courts will tell you that the people have a hard time in these courts, and are summarily dealt with, at great cost. Beware of placing common affairs in the hands of the Federal court, because it is both expensive and arbitrary.

But this is only a beginning. You will soon be confronted with a new conservation scheme. The Agricultural Department is not big enough yet, and it is ample in its powers to take care of many new subjects. The wild animals, such as the wolf, mountain lion, bears, elks, deer, antelopes, fox, raccoon, lynx, rabbit, rats, mice, moles, wildcats, opossum, mink, weasel, squirrel, gophers, and ground hog will soon need protection and conservation, and the Agricultural Department will be only too glad to undertake the momentous task. It is waiting for just such an opportunity. Some scientific chief in this department will soon make known the great necessity of protecting and conserving these useful animals. It will only take a few millions annually to do this, and as soon as the Agricultural Department gets ready to take over this work Congress will have plenty of men here who will be able to convince a majority of both Houses that it is our duty to make this sacrifice in order to perpetuate the native animals of America in abundance. Then we will have wolf wardens, rat wardens, ground-hog wardens, and a horde of wardens all of whom must be scientific men, commanding large salaries.

When we get this work under full control and have looted the Treasury of millions, then another chief in the Agriculture Department will discover that we are neglecting another very important branch of the animal kingdom exceedingly useful to man. The poisonous reptiles, such as the rattlesnake, cottonmouth, copperhead, and hissing adders will claim our attention. The lizzard, salamander, alligators, terrapin, tortoise, toads, and frogs must not become extinct, and in order to conserve them and properly protect them it will be necessary to place them under the supervision of the Agriculture Department and provide plenty of servants to go all over these States and Alaska, Porto Rico, Hawaiian Islands, and the Philippine Islands to see that the people do not harm or kill any of these harmless and useful animals. It will take only a few more millions, and what are millions when considered with the immense value these animals will prove to be to man in his struggle for a higher civilization.

But the mission of the Agriculture Department will not stop here. It would be idle to suggest even a resting spell. The fish in the lakes, seas, rivers, creeks, rivulets, and branches will demand the attention of this department. They will be destroyed entirely if present conditions are allowed to continue, and in order to properly protect and conserve them it will be necessary to create a new bureau for this important work, with a provision in the act declaring the ownership of all fish of whatever kind or character, lobsters, crabs, oysters, mussels, shrimps, and all animals that live in the water to be in the United States. This will give employment for thousands of new men, who will in the course of time become scientific men and of course the Government will not be able to keep them unless their salaries are raised to what they can command in other places; just where the places are we will never learn, but it will serve the purpose of the heads of bureaus and divisions in this department to induce such men as my colleague from Illinois to denounce every Member who opposes the scheme as being ignorant of the great progress of the country and its needs in conservation. Then we will have garfish wardens, turtle wardens, and minnow wardens; yes, but it will only take a few millions, and who would be so ignorant of the needs of our country as to oppose an appropriation of millions for such an important work.

The end has not yet come, for the capacity of the Agricultural Department has not been exhausted, and will not be as long as there is a "wild-goose chase" in sight. It will be discovered that our insects are about to become extinct, and that some scientific health doctor has lately discovered that all of the insects were created for the use of man, and that we have neglected to investigate and determine the uses to which they can be put. He will capture one of the agricultural chiefs and then the Committee on Agriculture will be informed that it is necessary to pass an act to protect and conserve the insects of the country. This committee will bring in a bill with a provision declaring the ownership of all the insects in the country to be in the United States, and in that act there will be a provision for an appropriation to systematize the work and place it on a plane with the other foolish bureaus, with a few millions to pay salaries and traveling expenses, and a big appropriation for a museum building for the collection of these insects for scientific study. Uncle Sam will then own all mosquitoes, ticks, fleas, flies, crickets, roaches, bedbugs, grasshoppers, moths, butterflies, locusts, and all worms which develop into any insects, for it will be necessary to protect the worms in order to protect and conserve the insects properly, and it will be a crime to kill any of these insects or the worms, and any violation of the law will subject the criminal to a fine not less than $500 or imprisonment in the penitentiary for a term of two years, or both, in the discretion of the Federal court. Then anyone killing a bug, flea, mosquito, or a louse will be subject to indictment in the Federal court and dealt with summarily hundreds of miles away from his home. I suppose this will be for the benefit of his family in order that they may not be present to see him handcuffed and hurried off to a Federal prison.

But this is not all. Some scientific gentleman in the Agriculture Department will discover that the wild animals are carnivorous, and that they live on the flesh of other animals and birds. Another chief, equally smart, will discover that the birds live largely on insects and little fish, and that the fish prey upon each other, and that the insects are either bloodsuckers or vegetarians, and that to properly protect all of these animals and conserve them it will require a large army of scientific men who are experts in their ability to handle these animals and to keep them from jumping on each other in deadly conflict for a meal. This will only take a few millions more, and who would hesitate to make sure of means and men sufficient to feed and train all these agencies of civilization? Then great will be the Agriculture Department. "On with the dance."

Mr. COX. Mr. Chairman——

The CHAIRMAN. Which side of the proposition is the gentleman on?

Mr. COX. I am for the motion to strike out.

Mr. FOWLER. Mr. Chairman, I desire to ask unanimous consent to extend my remarks.

The CHAIRMAN. The Chair will first recognize some one on the other side. The gentleman from Illinois [Mr. FOWLER] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. HOWARD. Mr. Chairman——

The CHAIRMAN. Which side is the gentleman on?

Mr. HOWARD. I am against striking out the section.

The CHAIRMAN. The gentleman from Georgia [Mr. HOWARD] is recognized for five minutes.

Mr. HOWARD. Mr. Chairman and gentlemen of the committee, I do not entertain the same fears with regard to the administration of this law as does my colleague [Mr. BARTLETT] or as my friend from Illinois [Mr. FOWLER]. I think this law is a good one, and I do not think it is a proposition that the States can handle.

In my lifetime I have had a great deal of experience as a sportsman to the extent that I have hunted game all my life, ever since I have been able to carry a gun.

Mr. BARTLETT. Mr. Chairman, may I interrupt the gentleman?

The CHAIRMAN. Does the gentleman yield to his colleague?

Mr. HOWARD. Certainly.

Mr. BARTLETT. Does not the State of Georgia have the most drastic laws for the protection of game?

Mr. HOWARD. Yes.

Mr. JACOWAY. The gentleman is not in favor of prescribing an open and closed season in this statute?

Mr. HOWARD. We have a provision for an open season and a closed season. In the State of Georgia we have a 90-day open season for quail.

Quail became almost extinct in the State of Georgia because the pothunters were turned loose on them. Ten years ago the woodcock was plentiful, but I do not suppose a sportsman in the Southern States, where they migrate in the wintertime, has killed a dozen in the last five years. The woodcock is one of the most valuable of game birds. It has become almost extinct.

The snipe is a migratory bird. It breeds in the north, and the old birds with their young start south in the latter part of August. They remain some time in practically every State in the Union from the Canadian border to the Everglades of Florida. Every one of those States has some law for an open season, when they turn the hunters loose on these migratory birds from the minute they start south with their young until they reach the Everglades of Florida and the southern part of Texas. If this ruthless slaughter of the migratory game birds of this country is not stopped by some legislation, these game birds will become extinct. The only way to reach the question is by Federal legislation, because the State of Georgia can not make a law relative to the killing of duck, snipe or woodcock, brant or wild geese, in the State of Tennessee. Why not? Because when the migratory birds reach Georgia they have left Tennessee for the season, and so on south.

Mr. COOPER. Will the gentleman yield?

Mr. HOWARD. Yes.

Mr. COOPER. Has not the leaving of this subject to State regulation resulted in the practical extermination of many kinds of game birds?

Mr. HOWARD. Absolutely.

Mr. BARTLETT. Does the gentleman mean to say he is in favor of a law which violates the Constitution of the United States, simply because the States do not attend to their business?

Mr. HOWARD. I do not know whether it violates the Constitution of the United States or not. I have not investigated that enough to satisfy my mind that migratory birds would not be amenable to the same principle that a migratory freight car would be in going from one State to another. Although I have the most profound respect for the legal attainments of my distinguished colleague, I am not convinced yet that this law is unconstitutional, and I shall have to study it a good deal more before I will admit that it is. It is a salutary law, a good law. It ought not to be tampered with unless you know what you are doing. Those of you who are in favor of turning the pothunters loose on the migratory game of this country, which is almost extinct to-day, will vote to strike out this appropriation. Georgia can not regulate this question. Tennessee can not regulate it.

Mr. BARTLETT. Georgia has done it.

Mr. HOWARD. You have a State law which regulates the killing of your domestic birds. It took 25 years to get that, and when that law was finally passed it was rare music to hear an occasional partridge whistle in Georgia. You very nearly let them become extinct.

Mr. BARTLETT. Georgia is full of partridge now.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. Mr. Chairman, in the first place, if I may be permitted to do so, I would like to warn Members of the House not to be frightened because they may have received a few letters from sportsmen in opposition to the enforcement of this law. It is quite natural, when the law is enforced and somebody feels hurt by it, that he should write a letter protesting against it. But the great mass of the American people are in favor of this legislation, which undertakes to preserve the migratory birds of our country. [Applause.]

Nor am I at all frightened by my genial friend from Georgia [Mr. BARTLETT] on the constitutional question. The law is upon the statute book, and this proposition is to give the money for its enforcement. If the law be not constitutional, the quickest way to find it out is to endeavor to enforce it; and if it be constitutional, then it ought to be enforced. In this country we have seen the great mass of the birds disappear entirely. Everyone at all familiar with country life and bird life has been shocked by the disappearance of the birds—both those that sportsmen seek and those that render great service to the farmers and gardeners of the country by destroying insects and weed seeds. This bill contains many appropriations to enable the Department of Agriculture to carry on its warfare against insect pests. Let gentlemen remember that as the birds decrease, these insect pests increase.

No one except the National Government can control this situation. It is beyond the power of the States. The States in the South can not control the States where the birds breed, and the States where the birds reproduce can not prevent their slaughter in the States where they winter. It requires national legislation, universal legislation, for this action to be taken, and it is not within the power of the State of Georgia to protect itself from unwise legislation in Minnesota or Illinois, nor is it possible for Minnesota and Illinois to protect themselves against unwise legislation in some other State.

Mr. BARTLETT. May I ask the gentleman a question?

Mr. MANN. A very brief one.

Mr. BARTLETT. Does the gentleman assume that we have a right under the commerce clause of the Constitution to enact this law; and if not, under what clause?

Mr. MANN. Mr. Chairman, we discussed that question for several terms of Congress. I supported the Weeks bill, voted for it, and did what I could to help to put it upon the statute book; and I have just as much deference for the Constitution as the gentleman from Georgia has. [Applause.]

Mr. BARTLETT. I do not doubt that. I never did question that.

Mr. MANN. I understand that is an answer to the gentleman's question.

Mr. BARTLETT. The gentleman has not told me under what clause of the Constitution.

Mr. MANN. I am sorry the gentleman determines to take up my time with a question which is not relevant to this discussion.

Mr. BARTLETT. I thought I had the gentleman's permission to ask him a question.

Mr. MANN. I understand. I never quarrel with my genial friend from Georgia. No one else will do it; will we do it? Will we make the effort to protect the birds of the country both in the interest of the farmer and in the interest of the food supply? Having passed a law on the subject to furnish the necessary protection, will we refuse to permit the Department of Agriculture to enforce the law? That is the question.

Mr. LEVER. Mr. Chairman, this is a proposition to provide money for the purpose of enforcing a Federal statute.

Mr. WILSON of Florida. Will the gentleman yield for just one question?

Mr. LEVER. Yes.

Mr. WILSON of Florida. Just how is this statute to be enforced? What provisions were made for the enforcement in the several States?

Mr. LEVER. I will say to the gentleman from Florida that the law carried an appropriation of $10,000. Of course $10,000 would amount to nothing, so far as the purposes of the statute went, except to make a skeleton organization. The plan of the Department of Agriculture is, as we get it from the testimony of the witnesses, that game wardens will be appointed and that they will cooperate with the State game wardens.

Mr. GARNER. These game wardens are appointed in the District of Columbia and hold their offices in the Department of Agriculture?

Mr. LEVER. I hope the gentleman from Texas and other gentlemen on the floor of the House will realize that the seat of the Federal Government is Washington, and when you organize a force you must have people in Washington to do the work. I hope the gentleman will not make that frivolous complaint against the department any more.

Mr. BARTON. Will the gentleman yield?

Mr. LEVER. Yes.

Mr. BARTON. How many wardens will be appointed throughout the United States?

Mr. LEVER. The testimony before the committee is that we shall be able to spend about $1,000 in each of the several States of the Union in the enforcement of the law. The time may come, and I think will come, when the Federal Government will have to employ one game warden in each State; but the committee did not think, inasmuch as this was new work and the organization had not been completed, that it was profitable or wise to give them as much money as they wanted in the first instance.

Mr. HILL. Will the gentleman yield?

Mr. LEVER. Yes.

Mr. HILL. I would like to ask the gentleman if these game wardens are to be appointed under the civil service?

Mr. LEVER. They will be appointed under the civil service.

Mr. WILSON of Florida. I would like to say to the gentleman, in view of what he has just said about the department, that I did not mean to criticize the department or the committee in the inquiry that I propounded.

Mr. LEVER. Oh, no; I understood the gentleman's position quite well.

Mr. CALLAWAY. Will the gentleman yield?

Mr. LEVER. I will.

Mr. CALLAWAY. You are appropriating $50,000 to enforce this statute. Do you appropriate money for Federal officers to enforce each and every one of these statutes of the United States?

Mr. LEVER. I take it that every such statute requires an expenditure of money to provide for its proper enforcement, and we appropriate it.

Mr. CALLAWAY. Do not the Federal officials throughout the country look to the enforcement of these laws?

Mr. LEVER. This law will be enforced just as the meat-inspection law, where we have 2,400 meat inspectors, and just as the Lacey law is enforced.

Mr. CALLAWAY. Then each of these individuals, as Federal officials throughout the country, look out for the specific statute only that he is designated to enforce?

Mr. LEVER. Of course, and that is not unusual. You are a Member of Congress, and your business is to look out for your constituents. You are not down there in Texas killing boll weevils. [Laughter.] We either ought to do the manly thing in this matter—repeal the law outright or make the appropriation to enforce it. [Applause.] The Committee on Agriculture does not believe in the process of repealing laws by the process of starvation. [Applause.]

The CHAIRMAN. The question is on the motion of the gentleman from Georgia [Mr. BARTLETT] to strike out the paragraph.

The question was taken; and on a division (demanded by Mr. BROCKSON) there were 31 ayes and 50 noes.

So the motion was not agreed to.

Mr. RUBEY. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 52, line 2, strike out the figures "$50,000" and insert "$10,000."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri.

The question was taken; and on a division (demanded by Mr. RUBEY) there were 24 ayes and 47 noes.

So the amendment was rejected.

Mr. BARTLETT. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 52, at the end of line 2, insert the following: *"Provided,* That after July 1, 1914, said act is hereby repealed."

Mr. LEVER and Mr. MANN made a point of order.

The CHAIRMAN. The point of order is sustained, and the Clerk will read.

Mr. BARTLETT. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. BARTLETT. Did the Chair sustain the point of order?

The CHAIRMAN. The Chair did.

Mr. BARTLETT. Has the Chair forgotten the Holman rule?

The CHAIRMAN. The Chair did not read the gentleman's amendment, but he heard it read, and it was intended to repeal an existing statute.

Mr. BARTLETT. It was to repeal the act, and that would reduce expenses.

The CHAIRMAN. The point of order was sustained.

The Clerk, proceeding with the reading of the bill, read the item for "Salaries, Division of Publications," beginning on page 52 and ending line 23, page 53.

Mr. COLLIER. Mr. Chairman, I move to strike out the last word. I do it in order to ask unanimous consent to insert a newspaper account of an experiment made by one of my constituents in the eradication, or attempted eradication, of the boll weevil.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The article is as follows:

COTTON DESPITE WEEVIL—MISSISSIPPIAN HAS PLAN TO FIGHT DESTROYER OF CROP.

YAZOO CITY, MISS., *February 18.*

G. M. Manor, a merchant and planter of Anding, a few miles south of Yazoo City, has made a discovery that enabled him during the last season to make a splendid crop of cotton in probably the worst infested boll-weevil section of the county. Mr. Manor feels so good over the success of his plan that he wants everyone else to know of it, in the hope that the damage by reason of the weevil infestation may be reduced to a minimum.

Mr. Manor's plan was to attach to all the plows, as soon as the cotton is ready to work, a gunny sack or other heavy cloth saturated with the following mixture: Lubricating oil, 1 gallon; moth balls, 1 pound; boil together and add 1 pint of tar; and mix with 5 gallons of coal oil.

The sacks are saturated with this mixture and attached to the singletrees, and as the plowing is done the sacks drag automatically over the plants. The fumes of the mixture are very obnoxious to the weevils, and as the fumes stay on the plants a long time, the pest will not attack the plants. As the crop is plowed frequently the fumes stay on the plants from one plowing to the next, so that the plants are thus made immune from the ravages of the pest.

As evidence of the success of the plan, Mr. Manor made 47 bales of cotton the last season with 4 families, while a neighbor, who relied wholly on the Government cultural methods of picking and burning the squares, made only 23 bales with 14 families and 3 wagon hands.

Mr. Manor would have gotten a great deal more cotton than he did but for the heavy rains in September and October, which rotted a great many bolls in the field. He thinks it conservative to say that the entire crop averaged at least a half bale to the acre, which is a good average under normal conditions.

Mr. Manor also takes the precaution not to use any cotton seed that has been raised on the place the previous year. His idea is that some weevils hibernate in the old seed and in this way some of them are kept alive and perpetuated in the new crop. By buying new seed from some section where the boll weevils do not exist he thinks the damages of the weevils are reduced considerably.

The Clerk read as follows:

Bureau of agricultural forecasts.

Mr. MANN. Mr. Chairman, I reserve the point of order on the paragraph. I do not know whether a paragraph which is a mere heading could be subject to a point of order or whether it has any place in the bill. The purpose of this is to change the name of the Bureau of Statistics to the bureau of agricultural forecasts. Are not the members of the committee afraid that that will be a confusing name? The public for years have been using the word "forecasts" in connection with the Weather Service, and in this bill forecasters in the Weather Service are provided for. You provide in this Agricultural bill for a forecaster. He is in the Weather Service, but agricultural forecasts is in another bureau of the Government. That seems to me confusing. Is there not any title that can be taken without taking one that is already preempted? I suppose the very reason that some one suggested "agricultural forecasts" in reference to crops and statistics was because we have become accustomed to using the term in reference to the weather as indicating the probabilities, the belief that what was predicated might come true.

Mr. LEVER. Mr. Chairman, if the gentleman will yield, I will say to him that the department desired this change, and the committee, after listening to their statements and after giving careful consideration to the matter, agreed that the words "agricultural forecasts" more nearly and accurately describe the character of the work being done than do the words "Agricultural Statistics," as now used.

Mr. MANN. I quite agree with that statement.

Mr. LEVER. My friend, of course, understands that the Agricultural Bureau of Statistics in the past has never undertaken to say absolutely accurately what a crop was. The best they have been able to do was to estimate within a reasonable

certainty what a crop was to be. Of course, it is an estimate more than a guess, and it is an estimate based on facts.

Mr. MANN. Of course it is an estimate after it has been made. But here is a bill that carries, for instance, forecasters in one item of the bill, and then it carries another item for the bureau of agricultural forecasts. They do not have forecasters in the bureau of agricultural forecasts, but they have forecasters in the Weather Bureau. Of course, they are trying to steal the name—perhaps I ought not to say that, but take the name—that we have become used to in connection with the Weather Bureau. It seems to me that this will be very confusing. I think it is a perfectly proper thing to change it from the Bureau of Statistics, but I should think they would have originality enough in the Agriculture Department—and they have shown lots of it in other directions—to find two names without taking the same name for two different purposes.

Mr. LEVER. Mr. Chairman, I will say to the gentleman from Illinois that I think the use of these words very clearly describes the character of work that the Bureau of Statistics of the Agriculture Department has been doing and will continue to do. I want to say, in that connection, that I have a great deal of complaint from many of my friends in South Carolina because the people down there, on account of the fact that the bureau heretofore has been called the Bureau of Statistics, have the idea that it is a bureau doing work along the line being done by the Census Bureau, and that when the bureau makes a statement it is supposed to be an absolutely accurate statement in accordance with the census plan.

Mr. MANN. And yet only recently we changed the name "Bureau of Labor" and put it into the Department of Labor under the title of "Bureau of Labor Statistics," and it has nothing whatever to do with gathering statistics as the Census Bureau does. It is a bureau not to forecast, but to make scientific investigations.

Mr. LEVER. I really do not know what the character of its work is.

Mr. MANN. Mr. Chairman, would it not be a good idea to change this name to the bureau of agricultural estimates? That is really what it amounts to.

Mr. LEVER. I do not think there would be a very great deal of objection to that, but for the present I prefer this language to stand.

Mr. MADDEN. That would come more nearly expressing the work done.

Mr. LEVER. Yes; but my friend from Nebraska suggests that somebody might think it was a bureau for the preparation of estimates to be submitted to Congress.

Mr. MADDEN. Make it agricultural estimates or crop estimates.

Mr. MANN. There was practically no meaning to the word "forecast" in connection with this kind of work until the Weather Bureau gave it a meaning. The Weather Bureau having given it a meaning, these people now want it to apply to something else.

Mr. LEVER. I will say very frankly to the gentleman from Illinois [Mr. MADDEN], looking at this matter hurriedly, that I do not see very much objection to his suggestion.

Mr. MADDEN. That would distinguish it from the Weather Bureau of Forecasts.

Mr. LEVER. What would the other gentleman from Illinois think about that suggestion?

Mr. MADDEN. Make it the bureau of agricultural crop estimates.

Mr. MANN. That would be all right.

Mr. MADDEN. Make it the bureau of crop estimates and leave out the word "agriculture."

Mr. MANN. Why put in "agriculture"?

Mr. LEVER. I would suggest that it might be better to make it read "The bureau of crop estimates."

Mr. MADDEN. That is really descriptive of what it is.

Mr. LEVER. Let me ask my friend from Iowa if that meets his wishes.

Mr. HAUGEN. The object sought is simply to call the bureau by a proper descriptive name, and whatever term will express it is all right.

Mr. LEVER. Mr. Chairman, if the gentleman will permit me, I move to amend——

Mr. MANN. Mr. Chairman, I withdraw the point of order.

Mr. FOWLER. Mr. Chairman, I reserve the point of order.

The CHAIRMAN. The other gentleman from Illinois reserves the point of order.

Mr. LEVER. I desire to offer an amendment so as to make the language which now reads "bureau of agricultural forecasts" read "bureau of crop estimates."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 54, line 18, strike out the words "agricultural forecasts" and insert in lieu thereof the words "crop estimates."

Mr. FOWLER. Mr. Chairman, I desire to ask the chairman of the committee if the province of this bureau is to collect statistics and to make crop estimates, so that the farming people of the country may have a forecast of what the crops are going to be at maturity? Is that the object of this bureau?

Mr. LEVER. That is the object.

Mr. FOWLER. Then why not call it the bureau of crop forecasts, because that is what it really means?

Mr. LEVER. We called it in the first instance the bureau of agricultural forecasts, but it did not meet the approval of the gentleman from Illinois, and I can see some reason for his line of objection.

Mr. FOWLER. Because we have that same work done under the Weather Bureau?

Mr. LEVER. Exactly. I will say to my friend, if he will permit me, that if it needs to be changed I will see that it is changed in the Senate, because I do not want to commit myself absolutely to that language.

Mr. FOWLER. There is but little difference between the word "forecasts" and "crop estimates," that is true; but there is a difference, truly, because the information which is collected throughout the United States on what the crop will probably be is for the purpose of forecasting what will be ultimately the whole crop in the country in advance of its maturity. However, I do not desire to quibble upon the character of words that are used, because they practically mean the same thing.

Mr. LEVER. Exactly.

Mr. FOWLER. I withdraw the point of order.

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Carolina.

The question was taken and the amendment was agreed to.

The Clerk read as follows:

Salaries, Bureau of Agricultural Forecasts.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that the words "Agricultural Forecasts," in line 19, be stricken from the bill and to insert in lieu thereof the words "Crop Estimates."

The CHAIRMAN. Without objection, it will be so ordered.

There was no objection.

The Clerk read as follows:

General expenses, Bureau of Agricultural Forecasts.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that the words "Agricultural Forecasts" may be stricken from the bill and that there be inserted in lieu thereof the words "Crop Estimates."

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

The Clerk read as follows:

For all necessary expenses for collecting, compiling, abstracting, analyzing, summarizing, and interpreting data relating to agricultural industries; for making and publishing periodically crop and live-stock forecasts and estimates, including acreage, yield, and value of farm products, as follows:

Mr. HAWLEY. Mr. Chairman, in order to make this conform with the action taken, I move that, on page 55, line 9, the words "forecasts and" be stricken out.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 55, line 9, strike out the words "forecasts and," so that the line will read "crop and live stock estimates."

Mr. HAWLEY. I think that is all right. I see no objection to it.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Salaries, travel, and other necessary expenses of employees out of the city of Washington engaged in field investigations, $135,200.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word. In last year's appropriation act the committee segregated this item by dividing it up into salaries and traveling expenses for special field agents and those for State statistical agents. I have read the report of the chairman of the committee, and I wish to compliment him for the very extensive and complete report that he has submitted, well worthy of the emulation of the chairman of any committee; but I do not obtain from it the reason for combining these two items of service. As a believer in the principle of segregation, so that the Congress may follow out the amount expended for the various kinds of service, I can not understand why they should not have been continued separate.

Mr. LEVER. I will be glad to give the gentleman that information. It appeared to the committee, after hearing the

officials of the department, that it would be well to make this division so as to carry the expenditures out of the city of Washington in one item and the expenditures in the city of Washington in another item, for this reason: It is the purpose of the Department of Agriculture to endeavor to increase very greatly the efficiency of the Bureau of Statistics.

Mr. STAFFORD. If the gentleman will permit me, he does not grasp my criticism. My criticism is directed to the two items outside of the departmental service here. In last year's appropriation bill you had two separate items for field service, one for which $68,000 was appropriated, and one for special State statistical agents, for which $32,000 was appropriated, both expenditures being made outside of the city of Washington.

Mr. LEVER. I wish to say to the gentleman that the first item to which he calls attention, an item carrying a total of $68,900, was carried for the purpose of paying the salaries of the departmental officials of the bureau simply, and I will give the gentleman the distinction in a moment.

Mr. STAFFORD. I am acquainted with the services.

Mr. LEVER. And the other item carried an appropriation of $32,200 for the purpose of paying the State agents, who, of course, were reporting to the Department of Agriculture these various crop conditions. Now, then, it is the purpose of the Department of Agriculture to increase very greatly its State force. In other words, they want to build up a strong State system of reporting. In my State, I happen to know, they are paying a man $300 or $400 as a State agent. He is a railroad engineer, and, of course, can give no special attention to his duties, and must be dependent entirely upon a few of his friends scattered here and there about the country, who write to him and tell him the condition of the growing crop and what their judgment is as to the final results. Now, instead of having a system that is carried on in that way and depending almost entirely on a dozen or more Federal special agents, it is the plan of the department by this increase and by this line of segregation to put into each State a good, strong, capable, live man, who will be in charge of the work and who will devote all of his time to it, and this increase will enable the department to pay a salary that will provide such a man.

Mr. STAFFORD. Now, if that is the purpose, why can not the gentleman continue the phraseology in the second item of last year's bill, namely, "Salaries and traveling and other necessary expenses of said statistical agents," and retain the other provision as to the special agents sent out from the department, so as to give the committee control of the amount of expenditure in the respective services?

Mr. LEVER. I may say to my friend, it may have been all right to have used that language, but the information we had was that the department wanted to get this bureau, along with other bureaus, absolutely upon a project basis, and to do so they submitted this method to the committee for its consideration.

The CHAIRMAN. The time of the gentleman from Wisconsin [Mr. STAFFORD] has expired.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent for two minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. STAFFORD. The committee can understand that the merger of these two items has nothing whatsoever to do with the project basis, but it is merely an instance of where the committee is surrendering control over the respective expenditures.

Mr. LEVER. The gentleman would not absolutely contradict me on a statement like that in that tone of voice?

Mr. STAFFORD. I do not intend to be in any way severe in my expression at all.

Mr. LEVER. I was giving the statement of the department and not my own statement about it.

Mr. STAFFORD. If I had not looked over the report and the estimates, I would not be so positive in my statement, but I still maintain, with all due deference to the genial chairman of the committee, that by consolidating these two items you are surrendering control as to the amount of expenditure for the respective services, and by so doing you are accommodating, naturally, the department, because they will have that much further latitude in the expenditure of the larger appropriation.

Mr. LEVER. I will say to my friend very frankly I do not believe that is the case. It is not the judgment of myself or of the members of the committee.

Mr. STAFFORD. Having used phraseology that bore upon the sensibilities of the chairman a little harshly, in saying that it was not violative of the principles of the project system, will the gentleman kindly explain wherein it is in accordance with the project idea?

Mr. LEVER. I will say to the gentleman, here is the language used by the department in submitting its estimate:

The three special appropriations above have also been combined in order to simplify bookkeeping, the handling of accounts, and to bring together the expenses of the field force in one item.

I will say that is all I know about it.

Mr. STAFFORD. And I will reply to the gentleman that that is the old thread-worn argument advanced by Government officials when they wish to be relieved of the scrutiny to which the expenditure of separate items in the appropriation bills is subjected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Total for Bureau of Crop Estimates, $274,180.

Mr. BALTZ. Mr. Chairman——

Mr. LEVER. If my friend from Illinois will permit me a moment, Mr. Chairman, I desire to offer the same amendment that has already been offered.

Mr. MANN. That has been done before.

Mr. MANAHAN. Mr. Chairman——

The CHAIRMAN. The gentleman from Illinois [Mr. BALTZ] is recognized.

Mr. BALTZ. Mr. Chairman, if the gentleman will permit me but for a moment, I want to say that as an actual farmer I am very much interested in this bill. How does the Department of Agriculture get the estimates throughout the United States upon the crops of this country?

Mr. LEVER. The present method of reporting involves about five or six different sources of information, upon which the department relies for its final judgment. As I recall it, they have township correspondents and county correspondents and State correspondents. Then they have correspondents such as, in the case of cotton, the cotton-compress men and the fertilizer men and such other men as are intimately acquainted with the cotton situation. Then each State has a State statistical agent, who has under him a number of people reporting to him directly from time to time, and he in turn makes his report to Washington.

Then, in addition to that, the department has a number of special agents who travel over a given territory. Of course they are experts, well acquainted with the situation. They in turn report to the department. Now, then, when all this information is gathered, and when the final estimate is to be made, some of these special agents are called here to Washington, and they constitute the crop-reporting board. This information that has been gathered is kept in the safe of the Secretary of Agriculture. It comes here in a specially prepared envelope. It is not touched by anyone, not even the Secretary of Agriculture, until the day when the crop reporting board looks over all the figures. Then the Secretary turns this testimony, as you might call it, or these facts, over to the crop reporting board. The window blinds are drawn, the telephone is disconnected, and the door is locked, and then the estimate is made.

Mr. BALTZ. This is a good deal of guesswork, is it not? The estimates are very inaccurate?

Mr. LEVER. I will say frankly that I do not think it is guesswork. There was an investigation with reference to the estimates on cotton some three or four years ago, and in that investiagtion it was shown that they had underestimated the crop slightly five times, had overestimated it slightly five times, but they were out of line with the actual commercial crop, as shown later, on an average of only about 2 per cent. I think that was pretty good estimating.

The CHAIRMAN. The time of the gentleman from Illinois [Mr. BALTZ] has expired.

[Mr. MANAHAN addressed the committee. See Appendix.]

The Clerk read as follows:

Salaries, Library, Department of Agriculture: One librarian, $2,000; one assistant librarian, $1,600; one clerk, class 2, $1,400; four clerks, class 1; three clerks, at $1,080 each; six clerks, at $1,000 each; five clerks, at $900 each; one clerk, $840; one junior library assistant, or messenger, $720; three junior library assistants, or messenger boys, at $600 each; one messenger, messenger boy, or laborer, $480; one charwoman, $480; in all, $27,860.

Mr. FOWLER. Mr. Chairman, I reserve a point of order against the paragraph. I desire to ask the chairman of the committee how many new places are carried in this provision.

Mr. LEVER. No new places carried at all. There is an apparent increase of $840 due to one transfer from the lump sum, which fund is reduced. The actual increase of $240 is indicated in the following table. I am reading from the estimates. There are three clerks at $1,080 each in lieu of three cataloguers at $1,000 each, an increase of $80 each in salary.

Mr. FOWLER. I compared the bill with the last appropriation act, and if I made no mistake you have an assistant librarian, new, at $1,600, provided for in line 23.

Mr. LEVER. That is a change only in title. One clerk of class 3 has been changed so as to make one assistant librarian at $1,600.

Mr. FOWLER. Was that done for the purpose of dignifying the place in order to have an excuse to increase the salary in the future?

Mr. LEVER. No; I will say frankly to the gentleman that we did not take any testimony on this matter.

Mr. FOWLER. Is it the intention later to push up the salary until you get it raised to $4,000 or $5,000?

Mr. LEVER. No. I will say that this item for the Department of Agriculture has been standing in practically the same language for many years.

Mr. FOWLER. There has not been much increase since I have been here, I know. In line 24, page 55, you appropriate for four clerks instead of two. The last bill carried an appropriation for two clerks of class 1. This bill carries a provision for four clerks of class 1.

Mr. LEVER. The old language is changed from "two clerks of class 1" and "two cataloguers." It is a change of title. As a matter of fact, we have classified them and called them clerks instead of cataloguers and translators.

Mr. FOWLER. Now there are three clerks at $1,080.

Mr. LEVER. Those are the clerks that I have already explained. They have been carried at $1,000, and we have permitted an increase of $80 each.

Mr. FOWLER. What was the reason of this increase of salary?

Mr. LEVER. As I stated to the gentleman, we took no testimony, but the Committee on Agriculture has always felt that it was a pretty hard matter for a poor clerk to live on a salary of $1,000, and if a small increase of $50 or $100 was recommended by their superiors we ought to give it to them.

Mr. FOWLER. I am not going to object to it, for it is a small salary. If it were one of the higher salaries, I should object to it, as a provision in the last appropriation bill fixed the salaries for the future the same as was carried in that bill.

Now, on page 56, there appears to be three junior library assistants or messenger boys. Is that new?

Mr. LEVER. That is a change of title. They are not new at all.

Mr. FOWLER. Mr. Chairman, I withdraw the point of order.

Mr. FOSTER. Mr. Chairman, I want to ask one question about the next paragraph, and that is in reference to the official traveling expenses for the library force.

Mr. LEVER. I will say to the gentleman from Illinois that the language of this item has been carried in the bill ever since I have been a member of the committee. If they incur any very great expense for travel, I do not know anything about it.

Mr. MANN. The next item carries official traveling expenses.

Mr. FOSTER. That is what I was inquiring about. That paragraph has not yet been read.

Mr. MANN. Sometimes they are required to go out of the city.

Mr. LEVER. They would not expend very much for traveling expenses.

Mr. MANN. No.

Mr. FOSTER. I was unable to understand why they would need official traveling expenses.

Mr. MANN. Just like Members of Congress. They may have to be sent somewhere outside of the city.

Mr. LEVER. Suppose there is a convention of librarians, say, in Chicago. I think the Librarian of the Agricultural Department should be sent there as a matter of information.

Mr. FOSTER. But this is not a general library.

Mr. LEVER. It is the finest agricultural library in the United States, and probably in the world.

Mr. MANN. In the world.

Mr. FOSTER. That might be true, but still I do not understand the item for official traveling expenses.

Mr. LEVER. Mr. Chairman, I have the information that the gentleman is seeking. Traveling, station, and field expenses for 1913, $29.52. I suspect that the illustration I made a moment ago of sending the librarian to some convention of librarians for the purpose of getting information for the public service accounted for that, in all likelihood. I do not know just how it was expended.

Mr. MURDOCK. Mr. Chairman, will the gentleman explain what a junior assistant librarian is?

Mr. LEVER. I take it that that term is used for the purpose of distinguishing him from the full-grown librarian. He is called a junior librarian or messenger.

Mr. MURDOCK. Yes.

Mr. LEVER. I take it that this person does messenger service and is very likely a young boy who is studying to become a librarian.

Mr. MANN. Mr. Chairman, I would suggest to the gentleman in charge of the bill that, as a matter of uniformity, he ought to strike out the figures "$1,400," in line 24, page 55, where it reads:

One clerk of class two, $1,400.

Mr. LEVER. Yes; that is a good suggestion, and I will accept such an amendment.

Mr. MANN. Then I offer that amendment, Mr. Chairman.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 55, line 24, after the word "two," strike out the figures "$1,400."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

RENT IN THE DISTRICT OF COLUMBIA.

Rent of buildings, Department of Agriculture: For rent of buildings and parts of buildings in the District of Columbia for use of the various bureaus, divisions, and offices of the Department of Agriculture, namely:

For Bureau of Animal Industry, $2,220;
For Bureau of Plant Industry, $26,420;
For Forest Service, $25,075;
For Bureau of Chemistry, $17,320;
For Bureau of Soils, $306;
For Division of Publications, $5,000;
For Office of Solicitor, $2,160;
For Office of Experiment Stations, $5,000;
For Office of Public Roads, $3,500;
For additional rent in cases of emergency for any bureau, division, or office of the department, $21,328;
In all, $108,329.

Mr. ANDERSON. Mr. Chairman, I move to strike out the last word. I have looked very carefully through the hearings of the committee and through the report of the chairman and I do not find anything about these particular rent items.

Mr. LEVER. Mr. Chairman, I will say to the gentleman from Minnesota that the chairman of the committee appointed a subcommittee to look into the whole question of rents, and the chairman of that subcommittee is the gentleman from Arkansas [Mr. JACOWAY]. I think that he will be able to give a full explanation. The reason there is no reference to it in the report is that he had not completed his information at the time the report was written.

Mr. ANDERSON. Mr. Chairman, I think the whole House ought to have this information from the chairman of the subcommittee, and I suggest to the gentleman from South Carolina that it is now almost half past 5 o'clock.

Mr. HAUGEN. I suggest that the gentleman make his report, in order that it might be printed in the RECORD and that we might read it in the morning.

Mr. JACOWAY. It will not take more than a few minutes to inform the committee of the investigation.

Mr. MANN. I agree with the gentleman from Minnesota that it is time to rise.

Mr. LEVER. Mr. Chairman, I am ready to rise at this time. I suggest that the gentleman from Arkansas ask unanimous consent to print in the RECORD his report in respect to this rent proposition.

Mr. MANN. I have no objection to his printing it in the RECORD, but that will not satisfy me. I read the RECORD a great deal, but I never have been foolish enough to read fine print in the RECORD.

Mr. HAUGEN. Mr. Chairman, I think this matter is very important. We are paying here more than $100,000 for rent, and I think it is due the House that we should have this information, and I believe the gentleman should be given unanimous consent that he may print it in the RECORD.

Mr. FOSTER. Oh, no; that could not be printed in the RECORD.

Mr. MURDOCK. Why not?

The CHAIRMAN. No proposition has yet been submitted asking for unanimous consent.

Mr. MANN. Mr. Chairman, I ask unanimous consent that the gentleman from Arkansas have leave to extend his remarks in the RECORD and print whatever he wants on this subject.

Mr. JACOWAY. Mr. Chairman, I will state this: The explanation I would make——

Mr. MANN. We will hear that in the morning, too.

The CHAIRMAN. The Chair will state the proposition. The gentleman from Illinois asks unanimous consent that the gentleman from Arkansas be permitted to extend his remarks

in the RECORD by inserting certain data in connection with the item of rent.

Mr. JACOWAY. Mr. Chairman, I will request the gentleman from Illinois to withdraw that, for the reason that what explanation I have will be more valuable to the House to come in as a whole than by piecemeal.

A MEMBER. Regular order!

Mr. FOSTER. I object to it to-night.

Mr. MANN. Mr. Chairman, I withdraw the request.

Mr. FOSTER. Mr. Chairman, the gentleman from Illinois, my colleague, withdraws his request, and I withdraw my objection.

The CHAIRMAN. Without objection, the pro forma amendment will be considered as withdrawn.

Mr. LEVER. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. HAMLIN, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 13679, the Agricultural appropriation bill, and had directed him to report that it had come to no resolution thereon.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. SHERWOOD, for one week, on account of the funeral of his wife.

To Mr. BAILEY, for one week, on account of important business.

ADJOURNMENT.

Mr. LEVER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 28 minutes p. m.) the House adjourned to meet to-morrow, Saturday, March 14, 1914, at 12 o'clock noon.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. PADGETT, from the Committee on Naval Affairs, to which was referred the bill (S. 4247) to increase the efficiency of the United States Navy by the appointment of six vice admirals, reported the same with amendment, accompanied by a report (No. 377), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. FERRIS, from the Committee on the Public Lands, to which was referred the bill (H. R. 5890) for the relief of settlers within the limits of the grant to the New Orleans, Baton Rouge & Vicksburg Railroad Co., reported the same with amendment, accompanied by a report (No. 378), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. GRAHAM of Illinois, from the Committee on the Public Lands, to which was referred the bill (S. 2563) for the relief of Rebecca C. Pepper, reported the same without amendment, accompanied by a report (No. 379), which said bill and report were referred to the Private Calendar.

Mr. RAKER, from the Committee on the Public Lands, to which was referred the bill (H. R. 1517) for the relief of George W. Cary, reported the same with amendment, accompanied by a report (No. 380), which said bill and report were referred to the Private Calendar.

Mr. METZ, from the Committee on Claims, to which was referred the bill (H. R. 11040) to carry out the findings of the Court of Claims in the case of James Harvey Dennis, reported the same without amendment, accompanied by a report (No. 381), which said bill and report were referred to the Private Calendar.

Mr. STEPHENS of Mississippi, from the Committee on Claims, to which was referred the bill (H. R. 9092) for the relief of Ellis P. Garton, administrator of the estate of H. B. Garton, deceased, reported the same without amendment, accompanied by a report (No. 382), which said bill and report were referred to the Private Calendar.

Mr. McCLELLAN, from the Committee on Claims, to which was referred the bill (H. R. 1781) providing for the refund of certain duties incorrectly collected on wild-celery seed, reported the same without amendment, accompanied by a report (No. 383), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 10205) for the relief of the estate of William H. Willis, reported the same with amendment, accompanied by a report (No. 384), which said bill and report were referred to the Private Calendar.

## CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 2041) granting a pension to Edward Wilson; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 3509) granting an increase of pension to Cash Kelley; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 13450) granting a pension to Katherine M. Reichherzer; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. DENT: A bill (H. R. 14582) to amend an act to establish a uniform system of bankruptcy; to the Committee on the Judiciary.

By Mr. DEITRICK: A bill (H. R. 14583) providing for the payment of pensions monthly by means of the annual issue of 12 coupons; to the Committee on Invalid Pensions.

By Mr. FARR: A bill (H. R. 14584) providing for the appointment of a commission for the purpose of selecting a suitable site for a naval armor plant at or near Scranton, Pa., and submitting an estimate of the cost thereof; to the Committee on Naval Affairs.

By Mr. ALEXANDER: A bill (H. R. 14585) to amend sections 4888 and 4889 of the Revised Statutes relating to patents; to the Committee on Patents.

By Mr. FRENCH: A bill (H. R. 14586) to authorize the Secretary of the Interior to cancel and set aside segregations of public lands under the Carey Act, and to regulate the same; to the Committee on Irrigation of Arid Lands.

By Mr. PARK: Joint resolution (H. J. Res. 228) authorizing the President to acquire Mexican territory; to the Committee on Foreign Affairs.

By Mr. ASHBROOK: Resolution (H. Res. 440) to provide for the appointment of three additional policemen for the House Office Building; to the Committee on Accounts.

Also, resolution (H. Res. 441) to provide for the appointment of two additional elevator conductors for the House Office Building; to the Committee on Accounts.

By Mr. MITCHELL: Memorial from the General Court of the Commonwealth of Massachusetts, favoring House bill 5139, for the retirement of certain civil-service employees; to the Committee on Reform in the Civil Service.

Also, memorial adopted by the General Court of the Commonwealth of Massachusetts relative to the frigate *Constitution;* to the Committee on Naval Affairs.

Also, memorial adopted by the General Court of the Commonwealth of Massachusetts relative to certain payments by the United States Government in aid of the Massachusetts Nautical School; to the Committee on Appropriations.

By Mr. GARDNER: Memorial adopted by the General Court of the Commonwealth of Massachusetts, relative to the frigate *Constitution;* to the Committee on Naval Affairs.

Also, memorial adopted by the General Court of the Commonwealth of Massachusetts, relative to certain payments by the United States Government in aid of the Massachusetts Nautical School; to the Committee on Appropriations.

By Mr. THACHER: Memorial of the Legislature of the State of Massachusetts, praying the payment of $25,000 to the Commonwealth of Massachusetts for each of the years 1911 to 1914, both inclusive, as per act of Congress approved March 4, 1911, entitled "An act for marine schools and other purposes"; to the Committee on Appropriations.

Also, memorial of the Legislature of Massachusetts, requesting Congress and the Secretary of the Navy to take such steps as

may be necessary to make Boston the permanent resting place of the frigate *Constitution;* to the Committee on Naval Affairs.

By Mr. PETERS of Massachusetts: Memorial of the Legislature of the State of Massachusetts, praying the payment of $25,000 to the Commonwealth of Massachusetts for each of the years 1911 to 1914, both inclusive, as per act of Congress approved March 4, 1911, entitled "An act for marine schools, and other purposes"; to the Committee on Appropriations.

Also, memorial of the Legislature of the State of Massachusetts, requesting Congress and the Secretary of the Navy to take such steps as may be necessary to make Boston the permanent resting place of the frigate *Constitution;* to the Committee on Naval Affairs.

## PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ADAIR: A bill (H. R. 14587) granting an increase of pension to James K. Barkalow; to the Committee on Invalid Pensions.

By Mr. ALEXANDER: A bill (H. R. 14588) granting a pension to George W. Drake; to the Committee on Invalid Pensions.

By Mr. BOWDLE: A bill (H. R. 14589) for the relief of Wesley S. Crane; to the Committee on Military Affairs.

By Mr. BROWN of West Virginia: A bill (H. R. 14590) granting an increase of pension to Frederick M. Halbritter; to the Committee on Invalid Pensions.

Also, petition of the Financial Chronicle Chapel, of Typographical Union No. 6, and of New York Typographical Union, No. 6, favoring Bartlett-Bacon anti-injunction bill; to the Committee on the Judiciary.

By Mr. WOODRUFF: Petitions of sundry citizens of Bay County, Mich., protesting against national prohibition; to the Committee on the Judiciary.

## HOUSE OF REPRESENTATIVES.

### SATURDAY, *March 14, 1914.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Thou Great Spirit, whose laws environ us, whose touch inspires us, whose love is reflected in every intellectual, moral, and spiritual movement looking to the betterment of mankind, so move upon the hearts of these Thy servants that their resolves and enactments may be in consonance with Thy will, lest their work come to naught, since nothing is permanent that does not have its source in Thee. We are Thine. Thou art good. We are finite; Thou art infinite. We are weak; Thou art almighty. We know but little; Thou knowest all things. Help us, therefore, to lean with more confidence on Thee and follow without fear where Thou dost lead. In the spirit of the Christ. Amen.

The Journal of the proceedings of yesterday was read and approved.

#### EXTENSION OF REMARKS.

Mr. HUMPHREY of Washington. Mr. Speaker, I ask unanimous consent to extend my remarks by inserting a short statement in the RECORD.

Mr. CANDLER of Mississippi. Upon what subject?

Mr. LEVER. Reserving the right to object——

The SPEAKER. The gentleman from Washington asks unanimous consent to extend his remarks in the RECORD.

Mr. LEVER. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from Washington upon what subject?

Mr. HUMPHREY of Washington. It is upon the subject of the Panama Canal tolls. It gives a list of the Democrats who voted for the present bill who are now Members of this House.

Mr. FOSTER. Does that include also the Republicans and show how they voted?

Mr. HUMPHREY of Washington. No. The country is not interested, I take it, in the Republicans.

Mr. FOSTER. Recent events would indicate that they were not. I object, Mr. Speaker.

#### CHANGE OF REFERENCE.

Mr. WATKINS. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. WATKINS. Bill H. R. 14331, No. 112 on the Union Calendar and No. 69 on the Calendar for Unanimous Consent, was reported from the Committee on Revision of the Laws. The chairman of the Committee on Rivers and Harbors states that it has been customary when a bill is passed by the Committee on Rivers and Harbors and has become a law that, after that, any other bill amending the original bill, having come from the Committee on Rivers and Harbors, under the rule or custom would be referred to the Committee on Rivers and Harbors. This bill has been referred to the Committee on Revision of the Laws, and has been favorably reported and placed on both of these calendars. If that is the custom, I do not want to have the appearance of any discourtesy on my part either to a Member or to a committee. I ask if that is a rule or the custom?

The SPEAKER. What is the rule?

Mr. WATKINS. The chairman of the Committee on Rivers and Harbors has informed me that as this bill to which I have referred is a bill to amend a law which was several years ago passed by the House, having come from or reported from the Committee on Rivers and Harbors, that under the rules of the House or custom of the Speaker, such bill should be referred to the Committee on Rivers and Harbors and not to the Committee on Revision of the Laws. If that is the custom or the rule, I do not want to have the appearance of infringing by having asked that the bill be referred to the Committee on Revision of the Laws, which I did, and which was done.

Mr. MANN. Mr. Speaker, I do not know what the bill is but, as a matter of fact, neither the Committee on Revision of the Laws nor the Committee on Rivers and Harbors has jurisdiction of the subject matter. It is a bill that belonged to the Committee on Interstate and Foreign Commerce. It is true that this bill, which was referred to the Committee on Revision of the Laws, was a bill to amend a provision in the river and harbor act. The bill was in the river and harbor act, but is still subject to a point of order in that act.

The SPEAKER. What is the bill about, anyhow?

Mr. MANN. For removing obstructions in navigable waters.

Mr. SPARKMAN. If there is any bill that could be properly referred to the Committee on Rivers and Harbors, this is one of them. It is entitled "A bill to amend section 19 of an act

making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, approved March 3, 1899," which was a bill reported from that committee. Now, this bill seeks to amend a provision in the law of 1899, so as to permit the removal of certain obstructions in the Sabine River.

The SPEAKER. The House will be in order. Has this bill been referred to any committee?

Mr. SPARKMAN. It was referred to the Committee on Revision of the Laws.

Mr. MANN. And been reported by that committee?

Mr. SPARKMAN. It has been reported by that committee. I called the attention of the gentleman from Louisiana [Mr. WATKINS] to this matter the other day, and told him it was my opinion that it should have been referred to the Committee on Rivers and Harbors, and while I am not, I trust, supersensitive about these things, I do not wish such references to go unnoticed.

The SPEAKER. Has the bill been reported back?

Mr. SPARKMAN. Yes; it has been reported.

The SPEAKER. It was clearly a mistake to refer it to the Committee on Revision of the Laws. That committee has nothing to do with it.

Mr. SPARKMAN. If any bill should go to the Committee on Rivers and Harbors, that bill certainly should.

Mr. MANN. The bill should have been referred to the Committee on Interstate and Foreign Commerce, which committee has jurisdiction over obstructions in navigable waters.

Mr. SPARKMAN. If that is true, Mr. Speaker, any bill, I do not care what it is or what its relation to the question of rivers and harbors may be, should go to the Committee on Interstate and Foreign Commerce.

The SPEAKER. This whole proceeding is out of order, anyway. If either one of the gentlemen will give the Speaker a memorandum of the matter, the Speaker will look into it and report on it some morning.

Mr. MANN. It will probably be before the House next Wednesday.

Mr. SPARKMAN. Mr. Speaker, it is suggested by the gentleman from Louisiana [Mr. WATKINS] that the motion should be made now to refer the bill to the Committee on Rivers and Harbors. If that motion is in order, while I do not wish to precipitate any lengthy discussion of that or any other subject now, I would like to make it.

The SPEAKER. It is in order if made by direction of the committee which reported the bill.

Mr. MANN. It is not now before any committee. It is on the calendar.

Mr. FOSTER. It is reported. It is not before any committee now.

The SPEAKER. Is it on the calendar?

Mr. FOSTER. It is on the calendar.

Mr. SPARKMAN. I was intending to bring the matter before the Speaker when the bill is called up.

The SPEAKER. It was referred to the Committee on Rivers and Harbors?

Mr. SPARKMAN. No; it was referred to the Committee on Revision of the Laws.

The SPEAKER. It was incorrect to refer it there. That much is absolutely clear. If the gentleman will give the Chair a memorandum about it, so that the Chair can dig it up to-day, if there is any way of getting at it, it shall be done.

Mr. WATKINS. Mr. Speaker, I have already arisen to a parliamentary inquiry on that question. The Speaker has said that we are all out of order; but while I have the floor I wish to ask unanimous consent to dispose of this now, because the river and harbor bill is the next bill on the calendar in line for consideration, and I would like to have the matter disposed of now, if possible. I have no objection to its being referred to the Committee on Rivers and Harbors, so that it can be disposed of when the next bill on the calendar is taken up for consideration.

The SPEAKER. The gentleman from Louisiana [Mr. WATKINS] asks unanimous consent to dispose of this now. Is there objection?

Mr. MANN. I object.

The SPEAKER. The gentleman from Illinois objects.

Mr. LEVER. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 13679, the Agricultural appropriation bill.

### ADDITIONAL ROOMS IN THE HOUSE OFFICE BUILDING.

Mr. BOWDLE. Mr. Speaker, will the gentleman from South Carolina yield to me for a moment?

Mr. LEVER. Yes.

Mr. BOWDLE. I want to present a question that pertains to the privileges of the House.

The SPEAKER. The gentleman will state it.

Mr. BOWDLE. I promise to be very brief.

Mr. Speaker, with 39 other Congressmen I have been quartered for 12 months in the Maltby Building. Now, I do not object to that in itself; but under the circumstances it has imposed on the 39 of us, or the 40 of us, an immense amount of inconvenience. I am a member of the Committee on the Merchant Marine and Fisheries. We have been in session about 90 days in the last three months, and attendance twice a day has made my mileage about 247 miles [laughter] in order to attend the meetings of that single committee, to say nothing of the meetings of the Committee on Irrigation of Arid Lands. Of course I am not going to present a bill to Uncle Sam for mileage. [Laughter.] I do not even object to that inconvenience.

But there is another thing: The distance between the Maltby Building and the Hall of the House is great—far greater than it appears to be; indeed, so great that frequently many Members have been placed in a rather embarrassing position in the matter of roll calls. Of late we have had some very serious blizzards, so serious that at times I have proceeded from the Hall of the House to the Maltby Building simply by dead reckoning. [Laughter.] I have missed in the past three months about three roll calls. On two of those occasions my friend BILL MURRAY, the distinguished Oklahoma Member, and I were caught in a snow bank just beyond the Senate. [Laughter.] I saw him wigwagging for help, and I rendered it. [Laughter.] But we missed the roll calls on the bills—at least I did. Thus, for illustration, I was recorded as not voting on that convict-made goods measure of Mr. LEWIS of Maryland. Mr. LEWIS, in charge of the bill, knew I wanted to vote for it, but I was called over to the Maltby Building in a blizzard.

Then the other night—Sunday night—after church, I found myself in the Maltby Building in the terrible storm that was then blowing. Now, the building is not safe. The rafters of that building, like the Government at times, show a decided tendency to centralization. [Laughter.] The building is going down in the center very rapidly. I sat there meditating on things of great pith and moment while the rafters groaned and creaked. [Laughter.] The situation is dangerous there.

Now, Mr. Speaker, I want very much to get into the House Office Building, not only on account of pleasant associations, but for other reasons. I do not know when we are going over there. Every time I make an inquiry at the building there is a different reason given. Four months ago we were to be there the following Monday. On the following Monday I found that the washstands were not yet in. Now, I agree that a good many Congressmen can waive washstands. [Laughter.] I was willing myself to waive washstands. Still later I made an inquiry, and I found out that the locks for the doors had not arrived. Under those circumstances, I offered to buy a staple and a hasp for my door and put them on myself, but the custodian would not agree.

And then I have been compelled to think of the danger impending over the statesmanship of the Nation incident to the falling in of the Maltby Building. [Laughter.] There is a large section of us over there, and I would not want to contemplate that building falling in and burying us under it, and our wives clamoring here at Gen. SHERWOOD'S office later on for pensions. But that is the situation. [Laughter.] If anybody would undertake to give us a rational answer to the question as to how soon we shall be relieved of this dangerous situation, I would be very glad to hear it.

Mr. MANN. Mr. Speaker, I suppose that the gentleman has already been notified that the assignment of rooms in the House Office Building to Members who are now in the Maltby Building will be made as of 12 o'clock on Monday next, and the gentleman will undoubtedly be able to get a room there at once, or very soon after that. Most of the rooms are practically finished.

Mr. BRYAN. I understand this further addendum, that the gentlemen who are in the Maltby Building are to get such offices as are left over.

Mr. MANN. Well, that is not correct. I should like to suggest to the gentlemen in the Maltby Building, however, who complain about lack of opportunity to answer to the roll, that if they were in the House, where they belong, they would not have to come from the Maltby Building to answer to the roll call. [Laughter.]

Mr. BOWDLE. Mr. Speaker, the gentleman from Illinois is generally accurate, and I take it that he is perfectly accurate when he says 12 o'clock noon on Monday is the time when we will be relieved from the perils of the Maltby Building, and our constituents will be relieved from the peril of losing us; but

as to the latter part of his statement, he knows perfectly well, a great deal better than I know it, that as a practical matter we are not expected to be here every minute of the time, and I have no doubt if the RECORD were carefully examined it would show that the gentleman from Illinois, through his long and honored career, has followed the usual practice.

Mr. MANN. If I had followed the practice of the gentleman from Ohio I would change it now, but I have not done so.

Mr. FITZGERALD. Mr. Speaker, the increase in the membership of the House under the last census resulted in a number of Members in excess of the number of rooms that had been provided in the House Office Building. Some provision was necessary to accommodate these additional Members. Congress authorized the raising of the inner portion of the roof, so as to provide the additional accommodations so that no gentleman might be without an office. Provision was made for the utilization of the Maltby Building until the additional accommodations could be provided in the House Office Building.

I am very much relieved to know that those gentlemen who have been quartered in the Maltby Building have come to the conclusion that it is so unsafe that they wish to leave there as quickly as possible. During most of the past summer that band of 40 patriots pursued and haunted me about this Capitol, insisting that immediately the addition to the House Office Building be completed and they be moved into it. During the winter, as the time has approached for the completion of the building and the removal of these gentlemen to the House Office Building, a complete change has taken place, and I have been besought by these gentlemen to make arrangements to permit them to continue in the Maltby Building, as they did not wish to be removed; so that it has seemed as if whatever could be done was the very thing these gentlemen were not anxious to have done.

Mr. BOWDLE. Will the gentleman yield?

Mr. FITZGERALD. In a moment. These gentlemen have not suffered any great inconvenience. I served seven or eight years in the House when no Member had an office; and for over a hundred years Members of Congress had patriotically and unselfishly and devotedly served their constituents, satisfied with the job, without these accommodations.

Mr. MANN. At $5,000 per.

Mr. FITZGERALD. It seems to me that in view of the situation everybody should be glad to accommodate himself as best he possibly can until the additional accommodations can be completed. I must agree that perhaps the gentleman, or rather some of those with him, did have a grievance at being caught in a snow bank, and I am glad to see that one of his associates in the Maltby Building, to whom he refers, has suffered no serious injury as the result of that episode.

Mr. BOWDLE. Will the gentleman yield for a question?

Mr. FITZGERALD. I yield to the gentleman.

Mr. BOWDLE. Is it not true that those gentlemen in the Maltby Building who have indicated a preference for that building are as a rule Republicans, who feel that their presence on committees is somewhat irrelevant?

Mr. FITZGERALD. Mr. Speaker, I have not attempted to differentiate politically between the gentlemen in that building. They all seemed to look alike to me. They have all had the same hungry, determined, fierce look. I have had no time to ascertain whether they were Republicans or Democrats.

Mr. MURRAY of Oklahoma. Or Bull Moose.

Mr. FITZGERALD. I was too busy in attempting to escape. [Laughter.]

Mr. LEVER. Mr. Speaker——

The SPEAKER. This whole proceeding is out of order.

Mr. LEVER. Undoubtedly, Mr. Speaker.

Mr. MURRAY of Oklahoma. Mr. Speaker, I ask unanimous consent to refer to some statements made by the gentleman from New York. I did not start this discussion——

Mr. LEVER. Mr. Speaker, I trust that the gentleman will not take up the time of the House.

Mr. MURRAY of Oklahoma. I have not taken up any time on this bill since you started.

Mr. LEVER. I understand that.

Mr. MURRAY of Oklahoma. I ask unanimous consent for five minutes.

Mr. LEVER. I will not object to that, but I will object to any further time being used in this way.

Mr. MANN. Let us hear how the gentleman escaped from the snow bank. [Laughter.]

Mr. MURRAY of Oklahoma. Mr. Speaker, I was not in the room when the discussion started with reference to the Maltby Building, and I should not have said anything but for the statement made by the gentleman from New York [Mr. FITZGERALD]. The gentleman said that Congressmen "went on for a hundred years without rooms." That is not the question, Mr. Speaker. The condition is that Members are now given commodious rooms, but because a man is a new Member he is not given equal treatment. I would resent giving me the best room in the building, if intended to insult me, whether it came from the gentleman from New York or anyone else.

Mr. FITZGERALD. Will the gentleman yield?

Mr. MURRAY of Oklahoma. And I say it is absolutely unfair for the gentleman from New York to undertake such a policy. Now, the Maltby Building, as was stated——

Mr. FITZGERALD. Will the gentleman yield?

Mr. MURRAY of Oklahoma. No; I do not yield.

Mr. FITZGERALD. Very well.

Mr. MURRAY of Oklahoma. The situation is such that we have been compelled to come through the snow or through the rain to get to the Hall of the House, when from the other building gentlemen have had the opportunity to come through a tunnel. Now, when the rooms are about completed, older Members file on rooms that we have waited for. Will the gentleman from New York contend that that policy is right when that is not the law? There is not a lawyer in the land but what would say that after a man is sworn in as a Member of Congress, if there is a statute that is susceptible of a double construction, it must be construed to mean the largest degree of equality between the membership of the House; and I want to say this on behalf of the new Members who are in the Maltby Building. I have not complained to this House, but since the gentleman from New York [Mr. FITZGERALD] makes the remark that he does, I resent such an insinuation, that because other Members in the past have gone on without offices we, because we are new Members, must remain in that building and endure the taunts of the gentleman from New York.

I resent it here and I would resent it elsewhere. I say and repeat again that because we are new Members it does not signify that we are not the equal, so far as rights are concerned, to any other Member on the floor of the House. [Applause.] I am not complaining of personal treatment at all. I have been treated by the old Members perhaps better than I should have been treated as a new Member. Nor do I complain of the great body of the membership of the House, but I am complaining of the insinuating remarks of the gentleman from New York, who seems not to understand the distinction between an insult and a joke.

Mr. FITZGERALD. Mr. Speaker, I do not know whether the gentleman from Oklahoma was present during the entire discussion or not. If he were not, it perhaps accounts for the remarks he has made; if he has been present during the entire discussion, then I can only say that I am entirely indifferent whether he resents here or elsewhere what I do or say. I have no apology to make to the gentleman from Oklahoma for what I have said. I stated the result of certain statements, certain facts. There has been no attempt to discriminate by me against gentlemen who are new Members in favor of gentlemen who are old Members or between old Members and new Members. The assignment of rooms, so far as they have been made and are being made, have been conducted strictly in accordance with the law that controls them. It is a matter of indifference to me whether it meets with the satisfaction of Members or not. Any part that I have to perform in connection with the matter is done under the law and in accordance with the law. If the gentleman from Oklahoma is so sensitive as to feel that I have offended him, I regret the sensitiveness of his nature.

### THE CLERK'S DESK.

The SPEAKER. Before the Chair puts the motion of the gentleman from South Carolina [Mr. LEVER] to go into the Committee of the Whole House, inasmuch as there is quite a large attendance of the House this morning, the Chair desires to make a statement. It is against the rule for Members to come to the Clerk's desk during roll call, asking how they voted or trying to get their names in when they did not vote. Of course Members do it out of no bad intention. It is more thoughtlessness than anything else, but it bothers the clerks, and it has been increasing in frequency lately. The clerks do not want any trouble with Members of the House, and can not afford to have. The rule prohibits any Members being around the Clerk's desk during roll calls except those necessary to be there.

Mr. BARTLETT. The Chair is speaking of the period of roll calls?

The SPEAKER. Yes.

Mr. MURDOCK. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MURDOCK. How far does the rule go upon this proposition? Frequently when an amendment is offered a Member wishes to know the exact terms of it and approaches the Clerk's desk to see the amendment.

The SPEAKER. The Chair does not think there is any objection to that, although the Chair once raised the question and drove a distinguished statesman from the Clerk's desk for doing that identical thing, but the Chair at that time did not know what the statesman was doing.

Mr. MANN. That was during the roll call.

The SPEAKER. It was. This applies to the period of roll calls, and the Chair repeats that the clerks do not want any trouble with Members and can not afford to have any, and therefore they submit to it with such grace as they can.

AGRICULTURAL APPROPRIATION BILL.

The SPEAKER. The gentleman from South Carolina moves that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 13679, the Agricultural bill.

The motion was agreed to.

The House accordingly resolved itself into Committee of the Whole House on the state of the Union, with Mr. HAMLIN in the chair.

The CHAIRMAN. The Clerk will report the title of the bill.

The Clerk read as follows:

A bill (H. R. 13679) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1915.

Mr. ANDERSON. Mr. Chairman, when the House adjourned last night I had moved to strike out the last word, and the gentleman from Arkansas [Mr. JACOWAY] was going to make an explanation of some rent items in the bill, on page 57. Before we pass that item, I would like to hear the explanation of the gentleman from Arkansas, and make a few remarks myself.

Mr. JACOWAY. Mr. Chairman, on yesterday it was suggested that the records show that there had not been any testimony taken by the Agriculture Committee in its hearings, to any extent, relative to the rents that were being paid by the Government for the various buildings in the District of Columbia for use and benefit of the Agriculture Department. That matter was discussed in the Agriculture Committee, and the gentleman from Nebraska [Mr. MAGUIRE], the gentleman from New York [Mr. PATTEN], and myself were appointed a subcommittee to investigate the matter.

As nearly as I am capable, from the standpoint of energy and intellect, I have attempted to collect the information in the form of a schedule, giving the information to the House.

There are 20 buildings occupied by the Department of Agriculture other than governmental buildings. Seven of these quarters for the Agriculture Department are portions of buildings occupied by the department in part and not in whole. Thirteen of the twenty buildings are occupied in whole by the Department of Agriculture. So I have made a schedule under the following heads: First, "Name or location of buildings"; second, "Character of building"; third, "Number of rooms occupied"; fourth, "Occupied by"; fifth, "Occupied as"; sixth, "Floor space per square foot net"; seventh, "Floor space per square foot gross"; eighth, "Annual rental"; ninth, "Annual rental per square foot net"; tenth, "Annual rental per square foot gross"; eleventh, "Owner or lessor"; and twelfth, "Assessed value of buildings." It is also shown the gross per cent received by the different owners from the amount invested by them.

From this schedule I find that the Government pays for the 13 buildings occupied in whole a rental of $67,194, and that the assessed valuation is $435,644. The law provides that no property in the District of Columbia should be assessed at less than 66⅔ per cent of its value.

Assuming that this property is assessed at 66⅔ per cent of its value, we find that the Government is paying $67,194 on $653,766 for value in ground and buildings, making in the aggregate a per cent of 10¼ plus on all buildings occupied by the Government. I have computed that in the individual per cent on each, which I will not trespass on the time of the House to give, as it is set out in the schedule, but will say it bears out that which is found in the aggregate. For the information of the committee, I beg to state that the rental bills, so far as I have been able to ascertain, for the Agricultural Department are cheaper than paid by any other department of this Government. We pay from 7 cents and 2 mills per square foot up to 69 cents per square foot. In this estimate is not included those portions of the buildings occupied in part by the Government.

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. HAUGEN. Mr. Chairman, I ask unanimous consent that the gentleman be permitted to conclude his remarks.

The CHAIRMAN. The gentleman from Iowa asks unanimous consent that the gentleman from Arkansas be permitted to conclude his remarks. Is there objection?

Mr. MANN. Mr. Chairman, reserving the right to object, how much time does the gentleman want?

Mr. CANDLER of Mississippi. I think the gentleman should be permitted to conclude his remarks.

Mr. JACOWAY. I do not think I will take over 10 minutes longer—15 minutes at the outside.

Mr. HAUGEN. Then I make the request that he be permitted to continue for 15 minutes.

The CHAIRMAN. The gentleman from Iowa asks unanimous consent that the gentleman from Arkansas be permitted to continue for 15 minutes. Is there objection?

Mr. LEVER. Mr. Chairman, reserving the right to object, I suggest that we might now come to some agreement as to how long we shall debate the rent items.

Mr. HAUGEN. O Mr. Chairman, this is an important item. It is a matter that we did not have an opportunity to look into in the committee. A subcommittee was appointed, and that subcommittee is now just making its report. I do not think there is any disposition here to abuse the privilege or take up unnecessary time.

Mr. LEVER. Very well. I withdraw my suggestion.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa that the gentleman from Arkansas be permitted to continue for 15 minutes?

There was no objection.

Mr. JACOWAY. Mr. Chairman, I desire to further call the attention of the House to some comparisons of the rent paid by the Agricultural Department with that paid by other departments of the Government.

Mr. COOPER. Mr. Chairman, will the gentleman yield?

Mr. JACOWAY. For a question.

Mr. COOPER. Is this all the rent that is paid by the Agricultural Department in this city?

Mr. JACOWAY. Yes. In other words, I will say that the total rent paid by the Government for the Agriculture Department in exact figures is $99,277.

Mr. COOPER. That is practically 5 per cent on $2,000,000.

Mr. JACOWAY. I will come to that later. It is 2½ per cent on $4,000,000, and I understand the Government can secure money at 2½ per cent, or it is 5 per cent on $2,000,000.

Mr. HAWLEY. Mr. Chairman, will the gentleman yield?

Mr. JACOWAY. For a question.

Mr. HAWLEY. The gentleman stated that the rent paid was about 10 per cent upon the real value of the property?

Mr. JACOWAY. No; I did not state that. I said that assuming that the assessed value of the property in the District of Columbia, as is shown on the tax books, complied with the law, which requires that it shall be assessed at 66⅔ per cent of its value, and arguing from that premise, then the rent paid by the Government on all of these buildings occupied amounts to 10 per cent plus. If the assessment is an erroneous one, then, of course, the per cent would vary.

Mr. HAWLEY. On the estimated value?

Mr. JACOWAY. The above per cent given is gross.

Mr. COOPER. Mr. Chairman, will the gentleman yield for another question?

Mr. JACOWAY. Yes.

Mr. COOPER. Does the gentleman know whether there has been any estimate made as to what it would cost to connect up those two wings of the Agricultural Building?

Mr. JACOWAY. Yes.

Mr. COOPER. How much will it be?

Mr. JACOWAY. I will state that I took that matter up with Dr. Galloway, and he stated to me that he thinks the entire Agricultural Department can be housed under one building, or several buildings in close proximity, for an amount not exceeding $3,000,000. That will take care of the Agricultural Department for the present as well as for a number of years in the future.

Mr. HAUGEN. And that would give them a fireproof building and a much better building all around than the buildings which they are now occupying.

Mr. JACOWAY. That will give them a fireproof building, and it will eliminate a number of messengers and extra telephones and facilitate the work of the department and enable it to reach its maximum efficiency.

Mr. HAUGEN. I desire to ask the gentleman if he has investigated the amount of rent paid by other departments and made any comparison along that line?

Mr. JACOWAY. I was coming to that when I was interrupted by the question of the gentleman from Wisconsin.

Mr. HAWLEY. Mr. Chairman, will the gentleman yield again?

Mr. JACOWAY. Yes.

Mr. HAWLEY. I asked the first question preliminarily to this: What per cent of estimated tax is paid on the valuation according to the gentleman's statement, taking it at its estimated valuation, based on 66⅔ per cent, assessment rate. How much in per cent in tax does the Government pay?

Mr. JACOWAY. Mr. Chairman, I will state to the gentleman that I can not follow this investigation down into details so fine and shadowy.

Mr. HAWLEY. The gentleman does not know what per cent of that 10 per cent is represented by taxes?

Mr. JACOWAY. I think 1 per cent will cover taxes, insurance, repairs, and other overhead charges. I can answer the gentleman in another way by referring to page 1 of the report on the assessment and taxation of real estate in the District of Columbia, which is signed by the full subcommittee of which the gentleman from Kentucky [Mr. JOHNSON] was chairman. That says—

That real estate is assessed irregularly, unscientifically, without system, and with gross discrimination between section and section, between class and class, between land and improvements.

That in the practice of the assessor's office, in the assessment of real estate, the law that real estate shall be assessed at "not less than two-thirds of its true value" is a dead letter and is kept alive solely to make a one dollar tax rate appear to be one dollar and a half.

That real property in the District of Columbia is assessed $414,000,000 below its true value; the true value being $744,000,000, while the assessment is only $330,000,000. (See testimony, pp. 416–419.) This is not an assessment at even two-thirds of the true value, but only slightly more than two-fifths (p. 419).

* * * * * * *

That considering ground values by themselves, those areas occupied by small homes are assessed at 60 per cent of the true value (p. 416); those by middle-class houses at 50 per cent; those by fine residences at 30 per cent; the business area at 30 per cent; and the large suburban areas at 20 per cent. Here again is heavy discrimination against the small home in comparison with the better house and the business property, while the large suburban speculative area bears less than a third of its proper burden.

From the same report, on page 20, we find that—

Of the following tables the first shows the assessment of ground values in the 5 classes and 10 sections into which the District has been divided for the purpose of this investigation, the ratio of assessment to the full and true present value of the property, and the statement of that full and true value, based upon the testimony and evidence as set forth. The table shows a steady gradation downward from a 60 per cent assessment on ground values in the small-home area to a 20 per cent assessment of ground values in the suburban and speculative areas. The total assessment in the District averages almost exactly one-third of the true value, or one-half of the two-thirds assessment which the law requires as a minimum.

Again, in the report, on page 13, we read the following:

On personal property the tax rate is 1½ per cent of the full true value. On real estate the tax rate as applied is less. The Commissioners call it 1½ per cent on two-thirds of the value, which would make the rate 1 per cent if the assessor had assessed the true value. But he has not. The assessment shows approximately but 44 per cent of the true value, so that 1½ per cent on a theoretical two-thirds reduces itself to 0.66⅔ of 1 per cent on the true valuation. Therefore the real estate tax rate, which looks like one dollar in the hundred, turns out to be only 66⅔ cents in the $100.

Surely this is an extraordinarily low realty rate for a large city; but whether low or high, the rate should not be fixed. At one time a fixed rate may raise too much revenue, at another too little. The only businesslike and just way is to let the rate be determined by the needs of the budget, as is done in other large cities.

At this time this is as completely as I can answer the gentleman from Oregon [Mr. HAWLEY].

Now, for the benefit of the committee I will say that in the Munsey Building a standard rent is charged per square foot, and the Government pays the same rent as do all tenants. The Agricultural Department is not paying any more than anybody else. In the Atlantic Building, which the Government occupies for the Forest Service, and located at 930 F Street, the Government pays approximately 20 per cent less for the housing of its offices than offices in this neighborhood usually command. In the Union Building, on G Street near Seventh Street NW., the rent paid by the Government is considerably less than is usually paid in this section. In the Star Building the Government pays less than the average per square foot than is now being paid by the other tenants. In the Globe Building, 339 Pennsylvania Avenue NW. (warehouse), the rental paid here is low in comparison with rent paid for other warehouses in this section and occupied by other interests. On buildings south of B street SW. there is no basis of comparison. No other interests have offices or laboratories in this section. Now, the overhead charges——

Mr. HAUGEN. Can the gentleman state in reference to the comparison of rates paid for private property?

Mr. JACOWAY. I could not go into that at any length.

Mr. HAUGEN. Now, will the gentleman state the amount paid by the Government per square foot on B Street?

Mr. JACOWAY. Seven cents and two mills.

Mr. HAUGEN. The memorandum I have indicates we are paying more; that is the information I got from the gentleman last night.

Mr. JACOWAY. I am in error. I thank the gentleman for the correction. The actual rental is $3,500, and that costs approximately per square foot 23.1 gross, and the net is 26.7. That is Fourteenth and B NW.

Mr. HAUGEN. Some time ago I made an inquiry, and I find that the people in a house in that vicinity paid a rental of $35 a month, or $420 a year; so it is about 13 cents per foot, and the Government is now paying 26.7 or 23.1, and in the other instances it is paying 34.6 or 27.4, which would indicate that the Government was paying two or three times as much as private individuals are for residential purposes.

Mr. JACOWAY. Well, I will state to the gentleman, in answer to him, that I am of opinion, after the investigation I have been able to make, that the Government, from the standpoint of the Government and not from the viewpoint of the individual, is paying too much rent for all of those buildings; but I state and assert that the rent paid by the Government for the buildings for the use of the Agricultural Department is the cheapest rent paid by the Government for any of the great departments of this Government.

Mr. HAUGEN. That may be true as to the other buildings, and I know nothing about that. Of course, the gentleman has made a comparison of the rent paid for others; but if in the vicinity of the department buildings are rented for 13 cents per square foot, it seems to me the Government is paying high if it is paying 26——

Mr. JACOWAY. I have but a limited time, and I want to make some further comparisons. The gentleman will have to excuse me if I can not yield further. Now, in the Army appropriation bill for 1915, in the hearings before the Committee on Military Affairs I find buildings and quarters rented by Quartermaster Department, District of Columbia, which table is as follows:

*Buildings and quarters rented by the Quartermaster Corps, United States Army, in the District of Columbia, for the fiscal year ending June 30, 1914.*

| Location of building. | For what purpose used. | Square feet floor space. | Total rental per annum. | Cost per square foot per annum. | Assessed valuation of land. | Assessed valuation of improvements. | Remarks. |
|---|---|---|---|---|---|---|---|
| Eckington Place | Warehouse | 26,386 | $5,048.00 | $0.138 | $12,878.00 | $12,000.00 | No allowance in rental for any special service. |
| Do | do | 19,320 | 3,000.00 | .186 | 5,507.00 | 17,000.00 | Do. |
| Nineteenth and C Streets NW | Stable | 21,929 | 2,700.00 | .123 | 4,506.00 | 15,000.00 | Do. |
| Do | Stable and warehouse | 20,944 | 3,600.00 | .171 | 8,795.00 | 26,000.00 | Do. |
| Do | Quartermaster's garage | 10,000 | 1,500.00 | .15 | | | |
| First and North Capitol Streets | Medical supply depot | 27,114 | 5,567.10 | .15 | 7,678.00 | 26,000.00 | Do. |
| 721 Thirteenth Street NW | Army Medical School | 21,612 | 8,650.00 | .39 | 41,280.00 | 40,000.00 | $1,200 extra for heat; $120 extra for light; $360 extra for elevator. |
| 1720 H Street NW | Medical dispensary | 1,020 | 1,000.00 | .98 | 5,031.00 | 7,000.00 | Assessed valuation for 3-story building. Department leases only 1 story. |
| Seventeenth and F Streets NW | Offices, depot quartermaster | 7,024 | 2,500.00 | .355 | 11,290.00 | 8,500.00 | No allowance in rental for any special service. |
| 1710 Pennsylvania Avenue | Signal Corps laboratory | 5,714 | 2,100.00 | .367 | 10,080.00 | 4,500.00 | Lease requires United States to maintain and repair building when necessary. |
| The Marlborough | Quarters for officer (5 rooms) | 826 | 720.00 | .87168 | | | Does not include heat and light. |
| 6929 Georgia Avenue NW | Quarters for officer (4 rooms) | 586 | 576.00 | .9828 | | | Do. |
| 1332 Kenyon Street NW | Quarters for officer (3 rooms) | 451 | 432.00 | .9576 | | | Do. |
| 606 Butternut Street NW | do | 405 | 432.00 | 1.0656 | | | Do. |
| The Portland | do | 445 | 576.00 | 1.2936 | | | Do. |
| 1645 K Street NW | Quarters for nurse (2 rooms) | 210 | 288.00 | 1.3716 | | | Do. |
| Do | do | 210 | 288.00 | 1.3716 | | | Do. |
| 1803 Calvert Street NW | do | 384 | 288.00 | .75 | | | Do. |
| 339 O Street SW | Quarters for noncommissioned officer (1 room) | 168 | 144.00 | .85704 | | | Do. |
| 822 Fifth Street NE | do | 256 | 144.00 | .56244 | | | Do. |
| 1907 H Street NW | do | 192 | 144.00 | .75 | | | Do. |
| 3418 Prospect Avenue NW | do | 288 | 144.00 | .49992 | | | Do. |

*Buildings and quarters rented by the Quartermaster Corps, United States Army, in the District of Columbia, for the fiscal year ending June 30, 1914*—Continued.

| Location of building. | For what purpose used. | Square feet floor space. | Total rental per annum. | Cost per square foot per annum. | Assessed valuation of land. | Assessed valuation of improvements. | Remarks. |
|---|---|---|---|---|---|---|---|
| 927 K Street NW | Quarters for noncommissioned officer (1 room). | 168 | $144.00 | $0.85704 | | | Does not include heat and light. |
| 613 Rock Creek Church Road | do | 208 | 144.00 | .6924 | | | Do. |

| Total for leases in effect at the present time if same are not terminated until June 30, 1914. | | | 45,231.10 | | | | |
| Total for leases for fiscal year 1914 terminated before this date (Oct. 15, 1913). | | | 1,080.00 | | | | |
| Estimated amount required for rent of buildings, etc., for the remainder of the fiscal year 1914. | | | 49,587.00 | | | | |

Mr. JACOWAY. From this table, I will state, the fact is developed that the rent for the Agricultural Department is much less than the rent set out in the Army appropriation bill.

Mr. MURDOCK. Will the gentleman yield before he goes on further?

Mr. JACOWAY. Yes; gladly.

Mr. MURDOCK. Is it the purpose finally to house all the agricultural bureaus in a single building?

Mr. JACOWAY. I do not know what the purpose is, but I think probably it would be wise business policy on the part of the Government to appropriate a sufficient amount of money—not be stinting, but generous—to house the great Agricultural Department under one or more roofs in close proximity.

Mr. MURDOCK. The gentleman remembers how that building is built, and I have often wondered about it. There are two wings, two separate buildings, and a hole in the middle. Now, is it the idea to construct something to take the place of the vacant space in the middle?

Mr. JACOWAY. I understand it is part of unwritten history that when these two wings were built there was not sufficient funds to build the structure as desired, and it was deemed best to build the two wings as they stand to-day, hoping that a future Congress would appropriate funds ample enough to build to the two present wings. This is my informatoin in regard to the matter. I believe it to be correct.

Mr. MURDOCK. Does the gentleman mean he built those two structures as separate buildings——

Mr. JACOWAY. For the purpose of adding to them in the future.

Mr. MURDOCK. At different times? They were not constructed at the same time?

Mr. JACOWAY. Yes; at the same time, I understand.

Mr. MURDOCK. But he did construct them, and there was a hole left in the center for a central building?

Mr. JACOWAY. This is my information. As to whether it is accurate or not, I do not know. I believe it to be correct, however.

This bill also carries an item of $21,328 for additional rent. I will state that the last bill carried $11,328 for this item, but the committee eliminated from this bill an appropriation of $7,500 for the Bureau of Entomology; so, in fact, there is only an increase of $2,500. I took the matter up with Dr. Galloway and interrogated him as to the increase in the rent of $2,500, and his answer was that Congress had made an appropriation of $500,000 for the investigation of the hog cholera and $100,000 for the investigation of a disease of the horse, known as dourine, $200,000 for a bureau of markets. He said to carry these projects to a successful consummation it would take additional quarters and additional men, and he thought the item now would meet the requirement in full; that the additional amount of $2,500 was in no sense excessive.

There is an item in the bill of $142.50 for additional rent. That occurs in this way: When the Government enters into a lease with a private individual, the owner or lessors, there is a clause in the lease which provides that the building shall be turned back to the owner in the same condition in which it was found. This $142.50 was used for that purpose.

Mr. STAFFORD. Would it embarrass the gentleman if I asked him a question?

Mr. JACOWAY. Not in the least.

Mr. STAFFORD. Has the gentleman's investigation led him into an inquiry as to the terms which the Government entered into for the special office building which the Bureau of Chemistry occupies?

Mr. JACOWAY. Is that the Keator Building?

Mr. STAFFORD. I can not give you the name of the building. I know it was especially erected for governmental purposes, and is the building where the Bureau of Chemistry is housed.

Mr. JACOWAY. If it is the Keator Building, I will say that this is now being constructed and the department gets 25,000 more square feet than formerly and at the same price.

Mr. STAFFORD. I am referring to a building now occupied by the Government, but especially erected for governmental purposes.

Mr. JACOWAY. I am unable to answer the gentleman. Generally, I will state, that the lease of these buildings is entered into for one year only. These leases are drawn either by or under the direction of the Solicitor of the Department of Agriculture, and the term of the lease is one year. As to the per cent paid to the owners of the Atlantic and Union Building companies, light may be thrown upon this matter by reading a

portion of a letter written me by Mr. Myron M. Parker, which in part is as follows:

The Atlantic Building is a little over 20 years old, well constructed, the walls being of unusual thickness. The building is equipped with all modern devices for protection against fire, with a fire-alarm service connecting with general headquarters. Considering the location and the value of the ground, the rent of 69 cents per foot being paid by the Government is far from excessive, being considerably lower than that paid by commercial tenants in the same locality and cheaper than rents paid by the Government in buildings of a like character for the use of other departments.

I am also president of the Union Building Co., a large office building on G Street, between Sixth and Seventh Streets, which at present is occupied by different auditors of the Treasury Department, the General Supply Committee, and Station G of the city post office. This building was erected about 20 years ago at the request of the then Postmaster General for occupancy in part by the city post office. It is six stories high, each floor containing about 18,000 feet of uninterrupted space and capable of carrying any weight. The building never has been used as a warehouse. During the taking of the census in 1910 about 500 clerks were employed on one floor. This building has six fire escapes and is also equipped with modern devices against the hazard of fire. The rent paid by the Government averages 37½ cents per square foot. At this low price the rent received from the Government has never enabled us to pay more than an average of 2¾ per cent dividends, so that if, as alleged, the Government has been robbed through the exacting and relentless landlords it can not be charged up against either the Atlantic or Union Buildings Cos.

Very respectfully,

THE ATLANTIC BUILDING CO.,
By MYRON M. PARKER, *President.*

As the Government occupies only portions of these buildings, it was impossible to arrive at any definite conclusion as to the per cent paid to the owners of these properties, due to the fact that I was unable to ascertain what the cost of the quarters occupied by the Government in these buildings compared with the entire total cost of these structures. As the letter of Mr. Parker purports to throw light upon this matter, it might not be amiss for the information of the House to incorporate into the RECORD the conclusion he reaches as set forth in his letter.

Now, Mr. Chairman, I believe this is about all the report I have to make, but under the leave to print I wish to insert the following table:

*Statement showing data in relation to rented buildings of the department.*

| Name or location of building. | Character of building. | Number of rooms. | Occupied by— | Occupied as— |
|---|---|---|---|---|
| Atlantic Building, 930 F Street NW.[1] | Old brick office building (8 stories) | 162 | Forest Service | Offices. |
| 913 E Street NW. (rear) [1] | 1-story building in alley | 1 | ....do | Work shop. |
| Star Building, third floor [2] | Third floor modern granite fireproof office building | 13 | Bureau of Animal Industry. | Offices animal husbandry. |
| Star Building, Nos. 410 and 411 [2] | (See above) | 2 | Bureau of Entomology | Offices forest insects. |
| Star Building, No. 409 [2] | (See above) | 1 | ....do | Offices chestnut bark disease. |
| Munsey Building, Rooms 914, 915 [2] | Modern granite fireproof office building | 2 | Bureau of Animal Industry. | Offices meat inspection field work. |
| Munsey Building, Rooms 622–627 [2] | (See above) | 6 | Bureau of Plant Industry | Offices chestnut bark disease. |
| Globe Building, 339 Pennsylvania Avenue NW.[1] | Old 4-story brick building of warehouse construction | | ....do | Congressional seed distribution and storage. |
| 224 Twelfth Street SW.[1] | 3-story brick, double building | 36 | ....do | Offices farm management. |
| 216 Thirteenth Street SW.[1] | 6-story and basement modern fireproof laboratory building. | 98 | Bureau of Chemistry | Offices and laboratories. |
| 212–214 Thirteenth Street SW.[1] | Old 3-story brick residence | 18 | ....do | Supplies, distribution and storage. |
| 215 Thirteenth Street SW.[1] | 4-story, basement, brick building for warehouse purpose | 17 | Division of Publications | Offices storage and mailing. |
| 1304–1306 B Street SW.[1] | Double brick structure; 3 stories and basement | 31 | Bureau of Plant Industry | Offices forage-crop investigation, seed distribution, and laboratory. |
| 1316 B Street SW.[1] | Modern 3-story brick structure | 19 | Office of Solicitor | Offices files and storage. |
| Fourteenth and B Streets SW.[1] | 4-story and basement brick building; remodeled and fireproof. | 23 | Office of Public Roads | Offices and laboratories. |
| 220 Fourteenth Street SW.[1] | Modern fireproof 6-story and basement office building | 39 | Plant Industry and Experiment Stations. | Offices storage cotton machinery. |
| 221 Linworth Place SW.[1] | Modern brick and concrete fireproof warehouse; 5 stories and basement. | 28 | Bureaus of Plant and Animal Industry. | Offices warehouse, cotton and paper work. |
| 1228 C Street SW. (rear)[1] | Old 1-story and loft stable | | Office of Pubic Roads | Storage. |
| 220 Thirteenth Street SW.[1] | 3-story brick warehouse, remodeled | 21 | Insecticide and Fungicide Board. | Offices and laboratories. |
| Seventh and K Streets SW.[1] | Old warehouse | 7 | Exhibits and Bureau of Soils | Exhibit material and soils storage. |
| Union Building [2] | Old office and warehouse | 7 | Statistics, Entomology, and Plant Industry. | Storage and offices. |

| Name or location of building. | Floor space. | | Annual rental. | Annual rental. | | Date of first lease. | Owner or lessor. | Assessed value of building and grounds. | Per cent, gross, on separate properties. |

CONCLUSION.

In conclusion, Mr. Chairman, I will say that my investigation leads me to the fact that the Government is paying yearly for the use of the Agricultural Department, all buildings considered, a rental of $100,000, and these buildings are scattered over a considerable area and in different sections of the city. Assuming that the Government can borrow money at 2½ per cent, it might be wisdom and sound business policy to construct its own buildings in close proximity. Certainly this would facilitate and expedite the work of the Agricultural Depart-

ment. In many respects the Agricultural Department is the greatest department of the Government. It has grown by leaps and bounds, and its beneficent and far-reaching influences can not be too zealously encouraged, fostered, and supported. From this department no reasonable amount of money should be withheld to enable it to evolve its maximum efficiency. It is an old aphorism, but nevertheless true, that the farmer is the producer of the wealth of our country, and to improve his status and to promote his efficiency we should deal with him in a manner generous and unstinted.

The ramifications of the different branches of the Agricultural Department spread out like a network over the entire length and breadth of our country. Either direct or indirectly, it touches every phase of human endeavor. Sooner or later all are benefited by this department. In a sense it is the leaven in the lump that permeates the whole commercial, industrial, agricultural, social, and political mass. The different activities of this branch of the Government reach out like invisible fingers to touch the highest and the lowest, from the cottage or the humble home upon the mountainside to the prince in the palace, surrounded by all the appointments and trappings of the rich.

Mr. Chairman, agriculture is the basis of all wealth. When the man who wields the hoe and follows the furrow cast up by the plow dwells in peace and plenty prosperity radiates into every vocation, avocation, and calling of man, whether agricultural or otherwise. Likewise, when the seasons are against him and Mother Earth fails to yield her fruits to his endeavor, the rigors of poverty are felt throughout the land. When the soil fails, want encroaches.

While, Mr. Chairman, as I have said before, I do not think the rents paid by the Government for the buildings used by this department are excessive, I am convinced that the work of the Department of Agriculture would be infinitely bettered by permanent housing under one roof. [Applause.]

Mr. ANDERSON. Mr. Chairman, as the gentleman from Arkansas has stated, we have had practically no information up to the time of his very illuminating statement as to these rent items. There is absolutely nothing in the hearings and there is absolutely nothing in the report, and I personally am very grateful to the gentleman from Arkansas [Mr. JACOWAY] for his very elucidating statement.

I am opposed, as a general proposition, to the practice of renting buildings in the District of Columbia for the use of the various bureaus and departments of the Government. As the statement of the gentleman from Arkansas shows—and he has evidently prepared it with great care—we are paying on the actual value of the property we are renting an equivalent of 10 per cent. In other words, we are paying for these rattletraps, not particularly suited to the use of the bureaus, every 10 years——

Mr. JACOWAY. Will the gentleman yield?

Mr. ANDERSON. Yes.

Mr. JACOWAY. The gentleman means 10 per cent gross?

Mr. ANDERSON. Ten per cent gross; yes.

Mr. JACOWAY. Taxes and insurance and overhead charges and deterioration, and matters of that kind.

Mr. ANDERSON. Now, the gentleman refers to insurance, overhead charges, and things of that character. The gentleman knows, as everyone knows, that the Government is now paying, under the sacred half-and-half plan, one-half of the taxes of the District of Columbia. Of course, when we pay the rent of these buildings, in addition to paying our proportionate share under the half-and-half plan, we are also paying the insurance on the building and the taxes on the building which have to be paid by the private owners of the building, because in renting the buildings to us they are taking into consideration the fact that they are obliged to pay taxes for the support of the District government on the building and also for the insurance.

Now, the Government can borrow money at about 3 per cent. It is paying interest on the money invested in these buildings at approximately 10 per cent gross. There certainly can be no possible economy in that sort of a proposition. The gentleman from Arkansas [Mr. JACOWAY] also refers to the fact that the Department of Agriculture is paying lower rents than are paid by any other department of the Government. I have no doubt that that is true. They are paying at a smaller ratio, a less rate, than any other department of the Government.

Mr. HAUGEN. Mr. Chairman, I will not consent to that statement going into the RECORD unchallenged, because I have investigated that matter myself, and I am certain the department is now paying more rent than individuals do in that vicinity. I refer to B Street, opposite the department.

The buildings in that vicinity are now rented at from thirty to fifty dollars a month. A larger building than a 16-room building is rented at $75 a month; and, according to the statement of the gentleman from Arkansas [Mr. JACOWAY], the department is paying from 16 to 25 cents a foot, while the individual pays from 10 to 15 cents per square foot. That is the information that comes to me from the people who hire buildings in that vicinity.

Mr. JACOWAY. Has the gentleman gone into all the neighborhoods where these buildings are located, or is this but an isolated case?

Mr. HAUGEN. On Virginia Avenue and on B Street, in that vicinity. I also wish to say that valuation of property is no basis upon which to compute the amount of rent. The only basis you can take is the rent paid by the adjoining tenants.

Mr. JACOWAY. The gentleman misquotes me. I never said that the rent paid by the Department of Agriculture is less than the individuals pay. I said it was less, as compared with the departments other than the Department of Agriculture, according to my investigation.

Mr. HAUGEN. I understood the gentleman's statement, but I believe the gentleman from Minnesota [Mr. ANDERSON] did not quite understand the statement of the gentleman from Arkansas. The gentleman from Arkansas stated that the Government paid less rent where buildings were jointly occupied. As to the rent paid on B Street, no comparison was made.

Mr. JACOWAY. I said, as compared with other departments in that vicinity.

Mr. HAUGEN. On B Street?

Mr. JACOWAY. Yes.

Mr. HAUGEN. What other department hires buildings in that vicinity?

Mr. JACOWAY. I could not name them, but I think they are in the record here.

Mr. HAUGEN. I do not think the gentleman can name any of them.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. ANDERSON. Mr. Chairman, I ask to be allowed to proceed for five minutes more.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent to proceed for five minutes more. Is there objection?

There was no objection.

Mr. ANDERSON. Mr. Chairman, I think I understood the statement of the gentleman from Arkansas [Mr. JACOWAY]. The statement was, as I remember it, that the Department of Agriculture, or the bureaus of that department, were paying a lower rate of rent than was being paid by other departments and bureaus of the Government.

That statement may be true. I have no doubt that it is true. But it is not necessarily a fair comparison, because the rate of rent would necessarily be dependent on the location of the building, and I think it will be admitted by everyone that the Department of Agriculture is located in a section in which the rents are as low as they are anywhere in the city. If the Department of Agriculture is getting rents at a lower rate than other departments of the Government, it is doing no more than it ought to do under the circumstances.

But the point that I was trying to bring out particularly, Mr. Chairman, was the lack of economy which the report presented by the gentleman from Arkansas illustrates. In other words, it is a situation under which we are, in effect, purchasing the old rattletraps now rented by the Government, ill suited, many of them, for the purposes of the departments, and paying for them in the gross every 10 years, and then we do not own the buildings. It would be much better to use the credit of the Government to build buildings for the use of the departments, because in that way we would not only economize but we would be able to furnish buildings suitable and convenient for the purposes for which they are to be used.

Mr. CANDLER of Mississippi. Mr. Chairman, I desire to say that, so far as I am personally concerned, I do not believe that the Government of the United States ought to be renting buildings at all. It is a false idea of economy. No business man who is engaged in business for himself would rent buildings under the same circumstances as the Government of the United States is renting them to-day.

I have intended for some time to look into this question myself, not only in reference to the Department of Agriculture, but in reference to other departments of the Government, but my time has been engaged otherwise, and I have not had the opportunity to do so. I intended to make that investigation for the purpose of calling the attention of the House of Repre-

sentatives to the amount of rent that is being paid by the Government in the District of Columbia.

Now, as was stated by the gentleman from Arkansas [Mr. JACOWAY] a few moments ago, the Department of Agriculture, in comparison with other departments of the Government, is paying a less rent than is being paid by any other department for buildings rented, and so far as economy can be practiced the Department of Agriculture is exercising that economy.

The Committee on Agriculture is not responsible for this rent situation. We can not help ourselves, because of the fact that we have no jurisdiction to provide for the construction of buildings. When the department has to have buildings as a matter of necessity to carry on the business of the department they must go out and rent them or lease them to the very best advantage possible. When the leases are made and the obligation is incurred, then the Committee on Agriculture is compelled to provide the appropriation to meet those obligations. That is exactly what we have done in this bill. The Committee on Public Buildings and Grounds has jurisdiction in reference to the construction of buildings.

This building that has been erected over there, with the two wings, as have been referred to, and a hole between them, as expressed by the gentleman from Kansas [Mr. MURDOCK], was erected a few years ago. There are two wings to it. The two wings were constructed at the same time, and one remarkable thing about it is that they absolutely dug down into the ground and put one story of each one of those buildings beneath the ground. Why that was done I have not found out, and I do not know to-day and I do not think anybody else knows.

Mr. MURDOCK. The gentleman does think they should supply that center?

Mr. CANDLER of Mississippi. The plans provide, as I understand, for a court, to include this center; and if constructed in accordance with the plans it would practically house all the employees of the Department of Agriculture. That is what ought to be done. The Department of Agriculture ought to have sufficient buildings in which to transact its business, and I say that every other department of this Government in the city of Washington ought to have sufficient buildings in which to transact its business, close together and with convenience, because when so situated it will be economy in the end.

Mr. COOPER. Mr. Chairman, will the gentleman yield?

Mr. CANDLER of Mississippi. In a moment. So long as "Uncle Sam" has the money he can afford to construct the buildings, and if he has not the money he can get it at such rates of interest as will justify him in making the expenditure.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CANDLER of Mississippi. Does the gentleman from Wisconsin wish to ask me a question?

Mr. COOPER. I can answer the gentleman's question as to why those buildings were put somewhat lower than the surface of the soil.

Mr. CANDLER of Mississippi. That has been a matter of inquiry by many people.

Mr. COOPER. The explanation is very simple. The Burnham Commission plan provides for what European and American experts have declared will be, when completed, the most magnificent avenue in the world—that is, an avenue extending from the foot of the Capitol straight to the river, having on its sides the Department of Agriculture, the Smithsonian Institution, the National Museum, and other splendid structures; in its center the monument to George Washington, at its end on the river the memorial to Abraham Lincoln, and beyond that the Memorial Bridge to Arlington. The whole conception of this avenue is magnificent—Arlington, the bridge, Lincoln, Washington, the Capitol.

There must be scientific grading to make such an avenue, and for this the Burnham Commission plan provides. These buildings are all constructed—the wings of the Agricultural Department building and the Museum—with that end in view.

Mr. CANDLER of Mississippi. There is no excavation at the Museum, is there?

Mr. COOPER. There does not have to be any, because that is considerably lower. It is downhill from the other building.

Mr. MURDOCK. Then the idea is that the high ground which now surrounds these two buildings will be cut away.

Mr. COOPER. Will be cut away and leveled.

Mr. HAUGEN. The object is to cut down all the ground in that vicinity, is it?

Mr. COOPER. The object is to make a magnificent avenue through there, and, of course, that necessitates proper grading.

Mr. HAUGEN. About how many hundred feet wide?

Mr. COOPER. The roadway would not be very wide.

Mr. HAUGEN. Several hundred feet.

Mr. CANDLER of Mississippi. I thank the gentleman from Wisconsin [Mr. COOPER] for this information. I am sure it will be read with interest by many people.

Mr. McLAUGHLIN. Mr. Chairman, I have been very much interested in the statement of the gentleman from Wisconsin [Mr. COOPER] as to the adoption of plans of construction of the wings of the Agricultural Department Building. If what he says is exactly true—and I have no doubt but he makes the statement believing it to be true—it clears up a matter which has been seriously in doubt. It has been charged—I am glad the charge is now cleared away—that individuals and associations interested in real estate in that part of the city objected to the construction of buildings so high as to overshadow other buildings erected or to be erected by private enterprise in that vicinity. I am glad to know that the sinking of these buildings away down in a hole was done not at the behest of individuals or associations interested in real estate in that vicinity but in accordance with a general plan established and later to be carried out.

Mr. KAHN. Mr. Chairman, will the gentleman yield?

Mr. McLAUGHLIN. Yes.

Mr. KAHN. I happened to be before the Committee on Public Buildings and Grounds two or three days ago when that very matter was discussed before that committee. Col. Harts, the Army officer, who is superintendent of public buildings and grounds, was before the committee, and he said that there would be an avenue beginning at the Grant monument and extending clear over to the river, this avenue to be 900 feet wide, and that the Agricultural Building was on the south line of that particular avenue.

Mr. HAUGEN. Yes; and that they gave up 10 feet of this avenue in order to put the department building where it is. The first proposition was to put it over in a hole in the other corner of the grounds.

Mr. McLAUGHLIN. I am willing to accept the statement made by the gentleman from Wisconsin [Mr. COOPER] and the gentleman from California [Mr. KAHN], and will not make any further suggestion of improper influence exerted at the time these buildings were sunk half their height in the ground. I wish to say a word in regard to the rent the department is paying on the buildings that it is occupying. I have given some attention to that, and it seems to me there is only one piece of property rented by the department the rent for which is objectionable, and that is the property occupied by the Forestry Service on F Street, between Ninth and Tenth Streets. I have never been able to see good reason why that building, in the busiest section of the city, where rents are highest, should be occupied for offices of the Department of Agriculture. The only explanation I have heard is that at the time the Forestry Service was organized and must be located there was no available building in any cheaper part of the city; that it seemed necessary at that time to occupy that building, although the rent was very high and much more than the Government ought to pay now.

Mr. MANN. Mr. Chairman, will the gentleman yield?

Mr. McLAUGHLIN. Yes.

Mr. MANN. I do not know what the rent is, but the gentleman knows that on that same street and paying proportionately, I suppose, the same rent for equal facilities, are the Geological Survey, the Interstate Commerce Commission, and there used to be the Bureau of Statistics and several other governmental offices.

Mr. STAFFORD. And the Department of Commerce in the Willard Building on Fourteenth Street, opposite the Willard Hotel.

Mr. MANN. I did not suppose the upper floors of those buildings would be any more expensive now than buildings in any other part of the city.

Mr. McLAUGHLIN. My understanding is that the rent of that building occupied by the Forestry Service is very high. I believe it is the highest per square foot of any rent paid by the Federal Government, at least by the Department of Agriculture.

Mr. BORLAND. Does the gentleman know how much is paid per square foot?

Mr. McLAUGHLIN. The gentleman from Arkansas [Mr. JACOWAY] has a table showing all these figures. I do not have the figures in mind, but I make the statement that the highest rent paid by the Department of Agriculture is for the building on F Street occupied by the Forestry Service. I believe it is due the Department of Agriculture to say, if the gentleman from Arkansas [Mr. JACOWAY] has not already said it, that the terms of the leases now made by the department are very favorable indeed. They contain clauses permitting the cancellation of the leases, and, although the leases are made for long

terms, they can be canceled at the end of any year as the years go by.

Mr. CANDLER of Mississippi. This building on F Street has been occupied by the Forestry Service for many, many years; I do not know how long, but ever since I have been here, and that is quite a while.

Mr. HAUGEN. Mr. Chairman, I have no criticism to offer of the department, but I believe the reports brought in suggest to the committee that this matter should be investigated. I believe the department is paying a much higher rent than is paid by tenants in that vicinity. My information comes from reliable parties, and I believe there can be no question about the fact that the department is paying a higher rent than other tenants are in that vicinity, though there may be some reason for that. I am not now in position to say, and do not criticize the department; but I beg to suggest to the committee that the matter should be investigated. The comparison made of rents paid by other departments has nothing to do with the matter, because the other departments are located elsewhere, and we should compare the rents paid in that particular vicinity. I fully agree with the gentleman from Mississippi [Mr. CANDLER]. I believe that all the employees of this department should be housed under one roof. They ought to be given fireproof buildings, well lighted and ventilated. The comfort of the people employed ought to be taken into consideration as well as economy. I believe it would be a matter of economy to construct suitable office buildings, and knowing something of the interest of the chairman of the committee in securing the greatest economy and having justice done everywhere, I have full confidence that he will see that the matter is given attention and due consideration.

Mr. LEVER. Does not the gentleman think that it would be a very good idea to have a special committee of this House appointed to investigate the whole subject of rents on the part of the Government, not only in the Agriculture Department but in the War Department, the Post Office Department, and all other departments of the Government, and that such committee be authorized to make report to Congress with such suggestions as it might think wise?

Mr. HAUGEN. I would be in full accord with the suggestion of the gentleman, and also the suggestion made yesterday, that a commission or a committee be appointed to investigate as to all departments in regard to the duplication of work and waste of money year after year, to correct errors over which no committee has control. The only way it can be remedied is by cooperation of the various committees.

Mr. LEVER. The gentleman understands that the Committee on Agriculture has no authority except to call witnesses in reference to making appropriations for that department. It seems to me that a committee specifically authorized to take testimony, swear witnesses, and investigate the whole proposition of rents from the governmental standpoint in the city of Washington might be able to save to the Government hundreds of thousands of dollars in the way of rent.

Mr. HAUGEN. I think that is a good suggestion, and I hope it will be carried out.

Mr. MANN. Mr. Chairman, I would not take the floor except for the suggestion of the gentleman from South Carolina. He suggests that there should be a special committee of the House appointed for the purpose of investigating the subject of rents paid by the Government, and with the implied proposition that they should recommend the building of buildings by the Government itself. We have a very efficient committee of this House now with complete and full jurisdiction of that subject. They not only have jurisdiction, but they frequently exercise it. The Committee on Public Buildings and Grounds has at various times in the past investigated the subject of the rents paid by the Government, what buildings could properly be built by the Government and save money, although I think they have never been able to discover many instances where buildings built by the Government would be profitable as far as economy was concerned.

Mr. LEVER. Will the gentleman yield?

Mr. MANN. Certainly.

Mr. LEVER. Has the gentleman ever given any thought to the suggestion that instead of having a magnificent architectural building for the purpose of office work it would be wise economy to have an ordinary office building, such as is used by private establishments?

Mr. MANN. I have, and I think that is impracticable and impossible however much the gentleman from South Carolina and I might favor it.

Here is the Bureau of Engraving and Printing just erected. After we had authorized it, after we had commenced work, after they had let the contracts, it was held up a year or two for the purpose of getting Congress to appropriate more money to build it out of marble instead of stone. They want monumental buildings. If the gentleman gets a building in his town, he wants a monumental building. All the buildings we build throughout the country are monumental buildings. You could duplicate the buildings throughout the country and get twice the amount of space for the same amount of money.

Mr. LEVER. I think that is true.

Mr. MANN. But that never will be done. A conspicuous instance of how new Government buildings are constructed is the building for the Department of Agriculture, which has just been built. We authorized a building for the Agricultural Department, intending to have one building properly placed. What was done? First, they decided to build two wings, although the law provided for a building. They decided to build two wings, and they wanted to put them on the surface of the ground where they belonged, but along came gentlemen who had been connected with the Burnham Commission, and insisted that they should be put 10 or 20 feet below the surface of the ground, because they said the Government some day would dig away all the ground surrounding them, which is never likely to be done, and the President ordered the Department of Agriculture or the Secretary of Agriculture, over the wishes of the committee, to have the building constructed in that manner.

Mr. LEVER. In other words, we have this enormity over there on account of the use of the big stick.

Mr. MANN. The gentleman can be assured that Congress will never authorize any other Agricultural Department building located in connection with those two buildings, with the first floor way below the level of the surface, expecting some day, 50 or 100 years from now, that they will dig away the ground so as to give proper light and air to that lower story.

Mr. LEVER. I will say that Congress will never do it with my vote.

Mr. MANN. Then what is the use of talking about the subject or having a commission appointed. The Public Buildings Committee has reported a bill for a Department of Justice building to cost $3,000,000. It may be a good thing. I presume it is. Every once in a while we build a new building, but the Government service grows so rapidly that you will never be able to get out of renting buildings.

Mr. LEVER. Mr. Chairman, I do not desire to consume very much time, but I do desire to say that it does seem to me that the Government is wasting millions of dollars in the city of Washington in the character of the buildings that are being erected for officing its force. I believe that if we would adopt a plan of building skyscrapers, as suggested by the gentleman from Iowa [Mr. HAUGEN] for offices, we could save millions of dollars. Yet I appreciate the fact that Washington is the Capital city of the Nation and that our buildings should probably be of a monumental and architectural type, representing the best architecture in the country.

We are spending a great deal of money for rent, and if there could be any plan worked out to save money it ought to be worked out.

Mr. HAUGEN. I want to suggest to the gentleman that the building occupied by the Pension Department is not in line with the monumental buildings.

Mr. LEVER. Yes; and the Government Printing Office also.

Mr. Chairman, without pursuing this subject further, I trust there will be no more discussion of this rent proposition. My colleague the gentleman from Arkansas [Mr. JACOWAY] I think has presented a very comprehensive and lucid report which shows, not only great ability but great industry, and I desire on behalf of the whole committee to thank him and the subcommittee for his able presentation of the matter. [Applause.] I am glad to see this manifestation of approval of my statement in reference to my friend from Arkansas. He has been most attentive upon the work of the committee, attending all of its meetings, and has been of incalculable aid to me as chairman of the committee. I have come to rely very much upon his ability as a lawyer, his good horse sense, and his capacity for delving to the bottom of a proposition. I expect to see him grow rapidly in the esteem and confidence of this House, and these reasons induced me to make him chairman of the subcommittee to handle this delicate and most important matter of rents.

The Clerk read as follows:

Irrigation investigations: To enable the Secretary of Agriculture to investigate and report upon the laws of the States and Territories as affecting irrigation and the rights of appropriators, and of riparian proprietors and institutions relating to irrigation, and upon the use of irrigation water at home and abroad, with especial suggestions of the best methods for the utilization of irrigation waters in agriculture, and upon the use of different kinds of power and appliances for irrigation, and for the preparation and illustration of reports and bulletins on irrigation, including the employment of labor in the city of

Washington and elsewhere, rent outside of the District of Columbia, supplies, and all necessary expenses, $106,400.

Mr. MANN. Mr. Chairman, I move to strike out the last word. I do not share in a very usual complaint about duplication of work in the different departments. Undoubtedly there may be some duplication, but as a rule not. I would ask the gentleman if there is not some duplication, however, in this irrigation work in the Department of Agriculture? We now have in the Department of the Interior a very large Reclamation Service dealing with irrigation. Why is it not better qualified to investigate subjects relating to irrigation than the Department of Agriculture, which necessarily must obtain a good deal of its information from the Government reclamation projects?

Mr. LEVER. Mr. Chairman, I would say to the gentleman that as far as I am informed there is no duplication of work as between the Department of Agriculture and the Interior Department in this irrigation work. I take it that the Department of Agriculture, on account of its knowledge of agriculture, should be better informed as to this line of work than would be engineers of the Department of the Interior.

Mr. MANN. Here is a provision to report upon the laws as affecting irrigation and the right of appropriators, and of riparian proprietors and institutions relating to irrigation. Those are subjects which necessarily must be considered by the Reclamation Service.

Mr. LEVER. That may be very true, and yet the expenditure for that work is a very small item in this bill.

Mr. MANN. And also upon the use of different kinds of power and appliances for irrigation. If there is any department that ought to know about that, and must know about it, it is the Reclamation Service, which is making use of these different kinds of power and appliances.

Mr. LEVER. But the gentleman, I think, will understand that the appliances referred to in this language would be appliances that affect agriculture.

Mr. MANN. Oh, not at all. They are appliances that affect irrigation, getting water, not appliances that affect agriculture.

Mr. LEVER. Getting water on a very small scale for agricultural uses.

Mr. MANN. Not necessarily.

Mr. ANDERSON. Pumps.

Mr. MANN. Pumps? The reclamation service is engaged in pumping water for irrigation purposes. I do not question that the work may be profitably done here, but why can it not be better done by the Reclamation Service, which has grown up so rapidly in the last few years?

Mr. LEVER. Mr. Chairman, I call the gentleman's attention to the exact language:

With especial suggestions of the best methods for the utilization of irrigation waters in agriculture.

Mr. MANN. That is one portion of a very long paragraph. I have called attention to other portions to which it is not related.

Mr. HAWLEY. Mr. Chairman, will the gentleman yield?

Mr. MANN. Certainly.

Mr. HAWLEY. This item applies to other work in irrigation than those works constructed by the department. Farmers under the Cary Act project and all private projects could receive information under this.

Mr. MANN. I understand that, but the Reclamation Service must study these problems.

Mr. LEVER. That may be very true.

Mr. MANN. Why is it not better qualified to investigate and report on the subject than the Agriculture Department, which comes in and studies it anew?

Mr. LEVER. I was just about to add that while the Reclamation Service would study the proposition from an engineering point of view, the men employed under this language are studying the problem from an agricultural point of view.

Mr. MANN. So is the reclamation under all of these irrigation projects. It finds that the land gets saturated with water in some places—I forget the technical term that is used in respect to that—and the Reclamation Service has to study that. The Agricultural Department is also studying it. It may be that neither one of them has yet discovered the proper remedy, and that there is no harm in having them both study it.

Mr. LEVER. Mr. Chairman, if the gentleman from Illinois makes the statement upon knowledge of the facts, as he usually does, that the Reclamation Service is duplicating this work——

Mr. MANN. I did not say it was duplicating the work. It is studying what I have said it is studying.

Mr. LEVER. That would be duplication of work. I am very glad to have the information. I would like to see all of these lines of work concentrated under one director.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. HAWLEY. Mr. Chairman, I rise to oppose the amendment. The work done by the Reclamation Service is primarily for the purpose of getting water on land, and, following that, to secure its removal by drainage, so that its passage through the land will not cause any damage—not leave the lands waterlogged or cause pools or swamps on any portions of the land under the project. After the Reclamation Service has got the water on the land and provided drainage to get the water off the land its function is ended. It may study these other questions about agriculture or the relation of the growth of plants to the lands simply as an aid to determine what they ought to do in the matter of drainage——

Mr. LEVER. And as an incident to their work.

Mr. HAWLEY. And as an incident to their work; but the irrigation work done under this item in the bill is for the purpose of illustrating to farmers how to use water, how much water to put on the land for a given crop, how much at a given time, at what season to put it on, and also to advise the farmer in the matter of appliances to determine how to distribute his water and also the matter of the construction of gates and ditches and the dividing of his land into sections, so that the water from one section may be carried to another; and if the water is alkaline, how it may be drawn off, so that the alkaline deposits will not cause damage to the land.

The Agricultural Department studies those questions simply from the standpoint of growing the crops on the land. It only takes up the engineering features in a very minor way in order to determine for the farmers how to get the water distributed on their lands and to get it off again when it has been used.

Mr. BORLAND. Will the gentleman yield?

Mr. HAWLEY. With pleasure.

Mr. BORLAND. My understanding is the Reclamation Service, after it got some of these projects started, was unable to get the farmers to successfully use the land.

Mr. HAWLEY. The farmers had difficulties in farming the lands.

Mr. BORLAND. And in order to encourage the farmers to use the water in this direction they established some sort of agricultural experimental institutions.

Mr. HAWLEY. Yes; experimental farms.

Mr. BORLAND. Was that originally inaugurated by the irrigation people themselves?

Mr. HAWLEY. It was done at the request of the people, I think.

Mr. BORLAND. Is this the same work?

Mr. HAWLEY. That work is only a small portion of this work.

Mr. BORLAND. My understanding was it was to be taken out from under the Reclamation Service, not being under their jurisdiction, being engineering, and put in under the Agricultural Department. Is that true?

Mr. HAWLEY. The experiment farms, so far as I know, are put under the Department of Agriculture, and we provide for them year after year.

Mr. BORLAND. Are those covered in this item?

Mr. HAWLEY. They would probably be included in this.

Mr. LEVER. If the gentleman will yield to me for a moment. I call the attention of the gentleman from Missouri that we have appropriated in this to do demonstration work on these reclamation projects.

Mr. HAWLEY. That is not in reference to the farms he speaks of.

Mr. MOORE. Mr. Chairman, I move to strike out the last two words. I did not want to interrupt the gentleman from Oregon when he was answering questions of others, but I would like to know now if he can tell how much it costs per acre to prepare and irrigate land?

Mr. HAWLEY. That would depend entirely upon the nature of the soil, what slope it had, and many other factors that enter into it which make it difficult to give an estimate.

Mr. MOORE. I have heard it reported that it costs approximately $40 an acre.

Mr. HAWLEY. On the Klamath project, with which I am more intimately acquainted, it costs $30 an acre, but it is almost all a gravity system.

Mr. MOORE. The gentleman from South Carolina discussed yesterday the duplication of appropriations, which the gentleman probably heard.

Mr. HAWLEY. Yes.

Mr. MOORE. Is this work which you are now providing for covered by any other bureau of the Government?

Mr. HAWLEY. Not that I know of.

Mr. MOORE. What does it mean—this $106,400 for furnishing legal information to men who start irrigation projects?

Mr. HAWLEY. It is for the study of questions of farming under irrigation; as to how the water should be used and the time it should be used, the amount of water for different kinds of crops and the effect of its use on the growing of crops, and the drainage of the water off at different seasons. How much and when there should be irrigation for certain crops; and all questions connected with the growing of crops under irrigation where water is placed on the land by artificial means, and so they may study the laws and know what they can do within the limits of the State laws in regard to the appropriation of water. But the amount expended under that, as I say, will be infinitesimal.

Mr. MOORE. The gentleman said in the earlier part of his remarks that this would come under the head of demonstration work, but this paragraph provides for—

a report upon the laws of the States and Territories as affecting irrigation and the rights of appropriators and of riparian proprietors and institutions relating to irrigation.

Now, does that mean we are to employ lawyers to advise farmers or those who manage irrigation projects how they are to conduct their business?

Mr. HAWLEY. It seems to me that in the work of aiding in the solution of these problems the department will necessarily have to know these facts, would have to know the laws of the States, so as to advise the farmers correctly. The gentleman will understand that this part is infinitesimal, and probably will be done by the solicitors of the Department of Agriculture, without employing any additional assistance.

Mr. MOORE. How many men would be employed to furnish this information to the farmers?

Mr. HAWLEY. I should say there would not be any others but the solicitors employed in the department.

Mr. MOORE. Does the gentleman know how many there are there?

Mr. HAWLEY. I do not.

Mr. MANN. In the Department of Agriculture? Why, there are more than you can count on your fingers.

Mr. MOORE. It suggests itself to me that apparently this does not go into demonstration work. I have no special objection to demonstration work for the benefit of the farmer, but it seems to me we are going rather rapidly if we are to employ attorneys and furnish legal advice to people who start out on irrigation projects and advise them in regard to riparian rights or the rights of appropriators.

Mr. HAWLEY. No special attorney is employed for this work. The attorneys in the department already furnish the information that is needed.

Mr. MANN. There are 26 lawyers now in the department, in the Solicitor's office.

Mr. MOORE. Then that is not an "infinitesimal" number of men employed to furnish information. I call attention to the fact that we do not employ lawyers, so far as I know, to give legal advice to any branch of industry. We do not employ lawyers—I mean, the Government does not—nor do we make appropriations therefor, to tell people how to avoid accidents or how to bring suits for injuries as the result of their occupation in the mills.

Mr. HAWLEY. Will the gentleman yield?

Mr. MOORE. Yes.

Mr. HAWLEY. We employ lawyers in certain departments. For instance, in the Bureau of Mines, and the results of their work are incorporated in bulletins sent out by that department, so that legal information goes out along with the rest of it. And in the Bureau of Labor we have employed lawyers, and they have compiled many publications, giving a synopsis of the labor laws.

Mr. MOORE. Does this paragraph mean that if I buy a farm and a question of riparian ownership arises——

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. MOORE] has expired.

Mr. MOORE. Mr. Chairman, I ask unanimous consent for three minutes more.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent for three minutes more. Is there objection? [After a pause.] The Chair hears none.

Mr. MOORE. Does this mean that if I buy a farm and want to know something about my riparian rights or if I want to know something about the rights of irrigation, in a controversy with some one else, I can get that legal information from the Department of Agriculture?

Mr. MANN. I will suggest to the gentleman that if he will buy a farm any member of the Committee on Agriculture will give him all the information he wants—scientific, legal, or otherwise.

Mr. MOORE. If I was as well to do as the gentleman from Chicago is, and had as much love for agriculture as he has, which I dare say I have, without being able to indulge it, I would buy a farm. But I am not situated as is the gentleman from Illinois. He is most fortunate in having a little farm of his own, but he ought not to throw it up to one who has not.

Mr. HAWLEY. I will say that if the gentleman is on a reclamation project, and various subjects being studied, including the legal phases of the use of water and riparian rights, and he should ask some demonstrator as to the rights he had and what the law was in the case, and the demonstrator knew, he would tell him, and ought to tell him.

Mr. MOORE. The difference is just this. I do not object to this item, because, as I have said many times, I want the farmers to have the value of all the appropriations and all good law they can get. But it does seem odd that in the case of a man who conducts an enterprise in a city, that much of the law we pass is employed to harass him and put him out of business. This is the first time I have learned that lawyers are employed by the Government to protect the settler in his riparian rights.

Mr. HAWLEY. Do you not think it is good work for a lawyer to do?

Mr. MOORE. If there is anything that we have not done for the lawyer, in adding to the confusion of laws, I have failed to see it since I have been in the House. I think we have done much for the lawyer and are continuing to do it all the time.

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. MOORE] has expired. The Clerk will read.

The Clerk read as follows:

Drainage investigations: To enable the Secretary of Agriculture to investigate and report upon the drainage of swamp and other wet lands which may be made available for agricultural purposes, and to prepare plans for the removal of surplus waters by drainage from such lands, and for the preparation and illustration of reports and bulletins on drainage, including the employment of labor in the city of Washington and elsewhere, rent outside of the District of Columbia, supplies, and all necessary expenses, $96,280.

Mr. STAFFORD. I move to strike out the last word. I notice in an examination of the estimates that this item is an instance of the rapid growth of the appropriations for the Agricultural Department. Less than 10 years ago, in 1906, we merely appropriated $37,100 for this item of service. It has almost trebled in 7 years, until it has now nearly reached the $100,000 mark.

I wish to inquire of the chairman of the committee what is the necessity of carrying on this work year in and year out? It would seem to me that with all these appropriations that we have given to the Agricultural Department, which I understand is employed largely for engineers, a large part of them employed here, one-fourth of this amount being in salaries and administrative expense here in Washington, that some day or other they might be able to finish their investigations, at least to an extent that would permit of a reduction in the expenditure.

Mr. LEVER. I would say to the gentleman from Wisconsin, the fact that this item is said to have grown rapidly is not a criticism against the item. As a matter of fact, the item has been remaining stationary for about five or six years, as I recall it.

Mr. STAFFORD. I think the gentleman is in error as to that. It was $100,000 last year and $100,000 the year before that, but prior to that it was $78,000 or less.

Mr. LEVER. The chairman was not very much mistaken. It is a pretty close guess.

Mr. STAFFORD. It is still up to the $100,000 mark.

Mr. LEVER. It is not quite $100,000 now.

Mr. STAFFORD. Of course, we do not consider $2,000 in a $100,000 item.

Mr. LEVER. We do not very much consider a difference of $20,000 either. The gentleman will realize, of course, that all the appropriations of the Department of Agriculture have been rapidly increasing, and they have been rapidly increasing upon the suggestion of the House of Representatives; and when the House of Representatives has shown any disposition not to be generous in that respect, gentlemen at the other end of the Capitol have taken care of the situation. It has been only 27 years since the Department of Agriculture was organized, or about that length of time, when there were no appropriations at all. Now we are spending practically $19,000,000 a year. And it shows this: That the agricultural interests of this country have had vigilant and industrious Members of Congress to take care of them on the floor of this House. So far as I am concerned, I am willing to appropriate every dollar that I be-

lieve to be necessary for the promotion of the greatest industry of the people of the United States; an industry that takes care of the largest percentage of the people of our country.

Mr. STAFFORD. Here is an item for investigation and report. I would assume from that language that they would some day or other complete their investigation and report. Now, will the gentleman inform the committee and give us some information as to this specific item, as to the necessity for continuing this large appropriation for investigation and report upon drainage?

Mr. LEVER. I will say to the gentleman that there are hundreds of millions of acres of overflowed and swamp lands in the United States. The department is having each day an increasing demand for the use of its engineers in cooperating with local authorities to make surveys and suggestions as to the cost of the work of drainage after the survey has been made. The gentleman understands, of course, that the Department of Agriculture under this item does not do any actual drainage work, but only makes the survey, estimates the cost, and then retires from the field.

Mr. STAFFORD. Not only that, but it prepares the reports and illustrates them, and I presume, under the phraseology here, sends out bulletins.

Mr. LEVER. I take it that that language means bulletins of a general nature on the subject of drainage.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HAWLEY. Mr. Chairman, I would like to be heard in opposition to the amendment.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent to proceed for five minutes more, inasmuch as the gentleman from South Carolina has occupied most of the time.

The CHAIRMAN. The gentleman from Wisconsin [Mr. STAFFORD] asks unanimous consent to proceed for five minutes more. Is there objection?

There was no objection.

Mr. STAFFORD. Now, Mr. Chairman——

Mr. LEVER. Let me give the gentleman an illustration. I will use an illustration in my own State, because I am more familiar with that than with any other. A former Representative—Mr. Ellerbe—of this body secured a drainage survey of a South Carolina district near Georgetown. The department sent its experts. They made their survey and submitted their estimates of cost, and then, as I said a moment ago, retired from the field. The local community did the actual work of drainage, in accordance with the plan submitted by the Department of Agriculture.

The result was the reclamation and opening for settlement of many thousand acres—I do not recall how many thousand acres—of the best land in the lower part of South Carolina. The land was divided into small farms of about 50 acres, I think, and immigrants from the East have come down there and purchased those farms and built up a truck business and established a splendid community where before there was nothing but underbrush and swamps and the like of that.

Mr. STAFFORD. Is there any information furnished by the bureau as to when this work will be completed in the Southern States? I believe five-sixths of this work is being done in the Southern States.

Mr. LEVER. I do not know how the work is being distributed, because I do not carry it in my head, but the testimony taken before the committee shows that the surveys during the year 1913 covered 1,000,000 acres of land.

Mr. STAFFORD. Do the hearings disclose when this work is likely to be completed, so far as the territory in which they are now engaged is concerned?

Mr. LEVER. Oh, I will say that, if it is the will of Congress, this work will be of an indefinite nature.

Mr. STAFFORD. They will keep on indefinitely doing this character of work in the Southern States?

Mr. BORLAND. Mr. Chairman, I wish to say that there is more land subject to drainage in this country than is subject to any other kind of reclamation.

Mr. STAFFORD. There is a great deal of land in the Northern States which is subject to drainage, but nothing seems to have been done for those lands——

Mr. BORLAND. There is more land in the Southern States subject to drainage than anywhere else——

Mr. STAFFORD. And I agree with the gentleman that it is a good project to make them utilizable for cultivation.

The CHAIRMAN. The time of the gentleman from Wisconsin [Mr. STAFFORD] has expired.

Mr. LEVER. Mr. Chairman, I would like to have two minutes.

The CHAIRMAN. Without objection, the gentleman from South Carolina will proceed for two minutes.

There was no objection.

Mr. LEVER. Mr. Chairman, I would not like it to go into the RECORD that five-sixths of this work is being done in the South unless the gentleman has positive information on the subject.

Mr. STAFFORD. Well, I have before me the statement of the Department of Agriculture under this very item, and it gives seriatim the amount expended in the various States, and by glancing over those items the gentleman will see that five-sixths of the appropriation at least is expended in the Southern States. I do not believe the gentleman will gainsay the statement that there is as large a territory in the North suitable for drainage purposes as there is in the South.

Mr. LEVER. If the gentleman's statement is true—and I have no doubt it is, although I have not the facts at hand to dispute it, and would not attempt to dispute it if I had the facts—if the statement is true, it argues two propositions—first, that the former administration of this department, under Secretary James Wilson, was a nonpartisan, nonpolitical administration, so far as the South was concerned; and, second, it argues that Members from the South, realizing the great opportunities in their sections for development, have been, maybe, a little bit more enthusiastic and energetic in taking care of the interests of their sections than have been gentlemen from other sections of the country.

Mr. STAFFORD. There can not be any question of the statement of expenditures, which, I assumed, was fully within the knowledge of the chairman of the committee—that more than five-sixths of this work had been performed in the Southern States. The statement is here.

Mr. LEVER. I do not question that, and the reason for it is the reason I have suggested.

The CHAIRMAN. The time of the gentleman from South Carolina has expired.

Mr. LINTHICUM. Mr. Chairman, I ask unanimous consent that the gentleman from South Carolina [Mr. LEVER] be allowed two minutes in which to answer a question I will propound.

The CHAIRMAN. The gentleman from Maryland [Mr. LINTHICUM] asks unanimous consent that the gentleman from South Carolina [Mr. LEVER] be allowed two minutes. Is there objection?

There was no objection.

Mr. LINTHICUM. Mr. Chairman, I will say to the gentleman from South Carolina that we have a great deal of swamp land in our State of Maryland, and I know of no work of consequence of this kind that has been done there. I would like to know how you get this work started, and how we could secure some survey in that region?

Mr. LEVER. If the people of a neighborhood interested in this work show some enthusiasm to follow up the work after the survey is made, I have no doubt the gentleman could get an expert from the department to go there and make a survey.

Mr. LINTHICUM. How would you get a survey? We have a great deal of this land near the city, and that breeds mosquitoes, of course, and we would like to get rid of them.

Mr. GARNER. This bill, you know, is simply in the interest of agriculture.

Mr. LINTHICUM. Well, I will say that this land is splendid land for agricultural purposes, and some of it has naturally drained itself and is being used for agricultural purposes. How do you get a survey for it?

Mr. LEVER. If the gentleman will get his constituents—and I understand the gentleman's constituents include, or will shortly include, the whole State of Maryland——

Mr. LINTHICUM. I thank the gentleman for his compliment——

Mr. LEVER. If the gentleman will get them to organize a drainage district and make application to the Department of Agriculture, and make a showing that they are willing, after the surveys have been furnished, to follow them up with actual drainage, I do not think he would have any trouble in getting experts to make the survey.

Mr. LINTHICUM. I thank the gentleman for his information.

Mr. TRIBBLE. Mr. Chairman, I move to strike out the last two words.

The CHAIRMAN. The gentleman from Georgia [Mr. TRIBBLE] moves to strike out the last two words.

Mr. TRIBBLE. Mr. Chairman, before this section is passed, I ask the gentlemen of this committee to agree to an amendment. I feel they should offer one for the committee increasing this appropriation. It is one of the most important appropriations carried in this bill. Some time since I introduced a bill

providing for an appropriation of $300,000 for drainage purposes.

The gentleman from Maryalnd [Mr. LINTHICUM] has asked some questions I will undertake to answer. I had the pleasure in my district of seeing one of these draining projects carried to successful completion. It created a great deal of enthusiasm in the district to see the process by which these swamp lands were being drained. It interested many men in the district who had any swamp land, and they came from 25 to 200 miles to see those great plows at work cutting channels and draining the swamp. After this drainage project was carried through successfully, I had repeated requests from my district for Government engineers, and I went to the bureau and almost begged for surveyors to go to my district and survey these lands and give these people an opportunity to drain the swamps, but for two years, since the first survey was made, I have obtained only two additional engineers to survey other projects. As I said, I have had numerous and repeated calls for help from the Government. I went to the department, but those in charge of this bureau would tell me, "We have not sufficient money; we can not send an engineer there to make the survey?"

From remarks made by other gentlemen who are interested in surveying these swamp lands and draining them, I believe that the able gentlemen of the committee, who are interested in every project that is succeeding as this one is succeeding, as everyone knows, should increase this appropriation. It ought to be at least $300,000 instead of $96,000. Gentlemen, give us at least $300,000. This Government should not delay support to the farmers of this country in draining swamp lands.

Mr. BRYAN. Mr. Chairman, I merely want to make this observation: The suggestion has been made that most of this money is spent in the South, and it is true, no doubt, that most of it is spent in the South. The lands in the South, along the Mississippi River and along the Gulf of Mexico, are naturally on a lower level than the mountainous and higher lands of the North. But who is going to say that it is any more the duty of the South to bear the burden of the drainage of these particular lands than it is the duty of the owners of the lands of the North, on the higher ground, to bear the necessary burden incident to the removal of the flood waters that run down from the mountain peaks and cover the fields? So, while it is true that this land is low, while it is true that the alluvial lands of the Mississippi, for instance, need artificial drainage, it is just as true that the higher lands of the North need similar attention. So I think this is one of the biggest problems and one of the most important matters that can possibly be presented in an Agricultural appropriation bill. I am heartily in favor of granting as much money as may be necessary for this purpose.

Mr. STEPHENS of Texas. Will the gentleman yield?

Mr. BRYAN. Certainly.

Mr. STEPHENS of Texas. Is it not a fact that we have spent about $70,000,000 in the arid portions of the West, most of which has gone to the North, and does not that far more than offset the very small amount of money that is going to the South, so that it should not create any sectional question on this floor?

Mr. BRYAN. Indeed, the people of the Northwest are very proud of the attention which the dry and arid plains in certain parts of the West and Northwest have received from the Reclamation Service, and the money that has been appropriated; so that I do not consider that this ought to be looked upon in any sense as a sectional matter. [Applause.]

The CHAIRMAN. The gentleman from Illinois is recognized in opposition to the motion to strike out the last two words.

Mr. FOSTER. I remember a year or two ago when this matter was under consideration on the Agricultural appropriation bill I offered an amendment to increase this appropriation so as to take care of these swamp and overflowed lands wherever they might be. That amendment was ruled out of order, and I think my colleague from Illinois [Mr. MANN] made the point of order. At least he had something to say about it, and he said this was intended for lands belonging to the Government, if I have a right recollection about the matter. Now it appears that this money has been used upon private lands. I do not know where we stand to-day on this proposition.

Mr. MANN. If my colleague will yield——

Mr. FOSTER. I yield to my colleague.

Mr. MANN. I reserved a point of order on one or two occasions on this item and another item in this bill, and stated that unless they could show that they were doing some good with this item on the next occasion I should make the point of order. I think they are doing good with this work. Gentlemen have referred to the fact that the appropriation is being used largely in the South. In many cases work is being done under this appropriation, which was done by organizations forming themselves into drainage districts in the North, where the land was more valuable after it was drained than it is in many of these places in the South. But we have undertaken to give paternal advice to all the farmers about everything they do——

Mr. FOSTER. So that since my amendment was offered and ruled out of order it has become the custom to use this fund upon private lands?

Mr. MANN. I think it is being used upon private lands. A good deal of this fund was used at one time upon State lands in Florida. There was a good deal of criticism in reference to something of the kind down there, as the gentleman knows.

Mr. LEVER. Mr. Chairman, I would not like to have the statement go into the RECORD that this fund is being used for the survey of private lands, except in this way: The fund is never used unless the people of a community get together and agree to pool their interests and organize themselves into a drainage district for the purpose of having a survey made. The fund has been used for surveys in a community sense and not for private lands.

Mr. MANN. It is private land as distinguished from Government land.

Mr. LEVER. Yes; private land as distinguished from Government land.

Mr. FOSTER. That is all I meant.

Mr. MURDOCK. An individual could not get it done.

Mr. LEVER. No.

Mr. FOSTER. I want to say, Mr. Chairman, that I am very much in favor of this proposition, because some of the best lands that have been reclaimed in the United States were formerly swamp and overflowed lands, and I think the Government can well afford to spend something for this work. I wish we might do more to help along in this good undertaking.

Mr. MADDEN. Does my colleague know whether any actual drainage work is done out of this fund?

Mr. FOSTER. I understand from statements made here that nothing is done except engineering work.

Mr. MADDEN. The Bureau of Entomology sometimes employs a thousand men in cutting brush.

Mr. FOSTER. I suppose that is for the purpose of getting rid of insects.

Mr. MADDEN. They cut brush—use axes and scythes in the actual work of brush cutting.

Mr. MURDOCK. On private property?

Mr. MADDEN. On private property, purely a local activity. It ought not to be done out of the Government appropriation. I wanted to know whether any of the expenditure out of this fund was for the actual work of draining.

Mr. LEVER. Not at all; and in reply to the suggestion which the gentleman has made I will say that in the fight against the brown-tail moth they have employed laborers for the purpose of cutting brush, in trying to prevent the spread of the brown-tail and gypsy moths, at certain seasons of the year. But I believe that expenditure is justified, because we do the same thing in regard to the cattle tick.

Mr. MADDEN. I do not think it is justified. I do not think it ought to be allowed.

Mr. FOSTER. Mr. Chairman, I wanted to call attention to these matters because I am interested in it and tried a year ago to do something more, but at that time I was thrown overboard. I am glad to see that at this time more interest is taken in it.

Mr. STEPHENS of Texas. Mr. Chairman, I desire to ask unanimous consent to return to the bottom of page 60 to ask a question. There is a provision—

To enable the Secretary of Agriculture to investigate and report upon the laws of the States and Territories as affecting irrigation and the rights of appropriators, and of riparian proprietors and institutions relating to irrigation—

And so forth.

I desire to ask if there would be any objection to returning to line 25, so that I might offer an amendment to include "Indians as individuals or as tribes." That would be done for the purpose of eliminating a question of very serious import to the Indians. It was recommended by the department and stricken out of the Indian bill on a point of order. Some State laws are contrary to the laws of the United States on irrigation matters, and for the protection of the Indians there ought to be an investigation, and if this money is to be expended for this purpose I think some of it ought to go to the wards of the Government.

Mr. LEVER. I have had no opportunity to study that question, and I will say to the gentleman that I can not consent to

go back to it. If the gentleman will call my attention to it before making up the next bill, I will look into it.

Mr. STEPHENS of Texas. I shall be glad to do so.

The Clerk read as follows:

OFFICE OF PUBLIC ROADS.

Salaries, Office of Public Roads: One director, who shall be a scientist and have charge of all scientific and technical work, $5,000; 1 chief clerk, $1,900; 1 clerk, class 4; 3 clerks, class 3; 1 clerk, $1,500; 1 clerk, $1,440; 1 clerk or instrument maker, $1,440; 1 clerk or tabulator, $1,440; 1 clerk, $1,380; 2 clerks, at $1,320 each; 4 clerks, at $1,260 each; 3 clerks, class 1; 1 clerk or photographer, $1,200; 1 clerk or photographer, $1,000; 2 clerks, at $1,140 each; 2 clerks, at $1,080 each; 1 clerk, $1,020; 4 clerks, at $1,000 each; 1 clerk, $900; 1 clerk or instrument maker, $1,200; 1 messenger or laboratory helper, $840; 2 messengers, laborers, or laboratory helpers, at $720 each; 1 messenger or laborer, $660; 4 messengers, laborers, or messenger boys, at $600 each; 1 laborer or messenger boy, $480; 2 messenger boys, at $480 each; 2 charwomen, at $240 each; in all, $53,000.

Mr. MADDEN. Mr. Chairman, I make a point of order against the increase in the compensation of the director.

Mr. LEVER. Mr. Chairman, I concede the point of order.

The CHAIRMAN. The point of order is sustained.

Mr. LEVER. Mr. Chairman, I move to amend by inserting, in line 23, page 61, after the word "work," the figures "$4,000."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 61, line 23, insert, after the word "work," "$4,000."

Mr. DIES. Mr. Chairman, would it be in order to reduce this to $3,000 or $2,000?

Mr. MURDOCK. If you have the votes. [Laughter.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Carolina.

The question was taken, and the amendment was agreed to.

Mr. MADDEN. Mr. Chairman, I move to strike out the last word. I notice the appropriation for the office of director of good roads has been increased from $279,400 to $353,060, making an increase of $73,660. I would like to ask the gentleman from South Carolina what the special need is of this added appropriation for the bureau?

Mr. LEVER. I will ask the gentleman to take that up when we have finished the statutory roll. All that increase is set out in the various items, and I will explain it as we come to it.

Mr. MADDEN. There are a number of new clerks in this item.

Mr. LEVER. No; we have added only one clerk; the others are all transfers from a lump sum, and is only a change of title.

Mr. MADDEN. They were in the bureau?

Mr. LEVER. Yes.

Mr. BARKLEY. Mr. Chairman, I move to strike out the last word. I want to ask the gentleman a question. Has the committee taken into consideration the good-roads appropriation bill passed by the House, and which we hope will be passed by the Senate?

Mr. LEVER. The statutory roll? The department asked for one clerk or tabulator on account of the work which is being done in cooperation with the Post Office Department in respect to that item of $500,000 in the Post Office appropriation bill for Rural Delivery Service roads. The other item in the bill, general expenses, has been increased for the purpose of taking care of the anticipated legislation.

Mr. BARKLEY. Then the bill that has passed the House has been taken into consideration in providing for the general expenses of the road department?

Mr. LEVER. Yes.

The Clerk read as follows:

For inquiries in regard to systems of road management throughout the United States and for giving expert advice on this subject, $44,800.

Mr. FOWLER. Mr. Chairman, I move to strike out the last word. What character of expert advice is expected to be obtained as provided for in this paragraph?

Mr. LEVER. I will say to the gentleman that the plan of the department is to give expert advice in the best method of road building, road management, and road maintenance through experts and lectures and by the method of personal contact.

Mr. FOWLER. In what way is the compensation to be given for that expert advice? By employing experts for any given length of time, or in what way is it to be done?

Mr. LEVER. Experts, of course, are provided for by the fund fixed in this bill.

Mr. FOWLER. I want to know how we get the benefit of the expert advice, and then how that advice is to be paid for.

Mr. LEVER. It is to be paid for by this appropriation. How else could it be paid? The advice is to be given in the form of lectures, personal contact in the way of demonstration, by the way of bulletins, and the usual ways of getting information to the people.

Mr. FOWLER. Is it proposed by the department to take in an expert, sit down, and counsel with him as a client would with his lawyer, get a diagnosis of the matter, and then charge for it?

Mr. LEVER. Oh, no. The work is done by sending out to the field these experts from the Department of Agriculture, who have the information that the department has gathered from time to time in its research work, and through these men carry the information to the people of the country who desire it.

Mr. FOWLER. Where the road building is being done?

Mr. LEVER. Yes.

Mr. FOWLER. That is the information I was after. If it is to be paid in that way, I can see no objection to it, but if it is to be used simply for the purpose of having some one dignified high enough to be called an expert just for counsel, I can see no use for it whatever.

Mr. LEVER. I would be as strongly opposed to it as the gentleman would, if I thought it was being expended in that way, but that is not the fact.

Mr. FOWLER. The gentleman means, then, that some man who is well versed in good road building is to be sent out where roads are being constructed in order to instruct the people as to the best method of construction.

Mr. LEVER. To supervise, for instance, the building of a mile of model road, or to come in contact with the county or township supervisor and give him information as to the best methods of building a road under local conditions, and as to the best methods of maintaining the road, and the gentleman understands that this is a very important factor; and in addition to this, information is given as to the best materials to be used, the kind of bridges and culverts to be built, and all of the various things that go into making a good road.

Mr. FOWLER. It is well known that there is not a general knowledge of how to construct good roads.

Mr. LEVER. That is true, and I think that lack of knowledge in this respect is costing the people of this country hundreds of millions of dollars a year.

Mr. FOWLER. Probably millions wasted that way simply because of a want of knowledge how to construct a road.

Mr. LEVER. If we could confine the estimate to millions, and not carry it into hundreds of millions, I think we would be fortunate.

Mr. FOWLER. If the gentleman is making that kind of provision, to send out men who are thoroughly versed in the construction of good roads, I want to bid him Godspeed and say he could not do better work for the benefit of the people of this country.

Mr. CANDLER of Mississippi. Mr. Chairman, if the gentleman will give me his attention, I can give him a concrete case right along the line he is inquiring about. Not a great while ago one of the counties in my district authorized the issuance of bonds in the sum of $100,000 for the construction of roads. The question at issue was whether or not the road materials out of which the roads could be constructed were accessible in that immediate vicinity. The Director of the Office of Public Roads, at my instance, sent one of these experts down there, who examined the materials at hand. He went through it very carefully and advised the officials of the county and the people with reference to it, and it was found that the roads could be constructed out of the very material they had right there, which saved thousands of dollars to these people.

The Clerk read as follows:

For investigations of the best methods of road making, especially ordinary sand-clay and dirt roads, and the best kinds of road-making materials, and for furnishing expert advice on road building and maintenance, $145,000.

Mr. RUBEY. Mr. Chairman, I move to strike out the last word. I do this for the purpose of making a few observations upon the manner in which the Office of Public Roads is being conducted as at present constituted. I take it, Mr. Chairman, that this office was created for the purpose of having the Government cooperate with the States, with the subdivisions thereof, and with the people of the States in the improvement of roads. A short time after I came to Congress it occurred to me that I might be able to give my people some valuable help in road improvement if I should send out to the road overseers and the teachers of my district bulletins upon the subject of road construction. I secured from the Office of Public Roads all of the available bulletins. I made a very careful examination of these bulletins, and I say to you gentlemen, that I found but two bulletins, one on the use of the split-log drag on dirt roads and the other upon the value of improved roads, that were of any practical benefit to the people out in my country. I found plenty of bulletins, but they all had reference to the building of high-grade, high-class roads. I found pamphlets issued on

dust prevention and on materials for binders on motor roads and things of that sort. The people of my country, and I may say the masses of the people throughout the length and breadth of the land, are not able to build these expensive boulevard roads, costing from $10,000 to $25,000 a mile. They are able and willing to build roads at a moderate cost, and are very anxious to get information as to how those roads can be constructed. They are not concerned as to the matter of dust prevention, but they want to know how to get rid of the mud. They can stand a little dust, but they would like to be informed as to the best method of constructing and grading to the end that the water may be kept off the road in the rainy season. The only criticism, and that is a serious one, which I have to offer against the management of the Office of Public Roads is that too much attention and too much money are given to high-class, expensive road building and not enough to road construction at moderate cost.

Mr. YOUNG of Texas. Mr. Chairman, will the gentleman yield?

Mr. RUBEY. Yes.

Mr. YOUNG of Texas. I will ask the gentleman if in this bill we did not try to meet that question by inserting the language which he will find on page 63?

Mr. RUBEY. Yes; we inserted in this bill the language—

Especially ordinary sand-clay and dirt roads.

We did that in order to meet this particular phase of the question.

Mr. MURDOCK. Is that new this year?

Mr. YOUNG of Texas. Yes.

Mr. RUBEY. Mr. Chairman, as I was saying, the only criticism I have is that too much money is spent on expensive roads and not enough on dirt roads. This House has twice gone on record and has spoken by its votes to the people of the United States in favor of the building up of the country roads. I voice the sentiment of every member of the Committee on Agriculture, and I speak the opinion, I believe, of four-fifths of the Members of this House, when I say that national aid should be extended to the construction and maintenance of those roads which extend from the farmer's home to the market place.

Why was the Office of Public Roads made a part of the great Department of Agriculture? Was it intended that it should direct its efforts to the building of military roads? No; if that had been the purpose it would have been connected with the Department of War. Was it placed there for the purpose of building interstate highways over which to carry the commerce from State to State? No; if so it would have been placed in the Department of Commerce and would to-day, probably, be under the Interstate Commerce Commission.

The CHAIRMAN. The time of the gentleman has expired.

Mr. LEE of Georgia. Mr. Chairman, I ask unanimous consent that the gentleman may proceed for five minutes.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent that the gentleman may proceed for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. RUBEY. Mr. Chairman, I will not use all of that time, but I thank the gentleman from Georgia for his courtesy. Gentlemen, it was intended that the Office of Public Roads should be directed toward the improvement of those roads over which the products of the farm are carried to market, and for that reason it was made a part of the Department of Agriculture. Let us read what the distinguished Secretary of Agriculture says in his report:

What roads should be improved is a matter of great moment.

Now listen to this:

Unmistakably the roads of greatest economic and social importance are those over which the products of the farm can be taken to the nearest railway station and which minister to the entire economic and social needs of the community.

So you see, gentlemen, the Secretary of Agriculture says the market road is the important road, and his conclusions are the same as those of the House of Representatives itself.

Mr. MURDOCK. Will the gentleman yield?

Mr. RUBEY. I will.

Mr. MURDOCK. The gentleman said that he sent various road bulletins to his constituents. Did the gentleman go any further in this matter in reference to roads with his constituents?

Mr. RUBEY. I said I found only two that I could send out, and I sent those out.

Mr. MURDOCK. Did the gentleman get any results from them, did the gentleman ever hear from his constituency in reference to them?

Mr. RUBEY. I get many letters from my constituents. I have endeavored to induce the public-school teachers, 1,100 of them in my district, to teach the boys and girls of the schools the value of good roads, and I have sent out all the bulletins I could get, which I deem valuable to them, and have received many letters, and I know that much good work is being done by the teachers toward instructing the boys and girls the importance of building good roads.

Mr. MURDOCK. May I ask the gentleman what would he do, if he had the right to do it in reference to this item, toward increasing its utility?

Mr. RUBEY. I do not think there is anything that can be done now, but I want to sound a warning, which I hope will reach the proper source, and that in the future we will get the results we desire without any legislation whatever.

Mr. MURDOCK. That is, the department will give some attention to the dirt and clay roads rather than the macadamized roads?

Mr. RUBEY. That is exactly what I am endeavoring to do—to impress upon those who have charge of the Office of Public Roads that the Congress of the United States believes in the building of country roads; and I believe that when they realize that they will follow out our wishes in the matter.

Just a word more, Mr. Chairman. There has been a great awakening in road building throughout the United States. The Secretary of Agriculture tells us that 10 years ago the States spent $2,000,000 for road building, and that in the year 1912 that sum had been increased to $43,000,000, an increase in 10 years of over 2,000 per cent, and there was even a greater increase in 1913. In my State alone it has been estimated that last year we spent $8,000,000 for the improvement of the roads. If, Mr. Chairman, in the midst of this great awakening the Director of the Office of Public Roads will cooperate with the people of the country, if he for a moment will lay aside his high ideals of high-priced roads and get away from the building of boulevards between cities and go out into the country among the plain people and assist them in road building, he will accomplish great results in the improvement of the roads in all parts of the country. [Applause.]

Mr. GRAY. Mr. Chairman, the improvement of the transportation facilities of the country districts has become a vital necessity of the times. Good roads are imperatively demanded to articulate with the railways, and to connect and bring together the farm and the factory, the garden and the workshop, the food producers in the country and the food consumers in the towns, cities, and industrial centers.

We hear much to-day not only about the high price of food products but about the scarcity of the supply and the consequent high cost of living to the people who must depend upon others. Thus far we have been unable not only to solve the problem of high cost but to explain why high prices have not stimulated production and brought us an adequate supply. It would be presumptious for me to claim a full solution of this great problem, but I want to offer one reason for this economic condition and to suggest at least a partial remedy.

In order to understand the present it is necessary for us to know something about the past. In order for us to understand contemporaneous history we must know something about ancient, medieval, and modern history. In order to understand our system of government it is necessary to know something about the system of other Governments. And so, in order to understand the economic and industrial conditions of to-day, it is necessary for us to know something about the economic and industrial conditions of former days.

In the early history of our country every man produced enough with his own hands and under his own roof to supply all or a greater part of his wants, or his wants were supplied from the same crossroad, village, or city in which he lived. Every man provided all or a greater part of his own food supply—his vegetables, his meat, and even his milk. No matter whether a professional man, a business man, a laboring man, or skilled mechanic, he cultivated his own garden, raised his own meat, kept his own cow, or he obtained his supply from his next-door or near-by neighbor. In other words, production and consumption went on at the same place, and the vital necessity of transportation facilities between producer and consumer to enable them to live did not exist as it does to-day.

Now, looking at the present day we find that production and consumption are widely separated. We find that production goes on at one place and consumption at another place often remote and distant.

Mr. JOHNSON of Washington. Will the gentleman yield?

The CHAIRMAN. Does the gentleman from Indiana [Mr. GRAY] yield to the gentleman from Washington [Mr. JOHNSON]?

Mr. GRAY. I will be glad to do so.

Mr. JOHNSON of Washington. Speaking of production going on in one place and consumption going on in another, does the

gentleman refer to the eggs that are being produced in such large numbers in China and being sent to this country?

Mr. GRAY. I will be glad to answer you more fully when you have gotten the trend of my thought and when you can ask your question more intelligently. [Laughter.]

Mr. Chairman, we find that the people in the towns and cities now live in flats and apartments and houses closely crowded together, without an open space for a garden, without the right under ordinances to feed animals within the municipal limits, and without the opportunity to keep a cow, to provide for the food supply. We find that every man except those living in the agricultural districts is wholly dependent upon others for all or a greater part of his food supply. We find that he must obtain this food supply regularly, promptly, and in small quantities at a time, as the food grows, ripens, and matures, to be of wholesome use. We find that he can not purchase his food supply in bulk, even if perishable articles could be preserved without being subject to exorbitant charges for storage and the rehandling of the same.

The food consumers in the towns and cities at the factories, mills, and workshops can not obtain the food regularly at frequent intervals and in small quantities as required for wholesome use at prices they can afford to pay, and the farmers and gardeners can not deliver the same at the time and in the quantities required and sell at reasonable rates. The farmer and gardener finds that the cost to market this produce as the same is required is as much, or almost as much, as the cost of its production.

Under these conditions a more extended and complete system of transportation has become an imperative necessity for the welfare of the people. Production and consumption must be again brought together by transportation and made to conform to the new and changed conditions under which we are living. The food supply must be made available to those who are dependent for food upon others. A system is imperatively called for which will make possible the delivery of food products regularly at frequent intervals and in small quantities, as the same may be needed and required for immediate consumption. The railroads can not and do not supply this want of transportation. The system must reach direct from the farm and garden gate to the markets and to the consumers' door in the towns and cities.

We find that under present economic conditions no transportation facilities exist for the carriage of the food supply from the food producers to the food consumers in the manner, at the time, and in the quantities required for economical and wholesome use. We find that for the want of such transportation facilities fruits rot in the orchards and vegetables decay on the farms and in the gardens, while the consumers in the towns and cities famish for the want of them and are compelled to pay exorbitant prices for an inadequate supply, and that fertile and productive land in the country lies idle or only partly cultivated and used except for the production of such food products as are not perishable and may be marketed in bulk.

We also find that individuals can not furnish this service of transportation required to meet this demand, but that the same presents a problem of cooperation and collective effort.

Mr. MURDOCK. Will the gentleman yield?

Mr. GRAY. If you will get my time extended, I will. [Laughter.]

Mr. MURDOCK. I can not do that, but I want to say to the gentleman that the impeachment he makes of transportation is correct. The president of the Santa Fe Railroad discovered that situation along the line of the Santa Fe and has tried to remedy it, and will, to an extent, remedy it by supplying cars for less than carload lots of fruit and other products.

Mr. GRAY. I would appreciate your compliment more if you were not taking up my time. [Applause.]

Mr. Chairman, while every man who produces food can not afford the great number of trips required to market his produce as the same is needed and required for wholesome use by consumers, one man, with one team, with one conveyance, can deliver for many at a low rate of carriage and delivery, and thereby sustain himself in such enterprise and perform a great public service.

To illustrate, let us suppose that there are 50 farmers or gardeners along a certain rural route out of a town or city, and that on a certain day each one of these farmers or gardeners has a surplus of one-half bushel of potatoes which he wishes to sell. For each one to deliver this one-half bushel of potatoes, 50 men with 50 horses and 50 wagons would be required for each to make the delivery to market or the consumer's door and the aggregated amount of time required by all would not only consume the profits of the whole amount, but would go far to consume the entire value of the 50 half bushels of potatoes. Instead of 50 men with 50 horses and 50 wagons, one man, with good roads, with one team and one wagon could make the delivery of the whole 50 half bushels of potatoes at such a charge that no one of the farmers or gardeners could afford to leave his work on his farm or in his garden for a single hour. Thus food production and consumption would be again brought together by transportation. But this is not all the economy that would be effected.

The man undertaking the transportation for all would be able to carry and deliver to the farmers and gardeners on the line along which he was performing the service their supplies from the railways, and the equilibrium in production and consumption would be restored and great economy and efficiency effected. The farmers and gardeners would be able, by reason thereof, to sell for less at a greater ultimate profit, and the food consumers of the towns and cities would be able to buy at lower prices better and more wholesome food.

Without such a transportation system connecting the country and rural districts with the towns and cities and by articulating with the railways the great food markets of the country there will continue a scarcity of food production and suffering for the want of an adequate supply. With good roads and the initiation of such a delivery system there would come a stream of fresh food products from the country daily to the towns, cities, and railway stations, the surplus there to be carried on by the railways to the great cities and food-distributing points. The stress of consumption would not only be relieved by an ample supply of food at reasonable cost, but production would be stimulated upon every farm and in every garden. Relief from the waste of individual delivery and transportation would invite and make profitable a full food supply and its distribution in accordance with the demand for wholesome use. Such is the imperative necessity for the improvement of the highways of the country to-day, and the great economy and efficiency that would be effected by such improvement and the transportation system that would be made possible thereby.

The CHAIRMAN. The time of the gentleman has expired.

Mr. GRAY. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. The gentleman from Indiana [Mr. GRAY] asks unanimous consent for five minutes more. Is there objection?

Mr. LEVER. Mr. Chairman, I am very anxious to complete the consideration of this bill this evening. There are a number of very important items yet ahead of us. I will ask if the gentleman would not be willing to get unanimous consent to insert his remarks in the RECORD?

Mr. GRAY. I would if I did not have a very important subject. I was not here when this good-roads proposition was considered, and I want to give even the chairman of the committee the benefit of my suggestions.

Mr. LEVER. I ask unanimous consent, Mr. Chairman, that debate on this paragraph and all amendments thereto close in five minutes.

The CHAIRMAN. The gentleman from South Carolina [Mr. LEVER] asks unanimous consent that all debate on this paragraph and amendments thereto close in five minutes. Is there objection?

There was no objection.

Mr. GRAY. But this demand for highway improvement is not confined to a special use or purpose.

There is an economic necessity generally for better roads throughout the country to-day. Every ton of freight carried on a railroad or transported on a ship must first be hauled over some part of a road, street, or highway. Transportation is a part of production, and the same economy is to be effected in the transportation of material to the manufacturing plant and from thence in a prepared state for consumption back to the people as in the operations and processes of finishing a product for ultimate use. Wasteful and inefficient transportation adds just as much to the increased cost of an article produced as the same waste and inefficiency in other stages and operations in production adds to its price to the consumer.

But there is even a greater and more vital necessity for the improvement of highways to facilitate and economize in transportation than in production by manufacture. Good highways are imperatively needed to-day to articulate with the railroad and steamship lines, and to connect and bring together the farm and the factory, the garden and the workshop, the food producers in the rural districts and the food consumers in the towns, villages, cities, and the great distributing markets. [Applause.]

Now, if I had three minutes more I would like to speak of the automobile proposition.

A MEMBER. Go ahead.

Mr. GRAY. Mr. Chairman, it has been suggested that automobile manufacturers are favoring the construction of one great interstate highway as against the improvement of the rural routes and the main roads leading out from the railway stations to the country districts. I do not know that this is true, but if it is true I believe the automobile industry is making a grievous mistake against its own interests. The automobile business is a legitimate industry and deserves to be substantially encouraged as such. Like every other legitimate business, the automobile industry can be best promoted and advanced by a just, fair, and equitable policy toward all the people. I believe that the automobile industry can and will prosper best under a policy of road improvement fair and impartial to the best interests of the masses.

The improvement of the rural routes and the main roads leading out from the railway stations into the country districts not only meets the requirements of a just and equitable policy toward all the taxpayers of the country, but will be to the best interests of the automobile industry. If the roads used by all the people all the time in their everyday and most important business affairs are improved, it will lead to the use of automobiles by all the people, all the time, on all the roads of the country for all their important business. The improvement of the rural routes will, in addition to this, lead to automobiles being used generally by mail carriers, and if a system of rural transportation is in time inaugurated over these roads, many automobiles instead of horses and wagons will be used. The automobile industry would not only prosper, but the business would leap and bound to keep pace with the new and increased use of automobiles by all the people, all the time, and upon all the roads of the country, in their traveling and transportation business. To build one great interstate highway would make a demand for a few large automobiles a part of the time, for a limited and special purpose only. The automobile industry would languish or fall far short of the expected development. A just and equitable policy toward all the people of the country would not only bring prosperity to them, but to all interests which must depend upon them for support, including the automobile industry.

While there is a demand for both the construction of a trunk-line interstate highway and the improvement of the rural routes and the main roads leading out into the rural districts from railway stations, it is evident that the country can not undertake and complete both of these systems at the same time. The interstate system is demanded more for the purpose of special travel and touring, while the improvement of the rural routes and roads leading out from the railway stations is demanded more as a pressing and economic necessity of the times. Both systems will be eventually taken up and completed. Business, however, to supply the everyday needs of the people to live, must take precedence over recreation, and the stern realities of life must be given higher consideration than matters of pleasure and pastime. While I favor both of these road systems as necessary to meet the demands of the times for travel and transportation, I will first favor the improvement of rural routes and the roads leading out from the railway stations, as the same are used by all the people all the time in all their everyday important business affairs, as well as for local travel; and while the interstate highways will be improved along with all the other roads, their ultimate completion will follow in the natural order of things in the development of the country, and will, with the network of the rural routes and the roads leading out from the railroads, become a part of one great complete system of improved highways.

The next question, after conceding the power of Congress to improve the highways of the several States and realizing the necessity of improved rural transportation facilities, is the expediency of entering upon such a policy by appropriations from the Federal Treasury. It is conceded that under our system of indirect taxation by the General Government for every $1 which goes into the Federal Treasury more than $3 is paid by the taxpayer as a part of the increased cost of the article upon which the tax is levied. Therefore the cost to the taxpayer for the improvement of roads by the Federal Government will be more than such improvement when made by appropriations from direct taxes levied by the several States, under which every dollar collected from the taxpayers goes into the State treasury. Looking at the question from this viewpoint, road building by the General Government will be far more burdensome upon the taxpayers of the country than if the same expenditures were made from treasuries of the several States.

But this advantage in direct taxation may never be more fully appreciated in the future than it has been in the past, nor the advantage more readily accepted by the people of the country generally, and the payment of $1 by direct taxation, of which the taxpayer is plainly conscious, may continue to be regarded as a heavier burden than the payment of $4 when hidden and concealed in the price of the article which he buys and upon which the indirect tax is levied.

If the Federal Government shall enter upon the policy of road building, it should be more with a view to aiding and encouraging State activity in highway improvement than to assume the whole burden of the work entered upon. But the time for improvement in highways has come, and the work must either go forward as a State enterprise or an undertaking by the General Government. If the several States will not undertake this work and can not be encouraged and induced to do so, the General Government, even at a disadvantage in cost to the people, must undertake and bring about highway improvement.

And there is a way by which this increased cost of road improvement by Federal appropriations instead of by State appropriations could be compensated for. If all the appropriations which are now being made for the improvement of rivers and harbors at points where there is very little, if any, navigation, and all the appropriations for public buildings and works to favor certain localities, and all the appropriations which are now being made and contemplated for the construction of new battleships, of which we now have a greater number and of a type more powerful than ever before, and for which we have not enough trained men nor the proper complement of auxiliary boats and craft to properly man and make effective the number of battleships we now have—if all these appropriations were made available for the improvement of highways, macadamized roads could be built and maintained for every rural route and for every main highway leading out from the railway stations into the rural districts in every part of this whole country, including the great interstate highways across the continent now being urged as an interstate system. [Applause.]

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Total, Department of Agriculture, for routine and ordinary work, $18,327,232.

Mr. HUMPHREY of Washington. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Washington [Mr. HUMPHREY] moves to strike out the last word.

Mr. HUMPHREY of Washington. Mr. Chairman, the other day, when the Forest Service was under discussion, I made some statements relative to the transactions wherein the Santa Fe Railroad and the Northern Pacific Railroad received a large amount of land in exchange for certain lands that they owned. Since making that statement it appears that it has been read. Mr. S. M. Stockslager, who was at one time a Member of this House and afterwards Commissioner of the General Land Office, has transmitted to me a statement of facts in regard to those transactions that I think is very pertinent and interesting. I therefore ask unanimous consent to extend my remarks by inserting the article in the RECORD.

The CHAIRMAN. The gentleman from Washington [Mr. HUMPHREY] asks unanimous consent to extend his remarks by publishing the statement that he indicates. Is there objection?

There was no objection.

Following is the statement referred to:

A FEW PERTINENT FACTS TOUCHING THE PRESENT DISCUSSION OF THE PUBLIC-LAND SYSTEM.

June 4, 1897, Congress passed an act entitled "An act to provide for the survey and protection of the forest reservations" (30 Stat., 34). Under the provisions of this act the owners of perfected or unperfected claims within such reservations were permitted to exchange such lands for other public lands upon conveying the lands thus held by them in the forest reserves unincumbered to the United States.

As stated by Senator Carter, of Montana, in the Senate in February, 1907, it was understood the Land Office held this act did not apply to lands granted to railroad companies within the limits of such reservations, but was overruled by the department, and therefore it was held to apply to them as well as to individuals.

Under the rulings of the department selection was permitted of unsurveyed as well as surveyed lands, but on June 6, 1900 (31 Stat., 614), Congress passed an act providing that after October 1, 1900, selections could be made for surveyed land only.

March 3, 1905 (33 Stats., 1264), Congress repealed the acts of June 4, 1897, and March 3, 1901, but among other things provided that the validity of contracts entered into by the Secretary of the Interior prior to the passage of this act shall not be impaired.

By instructions of the department of May 16, 1905 (33 L. D., 558), the provisions above referred to were held to protect certain contracts entered into between the Secretary and owners of certain odd-numbered sections of land in the Santa Fe Mountains and Grand Canyon Forest Reserves in Arizona, and the owners of certain lands not theretofore reserved, but included by the President's proclamation of December 23, 1903, within the Santa Barbara Reservation in California. The effect of this exception in the act was to permit selections to continue to be made in satisfaction of tracts relinquished or to be relinquished, as follows: First, of odd-numbered sections within the Santa Fe Mountain Forest Reserve in Arizona relinquished or to be relinquished by the Santa Fe Pacific Railway Co., the Aztec Land & Cattle Co., the Sagina & Manistee Lumber Co., William F. Baker, and Edward Lee Perrin; second, of odd-numbered sections within the

Grand Canyon Forest Reserve, Ariz., relinquished or to be relinquished by the Santa Fe Railroad Co.; and third, lands of both odd and even sections in the Santa Barbara Forest Reserve, Cal., and defined by the President's proclamation of December 22, 1903, relinquished or to be relinquished by the Santa Barbara Water Co. or Jed L. Washburn.

The proceedings leading up to and embracing the contract above referred to are fully set out in House Document No. 613, Fifty-ninth Congress, first session. An examination of the letter of Secretary Hitchcock at pages 93 and 94 of said document will show that said odd-numbered sections embraced an area of about 900,000 acres, of which 750,000 acres was proposed to be relinquished to the United States under said contract.

The reservation proposed was established, but instead of the Santa Fe Pacific Railroad Co. relinquishing its lands to the United States, as agreed, on May 30, 1903, it conveyed practically all of its lands embraced within the contract and still held by it to the Santa Fe Development Co., which it has been reported was composed largely, if not wholly, of the officers of the railroad company. But the Commissioner of the General Land Office, in the selection of one Mary Coffin, as shown by his letter to the Secretary of February 13, 1904, declined to accept the title of this development company for the reason that it was a violation of the agreement made by the railroad company with the Secretary, but permitted the development company to reconvey to the railroad company, a deed from which would be accepted, which conveyance was subsequently made. It may be added that on February 13, 1904, the commissioner made a report to the department on the subject of his refusal to accept the conveyance of the development company.

It may be observed also that while under the regulations of the department settlers and other individual claimants could not have their titles passed upon except in cases where they made selections of lands in lieu of those owned or claimed by them in such reservations, yet in the case of the Santa Fe Railroad Co. and all the railroad companies, Mr. Perrin, and perhaps other large holders of land, lists embracing large quantities were certified to in advance of any selection the effect of which was to make them what is known as "certified scrip." That is, the Government had already passed upon their abstract of title, and hence the purchaser from them would take no risk upon this point.

It is also pertinent to observe that notwithstanding the bad faith of the Santa Fe Railroad Co. in attempting to divest itself of the title to its land in the reservation, and thus defeat, practically at least, the agreement made with the Secretary, yet, when Congress repealed the act of 1897, which repeal prevented the settlers and individual claimants who had not already availed themselves of the exchange privilege from doing so, it permitted by a saving clause this railroad company, Perrin, and others embraced in the agreement aforementioned, to continue such exchange, and they are still permitted to do so. That this very greatly enhanced the value of their holdings is well known to everyone. * * *

In connection with the same subject attention might be called to the act of March 2, 1899 (30 Stats., 993), creating a national park known as Mount Rainier, in the State of Washington, it being a part of the lands embraced in the Pacific Forest Reserve, now known as Mount Rainier Forest Reserve. This park is a comparatively small affair, in one corner of the immense forest reserve above referred to. Nearly, if not quite, all of the lands embraced in the grant to the Northern Pacific Railroad Co., which runs through this forest reserve, were and are utterly worthless.

By the second section of the act the Northern Pacific Railroad Co. was given the right to select lands surveyed or unsurveyed through any State into or through which its road ran, in lieu not only of this small national park, but of the immense forest reserve also.

The department has held that this not only does not confine them to the lands within their indemnity limits, but permits them to select lands in any State into or through which the road runs, and that it may also select the reserved sections within the limits of its grant, thus enabling it to obtain solid bodies of timber or other lands (33 L. D., 634).

It is proper to observe also that while Congress by the act of June 6, 1900 (31 Stats., 614), prohibited the selection of lands under the act of June, 1897, which were unsurveyed, yet, as held by the department (34 L. D., 88), this did not affect the right of the Northern Pacific Railroad Co. to select unsurveyed lands outside of all of its limits and in any State which its road touched, for the reason that the act granting it the right to make such selection was a special act and was not affected by the repealing act of June 6, 1900. It is also held that for the same reason the repealing act of June 4, 1897, did not affect the right of this railroad company to continue its selection of surveyed or unsurveyed lands.

The effect of this has been to make the privilege of exchanging these utterly worthless lands for the most valuable lands in the country of immense value. If what is known as the Northern Pacific scrip were on the market at all, it would be difficult to say how much it would bring. But it is said the company declines to sell, but prefers to hold and use this privilege which Congress does not seem to be willing to take away, as it did from the poor settlers and individual claimants.

Can anyone tell why, when the exchange by private individuals in forest reserves for unsurveyed lands was repealed, it was not made to include also the exchange privilege granted to the Northern Pacific Railroad Co.? This privilege still exists, and no effort has ever been made to our knowledge to change it. It is very remarkable also that when the entire exchange law was repealed, leaving hundreds of private individuals who had conveyed lands within forest reserves to the United States, but whose selections had not been approved without either their lands surrendered or those selected, and to this day no relief has ever been granted them, while the exchange privilege of the railroad company for unsurveyed lands, which makes it exceedingly valuable, remains.

Who can tell what vast bodies of our best lands belonging to the public domain, especially timberlands, would have been saved if the Secretary of the Interior and the President had sustained the position of Commissioner Herman that the act was not intended to and did not apply to lands held by railroad companies, or how many acres of valuable timberlands would also have been saved if his position that they should be permitted to exchange their holdings for lands of the same class as those surrendered to the United States had been sustained?

Did anyone ever hear of any of the outspoken conservationists protesting in any way against this legislation and these departmental decisions? We certainly never heard of any such, although millions of acres of our best timberlands have thus been acquired by these companies which seem to be immune to either departmental or legislative opposition.

Respectfully,

S. M. STOCKSLAGER.

WASHINGTON, D. C., *March 13, 1914.*

Mr. MANN. Mr. Chairman, I move to strike out the last two words.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] moves to strike out the last two words.

Mr. MANN. The other day I made a point of order on a provision in the Agricultural appropriation bill authorizing the sale of the Mount Weather station by the Weather Bureau. I have a letter from Mr. Marvin, the Chief of the Weather Bureau, which contains some interesting information in reference to the Mount Weather station which was not brought out in committee. I ask unanimous consent to insert it in the RECORD. I will ask to have it read in my time. I send it to the Clerk's desk.

The CHAIRMAN. Without objection, the Clerk will read.

The Clerk read as follows:

UNITED STATES DEPARTMENT OF AGRICULTURE,
WEATHER BUREAU, OFFICE OF THE CHIEF,
*Washington, D. C., March 9, 1914.*

Hon. JAMES R. MANN,
*United States House of Representatives, Washington, D. C.*

DEAR MR. MANN: I have read with great interest the debate upon the appropriations for the Weather Bureau, and especially your remarks in the CONGRESSIONAL RECORD of March 6 (p. 4699), wherein you reserve and make the point of order against the proposed authorization for the sale of Mount Weather. I hope you will permit me to place before you certain information that was not fully brought out in the discussion, and that will clearly explain just what are the intentions of the Weather Bureau.

To begin with, I wish to say that I am quite in accord with your general views relative to the disposal of Mount Weather, as a reading of my testimony before the committee will show, and there is no intention of selling the property at once or disposing of it in an unreasonable manner. The language was inserted in the appropriation bill simply for the purpose of conferring upon the Secretary the authority to dispose of it at the proper time.

I wish also to say in a very emphatic manner that the exploration of the upper air by means of kites and balloons, conducted at Mount Weather for the past six years, and the scientific investigations in the measurement of the intensity of solar radiation more recently carried on there, have yielded data of the greatest value to scientific meteorology. These and other investigations to be carried out in the future will become more and more useful as time goes on and we learn better how to interpret all the details of the information about the upper air that can be obtained in this way. It is not surprising that some Members of the House could hardly credit the statement that little balloons, each equipped only with a delicate meteorological instrument, have ascended to heights in the atmosphere exceeding 22 miles and returned to earth bearing a record of all the conditions of the atmosphere during both the ascent and descent. Nevertheless, such is a scientific fact, and observations obtained in this way have revealed permanent and definite conditions of temperature and circulation in the upper air that were never even imagined to exist. The causes of the unexpected conditions, undiscoverable for a time, have been fully elucidated, and the explanations were first published by one of the experts of the Weather Bureau. I am glad to be able to say, moreover, that much credit for the inauguration and prosecution of this important work belongs to the former Chief of the Weather Bureau, Willis L. Moore.

However, Mount Weather is not well suited for these investigations, and never has been, for the following reasons:

1. The station is so close to the sea that free balloons can not be sent up from that point at all, because they are carried out over and descend into the ocean and the records are lost.

2. The location is not favorably related to the path of storm movements and the general atmospheric conditions that are chiefly the subjects of investigation.

3. The isolation of the station and its general inaccessibility render it undesirable for the purpose for which it is used and necessitate unnecessarily large expenditures for the simple upkeep of the establishment. Every dollar that is spent at Mount Weather for useful scientific investigation requires the expenditure of 83 cents additional to provide the heat, the light, and the power, etc., required to run the institution. The same amount of work can be done elsewhere at a much smaller cost for running expenses.

All these matters were carefully considered by a committee of experts appointed by the Secretary of Agriculture, and the conclusion was reached that by transferring the work to points in the Middle West not only could better conditions for observation be obtained, but more work could be accomplished by the same expenditure of funds. Mount Weather is unsuited for the particular work being done, because of its proximity to the sea and the unavoidably heavy cost of maintenance.

I wish also to correct a mistaken impression in regard to the total cost of Mount Weather, which in the discussion was represented to be something like half a million dollars. The reservation and the buildings thereon, including one building that was destroyed by fire, have cost in the aggregate, roughly, $207,000. The Weather Bureau has spent, in addition, about $276,000 for very useful work during the 10 years the station has been in operation.

I hope the foregoing will enable you to better understand the situation at Mount Weather.

Very respectfully,

C. F. MARVIN,
*Chief of Bureau.*

Mr. BRYAN. Mr. Chairman, I ask unanimous consent to extend in the RECORD my remarks in reference to certain features of this forestry matter.

The CHAIRMAN. The gentleman from Washington [Mr. BRYAN] asks unanimous consent to extend his remarks in the RECORD by printing certain matter indicated. Is there objection?

There was no objection.

Mr. BRYAN. I would like to be recognized for five minutes.

The CHAIRMAN. The gentleman from Washington is recognized.

Mr. MOORE rose.

The CHAIRMAN. The gentleman from Washington is recognized and has the floor.

Mr. BRYAN. Mr. Chairman, in the Philadelphia Inquirer, a paper published in the home of my friend from Pennsylvania [Mr. MOORE], who just rose, there was published yesterday a statement under rather heavy headlines, "Charge of looting against Pinchot," and the challenge of Representative HUMPHREY, of my State, was reproduced in that article, which seems to me to indicate a kind of local coloring which was more or less exploited here on the floor while the matter was being discussed, and the statement made that any man was challenged to present any evidence that Mr. Pinchot ever protested against what is known as the Santa Fe lieu-land exchange.

Mr. MOORE. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Washington yield to the gentleman from Pennsylvania?

Mr. BRYAN. I yield to the gentleman.

Mr. MOORE. So long as the gentleman has drawn my name into what appears to be a controversy, I would like to ask him whether it is not a fact that when this matter was before the House my remarks referred wholly to the question of residence of the gentleman from Washington [Mr. BRYAN] and the gentleman from New York or Washington, Mr. Pinchot, and whether my participation in this controversy did not deal wholly with the Pennsylvania senatorial question and not with the forest ranges?

Mr. BRYAN. The gentleman's language is as he says, but his vote was with the gentleman from Washington, aiding him on the front seat in the voting.

Mr. MOORE. The gentleman evidently did not know that I was counted as an employee of the House. [Laughter.] I stated that subsequently.

Mr. BRYAN. I want to ask if the gentleman repudiates the position taken by the gentleman from Washington, with whom he voted?

Mr. MOORE. I wholly repudiate any vote that I have accidentally cast for the expenditure of any money upon a treeless forest. [Laughter.] But so far as any vote of mine was concerned for the expenditure of public money for a worthy purpose, of course I will acknowledge that vote. [Laughter.] If the gentleman will tell me when I voted on the question of treeless forests I will tell him how I voted, and whether or not I voted as an employee of the House. [Laughter.]

Mr. BRYAN. Mr. Chairman, I decline to yield further.

The CHAIRMAN. The gentleman declines to yield.

Mr. BRYAN. Mr. Pinchot made this statement, when asked concerning Representative HUMPHREY'S attack on him:

> Representative HUMPHREY has at various times made attacks upon the conservation policy which have been completely refuted and disproved. He now occupies substantially the same position formerly occupied by Senator Heyburn whose frantic accusations finally ceased to command any attention whatsoever. I presume an answer is necessary, and it certainly is easy, to this latest explosion of Mr. HUMPHREY.
>
> He challenges me to say that I ever protested against the Santa Fe Railroad exchange. He might almost equally well challenge me to say that I protested against Eve taking the apple in the Garden of Eden. This exchange was managed entirely by the Department of the Interior. I was in the Department of Agriculture. I had no responsibility of any sort, shape, or kind in connection with it. The Government, because of bad laws and faulty administration, had got into a difficult position and was obliged to take the least of two evils. Mr. HUMPHREY knows that I had no responsibility in connection with this exchange, and has known it a long time. I was given charge of the national forests in 1905. The Santa Fe exchange was made several years before that time. If he chooses to repeat accusations repeatedly disproved and which he knows have been disproved, that is his affair.
>
> Did you know of the exchange at the time it was made? I did. As I have said, it was the best the Government could do, because of the unfortunate situation into which it had been engineered. Such a partial surrender of the public welfare ought never to have been made necessary. Responsibility for its having been made necessarily rests directly upon the faulty land laws passed by the Congress of the United States.
>
> Was it necessary to make that exchange?
>
> The exchange was made necessary by the granting of alternate sections to the old Atlantic & Pacific Railroad, and the balance of advantage, on the whole, to the railroad and to the Government was almost equally distributed. Each profited by the exchange.
>
> What about the other charge he makes?
>
> I am not able to identify the second case mentioned—the exchange with the Northern Pacific Railway—but I presume there is as little basis for it as the first.
>
> It was the infamous lieu-land law passed by Congress, and which I had as much as any other man to do with getting repealed, which was responsible for that exchange.

I have already shown how Mr. Pinchot put the timber looters out of business by his persistent opposition to all the tricks and devices by which these Washington Republican Congressmen were feathering the nests of their political backers. In that day the railroads ran the conventions of all political parties. When the railroad attorneys gave the politicians advice it was very much like "his master's voice." I would not handle the matter in just this way if I did not know that my colleague knew he was trying to put over a fake pure and simple when he levels charges against Pinchot in this matter.

Mr. MOORE. Now, Mr. Chairman——

Mr. BRYAN. I shall have to ask the gentleman to rise in his own time.

Mr. MOORE. Very well; I will.

Mr. BRYAN. The gentleman from Washington [Mr HUMPHREY] made these same charges on the floor here a few months ago, and immediately upon his making the charges there appeared in the State of Washington at that time, and now in the State of Pennsylvania, newspaper publications with glaring headlines announcing his speech and his charges. Most extreme statements were made in these headlines. Those charges were answered then, and it was shown that at this particular time Mr. Pinchot, while forester, was merely forester in the Interior Department, and the Bureau of Forestry was like the Bureau of Plant Industry, in that it had no jurisdiction or authority whatever in matters of this kind. That was thoroughly gone over, and I can not understand why gentlemen should persist in that charge here in face of that fact.

Now, one other thing, as to something that the gentleman refers to in Montana. We can not locate that particular thing, and I merely suggest that if he wants an answer in reference to Montana he will have to be more definite and particular and to announce the particular reserve he is talking about.

It does not appear what this refers to. The repeal of the lieu-land law passed the House on April 25, 1904. It passed the Senate on February 28, 1905. The records show that between these dates the only lands added to forest reserves in Montana were 130,560 acres added to the Yellowstone—in Wyoming and Montana—on May 4, 1904.

The statement that the lieu-land selections whereby lands of little or no value within national forests were exchanged on a great scale for valuable public lands outside were carried through with the acquiescence and even the active assistance of the Forest Service is directly contrary to the facts. The right to make lieu-land selections was given by the act of June 4, 1897. It was repealed by the act of March 3, 1905, practically one month after jurisdiction of the national forests was transferred to the Department of Agriculture. Prior to the transfer the administration of the national forests was wholly in the hands of the Department of the Interior. In the debate in the House of Representatives preceding the adoption of the conference report on the bill repealing the lieu-land selections law it was expressly stated by Mr. Lacey, of Iowa, that—

> The future reservations have been held up for fear of forming a base for looting the timber in Oregon and Washington.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HUMPHREY of Washington. Mr. Chairman——

Mr. LEVER. I should like very much to have these gentlemen continue their washing of linen, but I ask unanimous consent that debate on this paragraph and all amendments thereto close in 10 minutes.

Mr. HUMPHREY of Washington. Five minutes is all I want.

Mr. GUDGER. I object.

The CHAIRMAN. The proposition has not been submitted to the committee yet.

Mr. LEVER. I should dislike very much to move to close the debate. I am sorry my friend from North Carolina objects.

Mr. MADDEN. Make it 15 minutes.

Mr. LEVER. Then I ask unanimous consent that all debate on this paragraph and all amendments thereto close in 15 minutes.

Mr. GUDGER. I object to that.

Mr. MANN. Why does not the gentleman insist that the debate shall be in order?

The CHAIRMAN. The Chair calls attention to the fact that this debate is not in order, if anyone chooses to raise the point.

Mr. LEVER. The gentleman in charge of the bill understands that fact, but is trying to be lenient with these gentlemen from Washington and Pennsylvania, who are fighting out a double-barreled senatorial situation.

Mr. MOORE. Does not the gentleman know that this will be the most interesting part of the debate on the whole agricultural bill?

Mr. LEVER. The senatorial situations in Washington and Pennsylvania are not very interesting to me.

Mr. MOORE. The debate upon this question would be illuminating upon many propositions.

The CHAIRMAN. There is nothing before the House.

Mr. LEVER. I must insist that debate on this paragraph be confined to the paragraph. We must get through with this bill this evening.

Mr. HUMPHREY of Washington. I trust the gentleman will not do that until I have three or four minutes.

Mr. MOORE. Will the gentleman yield?

Mr. LEVER. I yield.

Mr. MOORE. The gentleman from Washington [Mr. HUMPHREY] being here to speak for himself, will it help at all if I withdraw my request for time, so that the gentleman from Washington may have 10 minutes in which to reply?

Mr. LEVER. I dislike very much to deprive the House of the illuminating remarks of the gentleman from Pennsylvania, but if he will withdraw his request, I will make no objection.

Mr. MOORE. I will withdraw my request, the gentleman from Washington [Mr. HUMPHREY] being here to speak for himself.

The CHAIRMAN. The gentleman from Washington [Mr. HUMPHREY] asks unanimous consent to proceed for five minutes. Is there objection?

There was no objection.

Mr. HUMPHREY of Washington. Mr. Chairman, I read in the paper this morning the same article that my colleague has referred to, in which Mr. Pinchot denies his responsibility for the transactions whereby the Santa Fe Railroad received 1,200,000 acres of valuable timbered land in exchange for land that was practically worthless. There is no denial or dispute that the transaction took place. Mr. Pinchot says he was not responsible for it. I never charged that he was responsible for it. But prior to that time he made a great protest against certain eliminations being made from a forest reserve in my State, and he has attempted to show his great virtue by repeating on every occasion, at every opportunity, the statement that he protested against that elimination in my State. And to add virtue to that transaction, my colleague [Mr. BRYAN] has twice repeated it upon the floor of the House. But after that transaction occurred, and while Mr. Pinchot was in the Government service, while his duties were with reference to the national forests, 1,200,000 acres of land were taken from the public domain by the Santa Fe Railroad for practically nothing. Now, the question I have been asking is, Why did not Pinchot protest then? What sealed his mouth? What was there about this transaction that he could not see it? Was it so small? He could see the eliminations out in my State when they were made, and eventually a large portion of the timberland came into the control of private individuals. What was there about the 1,200,000-acre transaction of the Santa Fe Railroad that he could not see it?

The records show that a public protest was made against that transfer. The records show that people from Arizona came and appeared before the President and protested against that transfer. Do you tell me that Mr. Gifford Pinchot, then the trusted friend of President Roosevelt, did not know anything about this transfer of 1,200,000 acres from the public domain into forest reserves? Does anybody within the sound of my voice or any man in the United States acquainted with the history of these transactions believe that statement? Of course he knew about it. If not, why did he not know about it; and if he did know it, why did he not protest? Why did he not say something about the Santa Fe Railroad getting some of the best timbered lands in this country in exchange for treeless lands, worth only from 15 to 18 cents an acre? That is what I am asking him to explain. He has posed for years as the guardian of the public domain of this country; and yet, when the railroads take in this case 1,200,000 acres, he says nothing. Now, in regard to the transaction that occurred in Montana, his denial is very illuminating. He does not deny that transaction at all. My statement was that something like 240,000 acres of land were included in an extension of a forest reserve in Montana, or else it was a new creation. It is hard to trace it, because the names of some of the forest reserves have been changed; but, at any rate, 240,000 acres of practically worthless land, practically treeless land, were included in forest reserves that belonged to the Northern Pacific Railway. Then while the bill was pending for the repeal of the lieu land exchange law in the United States Senate with the assistance of Mr. Gifford Pinchot the Northern Pacific Railway received 240,000 acres of valuable timberland for that practically worthless land. [Applause.]

Now, then, let Mr. Pinchot deny it if it is not true. I made the statement on the floor of the House that a Member of this House went to him and protested against the exchange. If it is not true, let Mr. Pinchot deny that statement and deny that such transaction ever took place.

The CHAIRMAN. The time of the gentleman from Washington has expired.

Mr. ANDERSON. Mr. Chairman, I move to strike out the last word. I notice that the committee has omitted from the present bill an item under the "Miscellaneous" heading, as follows:

And the Secretary of Agriculture is hereby authorized to continue investigations on the cost of food supplies at the farm and to the consumer, and to disseminate the result of such investigations in whatever manner he may deem best.

I would like to ask the gentleman from South Carolina, the chairman of the committee, why that item is omitted.

Mr. LEVER. I will say that we were informed that that information could be gathered best under the division of markets, which we will soon come to, and through the Department of Labor.

Mr. ANDERSON. That is the information I wanted to get. I had supposed this information would be obtained under the division of markets.

Mr. LEVER. That is right.

Mr. JOHNSON of Washington. Mr. Chairman, I move to strike out the last word. Here is more money for the forest reserves. In this clause the United States appropriates $100,000 for the protection from fire of forests in the reserve, which is all right and proper, except to me it seems a little bit unfair that wealthy men and corporations should be able to procure great portions of these forests, taking them up as investments, and intending that they shall become an investment for the next 50 years, paying nothing in the way of taxes or anything else, and all of the time under protection from fire by the United States Government. Is it fair?

Only to-day I received a paper from the southwestern part of Washington, where there are three great forest reserves. In this newspaper is a letter from a hard-working citizen, who says he went 12 years ago onto a piece of eliminated land at the edge of a forest reserve, built him a little home, which is pictured here in the newspaper, cleared the land, and the forest ranger reports that the improvements alone are worth $3,000.

The man has on that piece of land of 149 acres some timber—two and three-quarters million feet of spruce timber. Now, two and three-quarters million feet of spruce timber in that section of the country on 149 acres is not enough for the forest ranger to declare that it is timberland rather than agricultural land. It is in a river bottom. This man begs for somebody to come and buy this piece of land of him at the value put on the improvements by the ranger, $3,000, and says that he will throw in the two and three-quarters million feet of spruce timber, or more than one-fourth as much as all of the timber, the same kind that you are protecting in the Chugach Range in Alaska at great expense. Is this fair?

This man says that he wants to get a little bit of money from anybody who will take his homestead at $3,000, with all of the timber thrown in, so that he and his family can get across the line into Canada, where he says the farmer who tries to get along in the world can have his home and place and be protected, and where he is not starved out by a conservation policy which bids fair to starve out all of the present generation in the most heavily conserved localities.

Mr. MANN. Mr. Chairman, I want to ask the gentleman from South Carolina a question. Can the gentleman say whether any portion of the emergency fund for the fighting of forest fires was expended during the last calendar year?

Mr. LEVER. The testimony before the committee was that there was no money expended from the fund during the last fiscal year. Seventy-five thousand dollars was expended from the other fund of $150,000 carried in another part of the bill.

Mr. MANN. That was not all expended in fighting fires?

Mr. LEVER. No.

Mr. MANN. I am inclined to think that there ought to be a differentiation of the item, so that it could not be used for fighting bugs, although I am in favor of fighting the bugs wherever it is necessary.

Mr. LEVER. Yes; because the bugs create a great deal of destruction. I will say that I never thought that this item had any business in the bill, because I think when the emergency arises it can be taken care of under existing law.

Mr. MANN. The item during the current year carries $200,000. It is proposed to reduce it to $100,000. When the first appropriation was made it was half a million dollars. In other words, it is a fund for extraordinary emergencies, such as when there happens to be a very dry season and a dangerous fire is started, or it may be many of them. It is not expected that the money will be used in an ordinary season. I do not

know what they would do if an emergency should arise and they did not have the money.

Mr. LEVER. The gentleman will recall that in 1910 the worst forest fire the West ever saw occurred, and the Secretary of Agriculture, acting under what he regarded as authority of law——

Mr. MANN. Oh, no; regardless of law.

Mr. LEVER. No; I think not.

Mr. MANN. He did not think so, and neither did the President.

Mr. LEVER. He created a deficit of more than a million dollars, which Congress allowed.

Mr. MANN. That is true, and I do not criticize the department or the President, for I think they did the proper thing. An emergency had arisen which Congress could not foresee; they had no money with which to fight the fires. They ordered the money used, regardless of law. But now when we foresee that such an emergency may arise and do not provide for it, then doing the thing regardless of law is quite a different proposition.

Mr. LEVER. Mr. Chairman, as I have said so many times, I am not a lawyer, but the gentleman of course is familiar with the section of the Revised Statutes, which I will read, which provides among other things:

Nor shall any department or any officer of the Government accept volunteer service for the Government or employ personal service in excess of that authorized by law, except in cases of sudden emergency involving the loss of human life or the destruction of property.

Mr. MANN. That does not relate to this sort of matter at all.

Mr. LEVER. I confess that I can not find any reason why it should not relate to this kind of a proposition, and I would be glad to have the gentleman's view upon it.

Mr. MANN. That is a different case. The Government is not authorized under ordinary circumstances to accept volunteer services.

Mr. LEVER. But this goes beyond that and it says it shall not employ service except in cases of emergency.

Mr. MANN. Yes; and it can not employ service in case of emergency unless it has some money to pay for it with.

Mr. LEVER. Again, from this same section of the statute, I read:

And all such apportionment shall be adhered to, and shall not be waived or modified except upon the happening of some extraordinary emergency or unusual circumstance which could not be anticipated at the time of making such apportionment.

Mr. MANN. That is the apportionment. Every department has the right to vary the apportionment upon making a certificate, but that has nothing to do with this question. They can not expend more money than is appropriated, and they are not authorized anywhere to incur obligations.

Mr. LEVER. I admit, of course, the superior legal attainments of the gentleman from Illinois——

Mr. MANN. Oh, Mr. Chairman, I do not make any claim any longer to being a lawyer. I was when I came here.

Mr. MADDEN. What the gentleman read presupposes an appropriation.

Mr. LEVER. It seems so to me.

Mr. BRYAN. Mr. Chairman, this forest-fire protection is one of the most important functions of the Forest Service, and if it had not been for the efficiency of the Forest Service and the determination of men who are now condemned by those who desired to see the public domain pass into private hands, there would be no timber there now to protect. Away back in 1901 there were a series of attempts made to repeal the lieu-land selections by which these selections were made——

Mr. McLAUGHLIN. Mr. Chairman, I make the point of order that the gentleman is not in order.

Mr. BRYAN. Mr. Chairman, we are on the subject of fire protection.

Mr. McLAUGHLIN. I insist that the gentleman shall proceed in order.

Mr. MURDOCK. But I submit the gentleman is proceeding in order.

The CHAIRMAN. The gentleman from Washington will proceed in order.

Mr. BRYAN. Mr. Chairman, the fire protection in those forests is one of the important issues before this House at this time, because of the fact that there was a determined effort, which was successful, in breaking up those lieu-land selections. There was a bill introduced here to repeal the authority by which those selections were made, and it was finally put through, and the authority was taken away from these railroads to take these lands in that way—and who was the author of the bill? Mr. Gifford Pinchot has a carbon copy of the bill——

Mr. MANN. Mr. Chairman, I rise to a question of order. How much time does the gentleman want?

Mr. BRYAN. Only five minutes.

Mr. MANN. I ask unanimous consent that the gentleman from Washington may have five minutes, and I suppose as a consequence that the other gentleman from Washington may have five minutes.

Mr. MURDOCK. But the gentleman was proceeding in order.

Mr. MANN. Oh, he was clearly not in order.

Mr. BRYAN. But if I could get the five minutes in addition to what I have consumed, I would be very thankful.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that the gentleman from Washington may proceed for five minutes.

Mr. MANN. And that the other gentleman from Washington, Mr. HUMPHREY, may also have five minutes.

Mr. JOHNSON of Washington. Mr. Chairman, I couple with that a request to put in the RECORD the balance of this letter.

The CHAIRMAN. The Chair can put only one proposition at a time. The gentleman from Illinois [Mr. MANN] asks unanimous consent that the gentleman from Washington, Mr. BRYAN, and the gentleman from Washington, Mr. HUMPHREY, may each have five minutes. Is there objection?

Mr. MOORE. Mr. Chairman, reserving the right to object, I want to know if the gentleman from Washington is going to trespass upon the Pennsylvania senatorial situation. If so, I would like to have five minutes.

Mr. BRYAN. Mr. Chairman, I will guarantee my friend from Pennsylvania that I will not trespass upon that.

The CHAIRMAN. Is there objection?

Mr. LEVER. Mr. Chairman, reserving the right to object, I want to inquire, if there be no objection made, if these two gentlemen from Washington will then let us complete the bill?

Mr. MANN. No one can tell about that.

Mr. LEVER. I will not ask for an answer.

Mr. BRYAN. I will guarantee to be on my very best behavior.

Mr. HUMPHREY of Washington. Mr. Chairman, I object to my name being used until I have made the request. I thank the gentleman from Illinois.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. BRYAN. Mr. Chairman, on October 22, 1903, the President appointed a commission, of which Mr. Gifford Pinchot was a member, to investigate and report on these lieu-land laws. On February 13, 1905, the President transmitted in a message to Congress Mr. Pinchot's report, and urged that the law be repealed and that the authority to make lieu-land exchanges be revoked. And there was introduced then an administration bill into this House which was adopted and did away with that practice and made it impossible for further lieu-land exchanges to be made, and that bill was drawn by Mr. Gifford Pinchot, and Mr. Gifford Pinchot has in his files here in this city the carbon copy of the original of that bill. He was the man who worked it out and prepared the bill, and the gentlemen from Washington, the delegation from Washington representing that State on this floor at that time, the members of the Republican Party here on this floor, were generally unfriendly to the proposition. They did not join in any effort to repeal these lieu-land provisions which had been slipped in by amendment. Not at all; but, on the contrary, every possible effort was put forth during years of contest on the part of those gentlemen against the efforts that were made by different Members of Congress here on the floor to repeal these particular provisions, and I want to call the attention of Members of Congress to the fact that it was impossible for Gifford Pinchot or anybody else to stop that without a law, but when he did produce the law and send it up to a Member and it was introduced, and Theodore Roosevelt backed that up and it became an administration measure, then Pinchot did everything he possibly could do to effect the reform and encourage the enactment of the measure, and it was passed, and instead of being condemned, instead of being censured here repeatedly by men who know as well as they know their names that their censures are wrong, he ought to be praised. He is entitled to credit for what he did, and the people of this country know that Gifford Pinchot was never a party to this looting, they know that he had nothing to do with it.

Mr. MOORE. Mr. Chairman——

The CHAIRMAN. Will the gentleman yield?

Mr. BRYAN. I would rather not.

Mr. MOORE. Then I will make the point of order if the gentleman does not.

Mr. BRYAN. Mr. Chairman, I refuse, I decline to yield; now make the point.

Mr. MURDOCK. Let the gentleman from Pennsylvania make his point of order and get through with it.

The CHAIRMAN. The gentleman from Pennsylvania will state his point of order.

Mr. MOORE. A parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MOORE. In view of the gentleman's statement that he would not discuss the senatorial candidacies, has he any right to boom the candidacy of Mr. Pinchot?

Mr. MURDOCK. Mr. Chairman, I protest that that is not a parliamentary inquiry.

Mr. BRYAN. Mr. Chairman, I have the floor by unanimous consent for five minutes, and I do not have to discuss any subject in particular.

The CHAIRMAN. The gentleman from Washington has the floor.

Mr. MOORE. We have two bona fide candidates in the House.

Mr. BRYAN. Even before this exchange was made Mr. Pinchot had written a letter to the department mentioning the exchange, and said he understood certain lands were to be given in exchange, but he had nothing to do with that; and when they came to make the exchange—that is, when they came to report the resolution—the Secretary of the Interior, Mr. Hitchcock, sent over a message which required or caused them to amend so as to make good all exchanges that were then in process of negotiation, and it was necessary it should be so, because the law had been passed that way. There was no effort to get out of those exchanges that had been agreed to. They were tremendous frauds, but they were legislative frauds, and Congress was to blame. Mr. Pinchot was merely a member in a subsidiary department, a member of a kind of plant bureau—a bureau to determine about the way to plant trees, and so forth—in the Interior Department; but upon the suggestion of Gifford Pinchot, backed by the big stick of Theodore Roosevelt, there has been established the present Forest Service, and there has been none of that kind of business since. They did it all. They stopped the looting. That is why these men from Washington are heard howling; that is where the shoe pinches.

There is a lot of timber out there that a great number of men, timber barons and operators, are extremely anxious to get under the saw; they are anxious to get it in private ownership, and that is what they are howling about. They kick about the telephones, they complain about the trails, they roar about the roads——

Mr. JOHNSON of Washington. Mr. Chairman, I rise to a question of personal privilege.

The CHAIRMAN. The gentleman can not take the gentleman off his feet.

Mr. JOHNSON of Washington. I rise to a parliamentary inquiry.

Mr. STAFFORD. The gentleman can make a point of order.

The CHAIRMAN. A gentleman can make a point of order, but no point of order has been made at present.

Mr. BRYAN. They rise to points of order and proclaim their parliamentary inquiries and all that kind of thing, but, Mr. Chairman, I say to you that the people of Washington are back of this Forest Service; that they are back of Gifford Pinchot and know who are the true friends of that service and of the people. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. HUMPHREY of Washington. Mr. Chairman, inasmuch as the distinguished gentleman from Illinois [Mr. MANN] has obtained time for me I will occupy a minute or two of it. Since my distinguished colleague has appeared upon the floor of the House as the champion of Mr. Pinchot—I do not know whether he is self-selected or appointed by Mr. Pinchot—I will give him another transaction and let him explain that at his leisure. The Santa Barbara Water Co., in California, owned 63,000 acres of land upon which there were no trees and which had an actual value of about 25 cents an acre. The Santa Barbara Water Co. wanted that land taken into a forest reserve and wanted the privilege of going out and selecting 63,000 acres of public land anywhere in the United States except timberlands. The Commissioner of the General Land Office protested against the exchange.

He said the land was worth only 25 cents an acre, and that if the city of Santa Barbara wanted it included in a forest reserve they ought to buy it.

Mr. SABATH. Mr. Chairman——

The CHAIRMAN. Will the gentleman from Washington [Mr. HUMPHREY] yield to the gentleman from Illinois?

Mr. HUMPHREY of Washington. No.

Mr. SABATH. A point of order, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. SABATH. My point of order is that the committee is not in order, and inasmuch as the gentleman is giving the committee valuable information, every Member should be in a position to hear it.

Mr. BRYAN. I will say to the gentleman that it refers to water.

The CHAIRMAN. The committee will be in order, and the gentleman from Washington [Mr. HUMPHREY] will proceed.

Mr. HUMPHREY of Washington. The Commissioner of the General Land Office protested against this exchange being made. He said if the city of Santa Barbara wanted this land included in a forest reserve worth 25 cents an acre they ought to buy it. He protested it would be a fraud upon the Government to permit this corporation to exchange this land for other lands of greater value, acre for acre. Mr. Gifford Pinchot at that time was occupying the subsidiary position that my colleague speaks about, down in the Agricultural Department; but notwithstanding that subsidiary position which he occupied, he made a visit to Santa Barbara and wrote a letter favoring this exchange; and he had enough influence to have it made, or, at least, it was made soon after that. And that was just about the time that these other transactions with the Santa Fe Railroad occurred, and if Mr. Gifford Pinchot knew about the 63,000 acres exchanged by the Santa Barbara Water Co. along about the same time when he was occupying the same position and recommended that that transaction take place, how did it happen he did not know about the 1,200,000 acres of the Santa Fe Railroad, and why was he not expressing some opinion about that?

Now, if the gentleman can explain that, I will have some more for him. [Laughter.]

Mr. BRYAN. I know the gentleman can get a good deal of advice on any subject along there.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Office of Markets: To enable the Secretary of Agriculture to acquire and to diffuse among the people of the United States useful information on subjects connected with the marketing and distribution of farm products, and for the employment of persons and means necessary in the city of Washington and elsewhere, there is hereby appropriated the sum of $200,000.

Mr. YOUNG of Texas. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Texas [Mr. YOUNG] is recognized.

Mr. SUMNERS. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman from Texas [Mr. SUMNERS] rise?

Mr. SUMNERS. To make a parliamentary inquiry.

The CHAIRMAN. The gentleman from Texas [Mr. YOUNG] has been recognized.

Mr. SUMNERS. I want to make a parliamentary inquiry, Mr. Chairman. Is that in order?

Mr. MANN. He can not take the gentleman off his feet by a parliamentary inquiry.

The CHAIRMAN. The gentleman can not take his colleague off his feet by a parliamentary inquiry. The Chair will recognize the gentleman from Texas [Mr. YOUNG].

Mr. YOUNG of Texas. Mr. Chairman, this market provision of the Agricultural appropriation bill has appealed to me as a matter of great interest. We hear much of the high cost of living in these days, and, indeed, it is true that the expenses of the average family mount higher and higher as the days go by.

The Government has entered into a new line of work with reference to the marketing of farm products. In the last Congress we made an initial appropriation of $50,000 for the beginning of this work, and now we have increased that appropriation to $200,000. I introduced a bill carrying this amount some time in the month of December, and I am gratified to say that the Committee on Agriculture adopted the provisions of my bill, and it is now before the House for final action.

Mr. Chairman, take it in our section of the country where cotton is the chief product of the soil, a crop that in value amounts to more than $1,000,000,000 annually, that great crop that takes from one end of the year to the other to mature and harvest, and it is absolutely forced on the market in a period of 90 days. In 1910, when our cotton crop aggregated 12,000,000 bales, the world said that was not enough to supply the demand. The very next year we produced 16,000,000 bales, and those 16,000,000 bales brought $125,000,000 less than the 12,000,000-bale crop. This system of marketing as to the cotton product of the South has caused our people, instead of growing rich on this great crop that blesses the world, to be tied down, and the producers are not prospering as they should. It is believed that under the scientific study to be made by the

Government under the provisions of this bill a system of marketing will be worked out so that when our cotton supply is "long" and not needed by the world by means of storage warehouses and other scientific methods to be applied to the work the farmer will not have to dump his surplus crop on the markets of the world in three months' time.

That is one item that amounts, as I say, in the aggregate to over $1,000,000,000 annually. Sixty-five per cent of that product goes to the foreign markets and brings back to us the gold that gives us the balance of trade as measured with the nations of the earth. And is it not an important matter for the Government to use every legitimate endeavor to see that that 65 per cent of so valuable a product that means so much to the wealth of our Nation and that goes to foreign nations of the earth is not slaughtered? [Applause.] Foreign manufacturers are alone benefiting at the expense of the cotton grower of the Southland.

Then another proposition, Mr. Chairman: One of the essential features of this office of markets will reach the perishable products of the farm—the peach industry, the apple industry, the tomato industry, and other industries whose products go to the table of the poor man as well as the rich.

The district which I have the honor to represent is a great fruit and truck growing district, and yet I have seen orchards with hundreds of acres where the Elberta peaches covered the earth, because no market could be found for them, although at that time in other sections of the country people were crying out for this fruit. What was the trouble? We had a few great centers to which the product is shipped, but no system by which information could be carried to these fruit growers as to the daily state of the market supply, and consequently some of those centers would be glutted and the farmer who produced the fruit could not get anything for it, and thus he lost the value of his crop.

It is believed that by a scientific investigation this peach industry, the apple industry, the vegetable industry, and the tomato industry, by means of information furnished to the farmers of the country by which a plan of cooperation with each other and facts respecting markets, standardizing the grades, methods of shipment, and so forth, can be made profitable, to the end that the farmer can get value for his product and the consumer who needs the product can get it at a reasonable price.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. YOUNG of Texas. Mr. Chairman, I ask unanimous consent that I may proceed for five minutes.

The CHAIRMAN. The gentleman asks unanimous consent to proceed for five minutes. Is there objection?

There was no objection.

Mr. YOUNG of Texas. I am intensely interested in this item, because the very condition that exists in my district exists in many other sections of the country. I want to appeal for the man who lives on the farm. You take an Elberta orchard, where a man has put every dollar he has into peach trees, and has cultivated those trees and where he must contend with the frost and insects that may wipe out his crop, so that he can not depend on that crop as a safe crop each year. When a successful yield is made, usually the yield is abundant throughout the entire fruit-growing section, and the farmer has this marketing condition based on the oversupply to contend with. What does it result in? It results, just as it has resulted in my section of the country, in farmers uprooting their trees and planting that soil in cotton or some other crop from which they hope to derive a benefit.

Mr. MADDEN. Mr. Chairman, will the gentleman yield to me for a question?

The CHAIRMAN. Does the gentleman from Texas yield to the gentleman from Illinois?

Mr. YOUNG of Texas. Surely.

Mr. MADDEN. In what way does the gentleman believe that the expenditure of this $200,000 will help the farmer market his crop?

Mr. YOUNG of Texas. I believe that the farmers, being individuals, scattered throughout the communities of the States, each man engaged in growing some crop, some product, or the fruit I have mentioned, or potatoes or tomatoes, do not keep in touch with the wholesale market. They are now absolutely at the mercy of the commission men, and too often the commission men pocket the profits of the industry and the farmer pockets the loss. I believe that by means of detailed information furnished by the Government a plan of cooperation can be brought about by which the farmer will not be at the mercy of the middleman.

Mr. MADDEN. I just want to say to the gentleman that most of the farmers whom I know know a great deal better when to market their products than the officials that will be appointed under this item will be able to tell them.

Mr. YOUNG of Texas. The officials under this item will be able to get together data as to successful cooperation among the farmers. I understand that the citrus-fruit people have successfully cooperated and that now they get reasonably fair market prices. I understand that in a certain district in Arkansas the strawberry farmers have a system of cooperation by which they get fair prices. I also understand that last season, by a system of cooperation among the cotton growers in the vicinity of Scott Station, Ark., those cotton growers received from one-fourth cent to 1 cent more per pound for their cotton and from $3 to $4 more per ton for their cotton seed than did their neighbors who had no such plan of cooperation. If the Government will get together these successful organizations and the methods used and carry the benefits of these schemes to the individual farmer, it will give him information by which he can improve his present market conditions.

Mr. STEENERSON and Mr. MADDEN rose.

The CHAIRMAN. To whom does the gentleman yield?

Mr. YOUNG of Texas. To either one of them.

Mr. STEENERSON. I rose first.

Mr. MADDEN. Just one question. Does the gentleman wish the House to understand that he is in favor of the Government collecting and furnishing information by which the farmers can make a combination for the purpose of getting better prices for their products?

Mr. YOUNG of Texas. I want them to get all the information they can with reference to packing and shipping, and when certain markets are glutted receive directions by which they can send their products to some market that is not glutted. In other words, I want the Government to use every available means at its command to see that the rewards of the farmer's labor may go to the farmer, where it belongs, and not be enjoyed by that class of middlemen "who toil not, neither do they spin," yet prosper at the expense of the farmer.

Mr. STEENERSON. The gentleman says he is in favor of raising their farm price and enabling them to get a higher price for their farm products?

Mr. YOUNG of Texas. Oh, I will say to the gentleman that I do not intend by this measure to legislate value into the product of the farm, but I do believe that when the bulls and bears, the gambling leeches of this country, get together and try to throttle the farmer and destroy the value of his product, that the Government should come to his relief and give him information that will enable him to act wisely and intelligently.

Mr. STEENERSON. Would not an increase in the price received by the farmer for his products tend to increase the cost of living?

Mr. YOUNG of Texas. No; because now the middleman gets the benefit of it and the ultimate consumer does not.

I read some figures from high authority that show the workings of the present system of marketing, and I commend them to the gentleman from Minnesota [Mr. STEENERSON]. They are as follows:

*Distribution of cost of American farm products of 1911.*

| | Amount. | Per cent. |
|---|---|---|
| Received by the producers—the farmers | $6,000,000,000 | 46.1 |
| Received by the railroads | 495,000,000 | 3.8 |
| Legitimate expense of selling | 1,200,000,000 | 9.2 |
| Waste in selling | 1,560,000,000 | 12.0 |
| Dealers' and retailers' profits | 3,745,000,000 | 28.9 |
| Total paid by the public | 13,000,000,000 | 100.0 |

Ah, Mr. Chairman, these figures speak more eloquently than I can hope to do, and prove the necessity for this legislation. It is the stopping of the criminal waste between the producer and the ultimate consumer, with the resultant effect that the farmer will get better prices and at the same time the cost of living to the consumer will be reduced.

Why is there the constant tendency to abandon the farm? Why the "back to the farm" cry? The one great answer is when prevailing prices for the products of the farm are not commensurate with the capital, labor, and energy expended in producing the crop, the farmer, like other men, is going to seek new fields of endeavor. If we as Members of this Congress will make this appropriation and increase it as occasion demands, I sincerely believe that the beneficent effects will be felt by every farmer throughout the land. [Applause.]

The CHAIRMAN. The time of the gentleman from Texas has again expired.

Mr. YOUNG of Texas. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. SUMNERS rose.

The CHAIRMAN. The gentleman from Texas [Mr. SUMNERS] is recognized.

Mr. LEVER. Mr. Chairman, before the gentleman from Texas proceeds I ask unanimous consent that all debate on this paragraph and amendments thereto close in 15 minutes. I do not care to occupy any time myself.

Mr. MANN. Close how soon?

Mr. LEVER. In 15 minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all debate on this paragraph and amendments thereto close in 15 minutes. Is there objection?

Mr. SUMNERS. Mr. Chairman, reserving the right to object, I am about to offer an amendment here which will require some discussion. I do not know how much time other gentlemen may require, but I wish the chairman of the committee would reserve his request.

Mr. LEVER. I suggest, Mr. Chairman, that the gentleman from Texas present his amendment and let it be read for the information of the House.

The CHAIRMAN. The Chair will first submit the unanimous-consent request of the gentleman from South Carolina. Is there objection to the request that all debate on this paragraph and all amendments thereto close in 15 minutes?

There was no objection.

The CHAIRMAN. The gentleman from Texas [Mr. SUMNERS] offers an amendment which the Clerk will report.

The Clerk read as follows:

Amend by inserting after the word "products," in line 19, page 65, the following: "To aid in improving the methods of and facilities for the sale and distribution of such products," and amend by striking out "$200,000," at the end of line 22, page 65, and inserting in lieu thereof "$1,000,000, or so much thereof as may be necessary."

Mr. MANN. Mr. Chairman, I make a point of order against the amendment.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] makes a point of order against the amendment.

Mr. STEENERSON. Mr. Chairman, I make the point of order that we have not finished the previous paragraph. We have not yet reached this paragraph.

Mr. SUMNERS. Mr. Chairman——

Mr. MANN. I am perfectly willing, Mr. Chairman, to reserve my point of order for five minutes.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] reserves his point of order for five minutes. The gentleman from Texas [Mr. SUMNERS] is recognized.

Mr. SUMNERS. Mr. Chairman, I appreciate the fact that a point of order against this amendment, if the gentleman who has reserved the point makes it, may be sustained. There are a great many provisions in this bill that would go out if a point of order were made against them. I want to speak at this time not to the point of order, but with reference to the merits of this proposed amendment.

Mr. Chairman, I think the Committee on Agriculture has rendered a great service to the country in providing for the department of markets; but when they provide merely for the accumulation and dissemination of information they do not go far enough; they do not meet the necessities of the times in which we are living. My colleague from Texas [Mr. YOUNG] spoke with reference to the benefits that would come to the farmer by wiping out the waste resulting from the present methods of marketing. But that can not be done by accumulating and disseminating information merely; there is need of help to construct the marketing machinery which would make possible the practical use of the information gathered. I beg to call attention to the fact the farmer is not the only one concerned in this proposition either. The time has come when the man in the city, who eats what the farmer produces, must pay the men who do the farming as much net profit as they could get in any other kind of business. Therefore the profit to the farmer can not be reduced, and the only way by which the man in the city can lower the cost to himself is to reduce the intervening cost of marketing the crop, and to get to market the products which now rot in the field or on the side track.

Mr. Chairman, the purpose of this amendment is to enable the Department of Agriculture to aid in improving the facilities for marketing. I submit that this ought to be done. It is the necessary, the common-sense thing to do. Merely to give a man out on the Rio Grande, or in Arkansas, or anywhere else information with reference to the fact that the country needs so much stuff will not benefit him or prevent waste. The Agricultural Department goes down to the Rio Grande and says it is a good section for the production of vegetables. The people there respond to the suggestion of the Agricultural Department and put in crops. I told the House the other day of a man who raised nine carloads of head lettuce. He sent out 100 heads by parcel post to different markets, and they were pronounced to be as fine as the market produced. He shipped two carloads. On one carload he paid freight amounting to $9 in excess of the price that the lettuce brought him and on the other $13 freight in excess.

The Agricultural Department went out in east Texas and told the people there that that was a great fruit country. They went into the fruit-producing business, and one concern spent $400,000; but the year before last they cut down 400 acres of these trees. Now, gentlemen, we approach a situation that is entirely different from anything that has heretofore confronted the world. In the old days every man produced practically what he needed, and the communities supplied their own wants; but to-day we must depend upon shipping our stuff from the field of production to the field of consumption. The individual farmer sends out his stuff without knowing where to send it. He sends it out into the dark. One market may be glutted, while another is inadequately supplied. The purpose of this amendment is to enable the Department of Agriculture to aid in the constructive work of improving the methods of sale and distribution. We go out and teach a man how to raise the stuff, but after he has raised it he says: "What shall I do with it? I do not know where to send it." The farmer is better prepared to deal with the difficulties of production without help from the Government than he is with the difficulties of marketing it, and everybody knows it. We know that the individual farmer out in the fields does not know where to send his products. He has plead with Congress for help along constructive lines in improving methods of and facilities for sale and distribution, help which he is entitled to and which the interests of the country demand should be given, and we toss him a few packages of garden seed, with our names on each package, send him some bulletins, and tell him what a deep affection we have for him. It is a shame. No Member has offered or can offer a meritorious reason why the department should not help improve the methods of sale and distribution in order that the farmer can get a fair return for his labor, where the hungry consumer in the city can get his food supply without paying an exorbitant price. Why, then, insist on this point of order, if we are really concerned in the farmer's welfare, when item after item in this bill which the chairman of the Agricultural Committee and every Member knows is subject to a point of order has been passed without objection? There is no item in this bill which can be expended to better advantage than the amount proposed in my amendment, and I hope that the point of order will not be insisted upon.

Mr. JACOWAY. Mr. Chairman, I want to say that I approve heartily of what was said by the gentleman from Texas [Mr. YOUNG], and also I approve in a way that which has been said by the other gentleman from Texas [Mr. SUMNERS], but when the Secretary of Agriculture was giving his testimony before the Agricultural Committee upon the question of marketing he stated that at this time he could not use over $200,000 in the work now in hand. He put this sum as the extreme limit of money that could be used at the present for this work. For this reason I will be unable to support the amendment of the gentleman from Texas [Mr. SUMNERS] asking for an appropriation exceeding $200,000.

There are few questions that are engaging the attention of the American people to-day which are of more importance than the question of proper and sane marketing of farm products.

This fact was appreciated by the Agricultural Committee, of which I am a member, and at the last session of Congress the Agricultural bill carried an appropriation of $50,000 for this purpose. At this session of Congress this amount was increased rightly to $200,000 by the Committee on Agriculture in the House.

For multiplied years we have read much of the high cost of selling and the high cost of living. Writers of note have submitted observations in regard to this matter; newspapers, periodicals, and magazines have had much to say in regard thereto. It is with pride to-day that I refer to the fact that at the hearings before the Agricultural Committee of the House, at this session of Congress, Mr. Brand, of the bureau of markets, went before the committee and called attention to the fact that a company of men in Arkansas, at Scott Station, Pulaski County, in my district, had evolved a plan which he considered most

meritorious. As I say, I take especial State pride in referring to this fact, because I am acquainted more or less with the details of this plan. Everything is the result of evolution, and I dare say that in time the plan evolved by the association at Scott Station will be much more improved upon, but the fact remains that it was the genius of Arkansans that evolved this plan that I believe means so much to the farmers, and I desire to place in the RECORD the facts in relation thereto.

A few months since, Hon. C. C. Kirkpatrick, secretary of the Chamber of Commerce, Little Rock, Ark., invited and prevailed upon Mr. H. S. Mobley, president of the Farmers' Union of the State of Arkansas, to deliver an address at Scott Station, Pulaski County, Ark., on the question of marketing. Mr. Mobley was ably assisted by Messrs. Kirkpatrick, Gordon N. Peay, J. R. Alexander, T. W. Newton, G. W. Heilman, C. A. Schmitzler, John C. Small, editor of the Arkansas Homestead, and others.

In letters written me by Mr. Kirkpatrick and Hon. George A. Cole, principal of the agricultural school at Russellville, Ark., and others, they stated, in substance, that they were anxious that a record of the work of this association be made, and that Mr. Mobley receive the credit due him for the great work that he and his associates and those interested in the matter had done along this line. They authorized me to make use of any statements contained in these letters, that these results might be shown. The address of Mr. Mobley at Scott Station, outlining the plan in detail of a correct system of marketing, is probably too long to insert in the RECORD; but, in substance, he said:

At the last State meeting of the union the committee on cotton selling reported a plan that was in line with the recommendations which I made at the meeting last year. In brief, it called for the election by each local of an agent, with whom the members were recommended to sign a contract appointing him their agent for selling their cotton and cotton seed, the cotton to be graded and sold on its grades and not on a flat rate; both the cotton and cotton seed to be bulked either in some warehouse or in temporary pens and sheds. Following the meeting the Educator published a suggestion for a contract between the members to carry this plan into effect, and it is a pleasure to note that many of the locals are taking up the plan, notably those in Little River County and Pulaski County.

With regard to this I wish to say that the plan was proposed not as being a complete and uniform method of selling cotton, but as being an elementary and beginning step looking toward such complete plan. But from many of the letters I receive it seems that many have the idea that if they will bulk their cotton that they will find an immediate opening by which they can reach spinners or at least immediately raise the price that they will receive at home. But such was not the intention or expectancy with which I proposed the plan. Back of the proposal was the following idea based on an extensive knowledge of our lack of the most necessary thing to a cooperative marketing of cotton:

The one most important thing that cotton farmers must learn before they can sell cotton direct to spinners is to sell collectively at all times and never, under any circumstances, sell in single bale lots or as individuals. Until the producer learns this there will be but little cooperative selling, and therefore the producers will not succeed in selling direct to the spinner. This is the most important thing in the whole scheme, and until it is learned cooperation will be only a subject among us and not an accomplished fact.

Human experience has decided that many things are right and all schemes and plans must be decided as right and adopted or as being wrong and rejected by experience, not on prejudice or mere faith. This plan and contract will have to undergo the actual trial and our experiences in trying it will have to decide as to whether it is the right thing for us or not, and only by trying it can we gain this experience. But there is this that is true concerning it, those who sell direct to spinners bulk the cotton before offering it to them or contract to do so, which is the same in effect. Therefore I reasoned that if we would learn to bulk our cotton and to have it graded that ultimately we could do as others who bulk cotton—sell it direct to the spinner from the farm.

Those who at present control the marketing methods of selling cotton could not interest a spinner at all without previously having bulked and graded the cotton they offered or being able to contract to do so and to financially back their contract. And until the farmer who raises cotton is willing to learn how to bulk his cotton and have it graded and offer it for same by some one person, instead of every individual raiser going into the market to sell, he will have to remain satisfied to take what he can get and let others make and enjoy the profit of his labor. So please do not think because I proposed the plan that I am able to go to the spinners and make contracts to sell your cotton for you at an immediate advance over your local market, when I can not possibly know how much cotton you have, what it will grade, what its staple is, or whether or not you will let me sell it for you and guarantee its weights, grades, and condition. No human could do this until these questions are settled definitely in such a manner as there can be no doubt at all.

And until a large number of us have learned to quit selling on flat rates and as individuals, no one can approach the spinner in our behalf. Therefore I proposed the plan and had printed an outline of a contract which has for its purpose the teaching of the farmers to sell collectively on grades. If you are willing to undertake with your neighbors to learn this, then sign the contract with your local agent, in company with your neighbors, and make a beginning, otherwise there is nothing in it for you.

No one can expect to live in the house until it is built, nor to live there honestly without having either contributed to the building expense or paying rent. Just so cotton farmers can not expect to control a method of marketing their produce, cotton, or any other commodity, until the method is worked out, and it can not be worked out until a beginning has been made, and I know beyond any doubt that our place of beginning is to learn to sell in bulk through an agent whom we can control instead of as individuals in small lots. Also I know that I have never learned anything that was of much lasting value to me that I did not have to pay for the knowledge, either in cash or experience, and I know that producers will not learn to sell cotton in bulk without making mistakes and having losses; and if you who read this are not willing to risk such mistakes and losses, again I say there is nothing in this plan for you.

I was in a town the other day where a stained bale of cotton was sold by the producer for 5 cents per pound, while the lowest grade quoted on the market was selling for 10½ cents. Thus because he was ignorant of cotton grades and was not willing to sell through the union plan or to take any risks at all—so he thought—he permitted the buyer to rob him of at least $25. This incident is literally true, and there are many witnesses to its truth. On the other hand, if he had been willing to have put that bale of cotton in a bulk sale, to have trusted some competent man to sell the whole lot, his included, on the true grade, he could have undoubtedly saved at least a part of this money for himself and family. But he was afraid to risk anything or anyone but himself, therefore his loss. This incident is characteristic of many that I have seen this fall, and as for that matter that happened every fall to the cotton producer who sells as an individual.

I could cite you the results of the warehouse at Mansfield, in Sebastian County, with J. C. Pettus as manager and salesman, as while cotton was selling by individuals on the street for a flat price for 13 cents he was selling just across the street in bulk for 13.57. This was not much gain, but was worth the effort, and the $2.75 to $3 per bale he was saving to the cotton producers was as good for the man and family who produced the cotton as for the buyer. And now, think if Pettus was surrounded by men who would not sell to a merchant or buyer under any circumstances, no matter what market rumor was started in order to create a stampede, is it not reasonable to believe that he could in a short while get the producer much more for his cotton; and, continuing the supposition, if Mansfield was surrounded by cotton-selling points, where that same plan was in successful operation, could not the agents of these houses or locals get together and call on spinners or any other buyers of cotton to come and buy the cotton on its grades at the point of production and pay for it there?

No one can dispute the soundness of the idea, but it is almost purely a supposition and will remain such until we learn to do as the few farmers who are letting Pettus sell their cotton. Therefore I say again we have first got to learn to sell collectively and not as individuals before we can put such a supposition into the realm of actual fact and reap the results. We must build the house before we can occupy it. And by proposing this idea I have simply invited you to become a student of your own good, or, to carry the figure out, I have asked you to join us in an effort to build a house, and to begin at the beginning. This beginning does not promise to make you rich before you start nor to insure you against mistakes or loss of any kind. No really honest and sincere person could make such a promise. There will be some losses and some gains, but at the first the gains must necessarily be small, and the beginner has no right to expect large gains at the first. The locals that take up this plan will be making an effort to learn a necessary lesson; those who do not will doubtless stand out as individuals and suffer as this party I have above referred to. It is up to you who read this to do as here suggested or not to do it. Those who try and persevere in the trial will, I honestly believe, sooner or later make good money out of it; those who do not can not expect anything better than they are now getting.

About buyers. One place where I proposed this plan I was approached by a sincere man who said he would go into it if I would agree to sell the cotton and not to sell it to the local buyers. There are two things about this I want to ask you to think about. First, he was prejudiced against the local buyers—and I don't blame him—and, second, he was not willing to do anything until the work had been done; that is, he wanted to be able to go around the local buyer and get to the foreign buyers, but was not willing to do the very thing that after awhile would let him reach the foreign buyer. And the attitude of this man is characteristic.

Many would adopt this plan if the purpose of the plan—to reach foreign buyers, preferably buyers for spinners—could be realized and guaranteed to them before they went into it. Well, this will never be done, and no one who will stop to reason can seriously expect such a thing. We will of necessity be forced to sell to local buyers at the first. Of course there will be some exceptions. I know of some localities where I can induce foreign buyers to go now, but not many. And the reason they will go there now is that they have found out that they will be met with business men and business proposals, and that contracts made there will be lived up to. And I will say here that until this is true of a locality there is no hope of foreign buyers going there. So again, until the beginning is made local buyers will be the main dependence. As to them, many of them are unjust and often use dishonest methods, and I don't blame the farmer for being prejudiced against them. But if you will bulk your cotton and have it graded either by the university (write the University of Arkansas at Fayetteville for instructions about this; I succeeded in getting Dr. Adams, while he was dean of the agricultural college there, to undertake this work on behalf of the farmers), or some competent grader, I say, if you will bulk your cotton and have it graded and offer it to your local buyer, you will be able in almost every instance to get more for it than by selling as you do now. And the more bulk and the stronger fight for a price you put up, and the more you persist in it, the better that price will be. And, after a while, after you have established for your agent a reputation, and have come to produce a cotton of about the same grade and staple and have stopped planting every man a different variety, you, in company with other locals, will be able to get foreign buyers, but not until then except in a few exceptional cases. But this plan or some other that will teach these principles is necessary to your getting away from the domination of local buyers. It is certain that if you will not do something like this that the local buyer will always control you as he does now.

As to what I can do to help you, that all depends on you after all. First, the cotton must be bulked under a contract that takes the sale out of the owner's hands and places it in the hands of a competent agent who has the power to sell it. It must be properly stored where it will be dry; it must also be graded and the agent must have financial ability to guarantee the grades and weights, and then if he wants me to help he must contract with me to sell the cotton and pay the actual expense. Wherever this is done I can help some; I do not promise any fancy advances or to pull off any get-rich-quick stunts in your behalf, but to honestly and in a small way help you. If I do not do anything else I can help make your local buyers give you a better deal. By now it will appear that this is no attempt on my part to control your cotton, but to help you to a sensible effort in your own behalf, and the results will depend almost entirely on you. What do you think of it?

Below is also given the contract used by the Scott Station Association, which is entered into by all that are members of that association, showing more or less in detail the plan under which this association operates:

——— ——— (Date.)

This agreement is made between ———, party of the first part, and ———, party of the second part, agent. The first party agrees to deliver to second party ——— bales of cotton ——— pounds of cotton seed on or before ——— day of ———, 19—. To assist second party in piling and shedding said bales of cotton or cotton seed, or both, or deliver the same to a warehouse to be designated by second party. The first party agrees to not remove any of said cotton or cotton seed from the possession of said second party under any condition during the life of this contract, except as hereinafter provided, and should first party remove a part or all of said cotton or cotton seed, except as hereinafter provided, he shall be bound to pay to second party the sum of $5 per bale of cotton or $2 per ton of cotton seed before removing same or any part thereof.

Second party agrees to secure contract on cotton or cotton seed from others, as above, until he has in his possession and assembled and piled or penned at least 100 bales of cotton or one minimum carload of cotton seed, to have said cotton graded by a competent grader, to offer a list of said cotton or cotton seed to at least six different buyers and as many more as he can.

To notify said first party when in his judgment the best price is secured. The first party agrees to meet second party within three days of first party's notice, and that when a majority of all parties who have signed similar contracts to this with second party have agreed to a price to sell his cotton or cotton seed in connection with such other cotton or cotton seed as second party may have in his possession under contract at the price agreed to by a majority of those persons who have contracted with second party to sell their cotton or cotton seed. The first party agrees to then deliver the cotton or cotton seed herein described to the shipping point designated by the second party within three days of notice to be given by the second party. And should first party fail to deliver such cotton or cotton seed, second party shall have authority to deliver the same and deduct from the sale price all necessary expenses of such delivery. The consideration of this contract is the sum of 50 cents per bale for each bale of cotton above mentioned and 50 cents per ton for the number of tons of cotton seed above mentioned, which sum of money is paid by the first party to second party and receipt of same is herewith acknowledged.

It is herewith provided that this contract shall expire and all of its provisions except the consideration hereof be null and void in six months from the date in case no agreement as to price above set forth is reached between the parties. It is further provided that the first party, in connection with the second party and all other persons who sign similar contracts to this with second party, shall elect from their number three persons to whom any misunderstanding which may arise concerning this contract shall be referred for settlement, and their action or decision shall be final and binding on all parties, provided that these three shall have no authority to dissolve or otherwise annul this contract.

The second party is to give bond in the sum of ——— dollars to party of first part, said bond to be approved by the committee of three persons above mentioned, for the faithful performance of his agreement herein with first party, and to pay over to first party all moneys received by him from the sale of the cotton or cottonseed herein described; provided that the payment of said moneys shall be made to first party only after the final completion of the sale of said cotton or cottonseed, weights and grades to be guaranteed by second party, agent.

Second party agrees to sell the cotton only on its grades and staple and not on a flat rate, to keep a record of the grades of each bale of cotton, and pay first party the money received for such cotton according to its grade and staple. It is further provided that neither party to this contract shall enter into any agreement with any other person or persons to fix a set price on any of the cotton or cottonseed mentioned herein, but all sales shall be made on the market at the highest prices to be obtained on grade, staple for cotton, and the highest competitive price for cottonseed.

It is understood and agreed that only members of the Farmers' Union in good standing can enter into this contract, known as the Farmers' Union cooperative contract for selling farm products.

———, *Party of the first part.*

———, *Agent, Party of the second part.*

Witnesses:

———.

———.

Those entering into this association at Scotts Station were large landholders, but the same plan was adopted by the small farmers in the vicinity of Atkins, Pope County, Ark., with success most gratifying, as I am informed. This same plan has been followed by many farmers in Kansas and elsewhere.

Mr. Chairman, it strikes me that this plan is most efficacious; it occurs to me that when the details of same are adopted by the farmers as a whole that it may be productive of great results.

I am intensely interested in the question of marketing and have introduced a bill carrying an appropriation of $250,000 to establish what might be termed a "chair of markets" in the agricultural schools of the country; but as to my bill I will have more to say in the future and on an occasion when the merits of marketing are being more thoroughly discussed by the House. As stated by me, this is a question of great and prime importance, and I am sure that when the American Congress comes to understand the question as it should be understood, when it takes into consideration that year in and year out the real producers of the wealth of this country are not receiving a fair price for that which they produce, when this Congress realizes that there is a waste of billions of dollars between the producer and the consumer that is criminal and absolutely unnecessary, thereby doing a great injustice to both the producer and the ultimate consumer and giving an unfair remuneration to those who assist in selling the products of the soil between the producer and the consumer, it will leave nothing undone to remedy this most flagrant evil and will rise as one man and say that the system and the error must be corrected, and give to him who really produces and is the burden bearer of the Government those substantial results in the form of better prices to which he is more than justly entitled.

To show the antiquated form of marketing that is indulged in by the American people to-day and the great loss that results annually to the producers of this wealth, the whole question is argued when we take into consideration the fact that the American farm products for 1912 reached the colossal amount of $13,000,000,000. Of this amount the railroads received $495,000,000, or 3.8 per cent; the legitimate expense of selling was $1,200,000,000, or 9.2 per cent; the waste in selling was $1,560,000,000, or 12 per cent; dealers' and retailers' profits, $3,745,000,000, or 28.9 per cent; the amount received by those who produced this, who toiled and labored that it might be given to the world, received $6,000,000,000, or 46.1 per cent.

Even a casual scanning of this table shows that the system is wrong, that it should be corrected; and when corrected, those so doing will be entitled to the unstinted praise of millions of producers throughout the United States and in deed and truth be great benefactors in their day and generation. [Applause.]

At this time I will not further trespass upon the time of the House.

Mr. HOWARD. Mr. Chairman, I want to consume but a moment of time, to say that I am sincerely in favor of this particular amount remaining in this bill. I think the great trouble with the high cost of living in this country is the difference between the cost of production, or the amount paid to the farmer, and the amount paid by the consumer when he purchases the farmer's product. I can give you a concrete illustration. Take a box of 176 Florida oranges. The grower gets $1.50 for that box f. o. b Florida. When that same box of oranges reaches the consumer in the city of Washington he pays $9.40 retail for those oranges. That is the fact, and I can figure it out for any gentleman who doubts it. That difference of $7.90 is paid to somebody between the producer of the oranges and the consumer of them. Now, in Georgia we have formed what is known as the Georgia Fruit Growers' Association.

Mr. WILSON of Florida. What did the gentleman say about Florida?

Mr. HOWARD. I was speaking of the difference between the cost of a box of 176 oranges in Florida from the grower and the amount they sell for at retail.

Mr. WILSON of Florida. Oh.

Mr. HOWARD. Whenever I have anything to say about Florida, Mr. Chairman, it is always something very complimentary, even about the able Representatives of that State upon this floor. But to resume what I started out to say: We have in Georgia what is known as the Georgia Fruit Growers' Association.

This association was formed for several reasons, the paramount one of which was that for several years we would miss a fruit crop, say, of peaches. The third year, say, we would have an abundant crop. The result was that the production of peaches in abundance would reduce the price to the exient that peaches were hardly worth picking on account of a crude method of marketing. We formed an association; we had an agent, and he had representatives in the different cities of the country—Chicago, Cleveland, Cincinnati, New York, Philadelphia, Brooklyn—all the great cities in the country. These agents in these large cities would inform the Fruit Growers' Association in Georgia where the market needed this fruit. The result was that no one particular market was ever glutted with peaches; they always brought a fair price. The economic waste was negligible. The result was that none of the crop was wasted. Everybody that wanted peaches got them, and no particular market had all the peaches in the country dumped upon it at once, and the grower received a fair price for his product.

Now, we adopted the same method in dealing with the Georgia watermelon. The result is that no market is glutted with the Georgia watermelon. Everybody wants Georgia watermelons; everybody loves Georgia watermelon. [Laughter and applause.] Any man that does not like the luscious Georgia watermelon is always tried for insanity on the spot, and a unanimous verdict rendered against his sanity.

Mr. JOHNSON of South Carolina. He does not need a trial and ought not to have a trial. [Laughter.]

Mr. HOWARD. The necessity for a market provision in the Agriculture Department is so great, in my mind, that the House should be as liberal with this particular item in this bill as the department believes it can use. Therefore, Mr. Chairman, not

imposing upon the House any longer, I hope the amount asked for by this splendid committee will not be reduced, and that the beneficent effects of this appropriation may percolate to the many thousands of farmers of our country.

The CHAIRMAN. The time of the gentleman from Georgia has expired.

Mr. STEENERSON. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. TREADWAY. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD by inserting resolutions adopted by the Legislature of Massachusetts and some correspondence in relation thereto.

Mr. MOORE. Mr. Chairman, I also ask unanimous consent to extend my remarks.

The CHAIRMAN. The gentleman from Massachusetts and the gentleman from Pennsylvania ask unanimous consent to extend their remarks in the RECORD.

Mr. LEVER. Reserving the right to object, Mr. Chairman, I would like to ask the gentleman from Massachusetts what resolutions they are.

Mr. TREADWAY. In reference to aid by the United States Government of the Massachusetts Nautical School.

Mr. LEVER. I have no objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts? [After a pause.] The Chair hears none.

Mr. STAFFORD. Mr. Chairman, do I understand the gentleman from Massachusetts prefers a request to print a whole book in the RECORD. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. STAFFORD. Has the request of the gentleman from Massachusetts been granted?

The CHAIRMAN. It has.

Mr. MURDOCK. Has the request of the gentleman from Pennsylvania [Mr. MOORE] been granted?

The CHAIRMAN. The Chair submitted the request of the gentleman from Pennsylvania and the gentleman from Massachusetts together, but some question arose as to the gentleman from Massachusetts, and the Chair did not put the request of the gentleman from Pennsylvania when he put the request of the gentleman from Massachusetts. He will now put it. Is there objection to the request of the gentleman from Pennsylvania [Mr. MOORE] to extend his remarks in the RECORD?

Mr. MURDOCK. I would like to ask the gentleman what the nature of the extension is?

Mr. MOORE. It has no reference to the senatorial fight. [Laughter.]

Mr. MURDOCK. What does it refer to?

Mr. MOORE. Some data on the Panama Canal.

Mr. MURDOCK. I have no objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania? [After a pause.] The Chair hears none.

Mr. JOHNSON of Washington. Mr. Chairman, I ask unanimous consent to extend my remarks by printing in the RECORD at a later date the remainder of the letter from which I read extracts a short time ago, and I will be pleased to let that serve as an answer to my colleague from the State of Washington, who seems so concerned because I have during the debate on this bill pointed out Government extravagance in the building of rival telephone lines in one forest reserve; that settlers are being unnecessarily harassed. I am proud to have the right to speak for them, notwithstanding these mean insinuations.

Mr. MURDOCK. I would like to ask the gentleman if this is an extension of a letter that he read a short time ago?

Mr. JOHNSON of Washington. My request is to that effect. I do not care to take the time of this committee in replying to offensive language. The letter will answer my colleague.

Mr. MURDOCK. I have no objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. MANN. Mr. Chairman, I do not desire to occupy the remaining time for debate, but I wish to be heard on the point of order.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. MANN. In the current law is an item very similar, almost identical with the item in this bill, although it has not the same heading, appropriating $50,000—

To enable the Secretary of Agriculture to acquire and to diffuse among the people of the United States useful information on subjects connected with the marketing and distribution of farm products, and for the employment of persons and means necessary in the city of Washington and elsewhere.

It is proposed by the amendment to insert, in addition to that, a direction that the Secretary of Agriculture shall study the method and facilities for the sale of crops. That is an entirely different subject from the one that is under consideration in the bill, and not germane.

The CHAIRMAN. Where does the paragraph appear which the gentleman read?

Mr. MANN. Page 65, line 16. The gentleman proposes to insert an amendment, after the word "products," line 19, on an entirely different subject. I say entirely different. I will not deny that there is a relationship between marketing farm products and finding methods and facilities for their sale. Yet, under the rules of parliamentary law, the proposition that is offered as an amendment is not germane to the provisions in the bill, nor is there any warrant of law now for the Secretary of Agriculture to study the methods and facilities of fixing the price for which products shall be sold. Under that language, if inserted in the bill, the Secretary of Agriculture could start in to reform all the terminal transportation facilities of the country. In my judgment, it is clearly not germane. If the gentleman from Texas would permit, there was a proposition before the House in the last Congress, by a special act of Congress, to create a bureau of markets. It was thought more desirable, instead of doing that, to provide an appropriation in the Agriculture appropriation bill of $50,000 in order to commence the study along these lines.

This year the committee has recommended $200,000 instead of $50,000. So far as I am concerned, if I thought it were possible to use more money, I would not have made the point of order, but the Department of Agriculture is developing this idea just as rapidly as it can. The original proposition involved the possibility of furnishing to farmers throughout the country every day the market prices at different places in the country. That was contemplated in the original bill, which was not passed, and this provision was inserted in the bill for the very reason that Congress did not desire at that time, with the information that it had before it, to embark on a project which involved furnishing market prices every day by telegraph throughout the country, because nobody could tell what it would cost.

Mr. LEVER. Mr. Chairman, will the gentleman yield?

Mr. MANN. I yield to the gentleman.

Mr. LEVER. The gentleman from Illinois has evidently examined the bill to which he made reference a moment ago. I desire to ask the gentleman if he does not believe the language carried in this bill is far broader in its scope than the language carried in the bill to which he made reference, and that it provides sufficient authorization to build up such machinery as will be necessary in carrying out this work?

Mr. MANN. I am perfectly willing to admit that the language of this bill is quite broad. As far as we have gone, as far as we know yet, the language of the bill is broad enough to cover anything we want to do without requiring the Secretary to furnish crop prices every morning, as would be contemplated, I take it, by the amendment proposed.

Mr. LEVER. The gentleman from Illinois will realize that the whole Department of Agriculture has been built up upon language that is almost identical with the language submitted here.

Mr. SUMNERS. Mr. Chairman, I desire to be heard for just a few moments. It seems to me clear that the point of order which has been made against this amendment should not be sustained. The gentleman from Illinois [Mr. MANN] in stating his objections to the amendment admits that the language in this section sought to be amended is broad. He complains that the amendment offered is a direction, as I understand his objection, to the Secretary of Agriculture to perform certain services which I submit are included within and germane to the general purposes of this section. This is a section to enable the Secretary of Agriculture to acquire and diffuse among the people of the United States useful information on subjects connected with the marketing and distribution of farm products.

The CHAIRMAN. That language provides only for the Secretary of Agriculture gathering such information as he may and diffusing it among the people of the country, but the gentleman's amendment goes further, does it not, and requires him to take affirmative action in correcting any abuse he might conclude he found, and provide definite and better facilities for marketing and distribution of products?

Mr. SUMNERS. Under the general authority of this section the purpose of the amendment is to direct the Secretary of Agriculture to help do the constructive work necessary. He may

expend this money in accumulating this information, but unless the Secretary goes further and helps to construct the machinery the information is of no more value than if the department having in charge the improvement of roads were simply to gather the information with reference to proper material for building roads, and so forth, and then not send anyone into the field to help the people start right.

Mr. LEVER. Mr. Chairman, will the gentleman yield?

Mr. SUMNERS. Yes.

Mr. LEVER. Does the language of the gentleman's amendment contemplate that the Secretary of Agriculture would have the right under it, if the appropriations were large enough, to provide terminal facilities, for instance?

Mr. SUMNERS. Not at all.

Mr. LEVER. Does not the gentleman think his language is broad enough to permit him to do that?

Mr. SUMNERS. I do not think so. I had not expected the Secretary would undertake to do it.

Mr. LEVER. The Secretary of Agriculture would undertake to do anything that Congress authorized him to do, if Congress provided the money with which to do it.

Mr. SUMNERS. Mr. Chairman, to be entirely candid with the gentleman from South Carolina and with the Chair, I will say that this is a great, big problem, and I am willing that the Secretary shall do whatever is necessary to stop this stuff from rotting in the fields. We have just passed a section providing for the office of supervisor of roads and we have done a good many things in this bill that under strict construction of the rule would not pass, and I submit to the Chair that this language in this amendment, under the construction which the Chair has been placing on language with reference to provisions in this appropriation bill, ought not to be held subject to the point of order.

Mr. LEVER. Mr. Chairman, if the Chair is not ready to rule, I desire to be heard briefly on the point of order, if the Chair has any doubt in his mind.

Mr. ANDERSON rose.

The CHAIRMAN. Does the gentleman from Minnesota desire to be heard on the point of order?

Mr. ANDERSON. Just for a minute or two.

The CHAIRMAN. What position does the gentleman take?

Mr. ANDERSON. I am opposed to the point of order.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. ANDERSON. Mr. Chairman, I agree with the gentleman from Illinois that it is very likely that the department can not economically expend the amount proposed in the amendment; but referring particularly to the point of order, I want to direct the attention of the Chair to the language in the current appropriation act, which is as follows:

> To enable the Secretary of Agriculture to acquire and diffuse among the people of the United States useful information on subjects connected with the marketing and distribution of farm products.

That language is identical with language contained in this bill. Under this amendment the Secretary of Agriculture proposes to undertake investigations of a very broad scope. I read from his report:

> Marketing surveys, methods and costs, including especially available market supplies in given production areas, demand at consuming centers, cold and other storages, marketing systems and prices, and costs of wholesale and retail distribution of farm products.
>
> Transportation and storage problems, having in mind the elimination of waste and the study of problems connected with surplus market supplies; terminal and transfer facilities, including freight congestion, car supply, deterioration in transit, extension of the practice of precooling of perishable products, and other special services.

That is from the report of the Secretary of Agriculture, and I read it merely for the purpose of indicating the breadth or scope of the language in the current appropriation bill as it is interpreted now by the Secretary of Agriculture. I do not think that the amendment of the gentleman from Texas extends the scope of this language at all. It merely directs the activity of the department to a particular channel, a channel which, in my opinion, it now has authority to follow. The amendment of the gentleman from Texas does not extend the language, it does not broaden the scope of the paragraph at all. It is a limitation in the nature of a direction to the department to follow a certain line of investigation or dissemination of information.

Mr. QUIN. Would the gentleman object to the amount of $1,000,000, or so much thereof as may be necessary?

Mr. ANDERSON. Well, I do not think the amount has anything to do with the point of order at all, and I am directing my argument to the language rather than the amount.

Mr. LEVER. Mr. Chairman, I am of the opinion that this amendment suggested by the gentleman from Texas is clearly out of order. I call the attention of the Chair to the language in the bill, which is the language also in the current law:

> To enable the Secretary of Agriculture to acquire and to diffuse among the people of the United States useful information on subjects connected with the marketing and distribution of farm products.

That language was drawn in order to make it conform as nearly as possible to the language of the organic act creating the Department of Agriculture. I had the honor to draw the language myself, and gave it most careful consideration to see that points of order would not lie against it in the first instance. The language of the gentleman from Texas not only carries with it the proposition of collecting and diffusing information touching the matter of marketing and distribution of farm products, but, if I read the English correctly, it would enable the Secretary of Agriculture to provide the machinery by which farm products in this country might be distributed. I believe the language is broad enough that it would enable the Secretary of Agriculture, if Congress gave him the amount of appropriation necessary, to establish terminal facilities and market places in various cities and towns in this country.

Mr. ANDERSON. Will the gentleman yield?

Mr. LEVER. In fact, I believe it goes far enough to enable the Secretary of Agriculture to establish railroad facilities and to do anything that would improve market conditions. Now, such a proposition was never contemplated, certainly in my mind, when this language was drawn and put in this bill. Now I yield to the gentleman from Minnesota.

Mr. ANDERSON. It does not seem to me the conclusion can be drawn by the gentleman from South Carolina from the language of the gentleman from Texas. It is a mere direction upon the Secretary to follow a line of procedure, a line of investigation and diffusion of information, under authority which he now has.

Mr. LEVER. If the gentleman will permit, the language, as I recall it, directs the Secretary of Agriculture to find means of improving distribution facilities and to improve facilities——

Mr. ANDERSON. No.

Mr. LEVER. Certainly the first proposition is correct.

Mr. ANDERSON. To investigate methods and diffuse information in regard to methods and facilities for improving distribution, that is very true; but that does not involve the purchase of machinery or the use of machinery.

Mr. LEVER. To aid in improving facilities for distribution, and that language is in the amendment of the gentleman from Texas also.

Mr. ANDERSON. But it is modified by the prior language.

Mr. LEVER. Under that he may use a portion of this appropriation to help build a depot somewhere. I do not think there is any doubt—certainly not in my mind—that this language is clearly subject to a point of order.

Mr. MADDEN. It would also enable the Secretary of Agriculture, on the part of the Government of the United States, to join any movement for a combination among the farmers.

Mr. LEVER. Well, it might do that. I think the language is broad enough to permit the Secretary of Agriculture to use his own discretion about it in improving facilities for the distributon of farm products.

Mr. MADDEN. And thereby prevent the persons engaged in the combination from being prosecuted under the provisions of the Sherman antitrust law.

Mr. LEVER. Well, I do not know about that; I am not a lawyer, as I have said, but I will say on the point made by the gentleman from Minnesota that from the report of the Secretary of Agriculture and as set forth in the hearings before the Committee on Agriculture, both in the testimony of the Secretary of Agriculture himself and in the testimony of Mr. Brand, who has immediate charge of this work, we are led to believe the department is attempting to do nothing except to gather information along this line and diffuse and disseminate that information in accordance with the language of the act. I ask for a ruling.

The CHAIRMAN. A point of order is made against the amendment that it is not germane to the paragraph of the bill under consideration. The Chair quotes the language of the paragraph in the bill:

> To enable the Secretary of Agriculture to acquire and to diffuse among the people of the United States useful information on subjects connected with the marketing and distribution of farm products.

This provides for the collection and diffusion of valuable information connected with the marketing and distribution of farm products.

The amendment goes very much further than that, it occurs to the Chair, and provides that he shall also aid in improving the methods for facilitating the sale and distribution of farm

products, which might lead us into a very broad field. The amendment would seem to direct the Secretary of Agriculture to go far beyond the scope of collecting and diffusing information to the people in connection with the marketing of farm products. And therefore the Chair concludes that it is not germane to the language of the paragraph which we are considering and feels constrained to and does sustain the point of order. The Clerk will read.

The Clerk read as follows:

Demonstrations on reclamation projects: To enable the Secretary of Agriculture to encourage and aid in the agricultural development of the Government reclamation projects; to assist, through demonstrations, advice, and in other ways, settlers on the projects; and for the employment of persons and means necessary, in the city of Washington and elsewhere, $25,000, of which sum $10,000 shall be immediately available.

Mr. MADDEN. Mr. Chairman, I make a point of order against the paragraph as changing existing law.

Mr. HAWLEY. Mr. Chairman, I ask the gentleman if he will withhold the point of order.

Mr. LEVER. Mr. Chairman——

Mr. MADDEN. I will withhold it.

The CHAIRMAN. Does the gentleman withhold his point of order?

Mr. LEVER. I suggest, Mr. Chairman, we dispose of the point of order.

Mr. MADDEN. I make the point of order, Mr. Chairman.

Mr. LEVER. Mr. Chairman, I desire to be heard very briefly on the point of order. I know, Mr. Chairman, that various Chairmen of the Committee of the Whole have been holding for some time that the language "and elsewhere"—that is, for the employment of persons elsewhere than in the city of Washington—makes the language subject to a point of order.

Mr. MANN. It is just the reverse.

Mr. LEVER. Of course, section 169 of the Revised Statutes enables the executive officers of these various Government departments to employ persons in the city of Washington, and, as I understand it, the language which makes the paragraph obnoxious to the rule is contained in the words "and elsewhere."

Mr. MANN. I think the gentleman is in error about that, although I am not sure about it. But my recollection is that there is a provision against employing in the city of Washington help out of the lump-sum appropriation, and I think that is what the gentleman has in mind. There is no question about our right to make a lump-sum appropriation anywhere for people that are employed under the law, and the only thing that is forbidden, if anything is forbidden, is the employment of people in the city of Washington out of the lump-sum appropriation.

Mr. LEVER. I think, Mr. Chairman, the Chair will find this matter came up on the military appropriation bill some years ago, when we were providing for the employment of persons outside of Washington at some military station, and the point of order was made against the proposition to carry appropriations for the purpose of paying salaries of employees outside of the city of Washington. The Chair then held that such language made the paragraph subject to a point of order; and I submit to the Chair that, while the rulings of different chairmen may be against me on this proposition, unless the gentleman making the point of order can show some statute or authority other than the rulings of the Chair prohibiting the use of such language or the employment of funds for such purposes, the reasoning of the Chair, in my judgment, in these cases has not been good.

Here we have the great Department of Agriculture. We are carrying more than $18,000,000 for it. Necessarily a great deal of that money must be used for the employment of persons and the payment of salaries of the same, who are to do work outside of the city of Washington. It does not seem to me that there is any line of reasoning or any philosophy that would prohibit the Secretary of Agriculture, or any executive head, so far as that is concerned, from taking these appropriations and using them for the payment of salaries of persons engaged in doing the work of the department outside of the city of Washington. Now, a great deal—in fact, a large part—of the funds of the Department of Agriculture would necessarily be spent in the field. And if the Chair holds this proposition to be obnoxious to the rule, he can practically destroy the efficiency of the Department of Agriculture by refusing to the Secretary of Agriculture the power to employ the machinery for carrying the information of this department in person out in the field and giving it to the people of the country.

I say again, that I confess I can not understand the reasoning of the different Chairmen in the past. Unless the gentleman from Illinois [Mr. MADDEN] can point his finger to some statute which specifically prohibits it—and I have not been able to find it, and I have made some little investigation—I believe the Chair would be justified in overturning the precedent, which does not seem to me to be founded on any good reason.

Mr. HAWLEY. Mr. Chairman, I wish to be heard on the point of order. The fundamental law establishing the Department of Agriculture uses this language:

There shall be at the seat of government a Department of Agriculture, the general design and duties of which shall be to acquire and to diffuse among the people of the United States useful information on subjects connected with agriculture in the most general and comprehensive sense of that word.

Now, this item in the bill proposes to enable the Secretary of Agriculture to encourage and aid in the agricultural development on the Government reclamation projects, and in this way "to assist, through demonstrations, advice, and in other ways settlers on the projects." The Government has expended something like $60,000,000 in the building up of canals, drainage systems, and other work necessary to put the water on these arid lands. They have advertised throughout this country and the world the fact that lands were open to settlement and to cultivation on the reclamation projects. The people have gone there, many of them from States where irrigation was not practiced, and they find themselves in difficulties in the matter of applying the water to the crop. Some of them are inclined to apply too much water, some at the wrong season, some to irrigate crops at improper times, and some have made mistakes in determining the crop that ought to be planted, and some have made mistakes in the time of planting the different crops. And they have various other questions connected with the actual development of agriculture on their reclamation projects.

Now, because there are special difficulties attached to this special work a special item has been put into this bill directing the attention of the Secretary of Agriculture to the difficulties that these farmers found, and there is to be done on these reclamation projects the same kind of work done elsewhere—investigate the problems, find the solutions, and convey the information as to how to solve the problems to the farmers on the projects; and the language I read in the law establishing the Department of Agriculture enables the Secretary of Agriculture in the most explicit and definite terms to do any and all of these things that are specified in this item.

Now, in order to get this information to the farmer, he is authorized in that act to convey it in any way that he may think advisable. He has authority to convey it by publication, by written instructions, or by the personal contact of some subordinate in his department with the farmers on the project.

Mr. MANN. Mr. Chairman, will the gentleman yield for a question?

Mr. HAWLEY. Yes.

Mr. MANN. Admitting, as I do, that under the law they have authority to give demonstrations as a method of diffusing information, where it says, "to assist, through demonstrations, advice, and in other ways, settlers on the projects," what does the phrase "other ways" mean? Might not that be construed to assist financially? No one would claim there was any warrant of law for that.

Mr. HAWLEY. I would think there would be no justification for the expenditure of money to assist the settler financially. But the words "in other ways" would mean just the same as if the words "other similar ways" were used.

Mr. MANN. What other similar ways are there after you have advised a man and shown him how? What other ways are there of conveying information except by doing the thing itself? We use the word "demonstration" in various places in the bill—for live-stock demonstration and farm demonstration. That is supposed to cover the whole subject. Now, in regard to that "advice, and in other ways," what other ways would there be?

Mr. HAWLEY. Well, there are a number of farmers, for instance, on a project, endeavoring to grow alfalfa. They have alkali in the soil, and the department has investigated that problem in some other projects and found a solution of it. To the farmers on the project they would say, "On a certain day an expert on alkaline conditions will be on your project. Meet him and hear what he has to say."

Mr. MANN. That is giving advice. If the expert goes and shows them, that is demonstrating. I was simply trying to find a method of striking that out.

Mr. HAWLEY. I have no objection to the language going out. The language, however, is the same as was carried in the law for some time.

Mr. MANN. This item has never been in the law before.

Mr. HAWLEY. I beg the gentleman's pardon. I should have said it was the language suggested by the department.

Mr. STAFFORD. Mr. Chairman, will the gentleman explain wherein the work under this paragraph differentiates from the

work authorized under the paragraph at the bottom of page 60, to which the gentleman directed his attention?

Mr. HAWLEY. The authority given at the bottom of page 60 in that paragraph is for a general investigation of all subjects in which irrigation agriculture is interested. This item on pages 65 and 66 is a special application to the difficult problems on any project where difficult problems exist, and to carry the work of demonstration and advice to the farmers on the project. It is supplementary to the former item, and gives definite authority for the carrying of the information for the solution of the problem to the farmer.

Mr. MADDEN rose.

Mr. HAWLEY. I yield to the gentleman from Illinois [Mr. MADDEN].

Mr. MADDEN. I was not going to ask a question. I was going to take the floor in my own right.

Mr. HAWLEY. I shall conclude in a moment.

Mr. MADDEN. All right.

Mr. HAWLEY. In conclusion, Mr. Chairman, I would like to call the attention of the Chair again to that general statute that I read establishing the Department of Agriculture and to the broad and almost unlimited scope that that language gives to Congress in legislating upon this subject. Everything is included; and, therefore, the work to be done under this paragraph is clearly within the limitations of that statute.

Mr. LEVER rose.

Mr. MADDEN. Mr. Chairman, I submit to the Chair——

Mr. LEVER. Mr. Chairman, I think we can expedite the consideration of this proposition if I make this statement: I had not noticed in arguing the point of order the words "of which sum $10,000 shall be immediately available." Of course that makes the paragraph subject to a point of order, and I concede it.

Mr. MADDEN. I am going to make that point before I get through with it.

Mr. LEVER. I concede the point of order, Mr. Chairman.

Mr. MADDEN. I make the point of order.

The CHAIRMAN. The point of order is sustained.

Mr. LEVER. Now, Mr. Chairman, I offer an amendment on page 65, line 23.

The CHAIRMAN. The gentleman from South Carolina offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, page 65, after line 22, by inserting the following as a new paragraph:

"Demonstrations on irrigation projects: To enable the Secretary of Agriculture to encourage and aid in the agricultural development of reclamation projects, to assist, through demonstrations, advice, and in other ways, settlers on the projects, and for the employment of persons and means necessary in the city of Washington and elsewhere, $25,000."

Mr. MADDEN. Mr. Chairman, I make a point of order against that as a change of existing law.

The CHAIRMAN. The gentleman from Illinois [Mr. MADDEN] makes a point of order against the amendment.

Mr. MADDEN. I maintain, Mr. Chairman, that the amendment offered by the gentleman from South Carolina extends the scope of the law under which the Department of Agriculture is organized by the use of the words "and in other ways" in his amendment, which words give a more comprehensive power to the department than it now has under the law under which it is organized.

Mr. LEVER. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. Yes.

Mr. LEVER. I ask unanimous consent, Mr. Chairman, to modify my amendment by striking out the comma after the word "advice" and striking out the words "and in other ways" and the comma, and inserting between the word "demonstrations" and the word "advice" the word "and."

Mr. MADDEN. How would that read, then?

Mr. LEVER. So that it would read "to assist, through demonstrations and advice, settlers on the projects," and so on.

Mr. MADDEN. I have no objection to that. I will withdraw the point of order if unanimous consent is given to that change.

The CHAIRMAN. Is there objection to the modification of language suggested by the gentleman from South Carolina?

There was no objection.

The CHAIRMAN. The Clerk will report the amendment as modified.

Mr. MANN. Mr. Chairman, I suggest that the amendment be reported to the paragraph in the bill. Will the gentleman withdraw his amendment as a new paragraph?

Mr. LEVER. I offered it as a new paragraph.

Mr. MANN. I know. Withdraw that and amend the paragraph in the bill.

Mr. LEVER. Very well. I offer the amendment to the paragraph in the bill.

Mr. FOSTER. Mr. Chairman, the paragraph is already out of the bill.

Mr. LEVER. Yes; that is the fact.

Mr. MANN. I did not so understand it.

The CHAIRMAN. The Clerk will report the amendment as a new paragraph.

Mr. LEVER. That is right.

The Clerk read as follows:

Page 65, after line 22, insert the following as a new paragraph:

"Demonstrations of reclamation projects: To enable the Secretary of Agriculture to encourage and aid in the agricultural development of the Government reclamation projects; to assist, through demonstration and advice, settlers on the projects, and for the employment of persons and means necessary, in the city of Washington and elsewhere, $25,000."

The amendment was agreed to.

Mr. MURDOCK. Mr. Chairman, I offer the following as a new paragraph.

The CHAIRMAN. The gentleman from Kansas offers an amendment, which the Clerk will report.

The Clerk read as follows:

At the end of line 5, on page 66, insert a new paragraph, as follows:

"To enable the Secretary of Agriculture to cooperate with and make an exhibit at the next annual meeting of the International Dry-Land Congress, to be held at Wichita, Kans., during the fiscal year ending June 30, 1915, illustrative of the investigations, products, and processes relating to farming in the subhumid region of the United States, including labor and all expenses in the city of Washington and elsewhere, $20,000, to be immediately available."

Mr. LEVER. Mr. Chairman, I reserve a point of order.

Mr. MANN. I hope the gentleman will not reserve any point of order; that is, I hope he will withdraw it. It fell to my lot once, and it was a very disagreeable duty, to stop an emergency appropriation for the dry-land farming congress held somewhere down in the Southwest—I think in the great State of Oklahoma. Now, there is plenty of time to consider this. The gentleman from South Carolina [Mr. LEVER] was favoring this very project at that time. If we are going to do it at all, let us do it now and let the House have a vote on it.

Mr. MURDOCK. Does the gentleman object to reserving the point of order? Does he want the gentleman from South Carolina to make it?

Mr. MANN. I want him to withdraw it.

Mr. LEVER. I will say to the gentleman from Illinois that he is always persuasive, but I am afraid I can not accommodate him in this instance; so I reserve the point of order.

Mr. MURDOCK. Mr. Chairman, the amendment relates to a Government exhibit at the International Dry Farming Congress. Those who live on the Great Plains have what they call a dry-farming congress each year. They invite to it the representatives of other nations, because other nations have dry-farming problems. I understand that Canada usually makes an exhibit. This country has made exhibits. I think the last time the Government exhibit was at Tulsa, Okla., and we provided for it in a paragraph similar to the one which I have introduced.

Now, Mr. Chairman, I have listened to the reading of this great bill from beginning to end, and the consideration of it, now about to conclude. Agriculturally considered, there is no section of the country more fascinating in its problems and more alluring in its possibilities than the Great Plains section. It is distinct as a section. It is about 1,100 miles long and about 350 miles wide. It extends from the ninety-eighth meridian on its eastern border to the 5,000-foot contour at the eastern slope of the Rocky Mountains. It has an exceedingly rich soil, but its marvelously rich and fertile soil is complicated by an irregular distribution of rainfall. Occasionally and very frequently portions of that land produce prodigiously and profitably.

The first agricultural attack upon these plains many years ago was with the idea that you could apply to it the methods of tillage and the plant life of the section farther east. The men who attempted that were, in a measure, defeated; but there has grown upon those plains in the last 25 or 30 years a strong type of man who has courage, determination, and who understands his climate and his soil. This man has brought to that land improved methods of tillage applicable to that climate and that soil, and with the aid of the Government he has also brought to it a wonderfully interesting adaptation of plant life, as, for instance, the forage crops, kaffir corn, and some drought-resisting grasses.

The men who have accomplished this settlement on the Great Plains have done one of the really remarkable things of our time. Their congress is an expression of their triumph. This year they are to hold their congress in my town, Wichita. It lies to the east of this Great Plains section. It has profited and grown up largely by the patronage of a portion of that section of the country. The representatives of 10 foreign nations which

have similar problems to deal with will be on hand. I understand Canada will be represented there with an exhibit. I think it is fitting that this Government should have an exhibit there. In the last few days we have seen numerous items considered which provided for appropriations to enable the Government to demonstrate its methods of improved agriculture for the benefit of the farmer. Here is an opportunity to demonstrate them through an exhibit to the men who gather there. I hope—although I have no very lively hope in this regard—that the gentleman from South Carolina will sufficiently yield for this once at least to withdraw his point of order at the suggestion of the gentleman from Illinois [Mr. MANN].

Mr. MANN. Will the gentleman from Kansas yield?

Mr. MURDOCK. Certainly.

Mr. MANN. I appeal to him for information, in the absence of the gentleman from Wyoming, who usually furnishes the House with information on the Dry Farming Congress, because he at one time was president of it.

Mr. MURDOCK. Which I never have been.

The CHAIRMAN. The time of the gentleman from Kansas has expired.

Mr. MANN. I ask unanimous consent that the gentleman may have two minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MANN. Has the gentleman looked up to see what appropriations were made for the Dry Farming Congress when it was held in Canada two or three years ago?

Mr. MURDOCK. No; I have not.

Mr. LEVER. I can inform the gentleman. It was $20,000.

Mr. MANN. We have made appropriations several times. My recollection is that these appropriations have been carried heretofore in the sundry civil bill or in a deficiency bill.

Mr. MURDOCK. No; I think the last appropriation was in the Agricultural bill.

Mr. MANN. I think it is more appropriate that they should be in the Agricultural bill.

Mr. MURDOCK. The last one was carried in the Agricultural bill at this point where I want to insert this amendment.

Mr. LEVER. The Agriculture bill has carried two appropriations, one for when the congress was held in Canada and the last one—I do not remember where it was.

Mr. MURDOCK. It was in Oklahoma. Was not one carried for Colorado Springs?

Mr. LEVER. No; I think not. I will say to the gentleman from Illinois that these appropriations have always been put on in the Senate. The Committee on Agriculture in the House has been against the proposition without any exception.

Mr. MANN. Mr. Chairman, let me appeal to the gentleman from South Carolina. Here is the gentleman from Kansas, Progressive leader in the House, and the exposition is to be held in his home town. It is the custom of Congress to make appropriations for these expositions. Under the circumstances, while it has been customary in the past to require that the item should be inserted in the Senate, does not the gentleman from South Carolina think that it would be the courteous thing on this occasion to permit the item to be inserted here, as it is certain to be inserted sooner or later somewhere, and let the gentleman from Kansas have the credit for the appropriation in his home town?

Mr. LEVER. That is a very strong statement and a very fair statement.

Mr. MURDOCK. It appeals to me. [Laughter.]

Mr. LEVER. And it appeals to me, for I have a strong personal affection for the gentleman from Kansas [Mr. MURDOCK]. I suggest, however, that $20,000 is rather large, and I would like to inquire if he would not be willing to make it $10,000?

Mr. MURDOCK. Delighted, I will say to the gentleman. [Laughter.]

Mr. LEVER. Of course, if no member of the Committee on Agriculture objects. What does the gentleman from Iowa say?

Mr. HAUGEN. I make no objection; in fact, I think it would be very appropriate and just.

Mr. LEVER. Then, Mr. Chairman, I will make no objection if the gentleman will modify his amendment.

Mr. MURDOCK. Mr. Chairman, I ask unanimous consent to modify my amendment by making it $10,000.

The CHAIRMAN. The gentleman from Kansas asks unanimous consent to modify his amendment. Is there objection?

There was no objection.

Mr. MURDOCK. I make my most profound bow to the gentleman from Illinois and the gentleman from South Carolina, the gentleman from Iowa, and all the Members of the House.

Mr. MORGAN of Oklahoma. Mr. Chairman, I wish to speak to the amendment. I am certainly very much gratified at the success which seems apparent for this amendment, offered by the gentleman from Kansas [Mr. MURDOCK]. I am his neighbor. I live a little farther out toward the semiarid region than he does. I see that he claims that Wichita is just on the border of this region. I have observed that this semiarid region is always west of us.

Mr. MURDOCK. If the gentleman will pardon me, I did not use the word "arid"; that is a comparative term in my country.

Mr. MORGAN of Oklahoma. I live in what some call the semiarid region.

Mr. MURDOCK. The gentleman lives in a subhumid region.

Mr. MORGAN of Oklahoma. I attended the International Dry Farming Congress held last year at Tulsa. It was a remarkable exhibition, and very impressive. It was largely attended, and I am sure accomplished much good. Few people realize the importance of encouraging the production of products out in this section of the country. We have just passed, I believe, a proposition to appropriate $25,000 to help the settlers on irrigation projects. That is all very worthy. But, after all, only a very small percentage of area can be helped by irrigation. Out in that vast plain country are hundreds of millions of acres of land that I believe in time, under proper assistance from the National Government, will be brought under cultivation and will make homes for tens of millions of people who will become useful and helpful citizens of this great country.

I believe that this Congress and this Government should render every aid possible for the development of Agriculture by dry-farming methods. I myself, in 25 years of residence in the West, have seen millions of acres brought under cultivation which at one time was supposed to be too far west for successful farming. Hundreds of thousands of happy people are now living and sustaining themselves there. Even 20 years ago we in Oklahoma who lived in the center of the State thought that out in the western fourth of the State, where I live now, it was too dry; that you could not sustain a population; that farmers could not support themselves; and yet to-day that is a prosperous section of the State. Through the selection of proper crops, through better understanding of how to cultivate the land, through the assistance given by the National Government, and through the pluck and determination and intelligence of American citizens who have gone to that country, that land is now worth from $20 to $30 per acre and we are building up a splendid civilization, equal to the best in any section of this country.

So I congratulate my colleague from Kansas that he has offered this amendment and is about to secure this appropriation, and I hope no gentleman in the House will object to it.

Mr. LEVER. Mr. Chairman, I only want a second. I desire to say that I hope members of the committee will not take this action as a precedent for coming to the Committee on Agriculture with propositions for appropriations for all kinds of exhibits throughout the country.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

That section 13 of the act entitled "An act to enable any State to cooperate with any other State or States, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers," approved March 1, 1911 (36 Stat. L., p. 963), is hereby amended by striking out the word "five," in the first line of said section, and inserting in lieu thereof the word "twenty-five," the purpose of this amendment being to increase the percentage payable to each State from moneys received, as provided in said section, from 5 to 25 per cent.

Mr. MADDEN. Mr. Chairman, on that I make the point of order on the ground that it changes existing law.

Mr. LEVER. Mr. Chairman, I concede the point of order.

The CHAIRMAN. The point of order is sustained. The Chair would inquire of the gentleman from Illinois if he makes it against the entire paragraph?

Mr. MADDEN. Yes.

The Clerk read as follows:

Experiments and demonstrations in live-stock production in the cane-sugar and cotton districts of the United States: To enable the Secretary of Agriculture, in cooperation with the authorities of the States concerned, or with individuals, to make such investigations and demonstrations as may be necessary in connection with the development of live-stock production in the cane-sugar and cotton districts of the United States, including the erection of such temporary farm buildings as may be found necessary, and for the employment of persons and means necessary in the city of Washington and elsewhere, $50,000, and the Secretary of Agriculture is authorized to sell in the open market or to exchange for other live stock or farm products to the best advantage, without the usual condemnation proceedings and public auction, such live stock or farm products as cease to be needed: *Provided*, That all moneys received from the sale of such live stock or farm products, or as a bonus in the exchange of the same, shall be deposited in the Treasury as miscellaneous receipts.

Mr. MADDEN. Mr. Chairman, on that I reserve the point of order.

Mr. LEVER. Mr. Chairman, I concede, of course, that this paragraph is subject to a point or order, but inasmuch as we have just allowed the gentleman from Kansas [Mr. MURDOCK] to insert an item which was clearly subject to a point of order, and inasmuch as the Secretary of Agriculture was very earnest in his recommendation of this item in order to do work in the cane-sugar producing belt of the country, I trust the point of order will not be made.

Mr. MANN. Let me ask the gentleman a question. I am quite willing to appropriate $50,000, but is it intended, as appears from this paragraph, that the Government shall own a farm, erect farm buildings, and raise and fatten live stock and sell the live stock, or is it intended that the Government shall furnish bulls for service in that region?

Mr. LEVER. Neither. I would say to the gentleman from Illinois. The purpose of the work is to redirect, as it were, the agricultural situation and to cooperate with the State authorities in doing so. It may be necessary to erect a very cheap building of some character on a demonstration farm somewhere, but of course the Government would not own the farm and the land would be contributed by individuals, or probably by the State; but there is no intention either to buy breeding cattle or to buy land for those purposes. It is really in line with the demonstration methods being carried on in the South, except that you would have to get a little different type of men to do the work.

Mr. MANN. Is it intended to buy cattle?

Mr. LEVER. No; that is not the intention.

Mr. MANN. If you do not buy cattle, how are you going to sell them?

Mr. LEVER. We do not sell them.

Mr. MANN. Oh, certainly; because there is an express provision authorizing the sale of cattle without selling them at auction.

Mr. HAWLEY. Mr. Chairman, will the gentleman yield?

Mr. LEVER. Yes.

Mr. HAWLEY. If the gentleman will remember, in the estimate submitted by the department it was proposed to buy a few bulls for stock purposes, but when the committee framed this paragraph we specially struck that authorization out, and the rest of the paragraph was not reframed to meet that.

Mr. LEVER. We provide in another place that no part of the funds of this appropriation bill shall be used for that purpose.

Mr. MANN. Oh, not at all. You provide in another place that no part of that fund shall be used for the purchase of live stock.

Mr. LEVER. I think this is what it means. It may be that some stockman would make a gift of a fine bull to the Department of Agriculture, and it becoming the property of the department, the department would want to dispose of it at some time later.

But I will tell the gentleman very frankly there was no thought in the mind of the committee, and certainly no suggestion from the Department of Agriculture, that any of this appropriation was to be used for the buying of breeding cattle or for the purchase of farms or anything of that kind.

Mr. MANN. Then it could not possibly do any harm to strike out all after the figures "$50,000."

Mr. HAUGEN. In a way it is establishing an experiment station such as we have in the States to experiment in stock breeding, such as we have in the States' experimental stations, and in order to carry on the experiments they must have the stock with which to experiment, and as the stock matures they have to dispose of it. This is along the same line that is carried on in practically all of the States of the Union.

Mr. MANN. There is nothing special about this place——

Mr. LEVER. I will say to the gentleman from Illinois I have absolutely no objection to the amendment he suggests.

Mr. HAUGEN. In regard to the disposition of the stock. You must have the stock to demonstrate with, and, if so, you must have authority to dispose of the stock when it is mature and prepared for market.

Mr. MURDOCK. This is done in cooperation with the States?

Mr. LEVER. Yes; my understanding is——

Mr. MADDEN. Allow me to suggest that what I wanted to have covered in my point of order was all after the figures "$50,000," in line 15. I desire to have all that stricken out on my point of order.

Mr. STAFFORD. Mr. Chairman, I renew the point of order on the paragraph.

The CHAIRMAN. Does the gentleman make the point of order?

Mr. STAFFORD. I am seeking to have some further information. I may make it.

Mr. GARRETT of Texas. Regular order!

Mr. MOORE. Mr. Chairman——

Mr. STAFFORD. I would like to get some information from the chairman——

Mr. LEVER. I confess there was not a great deal in the hearings on the proposition. I thought I had the full notes here, but I find I do not have them in my papers. I did make a very full statement in the report, as the gentleman will see.

Mr. STAFFORD. As the gentleman from Iowa [Mr. HAUGEN] has stated, we are going to adopt an innovation here, so far as certain States are concerned, and establish experiment stations similar to those established by the States. Is that correct?

Mr. LEVER. I will say to the gentleman from Wisconsin that is not my understanding of the situation at all. My understanding of it is that the department, in cooperation with the State authorities of Louisiana, will send some of its very best trained men to do demonstration work, in the hope of redirecting the agricultural condition in that State, and that no experiment station, as we understand the ordinary meaning of that expression, is to be established. That is my understanding.

Mr. HAUGEN. Not a permanent station, but the proposition is to demonstrate stock raising, and of course in order to carry on the experimentation they must buy the stock, and when the stock mature and are ready for sale there must be a provision in this law authorizing the sale of the stock. The experimentation can be carried on without stock.

Mr. LEVER. And this work is in cooperation with the State experiment station, and there is this difference——

The CHAIRMAN. The time of the gentleman has expired.

Mr. HAUGEN. Mr. Chairman, I ask to be recognized in my own time, that we may thrash this matter out. The only difference is that one is experiment stations and the other is temporary. In this we simply appropriate enough money to carry on the demonstration and teach the people the best methods of stock raising for one year.

Mr. LEVER. Will the gentleman permit?

Mr. HAUGEN. Yes.

Mr. LEVER. In cooperation with the State experiment station already existing.

Mr. HAUGEN. Exactly, and it also provides for the buildings necessary. The gentleman will remember that attention was called to a certain process of drying hay, and various things incidental to stock raising.

Mr. STAFFORD. Will the gentleman yield?

Mr. HAUGEN. Certainly.

Mr. STAFFORD. When the gentleman refers to State experiment stations of the various States does he mean by that the experiment stations under the control of the National Government or the State experiment stations?

Mr. HAUGEN. Provided for by the National Government.

Mr. STAFFORD. Then it is no departure from the existing practice as carried on by the National Government in other lines of activities?

Mr. HAUGEN. The line of work to be carried on in those stations, as I understand it, is identical with that carried on in experiment stations.

Mr. STAFFORD. Maintained by the Government?

Mr. HAUGEN. Yes; appropriated for by the National Government.

Mr. MADDEN. Mr. Chairman, I insist on my point of order to strike out all after the figures "$50,000," page 67, line 15.

Mr. HAUGEN. Mr. Chairman, I suggest to the gentleman he ought not to do that. If it is to be of any value whatever, they must have the stock.

The CHAIRMAN. Does the gentleman insist on the point of order?

Mr. MADDEN. I insist on the point of order.

The CHAIRMAN. The point of order is sustained.

Mr. STAFFORD. Mr. Chairman, I believe I reserved a point of order to the paragraph.

Mr. LEVER. A parliamentary inquiry.

The CHAIRMAN. The gentleman from Wisconsin [Mr. STAFFORD] reserved a point of order, but the gentleman from Illinois [Mr. MADDEN] made a point of order against certain portions of it.

Mr. LEVER. A parliamentary inquiry. Am I to understand the gentleman from Illinois [Mr. MADDEN] to make the point of order against the paragraph or only certain language of it?

The CHAIRMAN. Only as to the language after the figures "50,000."

Mr. STAFFORD. Mr. Chairman, I reserve a point of order against the entire paragraph. I would like to have the gentleman's attention to that provision on page 19, lines 17 to 22.

which provides for an authorization by the Bureau of Animal Industry as to the investigation and encouragement of improved methods of farm management, and ask why the omnibus provision there stated would not cover this identical case?

Mr. LEVER. We discussed that very question in committee. I have now a good deal more information than I had a moment ago, because I have gotten the hearings. But the committee thought, and the testimony was to the effect, that the item to which the gentleman is now referring, on page 19, is to be used in tick-free areas in the South. Now, this sum of money is to be used entirely in the State of Louisiana, on account of the change in the economic situation. The item which the gentleman here is talking about is to be used in other sections of the South in tick-free areas.

Mr. STAFFORD. As I understand from your exposition of the subject here, the National Government does maintain experiment stations in various States, carrying on work of similar character?

Mr. LEVER. There are 48 of them.

Mr. STAFFORD. And this is not a radical departure from the established practice of the National Government?

Mr. LEVER. This is along the same line as heretofore, but yet not exactly in the same line, because the work is to be devoted to one special line rather than to the regular work of agricultural experimentation.

Mr. STAFFORD. How long does the gentleman think this line of experimentation will continue if it is established?

Mr. LEVER. I do not think that this appropriation will be continued over two or three years.

Mr. STAFFORD. Do the gentlemen from Louisiana, who are most anxious to have this appropriation, agree with the statement that it will only be a matter of two or three years duration?

Mr. BROUSSARD. Mr. Chairman, we agree absolutely with the statement that it will not be more than one or two to three years. We are conducting experiments in Louisiana for rice purposes, and we are also conducting experiments, entirely by the State, for sugar-cane production. We propose to change that along the line suggested in the provision by the Secretary of Agriculture; and the State of Louisiana will cooperate and turn over whatever it has toward that work in order to try to change from one great industry that apparently must go out of business, in large part anyhow, and experiment along the lines of producing meats and grains and hay and things of that character. And I do not think that more than one or two, and certainly not more than three, years of this appropriation will be asked of Congress.

Mr. LEVER. In addition to that, I wish to say——

Mr. STAFFORD. Mr. Chairman, on the exposition made by the gentleman I withdraw the reservation.

Mr. HAWLEY. Did the Chair rule on the point of order made by the gentleman from Illinois [Mr. MADDEN]?

The CHAIRMAN. The Chair sustained it.

Mr. MOORE. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Pennsylvania offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 67, lines 6 to 7, after the word "production," strike out "in the cane-sugar and cotton districts of the United States"; and in lines 11 and 12, after the word "production," strike out "in the cane-sugar and cotton districts of the United States."

Mr. MOORE. Mr. Chairman, if the Secretary of Agriculture wants to designate Louisiana or any other State as the one beneficiary of this appropriation, he may do so. But I question whether it is proper to put in a law this special provision that $50,000 shall be expended only in certain States.

Granted that the party in power has the right to do very much as it pleases with an appropriation of this kind, though it be for the employment of experts in certain emergencies or for the employment of labor, the law ought to be general and there ought to be as fair a show for the State of Minnesota, for example, to seek participation in this appropriation for experimental purposes as is conceded to Louisiana or any other State. Experimental work of this kind might result in very great benefit to the farmers of Michigan or to those of California. So that it seems unfair and unwise to specialize at this time and in this way that this appropriation shall not go into any of them. This appropriation should be for the benefit of the whole country, and those who come from other sections, where stock raising and stock experimentation is a part of the life of the community, ought to have a chance to ask the Secretary of Agriculture for the application of some of these funds. The information is as valuable in one section as it is in another, so far as practical purposes are concerned.

If we were to discuss it from the political viewpoint, there is no reason why, if the administration wants to exercise its authority, it could not apply all of this money to one particular State, or one particular city, or one particular county. It is Democratic doctrine that there ought to be no special privileges, that the benefits that are administered as the result of our laws should be enjoyed by all, and that there should be no special privileges to any.

Now, if it is a fact that down in Louisiana, in particular, the tariff legislation affecting the production of sugar has made it necessary for the National Congress to send money there to make good the losses that have resulted from such Democratic legislation, that fact ought to be generally known. Our sympathies on this side of the House go out to the people of Louisiana who have suffered a loss of revenue as the result of Democratic tinkering with the tariff law. Certain sections of the State, it was said, would by reason of the removal of the duty on sugar be depopulated; and the cane producer, we were told, would be very much discouraged in his efforts.

I do not want to interfere with a general appropriation that will help the cane producer to improve his stock conditions or to turn his mind to new avenues of employment. I will gladly vote money to him and to others that have been so unfortunate as to come under the baneful effects of the Democratic tariff law if it will help them, but I do not think we ought to specialize it in our legislation. We ought to make the law general.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. BRYAN. Mr. Chairman, just a moment. I wish to oppose the amendment.

Mr. LEVER rose.

The CHAIRMAN. The gentleman from Washington [Mr. BRYAN] is entitled to speak for five minutes.

Mr. LEVER. Mr. Chairman, I want to submit a request. I notice a number of gentlemen on their feet. We are likely to precipitate a tariff discussion. The Agricultural appropriation bill has never been a vehicle of political discussion. I want to get through with the consideration of this bill this evening. Gentlemen must realize how tired I am, after a whole week of standing on my feet here, and other gentlemen are tired, too. I wish very much that gentlemen will let us get through with this bill.

Mr. BRYAN. Mr. Chairman, I have the unique distinction of being one of the many "cousins" of BOB BROUSSARD, having been born down in Louisiana, and I am very anxious to have an opportunity to vote for this thing and against this amendment. I am glad, as a son of Louisiana, to support it, and I hope we shall all support it.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Pennsylvania [Mr. MOORE].

The question was taken, and the amendment was rejected.

Mr. McLAUGHLIN. Mr. Chairman, I offer an amendment, which I send to the Clerk's desk.

The CHAIRMAN. The gentleman from Wisconsin offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 67, line 12, after the words "United States," strike out the remainder of the paragraph and insert the following: "$50,000, provided that no part of this appropriation shall be used in the purchase of animals for breeding purposes."

Mr. McLAUGHLIN. Mr. Chairman, I wish to say a word in regard to the amendment. It is very evident that the people of Louisiana need help; that recent legislation puts them in such a position that they can not carry on the business in which they have been engaged, and they need help in engaging in new work.

But I think a misapprehension prevails in regard to this experiment station. That was evidenced by the question asked by the gentleman from Wisconsin [Mr. STAFFORD], whether this is to be an ordinary experiment station such as is established by the Federal Government, or by the States assisted by the Federal Government, and I feel that the answer given by the gentleman from South Carolina [Mr. LEVER] leads the gentleman from Wisconsin to believe that this is to be one of the ordinary experiment stations.

Mr. STAFFORD. That is my impression. That is the reason why I made a point of order.

Mr. McLAUGHLIN. This is not the ordinary experiment station. The experiment stations are established at the agricultural colleges by the States, and are carried on by the States, assisted in some measure and to some extent by appropriations made by the Federal Government.

If the language remains as it is in the bill, it will provide for stock farms, for the purchase of breeding animals, and the carrying on of demonstrations, and the raising of stock on as large a scale as the use of $50,000 will permit.

Mr. LEVER. Mr. Chairman, will the gentleman yield?

Mr. McLAUGHLIN. Yes.

Mr. LEVER. I did not catch the reading of the amendment. There is so much confusion that I can not always hear my own voice. I ask unanimous consent that the amendment be again reported. I rather think I am going to agree to the gentleman's amendment.

The CHAIRMAN. If there be no objection, the amendment will be reported again, if the gentleman from Michigan [Mr. McLAUGHLIN] will yield for that purpose.

Mr. McLAUGHLIN. Let it be reported.

The Clerk read as follows:

Page 67, line 12, after the words "United States," strike out the remainder of the paragraph and insert the following: "Fifty thousand dollars: *Provided*, That no part of this appropriation shall be used in the purchase of animals for breeding purposes."

Mr. McLAUGHLIN. Mr. Chairman, the gentleman from South Carolina [Mr. LEVER] has said, in answer to a question asked by some Member on the floor, that the work is to be carried on in the State of Louisiana the same as in sections of the South which are free from the cattle tick.

Mr. LEVER. If the gentleman will yield, I will say that I will accept that amendment.

Mr. STAFFORD. The gentleman has made quite a serious statement here.

Mr. LEVER. I did not hear the statement.

Mr. McLAUGHLIN. I have the floor, and if it is agreeable to the gentleman from South Carolina I will say that I will stop talking and let the amendment be voted upon.

Mr. LEVER. I accept the amendment without further discussion.

The CHAIRMAN. The gentleman from Michigan has some time left, and if he desires to use it he may do so.

Mr. McLAUGHLIN. I do not care to use any further time. Let us have a vote.

Mr. HAUGEN. Mr. Chairman, this appropriation is to encourage the live-stock industry of the South; and in order to carry on the proposed experiments as they are carried on in the experiment stations, it will be necessary to have the stock to experiment with. Without the stock the experiments can not be carried on. Now, the amendment of the gentleman from Michigan [Mr. McLAUGHLIN] would preclude the department from purchasing stock for breeding purposes. I take it that they would have authority under the law to purchase stock for experiments in feeding and other purposes. Now, why should not the authority be given to encourage breeding as well as feeding. If the appropriation is to be of any value whatever, and if it is for the purpose claimed by the gentleman from Louisiana, then by all means they should have the stock to experiment with.

Mr. LEVER. Mr. Chairman, let me say briefly that my understanding is that the Department of Agriculture has never had any intention of purchasing breeding stock for this work in that section, but that the intention is to do in a little better way the same kind of work that it is doing in South Carolina, for instance, in teaching the people of that State the better methods of live-stock growing by sending an expert cattle breeder into a community, organizing associations, and teaching them the best breeds of cattle for the particular localities in which they live. I understand that the department intends to do this same character of work in a little more intensive, energetic, and concentrated way in the State of Louisiana, and that there has never been any intention to purchase stock for breeding purposes. Hence I see no objection to the amendment.

Mr. HAUGEN. If it is not the intention to carry on experiments and to own stock and to purchase stock, then this amendment will do no harm. But I will ask the gentleman, Why was the provision inserted authorizing the department to sell live stock at auction or otherwise?

Mr. LEVER. My answer to that a moment ago was that I understand the language was put in for the reason that some stock breeder in the State of Kansas or Iowa who wanted to advertise his breed of cattle, Hereford or some other type, might donate to the Federal Government a fine bull for breeding purposes. My friend from Louisiana states that a West Virginia breeder has already made just such an offer. Now, the Government having come into the possession of this property at some time might want to dispose of it. I presume the language was put in there for that purpose.

Mr. HAUGEN. I am satisfied that this proposition has merit. If the chairman and the gentleman from Louisiana are satisfied to accept the amendment, I have no objection.

Mr. LEVER. The gentleman from Louisiana informs me he has no objection.

The amendment was agreed to.

The Clerk read as follows:

That hereafter the maximum salary of any scientific investigator, or other employee engaged in scientific work and paid from the general appropriations of the Department of Agriculture, shall not exceed $4,500 per annum.

Mr. MANN. Mr. Chairman, I move to strike out the last word. Is it the intention to fix the compensation of experts at the rate of $4,500 a year or is it intended to fix it so that a scientific expert may work for 10 days in the year and receive $4,500 annually?

Mr. LEVER. I will say that the language in the bill was submitted by the department, and is intended to raise the salary limit of experts in the department $500. The gentleman knows that the maximum annual salary is now $4,000. The Secretary of Agriculture and the committee desire that that limit be raised by $500.

Mr. MANN. Mr. Chairman, I move to insert on page 68, line 2, after the word "exceed," the words "at the rate of."

Mr. LEVER. I have no objection to that.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

On page 68, line 2, after the word "exceed," insert the words "at the rate of."

The amendment was agreed to.

The Clerk read as follows:

The Secretary of Agriculture is hereby authorized and directed to prepare a plan for reorganizing, redirecting, and systematizing the work of the Department of Agriculture as the interests of economical and efficient administration may require; such plan shall be submitted to Congress in the Book of Estimates for the fiscal year 1916; and the estimates of expenses of the Department of Agriculture for the fiscal year 1916 shall be prepared and submitted in accordance therewith.

Mr. MADDEN. Mr. Chairman, I make a point of order against the paragraph.

Mr. PAGE of North Carolina. I want to offer an amendment to the paragraph, Mr. Chairman.

Mr. LEVER. Will not the gentleman from Illinois reserve the point of order?

Mr. MADDEN. I will reserve it.

Mr. MANN. I hope my colleague will not make the point of order. I understand an amendment is to be offered by the gentleman from North Carolina [Mr. PAGE] which will allow the Secretary to prepare a plan and submit it to Congress for its action.

Mr. PAGE of North Carolina. After hearing my amendment, I think the gentleman from Illinois will withdraw his point of order.

Mr. MADDEN. Let us hear the amendment.

Mr. PAGE of North Carolina. I will send it to the desk.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 68, line 7, after the word "require," strike out the remainder of the paragraph and insert "and such plan shall be submitted to Congress at the beginning of the next regular session for consideration."

Mr. MADDEN. Mr. Chairman, I withdraw the point of order.

Mr. STAFFORD. I renew the point of order, Mr. Chairman. I should like to inquire of the gentleman from North Carolina, because this is in line with his special work, the advisability of permitting any department head to revise his plan of estimates. You will recall that some years ago we forbade it.

Mr. PAGE of North Carolina. If my amendment is adopted, it will not authorize him to change any method of submitting estimates in the slightest degree. All he will be authorized to do is to submit a plan of reorganization to Congress for its consideration. The estimates will be submitted in the regular way.

Mr. STAFFORD. He would continue to submit his estimates in accordance with the present law?

Mr. PAGE of North Carolina. He would.

Mr. STAFFORD. I withdraw the point of order.

Mr. FOWLER. Mr. Chairman, I renew the point of order. I make the point of order against the paragraph.

Mr. LEVER. I hope the gentleman will not do that.

Mr. MANN. The regular order, Mr. Chairman.

The CHAIRMAN. The regular order is demanded, and the point of order is sustained.

The Clerk read as follows:

Hereafter employees of the Department of Agriculture assigned to permanent duty in Alaska, Hawaii, Porto Rico, and Guam may, in the discretion of the Secretary of Agriculture, without additional expense to the Government, be granted leave of absence not to exceed 30 days in any one year, which leave may, in exceptional or meritorious cases, where an employee is ill, be extended, in the discretion of the Secretary of Agriculture, not to exceed 30 days additional in any one year.

Mr. MADDEN. Mr. Chairman, I make a point of order against the paragraph. I think 60 days' leave of absence is more than ought to be granted to anybody in the service. No such leave is granted in any private enterprise in the United States.

Mr. LEVER. I concede the point of order.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

Total carried by this bill for the Department of Agriculture, $18,947,232.

Mr. MANN. Mr. Chairman, I move to strike out the last word. While this item is carried in the present law, it is a memorandum merely, and ought not to be in the bill.

Mr. LEVER. I think the gentleman is right about it, although this bill has always carried this language.

Mr. MANN. It did last year.

Mr. LEVER. I do not think it makes any difference.

Mr. MANN. If it should be carried at all, the word "bill" should be changed to the word "act." But it is a memorandum merely, and although it is sometimes carried in an appropriation bill, it is simply information.

Mr. LEVER. I have no objection to its going out.

Mr. MANN. Mr. Chairman, I ask unanimous consent that the last two lines on page 68 be stricken out.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that the last two lines, 21 and 22, on page 68, be striken out. Is there objection?

There was no objection.

By unanimous consent, the following Members were given leave to extend remarks in the RECORD: Mr. SUMNERS, Mr. BURKE of Wisconsin, Mr. MAGUIRE of Nebraska, Mr. QUIN, Mr. WILSON of Florida, Mr. HELVERING, Mr. AIKEN, and Mr. MORGAN of Oklahoma.

Mr. SELDOMRIDGE. Mr. Chairman, I ask unanimous consent to extend remarks in the RECORD by inserting a statement prepared by Judge D. C. Beman, of Denver, in reference to the appropriation for the migratory bird law.

Mr. STAFFORD. Mr. Chairman, reserving the right to object, I would inquire if that is a very extensive statement?

Mr. SELDOMRIDGE. It is not a long statement.

The CHAIRMAN. The Chair hears no objection, and it is so ordered.

By unanimous consent, leave was granted to Mr. RAGSDALE, to Mr. YOUNG of Texas, and to Mr. LANGLEY to extend their remarks in the RECORD.

Mr. MANN. Mr. Chairman, I ask unanimous consent to address the House for two minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MANN. Mr. Chairman, in the last Congress a very distinguished Democrat was chairman of the Committee on Agriculture. In fact, a number of very distinguished men have been chairmen of the Committee on Agriculture, even since my service in the House, but I believe that never have we had a better chairman, and I am somewhat doubtful whether we have ever had so patient a chairman, as the distinguished gentleman from South Carolina [Mr. LEVER], and as we are now about to close the consideration of this bill and pass it, I think I am speaking the sentiment of every Member of this House when I say we congratulate the gentleman upon his ability, his clearness of expression, his patience, and his constant courtesy. [Applause.]

Mr. HAUGEN. Mr. Chairman, I ask unanimous consent to address the House for one minute.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. HAUGEN. Mr. Chairman, I wish to say that I concur in what has been said by the distinguished gentleman from Illinois. I believe it can be truthfully said that no one has pursued his duty with greater fidelity and conscious rectitude of purpose than has the gentleman who has presided over the Committee on Agriculture during this Congress. [Applause.]

Mr. CANDLER of Mississippi. Mr. Chairman, I ask unanimous consent to proceed for one minute.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. CANDLER of Mississippi. Mr. Chairman, a few days ago in general debate I expressed my admiration of and my affection for our distinguished chairman, all of which he deserved. I appreciate and I am sure he appreciates the kind expressions that have come from gentlemen on the other side of the aisle. I rise at this time to say that I am sure that all of you will appreciate more, if possible, the patience and courtesy and kindness of our distinguished chairman during the consideration of this bill when I tell you that during all of the time it has been under consideration he has labored under serious difficulties, having had during all of the time very serious illness in his family.

I join most heartily in the congratulations which have been expressed by the distinguished gentleman from Illinois [Mr. MANN] and other gentlemen who have spoken. [Applause.]

Mr. HEFLIN. Mr. Chairman, I ask unanimous consent to address the committee.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. HEFLIN. Mr. Chairman, I desire to add my testimony to that offered by the gentlemen on the other side of the House and by my distinguished friend from Mississippi [Mr. CANDLER] in behalf of the chairman of this committee. I have never served on a committee where the chairman was more devoted to his work or more attentive to his duties than has been the distinguished gentleman from South Carolina [Mr. LEVER]. [Applause.] He has presented and defended in a masterly manner every provision of this bill, and by his patience and courteous conduct has won the admiration of all. [Applause.]

Mr. LEVER. Mr. Chairman, it is needless to say that I very greatly appreciate the kind expressions of my friends, and I desire to say in this connection that if at any time during the consideration of this bill, laboring under the difficulties I have labored under, I have shown any impatience or in any way wounded the feelings of any Member, I at this time publicly apologize for so doing.

I ask unanimous consent that the Clerk may be permitted to correct the totals of the bill.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that the Clerk may be permitted to correct the totals of the bill. Is there objection?

There was no objection.

Mr. LEVER. Mr. Chairman, I move that the committee do now rise and report the bill with amendments to the House, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. HAMLIN, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 13679, the Agricultural appropriation bill, and had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The SPEAKER. Is a separate vote demanded on any amendment? [After a pause.] If not, the Chair will put them en grosse. The question is on agreeing to the amendments.

The amendments were agreed to.

The SPEAKER. The question now is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. LEVER, a motion to reconsider the vote by which the bill was passed was laid on the table.

### LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to Mr. MCKELLAR, for one week, on account of important business.

### WITHDRAWAL OF PAPERS.

By unanimous consent, leave was granted to withdraw from the files of the House, without leaving copies, no adverse report having been made thereon—

To Mr. ASHBROOK, papers in the case of Stanford Timmons, Sixty-first Congress; also papers in the case of Frank S. McKee, Sixty-second Congress.

To Mr. HAMLIN, papers in the case of H. R. 4009, pension claim of R. D. Shackleford, Sixty-third Congress.

### CAPT. FRANK PARKER.

Mr. RAGSDALE. Mr. Speaker, I ask unanimous consent to call up the bill S. 746, which was read in the House yesterday morning, if I can have it reported at this time.

The SPEAKER. The Chair did not understand the request of the gentleman.

Mr. RAGSDALE. Mr. Speaker, I desire to ask unanimous consent to call up the bill S. 746, reported from the Committee on Military Affairs, and ask unanimous consent for its present consideration.

The SPEAKER. The Clerk will report the bill by title.

The Clerk read as follows:

An act (S. 746) for the relief of Capt. Frank Parker.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, I would like to inquire, if I might, of the Speaker whether this is to become the practice, if this bill shall be passed to-night, to recognize gentlemen—oh, late in the evening or at any other time to call up bills by unanimous consent which are on the Private Calendar?

The SPEAKER. It is not.

Mr. LLOYD. Mr. Speaker, in this particular case I objected yesterday morning to the consideration of this bill because of the anxiety of Members here to conclude the consideration of the Agricultural appropriation bill, and I am very anxious now that the gentleman from South Carolina shall have an opportunity to have that bill considered, and I withdraw any objection I made before to the consideration of the bill.

The SPEAKER. Is there objection?

Mr. MANN. Let us have the bill read first.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

An act (S. 746) for the relief of Capt. Frank Parker.

*Be it enacted, etc.*, That nothing contained in the proviso under the heading "Pay of officers of the line" in the act approved August 24, 1912, entitled "An act making appropriation for the support of the Army for the fiscal year ending June 30, 1913, and for other purposes," shall be held to apply to the service of Capt. Frank Parker, United States Army, for the period necessary for him to complete his present tour of duty at L'Ecole de Guerre, France.

The SPEAKER. Is there objection?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, I would like for the gentleman from South Carolina to make some explanation of this bill. The gentleman is asking that this bill take a course different from the ordinary, and I think it deserves some explanation before it should be passed at this late hour in the evening.

Mr. RAGSDALE. Mr. Speaker, I desire to say to the gentleman from Wisconsin that the bill was introduced in the Senate by Senator TILLMAN, because this gentleman was ordered abroad, he having seen a great deal of service in different places. This bill has the indorsement of Gen. Wood and the former Secretary of War, Mr. Stimson, and the War Department generally, and of both the Military Committees of the Senate and House, who have looked into this matter. This gentleman was ordered to France to complete his studies there in this school of war. On account of a bill which was passed prohibiting the absence of an officer from his troop for a certain period of time it was technically decided that he could not stay in that school of war. He has already leased a home there for his family, and this bill, if passed, would enable him to complete his studies there.

Mr. STAFFORD. If this bill passes, will it enable him to stay there the length of time to complete his studies?

Mr. RAGSDALE. Yes; to finish his course.

Mr. STAFFORD. How long will that be?

Mr. RAGSDALE. About a year, sir.

Mr. STAFFORD. I understand a companion bill has been reported from the House Committee on Military Affairs.

Mr. RAGSDALE. Yes; unanimously favorably reported. I submit herewith a portion of the report from the House Committee on Military Affairs:

The Committee on Military Affairs, to whom was referred the bill (S. 746) for the relief of Capt. Frank Parker, reports the same back favorably to the House of Representatives with a recommendation that it do pass without amendment.

In explanation of the action of the committee there is herewith attached and made a part of this report the report made by Mr. Brady of the Senate committee. Therein is shown—

1. That the President of the United States, through the Secretary and Assistant Secretary of War, recommends favorable action.

2. That the Senate has twice passed this bill (at the last and present sessions), calling attention to its merits and to the unique and exceptional circumstances of the case.

3. That a unanimous favorable report has been made thereon from the Military Committee of the Senate of the Sixty-second Congress, from the Military Committee of the Senate of the Sixty-third Congress, and from the Military Committee of the House of the Sixty-third Congress.

Mr. HOWARD. Mr. Speaker, if the gentleman from South Carolina will yield to me for a moment, I think I can make an explanation which I think will satisfy the gentleman from Wisconsin [Mr. STAFFORD]. This bill was favorably reported by the Committee on Military Affairs of the House also, which had it under consideration. This gentleman was assigned to this war college in France by the department to study certain features of cavalry maneuvers of the French Army, and under the provisions of a statute he had been away from his troops longer than the law allows, and technically he was required, on account of the length of time he had been abroad, to go back to his command; and the War Department has recommended heartily that he be allowed to finish his course, or it will be of no material benefit.

Mr. STAFFORD. Right there, will the gentleman inform the House whether there are any companion cases awaiting similar disposition?

Mr. HOWARD. I do not think there are any pending of this particular character.

Mr. MANN. The only reason this man requires this action is because the law provides an assignment unless the man has been two years with his arm of the service. He was ordered by the President of the United States or the commanding officer of the Army to report for duty in Cuba at the request of the President of Cuba, and performed that service with a Cuban regiment, exactly the same as he would have performed service if he had been with his own regiment. But under the strict interpretation of the law, although he was ordered to do this and perform that service, he could not be counted as having been two years with his arm of the service. He was not to blame for being ordered to Cuba, and he obeyed orders.

Mr. STAFFORD. I do not question the facts, or that the case is meritorious, but I would not wish such a practice as to unanimous consent to creep in as would subject us to the same criticism as was made when Speaker Cannon presided over the House.

Mr. COOPER. Mr. Speaker, I want to supplement what my colleague has just said. If this sort of practice is to obtain, we might just as well do away with the Unanimous Consent Calendar.

Mr. MANN. This bill can not go on the Unanimous Consent Calendar.

Mr. COOPER. What the gentleman from Wisconsin [Mr. STAFFORD] said suggests to me that it might be well for the new Members to understand precisely why a few years ago the Unanimous Consent Calendar was created. There had grown up during the previous 25 years or more the practice by which the question of whether a Member should have the privilege of asking for unanimous consent was left entirely to the discretion of the Speaker. A practice by which a Member desiring to ask the House for unanimous consent was compelled first to go to the Speaker, usually in his private room—not alone to Speaker Cannon, but to any of his predecessors as well—and try to secure his promise to recognize him to make the request. If the Speaker felt so disposed, he would promise the Member to recognize him; if for any reason he did not feel so disposed, if he felt aggrieved because of something the Member had done, he could refuse him that privilege; and this private refusal sometimes made it very difficult for a Member to explain to his constituents why certain gentlemen on this floor were enabled to get requests for unanimous consent before the House while he was powerless to do so. And therefore the complaint was made here that this practice not only put a serious burden upon the Speaker, but also made it possible for the occupant of the chair to exercise an unfair discrimination against Members. As a result of this, with practically unanimous approval upon both sides of the aisle, the Unanimous Consent Calendar was created, and thus the asking for unanimous consent placed beyond the possibility of favoritism and discrimination and made the absolute right of every Member of the House. That calendar enables one who examines it to tell for what measures consideration by unanimous consent is to be asked. It thus affords protection to the House.

Mr. UNDERWOOD. Will the gentleman from Wisconsin yield to me for a moment?

Mr. COOPER. Yes.

Mr. UNDERWOOD. I concur in what the gentleman from Wisconsin says in reference to the Unanimous Consent Calendar. I think it is protection to the House and a convenience as well. But the gentleman has overlooked the fact, I think, that this bill is not one that can go on the Unanimous Consent Calendar. Probably the rules of the House providing for the Unanimous Consent Calendar should be changed. But this is a private bill, and bills of this class can not be put on the Unanimous Consent Calendar.

Mr. COOPER. It could be brought up on suspension day.

The SPEAKER. No. The practice is against that.

Mr. MANN. These private bills ought not to be considered in this way at all.

Mr. UNDERWOOD. It does not refer to this particular class of bills. They do have a day; but on certain Fridays, when private bills can be called up, pensions have the right of way, and practically always take the day. On the other days the reports from the Committee on War Claims and the Committee on Claims have the right of way, with the result that private bills coming from other committees in the House go to the rear, and it is almost impossible for a Member to reach them.

Now, it might be wise at this session of Congress, either by unanimous consent at some later day or by a special rule, to provide for a time when these bills can be heard. But this bill is an emergency matter, and it can not wait until that time.

Mr. COOPER. In answer to the gentleman from Alabama, I desire to say that I think the measure presented here by the gentleman from South Carolina [Mr. RAGSDALE] is meritorious, and therefore in this particular instance I shall not object. But I will add that every Representative is entitled in advance to know what business can, under the rules, be brought before the

House. He may have a legitimate and very serious objection to a bill which has been introduced and perhaps favorably reported. He knows that under the rules that bill can go only on a certain calendar. He has made up his mind to be present when that bill is reached on the call of committees or otherwise, and to inform the House why it ought to be defeated or perhaps not considered at all. But if at the end of a long session like this to-day we are to have bills brought up without notice, and not in accordance with the printed rules with which every Member is supposed to be familiar, there is no protection——

Mr. UNDERWOOD. I agree with what the gentleman says about the calendar, but I will call the attention of the gentleman to the fact that this bill can not go on the Unanimous Consent Calendar. I am inclined to think that the rule governing the Unanimous Consent Calendar ought to be broadened sufficiently to allow bills of this class to be offered. But as long as they can not be offered they ought to be taken care of in some other way.

Mr. COOPER. The Calendar for Unanimous Consent is prepared and printed in order that Members may have notice of what the business of the House will be and not be surprised by unexpected requests like this. However, this time, as I have said, I shall not object.

Mr. MANN. Mr. Speaker, reserving the right to object for a moment, I want to remark that I drew the Unanimous Consent Calendar rule and made the first proposition to that effect. It does not cover private bills, and if it is changed so as to cover private bills it might just as well be thrown into the waste-basket, so far as public bills are concerned.

In the beginning of the last Congress the rules were changed slightly with respect to the Private Calendar, and when they were brought in I explained what the effect would be if they were to be construed as they are now construed. In the last Congress the Chairman of the Committee of the Whole made a construction as to when these bills from the Committee on Claims and the Committee on War Claims could be taken up. But a few weeks ago a new Chairman was in the chair—I do not recall who he was—and my friend the distinguished gentleman from Tennessee [Mr. GARRETT], who sits over there, and the gentleman from Georgia [Mr. HARDWICK], who, I believe, said they drew the rule, although I really doubt whether they knew what was in it at the time——

Mr. GARRETT of Tennessee. Mr. Speaker, that is an offensive remark.

Mr. MANN. Then I withdraw it. I did not mean to be offensive. I was facetious in what I said. The gentleman was in favor of a rule, as he said then, which would put all these bills in a pocket. Now the gentleman can revise his rule if he wants to, since he decides to become somewhat particular himself; but there will be no more bills like this passed by unanimous consent.

The SPEAKER. The Chair is as much in favor of maintaining this Unanimous Consent Calendar rule as anybody in the House can be, and he has never stretched it except in a case of emergency. This bill can not be called up under suspension of the rules, because the practice is against it, and it can not be put on the Unanimous Consent Calendar. It is a meritorious matter and a matter of emergency. In addition to that the gentleman called it up one morning when there was a comparatively full attendance here. The Chair will try to enforce the Unanimous Consent Calendar rule as well as it can be enforced. Is there objection to the present consideration of the bill?

There was no objection.

The bill was ordered to a third reading, and was accordingly read the third time and passed.

On motion of Mr. RAGSDALE, a motion to reconsider the last vote was laid on the table.

PENSIONS.

Mr. LANGLEY. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. LANGLEY. Last Friday was pension day. There was a sort of gentlemen's agreement in Committee of the Whole that the Pension Committees were to give way to the Agricultural appropriation bill.

Mr. MANN. No; there was a special agreement.

The SPEAKER. That agreement was made in the House, and by unanimous consent, by special order, Tuesday will take the place of Friday as pension day.

Mr. LANGLEY. I did not so understand it. I wanted to know if the pension bills would come up on Tuesday.

The SPEAKER. Pension bills are in order on Tuesday.

LEAVE TO ADDRESS THE HOUSE.

Mr. GARRETT of Tennessee. Mr. Speaker, I ask unanimous consent that immediately after the approval of the Journal on Monday next the Resident Commissioner from the Philippine Islands [Mr. QUEZON] may have permission to address the House for 30 minutes.

The SPEAKER. The gentleman from Tennessee asks unanimous consent that immediately after the reading of the Journal on Monday next the Resident Commissioner from the Philippines [Mr. QUEZON] have leave to address the House for 30 minutes. Is there objection?

Mr. MANN. Reserving the right to object, Monday is unanimous-consent day and suspension day. If the gentleman desires to select an ordinary legislative day, as far as I am concerned, I shall not object, but I shall object to this request.

Mr. GARRETT of Tennessee. What about Tuesday.

Mr. MANN. I shall not object to Tuesday.

The SPEAKER. There is already a special order for Tuesday.

Mr. MANN. The gentleman can get in under the general debate on the river and harbor bill. Why should he not get in like any Member of the House?

Mr. GARRETT of Tennessee. If there is objection, Mr. Speaker——

The SPEAKER. The gentleman from Illinois objects.

Mr. GARRETT of Tennessee. I think the time has been parceled for the general debate on the river and harbor bill.

Mr. MANN. I do not think all of it has.

Mr. GARRETT of Tennessee. My impression was that it had been, on this side. That is the reason I made the request.

EXTENSION OF REMARKS.

Mr. DECKER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the Agricultural appropriation bill.

The SPEAKER. The gentleman from Missouri [Mr. DECKER] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

JOSEPH HODGES.

Mr. JOHNSON of Utah. Mr. Speaker, I ask unanimous consent to be permitted to file a supplemental report from the Committee on the Public Lands on Senate bill 540. (H. Rept. 361, pt. 2.)

The SPEAKER. The gentleman from Utah asks unanimous consent to file a supplemental report on Senate bill 540. Is there objection?

There was no objection.

Mr. GARRETT of Tennessee. Mr. Speaker, what became of my request? It was objected to for Monday, but I did not understand that it was objected to for Tuesday.

The SPEAKER. The gentleman from Illinois objected to it.

ADJOURNMENT.

Mr. UNDERWOOD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 55 minutes p. m) the House adjourned until Monday, March 16, 1914, at 12 o'clock noon.

## EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Cedar Creek, Cumberland County, N. J., with a view to deepening and straightening the channel (H. Doc. No. 826); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

2. A letter from the assistant clerk of the Court of Claims, transmitting findings of fact and conclusions in the case of Farmer D. Bayless, administrator of the estate of William B. Bayless, deceased, against The United States (H. Doc. No. 827); to the Committee on War Claims and ordered to be printed.

3. A letter from the assistant clerk of the Court of Claims, transmitting findings of fact and conclusions in the case of Mary M. Calef, widow of John H. Calef, deceased, against The United States (H. Doc. No. 828); to the Committee on Claims and ordered to be printed.

4. A letter from the assistant clerk of the Court of Claims, transmitting findings of fact and conclusions in the case of Anne M. Post, widow of James Clarance Post, against The United States (H. Doc. 829); to the Committee on Claims and ordered to be printed.

5. A letter from the assistant clerk of the Court of Claims, transmitting findings of fact and conclusions in the case of Mildred Van R. French, widow of John T. French, jr., deceased, against The United States (H. Doc. No. 830); to the Committee on Claims and ordered to be printed.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. DEITRICK, from the Committee on Military Affairs, to which was referred the bill (H. R. 3334) authorizing the quit-claiming of the interest of the United States in certain land situated in Hampden County, Mass., reported the same without amendment, accompanied by a report (No. 385), which said bill and report were referred to the Private Calendar.

Mr. STEPHENS of Mississippi, from the Committee on Claims, to which was referred the bill (H. R. 10172) for the relief of L. V. Thomas, reported the same with amendment, accompanied by a report (No. 386), which said bill and report were referred to the Private Calendar.

Mr. McCLELLAN, from the Committee on Claims, to which was referred House bill 5445, reported in lieu thereof a resolution (H. Res. 443) referring to the Court of Claims the papers in the case of the relief of the legal representatives of Jonathan Morris, deceased, accompanied by a report (No. 387), which said resolution and report were referred to the Private Calendar.

Mr. STEPHENS of Mississippi, from the Committee on Claims, to which was referred the bill (H. R. 2540) for the relief of the estate of Philip Felix Herwig, deceased, reported the same without amendment, accompanied by a report (No. 388), which said bill and report were referred to the Private Calendar.

Mr. MOTT, from the Committee on Claims, to which was referred the bill (H. R. 3428) for the relief of James Stanton, reported the same with amendment, accompanied by a report (No. 389), which said bill and report were referred to the Private Calendar.

## CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 6259) granting a pension to Flora May Baker; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 6079) granting an increase of pension to John F. Bennett; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 7077) granting an increase of pension to Ellen J. Merritt; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 8585) granting a pension to George W. Casey; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 8582) granting a pension to William J. Brooker; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 8583) granting a pension to B. Frank Smythe; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 9096) granting a pension to Ellie Jacobs; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 10772) granting an increase of pension to Susan Stewart; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 14513) granting a pension to Mary T. Kington; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. CARAWAY: A bill (H. R. 14624) providing for the erection and completion of a public building at the city of Forrest City, in the State of Arkansas; to the Committee on Public Buildings and Grounds.

By Mr. HUGHES of Georgia: A bill (H. R. 14625) providing for the purchase of a site and for public building at Hawkinsville, Ga.; to the Committee on Public Buildings and Grounds.

By Mr. CARY (by request): A bill (H. R. 14626) to create a board of financial commissioners, and for other purposes; to the Committee on Banking and Currency.

By Mr. CHURCH: A bill (H. R. 14627) to exclude Hindu laborers from the United States; to the Committee on Immigration and Naturalization.

By Mr. LEE of Pennsylvania: A bill (H. R. 14628) providing for mediation, conciliation, and arbitration in controversies between certain employers and their employees; to the Committee on Interstate and Foreign Commerce.

By Mr. SCULLY: A bill (H. R. 14629) appropriating $10,000 to aid in the erection of a monument in memory of the late President James A. Garfield at Long Branch, N. J.; to the Committee on the Library.

By Mr. SMITH of Minnesota: A bill (H. R. 14630) to provide for the remodeling and repairing of the Federal building, known as the old post-office building, at Minneapolis, Minn.; to the Committee on Public Buildings and Grounds.

By Mr. COVINGTON: A bill (H. R. 14631) to create an Interstate Trade Commission, to define its power and duties, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. JACOWAY: Resolution (H. Res. 442) requesting the Secretary of Agriculture to report to the House the buildings occupied by the Department of Agriculture, the amount of floor space, the number of employees in each, and other information; to the Committee on Agriculture.

By Mr. GILMORE: Memorial from the General Court of the Commonwealth of Massachusetts, relative to the frigate *Constitution;* to the Committee on Naval Affairs.

Also, memorial adopted by the General Court of the Commonwealth of Massachusetts, relative to certain payments by the United States Government in aid of the Massachusetts Nautical School; to the Committee on Appropriations.

By Mr. ROGERS: Memorial of the Legislature of the State of Massachusetts, praying the payment of $25,000 to the Commonwealth of Massachusetts for each of the years 1911 to 1914, both inclusive, as per act of Congress approved March 4, 1911, entitled "An act for marine schools, and for other purposes"; to the Committee on Appropriations.

Also, memorial of the Legislature of the State of Massachusetts, requesting Congress and the Secretary of the Navy to take such steps as may be necessary to make Boston the permanent resting place of the frigate *Constitution;* to the Committee on Naval Affairs.

## PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ALEXANDER: A bill (H. R. 14632) granting an increase of pension to Nancy Crouse; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14633) granting an increase of pension to Eliza E. Hutcherson; to the Committee on Invalid Pensions.

By Mr. ANTHONY: A bill (H. R. 14634) granting a pension to Frances M. Dumenil; to the Committee on Invalid Pensions.

By Mr. ASHBROOK: A bill (H. R. 14635) granting an increase of pension to George Byers; to the Committee on Invalid Pensions.

By Mr. BARTON: A bill (H. R. 14636) granting a pension to Eli Mundorf; to the Committee on Invalid Pensions.

By Mr. BOOHER: A bill (H. R. 14637) granting an increase of pension to Arthur Watson; to the Committee on Invalid Pensions.

By Mr. FRANCIS: A bill (H. R. 14638) granting an increase of pension to William H. Wilson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14639) for the relief of John D. Carson; to the Committee on Military Affairs.

By Mr. GITTINS: A bill (H. R. 14640) granting an increase of pension to John R. Barlow; to the Committee on Invalid Pensions.

By Mr. GOEKE: A bill (H. R. 14641) to remove the charge of desertion from the record of Jerimiah Swisshelm; to the Committee on Military Affairs.

By Mr. GORMAN: A bill (H. R. 14642) to remove the charge of desertion from the military record of Asa Farnham; to the Committee on Military Affairs.

By Mr. HAMLIN: A bill (H. R. 14643) to correct the military record of Andrew Ballou; to the Committee on Military Affairs.

By Mr. KENNEDY of Connecticut: A bill (H. R. 14644) granting an increase of pension to August Wendehack; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14645) granting an increase of pension to Eugene D. Miller; to the Committee on Invalid Pensions.

By Mr. KORBLY: A bill (H. R. 14646) granting a pension to Mary Quill; to the Committee on Pensions.

Also, a bill (H. R. 14647) granting an increase of pension to Herbert C. Miller; to the Committee on Pensions.

By Mr. McGUIRE of Oklahoma: A bill (H. R. 14648) granting an increase of pension to Mary Jane Kinsey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14649) granting an increase of pension to John E. Wilson; to the Committee on Invalid Pensions.

By Mr. MADDEN: A bill (H. R. 14650) granting a pension to Martha A. Heathman; to the Committee on Invalid Pensions.

By Mr. PAGE of North Carolina: A bill (H. R. 14651) granting a pension to Daniel W. Setzer; to the Committee on Pensions.

By Mr. RAINEY: A bill (H. R. 14652) granting an increase of pension to Benjamin R. Cox; to the Committee on Invalid Pensions.

By Mr. SELLS: A bill (H. R. 14653) granting a pension to Michael O. Byrne; to the Committee on Pensions.

By Mr. SHREVE: A bill (H. R. 14654) granting an increase of pension to Jay Smith; to the Committee on Invalid Pensions.

By Mr. STONE: A bill (H. R. 14655) granting an increase of pension to W. T. Brown; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14656) granting an increase of pension to Nelson N. Page; to the Committee on Invalid Pensions.

By Mr. TRIBBLE: A bill (H. R. 14657) for the relief of the Copelan National Bank; to the Committee on the oPst Office and Post Roads.

By Mr. WALSH: A bill (H. R. 14658) granting an increase of pension to Anna Sweeney; to the Committee on Invalid Pensions.

By Mr. WILLIS: A bill (H. R. 14659) granting an increase of pension to Emanuel Garber; to the Committee on Invalid Pensions.

By Mr. McCLELLAN: Resolution (H. Res. 443) referring the bill H. R. 5445 to the Court of Claims; to the Committee of the Whole House.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ALLEN: Petitions of 371 citizens of Cincinnati and Hamilton County, Ohio, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. ANSBERRY: Petition of the Wayne Camp, United Spanish War Veterans, of Defiance, Ohio, favoring House bill 13944, providing pensions for widows of Spanish War soldiers; to the Committee on Pensions.

Also, petition of various churches of Paulding, Ohio, favoring national prohibition; to the Committee on the Judiciary.

Also, petitions of Harrison Grange, No. 151, of Henry County, Ohio, and of Pleasant Hill Grange, No. 1724, of Williams County, Ohio, favoring House bill 11897, relative to rural credits; to the Committee on Banking and Currency.

By Mr. ASHBROOK: Resolutions of the 776 members of the East Main Street Methodist Episcopal Church, of Newark, Ohio, in favor of nation-wide prohibition; to the Committee on the Judiciary.

By Mr. BARCHFELD: Petitions of sundry citizens of Homestead, Cambridge, St. Clair Borough, and sundry citizens of Pittsburgh, all in the State of Pennsylvania, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. BRITTEN: Affidavits to accompany a bill (H. R. 14443) granting an increase of pension to John R. Skidmore; to the Committee on Invalid Pensions.

Also, petition of the Association of Commerce of Chicago, Ill., favoring "One hundred years of peace celebration"; to the Committee on Foreign Affairs.

Also, petition of Vikingarne Lodge, No. 1, Independent Order of Vikings, of Chicago, Ill., favoring erection of a memorial to John Ericsson; to the Committee on Appropriations.

By Mr. CARY: Petitions of R. J. Dreier, Edward L. Prockmon, Christ Dreier, Max J. Loeb, Ed. Hersher, Alvin G. Baum, George Schenk, Leon Siegner, William Granofeky, Alfred Hoth, and George Hetzel, all citizens of Milwaukee, Wis., protesting against the passage of House joint resolution 168 and Senate joint resolutions 88 and 50, or any other prohibition measures which will interfere with the rights of American citizens and a usurpation by the Federal Government of a domestic question belonging to the several States; to the Committee on the Judiciary.

Also, petition of the National Association of Bureau of Animal Industry Employees, of Milwaukee, Wis., favoring passage of House bill 9292, relative to classification of salaries of employees; to the Committee on Agriculture.

By Mr. CLARK of Florida: Petitions of sundry citizens of Florida, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. CLINE: Petition of Herman Mackwitz and 9,000 other citizens of Fort Wayne, Ind., against national prohibition; to the Committee on the Judiciary.

Also, petitions of sundry citizens of Fort Wayne, Ind., favoring the literacy test in the immigration bill (H. R. 6060); to the Committee on Immigration and Naturalization.

Also, petitions of 39 citizens of the twelfth congressional district of Indiana, protesing against barring the Menace from the mails; to the Committee on the Post Office and Post Roads.

Also, petition of sundry citizens of the twelfth congressional district of Indiana, protesting against passage of House bill 9674, the Sabbath-observance bill; to the Committee on the District of Columbia.

Also, petition of sundry citizens of the twelfth congressional district of Indiana, favoring national prohibition; to the Committee on the Judiciary.

By Mr. DALE: Memorial of the Cleveland Chamber of Commerce, favoring repeal of the canal tolls exemption; to the Committee on Interstate and Foreign Commerce.

Also, memorial of the Massachusetts State Federation of Women's Clubs, favoring passage of House bill 12292, the national child-labor bill; to the Committee on Labor.

Also, petition of the American Arch Co., of New York City, favoring a bureau for legislative reference and bill drafting; to the Committee on Appropriations.

By Mr. DAVIS: Petition of the St. Anthony Commercial Club and the North Side Commercial Club, of Minneapolis, Minn., favoring House bill 5139, relative to retirement of civil-service employees; to the Committee on Reform in the Civil Service.

By Mr. DIXON: Petitions of 51 ladies and the First Baptist Church of Madison; the Methodist Episcopal Church and 25 citizens of Crothersville, and the Methodist Episcopal Church and 42 citizens of Browntown, all in the State of Indiana, favoring national prohibition; to the Committee on the Judiciary.

By Mr. FESS: Petition of the Friends' Church at Wilmington, Ohio, representing a membership of over 1,000 members, favoring national prohibition; to the Committee on the Judiciary.

By Mr. FINLEY: Petition of the Lancaster (S. C.) Chapter, United Daughters of the Confederacy, relative to naming of forts on the Isthmus of Panama; to the Committee on Military Affairs.

By Mr. FRANCIS: Petitions of sundry citizens of East Springfield, Barnesville, Rock Hill, and Carrolltown, all in the State of Ohio, favoring national prohibition; to the Committee on the Judiciary.

By Mr. GILMORE: Petition of the Southeastern Massachusetts Federated Branches of the American Continental League, against repeal of exemption clause in Panama Canal act; to the Committee on Interstate and Foreign Commerce.

By Mr. GOLDFOGLE: Petitions of sundry citizens of the State of New York, protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of the Merchants' Association of New York, favoring passage of Senate bill 1240, for the establishment of a bureau for legislative reference and bill drafting; to the Committee on Appropriations.

Also, petition of John Bates Clark, of New York City, favoring repeal of the canal-tolls exemption; to the Committee on Interstate and Foreign Commerce.

Also, petition of the General Guy V. Henry Camp, No. 38, Department of New York, United Spanish War Veterans, favoring the passage of House bill 7374, the widows and orphans' pension bill; to the Committee on Pensions.

Also, memorial of the Financial Chronicle Chapel of Typographical Union, No. 6, favoring passage of House bill 1873, the anti-injunction bill; to the Committee on the Judiciary.

Also, memorial of the Associated Chambers of Commerce of the Pacific Coast, protesting against repeal of canal-tolls exemption; to the Committee on Interstate and Foreign Commerce.

By Mr. GRAHAM of Pennsylvania: Petition of John McGiniss, of Philadelphia, Pa., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. HAWLEY: Petition of sundry citizens of Oregon, favoring national prohibition; to the Committee on the Judiciary.

By Mr. HELGESEN: Petitions of sundry citizens and churches of North Dakota, favoring national prohibition; to the Committee on the Judiciary.

By Mr. HINEBAUGH: Petition of the First Methodist Episcopal Church of Streator, Ill., favoring national prohibition; to the Committee on the Judiciary.

By Mr. HULINGS: Petitions of 368 citizens of Franklin, Pa., favoring national prohibition; to the Committee on the Judiciary.

By Mr. JOHNSON of Washington: Petition of sundry citizens of Tacoma, Wash., against national prohibition; to the Committee on the Judiciary.

Also, memorial of the Credit Men's Association of Tacoma, Wash., relative to flood control of the Mississippi River; to the Committee on Rivers and Harbors.

Also, petitions of sundry citizens of Hoquiam, Wash., favoring passage of the anticoupon bill; to the Committee on Ways and Means.

By Mr. KELLY of Pennsylvania: Petitions of sundry citizens of Allegheny County, Pa., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. KENNEDY of Rhode Island: Memorial of B. B. Cannon, of Boston, Mass., protesting against 1-cent letter postage, and of the Pentecostal Publishing Co., of Louisville, Ky., protesting against increase of postal rates on periodicals; to the Committee on the Post Office and Post Roads.

Also, memorial of the General Putnam Branch of American Continental League, of Pawtucket, R. I., protesting against "One hundred years of peace celebration"; to the Committee on Foreign Affairs.

By Mr. KONOP: Petition of F. J. Lingelbach and others, of Oconto County, Wis., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. LAFFERTY: Petition of the County Sabbath School, of Eugene, Lane County, Oreg., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of Oregon, against national prohibition; to the Committee on the Judiciary.

Also, petition of the Columbia Grange, No. 267, of Corbett, Oreg., relative to loan of money in postal-savings banks to farmers; to the Committee on Banking and Currency.

By Mr. LEVY: Petition of George Stuart Smith, of New York, favoring investigation to determine if competent protective guidance concerning the protection of principal can be furnished; to the Committee on the Post Office and Post Roads.

Also, petition of the American Arch Co., of New York City, favoring establishment of bureau for bill drafting, etc.; to the Committee on Appropriations.

Also, memorial of the Presbyterian Ministers' Association of New York and Vicinity, protesting against section 6 of House bill 12928, relative to Sunday work in post offices; to the Committee on the Post Office and Post Roads.

Also, memorial of the memorial and executive committee, Boroughs of Manhattan and The Bronx, favoring passage of House bill 13044, the widows and orphans' pension bill; to the Committee on Pensions.

Also, memorial of the Financial Chronicle Chapel, of Typographical Union No. 6, favoring passage of House bill 1873, the anti-injunction bill; to the Committee on the Judiciary.

Also, petitions of Sam G. Kind and other citizens of New York, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. LIEB: Petitions of 8,554 citizens of Evansville, Mount Vernon, and others in Posey County; Boonville, and others in Warrick County; Rockport, and others in Spencer County; Princeton, Oakland City, and others in Gibson County, all in the State of Indiana; also of sundry citizens in Tell City and Troy, Ind., and Ridgway, Ill., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. LONERGAN: Petition of Leo J. Burke and Alfred Johnson, of Hartford, Conn., against national prohibition; to the Committee on the Judiciary.

By Mr. MOORE: Petitions of sundry citizens of Philadelphia, Pa., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. J. I. NOLAN: Petition of the Alameda County Retail Cigar Dealers' Association, Oakland, Cal., favoring the anticoupon bill; to the Committee on Ways and Means.

By Mr. PETERS of Massachusetts: Petition of the Wholesale Tobacco Dealers of Boston, Mass., relative to legislation regarding fixing of prices; to the Committee on Interstate and Foreign Commerce.

By Mr. RAINEY: Petitions of Ira Howell and other citizens of Arenzville, Ill., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. ROGERS: Memorial of the Essex County Board, Ancient Order of Hibernians, at Lynn, Mass., protesting against repeal of the canal tolls exemption; to the Committee on Interstate and Foreign Commerce.

By Mr. SCULLY: Petitions of Thomas Cook, of Red Bank, N. J., and others, and of Michael Weir and others, of Sayreville, N. J., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. SMITH of Idaho: Petitions of sundry business firms of the State of Idaho, favoring passage of House bill 5308, relative to taxing mail-order houses; to the Committee on Ways and Means.

By Mr. STEPHENS of California: Petition of the Realty Board of Riverside, Cal., favoring House bill 5139, relative to retirement of civil-service employees; to the Committee on Reform in the Civil Service.

Also, petition of sundry citizens of San Pedro, Cal., favoring House bill 9291, relative to claims to lands in Oregon; to the Committee on the Public Lands.

By Mr. VOLLMER: Petition of 134 citizens of Iowa, against national prohibition; to the Committee on the Judiciary.

Also, petition of Rev. V. H. Ruring, of Iowa, favoring national prohibition; to the Committee on the Judiciary.

By Mr. WILLIS: Petition of W. J. Waterman and other citizens of McComb, Ohio, favoring national prohibition; to the Committee on the Judiciary.

By Mr. YOUNG of North Dakota: Petitions of 70 citizens of McClusky, N. Dak., 47 citizens of Cheyenne, S. Dak., and 20 citizens of Rolette, N. Dak., favoring national prohibition; to the Committee on the Judiciary.

## SENATE.

### MONDAY, *March 16, 1914.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, our unsatisfied heart hunger compels us day by day to turn our faces toward Thee. We can not live upon husks that swine would feed upon. There remains still within us the instinct of sonship. No matter how far we have gone away from Thee, we have never lost the sense of the sweet invitation of the home life waiting for us. Thy love, plenteous, constant, passionate, follows us everywhere. We turn back from all our vain endeavor to Thee for Thy blessing.

Receive us this day. Give to us Thine own grace, that we may fill the hours of the day in Thy grateful service; that we may remember our supreme obligations to Thee; and so live as to win the favor and blessing of God upon us and upon our Nation. For Christ's sake. Amen.

#### NAMING A PRESIDING OFFICER.

The Secretary (James M. Baker) read the following communication:

PRESIDENT PRO TEMPORE,
UNITED STATES SENATE,
*Washington, March 16, 1914.*

*To the Senate:*

Being temporarily absent from the Senate, I appoint Hon. WILLARD SAULSBURY, a Senator from the State of Delaware, to perform the duties of the Chair during my absence.

JAMES P. CLARKE,
*President pro tempore.*

Mr. SAULSBURY thereupon took the chair as Acting President pro tempore for the day and directed the Secretary to read the Journal of the proceedings of the last legislative day.

The Secretary proceeded to read the Journal of the proceedings of Friday last, when on request of Mr. SMOOT and by unanimous consent, the further reading was dispensed with and the Journal was approved.

#### EMPLOYMENT OF CONVICTS IN FOREIGN COUNTRIES.

The PRESIDING OFFICER (Mr. SAULSBURY) laid before the Senate a communication from the Secretary of Commerce, transmitting, in further response to a resolution of November 19, 1913, additional data in regard to the employment of convicts in foreign countries, which, with the accompanying papers, was referred to the Committee on Printing.

#### MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the bill (S. 746) for the relief of Capt. Frank Parker.

The message also announced that the House had passed a bill (H. R. 13679) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1915, in which it requested the concurrence of the Senate.

#### ENROLLED JOINT RESOLUTION SIGNED.

The message further announced that the Speaker of the House had signed the enrolled joint resolution (H. J. Res. 217) to convey the thanks of Congress to the captain of the American steamer *Kroonland*, of the Red Star Line, and through him to the officers and crew of said steamer, for the prompt and heroic service rendered by them in rescuing 89 lives from the burning steamer *Volturno*, in the North Atlantic Ocean, and it was thereupon signed by the Acting President pro tempore.

PETITIONS AND MEMORIALS.

The PRESIDING OFFICER presented a petition of members of the Lynn Chapel Sunday School, of London Mills, Ill., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented a memorial of sundry citizens of Evansville, Ind., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented a petition of the employees of the Martin B. Brown Printing & Binding Co., of New York City, N. Y., praying for the enactment of legislation to make lawful certain agreements between employees and laborers and persons engaged in agriculture or horticulture, and to limit the issuing of injunctions in certain cases, and for other purposes, which was referred to the Committee on the Judiciary.

He also presented a memorial of the board of trustees of the Stationers and Publishers' Board of Trade, New York City, N. Y., remonstrating against the enactment of legislation to create a Federal trades commission, etc., which was referred to the Committee on Interstate Commerce.

Mr. GRONNA presented a petition of Lincoln Grange, No. 14, Patrons of Husbandry, of Carl, N. Dak., praying for the adoption of a system of rural credits, which was referred to the Committee on Banking and Currency.

Mr. BRADLEY presented a memorial of 163 citizens of Louisville, Ky., remonstrating against the adoption of an amendment to the Constitution, to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented a petition of Latonia Council, No. 50, Daughters of America, of Latonia, Ky., and a petition of Local Council No. 57, Daughters of America, of Farmer, Ky., praying for the enactment of legislation to further restrict immigration, which were referred to the Committee on Immigration.

Mr. WORKS presented a petition of the Civil War Volunteer Officers' Retired List Association, of Santa Clara County, Cal., praying for the passage of the bill to provide a retired list of volunteer Army and Navy officers of the Civil War, which was ordered to lie on the table.

He also presented a petition of sundry citizens of Beaumont, Cal., praying for the enactment of legislation to prevent discrimination in prices, which was referred to the Committee on Interstate Commerce.

He also presented a petition of the Sacramento Valley Development Association, of California, praying for favorable consideration by the Army Board of Engineers of the Crescent City harbor project, which was referred to the Committee on Military Affairs.

Mr. BURTON presented memorials of sundry citizens of Lima, Toledo, and Cambridge; of Local Union No. 307, Journeymen Barbers' International Union of America, of Massillon; and of the German Hungarian Singing Society, of Mansfield, all in the State of Ohio, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented petitions of the Cowden Memorial Christian Endeavor Society, of Dayton; of sundry citizens of Columbus, Coshocton, Oakwood, Alliance, Springfield, Leipsic, Piedmont, Bradford, Ashland, Thurston, Cleveland, Akron, Newark, Youngstown, and Toledo; of the congregations of First Congregational Church of Toledo, the Friends' Church of Wilmington, the Methodist Episcopal Church of Elyria, and the United Brethren Church of Coshocton; and of the Smith Agricultural Chemical Co., of Tontogany, all in the State of Ohio, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. GALLINGER presented a petition of the congregations of the First Congregational Church, the Central Avenue Baptist Church, the St. John's Methodist Episcopal Church, the Belknap Congregational Church, the Free Will Baptist Church, the Advent Christian Church, the Universalist Church, and the Unitarian Church, all of Dover, in the State of New Hampshire, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. TOWNSEND presented memorials of sundry citizens of Jackson County, Dickinson County, and Menominee County, all in the State of Michigan, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented petitions of the congregations of the Methodist Episcopal Church of Dundee, the Methodist Episcopal Church of Cassopolis, the First Methodist Episcopal Church of Adrian, and the First Presbyterian Church of Pontiac, all in the State of Michigan, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of Huron County, Mich., praying for the enactment of legislation to further restrict immigration, which was referred to the Committee on Immigration.

He also presented a petition of the Twentieth Century Club, of Detroit, Mich., and a petition of the Jewish Woman's Club, of Detroit, Mich., praying that an appropriation be made for the prevention and control of floods, which were referred to the Committee on Commerce.

He also presented a petition of Maple Hill Grange, No. 691, Patrons of Husbandry, of Central Lake, Mich., praying for the enactment of legislation to provide a system of rural credits, which was referred to the Committee on Banking and Currency.

Mr. STERLING presented a petition of the congregation of the Methodist Episcopal Church of Gettysburg, S. Dak., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. BURLEIGH presented a memorial of the St. Croix Ministerial Association of Maine, remonstrating against the enactment of legislation to change the present compensatory privilege of post-office employees, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of the Robbinston Grange, Patrons of Husbandry, of Washington County, Me., praying for the enactment of legislation to provide an educational test for immigrants to this country, which was referred to the Committee on Immigration.

Mr. CLAPP presented a memorial of sundry citizens of Brainerd, Minn., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of Vernon, Minn., and a petition of sundry citizens of Duluth, Minn., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of Minnesota, praying for the enactment of legislation to further restrict immigration, which was referred to the Committee on Immigration.

He also presented a memorial of the Minnesota State Dairyman's Association, remonstrating against the enactment of legislation to regulate cold storage and to control the manufacture and sale of oleomargarine, which was referred to the Committee on Manufactures.

He also presented resolutions adopted by the Minnesota Commandery of the Loyal Legion, favoring the enactment of legislation to provide a retired list of volunteer officers of the Civil War, which were ordered to lie on the table.

Mr. LODGE presented a petition of 100 citizens of Gardner, Mass., and a petition of 93 citizens of Ashburnham, Mass., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. SHIVELY presented memorials of sundry citizens of Evansville, Indianapolis, New Albany, Anderson, Newcastle, Jeffersonville, Vincennes, and Veedersburg, and of Local Union No. 11, International Photo-Engravers' Union of North America, of Indianapolis, all in the State of Indiana, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented petitions of the congregations of the Methodist Episcopal Church of North Webster; the Methodist Church of Oxford; the Newton Presbyterian Church, of Newton; the Church of God of Fort Wayne; the Heltonville Methodist

Episcopal Church, of Heltonville; the Pleasant Run Methodist Episcopal Church, of Pleasant Run; of sundry citizens of Indianapolis, Gary, West Lafayette, Clinton, Greencastle, South Bend, Culver, 200 citizens of Bicknell, 235 citizens of Vincennes, 360 citizens of Washington, and 200 citizens of Mooresville, all in the State of Indiana, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a petition of Hope Grange, No. 2101, Patrons of Husbandry, of Aurora, Ind., and a petition of sundry citizens of St. Joe, Ind., praying for the adoption of a system of rural credits, which were referred to the Committee on Banking and Currency.

He also presented a memorial of Lawton-Wayne Post, No. 271, Grand Army of the Republic, Department of Indiana, of Fort Wayne, Ind., remonstrating against any change being made in the United States flag, which was referred to the Committee on the Judiciary.

He also presented a petition of Local Union No. 157, United Association of Plumbers and Steam Fitters, of Terre Haute, Ind., praying for the enactment of legislation to make lawful certain agreements between employees and laborers and persons engaged in agriculture or horticulture, etc., and to limit the issuing of injunctions in certain cases, which was referred to the Committee on the Judiciary.

He also presented a memorial of Fred D. Ballou Camp, No. 32, United Spanish War Veterans, of the National Military Home, Ind., remonstrating against any change being made in the supervision of the National Military Home for Disabled Volunteer Soldiers, which was referred to the Committee on Military Affairs.

Mr. STEPHENSON presented memorials of sundry citizens of Dodge County, Wis., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. WEEKS presented a memorial of Local Union No. 323, International Moulders' Union, of Foxboro, Mass., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented a petition of Quinsigamond Val Lodge, Independent Order Good Templars, of Worcester, Mass., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented a memorial of the Boston Association of Photo-Engravers, of Massachusetts, remonstrating against the enactment of legislation to make lawful certain agreements between employees and laborers and persons engaged in agriculture or horticulture and to limit the issuing of injunctions in certain cases, which was referred to the Committee on the Judiciary.

Mr. KERN presented memorials of sundry citizens of Indianapolis, Jeffersonville, and Evansville, all in the State of Indiana, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented petitions of sundry citizens of Monroe County, Ind., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. PERKINS presented a petition of the Civil War Volunteer Officers' Retired List Association, of Santa Clara County, Cal., praying for the enactment of legislation to provide a retired list of Civil War volunteer officers, which was ordered to lie on the table.

He also presented a memorial of sundry citizens of Sacramento, Cal., and a memorial of the Brotherhood of Teamsters, of San Francisco, Cal., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a petition of Hawkins Camp, No. 43, United Spanish War Veterans, of Soldiers Home, Cal., praying for the enactment of legislation granting pensions for widows and orphans of soldiers and sailors of the Spanish-American War, which was referred to the Committee on Pensions.

He also presented a memorial of sundry citizens of San Francisco, Cal., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a petition of the Sacramento Valley Development Association of California, praying that an appropriation be made for the improvement of the harbor at Crescent City, Cal., which was referred to the Committee on Commerce.

Mr. McLEAN presented memorials of Local Union No. 92, Bakers and Confectioners, of Norwalk; of Local Union No. 307, Sheet Metal Workers' Union, of Meriden; and of sundry citizens of New Haven, all in the State of Connecticut, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a petition of General Mansfield Council, No. 9, Junior Order United American Mechanics, of Middletown, Conn., and a petition of Harmony Council, No. 12, Junior Order United American Mechanics, of Bridgeport, Conn., praying for the enactment of legislation to further restrict immigration, which were referred to the Committee on Immigration.

He also presented a petition of Wallingford Grange, No. 33, Patrons of Husbandry, of Wallingford, Conn., praying for the enactment of legislation to provide a system of rural credits, which was referred to the Committee on Banking and Currency.

Mr. POMERENE presented resolutions adopted by the City Council of Cleveland, Ohio, and resolutions adopted by the City Council of Columbus, Ohio, favoring the enactment of legislation granting pensions to superannuated civil-service employees, which were referred to the Committee on Civil Service and Retrenchment.

He also presented a petition of members of the Broadway Methodist Sunday School, of Toledo, Ohio, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. BRANDEGEE presented a petition of General Mansfield Council, No. 9, Junior Order United American Mechanics, of Middletown, Conn., and a petition of Harmony Council, No. 12, Junior Order United American Mechanics, of Bridgeport, Conn., praying for the enactment of legislation to further restrict immigration, which were referred to the Committee on Immigration.

### MANUFACTURE OF BINDING TWINE BY CONVICT LABOR.

Mr. GRONNA. Mr. President, I have here a telegram from the governor of my State, which I ask may be read.

There being no objection, the telegram was read, as follows:

[Telegram.]

BISMARCK, N. DAK., *March 14, 1914.*

Hon. A. J. GRONNA, *Washington, D. C.:*

There is a bill before the Senate Committee on Interstate Commerce prohibiting shipments of convict-made goods into other States. If this bill is passed, it will seriously interfere with the farmers of North Dakota, as at the present time our farmers buy thousands of pounds of Minnesota prison twine each year and at a price less than it can be bought through other channels. Our own penitentiary only manufactures about one-tenth of the twine we use in the State. If this bill is to go through, if possible have twine exempted from its operation.

L. B. HANNA, *Governor.*

Mr. GRONNA. I also present a telegram on the same subject from the chairman of the Board of Control of State institutions in North Dakota, which I ask may be printed in the RECORD.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

[Telegram.]

BISMARCK, N. DAK., *March 14, 1914.*

Senator A. J. GRONNA, *Washington, D. C.:*

We believe that Senate bill No. 2321, if it becomes a law, will work a hardship to the farmers of this State, and suggest that you oppose the bill on the grounds that the withdrawal of the sale of Minnesota twine in North Dakota would compel many of our farmers to pay a higher price for their twine, as the North Dakota penitentiary manufactures only one-tenth of the amount required to harvest the crop in this State.

BOARD OF CONTROL OF STATE INSTITUTIONS,
R. S. LEWIS, *Chairman.*

Mr. McCUMBER. I desire to state that I have a great many telegrams and protests coming in from our State, which I have not with me at the present time, remonstrating against the enactment of a bill which would prohibit the sale of twine manufactured at either the penitentiary in the State of Minnesota or in North Dakota. The protests are most general from the entire State.

Mr. CLAPP. Mr. President, I think it ought to be stated in connection with the protests referred to by the two Senators from North Dakota that the proposed bill does not in itself prohibit the importation of material from one State to the other;

that the most it could possibly do would be to authorize a State to prohibit upon its own account the importation into that State. I think that the bill should be modified before it is passed, but there is evidently a misunderstanding as to its scope, and I thought it well enough in connection with the telegrams to make this statement.

WOMAN SUFFRAGE.

Mr. GRONNA. I have received a telegram from the North Dakota Suffragette League, which I ask may be read and printed in the RECORD.

There being no objection, the telegram was read, as follows:

[Telegram.]

FARGO, N. DAK., *March 15, 1914.*

Hon. A. J. GRONNA,
*Senate, Washington, D. C.:*

It is the earnest desire of the North Dakota Suffragette League that you vote on suffrage amendment at close of the day.

Mrs. E. M. DARROW, *President.*
Mrs. C. F. AMIDON, *Vice President.*

Mr. BRADLEY. I desire to file a telegraphic communication from Mrs. Breckenridge, president of the Kentucky Woman's Rights National Association, which I will ask to have read.

There being no objection, the telegram was read, as follows:

[Telegram.]

LEXINGTON, KY., *March 15, 1914.*

Senator WILLIAM O. BRADLEY,
*United States Senate, Washington, D. C.:*

The Kentucky Equal Rights Association urges that resolution submitting woman-suffrage amendment be put to vote immediately on close of debate in Senate.

M. McD. BRECKENRIDGE,
*President Kentucky Equal Rights Association.*

Mr. ASHURST. Mr. President, I present various petitions and telegrams in the nature of petitions regarding the woman-suffrage amendment. I ask that they may be read at the desk.

There being no objection, the telegrams were read, as follows:

[Telegram.]

BOSTON, MASS., *March 13, 1914.*

Senator ASHURST,
*United States Senate, Washington, D. C.:*

All suffragists are looking to you to accomplish the impossible and remove the suffrage amendment from the calendar of unfinished business.

LOUISE BURLEIGH.

—

[Telegram.]

SAN ANTONIO, TEX., *March 14, 1914.*

Senator ASHURST,
*Senate Chamber, Washington, D. C.:*

Texas women commend your course in pressing vote.

M. ELEANOR BRECKENRIDGE,
*President Texas Woman's Suffrage Association.*

—

[Telegram.]

KINGMAN, ARIZ., *March 14, 1914.*

Senator H. F. ASHURST,
*Washington, D. C.:*

Mrs. McCormick wires that it is expedient to have vote on suffrage at close of debate. Miss Paul wires to postpone until after May 2. Am inclined to trust Mrs. McCormick's judgment, but have implicit confidence in your judgment, so bring to vote if you can pass it.

FRANCES W. MUNDS.

—

[Telegram.]

YAZOO CITY, MISS., *March 13, 1914.*

Senator HENRY F. ASHURST,
*Washington, D. C.:*

Would advise postponing vote on suffrage amendment. Believe imprudent to vote which requires two-thirds until after suffrage demonstration, May 2, when every section of the country will bring pressure to urge favorable consideration.

ANNIE K. DENT,
*President Mississippi Woman's Suffrage Association.*

—

[Telegram.]

COLUMBUS, OHIO, *March 14, 1914.*

Senator ASHURST,
*Washington, D. C.:*

We look to you to use every effort to postpone vote on woman-suffrage amendment in Senate until after our May demonstrations.

Mrs. DORA S. BACKMAN,
Mrs. FRANK KILTON,
Mrs. JULIUS STONE,
*Representing Franklin County Woman's Suffrage Association of Ohio.*

—

[Telegram.]

RENO, NEV., *March 12, 1914.*

Senator ASHURST,
*United States Senate, Washington, D. C.:*

As the representative of over 1,000 women of Nevada organized and working for equal suffrage, let me urge you delay Senate vote on national suffrage amendment until after national suffrage demonstration of May 2, when there is every prospect of a larger Senate vote in favor.

ANNE H. MARTIN,
*Nevada State President.*

[Telegram.]

BOSTON, MASS., *March 12, 1914.*

Senator ASHURST,
*The Capitol, Washington, D. C.:*

I beg you will get suffrage amendment off Unfinished Business Calendar. I realize the difficulty of so doing, but a few loyal champions can do the impossible if they are determined. The suffragists of the country have been betrayed. We look to you to help us.

ELIZABETH GLENDOWER EVANS,
*12 Otis Place.*

—

[Telegram.]

HARTFORD, CONN., *March 12, 1914.*

Senator ASHURST,
*Washington, D. C.:*

Please delay vote on woman-suffrage amendment until after demonstration May 2, if possible.

KATHERINE B. DAY.

—

[Telegram.]

PORTLAND, OREG., *March 13, 1914.*

Senator ASHURST,
*United States Senate, Washington, D. C.:*

Please postpone vote on suffrage amendment till after May 2.

ABIGAIL SCOTT DUNIWAY,
*State President.*

—

[Telegram.]

EVANSTON, ILL., *March 13, 1914.*

Senator ASHURST,
*United States Senate, Washington, D. C.:*

Convention of Illinois Tenth District Federation of Women's Clubs ask you to delay the Senate suffrage vote until you can secure the necessary two-thirds vote. Illinois women can more easily secure full enfranchisement through national amendment than through the almost impossible amendment of Illinois constitution.

MRS. JOHN HARPER LONG,
*Vice President Illinois Federation of Women's Clubs.*

—

[Telegram.]

BROOKLINE, MASS., *March 13, 1914.*

Senator ASHURST,
*Senate Chamber, Washington, D. C.:*

Boston Equal Suffrage Association begs you to do everything possible to postpone vote on suffrage amendment.

MARY HUTCHESON PAGE, *Chairman.*

—

[Telegram.]

BOSTON, MASS., *March 13, 1914.*

Senator ASHURST, of Arizona,
*Washington, D. C.:*

Hold off vote on suffrage amendment till end of session.

ORDWAY TEAD.

—

WOMAN SUFFRAGE PARTY,
602 JACKSON BUILDING,
*Providence, R. I., March 12, 1914.*

Senator ASHURST,
*Washington, D. C.*

MY DEAR MR. ASHURST: Rhode Island is planning a votes-for-women week the last of April to culminate in a grand demonstration May 2.

Our presidential suffrage bill is at a critical place and might be lost should the United States Senate take unfavorable action on the bill now pending before it.

We urge you, therefore, to postpone final vote, if possible, until after the May celebration.

Yours, respectfully,

SARA M. ALGES,
*Chairman Woman Suffrage Party.*

—

OFFICE NATIONAL CONGRESSIONAL COMMITTEE,
NATIONAL AMERICAN WOMAN SUFFRAGE ASSOCIATION,
517 MUNSEY BUILDING,
*Washington, D. C., March 11, 1914.*

DEAR SENATOR: In view of the fact that a discussion has arisen between the two national suffrage associations as to when we desire a vote to be taken on the pending amendment, I wish to explain that the National American Woman Suffrage Association, which I have the pleasure of representing, is desirous of having a vote immediately upon the close of the debate.

We shall appreciate any assistance you may be able to render us.

Sincerely, yours,

RUTH HANNA MCCORMICK,
*Chairman Congressional Committee,*
*National American Woman Suffrage Association.*

Mr. SMOOT. Mr. President, I desire to say that I have received telegrams from citizens of a great number of the States of the Union, for and against immediate action on Senate joint resolution No. 1. In my opinion, there would not be one vote changed in this body if we should defer action until after the proposed demonstration of May 2. The joint resolution is now before the Senate as unfinished business, and it seems to me that the only proper course to pursue is to press it to a vote at as early a day as possible. If I thought that the joint resolution could be passed in the Senate by its continuation until after May 2, or even until the next session of Congress, I would not desire a vote at this time upon it; but I am quite sure that the National Organization for Woman Suffrage, at least the board of that organization, is in favor of immediate action upon the joint resolution; and I believe that the proper course is to secure a vote upon it at as early a date as possible.

Mr. McCUMBER. Mr. President, I have a very urgent request from the Woman Suffrage Association in my State that we proceed to vote upon Senate joint resolution No. 1 without longer delay. I do not know just exactly what answer to make to that request, and I will ask the Senator from Arizona [Mr. ASHURST] if he has yet determined what course we should pursue in the matter?

Mr. ASHURST. Mr. President, in reply to the Senator from North Dakota, I will say that I am not in charge of the joint resolution, though there exists an erroneous impression prevailing to the effect that I am. The Senator from Colorado [Mr. THOMAS], the chairman of the Committee on Woman Suffrage, is the Senator in charge of the joint resolution. He is unavoidably absent for the day; but I have a note from him, in which he requests that any contemplated action to be taken be deferred until he returns, which will be late this afternoon or to-morrow.

Moreover, I wish to say that the distinguished Senator from Utah [Mr. SMOOT] has given very valuable assistance to the promotion of this joint resolution and to the suffrage question; and I think I will ask him to reply as to when a vote will be taken, if he is sufficiently informed to do so?

Mr. SMOOT. Mr. President, I will say that the Senator from Colorado [Mr. THOMAS] before leaving for New York called me over the telephone and stated that he desired to be here when the vote was taken, and that he wanted no delay whatever in the consideration of the joint resolution. I replied to him that from the number of Senators who had stated that they desired to speak upon the resolution I had not a doubt in my mind but that the resolution would not reach a vote to-day. The Senator from Colorado will return this afternoon; and at 2 o'clock to-day, when the joint resolution comes up as the unfinished business, I shall ask that it be then considered by the Senate.

Mr. McCUMBER. Mr. President, as the Senator from Arizona [Mr. ASHURST] is at present in charge of the joint resolution, I should like to ask the Senator his own opinion as to whether we ought to have a vote on it in the near future or allow it to go over until after May 2?

Mr. ASHURST. Mr. President, the Senator from North Dakota propounds to me a question, the answer to which will involve me in much embarrassment; but I have never yet declined to answer any question propounded to me; no question that has ever been propounded to me have I ever dodged. I would say to the Senator from North Dakota, in all frankness and in all fairness—and the Senate is entitled to know my position—some months ago, most if not all persons interested in this joint resolution requested me to urge this resolution to an immediate vote. Since it has been made the unfinished business, a number of excellent ladies have feared that the present time would not be a propitious or a wise one to vote.

Mr. President, if we should vote now the joint resolution would fail to get a two-thirds majority, for every Senator who indulges in the luxury of thinking into things, instead of thinking around things, is bound to know that the joint resolution will not get a two-thirds vote in its favor; and if we vote now those who are in favor of its postponement could never have dislodged from their minds the idea that they were betrayed. In other words, a large number of worthy people, men and women, feel that it ought to be postponed. Personally, I do not believe the resolution would get one more vote in May than it would get to-day. I am willing to vote now.

Mr. McCUMBER. Mr. President, I have not quite obtained the information I desire. This joint resolution either ought to be voted on within a reasonable time or else it ought not to continue to be the unfinished business, obstructing the way of every other measure. It is immaterial to me, personally, what is done with the joint resolution; but we ought to have some understanding as to whether it is the purpose of the Senator to continue this matter over until after May 2, or whether it is his purpose to secure a vote at an early date.

Mr. ASHURST. Mr. President, I will say, in reply to the Senator—not seeking to avoid any responsibility, because that is not a habit of mine—the distinguished Senator from Colorado [Mr. THOMAS] is in charge of the joint resolution.

Mr. BRYAN. Mr. President, when did the Senator from Arizona resign control of this measure?

Mr. ASHURST. I have never resigned anything.

Mr. BRYAN. The Senator from Arizona had it made the unfinished business; he has been its champion on the floor; and he opposed, only a few days ago, postponing it until May.

Mr. ASHURST. That was because the Senator from Colorado was ill in his apartments and it devolved upon some member of the committee in that situation to perform the duty in the absence of the able and distinguished Senator from Colorado.

Mr. BRYAN. The Senator from Colorado is absent this morning also.

Mr. ASHURST. He is unavoidably detained.

Mr. BRYAN. Who is in charge of the joint resolution now?

Mr. ASHURST. I will be in charge until the Senator from Colorado returns.

Mr. BRYAN. Does the Senator intend to keep it the unfinished business until the 2d of May, when the proposed demonstration is to be made?

Mr. ASHURST. The Senator asks the question merely for the purpose of embarrassment; but I will say that my conduct will be ample evidence of my intention.

Mr. BRYAN. That is what I can not understand. [Laughter.]

Mr. ASHURST. There are many things the Senator can not now understand, but he will understand after he has had an experience such as I have had in the last two or three weeks. [Laughter.]

Mr. GALLINGER. Mr. President, just a word. The Senator from Arizona frankly stated that the Senator from Colorado [Mr. THOMAS] has charge of this joint resolution. It is not unusual for a Senator who reports a measure to allow some other Senator to take charge of it. It seems to me that we ought not to haggle over this matter, but let it go over until the Senator from Colorado returns.

Mr. ASHURST. I hope that will be done.

Mr. GALLINGER. That is what ought to be done.

Mr. McCUMBER. There is no question about the joint resolution going over until the Senator from Colorado returns. The question that I asked was whether the Senator who has charge of the joint resolution, whoever he may be, purposes to have no vote on it until after May 2, or whether he purposes to have a vote on it prior to that time. We ought to have this information, so that we may be able to determine what we will do with other measures that should take the place of this joint resolution if it is to go off the calendar as unfinished business. I have no objection, of course, to the Senator letting it rest until the Senator from Colorado returns.

Mr. ASHURST. Mr. President, while I am on my feet, if the Senator will yield to me for a moment——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Arizona?

Mr. McCUMBER. Certainly.

Mr. ASHURST. I wish to correct an erroneous impression which has been spread by a number of newspapers, whose high standing and high class ought to have preserved them from falling into such an egregious blunder. I noticed in one newspaper on last Saturday the erroneous statement that the Senator from Colorado [Mr. THOMAS] was urging a postponement of the vote on the joint resolution, and that I was opposed to his views. I have no authority to speak for the distinguished Senator from Colorado; but I am very sure that he is not urging a postponement, and certainly I have never entered an objection to a vote in May.

Mr. McCUMBER. I ask that the telegram which I send to the desk, which bears upon this subject, may be read.

The PRESIDING OFFICER. The Secretary will read as requested.

The Secretary read as follows:

[Telegram.]

FARGO, N. DAK., *March 15, 1914.*

Hon. P. J. McCUMBER,
*Senate, Washington, D. C.:*

It is the earnest desire of the North Dakota Suffrage League that you vote on suffrage amendment at close of the day.

MRS. E. M. DARROW, *President.*
MRS. C. F. AMIDON, *Vice President.*

Mr. McCUMBER. It is evident, Mr. President, that their desire will not be fulfilled, at least so far as voting on the joint resolution to-day is concerned.

Mr. JAMES. I present a telegram in the nature of a petition from the president of the Kentucky Equal Rights Association, which I ask may be read.

There being no objection, the telegram was read and ordered to lie on the table, as follows:

[Telegram.]

LEXINGTON, KY., *March 15, 1914.*

Senator OLLIE JAMES,
*United States Senate, Washington, D. C.:*

The Kentucky Equal Rights Association urges that resolution submitting woman-suffrage amendment be put to vote immediately on close of debate in Senate.

M. McD. BRECKENRIDGE,
*President Kentucky Equal Rights Association.*

MANUFACTURE OF BINDING TWINE BY CONVICT LABOR.

Mr. McCUMBER. I have a telegram from R. S. Lewis, chairman of the Board of Control of State Institutions of North Dakota, which I ask may be printed in the RECORD.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

[Telegram.]

BISMARCK, N. DAK., *March 14, 1914.*

Senator P. J. MCCUMBER,
*Washington, D. C.:*

We believe that Senate bill No. 2321, if it becomes a law, will work a hardship to the farmers of this State, and suggest that you oppose the bill on the grounds that the withdrawal of the sale of Minnesota twine in North Dakota would compel many of our farmers to pay a higher price for their twine, as the North Dakota Penitentiary manufactures only one-tenth of the amount required to harvest the crop in this State.

BOARD OF CONTROL OF STATE INSTITUTIONS,
R. S. LEWIS, *Chairman.*

COMMISSION ON GENERAL MINING LAWS.

Mr. WALSH, from the Committee on Mines and Mining, to which was referred the bill (S. 4373) to provide for a commission to codify and suggest amendments to the general mining laws, reported it with amendments and submitted a report (No. 349) thereon.

WALDO H. COFFMAN.

Mr. CHAMBERLAIN. From the Committee on Military Affairs I report back favorably with an amendment the bill (S. 4023) to correct the military record of Waldo H. Coffman, and I submit a report (No. 347) thereon. I call the attention of the Senator from Kansas [Mr. THOMPSON] to the report.

Mr. THOMPSON. I ask unanimous consent for the present consideration of the bill. I think it can be disposed of without any discussion. It is a matter of great importance to a Kansas young man, and it is a bill which, as amended according to the report of the committee, has the unanimous support of the committee and has been approved of by the War Department.

Mr. SMOOT. Do I understand the Senator to say that there has been a report from the department and that the report is favorable?

Mr. THOMPSON. The report is favorable. The Secretary of War especially approving the bill as amended both by letter to me as well as to the committee.

Mr. SMOOT. And the bill is a unanimous report from the committee?

Mr. CHAMBERLAIN. It is.

Mr. THOMPSON. This is the young man who was court-martialed at Fort Stevens, Oreg., last year on the charge of speaking disrespectfully and indecently against the national flag. He was convicted and sentenced to two years' imprisonement in the penitentiary at Leavenworth, Kans., and to receive a dishonorable discharge and forfeit all pay due him for services as a soldier. I know this young man personally, and am well acquainted with his father and mother, who lived at Iola, Kans., during the five years I resided there. He is a young man of the highest character and wholly incapable of committing such an offense. The young man appealed to me early when he got into this trouble, and I thoroughly investigated the case and became convinced of his absolute innocence. Ocober 7, 1913, with the help of other Senators who became interested in the case, we succeeded in getting the Secretary of War to remit the unexecuted portion of his sentence of imprisonment. He could not, however, remove the disability caused by the dishonorable discharge, which under the constitution of Kansas makes him ineligible to vote or to hold office. This bill is therefore necessary for the important purpose of restoring the young man to full citizenship and to confer upon him the benefits and rights he would have enjoyed had he been honorably discharged. This will extend to him justice and atone, to a small degree, for the injustice of a wrongful conviction.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the bill was considered as in Committee of the Whole.

The amendment of the committee was to strike out all after the enacting clause and to insert:

That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, Waldo H. Coffman, [illegible], a private of the Ninety-third Company, Coast Artillery Corps, United States Army, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a member of said company on the 18th day of August, 1913: *Provided*, That all pay and allowances due him on said date shall be allowed him.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title of the bill was amended so as to read: "A bill for the relief of Waldo H. Coffman."

RADIUM-BEARING ORES.

Mr. WALSH. From the Committee on Mines and Mining, I report back favorably with amendments the bill (S. 4405) to provide for and encourage the prospecting, mining, and treatment of radium-bearing ores in lands belonging to the United States, for the purpose of securing an adequate supply of radium for Government and other hospitals in the United States, and for other purposes, and I submit a report (No. 348) thereon.

The report contains a brief statement of the case and I ask to have it read for the information of the Senate.

Mr. SMOOT. Does the Senator from Montana ask for the immediate consideration of the bill?

Mr. WALSH. No; not at this time.

The PRESIDING OFFICER. The Secretary will read as requested.

The Secretary read the report, as follows:

[Senate Report No. 348, Sixty-third Congress, second session.]

RADIUM.

Mr. WALSH, from the Committee on Mines and Mining, submitted the following report, to accompany S. 4405:

The Committee on Mines and Mining, to which was referred the bill (S. 4405) to provide for and encourage the prospecting, mining, and treatment of radium-bearing ores in lands belonging to the United States, for the purpose of securing an adequate supply of radium for Government and other hospitals in the United States, and for other purposes, reports:

HEARINGS.

In the belief that the radium situation in the United States in its bearing upon pending legislation had been adequately set forth before the House Committee on Mines and Mining, it was not originally intended to arrange for hearings before the Senate committee; but the parties who appeared before the House committee in opposition to this legislation asked to be further heard before the Senate committee, and the request was granted to the extent that hearings were begun on February 10, 1914, and continued at intervals during the two weeks following. Before the conclusion of these hearings the Director of the Bureau of Mines and Mr. Hess, as representing the United States Geological Survey, were asked to furnish the committee certain information on this subject; and Dr. Anderson, of the Public Health Service, was asked to inform the committee as to the quantity of radium needed for use in connection with the Government hospitals and how this radium could be best used in connection with the needs of the general public.

GENERAL STATEMENT.

The bill as reported gives the Government the prior right to purchase radium-bearing ores mined from the public lands, located after the passage of this act, at such prices, to be fixed by the Secretary of the Interior and published in advance, as will encourage the prospecting for and mining of such ores by private parties. It also authorizes the Secretary of the Interior to provide the necessary building and equipment with which to extract the radium from these ores; to sell the by-products obtained in connection with such operations. The prospector and miner is thus given the assurance of a steady market and prompt payment at reasonable prices for the ores which he mines, and if at any time the Government is not prepared to purchase such ores he is authorized to sell them in the open market.

NECESSITY FOR SUCH LEGISLATION.

The report of the House Committee on Mines and Mining (H. R. 214) sets forth so clearly the radium situation and the need for such legislation that it calls for but brief further treatment.

In the first place, the call for this legislation has a humanitarian basis, because of its relations to public health, and the arguments which might be raised against the Government's entering into mining or metallurgical operations in relation to other mineral substances, which might have a purely commercial basis, might not apply in this instance.

The experiences of the few surgeons in this and other countries, who have been able to secure a sufficient quantity of radium for use in the treatment of disease, have demonstrated beyond reasonable doubt the importance of radium as a cure for certain superficial types of cancer, and give promise of its value in supplementing surgical operations in the treatment of other forms of cancer if this treatment can be begun in the early stages of the disease and as surgeons secure radium enough to become more experienced in methods of its application.

Best statistics available show that there are in the United States at the present time no less than 200,000 persons suffering from cancer, and that the death list in the United States from this dread disease is not less than 75,000 persons each year.

At the present time there are not more than 40 grams of radium in all countries available for the use of medical science, and of this quantity not more than 2 grams are available for use in the United States.

The world's supply of radium ores outside of the United States is so small that the best available estimates indicate that during 1914 all of the ores mined in these countries will yield but 12 grams (less than one-half ounce) of radium bromide.

The most important and the most extensive radium-ore deposits known are those in Colorado and Utah—all of these until quite recently on public lands of the United States. During the past 12 to 18 months all of the known deposits of radium-bearing ores on these public lands have been taken up by private parties. Many of them are now held by foreign corporations, while many other claims are held by American citizens who are acting as agents or representatives of foreign corporations. During the year 1913 of the 2,140 tons of radium-bearing ores mined in the United States ores containing one-half of the radium content were shipped abroad for treatment. The remainder was held in the United States for treatment by two American plants located in the State of Pennsylvania. The radium extracted by these two plants during 1913 from American ores will be sold in the open market at prices which are believed to be largely speculative—$120,000 to $160,000 per gram (a quantity about equal to a garden pea)—and, as brought out before the House committee, the larger of these two concerns is already under agreement to furnish the larger part of this output for 1914 to foreign purchasers.

The quantity of radium needed for the work of the Public Health Service at its more than 20 hospitals distributed throughout the

United States and for the Army and Navy hospitals was stated before the committee to be 30 grams (about 1 ounce). The estimates submitted indicate that a plant to be operated by the Government as proposed in this legislation could produce this quantity of radium at a cost less than half of the above-named prices. And, in addition to this saving to the Government of more than $1,500,000, the publication of the results of all the Government's operations as to processes, costs, etc., would benefit the western miners and the public by facilitating fair dealing and open competition.

As indicating the importance of prompt action in this matter it may be stated that since the introduction of the legislation now being considered the representatives of the foreign purchasers of radium ores and of the two radium-extraction plants in the United States have been making rush examinations of the entire radium ore field in Colorado and Utah, and have been locating every area of public land on which there was evidence of the occurrence of radium-bearing ores.

As the situation now stands the public lands containing this resource of peculiar importance to the people of this country are being taken into private ownership in such manner as seems likely to bring the control of the radium supply into the hands of a few persons, to whom the hospitals of this country must pay exorbitant profits. In addition, the fact that the extraction of radium is carried on by secret processes lends itself to and facilitates the establishment of monopoly.

In view of the foregoing the committee recommend that the bill be passed with the following amendments:

"On page 1, line 3, after the word 'That,' insert the word 'hereafter.'

On page 1, line 9, after the word "provided," strike out "and all said ores here-" and continuing on page 2 strike out lines 1, 2, and 3 and the words "sold and delivered," in line 4.

On page 2, line 16, strike out the period after the word "issued" and insert the following:

"For lands located under this act: *Provided*, That if the United States shall at any time fail or refuse to purchase any such radium ores of sufficient value to be merchantable, extracted from any such lands so located, whether patented or unpatented, upon the tender of the same for sale in carload lots at any railroad station, the exclusive right of the United States to purchase such ore or any ores thereafter extracted from the mining claim from which the same were mined and from all other mining claims contiguous thereto and held in common therewith as well as the right to enter upon the same for failure diligently to mine any of such claims shall thereupon cease and the unrestricted right of disposition of all ores within such claims or extracted therefrom shall thereupon accrue to the owner, lessee, or other rightful occupant thereof."

Strike out section 2 on pages 2 and 3 and insert in lieu thereof the following:

"SEC. 2. That the Secretary of the Interior be, and he is hereby, authorized to lease for the purpose of exploration and development of radium-bearing ores unallotted lands within Indian reservations now existing or hereafter established by act of Congress or Executive order in such quantities and upon such terms and conditions and under such rules and regulations as he may prescribe: *Provided*, That such radium-bearing ores when mined shall be sold and delivered to the United States as herein provided: *And provided further*, That all royalties derived from any such leases or rentals or other moneys paid on account of the same shall be deposited to the credit of the Indians entitled to occupy the reservation from which the same come, to be expended for their benefit as the Secretary of the Interior may direct."

On page 3, line 6, after the word "ores," insert the words "from lands located under the provisions of this act."

On page 4, line 1, after the word "at," strike out the words "such prices to be fixed" and insert in lieu thereof the words "the market price to be determined."

On page 4, line 3, after the word "year," strike out the words "as will insure the prospecting for and"; and on the same page, in line 4, strike out the words "mining of such ores."

On page 4, line 22, strike out the word "authorized" and insert in lieu thereof the word "appropriated."

Add, after section 6, sections 7 and 8, as follows:

"SEC. 7. That nothing herein contained shall be construed to affect or abridge the right, in good faith, to locate or appropriate (under existing laws) any public lands, whether mineral or otherwise, not known by the locator or appropriator to be of value because of any radium-bearing ores therein, and any patent issued for such lands so located or appropriated shall be unlimited in character except as in such laws provided, anything in this act to the contrary notwithstanding.

"SEC. 8. Except as herein provided the general laws in relation to the disposition of mining lands shall be applicable to the lands in this act referred to containing radium-bearing ores."

Mr. SHAFROTH. I desire to give notice that at a later day I will file a minority report on the radium bill just reported by the Senator from Montana [Mr. WALSH] from the Committee on Mines and Mining.

The PRESIDING OFFICER. Without objection, leave is granted.

## BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SMOOT:

A bill (S. 4896) granting to the State of Utah title to certain lands in said State for use as a fish hatchery; to the Committee on Public Lands.

By Mr. SHERMAN:

A bill (S. 4897) appropriating $100,000 to improve the harbor and the Ohio River and the levee at Shawneetown, Ill.; to the Committee on Commerce.

By Mr. WALSH:

A bill (S. 4898) to encourage and promote the mining of coal, phosphate, oil, gas, potassium, and sodium on the public domain; to the Committee on Mines and Mining.

A bill (S. 4899) to reimburse Hill County, State of Montana, for money expended for the support of the Rocky Boy Band of Chippewa Indians (with accompanying papers); to the Committee on Claims.

By Mr. KENYON:

A bill (S. 4900) providing a remedy for the relief of wronged and defrauded shareholders in corporations engaged in interstate commerce, and for other purposes incident thereto; to the Committee on Interstate Commerce.

By Mr. BURLEIGH:

A bill (S. 4901) granting an increase of pension to Harrison Stevens; to the Committee on Pensions.

By Mr. GORE:

A bill (S. 4902) granting an increase of pension to John Wortman (with accompanying papers);

A bill (S. 4903) granting an increase of pension to John A. Harris (with accompanying papers);

A bill (S. 4904) granting an increase of pension to Marcus A. Seabolt (with accompanying papers);

A bill (S. 4905) granting a pension to Noah E. Curtis (with accompanying papers); and

A bill (S. 4906) granting an increase of pension to A. M. Sprague (with accompanying papers); to the Committee on Pensions.

By Mr. BRADLEY:

(By request.) A bill (S. 4907) for the relief of the legal representatives of John Boyle, deceased; to the Committee on Claims.

A bill (S. 4908) granting a pension to Thomas J. Craycroft; to the Committee on Pensions.

By Mr. McLEAN:

A bill (S. 4909) granting an increase of pension to Eliza J. Crittenden (with accompanying papers); and

A bill (S. 4910) granting an increase of pension to Catherine Scheibel (with accompanying papers); to the Committee on Pensions.

By Mr. SHIVELY:

A bill (S. 4911) granting a pension to Charles F. Pegg;

A bill (S. 4912) granting a pension to Edward Lenfesty;

A bill (S. 4913) granting an increase of pension to John McKinney;

A bill (S. 4914) granting an increase of pension to Andrew C. Rogers;

A bill (S. 4915) granting an increase of pension to John W. Thomas;

A bill (S. 4916) granting an increase of pension to Joshua F. Spurlin;

A bill (S. 4917) granting an increase of pension to Robert Magill;

A bill (S. 4918) granting an increase of pension to James B. Day; and

A bill (S. 4919) granting an increase of pension to Frank Sembower; to the Committee on Pensions.

By Mr. BRADY:

A bill (S. 4920) to increase the cost of construction of Federal building at Pocatello, Idaho; to the Committee on Public Buildings and Grounds.

By Mr. BANKHEAD:

A bill (S. 4921) for the relief of the St. Louis & Cairo Railroad Co.; to the Committee on Finance.

## AMENDMENTS TO APPROPRIATION BILLS.

Mr. BRADY submitted amendments proposing to increase the appropriation for maintenance, operation, and improvements at the Fort Hall (Idaho) irrigation system, etc., from $20,000 to $40,000, and to withdraw from the Treasury of the United States money to equip a sanatorium at Fort Lapwai, Idaho, intended to be proposed by him to the Indian appropriation bill, which was referred to the Committee on Indian Affairs and ordered to be printed.

Mr. BRANDEGEE submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

Mr. FLETCHER submitted three amendments intended to be proposed by him to the river and harbor appropriation bill, which were referred to the Committee on Commerce and ordered to be printed.

## PAYMENT UNDER RECLAMATION PROJECTS.

Mr. STERLING submitted an amendment intended to be proposed by him to the bill (S. 4628) extending the period of payment under reclamation projects, and for other purposes, which was ordered to lie on the table and be printed.

## PANAMA CANAL TOLLS (S. DOC NO. 450).

Mr. BRANDEGEE. Mr. President, I ask that the statement of Senator ROOT in relation to the Panama Canal tolls, which was made before the Committee on Interoceanic Canals of the last Congress in behalf of his bill to prevent discrimination in Panama Canal tolls, may be printed as a public document.

The PRESIDING OFFICER. Without objection, it is so ordered.

INDUSTRIAL COMBINATIONS (S. DOC. NO. 449).

Mr. BRANDEGEE. I send to the desk an address by George W. Wickersham, late Attorney General, delivered before the American Academy of Political and Social Science, on the subject of the relation of the Federal Government to industrial combinations. The address was delivered in Philadelphia on the 26th of February of this year. Inasmuch as it treats of subjects that are now pending before both Houses of Congress and furnishes valuable information thereupon, I ask to have it printed as a public document.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

RECIPROCITY WITH CANADA.

Mr. LODGE. Mr. President, I desire to have printed as a public document the pamphlet which I send to the desk. It is an historical review of our various attempts at reciprocity with Canada, written by Mr. Edward Stanwood and taken from the proceedings of the Massachusetts Historical Society. It is a very valuable and compact statement on an interesting and important subject. I ask that it may be referred to the Committee on Printing, with a view to having it printed as a public document.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. Latta, executive clerk, announced that the President had approved and signed the following acts:

March 13, 1914:

S. 3742. An act to authorize the Hudson River Connecting Railroad Corporation to construct a bridge across the Hudson River in the State of New York.

March 14, 1914:

S. 3206. An act for the protection of the water supply of the city of Baker, a municipal corporation of the State of Oregon.

S. J. Res. 90. Joint resolution to continue in effect the provisions of the act of March 9, 1906 (Stat. L., vol. 34, p. 56).

HOUSE BILL REFERRED.

H. R. 13679. An act making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1915, was read twice by its title and referred to the Committee on Agriculture and Forestry.

EMPLOYMENT OF ADDITIONAL CLERK.

Mr. BANKHEAD. I ask unanimous consent for the present consideration of Senate resolution 285. It will take but a minute to dispose of it.

The PRESIDING OFFICER. Is there objection?

Mr. SMOOT. Let it be read.

The PRESIDING OFFICER. The Secretary will read the resolution.

The resolution (S. Res. 285) reported by Mr. WILLIAMS from the Committee to Audit and Control the Contingent Expenses of the Senate on the 6th instant, was read, considered by unanimous consent, and agreed to, as follows:

*Resolved*, That the chairman of the Senate Committee on Post Offices and Post Roads is hereby authorized to employ temporarily a clerk at a salary of $120 per month.

INSPECTION AND GRADING OF GRAIN.

Mr. McCUMBER. I ask that Senate bill 120 be laid before the Senate.

The PRESIDING OFFICER. The Chair lays the bill before the Senate.

The SECRETARY. A bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce, and to secure uniformity in standards and classification of grain, and for other purposes.

Mr. GALLINGER. Mr. President, if the Senator will permit me——

Mr. McCUMBER. I yield.

Mr. GALLINGER. The Senator has been very patient, and I am glad that an opportunity offers when he may complete his interesting speech on an interesting subject. I wish to make the suggestion, however, that in the near future we ought to take up the calendar and go through it once more. I address myself to the other side of the Chamber. I trust some Senator of the majority has that matter in charge, and that it will not be neglected much longer. That is all I care to say about it.

Mr. McCUMBER. I will state that probably there is no bill that has been on the calendar longer than the bill to which I shall now address myself. It has been on the calendar, off and on, for the past dozen years, and I am seeking to get it to final consideration.

Mr. McCUMBER. Before proceeding from the point at which I left off in my discussion of this subject some days ago, I wish to correct an erroneous idea that seems to be in the minds of so many Senators, an idea that has been promulgated by several boards of trade and merchants' exchanges throughout the country, to the effect that the bill now before the Senate is one that would require inspection at every point where grain is shipped from one State to another. I want to correct that impression and make my statement as forcible as it is possible to make it. The bill contemplates nothing of the kind. The bill contemplates inspection only at those great grain centers where inspection is now carried on.

I can ship a carload of grain from any point in my State to any point in the State of Minnesota without any Federal or State inspection, and can sell it as such without such inspection to-day, unless it be sent to one of the two great grain centers in Minnesota—Minneapolis and Duluth. If it gotes to either of those grain centers, it must be inspected under the State law. This bill does not change the present method in the slightest degree. In fact, it provides to the contrary as clearly as it is possible to express it; first, by enumeration of the cities where it will be in operation; and second, by a direction to the Secretary of Agriculture that he shall designate such other important grain centers as seem to him to be just and proper under all of the circumstances.

Senators are receiving letters which I can easily discern have been influenced by statements from boards of trade that it will be necessary for any man buying, for instance, a carload of grain from some place in Vermont to send somewhere for a Government inspector to inspect it before he is able to unload it. This is not the case. The bill provides inspectors only at certain places. It may be possible, and I think it is, that the bill is not as clear and explicit as it should be in stating that the inspection is to be done at those places, and those places only; but I have already prepared two amendments to make that so definite that no one can possibly misunderstand it.

My discussion so far has consisted for the most part of quotations from the evidence taken at the hearings on this bill. My reason for following that course is that my own statements would be but mere declarations or conclusions, the accuracy of which any Senator might question; but when I produce the evidence itself, which happily for this case in every instance is direct and conclusive, and furnishes its own argument, no Senator can then deny at least the reliability of the statements I make.

It has been stated that there is no general demand for legislation of this kind. I can show that there is scarcely a State in the Union the majority of whose people affected by the grain trade are not strongly and earnestly in favor of this legislation. This is especially true as to every miller throughout the country; and there is not a milling paper in the United States that I know of, representing the sentiment of the buyers of wheat and corn and other milling cereals, which has not again and again, throughout all of these years, been demanding Government supervision, Government inspection, and Government fixing of grades.

I can possibly make that as clear by reading a very late editorial from the Modern Miller, published in the city of Chicago, as I can in any other way. I have been speaking for some time about the methods of dealing in grain at that city; and possibly the Modern Miller is as closely connected with the wheat-buying business as anyone could be. I want to give the expression of this independent paper upon that subject. I shall not read all of the editorial. It is in the issue of February 7, 1914, of the Modern Miller. It begins in this way:

FEDERAL INSPECTION AND GRADING.

Federal inspection and grading of grain, which has been the trend for several years, and freely predicted by the Modern Miller as the ultimate outcome of means for correction in the grain trade, is close at hand. Senator McCUMBER'S bill for Federal inspection and weighing was recommended this week by the Senate Committee on Agriculture, and, it is understood, has the support of the Department of Agriculture.

Then, omitting the part which simply describes what the bill provides, I will give the conclusion:

This is the general import of the McCumber bill. Senator McCUMBER is a Republican, and it is possible the opposition will invoke Democratic Members to hinder the passage, but the time has come for Federal inspection and it will find favor generally with millers, although there may be features that need shaping. This has reference, of course, only to interstate trade. The fixing of grades by a Federal law will eliminate a host of abuses that have existed indefinitely under State and board of trade inspection. Undoubtedly many grain dealers will find it interferes with customs that were time-honored and profitable, but eventually it will be to the advantage of the better class of grain merchants, and after due course it will be hard to find an advocate of half-hearted inspection and "liberal" grading. After much agitation and undoubtedly much improvement in grain-trade methods, there are yet

undesirable practices which the exchanges and State inspection have failed to correct.

There is no use of standing in the path of progress in the grain trade, but considerable need of shaping the proposed new law to eliminate any unnecessary red tape. We believe that there are good grain inspectors in practically all of the principal grain markets of the country, but such grain inspectors need the support of a Federal statute. To-day there are markets where the range in price of grades, officially quoted, tells the story of the necessity for Federal action. The abuses of the past are an indictment against existing methods and, after all, exchanges are organized to develop the most efficient commercial methods. When a miller buys wheat of a grade, he should be assured that delivery is in accordance with contract. The buying of futures for milling purposes should have some meaning under Federal jurisdiction besides merely speculative protection; it should include the assurance of delivery of milling supplies.

There will be opposition from the grain trade, and this opposition is in itself wholesome to eliminate any errors in the bill. But the general purpose of this legislation is based on years of demand for betterment that was impossible under State or exchange grades and inspection. The result will be uniformity in grain grading, efficiency in inspection, and finally the elimination of many, many practices that it would serve no good purpose to enumerate here.

Mr. President, the view of the entire milling trade of the United States is expressed in this editorial. I know there are a few millers who may be afraid of national inspection. I have traced the objections of the very few, and I have ascertained that those few reside in those States where they have been compelled to purchase under State inspection; and, feeling that State inspection has had so much politics in it that it has deprived them of their ability to purchase the grain they have attempted to purchase, they have feared that Government inspection would likewise be open to the same charge of political influence. Now, if we can eliminate that idea from their minds we will find that even those few would have no legitimate excuse against Government inspection at all the great terminal points.

Mr. President, the editorial just read is from one of the great milling papers in the United States. Another magazine published for the milling trade is the Operative Miller. I wish now to quote a letter received from the editor of that paper. It is dated February 5, 1914. In this letter the writer says:

We hail with much satisfaction the favorable recommendation of your bill to regulate and standardize all grains. Such standardization and inspection of wheat for the protection of the miller and his product—flour—is something which the Operative Miller has,, with the support of the best millers of this country, been fighting for, editorially and otherwise, for a number of years. We are this day writing a number of prominent millers for an expression of opinion on your bill, and will be glad to aid in any way in our power.

In addition to this, Mr. President, I have reports from hundreds of different mills in the United States, each voicing exactly the same sentiment. If, therefore, the great milling interest and those who are the ultimate consumers of the raw product agree unanimously in the verdict that the present system is bad and agree that it would be remedied by the system for which I invoke the consideration of the Senate, it seems to me that we ought, as representative of the best interests of the country, the consumers and the producers, to join in attempting to secure them the relief which they so urgently request.

The next great interest, Mr. President, is that of the small wheat buyer and seller of wheat, the country elevators, the farmers' elevators. This gets a little nearer the producer. I find everywhere the same desire for Federal inspection, and practically upon the same grounds. The local man buying at an independent elevator makes this complaint. He says, "I can put no dependence whatever in the grade that I will receive at the great terminals. They have in those terminals a system of loose and rigid inspection, and when I send a car to those terminals I never know which rule is going to be applied. Therefore, to be on the safe side, I must always undergrade the grain a little. I must resolve every doubt against the farmer in order to protect myself against the uncertainty of grades at the terminals."

Here is a letter to which I call the attention of the Senator from Nebraska [Mr. NORRIS]. It is from the secretary of the Nebraska Farmers' Cooperative Grain and Livestock Association. It is dated Hampton, Nebr., January 29, 1914, addressed to me, and it reads as follows:

On behalf of the farmers' elevator companies of seven States of the Mississippi Valley—

I call attention to the fact that in this organization are represented seven of those States, all great agricultural States—

I am interested in assisting to bring about the Federal inspection of grain. This makes me interested in the bill you now have pending in the Congress.

* * * * * * *

We farmers' elevator people desire to assist in the passing of a bill for Federal inspection of grain at this session, if we can do so in any way.

I am reading only a portion of these letters.

Now, I wish to go on with some quotations from the evidence itself. I stated the other day to the Senator from Missouri [Mr. REED] that the St. Louis Board of Trade had finally come around to the conclusion that they need Federal inspection for their own protection. I desire to call attention to the evidence submitted upon that point. It is important not only as disclosing the desire of this board of trade but also the reasons that are back of the new change of front in asking on the part of that board for Federal inspection. I am taking the statement of Mr. T. R. Ballard, of St. Louis, Mo.:

Mr. BALLARD. Mr. Chairman, in the first place we are very peculiarly situated. The St. Louis market is under the supervision and inspection and control of two State departments. All the grain coming there is received for the St. Louis market either in East St. Louis or in St. Louis proper. Everything coming to East St. Louis is inspected by the State department of Illinois, and everything coming to St. Louis proper is inspected by the State inspection department of our own State. There is a more or less conflicting condition all the time. Kansas City is situated practically the same way. However, I do not know how they get along.

Senator PERKINS. May I ask if your State law makes it mandatory to have all grain inspected?

Mr. BALLARD. Only the grain at the public elevators. When Senator MCCUMBER'S bill was presented to us we called a meeting of the grain receivers and elevator men to discuss it; and after a thorough discussion a committee was appointed to draft the resolutions that were presented to the board of directors of the Merchants' Exchange, which were passed, and which I will leave with the committee.

I will quote only a portion of the resolution, by paragraphs:

That the uniform and correct grading of grain and the accurate weighing of same in the United States are not only highly desirable but essential to the continued welfare and growth of our foreign and domestic trade, and can best be secured by Federal control of the inspection and weighing.

I will say to the Senator from Illinois [Mr. SHERMAN] that this comes from the St. Louis board. It is their own resolution:

That the Merchants' Exchange of St. Louis favors the enactment by the United States Congress of such laws as will place the inspection and weighing of grain under Federal control, under such conditions as will insure (1) uniformity of grading, so far as practicable; (2) the preservation of the individuality and the interests of the various markets which have been built up by their own efforts; (3) a square deal to all concerned.

Mr. President, this resolution could not have more accurately described the purposes of the bill as indicated in its language, first, a uniformity of grades, so that the same grain may be inspected in the same way and by the same method and the same rules, no matter to what center it is shipped; and, secondly, that the inspection may be honestly done, that there may be no loose and rigid rules that may change overnight. That is all that is sought by this bill.

Again, the resolution says:

SEC. 2. That the chief grain inspector and his assistants shall be expert judges of grain and shall pass a satisfactory examination as to their qualifications in this respect before being appointed.

That is provided in this bill—a method of securing accuracy of inspection. Again:

SEC. 3. The said inspectors shall give a good and sufficient bond for the faithful performance of their duties.

That may be provided in the bill or by the rules. Certainly, a bond should be required in every instance.

SEC. 5. That when it is proposed to modify or change any classification or grade a day shall be fixed for a public hearing, at which any person concerned in the proposed modification or change may be heard, and that at least 10 days' public notice shall be given of the time and place of said hearing; and that if after said hearing it is decided to make the proposed modifications or change, at least 60 days' public notice shall be given of the date when said modification or change shall become effective.

I have never thought that that was essential to put into the bill itself, because I assume that under the terms of the bill which require the department to take these exchanges as they now stand, and to make no changes except after they have fully investigated the subject, the rules which the department would apply would accomplish that result; that nothing would be done in a hurried manner, and that the changes would be made gradually and in a way not to interfere with the trade or business in wheat dealing.

I wish, Mr. President, to quote further from Mr. Ballard's testimony. Here is a letter Mr. Ballard received from the Modern Miller and which he puts into the evidence. It says:

[The Modern Miller.]

ST. LOUIS, MO., *March 28, 1913.*

Mr. T. R. BALLARD,
*Merchants' Exchange, St. Louis, Mo.*

DEAR SIR: I wish to call your attention to an effort made by this publication in September, 1906, to ascertain the percentage of prominent millers throughout the milling States of the United States who are in favor of Federal inspection of grain. We sent out several hundred circulars to the best-known millers in the trade, and of the replies received 61 per cent of the millers favored national grain inspection, 24 per cent were against it, and 15 per cent were undecided or did not care to express an opinion.

I wrote to the Modern Miller to obtain the answers that were given by these 24 per cent, to see what the objections were, and ascertained that they were all based upon the same idea, that there would be danger of having the grades influenced by

politics, and they cited the troubles that they were having under State inspection laws, charging that the State inspection system was nothing but a political machine. Undoubtedly if that 24 per cent had understood what is the real purpose of the bill—to get rid of politics in the inspection department—they would all have earnestly supported it.

I again quote from the testimony of Mr. Ballard. He says:

Mr. BALLARD. I believe that national inspection would have many advantages over State inspection, for the reason that it would be uniform and under civil-service reform. If the men all understood their business, a great many of the difficulties that now obtain would be removed. I believe that a warehouse receipt issued by authority of the United States Government would be as good in the bank where men want to carry their grain for money as any other security.

Now, this is the statement of a man who for 30 years has been engaged in the grain business. I regret exceedingly, Mr. President, that those Senators who have been so opposed to the bill are not present to hear this testimony read. I can not but feel that if they would give attention to the evidence which was produced rather than the letters of opposition which they have received from these boards of trade, every one of them would come to the conclusion that no harm could result to any honest business in any city by having Federal inspection and that an immense amount of good could result to all the producers and consumers throughout the country.

I am not criticizing those who live in the atmosphere of these boards of trade—we absorb the sentiments that are extant in our surroundings—but if we could get those Senators to come out of that influence for a while and listen to the testimony itself, I can not but feel that, as thinking men, men desirous of doing the right thing by the public, they would change their views upon this matter. I again quote from Mr. Ballard:

Mr. BALLARD. We feel that to have the grain of the United States graded under one system of inspection would be much better than to have State inspection in each different State where they now have state inspection, and the inspection that exists in other places where it is under the board of trade rules. There are only a few States, I believe, that have control of it. Evidently, it would be a great benefit to the export trade to have the Government stamp on warehouse receipts showing that a certain cargo of wheat or corn inspected was No. 2 or No. 3, or whatever it may be; and it would go a long way toward renewing the confidence that has been lost.

That certainly is true, Mr. President. There is lack of confidence in the purchase of grain in every one of these centers. Chicago may have a system that is perfect, and we may have confidence in it to-day. A month from to-day we may lose that confidence. So this matter of confidence and lack of confidence seems to shift from month to month and from day to day between different sections of the country as they modify the rules.

I wish now to call attention to the testimony of another gentleman from Missouri, who is connected with the board of trade there and who is a grain dealer.

Mr. GRONNA. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to his colleague?

Mr. McCUMBER. I yield.

Mr. GRONNA. Before my colleague takes up that question, I want, if he will permit me, to read briefly from the report made by Consul General Robert P. Skinner.

Mr. McCUMBER. I will state to the Senator that I purpose to quote that testimony, in connection with the statements of other consuls, before I conclude my remarks, so that I may have the testimony on that subject all together, if it will be just as agreeable to my colleague for me to do so.

Mr. GRONNA. That will be perfectly agreeable. I simply wanted to remind my colleague that there are reports which show that the Europeans and other countries have discriminated against our grain because our inspection is not uniform.

Mr. McCUMBER. The Senator is speaking with accuracy upon that point.

I now quote from the testimony of Mr. Teasdale:

Mr. TEASDALE. I simply want to say, gentlemen, that there has been a good deal said here in apparent derogation of boards of trade and merchants' exchanges, and that they are not all of them as black as they have been painted. At least, the St. Louis Merchants' Exchange stands for a square deal for everybody. They have evidenced that by coming out flat-footed for Federal inspection, because they think it is going to remedy and do away with some of the abuses that undoubtedly do exist in the grain business to-day.

That is the representative of one of the systems of grain grading.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Missouri?

Mr. McCUMBER. I yield to the Senator.

Mr. REED. Is the Senator from North Dakota aware of the fact that the exchange he has just spoken of has passed resolutions opposing this legislation?

Mr. McCUMBER. I quoted that resolution while the Senator was out of the Chamber. I have been dealing with St. Louis for some time; and I have just completed reading the resolutions of the Merchants' Exchange of St. Louis.

Mr. REED. I thought the Senator had just read a statement that that board was in favor of the proposed legislation.

Mr. McCUMBER. No; this statement declares that they were flat-footed in favor of Federal inspection.

Mr. REED. It is very evident, Mr. President, that either I do not understand the Senator from North Dakota or that he does not understand me.

Mr. McCUMBER. Possibly I misunderstand the Senator.

Mr. REED. I asked the Senator if it was not a fact that the St. Louis Board of Trade had passed resolutions against this legislation.

Mr. McCUMBER. How long ago, may I ask the Senator from Missouri?

Mr. REED. My understanding is, within the last three or four months.

Mr. McCUMBER. It is rather difficult for me to keep up, Mr. President, with all of these resolutions. The St. Louis exchange first passed a resolution against this legislation, and then they passed another resolution in favor of it. Then afterwards, as the Senator from Missouri says, they may have passed another resolution against it. Well, I think I can explain that. I do not think any of these boards of trade are acting in this matter in a disinterested way. They are in favor of such legislation as this whenever the rules are such at another center of trade through, we will say, a liberal inspection, that the trade is taken away from St. Louis, and they are against it whenever they are getting the better of the situation. I have found that to be the case as to several of these exchanges, but I have just completed reading a resolution which was adopted by the same exchange in favor of such legislation.

Mr. REED. Of what date?

Mr. McCUMBER. In 1908.

Mr. REED. That is some time ago.

Mr. McCUMBER. That is quite a while ago, I will admit that.

Mr. GRONNA. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to his colleague?

Mr. McCUMBER. I yield.

Mr. GRONNA. I want to ask my colleague a question, and that is, if he has ever received a protest from farmers or from farmers' organizations against the passage of this bill?

Mr. McCUMBER. No, Mr. President; I have never received a protest from a farmers' organization against the passage of the bill. Every farmers' organization has been in favor of it, every milling association has been in favor of it, and every independent grain-buyers' association has been in favor of it. So it simply comes down to a question of a few of these great grain-buying centers—the few as against the hundreds and thousands and millions that are interested in the grain trade.

Mr. GRONNA. If my colleague will permit me further, I want to add to what he has just stated that I have received many hundreds of letters and telegrams from farmers all over this country asking that this bill be passed, or a bill similar to this, giving the Federal authorities the right to inspect all sorts of grain. This is nothing new. Canada has had such a law for many years, and I shall later on, with the consent of the Senate, touch upon that question, but I do not want to take up the time of my colleague to do so now.

Mr. McCUMBER. And I might add that by reason of the Canadian law their grain brings considerably more than the American grain in the markets.

Mr. GRONNA. And of the same grade.

Mr. McCUMBER. Yes; because of the confidence in the Canadian grades.

Mr. REED. Mr. President, if the Senator will pardon me just this one statement, the statement of both of the Senators from North Dakota has been very broad and sweeping with reference to the lack of opposition to this bill and with reference to the point from which opposition appears. I simply desire to say that at the proper time I think I shall be able to convince the Senate that there is some very substantial opposition, which is not a selfish opposition, except in the sense that the parties are interested, as, indeed, I presume the farmers are interested. I have no desire, however, to trench on the Senator's time further than to make that statement.

Mr. McCUMBER. Let me say to the Senator now that I think the grain trade, which a few years ago universally condemned any attempt to secure uniformity of grading, has now crossed that bridge, and has come out, so far as I know now, for a uniform Federal standard of grading. So we see now that it has gone that far. I am addressing myself to the Senator from Missouri. This bill seeks that which now it has agreed to.

It further seeks to obtain honest inspection—an inspection certificate that will be received by the trade with confidence. Does the Senator from Missouri agree with me that such a certificate would be beneficial to the trade? I think that I can answer for him that he does agree to that. Then I would ask the Senator if he believes that such a certificate would be beneficial to the trade? Does he believe that it would be impossible to secure such a result by legislation?

Mr. REED. As the Senator from North Dakota appears to be addressing me personally, I will say that I only asked him the question I did at this time because I did not want the Senator to proceed upon the theory that the Board of Trade of St. Louis was favoring this bill. I am not prepared to say absolutely that I have their resolutions to the contrary; I have such a number of resolutions that I may be in error; but I think I have such resolutions.

Now, the Senator lays down a premise and asks me what I think of it, and answers the question for himself. He then proceeds to the next proposition, and asks another question based upon that assumed premise. The fact of the matter is that everybody will understand that there is some advantage, if we could have it, in having a grading of grain which would be the same thing in all the markets of the world. We will all agree that an honest inspection and an honest grading is a good thing, and that there are advantages springing from an honest grading and from an honest standard; but it does not follow from that that we should take away from the States of this Union and from the commercial centers of the Union the right to deal and traffic in grain, and that we should turn the power of inspection and control over to the Federal Government.

I might follow that up, but I do not desire to trench upon the Senator's time. I might say that it would be a very excellent thing indeed if all the potatoes and all the carrots and all the onions and all the beets and all the cabbages of the world could be graded so that every man who bought a cabbage or any of these articles would know just what he was getting; but between the present conditions and the adoption of such a system there are a good many objections. The objection I see to the Senator's bill is that it proposes to assume another power by the Federal Government which it is not necessary for the Federal Government to assume; it is another movement in the direction of concentration; it is another step toward the taking away from the States the right to control their own business and the affairs of their own people; it is another step toward the ruling of this country by a Federal bureaucracy.

I think I can demonstrate when the time comes that it will vastly increase the cost of inspection; I think I can demonstrate when the time comes that it is utterly unnecessary to have a Federal inspection; and I believe I can demonstrate to an exact nicety that the great arch supporting this bill, the arch of logic and of fact which the Senator has erected, is altogether a mistake, and that the claim that there is wholesale fraud perpetrated is an error.

I did not mean to interrupt the Senator, but I think it is fair to him to say that I shall contend for those things, and at the proper time will address myself to them.

Mr. McCUMBER. Mr. President, I wanted to get the Senator's opinion, first, as to whether or not he believed that a certification of a grade that would give confidence to the seller and the buyer of grain would be beneficial to the trade. I think he has answered that in the affirmative. I then asked him whether or not he believed that we could pass legislation that would secure that result. That portion of my question was not answered. On the contrary, the Senator falls back upon the proposition that under this bill the Federal Government is seeking to obtain more power to the detriment of the States. I could answer the Senator by saying that some of the State railroad commissions felt at one time that they could handle the question of freight rates and matters of that kind very much better than could the Federal Government; but, nevertheless, we enacted a law which provided for an Interstate Commerce Commission, giving the General Government full control over the fixing of rates and the control of all commerce over our railways in interstate traffic, and that has been most beneficial to the country in general.

The Senator also thinks that each State should be allowed to have its own laws in reference to the handling of its own grain. Well, Mr. President, if we were to stop there, there would not be the slightest difference between the Senator from Missouri and myself; but Iowa does not sell her grain in the State of Iowa; she is obliged to sell it in Chicago, the great terminal; North Dakota and South Dakota do not sell their enormous surplus of grain within their respective borders; that grain must find its final market and must receive its price according to a certificate that is placed upon it in Minneapolis or Duluth or Superior or Buffalo or Chicago. We have no control, no voice in determining how it may be handled; and, inasmuch as those centers which fix the rules are themselves interested in the buying and selling of grain, it is most natural that their rules should conform to their own best interests, rather than to the interests of either the purchaser or of the ultimate consumer.

Mr. REED. Mr. President, I shall not interrupt the Senator unless he is quite willing that I should pursue this matter——

Mr. McCUMBER. I am quite willing to yield to the Senator for a question or a short statement.

Mr. REED. Because in the midst of his address it would not be fair to break in; but if it be entirely agreeable to him, I would say that the question of whether we did a wise and prudent thing when we set up the Interstate Commerce Commission, to the exclusion in any respect of the rights of the State boards, is a question which might well be debated and which will always be a subject of debate. So long as the Interstate Commerce Commission will permit one class of freight to be shipped from New York to Minneapolis and St. Paul for 80 cents a hundred and charge $1.60 to Kansas City, which is only 47½ miles farther haul; so long as they will permit goods to be hauled through the city of Denver clear to the Pacific coast and shipped back to Denver at a less rate than they can be shipped directly to Denver; and so long as that condition exists with reference to many other cities we may well question the infallibility of this commission, which just at present is riding the wave of popularity.

Now, with reference to the other subject, which is a very much more pertinent one, the Senator states that the people of his State must sell their grain in Chicago or in some other city outside of the borders of North Dakota, and that they sell it in an interested market. The State authorities inspect this grain, not the purchaser; and I hold that it will be found to be true that the officers of a State are just as likely to be honest, just as likely to be efficient, just as likely to be fair between the purchaser and the seller as are the officers of the Federal Government; nay, more, I think they are likely to be more efficient and more honest. Then I remark, in the next place, that if the States of North and South Dakota are not satisfied with the inspection which they receive in Chicago or elsewhere, it is easy enough for them to establish a State grain-inspection department of their own, to grade their own grains, and to sell their grains upon the certificate of their own State inspectors.

Mr. McCUMBER. I am sorry the Senator made that last statement, because it shows how little he understands the grain trade and the movement of grain from the great agricultural States where it is produced to the great centers of trade where it seeks its market.

I should like to know under what kind of a system the State of North Dakota could grade its grain which does not go to any one center, which crosses the State line at hundreds of different places, and which passes from thousands of different stations, without having such an enormous expense that the grain itself could not stand the weight of it. Then, again, if that were possible, I should like to know how we could enforce our grades upon those States at the great terminals where it is disposed of. Why, Mr. President, they would simply laugh at our grades. They would say, "We grade this grain. It is sold in our State, and we will grade it in whatever way we see fit."

The Senator proposes an impossibility.

Mr. REED. Mr. President, I do not think I do anything of the kind. If grain is shipped to Kansas City—and Kansas City is quite a grain market—it is graded there, at Kansas City, by the State grain-inspection department of the State of Missouri; and if the grain merchants of Kansas City want to sell that grain again they sell it on the Kansas City inspection.

Mr. McCUMBER. To which Kansas City does the Senator refer—Kansas City, Kans., or Kansas City, Mo.?

Mr. REED. I am speaking of Kansas City, Mo., where the market is.

Mr. McCUMBER. All right.

Mr. REED. They sell it on that inspection. They sell so many thousand bushels of wheat of such and such a grade, Kansas City inspection. That grain may go to Chicago. It is sold according to the grades at Kansas City and not according to the Chicago grades.

Mr. McCUMBER. The Senator is mistaken there.

Mr. REED. It may go to Europe and be sold in the same way.

Mr. McCUMBER. Oh, the Senator is mistaken.

Mr. REED. I think not.

Mr. McCUMBER. He certainly is.

Mr. REED. The Senator paid me the compliment of intimating that I was utterly ignorant about this question, and I

may be, but I think I was warranted in making the statement I did. If the States of North and South Dakota were to inspect their grain and grade it, and if the man who had bought that grain or the man who sold it had agreed upon that inspection, and delivery was made according to that inspection, the contract would be fulfilled.

The practicability of inspecting the grain leaving those States seems to me to be a question easily answered. There is nothing mysterious about inspecting grain. The grain has to leave the State over a few railroads, and it could be inspected by State authorities in transit. It is not necessary to unload it.

It seems to me the Senator's fundamental fallacy is that he seems to assume as a primary fact that the Federal Government can do things better than they are done anywhere else, and that therefore the Federal Government ought to do everything.

Mr. McCUMBER. Mr. President, if the Senator will not lay down so many propositions that I can not remember them, I will try to answer each one of them specifically.

The Senator says there would be no trouble at all for North Dakota or South Dakota to inspect its own grain as it passes over the line. Suppose there is a train scheduled to pass between certain points on a railway at certain hours. It contains 40 carloads of grain. We will stop that entire train at the border to inspect 40 carloads of grain, and we will stop another train that may have 60 carloads upon it. Why, the Senator can easily see that we would be spending days, sometimes, in holding up a train in order that we might inspect it. He will understand, also, that after that grain reached Minneapolis, after we had inspected it, the Warehouse Commission of the State of Minnesota would take hold of it, and it would have to be sold in that city not under the North Dakota grade, but under the Minnesota grade, because it would have to be handled entirely by that system. Linked together as they are, owning the elevators and owning the facilities for handling grain, of course they would handle the grain only under their own State inspection.

That answers both of these propositions, and will answer them to anyone who has made any study of the marketing of grain.

Again, the Senator says that we would have just as honest an inspection under State control as we would under Federal control. We are not going to change men's natures by law; we are not going to make a man honest by law; but you very often keep a man in the path of integrity by taking away temptation. In fact, you generally do.

If the Senator has a carload of grain to sell, and I am the one who is to handle it—and the only person to whom he can sell that grain—and I have certain rules under which I will buy it, and I appoint the inspector, that inspector would be rather liable to favor me, and not the Senator from Missouri. He would be more liable, in fact, because he would be under my control, and he would desire as much as possible to make his inspection conform to my interest. That is all.

Mr. REED. But, Mr. President, the trouble with that statement is that it is not based at all upon the conditions. Of course, if I sell the Senator a carload of wheat, and he sends out his hired man to inspect it, the hired man would be very liable to incline toward one of the Dakotas, in his judgment. When, however, a trainload of grain comes to a market, part of the cars coming from Dakota, part of them from Kansas City, part of them from Nebraska, part of them from Montana, and so on, and the State officer, who represents nobody except the State, grades that grain, he does not even know who is going to get it. He does not even know, necessarily, into what elevator it is going. He is simply sent out to grade it. It may be that a man of that State will buy it. It may be that a man from Chicago will buy it. It may be that a man in Europe will buy it. Unless he is absolutely corrupt, unless the Senator is willing to characterize him as a man willing to take a bribe and to do a corrupt thing, you get his honest judgment under those circumstances. You get just as honest a judgment, and there is just as little opportunity for crooked work, as if he happened to hold his commission from the Federal Government.

Mr. McCUMBER. I suppose there would be no use in my telling the Senator from Missouri that under the State and these exchange inspections—and remember that there are but a few State inspections, even if the Senator were correct, but nearly all the inspection is under boards of trade or chambers of commerce, who hire their own men to do their own grading—even in those cases where there is State inspection the inspection department is under the influence and control, and the persons appointed are appointed under the influence of the men who do the buying, or else all the testimony from the men who are themselves members of those boards, and who have an opportunity to know, is erroneous. I am quoting the testimony of men from the St. Louis Merchants' Exchange who say they are so influenced, who say they do have a system of loose and rigid inspection at different seasons and times, and that it is under the influence of the members who deal in grain. Unless I can say that all that is merely manufactured testimony, I must assume that there is reason for their statements and some truth as the basis of it.

Mr. REED. In what year were those hearings had?

Mr. McCUMBER. Oh, they have been having them along from 1900 to 1908 and 1912. The last one was in 1912.

Mr. REED. Of course I do not care to go back and discuss conditions that might have existed 10 or 12 years ago, but for many years I have personally known every member of the State warehouse and railroad commission of the State of Missouri. For many years they have not been of the same political faith. It has been a real bipartisan board, because this difference of politics occurred through elections by the people. The boards have been composed of men of the highest honor. For many years one of the men at the head of that board has been Col. John A. Knott, the editor of a very responsible newspaper in my State and a man of as keen sense of honor as any man who sits in the Senate of the United States. They have appointed their inspectors and other officers, not from the city of St. Louis and not from the city of Kansas City, but generally——

Mr. McCUMBER. I want to say to the Senator that I will yield for a discussion of the merits of the bill in any possible way——

Mr. REED. Will the Senator let me finish this one statement?

Mr. McCUMBER. But I can not yield for the purpose of a eulogy upon individuals.

Mr. REED. I am not eulogizing individuals; but the Senator has made a very broad statement here which impugns the honor of the board of railroad commissioners of my own State. I want to say now that I know those men personally, and I know to a large extent their inspectors. They are not picked by the boards of trade. I utterly repudiate and deny that statement. If there were any criticism to be passed, it would be upon the line that they were picked for political reasons, and they are picked from the people out through the State, a few of them, of course, coming from towns. I undertake to say that there is not a single man working for the board of railroad and warehouse commissioners who was selected by a single board of trade in the State of Missouri.

Mr. McCUMBER. Mr. President, I have not found a Senator yet who has come from these great grain centers who has not been imbued with the same idea as the Senator from Missouri, namely, that there seems to be an aura of holiness surrounding these boards of exchange. Now, possibly that may be true in the minds of the Senators from those particular localities; but I think I shall be able to show from this evidence that there are some dark spots upon the disk of this aura of purity surrounding all of these boards of trade.

I am not making statements as against the integrity of the members of the boards. I simply say the system is wrong, the system is susceptible of abuse, and the system is abused. That is the overwhelming testimony that was received by the committee.

I shall proceed now to read a little further from the testimony of a member of the St. Louis board. I think he is still a member of that board.

Mr. REED. Will the Senator kindly put the page in the RECORD?

Mr. McCUMBER. Page 114 of the Federal grain hearings. He says:

> One of those abuses is the nonuniformity of the grading of grain in this country.

Right here, however, before I read that, I wish to correct another statement, made by the Senator from Missouri, that I forgot, in which he assumes that a carload of grain graded in Kansas City, Mo., if it goes to Chicago, Ill., is sold under the Missouri inspection. The Senator certainly is in error upon that point. He will find that everything sold in Chicago is sold under the Chicago inspection. If this carload, certified as No. 2 red winter wheat at Kansas City, reaches Chicago, though it may not have been unloaded from the car, it may be inspected again in Chicago as No. 4. It is then sold in Chicago upon the No. 4 grade in Chicago, under the Chicago rules. It may then be sent down to Memphis and be inspected again under the exchange method down there as No. 3. It may then be sent down to New Orleans without unloading, and it will have the New Orleans inspection, which may be no grade at all. Then it may be taken at New Orleans and shipped from there to Liverpool and given an inspection as No. 1 or No. 2, and sold upon those grades. The Senator will find that the

grade in one State is not recognized in the sale at any one of these terminals in another State.

Mr. SHERMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Illinois?

Mr. McCUMBER. I do.

Mr. SHERMAN. Does the Senator think that is the result of an honest difference of opinion or of a dishonest manipulation of the grain?

Mr. McCUMBER. I will admit that it may be ordinarily an honest difference of opinion, but if we had Federal inspection under this bill this carload would remain under the same certificate that was attached to it in Kansas City. It would not have to be regraded again in Chicago, regraded again in Memphis under another system, and regraded in New Orleans under still another system, but it would carry the same certificate until it was unloaded and mixed with other grain.

Mr. SHERMAN. It would still be the same carload of grain, however.

Mr. McCUMBER. Yes, Mr. President, it would still be the same carload of grain, but in one instance, under the present system, it would be sold as No. 1, which has a certain price, and in another place as No. 3 red, which would have an entirely different value, and in another place as something else. Now, if you bought all these by samples there would be no necessity of any inspection in the State or otherwise, but the purchasers do not purchase by samples. All the business is carried on by grades, and the grade fixes the value. Therefore that grade ought to be certain upon the identical wheat, no matter in what place it is sold.

## WOMAN SUFFRAGE.

The PRESIDING OFFICER. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The SECRETARY. A joint resolution (S. J. Res. 1) proposing an amendment to the Constitution of the United States extending the right of suffrage to women.

Mr. KERN. Mr. President, I have just received in the last minute or two the following message:

INDIANAPOLIS, IND., *March 16, 1914.*

Senator JOHN W. KERN,
*Washington, D. C.:*

Woman's Franchise League of Indiana desires vote on suffrage amendment at close of debate.

AMELIA R. KELLER, *President.*

In view of that I present a unanimous-consent agreement, and I hope it will be agreed to.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Indiana yield to the Senator from Utah?

Mr. KERN. I do.

Mr. SMOOT. I ask the Senator not to present the unanimous-consent agreement at this time, for this reason: The Senator from Colorado [Mr. THOMAS] is absent from the city. I believe that the chairman of the Committee on Woman Suffrage ought to be here when the unanimous-consent agreement is considered. It is for that reason alone that I suggest to the Senator that he refrain from presenting it at this particular time.

Mr. KERN. When will the Senator from Colorado be likely to be present?

Mr. SMOOT. He will be here perhaps this afternoon, but surely to-morrow.

Mr. KERN. I withhold it for the present to see if he comes in this afternoon. I shall insist on some kind of an agreement, for several Senators have to go away on account of important business, myself and my colleague among the number. They should be here when it is voted on and I want the joint resolution voted on during this day, or else postponed until some definite day next week.

Mr. SMOOT. I am in full accord with the Senator in trying to secure a unanimous-consent agreement. I only want him to postpone the request until the Senator from Colorado is here.

Mr. KERN. I will withhold it for the present.

Mr. McCUMBER. I understand that the Senator from Louisiana [Mr. THORNTON] desires to speak upon the unfinished business, and that his address will be rather brief. I wish to state that at the close of his address I will go on, with the permission of the Senate, and finish the address that I am making upon the grain-inspection bill.

Mr. THORNTON. I do not wish to interrupt the continuity of the remarks of the Senator from North Dakota. It will not take more than 5 or 10 minutes to submit what I have to say, and I will be perfectly willing to have the unfinished business temporarily laid aside in order that the Senator from North Dakota may conclude his remarks.

Mr. McCUMBER. I will state to the Senator that it will probably take me considerably over an hour—it may be two hours—and therefore I wish to have the Senator go on, and I can proceed after he finishes.

Mr. THORNTON. Mr. President, after a continued illness of seven weeks I have neither the physical nor mental ability to speak on this subject in the manner its great importance demands, but I feel it due to myself as well as to the State I have the honor to represent in this body to protest, by voice as well as by vote, against what I consider an unwarranted and unjustifiable attack on one of her most important constitutional rights.

In fact, I am not able now to say much more than repeat what I said on this floor on July 31 last in presenting, by request, a petition from some Louisiana ladies asking for the passage of this resolution.

I said then I was opposed to the passage of the proposed amendment because the effect would be to deprive my State of the constitutional right in that respect she now enjoyed.

I said also that I had not the slightest objection to other States conferring the privilege of suffrage on their women if they so desired, but I was unalterably opposed to allowing other States to force the State of Louisiana to do so without reference to her own wishes in the matter.

I repeat now what I said then, and I believe now as then, that I as a citizen of Louisiana have no moral right to interfere with the determination of this question by the people of other States.

Those few words I then uttered seemed to attract more attention in some quarters than I had expected, for afterwards I was requested by different female antisuffragists to speak against woman suffrage generally in other States and also in this city.

I refused all of these requests, saying that I could not justify myself in doing so, as it would run counter not only to my convictions that this was a question that should be settled by the people of the respective States without outside interference but to the plain inference of my previous remarks in the Senate on July 31.

To the few remonstrances I received from Louisiana women against my position announced on this floor, and the request that I should reconsider it and vote for this resolution, I replied that under my convictions in regard to the rights of other States on this particular matter I could not so vote even if I was personally ever so much in favor of woman suffrage in Louisiana or elsewhere.

I have used these illustrations to show to my brother Senators that my subsequent course in this matter proved the sincerity of my previous utterance on it.

I now declare, and I mean it when I say it, because otherwise I could not say it, that if Louisiana was a woman-suffrage State and all of the white women in the State asked me to vote for this resolution, I would refuse to do it, because I could not do so without a gross disregard of a most vital and fundamental right of the other States of this Union.

The distinguished leader of the Democratic Party in the House of Representatives well said in that body on the 4th of February last:

> If the Democratic Party stands for one thing above all others in reference to local self-government, it is that the right of franchise should be governed by the States of the Union and not by the National Government.

That is an absolutely correct statement, and I marvel that Democratic Senators at least can consent to uphold by their votes the opposite view.

I wish to add further, that while in my judgment the denial of this principle through the adoption of this proposed amendment will have no good effect anywhere, I am absolutely certain that in the near future it will have a positively bad effect in many of the Southern States, including Louisiana, by adding to the perplexities of a problem connected with the suffrage that has long troubled them and will continue to trouble them for some time in the future.

This is a delicate subject that I do not propose to discuss more than to state my conclusion.

If these States are left in the enjoyment of their present constitutional rights in the matter of suffrage, they can grant the privilege to their women in the future if considered desirable without incurring the risk to which they will be subjected if it is forced on them in this way.

I do not believe that a single Southern State would deny the privilege of suffrage to its women whenever the white men of

that State know a majority of the respectable white women of the State desire that privilege.

In the name of the State of Louisiana I protest against the passage of a constitutional amendment which would deprive her of one of the most important, if not the most important, constitutional rights she now possesses, and I absolutely deny the moral right of any Senator of another State to seek by his vote on this resolution to deprive her of that right.

Mr. SMOOT. I ask that the unfinished business be temporarily laid aside.

The PRESIDING OFFICER (Mr. SHEPPARD in the chair). Without objection, it is so ordered.

INSPECTION AND GRADING OF GRAIN.

Mr. GRONNA. I ask that Senate bill 120 be laid before the Senate.

The PRESIDING OFFICER. Without objection, Senate bill 120 will be laid before the Senate.

The SECRETARY. A bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce, and to secure uniformity in standards and classification of grain, and for other purposes.

Mr. GRONNA. Mr. President, a similar bill has been pending before the Senate and before the House of Representatives for more than 10 years. The opposition to the bill is practically the same as the opposition that has always come from organizations that are benefited at the expense of the farmer.

I wish to call attention to what was said in a report made by the Commission on Country Life:

The commission finds that agriculture in the United States, taken altogether, is prosperous commercially when measured by the conditions that have obtained in previous years, although there are some regions in which this is only partially true. The country people are producing vast quantities of supplies for food, shelter, clothing, and for use in the arts. The country homes are improving in comfort, attractiveness, and healthfulness. Not only in the material wealth that they produce, but in the supply of independent and strong citizenship the agricultural people constitute the very foundation of our national efficiency. As agriculture is the immediate basis of country life so it follows that the general affairs of the open country, speaking broadly, are in a condition of improvement.

Many institutions, organizations, and movements are actively contributing to the increasing welfare of the open country. The most important of these are the United States Department of Agriculture, the colleges of agriculture and the experiment stations in the States, and the national farmers' organizations. These institutions and organizations are now properly assuming leadership in country-life affairs, and consequently in many of the public questions of national bearing. With these agencies must be mentioned State departments of agriculture, agricultural societies, and organizations of very many kinds, teachers in schools, workers in church and other religious associations, traveling libraries, and many other groups, all working with commendable zeal to further the welfare of the people of the open country.

The President of the United States deemed it important to ascertain the conditions and affairs of country life. The report goes on to show that the so-called middle men, or men who invest a small amount compared with the amount invested in agriculture, are profiting unduly at the expense of the farmer.

This bill, which has been so ably defended by my colleague [Mr. MCCUMBER], seeks to do only one thing, and that is to standardize the grain produced so that it may be sold upon its merits. We are not asking for any special benefit or any special privilege in the bill. We are simply asking for an honest inspection of grain.

It will be shown that the grain centers of the United States and that the grain of the United States are being discriminated against in foreign countries because of the inspection which we have in our country. The certificates which have been formerly issued have not been honest certificates. One might say that to have Federal inspection of grain is a detriment to the agricultural class. We are not asking for any favors to the agricultural class. All we are asking is that the Federal Government be authorized to standardize and fix grades.

The great Dominion of Canada has for many years had national inspection of grains, and I wish to call attention briefly to that act. Part 1 of the so-called grain act of the Dominion of Canada reads as follows:

There shall be a commission, to be known as the board of grain commissioners for Canada, which shall consist of three commissioners appointed by the governor in council.

Each commissioner shall hold office during good behavior for a period of 10 years from the date of his appointment, but he may be removed at any time by the governor in council for cause: *Provided*, That when a commissioner reaches the age of 70 years his office shall, ipso facto, become vacant.

A commissioner, upon the expiration of his term of office, if under 70 years of age, shall be eligible for reappointment.

One of such commissioners shall be appointed by the governor in council as chief commissioner of the board, and he shall be entitled to hold the office of chief commissioner so long as he continues a member of the board. The chief commissioner, when present, shall preside at the meetings of the board.

There shall be a secretary of the board, who shall be appointed by the governor in council and shall hold office during pleasure.

No commissioner or the secretary shall, directly or indirectly, hold any interest in any corporation subject to this act, nor directly or indirectly deal in or be financially interested in grain, nor hold any interest in any grain elevator or warehouse, or in any partnership, corporation, or business engaged in the grain trade, or in the transportation or storage of grain.

The commissioners and the secretary shall reside in the city of Fort William or Port Arthur, in the Province of Ontario.

The commissioners and the secretary shall, before acting as such, take and subscribe an oath of office before a superior or county court judge in the form following, which oath shall be filed with the department:

"I, A. B., do solemnly swear that I will faithfully, truly, and impartially, to the best of my judgment, skill, and understanding, execute and perform the office of chief commissioner (or commissioner or secretary) of the Board of Grain Commissioners for Canada, and that while I continue to be such chief commissioner (or commissioner or secretary) I will not, directly or indirectly, deal in or be financially interested in grain or hold any interest in any grain elevator or warehouse, or in any partnership, corporation, or business engaged in the grain trade or in the transportation or storage of grain. So help me God."

The commissioners and the secretary shall devote the whole of their time to the performance of their duties under this act, and shall not accept or hold any other office or employment.

It will be seen from this act that in the Dominion of Canada the officers appointed by that Government are prohibited from being interested in the grain trade. It is not so in the United States. I believe that there are only four States that have State grain inspection. There are about 30 chambers of commerce and boards of trade that fix and establish grades; and while it is probably true that in the States where they have State inspection, where the commissioners are appointed under authority of law, we may assume that we get an honest inspection, we must admit that in the 23 or 30 places where the grain is inspected and graded by commercial bodies financially interested, selfishly interested, it is not for the best interests of the producer that their grain shall be graded and inspected by a commission which is absolutely under the domination of such boards.

To substantiate what I have just said about the number of States that have State inspection and the number of boards of trade, I wish to read from the hearings of 1912 on the inspection and grading of grain, on page 20. I read from the statement of Mr. E. H. Culver, of Toledo, Ohio, president of the association of inspectors. The chairman of the committee asked:

There are how many of those?—

Referring to boards of trade.

Mr. REYNOLDS. There are 30. This list comprises the different markets, agricultural colleges, and institutions of that kind that have adopted the above as their standard of grades. We ask that this be filed.

Senator GRONNA. Did I understand you to say colleges?

Mr. REYNOLDS. Agricultural colleges in the different States that adopted the uniform phraseology.

Senator GRONNA. But none of those are boards of trade.

Mr. CULVER. There are 23 boards of trade, 4 agricultural departments in the different States, and 7 of the national organizations of millers—the Fraternity of Operative Millers, the Illinois Grain Dealers' Association, the Indiana Grain Dealers' Association, the Indiana Millers' Association, the Kansas Grain Dealers' Association, the Millers' National Federation, and the Ohio Millers' Association—which comprise all the mills, spring and winter, in the United States that are over, I think, 75 barrels—

He means to say that he is including all the mills that manufacture about 75 barrels.

Mr. President, we find that there are the following exchanges and boards of trade:

EXCHANGES AND BOARDS OF TRADE.

The uniform grades of the association have been adopted by the following exchanges:

Atlanta Grain Dealers' Association.
Albany (N. Y.) Board of Trade.
Baltimore Chamber of Commerce.
Buffalo Corn Exchange.
Chicago Board of Trade.
Cincinnati Chamber of Commerce.
Cleveland Chamber of Commerce.
Detroit Board of Trade.
East St. Louis inspection department.
Fostoria (Ohio) inspection department.
Galveston Board of Trade.
Kansas City Board of Trade.
Louisville Board of Trade.
Mansfield (Ohio) Chamber of Commerce.
Milwaukee Chamber of Commerce.
Nashville Grain Exchange.
New Orleans Board of Trade.
Norfolk Board of Trade (excepting corn rules).
Peoria Board of Trade.
Philadelphia Commercial Exchange.
Pittsburgh Grain and Flour Exchange.
St. Louis Merchants' Exchange.
St. Joseph (Mo.) Board of Trade.
Toledo Produce Exchange.

INSPECTION DEPARTMENTS.

These inspection departments have also adopted the grades promulgated by the association:

Illinois State Grain Inspection Department.
Kansas State Grain Inspection Department; has adopted several but not all of the uniform grade rules.
Missouri State Grain Inspection Department.

Minnesota State Department; has indorsed the principle of uniformity, but has adopted only a few of the recommendations.

COMMISSIONERS OF AGRICULTURE.

The following State commissioners of agriculture have fallen into line and have adopted the grades:

Commissioner of agriculture, Georgia.
Commissioner of agriculture, Florida.
Commissioner of agriculture, South Carolina.
Commissioner of agriculture, Tennessee.

ASSOCIATIONS AND FEDERATIONS.

The associations and federations of grain dealers and millers that follow have all indorsed the association's uniform grades:

Fraternity of Operative Millers.
Illinois Grain Dealers' Association.
Indiana Grain Dealers' Association.
Indiana Millers' Association.
Kansas Grain Dealers' Association.
Millers' National Federation.
Ohio Millers' Association.

The following colleges, universities, and experiment stations of the United States are using the association's uniform grades as textbooks and teaching them to their students:

Virginia Agricultural Experiment Station, Blacksburg, Va.
University of Wisconsin, Madison, Wis.
Tuskegee Normal and Industrial Institute, Tuskegee, Ala.
Storrs Agricultural Experiment Station, Storrs, Conn.
Oregon Experiment Station, Corvallis, Oreg.
University of Minnesota, St. Paul, Minn.
University of Nebraska, Lincoln, Nebr.
North Dakota Agricultural College, Agricultural College, N. Dak.
Rhode Island State College, Kingston, R. I.
Vermont Agricultural Experiment Station, Burlington, Vt.
University of Missouri, Columbia, Mo.
Ohio State University, Columbus, Ohio.
University of Tennessee, Knoxville, Tenn.
Pennsylvania State College, State College, Pa.
Delaware College, Newark, Del.
Maine Agricultural Experiment Station, Orono, Me.
Montana Agricultural College and Experiment Station, Bozeman, Mont.
South Dakota State College and Agricultural Experiment Station, Brookings, S. Dak.
State College of Washington, Pullman, Wash.
University of Nevada, Reno, Nev.
University of Wyoming, Laramie, Wyo.
Michigan Agricultural College, East Lansing, Mich.
North Carolina College of Agriculture and Mechanical Arts, West Raleigh, N. C.
State Agricultural College, Fort Collins, Colo.
New Mexico College of Agriculture and Mechanical Arts, Agricultural College, N. Mex.
Louisiana State University, Baton Rouge, La.
Kansas State Agricultural College, Manhattan, Kans.
Hatch Experiment Station, Amherst, Mass.
New Hampshire Agricultural Experiment Station, Durham, N. H.
New Jersey Agricultural Experiment Station, New Brunswick, N. J.

Mr. President, the opposition to this bill comes, as has been stated by my colleague, from the large cities where these boards of trade and chambers of commerce are located. I attribute no sinister motive to anyone who may oppose the bill, but I want someone to give some reason why the bill should not be enacted into law. No valid reason has yet been given. The only reason that has been set up is that the business would be thrown into politics by permitting the Federal Government or the Secretary of Agriculture to appoint these men, and that it would be a great expense to the Government, when as a matter of fact the bill provides that those who sell the grain shall pay for the inspection.

Mr. President, I do not care to say anything further at this time. I yield to my colleague.

Mr. GALLINGER. Mr. President——

The PRESIDING OFFICER (Mr. GORE in the chair). Does the Senator from North Dakota yield to the Senator from New Hampshire?

Mr. McCUMBER. I yield.

Mr. GALLINGER. Before the Senator proceeds I wish to ask him a question. My attention was attracted by the closing sentence of the Senator from North Dakota [Mr. GRONNA], who has just taken his seat, to the effect that the cost of this inspection is to be paid by the owners of the grain and not by the Government. I have not read the bill carefully, and I will ask the Senator from North Dakota if that is correct?

Mr. McCUMBER. That is correct.

Mr. GALLINGER. In that respect it differs from the meat-inspection act?

Mr. McCUMBER. It does.

Mr. GRONNA. I will state to my colleague, if he will permit me, that the proposed law is similar to the Canadian law. The Canadian law provides that the seller and not the buyer shall pay for the inspection.

Mr. McCUMBER. Under the present system, Mr. President, the inspection in every one of the great centers is charged against the grain itself, against the owner of the carload of grain that is inspected, and, of course, it is charged back to the farmer or the elevator sending it. The charges range all the way from 35 up to 75 cents a carload. At 40 cents a carload the amounts received for the inspection would pay the entire expenses of the operation of the new system, according to the report of the Agricultural Department.

Mr. GALLINGER. And, Mr. President, from what the Senator said a while ago, I infer that this charge might be repeated four or five times before the wheat was actually sold and delivered?

Mr. McCUMBER. It might be under the present system. Under the present system it may possibly be duplicated three times. If a car is shipped from one State to another, under the proposed system there would be a considerable saving in that respect.

I regret, Mr. President, that those who appear to be so earnestly against this proposition for grain inspection are not present to hear the testimony which I propose to present in this case.

Mr. President, before proceeding further, I want to say to Senators in general that this is only a little matter that is asked for by practically all of the farmers of the United States who deal in grain; it is not a matter of a great deal of importance possibly to many of the Senators; and I shall not object to those who feel that they are not interested in what the farmers of the country want, taking advantage of the smoking room, so as not to be bored by a discussion of matters pertaining to their demands. I am sorry the Senator from Missouri [Mr. REED] left the Chamber, after he expressed his own opinion, because I wanted to show that his opinion upon the St. Louis Board of Exchange methods differed entirely from the opinion of certain members of that board.

I was reading, when I was interrupted by the unfinished business being laid before the Senate, and I will now go on with the statement of this member of the St. Louis board giving his reasons why he favors inspection of grain as against the system of the board. He says:

One of those abuses is the nonuniformity of the grading of grain in this country. It has been asked here how that affects the farmer who brings his grain in to the country station and sells it on view, or by selling to the little dealer at the country station. But how does the country shipper determine the price which he is going to pay the farmer?

The question is often asked by Senators: "How is the farmer going to get any benefit out of this?" I have answered that question time and again; but possibly you would care more for the answer of some member of the board:

He looks at the market reports of St. Louis, Chicago, Kansas City, or Minneapolis, whichever market he may be tributary to. He deducts from that price the freight, the commission he has to pay at the terminal market, the inspection charge, the weighing charge; and there is another deduction for probable natural shrinkage of the weight of the grain in transit. He also has to make up his mind what that grain will grade in that terminal market.

He is speaking now of the man who purchases at the country elevator——

Having all that information, he knows what that grain will net him on his track, and he bids the farmer as much less than that net price as will afford him a fair margin of profit for shipping that grain. Therefore you can readily see that if the dealer's price in the terminal market is reduced by reason of this irregularity in the inspection, or for any other cause, the price which he pays the farmer is correspondingly reduced. And, as one of the gentlemen preceding me has said, that price affects not only the grain which goes to the terminal market, but practically all of the grain that is sold by the farmer, because the price he gets on the farm for any other purpose than market shipment is fixed by the price it is worth in the market.

I wish that Senators would fully understand that. As 95 per cent of all of the grain at these terminals is sold upon inspection certificates, the price of the several grades of grain is fixed in the market by those certificates, and therefore if No. 1 grain is certified as No. 2 and sold as No. 2, that selling price would fix the real price of No. 1, which should have a No. 1 price, and the farmer who has his grain unsold has his property reduced in value just to that extent. Again, he says:

Now, with regard to the uniformity of inspection—

Here, again, the member of the St. Louis board is speaking—

Now, with regard to uniformity of inspection: I have been in the grain business about 30 years. I think there has not been a year of that time that I have not heard talk of uniformity of grades; but it has all ended in talk. I do not believe we ever will get uniform grades by the voluntary action of the various markets, because, while they may think it is a good thing as a general proposition, they do not seem to be able to agree upon the basis of uniformity. I presume if any market could get all the other ones to agree to its grades they would come in and be all right. But you never are going to get uniformity of grades until it is imposed on all the markets of this country by the highest authority—the Federal Government.

Mr. President, that is true. Finally, because of the constant bringing of this matter before the country, the several boards of trade have concluded that they had better accept Government uniformity of grades and Government standardization, but they

still hope to avoid the Government itself inspecting and certifying the grades. Again, the same gentleman says:

And even if it were so that they could do it otherwise, there would be no authority, no power, to hold them to such an agreement in regard to those uniform grades.

Why, Mr. President, they have tried it several times; they have agreed upon uniform grades as between the several markets; but whenever it was found in one market that they could do better by changing the grades and changing the system under which they were operating, they would abandon the old agreement for their special benefit, and then, of course, all the work and all the struggle on the part of the several boards of trade to arrive at uniformity would go for naught. The testimony proceeds:

Senator PERKINS. And, really, the wheat of the greatest intrinsic value is that which will yield the greatest number of pounds of flour to the hundred pounds?

Mr. TEASDALE. That is perfectly true. There are different qualities of No. 2 red wheat, for instance, and different qualities of No. 1 white wheat. But you can get approximate uniformity, and you can so arrange your specifications for the different grades that the man who ships the grain to the market, whether he be the farmer or the country elevator man, can come pretty near telling what his grain is going to grade and what it is going to net him. That is the result which we are seeking to achieve through the medium of Federal inspection.

He has already shown in his testimony that on account of the irregularity of inspection it is impossible to determine beforehand what kind of a grade he will get in any of the central markets. Again, he says:

I do not say that the inspection is dishonest—

And this is an answer to the Senator from Missouri [Mr. REED] by one of his own constituents—

I do not say that the inspection is dishonest. I think sometimes they do have a dishonest inspector, but more often they have an incompetent inspector. That is perfectly natural by reason of the fact that those inspectors are appointed by the State boards of railroad and warehouse commissioners, the personnel of those commissions changing every two years, and each incoming new member having his own favorites that he wants to get on that inspection board, some of whom have had little or no previous experience in the grain business.

The Senator from Missouri asked me whether or not I believed that we would have more honest inspection under a Government system than under a system controlled by the respective States. I replied at that time that under the present system the fault lies in the fact that the purchasers of grain themselves influence appointments to the several boards of inspectors, and the Senator denied that there was any politics in the State inspection, because they have a nonpartisan board; but here is a member of the St. Louis exchange, engaged for 30 years in the grain business, who says that the inspectors change with every incoming administration, whose own favorites are put upon that board. I am not accusing these men of being dishonest; I say the system is wrong; it is uncertain; and we want to get certainty and confidence in the trade. Again, Senator PERKINS asked the question:

Senator PERKINS. You think, speaking from your 30 years' experience as a grain dealer and your association with other grain dealers and in purchasing as commission merchant and receiving consignments from farmers, that the enactment of a national inspection bill is not only in the interest of the commercial community, but also in the interest of the farmer?

Mr. TEASDALE. I do; most decidedly. I think Federal inspection will be as much stronger and better than State inspection, as the administration of the Interstate Commerce Commission is stronger and better than that of the various State railroad commissions.

I appreciate the fact that that may not appeal to the Senator from Missouri, who seems to criticize the Interstate Commerce Commission, but I dare say that the Senator from Missouri would be the last man in the Senate to-day to vote for the discontinuance of the Interstate Commerce Commission and relegate us to the control of the several State commissions. So after the proposed law shall have been in operation for one year not only the boards of trade but the Senator from Missouri himself will be equally in opposition to any change.

I wish now, Mr. President, to give an Iowa view of this matter. Perhaps one of the Senators from Iowa, if present, would remember Mr. Messerole, who is a grain dealer in that State. Mr. Messerole says:

Gentlemen, to begin with, I wish to say that I represent the Farmers' Grain Dealers' Association of the State of Iowa—

He speaks here for the farmers who are grain dealers in the entire State of Iowa—

having been secretary of that organization from the time of its inception, from the time it was organized, three years ago last November. I have had some 26 years' experience.

I have stated, Mr. President, that the farmers of the State of Iowa, like those of South Dakota and other States, do favor this change from the board of trade and State warehouse commission control to Government or Federal inspection.

Senator LONG. Have you any State inspection law in Iowa?

Mr. MESSEROLE. We have not. We have no inspection in the State of Iowa.

The Senator from Missouri thinks it would be easy for Iowa to have an inspection department. I have already shown, Mr. President, the impossibility of doing any such thing. If that were possible even at considerable expense, there would not be one of the great agricultural States that would not fix a standard, but its standard would not control when the grain would reach the terminal market in another State.

Senator LONG. And no terminal?

Mr. MESSEROLE. No terminal within the State.

What is true of Iowa is true of most of the agricultural States—

We are tributary to a large number of markets. And I wish to say that the fact is that unless a grain dealer is on the inside—I mean a grain dealer in the country—it is almost an utter impossibility for him to tell which of the several markets is the proper place for him to market his grain. I have a publication with me which shows a prominent member of the Minneapolis Exchange advertising leniency of grades in Minneapolis as an inducement for grain people to ship them their grain.

Both Senators from Minnesota are absent. I suppose that they also would deny that under the system in their State there is anything but honest inspection; but here is a gentleman, a shipper, who says he receives information that there will be great leniency in the grading in Minneapolis for a season—at least until they can get him to ship his grain that way.

The Minneapolis exchange in its testimony before the State Legislature of Minnesota admitted that it was a practice so to do; and a few years ago, upon an investigation into the methods of dealing at that great grain center, it was admitted that during the earlier part of each season, when the grain was coming into the market, they had rigid inspection, but when the grain had practically left the farmers' hands they then had easy inspection, which meant a different grading between the in-inspection and the out-inspection from the elevators.

Senator LONG. Has he gotten any Iowa business as the result of that?

Mr. MESSEROLE. He gets Iowa business; yes, sir. I have shipped him some stuff myself.

Senator LONG. Is it satisfactory?

Mr. MESSEROLE. While we are right there I will show you how satisfactory it is. It is ridiculous for anyone—I do not care whether he is a farmer or a grain man, or who he is—to claims that the Minneapolis inspection is anything like reliable or uniform.

This is the testimony of a dealer in grain who at that time had been so engaged for 27 years. He certainly ought to be as skillful an expert as it would be possible for a man to become. He says:

Here are two cars of corn raised in the same field—

This is Iowa corn—

Here are two cars of corn, raised in the same field, shelled from the same crib, and loaded from the same bin, after being mixed in the bin. As to two cars shipped the same day and arriving and inspected the same day at Minneapolis, on February 8, the commission house writes the following letter. This is my own experience. I shipped this grain myself.

Here is a portion of the letter:

"DEAR SIRS: You car 59266 was in here on February 5 and graded N. G.—

That is, no grade.

"We filed call for reinspection and the grade was sustained. We carried it up to the board of appeals and they made the grade No. 4 corn—

In other words, they raised it one grade—

"and we applied the car on your No. 3 sale at 1 cent per bushel discount, which was the understanding in the terms of our sale.

"The party to whom we applied this corn wish the grade reconsidered by the board of appeals, for the reason that there were 25 or 40 bushels of very dirty corn in this car that did not show up in the original State sample.

"The board of appeals has ordered another sample of the car, and we will watch the reinspection and hope the grade will be sustained, for on the basis of N. G. we could not apply this car at a discount less than 3 cents per bushel."

Here is the other car, loaded from the same bin the same day, and arriving the same day, and inspected the same day:

"Your car 70370 graded 3 yellow and applied satisfactorily on sale."

Senator LONG. Was the trouble there with the law or with its administration?

Mr. MESSEROLE. It is difficult, Senator Long, for us to tell at that distance what the trouble is. In Chicago I am satisfied that the trouble is with the law.

Senator LONG. With the law?

Mr. MESSEROLE. Yes, sir.

Senator LONG. In what respect is the law faulty?

Mr. MESSEROLE. The law, or the refusal of the officers to enforce the law, permits of a collusion between the inspectors and the elevator people, who are largely responsible for this condition.

Senator DOLLIVER. Will you submit to a question from your colleague?

Mr. MESSEROLE. Yes, sir.

Mr. MCCREERY. I want to ask you what the farmer who raised those two cars of corn would think of the inspection of the two cars of corn?

Mr. MESSEROLE. I was coming to that now. The fact is that the conditions have been so bad and are so bad, a great many times, that a grain dealer in the country, especially an agent or manager of a cooperative elevator company, is compelled to refuse to settle for corn coming from the farmers until that corn has arrived and been inspected. Just what the farmer would think of that kind of a proposition is largely guesswork.

Senator PERKINS. Was it subject to the same conditions in transit?

Mr. MESSEROLE. Yes, sir; it was subject to exactly the same conditions, loaded from the same bin on the same day, arrived the same day, and was inspected the same day.

Senator GORE. It is practically certain that one car was purposely graded too high and the other too low, is it not?

Mr. MESSEROLE. That is what I contend.

Senator BURKETT. Why would that be done? What would be the object in doing that? Probably the same man inspected the two cars if they went in together.

Mr. MESSEROLE. That is another thing; that is problematical. The natural result would be that a man acting as a manager of a farmers' elevator company, if he took grain to begin with, knowing that these conditions existed, would resolve every doubt against the farmer.

Very naturally, he would have to do that to protect himself.

Again:

Senator MCCUMBER. On the whole, taking the grain which you send out in that way, is the tendency to undergrade rather than to overgrade?

Mr. MESSEROLE. It invariably tends to undergrading.

In other words, the system is so worked that it operates always against the producer and the ultimate consumer, the former being compelled to sell his grain at considerably less than its true grade and the final consumer being compelled to buy his grain under loose inspection at a grade above its true merit.

Again, Mr. Messerole answers a question by Senator GORE:

Senator GORE. But by reason of grading one No. 3, which you think was really above its merits, and giving the other no grade, you would have made more than if they had given both of them the proper grade, No. 4—about a cent more?

Mr. MESSEROLE. If the error was due to incompetency, and I got the benefit of it, that would not change my views upon this matter, because I would recognize at once that there was incompetency, and the next time I might get the worst of it; and there would be no certainty or anything like certainty about the grain business. The fact of the matter is, Senator GORE, that it is not the slight differences that cause trouble in the grain business; it is the wide differences. For instance, if I ship a car of grain to Chicago, and when I ship it I know that it is on a line between No. 3 and No. 4, and it happens to grade No. 4, I am not going to call then for reinspection, because I think then that the chances are that I may be wrong. But if it grades no grade when I am satisfied that it is No. 3, then I would call for reinspection, if I thought I had any show. But under the present conditions I do not think I would have, because the men to whom I must appeal for a change in the grade are the same fellows who are responsible for the condition in the first place.

There, Mr. President, is the wrong. This is what I have been trying to impress upon the Senate, or, rather, upon the seats in the Senate, in the consideration of this question.

Again, Mr. Messerole says:

I look upon the matter something in this light: It matters very little what my personal views may be on this subject, although I have had some experience; but I came down here to deliver this message to this committee—that our farmers have sent me here to let you people know that they favor the enactment of some legislation of this character.

Senator PERKINS. Those opposed to it have been here and have had their say about it; and they simply represent their own individual pecuniary interests and their own financial interests, as it were. When you come here from the producers, representing as many as you do in the great State of Iowa, it seems to me your statement carries great weight with it.

Mr. MESSEROLE. I do not think there is any doubt that the injustice and inequalities of the present system are proven, to say nothing about those things which are worse than incompetency.

Mr. Greeley gave, in one long day's testimony, those things which were worse than incompetency, and I need not repeat them here.

Senator GORE. Do you think that under this bill you could ship those two cars of corn to any terminal market in the country and be reasonably safe in the assumption that they would receive the proper grade?

Mr. MESSEROLE. I do; yes sir.

Senator GORE. And the same grade in one case as in the other?

Mr. MESSEROLE. Yes, sir.

Senator GORE. And that would be a source of satisfaction to you?

Mr. MESSEROLE. Yes, sir. I think it would prove in the end to work out a stable state of affairs upon which a grain dealer or a man acting in the capacity of an agent for the farmers could rely.

Senator GORE. It would give confidence to the farmer that ships to those terminal markets, and to the foreigner who buys from them?

Mr. MESSEROLE. Yes, sir.

Here I will answer again the statement of the Senator from Missouri [Mr. REED] that a Kansas certificate would hold good in the State of Illinois:

Senator MCCUMBER. Mr. Messerole, suppose you have a carload of grain which you ship from, say, Kansas or Nebraska, over the Missouri River, and it is sold by the car there without being changed. It is then reshipped into Illinois. It is perhaps sold again. It is then reshipped down to New Orleans, and again resold, and shipped out of the country from there. What trouble, if any, would you find with reference to the grading and regrading of this grain? Would it be graded more than once? If so, where would it be graded, and what dangers would arise in the grading that would affect your interests?

Mr. MESSEROLE. It would be graded first at the initial point and at each succeeding point until it reached the destination by a system of grading in which no two inspectors would grade it alike. That would be the result.

Senator MCCUMBER. Then, would not this produce such uncertainty on the part of the shipper of that grain that it would discourage him a great deal in giving fair grades to grain?

Mr. MESSEROLE. It would, certainly. Mr. McCreery here has a case of just that character which I will ask him to state, because it brings that point out very clearly.

Mr. MCCREERY. Do you want me to state that now?

Mr. MESSEROLE. Yes; I should be glad to have you state it now, because it comes in here.

Mr. MCCREERY. In that particular case, Senators, the shipment originated at Mason City, Ill. It was composed of two cars of white corn loaded by us, both shipped to St. Louis, Mo., both inspected by the same inspector or under the same system of inspection. One graded No. 3 white, the other No. 2 white. That corn was forwarded on to Nashville, Tenn. There was no complaint in Nashville about the car that was graded No. 3 in St. Louis, but discussion arose over the weights of the car of corn which was graded No. 2. I have the papers, the correspondence, and a draft refused by us, and so on, in my pocket. A discussion arose over the weights, and the reason assigned for the shortage of weight of this car in Nashville was that the corn arrived in Nashville in heated condition. How could a car of No. 2 white corn in St. Louis be graded "no grade" in Nashville? I have those papers.

I call this especially to the attention of Senators who care to know anything about the question. If the grain is sufficient to grade No. 2 white, it is sufficiently dry so that it is impossible for it to take up enough moisture in transit in a car to cause heating. If it could possibly, in transit, be changed into a heated condition, it is conclusive evidence that it was not No. 2 in the first instance. That may be explained further on. I am not certain.

Senator MCCUMBER. It would have to go down at least from three to four grades?

Mr. MCCREERY. Yes; it would have to go from No. 2, which is the best grade of corn. That is, it is the best grade that is handled. There is, I believe, a No. 1, but no one ever heard of a car grading No. 1. No. 2 is the highest that any corn grades. That was the best, then, that there is. We will say it might not have been the best grade of No. 2, but it passed in that class. It then went down past No. 3, past No. 4, and down into "no grade."

Senator DOLLIVER. They claim that it became heated, do they not?

Mr. MCCREERY. How could it become heated in going from St. Louis down to Nashville?

Mr. MESSEROLE. His contention is that the initial grading was wrong, either the one or the other; that either the grade at Louisville or Nashville was wrong.

Mr. MCCREERY. Senator, if it was No. 2 corn, the qualifications for No. 2 corn are such that it would not heat in going to Nashville, or it would not heat in going to New Orleans for that matter, if it took 30 days.

Senator GORE. The best corn of that grade is heatproof, is it not?

Mr. MCCREERY. It is almost heatproof, because there is such a small percentage of moisture in No. 2 that it is impossible to get it in a heated condition within any reasonable length of time.

Senator MCCUMBER. And that would make a difference of how much of the value of that cargo of corn?

Mr. MCCREERY. I would say, going from No. 2 down to "no grade," at least 7 or 8 cents a bushel.

This is the method of inspection under the State inspection system which the Senator from Missouri lauds so earnestly.

Senator MCCUMBER. If he bought that as No. 2 he would lose about 7 cent a bushel?

Mr. MCCREERY. Yes, sir.

Senator MCCUMBER. And that would tend to make him a little more careful about giving a grade of No. 2 if he really thought that it was No. 2.

Mr. MCCREERY. Certainly; and right here is where the farmer comes in and is being injured by this loose system of inspection.

Senator GORE. Did that No. 3 corn go to Nashville, too?

Mr. MCCREERY. Yes, sir.

Senator GORE. How did it fare?

Mr. MCCREERY. All right; there was no question about it.

Senator GORE. It held its grade?

Mr. MCCREERY. Yes, sir. I have this paper in my pocket, showing that there was no question about it. The point is this, gentlemen: That at one place or the other the inspectors undoubtedly were badly "off." Had there been Federal inspection, gentlemen, the corn that passed the Federal inspector at St. Louis as being No. 2 grade, or No. 3, as the case might be, would have had the same grade down at Nashville. There is no question about that.

Why, it would have the same grade, because it would not be reinspected unless it was unloaded and mixed with other corn or unless there was a special reason for reinspecting it.

Mr. Nelson, who is from the State of North Dakota, then asks a question, as follows:

I want to call attention to a sample of No. 4 wheat taken from a car that arrived in Kansas City from Kansas and a sample taken from a shipment of No. 2 hard wheat out of an elevator in Kansas City and finally transferred at Buffalo to a canal boat for a Rochester mill, which graded No. 2 at Kansas City and at Buffalo. I forwarded the two samples to Senator MCCUMBER, with the request that he submit the two samples to the Agricultural Department for examination, and I have their report showing that there was no difference in the value of the two samples.

I recall very distinctly the occasion. Knowing a little something about grain and its several grades, I could see no difference from an eye inspection, so I submitted the grain to the Agricultural Department in order that they might give it a chemical test, or whatever other test they use, to determine its character. After having given such a test, the Agricultural

Department stated that there was no difference whatever in the two samples, and yet they graded entirely differently—two grades different at the different places.

Mr. Messerole goes on:

It has been contended, I understand, by some of the opponents of the bill that it would create confusion, and that reinspection would be necessary at the point of destination. As I understand the purpose of the bill, it is to provide that the initial inspection would follow the car until the grain lost its identity, and in case of a disagreement there would not be anything to prevent the purchaser who might not be satisfied from calling for a reinspection.

Mr. President, Mr. Messerole understood correctly the purpose of this bill; and yet Senators who absent themselves during the presentation of the evidence upon this question will argue this same thing over and over again without knowing what the testimony is, and will declare that the bill means something different from what it does mean.

Mr. Messerole proceeds:

The present inspection at Chicago, which is our principal market, and upon which we must depend at most times, is absolutely unreliable and without any stability whatever.

I want to call this to the attention of the Senator from Illinois. That was the condition at that time. It may be perfect to-day, but there is no law to keep it perfect, and that is what we want. We want a law that will make them grade properly when it is to their interest to do so, and grade likewise justly when their interest might induce them to manipulate the grades.

As a proof of this, I want to tell you that in our country we have a variety of oats known as the Russian green oats; also an oat known as the Kershon oat. They are of a yellow variety. Those oats upon arriving in Chicago, no matter how sweet or bright or clean or nice they are, are invariably marked "stained and damaged" in the inspection certificate; while an inferior quality of white oats might pass the inspection as No. 3 white, as compared with these yellow oats.

I call attention to the fact that according to this testimony these yellow oats, because they are naturally yellow in color, are of a superior quality to number 3 white oats; and yet under the inspection system in that State at that time they were always graded as damaged or stained because they were of the yellow variety.

Senator DOLLIVER. That is a fine piece of mere stupidity, I should say.

Mr. MESSEROLE. We have been contending with that condition for the last five years. In view of the fact that many foreign countries buy our grain, and we are heavy exporters, we contend that it would be a good thing to offer them a definite basis on which they can base their business relations with us; and we also contend that the Federal inspection would perform that service.

Senator PERKINS. That commends itself to me, Mr. Chairman, especially so as it has been stated by the gentleman who preceded you that they take the grade in foreign countries of the grain shipped from our markets here on the Atlantic coast and the Gulf. On the Pacific coast it is very different, of course, and therefore this is a revelation to me, and a very good one, too. It makes me feel that your advocacy of the measure has a great deal of merit from that standpoint.

Mr. MESSEROLE. Is the remedy in this bill adequate? That is a question that might arise. I want to state to this committee that our people believe that this is a very good measure, and they have not asked for any amendments. They do not expect perfection, and if they find it to be faulty in some particular they are not going to complain about it. But they think, and they have said they think, that it is a move in the right direction and will be much better than what we have at the present time. In view of the testimony as to the outrageous inspection at terminal markets, what evidence is to be more conclusive than that of the men who produce grain and ship thousands of cars of it, as testified to by the representatives of the several organizations? I am inclined to look at this thing somewhat with the idea of trying to find out where the opposition comes from.

I will tell you where it comes from. It is stated here by Mr. Messerole. He says:

It is very natural that a combination of grain dealers, such as we heard about here yesterday, and which I am firmly convinced exists—in fact, I know it does from my own personal experience—should oppose this bill. It is also natural that an exchange having its rules framed up in its own interest should object to any interference with the carrying on of its business as it has planned it. But the farmers, in considering this bill, are looking at their own interests from the producer's standpoint. And I want to say that in making the canvass in Iowa, having intimate connection with a great many farmers' organizations in Iowa, Illinois, South Dakota, and Minnesota, I have yet to find the first farmer and grain producer who will say one word against this bill of Senator MCCUMBER'S. They all indorse it universally.

* * * * * * *

Senator PERKINS. In other words, all the farmer wants is an honest, square deal?

Mr. MESSEROLE. That is all they are asking for. The bill means, first, uniformity.

Now, remember that, although your boards of trade reported resolutions strongly against uniformity but a year or so ago, every one of them comes in to-day and votes in favor of uniformity, because they say: "If we will concede that much possibly we may prevent the Government from doing the inspecting itself, and we will be enabled to carry on the same system with a uniform grade if we are not interfered with."

Next, it means civil service, which means educated inspectors; and, in my judgment, that is the most important thing in the whole proposition—that it will result in the building up of a corps of inspectors who will be educated from a proper source.

Yes, Mr. President, the Federal Government will lay down the rules of inspection; it will determine, by the proper method of grading, how the grades may be established. Its employees will have to measure up in educational qualifications to the standard of efficiency that will be determined by the department, and every incoming administration of two years will not change the members, as is done at present in the State department, and bring favorites into the inspection of grain whose work at the most, in the beginning, will be little better than guesswork.

Mr. Messerole proceeds:

It was admitted by Mr. Reynolds, who I take to be a man of some prominence in the grain business of Indiana, before the Uniform Grade Congress in Chicago in 1906, that these evils exist; that there is no uniformity, and that the reason there is none is because men want to continue sharp practice. He admitted that, and yet he is opposed to this proposition. He wants to work out some reforms in their own organizations, but he says that he has no hope of accomplishing that.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER (Mr. GORE in the chair). Does the Senator from North Dakota yield to the Senator from Utah?

Mr. MCCUMBER. I yield, Mr. President.

Mr. SMOOT. Before the Senator from North Dakota proceeds further with the discussion of this question, I believe that we ought to have at any rate a few Senators in the Chamber. I notice but one Senator upon the other side. I therefore suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Utah suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Borah | Gore | Norris | Smoot |
| Brady | Gronna | Oliver | Stephenson |
| Brandegee | Hughes | Overman | Sterling |
| Bristow | James | Page | Sutherland |
| Bryan | Johnson | Perkins | Thompson |
| Burton | Jones | Pomerene | Thornton |
| Catron | Kenyon | Ransdell | Tillman |
| Chamberlain | Lea, Tenn. | Robinson | Vardaman |
| Chilton | Lee, Md. | Saulsbury | Warren |
| Clapp | Lewis | Shafroth | West |
| Clark, Wyo. | McCumber | Sheppard | Williams |
| Cummins | Martine, N. J. | Sherman | Works |
| du Pont | Myers | Smith, Md. | |
| Gallinger | Nelson | Smith, S. C. | |

Mr. CLAPP. I desire to state that the senior Senator from Wisconsin [Mr. LA FOLLETTE], the junior Senator from Michigan [Mr. TOWNSEND], the senior Senator from New Mexico [Mr. FALL], and the senior Senator from Arizona [Mr. ASHURST] are absent on the business of the Senate.

Mr. OVERMAN. I wish to announce that my colleague [Mr. SIMMONS] is unavoidably absent on account of sickness.

Mr. SHAFROTH. I desire to announce the unavoidable absence of my colleague [Mr. THOMAS], and will state that he is paired with the Senator from New York [Mr. ROOT].

The PRESIDING OFFICER. Fifty-four Senators have answered to their names. A quorum of the Senate is present. The Senator from North Dakota is entitled to the floor.

Mr. MCCUMBER. I wish Senators who take enough interest to do so would read the statement that was made by Mr. Reynolds. He stated this, in substance, to this Uniform Grade Congress, which was a congress made up of wheat buyers: "Gentlemen, unless you will agree to a uniform-grade system, unless you will stop your evil practices under the present system, I want to tell you that, just as surely as the sun will rise to-morrow, you will have the Federal Government doing your inspecting." In other words, "You had better be honest, at least for a while, and put off this evil day." That was, in substance, the statement made by Mr. Reynolds to the grain buyers' association.

Well, they have come partly over. I am thankful for that. It is a step in the right direction. When you get Federal standards and when you have Federal supervision you have gone a long way; but anyone who is acquainted with the grain business will know that you have not gone far enough to prevent and eliminate entirely the present frauds that are practiced in the grain trade.

Again, he continues:

Another thing that I regard in connection with the bill is this: That when a man is found dishonest the Government will punish him for it, and they will be less liable to be dishonest. It will not be simply winked at, as is the case in Chicago and these other markets where they have been caught in the act, and perhaps have discharged a foreman under them somewhere and made a scapegoat of him, and that has been the end of it. I do not think that will be the case under this bill. People fear Government prosecution. It will inspire confidence among foreigners, because the reputation of the Government itself will be at stake in this matter. The official certificate will pass as good as coin. That is the way our people view the matter.

Here is a question that was addressed to me by Mr. Foering, who was opposed to the bill, and the reply answers some of the

questions that are still being asked in the letters that Senators are receiving from these boards of trade:

Mr. FORAKER. I should like to ask Senator MCCUMBER one question. There seems to be considerable opposition among the members of some of the exchanges to this bill on this point: If it should go into effect, what effect would it have on grain that is not interstate grain; that is to say, grain that is going into the elevator? Would not that all have to be kept separate in the elevator?

The moment it gets into the elevator it ceases to become interstate grain, and it will not become interstate grain unless you take it out of the elevator and try to send it to another State. Then it may be inspected.

Senator MCCUMBER. When it leaves the car it becomes intrastate grain. The only object of the bill is to secure, first, a just and proper inspection and grade when it arrives for the purpose of selling it; secondly, to see that a just and proper grade is placed upon it when it starts out into another State, so that it will not defraud the consumer. We want to protect, first, the producer at one end, and then we want to protect the consumer at the other end, so that the one will sell the grade that he is entitled to, and the other will receive, when he purchases, the grade he is entitled to. As long as the grain is in the elevator it is not hurting anybody. We do not care what they do with it in the elevator. It is intrastate grain, and we can not control it if it is sold in that State from the elevator; we can not do anything as to that. But if it starts to defraud a person outside of the State from which it is shipped from the elevator, we want to reach it the same as we reach articles under the pure-food law.

I have here a statement from Mr. J. A. McCreery, of Mason City, Ill. I speak of grain going from one State to another of these agricultural States. I know that I need to apologize to the Senate for quoting so much of the testimony, but the testimony is argument, it is in point, it is from men who know the business, it is from those who are dealing in grain. I am giving you no farmer's guess at it, but I am giving you statements made by those who know from actual experience, and that is worth more to me, and it is worth more upon this record than any statement I could myself make except as I may explain from time to time the testimony that is given:

Mr. MCCREERY. I am manager of the Farmers' Grain & Coal Co. at Mason City, Ill., and am also secretary of the Farmers' Grain Dealers' Association of Illinois.

These are the representatives of the farmers and independent grain buyers in the State of Illinois, who, the Senator from Illinois [Mr. SHERMAN] says, are entirely satisfied. It may be that since this testimony was given they have become satisfied, but I want a condition that will keep them satisfied.

Senator PERKINS. How do these 25,000 farmers speak through you, sir? By resolution adopted by their organization?

Mr. MCCREERY. In answer to the Senator, I will state that we recently held a State convention in the city of Bloomington that was attended by 900 delegates from these various local farmers' associations, similar to the one of which I am manager. To make it clear I will say that they are local organizations composed of the farmers of the community who subscribed $50 or $100, as the case may be, to the stock, and created a fund of five, ten, or fifteen thousand dollars, and built these elevators for the shipping of their own grain, and any other grain that they see fit to buy from those who are not members. The State convention was held in Bloomington on February 26 and 27, and was attended, as I said, by 900 delegates. At that convention, after discussing the bill under consideration, it was unanimously voted to indorse the bill or something in that line.

Senator PERKINS. That is, a Federal, national inspection?

Mr. MCCREERY. Yes, sir; a Federal inspection bill similar to this one. I think our convention, if I remember rightly, simply indorsed the McCumber bill, and they are asking (and that is what I am here for)—25,000 of them—for the passage of this bill at this session.

Mr. President, there are 2,500 grain dealers who are opposing this bill, who are getting fatter as our men are getting leaner, while there are not only 25,000 but more than 250,000 of the grain producers who are asking justice at our hands; and it is such a universal demand that we ought to consider their wishes in the matter. He proceeds:

We happen to be in a State that has State inspection. In the same State we have some other inspection, of which I am glad to produce a certificate. Part of our grain is graded under State inspection; part of it is not, even in the State.

According to the testimony of this witness, at least at that time it was optional for the board of trade to determine whether it wanted its own inspection method or whether it wanted State inspection. That may be changed now; I am not prepared to say.

There is not any question in the minds of our people but what a standard established by the Government of the United States would be far superior to the standard established by some little merchants' exchange somewhere, or even by the State of Illinois. We feel, and our people say so, that the establishment of the standard by the United States would mean a great deal more; and we would have some satisfaction in the way of knowing, at least, that when it passed that inspector it meant something; and when we started a car of grain to Chicago we would know that it was to be inspected by Uncle Sam, just the same as the meat. Instead of that, it is inspected by what is known as a State inspection, which is nothing more nor less than the Chicago Board of Trade inspection, when you come right down to the real thing.

That is an answer to the question of the Senator from Missouri [Mr. REED] in reference to the Missouri State inspection. He says it is "nothing more nor less than the Chicago Board of Trade inspection, when you come right down to the real thing." He continues:

To show you gentlemen, if you will permit, that there is looseness in this inspection, I will state that solicitors from different markets call upon us and tell us to ship our corn to their market, because the inspection is easy.

What does easy inspection mean? It means simply that they will resolve the doubt in your favor if you will send the grain to them. What right have they to resolve doubts in anyone's favor? He proceeds:

We go down to Memphis, and there is a Memphis certificate [producing certificate]. Here is one from Illinois, and here is a Baltimore certificate. A representative from a Baltimore house called on us just this last winter and said—

I regret that the Senators from Maryland are not here, but I especially call attention to this:

A representative from a Baltimore house called on us just this last winter and said: "You had better ship your corn down to Baltimore, because the inspection is easy in Baltimore." If they let it be known that it is easy in Baltimore, or that it is strict in Baltimore, do you not see that they use that fact to get business? If there was Federal inspection in Baltimore it would not be any easier than the inspection in Chicago; nor would it be any harder.

Another man will say, "Sell me your corn and ship it down to Buffalo; Buffalo has the easiest inspection that there is." Do you not see that if we had Federal inspection the inspection in Buffalo would not be any easier than it would be in Baltimore, nor would it be any harder?

Senator DOLLIVER. What is the grade of this corn?

Mr. MCCREERY. That steamer-mixed corn is a low grade of corn. That is, there is a discount on that, for it had to be dried and raised to what is known as mixed corn. I simply brought those certificates along to show you.

Now, to go back, what constitutes the inspection in Cairo [reading]:

Here he reads the following:

CAIRO, ILL., *May 6, 1908.*

This certifies that there was inspected this date car No. 34388, I. C., and found to contain two—

That means No. 2—

yellow corn. Inspected and graded according to the instructions and standards adopted by the directors of the Cairo Board of Trade.

Not by the State inspector of Illinois, but by the Cairo Board of Trade.

We have no fault to find with the inspection of that grade of corn. That was a good grade. But suppose, now, that we sold this corn to the Halliday elevator. With all respect to the Hallidays, they are very fine gentlemen, but who constitutes the Cairo Board of Trade, or who forms the rules governing the grading in Cairo? The Hallidays help do it.

Senator DOLLIVER. Where are your State inspectors?

Mr. MCCREERY. They do not have the State inspection now; it is Cairo inspection.

Senator DOLLIVER. Does not the State inspection apply to all the corn marketed in Illinois?

Mr. MCCREERY. No, sir. Decatur very recently adopted State inspection. We had Decatur inspection up to just a short time ago.

Senator DOLLIVER. Is it voluntary with each town to select the State inspection if it wants to?

Mr. MCCREERY. Yes, sir. As far as I know it is; because Decatur just adopted State inspection very recently. They always had Decatur inspection before. There is Cairo inspection; there is inspection in each place for itself. It is not State inspection.

That is the kind of inspection we are now getting. There are different inspections in the same State, so far as that is concerned. Take Baltimore, for instance [reading]:

And again he reads:

"This grain is inspected and graded according to the instructions and standards adopted by the directors of the Baltimore Chamber of Commerce."

Who constitute the Baltimore Chamber of Commerce—the Baltimore grain men?

Senator GORE. That is a sort of benevolent association.

Mr. MCCREERY. It is just like the Cairo association. It is the Cairo grain men, and it is the Baltimore grain men that create that chamber of commerce. They fix the standard for the inspection, and the inspector inspects according to that.

The point I wish to make with that is this: Suppose this car that went to Cairo was sold to grade No. 3, or 3 yellow, as the case may be, that would command a fixed price. But had it missed that, had it been what we call a "line grade," and had missed grade 3 and had been graded 4, there would have been a discount on it. For all practical purposes, however, it would have been worth just as much as though it had passed as No. 3. And the danger is that these gentlemen working there as inspectors being under the Cairo Board of Trade, and the Cairo Board of Trade being controlled by and in fact being made up of the Cairo grain men, who buy this corn, it would be natural—I will not say that they would do it, but it would be natural—for them to give the benefit of the doubt to the disadvantage of the shipper.

Yes, Mr. President, it is extremely doubtful, and that doubt is manifested in their favor. There is not a single exchange that does not show between three and four times as many bushels of the higher grades shipped out as there are taken in.

Mr. SHERMAN. May I ask the Senator a question?

The PRESIDING OFFICER (Mr. SHEPPARD in the chair). Does the Senator from North Dakota yield to the Senator from Illinois?

Mr. MCCUMBER. Certainly.

Mr. SHERMAN. Does the Senator in this statement, or this witness from whom he reads, take into account the improve-

ment of the grade by purifying the grain at any of these primary markets.

Mr. McCUMBER. Of course he does. You do not change the inherent quality of a single grain of that grade by any process whatever. Whatever is deficient in flour-making properties when it goes in, is deficient when it goes out.

The only difference in quality, if you may call it quality, between that which comes in and that which goes out is that the dirt, the weed seeds, and the foul stuff are eliminated from that which goes out, but there is dockage allowed for that, and dockage is allowed in sufficient quantity not only to cover the foul stuff but also in sufficient quantity to pay for the expense of taking it out. The expense is very slight, because it is elevated; it goes through a spout; a very strong air current is turned upon it, and it practically costs nothing more to take out all the foul stuff than it would to elevate it.

Mr. SHERMAN. The Senator says that dirty wheat is just as good as the clean?

Mr. McCUMBER. The Senator does not say anything of the kind, and the Senator knows he did not say it. The Senator said that the grade of the wheat is the same with the dirt in it or the dirt out of it.

Mr. SHERMAN. If the Senator will yield to me for a minute I want to correct his statement.

Mr. McCUMBER. Let me finish. I said that the quality of the grain itself is not changed. The foul stuff may be taken out, but the grain is not changed. That is true of all the grain centers. You do not make the grade less in Minneapolis or in Duluth because of the quantity of dirt in it. They take out enough to cover that. They do not make a difference in the grade.

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Illinois?

Mr. McCUMBER. Certainly.

Mr. SHERMAN. Not controverting what the Senator states in his last answer, but without explanation his response to the first question would indicate that the dirtier the wheat is probably the better it would be if the grain were of the right quality when it was graded at the primary market; that whatever grading it received it would not have a high grade, but it would only be docked. I do not understand that that is the way the grade is made. The berry of the wheat, if that be the specific grain in question, may be tested by its quality; but if it be full of weed seeds or any other foreign grain rather than the grain that is sought to be investigated, it would more or less interfere with the quality of the wheat. It would not be graded at a higher grade or the same grade if the foreign substance were removed.

Mr. McCUMBER. Mr. President, the Senator is mistaken on that point. I assume that it is an honest mistake. The grade is graded according to the quality. There may be a third of oats in that wheat. The third of oats is taken out in the elevator; allowance is made for it. Therefore the actual grade is given of the bushel of that grain, and after the oats are taken out the grade should continue the same. I will tell the Senator how it is done.

Mr. SHERMAN. There is not any question about the method.

Mr. McCUMBER. The method of grading grain is this: You take under rigid inspection a million bushels of what you may call No. 1 grain. You take in a rigid inspection of 2,000,000 bushels—1,000,000 bushels of No. 2 and 1,000,000 bushels of No. 3. You dump it all into a bin. You have taken it under rigid inspection. When it is all mixed together, you certify that it is all No. 1. To be sure, some of it has been scoured—it has been cleaned—but it is the identical grain of 2,000,000 bushels, and you have gained a grade or so. That is the reason why the outshipping of grain always shows higher grades. It is done mostly in the mixing elevators.

Mr. SHERMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield further to the Senator from Illinois?

Mr. McCUMBER. Certainly.

Mr. SHERMAN. When the question was asked there was not any expectation that the Senator from North Dakota would escape in the manner he has. I do not refer to some particular acre of boggy ground in a field where there was an inferior grain that might be shipped in. I had reference to the general production of grain in a given area in southwestern Kansas, in North Dakota, or in Minnesota that might be coming in; and when that is all graded out, after being purified, manifestly it will be a better grade than it was before. I do not think there is any real misunderstanding on the subject.

Mr. McCUMBER. I confess there is a misunderstanding, and a very strong one. I certainly do not understand the Senator. Whether he understands me or not I can not say. I simply know that if a million bushels of No. 1 wheat and a million bushels of No. 2 go into an elevator there ought to be a million bushels of No. 1 and a million bushels of No. 2 come out, and if that is not the case somebody gets bit somewhere.

Mr. SHERMAN. But if a million bushels of wheat go into the elevator that come from various parts of the same State, the quality of which is not the same, when it is regraded they will get two grades of wheat out of the million bushels. There are some lighter grains in it.

Mr. McCUMBER. Yes; that is true, Mr. President, but in this metamorphosis in the elevator it always comes from the lower to the higher. They never get a different grade out of it that is a lower one. All the low grades vanish and it all goes out under the higher grade.

Mr. SHERMAN. That is coming back to the main question, that will be argued when we get to it.

Mr. McCUMBER. I thought we were at it.

Again, following Mr. McCreery, Senator Long asked him this question:

> You do not want any interference with you and your customer, the farmer?
>
> Mr. McCREERY. Let me explain that, Senator.

Then Senator Burkett, who was a Member of the Senate at that time, gives his own experience, and it is worth while to listen to it. It comes from a Senator from Nebraska who had not any particular interest in the subject but had had some experience:

> Senator BURKETT. Let me tell you about that; I fought that out here the first day. Here is where it is going to help the farmer: They can not get to inspect each load that the farmer brings; but when this elevator man buys that corn and sends it in down at Chicago or St. Louis, or wherever it goes, they can wheedle him up or down on that inspection. If they want to, their inspector will throw it down, say, to No. 3 instead of No. 2. He may have thought it would go as No. 2, and they may throw it down to No. 3. This little elevator man out here that is a buyer has to take the risk of that being done. It is done without any certainty, and it is done without sufficient restraint or enforcement of law about it to make it anywhere near certain and reliable. He has to take that risk; and accordingly he bids down the farmer lower than he would otherwise; and in the end the farmer with his one load of corn bears the risk. Do you see?
>
> Senator GORE. You see, they have no standard.
>
> Senator BURKETT. Here is another thing that I want to tell you: Another man has wheat or corn. He goes to an elevator. He has a carload. If he thinks that the elevator man is buying on too big a margin, he can send that in himself; and he becomes a competitor with the elevator man. His competition, the competition of the few farmers that have enough grain to ship in carload lots, if there is only one elevator in the town, gives abundance of competition to keep that elevator up in price, provided the farmer that has a carload can send it to Chicago and feel that he will be treated reasonably well when his carload gets there. But the fact is that when this farmer ships in his one carload of wheat or two carloads of wheat once a year, the men down there know what he is, and they know that he is not coming back, and they do not care whether they treat him right or not; and he is absolutely sure to get a poor grade. Accordingly, that one farmer, although he has a carload, can not send that wheat in with any certainty of getting anywhere near a proper grade for it. So reliability of grading does affect the wagonload man, because it makes a certainty; and the risk is not shifted back onto him.

Mr. President, I again call attention to cases where these farmers' elevators have shipped to the great terminals and the rule has been adopted by the boards of trade prohibiting their members from selling the farmers' grain. Could that be done under Federal inspection controlling the grades? Mr. McCreery, proceeding, says:

> Here is where we are punished: A car arrives there that is what they call a "line grade," according to the inspector's judgment. He hardly knows whether to say it is No. 3 or No. 4. It is so close to the line that divides them that he can hardly tell. Now, by which system will the farmer be protected? By having a disinterested man say what grade that should be or by having a man say what grade it shall be who is appointed by the grain men at that market?

Again, I want to call the attention of the defenders of these boards of trade and State-inspection laws to the fact that there are only four States that have inspection laws, I think, in the whole United States, and nearly all the great markets are controlled by the local exchanges. I admit State inspection is better as a rule than the local inspection, but Government inspection would be a thousandfold better than either of them. Mr. McCreery proceeds:

> We claim that a disinterested man in that case would be more likely to give us a fair and just decision on it than a man who is appointed by interested parties.
>
> * * * * * * *
>
> Senator GORE. In consequence of the grade?
>
> Mr. McCREERY. Yes, sir. Take Peoria, for instance: Peoria has State inspection. Chicago has State inspection. It is common gossip among grain men that what will pass for No. 2 corn in Peoria will not be better than No. 3 in Chicago. Yet it is all under the same inspector, or under the same department of inspection. It is not under the same man, of course; but it is all under State inspection. We can ship a car of corn to Peoria that will grade No. 2 or No. 2 yellow. We can ship that same car to Chicago and it will be No. 3 or No. 3 yellow.

I am going over into Kansas for a while now. I want to show that the Kansas farmers are also in favor of Federal inspection.

Mr. SHERMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Illinois?

Mr. McCUMBER. With pleasure.

Mr. SHERMAN. Before the Senator leaves the last State named and proceeds to a widely different part of the Union, I should like to ask him if he thinks under Federal inspection the judgment of inspectors would be exactly the same throughout the United States, and whether there will be no difference between Federal inspectors, as there sometimes is, it is admitted, under State inspection? An inspector, for instance, in Peoria might arrive at a different conclusion from one in East St. Louis. Would not that same difference of human judgment appear in Federal inspection?

Mr. McCUMBER. I have answered that before, Mr. President, and if the Senator had been present a short time ago of course he would not have asked the question at this time. There is no certain line of demarcation between grades. There is a line which must touch on the one side or the other. One man may say it is No. 3 of a poor quality or No. 3. Another may say it is of the best quality of No. 4. But, as already stated, the trouble is not in the mistakes upon getting on one side or the other of this invisible line of demarcation between the grades. It is when you make the jumps from one to two, three and four grades. As is stated by one of the witnesses, if he sent a carload of grain which he thought might possibly grade No. 3, but it is graded No. 2 or No. 4, he would not ask for a reinspection, but if he had what he knew was good No. 2 put down as of no grade at all, he would know that it was a mistake or it was purposely done. All we expect in the matter of Federal inspection is that the inspectors will not be interested, that they will be under the civil service, and that they can not be controlled, or in all probability will not be controlled to the same extent by those who employ them.

Mr. SHERMAN. Mr. President, the answer of the Senator from North Dakota is what I understood had already been explained in part, if not in whole; and I wish the answer to be inserted here as preliminary to a further question. I ask if the Senator from North Dakota does not know that these nice shades of distinction that often appear, as he said, between one inspector and another, which make a difference in the price of grain in the locality when the grain is shipped out, might not account for the difference in grades between Peoria and Chicago, for instance? It is a well-known condition in that section of the country that Peoria prices for corn, for instance, very often exceed by from 1 to 3 cents a bushel the price out in other western points, because of the demand at that point for local consumption, on account of the very great demand at that point for the local needs of the various enterprises there, not alone of the distilleries but of the glucose works as well. This leads to a desire to hold the corn at that point. We meet with a grading often more favorable at Peoria than elsewhere in order to supply that local demand; and where there is a difference, as the Senator very accurately describes, when you get near the dividing line between a higher grade and an inferior grade might not these facts make some difference? I ask the Senator whether he knows that they do not in fact make a difference?

Mr. McCUMBER. Mr. President, there is not the slightest question but that the Senator from Illinois and myself are in absolute accord. He has probably expressed the idea better than I have done, so far as it governs the various boards in making different inspections of the kinds of grain. That is what we are complaining of. That is true. Peoria wants that grain, and therefore she applies what we call "easy" inspection; she will give a better grade in order to get that grain. Chicago may not want that particular grain, or she may be already loaded up, we will say, with grain, and does not desire to buy any more of that grade, and she will have at the same time a rigid inspection. Now, as grain has its value generally according to its standard, according to the grade that is fixed on it, there ought not to be any difference between Peoria and Chicago.

Let me illustrate this a little further, if the Senator will bear with me. When our grain is rather short up in the Northwest, there is then what is called "an easier inspection." We have the same kind of grain, but we have a bigger crop, and the price is very much lower. When we ought to make up the difference, therefore, by getting the grade which belongs to the grain, then we will have an inspection which will put it down below its real character. But the great trouble lies in the fact that if you allow either one of these centers to make a distinction in the methods of grading, it invariably leads to this, that they will have rigid inspection, under the rule, when the wheat is coming in, until the farmer has disposed of most of his grain, and then the grades will rise until the elevators are filled, when they will have a looser or an easier inspection, and the same grain will be graded out higher than it was when it went in.

Mr. SHERMAN. Mr. President, will the Senator from North Dakota allow me to make an inquiry?

The PRESIDING OFFICER (Mr. WEST in the chair). Does the Senator from North Dakota yield to the Senator from Illinois?

Mr. McCUMBER. Certainly.

Mr. SHERMAN. Does the Senator from North Dakota think that the application of civil-service rules will cure all the inequalities of human nature incident to grain inspectors and to everybody else? Is he that optimistic?

Mr. McCUMBER. I have said several times that you can not make a man moral by law; the very best you can do is to remove temptation from him. When you have done that you will have gone a long way toward keeping him in the straight and narrow path. These inspectors go along through temptation and they go along through favoritism. The man who is employed to do work likes ordinarily, when he owes his employment to a particular person, to favor him, and to especially favor him when there is a doubt as to which way he should go. That feeling permeates the breast of every man, and probably it is a very good quality to possess. But in the struggle of life, where your labor is measured by the value of the thing that you are employed upon and the price it will receive in the market, you are entitled to an independent measurement, to an independent weighing, and to an independent certification. That is all that I expect to gain by Federal inspection. I would remove, first, the temptation, and, secondly, by placing these men under the civil-service regulations, I would remove the danger of their being discharged because they insist upon doing their duty.

Mr. SHERMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Illinois?

Mr. McCUMBER. I yield.

Mr. SHERMAN. I do not care to enter into the abstract question of human temptation. I rather incline to the school that believes a man's internal condition has more to do with his behavior than have the external conditions that surround him. We may some time, on some proper text, reach the point here in this Chamber where we may at length expound our reasons for adhering to the one school or the other; but that is foreign to my desires this afternoon. I would rather take an inspector who is honest with any kind of surroundings than to take one who is subject to temptation and remove from him all attractions to fall; but what I want to get at particularly by way of further interrogatory, if the courtesy of the Senator from North Dakota permits, is to inquire whether this same temptation—conceding that that is the proper method or basis of legislation—could not be as well removed by an efficient system of supervision of grades and weights, as provided, for instance, in the Lever bill, introduced on the 13th of March, 1914?

I will follow that by the statement that I am in entire accord with the purpose of the Department of Agriculture and all those who have worked in joint effort with that department to procure and establish, upon adequate investigation, a uniform system, both of grades and weights, and to make it obligatory upon all grain entering into the interstate commerce of the country to require the States having an inspection system established under their statutes to bring themselves to adopt that standard before the grains in the States of their origin shall be admitted into interstate commerce. I am not opposed to, but, on the contrary, I believe in, these inspections and grades and in a uniform system of weights; but I do not think it is necessary that a new bureau be created here under the auspices of the Federal Government and that the State inspection system of some of the principal grain-producing States in the Union, and also some of the States in which there are the large primary markets of the country, be entirely obliterated and pulled up by the roots, so to speak, in order to accomplish these purposes. I am not against the end sought by the Senator from North Dakota, but I am opposing the means, because, in my judgment, the Lever bill, introduced in the House of Representatives very lately, will accomplish all of the good results desired, and standardize both weights and measures, without any corresponding evils.

Mr. McCUMBER. That is the stock argument, Mr. President, of the boards of trade.

Mr. SHERMAN. And it is a very good one, too.

Mr. McCUMBER. It is the stock argument of the boards of trade to-day, though it was not their stock argument a year or two ago, when all of them were opposed even to Government supervision.

Mr. SHERMAN. I do not represent any of them.

Mr. McCUMBER. I appreciate that, Mr. President. I know the Senator does not represent anyone but himself and his State, and he represents them very well, indeed; but here let me ask the Senator a question: Will an inspector who is now inspecting—a good inspector, we will say—under the State board of trade rules lose his integrity or lose his efficiency if he is employed by the General Government?

Mr. SHERMAN. I think not; but, if the Senator will permit——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Illinois?

Mr. McCUMBER. I yield to the Senator to answer the question.

Mr. SHERMAN. It is a categorical question, and it is answered when answered by "yes" or "no." There is no assurance that any of these inspectors, however honest and capable they may be, will be continued in the service. If I had that hope eternal in the civil-service laws of the country producing such results, I might partake of the Senator's frame of mind; but I am somewhat dubious, under the change of administration that comes with the fluctuations of political campaigns, whether these men will be retained, especially in the large centers of population, where the largest markets are located. I think the greatest complaint is made here in this body. I am very doubtful whether the inspectors now in the service who are capable would be retained.

Further, it occurs to me that in the different States where the large markets are now located it would entirely destroy the State inspection service. That, I think, will be admitted as one of the primary results of the passage of this bill. It may not be the primary design, but it will be the primary result because there can not be a double inspection. Most of the States in which the large grain exchanges are found dealing in any of the grains named in this bill are also States of large production. Many of the grains have their origin in those States, and they are inspected under a State system. If there is any of the surplus used beyond the limits of the States entering into the interstate commerce and trade of the country, they would require another inspection. I do not think that two inspections under a supervision system should be required to work side by side, one representing the Government and the other the State inspection system. On the contrary, under the supervision plan, I believe, the standards being fixed by the Department of Agriculture under some such bill as the Lever or the Gore bill, that the State inspection would immediately be required to come up to that level; if it lacked anything in reaching that degree of perfection or desirability it would immediately go to that level. Otherwise, the State inspection system falling short, grains inspected under that system would necessarily cease to go into the interstate commerce of the country. That would of itself bring State inspection to that level.

Mr. McCUMBER. Mr. President, the Senator has strayed far afield from the simple little question which I asked him. The question was asked so that I might go a step further into his argument, whether or not transferring the inspectors from the control of the boards of trade or of the State inspection service to the control of the Government would change the integrity of the individuals. While the Senator has not answered that directly, I gather from all of his remarks that he believes it would make no change in the character of the individual. Very well, then, if the inspector will be just as honest, the provisions of this bill purpose that the Federal Government shall, in the first instance, take over all of the inspectors; that it shall proceed to get rid of those who are incompetent, and keep those who are competent, putting them under civil-service regulations and holding them there just so long as they are competent.

When the Senator has once admitted that he believes in Federal standardization and in Federal supervision, he has practically admitted, in my opinion, all we claim for this bill, with the single exception that he says he does not believe in the Federal employees doing the work. He believes in Federal supervision. What is Federal supervision? Here are on one track 250 cars to be examined. Somebody has to inspect them. The only way that the supervisor will know that all of those cars are properly inspected will be to go and see that they are properly inspected; and if he is capable, through his intelligence, of becoming an overseer of an inspector, he is capable of doing the inspecting himself; and if he is not able to do that I say get rid of him. So you see that, in order to get assured supervision, you would need to have just as many supervisors of inspectors as there are inspectors, and you would certainly need to have men who are just as competent. Then, in heaven's name, why can not the men who are inspectors do the work? There is no reason why they should not; there is no reason for duplicating all of this expense.

Mr. SHERMAN. Mr. President——

Mr. McCUMBER. Let me answer the rest of the Senator's question before he interrupts me again or I will forget it.

The next thing the Senator says is that he has an idea that this bill is designed to do away with State inspection altogether. The Senator is absolutely right. While it does not force the State to do away with its own inspection, the State will not do its own inspecting; it will not even provide inspection for the purely intrastate business. A State can inspect meat, if it sees fit, but everyone is so well pleased with Federal inspection of meat that not a man in the United States would buy meat on State inspection if he could get meat that had passed Federal inspection.

Mr. SHERMAN. Mr. President——

Mr. McCUMBER. Just a moment. Every foreign nation is demanding Federal inspection, every miller is asking for Federal inspection, the producer wants Federal inspection, the purchaser wants Federal inspection, and if you will give an opportunity to buy under Federal inspection, with the confidence that would follow a Government certificate, you could not get purchasers to buy under any other system. Remember also that at least 95 per cent of all the grain that goes into the great terminals is interstate grain; that it has entered or is going to enter into interstate trade, and therefore if 95 per cent of the grain is subject to Federal inspection you can rest assured that the State would not fool away its time upon the other 5 per cent.

But that is not all. Just as the Senator anticipates, if the State carried on a separate system at all, it would undoubtedly adopt the Federal system; but my opinion is that there would be not a single instance in which the State would continue its old system. The States are not continuing State systems of meat inspection, although they had them before the establishment of the Federal system of meat inspection.

Mr. SHERMAN. Mr. President, the Senator certainly is not as well informed concerning the State inspection of meats, as well as other food products, as he is concerning Federal inspection. Several of the States of the Union not only maintain a pure-food department, but a most efficient department, and they are working in many instances in very close relation with similar departments maintained by large municipalities. I want to say that some of the rottenest stuff I have ever eaten at lunch counters in this country came from tins that showed on their face that an inspection had been made by United States authority. For a large part of my life I have been "a lunch-counter fiend," and when the Senator talks to me about a United States certificate I want to tell him that I would place no more confidence in it than I would in the well-managed pure-food department of any State. No particular virtue, nor power nor mentality, accrues to a man because he happens to carry a commission from the United States Government. Some of the greatest rascalities I have ever seen committed, Mr. President, have been committed, I am sorry to say, by those who carried such commissions. That is not because the United States Government is a failure, but it goes to show that the Senator from North Dakota is in error if he assumes that the brand of Federal authority immediately absolves from fault and sin everything that it touches.

Mr. McCUMBER. Oh, no, Mr. President, I do not suppose that a Government certificate will prevent meat from rotting; the law of nature will apply to it just exactly the same. The Senator may, if he indulges too freely at lunch counters, find some meat that bears the mark of Government inspection upon it which has been opened a little bit too long, exposed to the air, or kept in a hot place, so that it may not be very good.

Mr. SHERMAN. Mr. President——

Mr. McCUMBER. No; I want to answer the Senator first.

Mr. SHERMAN. I want to get the Senator right as he is going along.

Mr. McCUMBER. The Senator must hold himself in patience. Somehow or other the law of nature will work just the same when meat is exposed to the sun, to the weather, and to rain after Government inspection as it did before. After we had lost our market in Europe for our meats we gained it mighty quickly after we inaugurated Federal inspection, which was worth millions upon millions of dollars to the great meat packers in the Senator's State. The Government was kind enough to continue it for them, although they opposed it at first. The Government is kind enough to spend between $3,000,000 and

$5,000,000 annually for the benefit of those few packers of meat so that the world may repose confidence in their product because of the Government certificate of inspection; and yet I find the Senate very reluctant even about letting the farmer pay out of his own pocket the cost of the inspection of his grain when he is demanding the right to do so in order to have an inspection by those who he feels are not interested in buying his grain.

Mr. SHERMAN. Mr. President, is that all of the answer?

Mr. McCUMBER. I am not answering; I am making a speech. The Senator is the man who is asking the questions now.

Mr. SHERMAN. I undertook a while ago to correct the Senator and he said he had not finished answering the question. I am trying to adhere to the record as near as I can. The food about which I specifically complained was contained in a can which was opened after I had given my order; it was not opened in advance of the order; and it bore on it, according to the examination I made, the certificate that is usually authorized by the meat-inspection service of the United States; so that if it was spoiled, it was spoiled before the can was opened.

In regard to the packers, if the United States Government spends from three to five million dollars for them when it will not spend anything for my neighbor, who is a farmer, then the Senator has proven too much. The Government must be in partnership with the packers and discriminating against the farmer. They do not do that in my State; they know better; the State government is stronger than that; it is better administered; and there is no such favor shown there.

Mr. McCUMBER. Well, I judge, Mr. President, from the testimony I have read, which seems to differ somewhat from the view of the Senator from Illinois, that a lot of people in the State of Illinois do not think they are getting just and fair treatment under the State law. Of course, there may be a difference of opinion about that; I know the Government may make mistakes; I know that the human mind is not infallible, whether it operates under Government employment or under State employment; but, somehow or other, I think the Senator would be better satisfied with a gold eagle stamped with the Government's certificate of its genuineness than he would with one coined by a private individual who testified to its exact weight. The Government makes no mistakes in its coins; when the Government certificate is upon that gold dollar it circulates anywhere in the world; and there is entire confidence in it. Under Government inspection of grain exactly the same confidence might not be inspired, because possibly there might be mistakes under any kind of a system of grain grading, but there would be a confidence a hundredfold greater than there is under the present system.

Mr. SHERMAN. I should like to ask the Senator a question.

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Illinois?

Mr. McCUMBER. Yes, Mr. President.

Mr. SHERMAN. The comparison is a very favorite one of the Senator and would ordinarily be calculated to carry weight with it. He compares the action of the Government in certifying to the grade of grain and the stamping of the weight and the fineness of gold on a gold coin of the United States. The stamp does not give the coin its legal-tender quality; the metal would have the same value in the market if that fact were determined by other means. That comparison has been used here a great many times; and I wish to ask the Senator if there can be that degree of accuracy in grading grain, which depends entirely on human judgment and the expertness of the inspector, as in the determination of the weight and fineness of gold, whether it be pure gold or gold nine-tenths fine?

Mr. McCUMBER. I answered that a short time ago—and the Senator does not want me to reiterate the statement I made—that there can not be absolute accuracy; but we can reach it to a degree of certainty that may carry confidence; and that is all——

Mr. SHERMAN. It can be approximated.

Mr. McCUMBER. And that is all we expect.

I want now to give a little of the testimony of Mr. Beall, of Kansas City, Kans. I asked the Senator from Kansas if he knew Mr. Beall, and the Senator spoke very highly of the gentleman and of his truthfulness; and, so far as I know, he is telling the truth here. I want the Senator from Illinois to listen to his statement:

Mr. BEALL. In connection with the statement that the last witness has just made in reference to the efforts of the farmers to establish their own commission house, I want to say that the farmers of the State of Kansas in 1905 organized a grain company to be located at Kansas City for the purpose of handling their grain.

I want the Senator to listen carefully, because this will answer his statement that the States are always able to bring about exact justice and see that the people of the country get justice at their hands.

For the benefit of the Senator from Kansas, I will say that these gentlemen were composed of such men as W. T. Harris, of Solomon, president of the Citizens' State Bank there; S. H. McCullough, a large farmer; E. M. Black, down at Preston; and a number of other good men throughout the State. They organized this company and started doing business.

Senator LONG. What was the name of the company?

Mr. BEALL. The National Grain & Elevator Co. They started doing business in Kansas City, Mo. The Kansas City Board of Trade immediately passed a rule prohibiting its members from trading with this company in any manner whatever, the penalty for doing so being expulsion from their board and the loss of something like $3,000 or $4,000 as the price of a membership. So that the farmers in Kansas shipped altogether to this company in Kansas City, Mo., about half a million bushels of grain, which they were compelled to forward on a declining market to other points for sale, at a loss of something like $15,000. The National Grain & Elevator Co. are now suing the Kansas City (Mo.) Board of Trade under the antitrust law of that State for three times the loss they sustained, or about $45,000.

I believe that would be impossible under Federal inspection, and I will tell you why: Because under Federal inspection the Kansas City board would be selling under the same method, and therefore they could not instruct their members not to deal with any other firms that were selling under a different system.

This may be a little foreign to the case here, but I wanted to mention it to show you the absolute control that the Board of Trade of Kansas City, Mo., have of that business, and how impossible it is for the farmers to do their own business, no matter how they may try to do it.

Here is a statement by Mr. Macfadden. He is a banker and a resident of North Dakota. I have read up to this time the testimony of men who were wheat buyers. I shall now quote from the testimony of a banker in my State; and in order that you may understand how the banker gets into it I want to explain this matter.

Our bankers must necessarily deal with our farmers, since North Dakota is an agricultural State. They are therefore interested in the welfare of the farmer. I will assume that as a rule they are better business men and understand the modes and methods of doing business better than the average farmer. They made an investigation of the grain subject and came to the conclusion that the farming people of my State were greatly imposed upon; so the State bankers' association took it up and upon their own motion made an investigation of the grain trade where most of our grain was sold, with the result which I shall shortly call attention to. The secretary of this bankers' association is Mr. Macfadden. Here is a statement made by me:

Senator McCUMBER. I think it is proper for me to state here that on account of the numerous and continued complaints, and the knowledge on the part of the bankers of the State of North Dakota of the injustices perpetrated upon their customers in the State, they appointed a committee at their last annual convention in the State to investigate the grain-trade conditions at the terminals. That committee made its report, and one of the members of that committee was Mr. Macfadden; and he can give you some knowledge of the grain business in that section.

Mr. Macfadden then introduced the resolution and the report of this grain commission. They examined one elevator doing business at this great terminal point, and I want to show the Senator from Illinois the result, and then ask him if that would be possible under Federal inspection. If it is a wrong, it ought to be remedied. We can not remedy it under the State laws or under your board of trade laws. There ought to be some forum to which we can go for a remedy.

Here is the report of the inshipping and outshipping of a certain elevator, and I want to call the attention of the Senator to that. Here is an elevator that received—I think this was during three months—of No. 1 northern 99,000 bushels, and it shipped out 196,000 bushels of No. 1 northern. I am going to give round numbers only. Now, how was that possible? It shipped out about three times as much as it shipped in of No. 1 northern during those three months. Of No. 2 northern it received 141,000 bushels, and it shipped out 467,000 bushels. No. 2 northern is a very good grade of grain. It shipped out 3 bushels of No. 2 northern where it received in 1 bushel of No. 2 northern. No. 2 is the prevailing grade.

Then I will take the next grade. It received in 201,000 bushels of No. 3. It shipped out not a bushel.

What became of the two hundred and odd thousand bushels of No. 3 that were received in that elevator?

Again, it bought in of no grade 116,000 bushels, and it shipped out not one bushel of no grade.

It bought in 59,742 bushels of rejected wheat. It did not ship out one bushel of rejected wheat.

Here you have three of the lower grades, of which there were bought in 201,000, 116,000, and 59,000 bushels, respectively. What became of them? As I stated, they were meta-

morphosed into the higher grades. That was how they were able to ship out 467,764 bushels of No. 2 when they bought in only 141,000. In other words, all of these lower grades of wheat were promoted into the higher ones.

These investigators made an estimate showing that, in the business of undergrading coming in and overgrading going out, this same firm made $83,000 in three months, in addition to the reasonable profits they were making in handling and selling the grain. In other words, with a spread of 3 cents or 4 cents, or whatever the difference in the spread of the grades was, they cleared up, by wrongfully grading, $83,000.

Now, somebody lost that. If it was the farmer that lost it, it was an injustice to him. If he was given an honest grade, and the miller bought the grain and lost this difference, it was an injustice to him, because he was given a grade poorer than that he contracted for. The miller finally will not lose, however, because he will buy again, and the next time he purchases he will pay a less price for the No. 2 grade that was foisted onto him, and which contained several thousand bushels of No. 3, No. 4, and rejected; and as his price, he being one of the purchasers, fixes the selling price in the field of consumption, the Senator can easily see that that will react upon the farmer's price and will reduce the value of every bushel of wheat in the farmer's granary, and may affect every bushel he is raising.

I must read a little bit of Mr. Macfadden's statement here, because it deals with something besides the grades. This was an independent institution, not the farmers themselves, that made this investigation. He says:

We believe in North Dakota that with Government inspection at terminal points State laws could be enacted to govern the handling of grain at the country elevators to at least some extent to conform to Government laws, just as we appoint a State scale inspector or sealer of weights and measures, for instance, to see to it that the scales used in the State are honestly adjusted. Under Government inspection we believe that the shipper would not be compelled to pay freight to the terminal point on the dockage in his grain and then have the dockage confiscated by the terminal elevator without reference to its value.

It is proper here for me to state that not only does the elevator man take the dockage which the farmer ships to him, and on which the farmer pays freight, but when he pays the farmer he does not pay him for the dockage. He sells the dockage back to another farmer, however, who wants cattle feed. It is ground up and he receives $8 a ton for it.

I have seen wheat raised on land which had been seeded to flax the year before and which contained a large percentage of flaxseed, worth double the value of the wheat. The wheat would be docked, say, a pound and a half or 2 pounds for the flaxseed in it, the shipper compelled to pay the freight on the flaxseed in the wheat, and then have the flax confiscated as dockage. We can see no good reason why the shipper should not receive pay for the value of whatever is taken from his wheat as dockage as well as for the wheat itself, less a reasonable charge for cleaning. Nothing taken from grain as dockage by the terminal elevator is lost. The various kinds of seeds or grain are separated and sold on their merits, and even the fine dust collected by the dust collectors is sold for $9 per ton to firms using it in the manufacture of stock food.

I will not say that Government inspection would cure all of this, but I think Government control would go a long way toward curing it by giving publicity to these abuses and showing in what way they might be remedied.

We do not believe that under Federal inspection rules the terminal elevator would be allowed to arbitrarily deduct from the weight of each car 30 pounds, as is now the rule under Minnesota inspection—

Under the Minnesota law and inspection rules at that time, not only did they weigh the grain after it had been cleaned and give the farmer his price for it after the cleaning, but before they paid him they deducted 30 pounds to the car as waste when there was not a bushel of waste in it, as Mr. Macfadden says—

and this after the grain has been elevated to the top of the elevator to the weighing bin and subjected to a suction blast during the process of elevating. There could be no loss to the elevator in simply running the wheat from the weighing bin to the storage bin. You will remember that back there we made the statement that they arbitrarily took 30 pounds from every wagonload that was weighed. In order to make their elevators hold out at the terminal elevators, they take 30 pounds from every carload, but that is after the grain has been elevated. All they have to do is simply to pull the string and drop it into the bin.

Two hundred and fifty thousand cars are annually received and weighed into terminal elevators in Minnesota. Thirty pounds from each car weighed does not look like a large loss to the individual shipper, but the total taken each year amounts to 125,000 bushels, or $125,000 at present prices. How long would the law permit a grocer to openly sell 15½ ounces of sugar for a pound or 35 inches for a yard? I cut the following from a Minneapolis paper yesterday. It is the answer to my question:

"SHORT MEASURE—A MINNEAPOLIS GROCERYMAN IS FINED A HUNDRED DOLLARS FOR CHEATING—WAS ONE OF FOUR RECENTLY INDICTED—THIS ONE PLEADED GUILTY.

"MINNEAPOLIS, *March 31.*

"Dan E. Wright, a grocer's clerk, was fined $100 and given the option of 60 days' imprisonment in the county jail for violating the provisions of the State law in regard to weights and measures. Sentence was imposed by Judge Andrew Holt.

"Wright was one of four grocers indicted. Wright sold to George Mee a paper bag containing 10 pounds and 7 ounces of apples and represented that he was selling Mee a peck of apples. He was the only one of the four grocers and six dairymen indicted who admitted his guilt."

And yet all over Minnesota and the Dakotas, when a country elevator buyer weighs a load of wheat, he gives the weight to the seller as 10 pounds less than it actually is, and the weighmaster, under Minnesota inspection rules, takes 30 pounds from every carload weighed by them.

I could give you some interesting figures to show the profit to the terminal elevator in the matter of dockage, under the rules of Minnesota inspection, and of the profit to the same terminal elevators in the matter of raising grain from the low to higher grades by the process of mixing, but I will not go into that. In 1906 the dockage on wheat inspected into the Minnesota terminal elevators amounted to an average of 27 ounces per bushel, or a total of something over 3,000,000 bushels of dockage on the total amount of wheat handled.

I do not say that all of this would be remedied, but I believe to a great extent it would be under Federal inspection.

The report of the railway and warehouse commissioners of Minnesota for 1906 shows that very little more grain of the higher grades was shipped out of terminal elevators than was taken in.

I want to call especial attention to this. Prior to 1906 I called attention to the table that I have just read. Very well. The next year we found but very little difference between the grades that were shipped in and those that were shipped out; and I really flattered myself that I had accomplished a good deal by even bringing up this question of grain inspection, and the threat that we would have it if there was not greater honesty and integrity in the handling of our grain at the terminals. This witness, however, goes on to show that I was mistaken in that; that while it appeared in their bookkeeping accounts that this was the case, in fact it was not so, because they got persons to purchase it at different grades than those at which they really sold it out to them. He goes on and says:

I have absolute evidence in my possession that it has been the custom for a long time in loading wheat out of terminal elevators to go to mills in the same city to bill it out a grade or two lower than it really is in order to help out the annual reports showing the amount of grain received into and shipped out of terminal elevators of the various grades. A will buy of B a hundred thousand bushels of No. 1 northern wheat in store, and the elevator in shipping it out will report a hundred thousand bushels of No. 2 or No. 3 northern loaded out. All parties concerned understand the transaction, and it cuts no figure to the mill buying the grain.

In other words, if they want to show that they have not raised the grades, that they are shipping out just as much of the No. 2 and No. 3 grades as they bought in, they will get the miller to agree with them that while he pays a No. 1 price he will allow them to certify the grain out as No. 2 or No. 3 grade in order to balance their books right, so that there may be no complaint.

Senator MCCUMBER. They pay the No. 1 price?

Mr. MACFADDEN. They pay the No. 1 price.

We knew that under Federal inspection rules no discrimination would be made in favor of certain terminals. At Duluth, under present rules, all wheat shipped out goes out without dockage. At Minneapolis it is absolutely impossible for an eastern miller or exporter to get any wheat out of the terminal elevators there without dockage. Why is this radical difference made between the two terminals? Why are the rules not the same in both cities?

He proceeds:

The greatest argument in favor of Federal inspection is, of course, in the benefit to the foreign buyers and the consuming public in getting uniform standards or grades. I went to Duluth last week hoping I might be able to get samples of grain of different grades as inspected into the terminal elevator and samples of the same grades as inspected out. I found it impossible to get the samples, for the reason that very little grain is moving just now. It's common talk in the grain trade, however, that cargoes of No. 1 northern wheat going out of Duluth would not inspect any better than No. 2 northern if it were going in.

I do not believe that all of this is smoke with no fire.

I have been told by eastern millers that if our wheat raised in North Dakota could be put in special bins in Duluth or Minneapolis and delivered to them without being mixed or adulterated with other wheats, it would always bring a good premium.

This also holds good with reference to the sale of our grain in foreign countries. I read recently extracts from the Daily Consular Reports giving this mixture as the cause of the serious falling off in the demand for American wheat. This mixing causes a direct loss to the seller of grain of good quality wherever he is, for the price is fixed largely by the quality of the grain sold. Federal inspection would prevent this mixing, to the detriment of the American farmer and the benefit of the owners of the terminal elevators.

It would not prevent mixing, Mr. President; but, if it were mixed, before it could go out into interstate commerce again it would have to be received under the honest grade.

I have picked out at random another report upon another elevator at one of these great terminals, which I inserted in the evidence. While this was a later year and the difference was not nearly so great, I find that in all of these years—and I covered three of them—the inshipping and the outshipping were entirely different.

For instance, of No. 1 northern in 1902 there were received 15,000,000 bushels and shipped out 19,000,000 bushels. In 1903

there were received 21,000,000 bushels and shipped out 23,000,000 bushels. In 1904 there were received 12,000,000 bushels and shipped out 18,000,000 bushels.

When I get to the lower grades we will see a vast difference. There were 7,000,000 bushels of No. 3 northern received in and only 1,971,000 shipped out. In other words, there were nearly four times as many bushels of No. 3 northern received in as were shipped out, all going into the higher grades. I find that they received 1,890,000 bushels of rejected wheat in 1903 and shipped out only 77,000 bushels; that is, there were received in more than twenty-four times as many bushels as were shipped out of that poor grade. So I might follow in the case of all of the others. Of no grade at all there were 2,500,000 bushels received in 1902 and only 500,000 shipped out.

Now, I am going to leave Kansas a while and look over into Indiana, and take the statement of Mr. Brafford, another gentleman who has had years of experience in handling grain. He says here:

Mr. Chairman and Mr. Senators, I have been in the grain business for 16 years as a country grain dealer. I have been a buyer from the farmers since 1892. I have also been secretary for the Indiana Grain Dealers for the last three years. The country grain dealers have organizations, as you probably know, through the different States, and they employ a secretary, and we usually run our elevators in connection with them; and that is what I have been doing.

The Indiana Grain Dealers for the last three years, in all their meetings, have taken action in the matter of grain inspection. They have passed resolutions indorsing Government supervision of grain—that is, they would like to have the Government standardize the grain and fix the grades of grain for interstate business, as the States do now in the matter of fixing the amount of pounds that there shall be in a bushel of corn or a bushel of oats, so that the grades shall be uniform in all the markets, so that the inspectors in all the public markets shall inspect grain according to the same rules, and so that the same class of grain (the condition and everything else being equal) shall grade the same in all the markets.

Our inspection from the farm is final. The farmer drives in with a load of grain, and we get up on the wagon and look at it, and say that we think it ought to be No. 3 corn, say, or No. 2 wheat, and we pass it at that. We make him a ticket, and that settles that part of the contract. We pay for the grain according to that grade. Then, when it comes to shipping it, we have to take the character of the grain, the weight of it, whether it is stained or not, or the condition of it, and figure what market to go to, because the markets vary so. For instance, on oats, if it is white oats that we are shipping, there are about 52 different ways in the United States of inspecting No. 3 white oats. Each market will have a different weight. For instance, in the case of Baltimore, they take 22-pound oats as No. 3 white oats, all other conditions of the oats being equal, because they sell the oats down there by the measured bushel, and they want to buy them by weight, 22 pounds to the bushel, and sell them out by measure, because they gain in that way.

You will see how they will make a great deal by that system. When they want to buy they buy by weight, 22 pounds to the bushel. Therefore if the oats only weighed 22 pounds to the bushel, you see that they would get a measured bushel and a half to every bushel they bought in. Then by selling them out by measurement they would make 50 per cent upon their investment, merely by reason of the different ways of handling the same grain.

It takes more than a Winchester bushel of 22-pound oats, you can readily see, to weigh a bushel. It takes 10 pounds more. But if you happen to go to New York or Buffalo with the oats, they say they must weigh 28 pounds in order to be No. 3 white oats.

Senator PERKINS. That is regardless of the moisture that they contain?

Mr. BRAFFORD. They have only to weigh that. Senator, to be No. 3 white oats. Then they must be dry enough—they must not be musty. There are other things that come in besides the weight.

Senator DOLLIVER. If other things bring them within the No. 3 classification, 28 pounds is the weight?

Mr. BRAFFORD. Yes, sir.

Senator PERKINS. I should like to ask Mr. Brafford a question here. My reason for asking the question is that in the San Joaquin Valley and the Sacramento Valley, in California, 600 miles long, it is very hot; the evaporation is very great; the grain is very wet. When it is purchased in the interior it is stacked. We have no grain elevators. It is taken down to Port Costa or San Francisco or Benicia and put into a warehouse; and those grain sacks, containing 2 bushels of corn, will increase in weight from 1 to 3 pounds a sack, and still it is not musty, nor is the value of the wheat in any way depreciated. My object in making the statement is to ask whether the same influence of moisture cuts any figure here on the Atlantic coast?

I am reading this, Mr. President, because it answers the objections of some of the Senators.

Mr. BRAFFORD. Not in the case of grain. We do not get wheat dry enough to do that here, except in exceptional years. We have had one real dry year when our wheat would do that in Indiana; but ordinarily we have trouble to get it dry enough to go into the grade of No. 2 wheat. The explanation that you have given holds good in the case of clover seed. We usually hull clover (this is getting away from the grain subject, however) when it is very dry. It is figured by clover warehousemen that if they will put that clover seed in the basement or in the first floor of their warehouses it will take on enough weight to pay the interest and the insurance.

That is another good method of paying your insurance rate and your cost of handling—just to get enough water into it, after it has been graded, to make it weigh that much more.

Again, Mr. Brafford says:

The elasticity of the grades is another thing. Here is a certificate for No. 4 white corn [producing papers]. There is a certificate in Indianapolis of corn that we bought in Indianapolis; and their regulation says: "No. 3 mixed corn shall be mixed corn, may be slightly damp, and not clean or sound enough for No. 2. No. 4 mixed corn shall be mixed corn, and include all corn not good enough for No. 3 but good enough for warehousing." That means good enough to go to the warehouse and keep.

There is a car of No. 4 white corn that went to Baltimore—

I am reading this for the special benefit of the Senators from Maryland—

and graded "contract." It unexpectedly did that. We did not think it would. We thought it would take the grade of "steamer corn" in Baltimore. That is the second grade. But it graded No. 4 white corn.

That is a better grade.

There are three cars that did the same thing. Baltimore did not have much corn then.

This carries out the idea that when they are short they loosen up the grades.

Those cars graded No. 4 white corn, to our surprise, and made us more money than we anticipated. A little later on, when Baltimore becomes congested, under these same rules under which we buy in Indianapolis—there is a car of No. 3 mixed corn with an Indianapolis certificate to it. There is a car of No. 3 yellow corn with an Indianapolis certificate to it. There is another car of No. 3 yellow corn with an Indianapolis certificate to it. That goes to Baltimore, and all of those cars go to the drier. I mean by "going to the drier" that they are sent there to have the moisture taken out of the corn by drying it with steam to bring it up, they claim, to "mixed corn." In the early part of the season we could ship old corn which was damp and only good enough for warehousing, and it would grade "contract." A little later on, when they became congested, we would ship No. 3 corn, the best we could buy in southern Illinois, and it would go to Baltimore and go to the drier.

Now, what certainty is there in buying grain and selling it under those conditions? You never know from the end of one day to the other what you are going to get in your final market. The result is that you never know what to pay to the farmer who brings his load of grain to you.

Senator DOLLIVER. What does that prove?

Mr. BRAFFORD. It proves to us that that grain is not graded the same in Baltimore all the time, or else our man in the West is mistaken.

Senator DOLLIVER. Do they grade it by caprice, or according to the dictates of their local interests?

Mr. BRAFFORD. We hate to charge that the inspector there is influenced by the men that employ him; but the chances are that this might happen.

This answers the Senator's question:

He would come around the office there, and they would say: "Now, here, we are congested. We have two or three million bushels of corn here, and our elevators are full, and the boats are not coming in. It is going to be a considerable expense to hold this corn here in the elevators, and we will have to be careful about the grade." They might say that in his presence. They employ him, you know. They hire him. We pay him. They charge us for inspecting every one of these cars. We have nothing to say about the employment or the discharge of the inspector. We have to sell all of our grain subject to his inspection—destination, weights, and grades being final. The European that buys it from the vessel has to do the same way. They buy it from Baltimore, and his inspection and weights are final in Baltimore.

Senator DOLLIVER. In making their contract for the shipment, they have no right to complain of his grading?

Mr. BRAFFORD. They can complain, but they have got their contracts. If he was a good merchant, and they wanted to hold him over there so as to sell to him again, they probably would try to make some sort of a compromise. But the contracts are made on "sale terms." That means Baltimore weights and grades. The Europeans are in the same boat that the western fellow is. He is subject to the same inspector, without any say about it whatever; and that is why the European complains. I have a letter from John R. Griffiths, consul at London, that I wanted to show this committee. I will send it when I get home. I thought I had it among my papers, but it is not here. It sets forth that very fact.

Senator MCCUMBER. What is the effect, in your opinion, of this quiet suggestion to the inspector that they are liable to lose upon the immense amount of grain that they have on hand, by reason of there not being ready purchasers?

Mr. BRAFFORD. As I said in the beginning, Senator, it simply results in this: A corn that we send in the beginning of a crop, when they need a lot of grain, will grade easily; and in a month or two from that time, when the market becomes congested, we can not make a better grade of grain grade at all. There is the evidence, right there. Here are the sworn certificates from the Indianapolis inspector, and here is the report from Baltimore.

Senator PERKINS. There is no climatic influence that would change the value of it, is there?

Mr. BRAFFORD. It might to a certain extent Senator Perkins. They will probably claim that. They will tell you that the climatic influence changed that grain so as to change that grade that much. But No. 3 corn ought not to change that much. It ought not to do it. No. 4 corn might do it. No. 4 corn might get out of condition.

Senator PERKINS. It might heat?

Mr. BRAFFORD. Yes, sir.

Senator DOLLIVER. But in the case of your No. 4 corn the condition seems to have improved.

Mr. BRAFFORD. Yes; it got better. The fact is—and here is the evidence of it—that there is one grade in all the markets in, and another grade out. That is a fact. They will not deny that. The Chicago people may say now that they do not do it, but we have the evidence in the last four weeks that they do. If you have been in the milling business, you probably know something about it.

He continues:

Mr. BRAFFORD. We have the same thing here in New York. Here is the inspection certificate of Indianapolis, and there is the inspection certificate of New York, showing that the grades change—just exactly the same thing.

* * * * * * *

Mr. BRAFFORD. As I was going to say about Chicago, Senator PERKINS, three weeks ago a milling company of Monticello, Ind., which runs a large mill, bought in Chicago five or six cars of grain.

I want the Senator from Illinois to listen to this, because I want to show him that they do make mistakes there, and I think bad ones:

They either bought the option and took delivery, or they bought the real grain from some firm there, and took a Chicago contract for No. 2 red winter wheat for market. They shipped that wheat to Monticello. They opened the cars and found it bin burnt and musty, and they could not use it. They resold those cars. They never unloaded them; they never broke the bulk. They resold those cars and shipped them back to Chicago, and they graded No. 3 red winter wheat.

In other words, they grade No. 2 bin burned absolutely unfit for milling from Chicago, and when they find that it does not conform to the contract of No. 2 they send it back to Chicago, and that same grain is reinspected and they call it No. 3 in a very few days, without any change whatever. Call that incompetency, call it what you will, it is at least unjust to both the buyer and the seller.

Again, he says:

Senator DOLLIVER. Will you state that again, please?

Mr. BRAFFORD. They bought this wheat in Chicago, and took a Chicago contract for No. 2 red winter wheat, and shipped it to Monticello.

A little way out from Chicago.

Senator DOLLIVER. Accompanied by a certificate?

Mr. BRAFFORD. Accompanied by a Chicago certificate; yes, sir, for No. 2 red winter wheat—a certificate from their inspector. They opened the cars, and found it was bin burnt and musty. They resold the cars, never unloaded them, shipped them back to Chicago, and the grain graded No. 3 red winter wheat, on account of being bin burnt and musty.

Senator DOLLIVER. That last statement I do not understand. How did it grade?

Mr. BRAFFORD. It graded No. 3 red winter wheat, one grade lower, on account of being bin burnt and musty.

Senator MCCUMBER. By the same inspector?

Mr. BRAFFORD. I would not say that it was the same man.

Senator MCCUMBER. Not the same inspector, perhaps; but the same inspection?

Mr. BRAFFORD. The same inspection department.

Senator PERKINS. It made the trip down to Monticello and back again?

Mr. BRAFFORD. And changed the character of its grade.

Senator PERKINS. Without changing the car.

Senator DOLLIVER. They must have gotten it out of the elevator there that is used for local trade purposes. They got a delivery on the option, I judge, in that case.

Mr. BRAFFORD. I think that is what they did. I think they told me that they bought the option, and they delivered them out the wheat, and they took delivery on the option.

Senator DOLLIVER. And that delivery was duly inspected and certified?

Mr. BRAFFORD. Oh, yes. They give you a Chicago warehouse receipt for it, and give you an inspection certificate. I saw that there were five cars of wheat in Indianapolis last week shipped to George T. Evans & Son, millers there, that was bought for No. 2 red winter wheat—milling wheat—and it was bin burnt and out of condition.

Senator MCCUMBER. They bought it for milling purposes?

Mr. BRAFFORD. Yes, sir. How they settled it I do not know. I do not know whether they shipped it back or not. I had not found out when I left.

Senator DOLLIVER. What remedy has the buyer in such a case?

Mr. BRAFFORD. They claim that you could sue the Board of Trade of Chicago; but who would go up there and do it? They would tell you that you got what you paid for; that you bought No. 2 red winter wheat, and that is what you got. You say, "I did not get it; and it is bin burnt, and it is musty, and I can not use it for milling." You probably would have a recourse.

Senator DOLLIVER. I do not see how you would have recourse against the Chicago Board of Trade. You might have recourse against the man you bought it from.

Senator MCCUMBER. No; the man you bought it from simply agrees to give you grain that is certified at his market as No. 2; and he has given you that which is certified as No. 2.

So you will see there would be no remedy as against the individual.

Senator DOLLIVER. That is a swindle, of course?

Senator PERKINS. Unless it could be shown by the owner of the wheat and the shipper of the wheat that en route it was bin burnt in the cars.

Mr. BRAFFORD. But, Senator, you know that that would not occur in two weeks.

Senator PERKINS. Hardly.

Mr. BRAFFORD. It would not happen at this time of year.

Senator PERKINS. It might have been sidetracked. I was only trying to qualify the charge that the chairman made, that that was a swindle.

Senator MCCUMBER. Is it not a fact that No. 2 wheat, with the small amount of moisture that could possibly be in it, could not be bin burnt in a car?

Mr. BRAFFORD. It could not get hot if it was No. 2 wheat to start with. It could not get warm, even.

Senator PERKINS. If it was only two weeks en route, it is hardly possible.

Mr. BRAFFORD. No.

Senator PERKINS. I was simply trying to find an excuse; and that is the only thing I could think of.

Senator DOLLIVER. I should think the time would come pretty quickly now when nobody would enter into a contract to receive as No. 2 wheat wheat that was shown to be No. 2 only by being so certified by that board of trade.

Mr. BRAFFORD. Senator, that is a fact. There are a great many men that will not buy wheat from Chicago except subject to a private inspector's report. For instance, there is a man named Costello there who is a private inspector; and a great many firms buy wheat in Chicago on the condition that the grades shall be subject to Costello's approval.

It certainly does not look, Mr. President, as though there was a great deal of confidence in the Chicago grades.

Senator DOLLIVER. If they are certifying it out as No. 2 wheat, it seems to me it would demoralize the wheat market throughout the country tributary to Chicago.

I will not read the balance of that. Further on I read the following:

Senator DOLLIVER. You do not mean to say that the governor of Illinois——

Mr. BRAFFORD. I do not mean that; I mean the men he appoints, the three warehouse commissioners. I do not believe the United States Government would allow that. We never hear anything said about it in the case of meats. We have inspectors there at Kingan's; and I never heard of a complaint about our Government meat inspectors there——

The witness did not hear the Senator from Illinois—

Senator PERKINS. The important point in this line for the benefit of the producer, the farmer, is to have a uniformity of inspection throughout the country?

Mr. BRAFFORD. Yes, sir.

Senator PERKINS. In every State there ought to be a standard of weights and measures and grades of grain that is recognized by all commercial communities.

Mr. BRAFFORD. That is exactly what we are asking for, Senator PERKINS, and they claim that they will give it to us; but they do not. These local influences that I have spoken of, in New York and Baltimore and these other markets, are so strong that they soon lose all their power. You have the idea exactly that we would like to see enforced.

So far as the farmers are concerned, speaking for the small dealers, we are in the grain business to make money. If we start a number of cars to market, and we find them tightening up on us in the market, and we can not make the grade, we are not going to buy 8 or 10 more cars at the same grade and lose more money on them. We have simply got to reduce the price to the farmer. It gets back to the farmer. We may get caught on 10 or 15 cars and lose our money.

Senator DOLLIVER. In making your initial estimate of the grain in the country elevator, are you likely to discount the actual grade of the grain so as to, upon the average, correspond to this handicap which you are likely to encounter when you get to the terminal?

Mr. BRAFFORD. I say, we do do that in the end; if we find we are going to lose money, we have to discount it. We do not in the beginning. The competition is so strong between the country dealers that we overreach ourselves, and we sometimes buy grain that we ought not to buy. For instance, we have done that this year on corn. We bought corn that was too wet to ship.

Senator DOLLIVER. We do not suffer in the Northwest on account of that competition of the buyers.

Mr. BRAFFORD. You do not?

Senator DOLLIVER. No.

Mr. BRAFFORD. I do not know how it is in Iowa. I am only speaking about Indiana.

Senator MCCUMBER. To explain one matter of which you spoke to me, and which you have not made quite clear, I think, to this committee, let me ask this question: Is it a fact that in the competition, we will say, between Baltimore and New York, the time when you shipped them a very good grade of your No. 4 corn and got a grade of No. 3 corn was during one of these periods of contest, so that Baltimore could get grain and bid up a higher grade on it?

Mr. BRAFFORD. Baltimore was short of corn at the beginning. They did not have much in stock.

Senator MCCUMBER. Yes. Now, when Baltimore has succeeded in getting the grain started in that direction, and has loaded up rather heavily, and finds that she can not get an export price to correspond with the grade, etc., that she has given, I want to ask you whether or not she then "loosens up," as we will call it, on her certification, so that she will certify this No. 4 corn as No. 3 and pass it off on to the foreign purchaser at that higher grade, higher than it really is?

Mr. BRAFFORD. The foreigner charges that, you know, Senator. We do not come in competition with that end of it; but that is the foreigner's side of it. In Mr. Griffiths's letter he mentions that. I have talked to a number of the New York exporters, and they claim that they are obliged to grade out a lower grade of grain at a higher grade and sell it at a low figure to induce the Europeans to buy it. They say that they are all Jews over in Europe, and that they will not buy it unless they can buy No. 2 wheat at a No. 4 price. We have not got that kind of Jews out with us. We think they are pretty good business men; but that is the claim they make.

In other words, Mr. President, in order to get them to exercise what they regard as a Jewish propensity, they say they will sell them a No. 1 grade for a No. 3 or 4 price, but in reality they sell them the No. 3 or 4, according to their own admission.

Senator DOLLIVER. What effect does that have on the American price of wheat—to have the No. 2 wheat sold at a price that would naturally correspond with the No. 4 grade?

Mr. BRAFFORD. We feel that it depreciates the price of our wheat.

Senator DOLLIVER. That is stated on the exchanges of the world, I presume, as the price of No. 2 wheat?

Mr. BRAFFORD. Yes, sir; and the European, until the last year or two, has imagined that we had a Government inspection over here. Our consuls have had trouble in explaining it to them over there. It is marked "official," and the European thinks it is Government inspection. The consuls have to tell them that it is private inspection in America; it is not a Government inspection.

Take the city of Toledo. In the year 1896 they made up their minds that they would raise the grade on red winter wheat, and they raised

it to 58½ pounds, without any notice whatever to anybody, suddenly; and when we started to ship the crop, we found that they required 58½ pounds for No. 2 red wheat.

Senator MCCUMBER. Before that it had been what?

Mr. BRAFFORD. Fifty-eight pounds.

Senator MCCUMBER. They could do that overnight?

Mr. BRAFFORD. Yes, sir. So they went through the crop in that way, and there were a number of complaints about it, and people refused to ship to Toledo; and the next year they just changed it back to 58 pounds. It is 58 pounds now. I only bring that in as an instance, to show the caprice of the markets and how they will do. It is like the railroads used to do. They used to put in these "midnight tariffs." We would go to buy grain one week, and next week we would find that a competitor was paying 2 or 3 cents more than we could pay, and we would figure it down and find that he had a special rate somewhere as a result of a "midnight tariff." I am happy to say that Congress has remedied that. I do not believe there are much of any rebates given on grain in the Central West. We fellows that are small in a way can compete with the large dealers in the matter of shipments East.

* * * * * * *

Senator PERKINS. Do its provisions generally meet the approval of the farmers and producers in your State?

Mr. BRAFFORD. The grain dealers have been somewhat divided on the matter. I think 90 per cent of all the country grain shippers are in favor of Government inspection or Government supervision of grain. A great many of them did not seem to want to go further than to have the Government pass a law standardizing the grades and providing that they should have an inspector, something like national banks, to see that the different markets inspected interstate grain under those rules that Congress might set forth, and they called that "Government supervision of grain." Then a great many of them have gone further than that, and simply said that they want straight-out Government inspection. They want the Government to appoint the inspectors. We sent out a list on that subject to the Indiana grain dealers just before I left home.

Senator PERKINS. What percentage, do you say, are in favor of having Government inspectors?

Mr. BRAFFORD. This list here in Indiana shows 80 per cent.

Mr. President, I understand that it is desired to have a short executive session, and as I wish to occupy from half to three-quarters of an hour more on this subject, I will give notice now that immediately after the close of the morning business to-morrow I shall proceed to try to close my remarks upon this matter.

### EXECUTIVE SESSION.

Mr. KERN. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 8 minutes spent in executive session the doors were reopened, and (at 5 o'clock and 30 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, March 17, 1914, at 12 o'clock meridian.

## NOMINATIONS.

*Executive nominations received by the Senate March 16, 1914.*

### UNITED STATES ATTORNEY.

Hubert F. Fisher, of Memphis, Tenn., to be United States attorney, western district of Tennessee, vice Casey Todd, resigned.

### REGISTERS OF THE LAND OFFICE.

John A. Ross, of Sioux Falls, S. Dak., to be register of the land office at Bellefourche, S. Dak., vice William S. McLain, term expired.

Peter Hanson, of Vernal, Utah, to be register of the land office at Vernal, Utah, vice Charles De Moisy, resigned.

### UNITED STATES MARSHAL.

Stephen J. Doyle, of Carrington, N. Dak., to be United States marshal, district of North Dakota, vice James F. Shea, whose term expired February 18, 1914.

### PROMOTIONS IN THE ARMY.

#### INFANTRY ARM.

Lieut. Col. Harris L. Roberts, Twenty-second Infantry, to be colonel from March 13, 1914. Under the provisions of an act of Congress approved March 3, 1911, the officer herein is named for advancement in grade in accordance with the rank he would have been entitled to hold had promotion been lineal throughout his arm since the date of his entry into the arm to which he permanently belongs.

Lieut. Col. George W. McIver, Infantry, unassigned, to be colonel from March 13, 1914, vice Col. John T. Van Orsdale, Seventeenth Infantry, retired from active service March 12, 1914.

Maj. Daniel B. Devore, Infantry, unassigned, to be lieutenant colonel from March 13, 1914, vice Lieut. Col. William M. Wright, unassigned, detailed as adjutant general on that date.

Capt. William Wallace, Seventh Infantry, to be major from March 13, 1914, vice Maj. Edward R. Chrisman, Twenty-ninth Infantry, detached from his proper command.

#### CORPS OF ENGINEERS.

Second Lieut. Charles F. Williams, Corps of Engineers, to be first lieutenant from February 27, 1914, vice First Lieut. Lewis H. Watkins, promoted.

Second Lieut. Gordon R. Young, Corps of Engineers, to be first lieutenant from February 27, 1914, vice First Lieut. Gilbert E. Humphrey, promoted.

Second Lieut. Richard U. Nicholas, Corps of Engineers, to be first lieutenant from February 27, 1914, vice First Lieut. Richard Park, promoted.

### APPOINTMENTS, BY TRANSFER, IN THE ARMY.

Second Lieut. Raymond Morris, Eleventh Cavalry, to be second lieutenant of Infantry, with rank from June 12, 1913.

Second Lieut. John F. Crutcher, Fourth Infantry, to be second lieutenant of Cavalry, with rank from June 12, 1913.

### PROMOTIONS AND APPOINTMENTS IN THE NAVY.

Capt. Charles F. Pond to be a rear admiral in the Navy from the 10th day of March, 1914.

Commander Edward H. Durell to be a captain in the Navy from the 13th day of February, 1914.

Lieut. (Junior Grade) Frank N. Eklund to be a lieutenant in the Navy from the 1st day of July, 1913.

Henry McDonald, a citizen of California, to be an assistant surgeon in the Medical Reserve Corps of the Navy from the 9th day of March, 1914.

Richard M. Little, a citizen of Ohio, to be an assistant surgeon in the Medical Reserve Corps of the Navy from the 10th day of March, 1914.

Pay Inspector Frank T. Arms to be a pay director in the Navy from the 19th day of February, 1914.

Asst. Paymaster Harold C. Gwynne to be a passed assistant paymaster in the Navy from the 7th day of December, 1913.

## CONFIRMATIONS.

*Executive nominations confirmed by the Senate March 16, 1914.*

### COLLECTOR OF CUSTOMS.

Fred C. Pabst to be collector of customs for the district of Galveston.

### PROMOTIONS IN THE ARMY.

#### CORPS OF ENGINEERS.

Lieut. Col. James C. Sanford to be colonel.
Maj. Herbert Deakyne to be lieutenant colonel.
Maj. Charles S. Bromwell to be lieutenant colonel.
Capt. Alfred B. Putnam to be major.
Capt. Clarence O. Sherrill to be major.
Capt. Ernest D. Peck to be major.
Capt. George R. Spalding to be major.
Capt. Elliott J. Dent to be major.
Capt. W. Goff Caples to be major.
First Lieut. Edward D. Ardery to be captain.
First Lieut. Charles K. Rockwell to be captain.
First Lieut. James G. Steese to be captain.
First Lieut. Roger G. Alexander to be captain.
First Lieut. James A. O'Connor to be captain.
First Lieut. Lewis H. Watkins to be captain.
First Lieut. Gilbert E. Humphrey to be captain.
First Lieut. Richard Park to be captain.
First Lieut. Daniel I. Sultan to be captain.
Second Lieut. William C. Sherman to be first lieutenant.
Second Lieut. Rudolph C. Kuldell to be first lieutenant.
Second Lieut. Roscoe C. Crawford to be first lieutenant.
Second Lieut. Earl G. Paules to be first lieutenant.
Second Lieut. Bradford G. Chynoweth to be first lieutenant.
Second Lieut. Milo P. Fox to be first lieutenant.
Second Lieut. John C. Gotwals to be first lieutenant.
Second Lieut. Francis K. Newcomer to be first lieutenant.

#### INFANTRY ARM.

Lieut. Col. Thomas W. Griffith to be colonel.
Maj. Almon L. Parmerter to be lieutenant colonel.
Maj. Samuel E. Smiley to be lieutenant colonel.
Capt. William H. Simons to be major.
Capt. John F. Madden to be major.
First Lieut. Bertram P. Johnson to be captain.
Second Lieut. Joseph C. Hatie to be first lieutenant.
Capt. Harrison J. Price to be major.
First Lieut. Oliver F. Snyder to be captain.
Second Lieut. Ernest L. Pell to be first lieutenant.

#### CAVALRY ARM.

Capt. Charles W. Fenton to be major.
First Lieut. John E. Hemphill to be captain.
Second Lieut. William L. Moose, jr., to be first lieutenant.
Second Lieut. Charles D. Rogers to be first lieutenant.

COAST ARTILLERY CORPS.

Second Lieut. Philip M. Ljungstedt to be first lieutenant.

MEDICAL RESERVE CORPS.

*First lieutenants.*

Morris Fishbein.
Benjamin Hobson Frayser.
Edward Sutton Gooch.
William Henry Huntington.
Hugh Farber McGaughey.
Ashley Baker Morrill.
Charles Benjamin Palmer.
Leo Francis Schiff.
Charles Mason Smith.
Herbert Edward Wheeler.
Reinhard Ernst Wobus.

APPOINTMENTS, BY TRANSFER, IN THE ARMY.

*Second lieutenants.*

Second Lieut. Paul D. Carlisle.
Second Lieut. Louis A. Craig.

POSTMASTERS.

MISSOURI.

Adolph B. Bertram, Rockport.

NORTH CAROLINA.

Owen Gudger, Asheville.

TEXAS.

Fred R. Ridley, Campbell.

---

## HOUSE OF REPRESENTATIVES.

MONDAY, *March 16, 1914.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

We come to Thee, our God, our Father, at the beginning of this new congressional week, that we may renew our allegiance to Thee, ourselves, and the work Thou hast given us to do.

The stars follow their courses with unerring precision; the flower springs by the wayside, buds, blooms, and exhales its fragrance; the bird builds its nest, rears its young; these just because they can not help it. Not so with us, since Thou hast made us thinking, willing, loving beings, endowed with the power of choice. Help us, therefore, to think right and bend our will to every task, putting our hearts into them, that we may glorify Thee, ourselves, and our work and enjoy the full fruition of our labors. In Christ Jesus our Lord. Amen.

The Journal of the proceedings of Saturday last was read and approved.

CORRECTION.

Mr. CURRY. Mr. Speaker, a couple of days ago a bound copy of the permanent RECORD of the extra session was delivered to me. On examination of the RECORD of November 11, 1913, I am recorded as asking for and being granted an indefinite leave of absence. I recognize that it is too late to have it corrected, but I would like to have it appear in the RECORD that I did not ask for and was not granted leave of absence. The Member who was granted leave of absence was the gentleman from Massachusetts, Mr. Curley, who is now mayor of Boston.

The SPEAKER. This announcement will appear in the RECORD.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed without amendment joint resolution of the following title:

H. J. Res. 217. Joint resolution to convey the thanks of Congress to the captain of the American steamer *Kroonland*, of the Red Star Line, and through him to the officers and crew of said steamer, for the prompt and heroic service rendered by them in rescuing 89 lives from the burning steamer *Volturno* in the north Atlantic Ocean.

The message also announced that the Senate had passed bills and joint resolution of the following titles, in which the concurrence of the House of Representatives was requested:

S. 4255. An act to mark the approaches to the Cape Cod Canal and Buzzards Bay and Barnstable Bay;

S. 4714. An act to authorize Louis Eder to enter lands under the homestead laws; and

S. J. Res. 122. Joint resolution authorizing the Secretary of War to loan certain tents for the use of the Confederate veterans' reunion, to be held at Jacksonville, Fla., in May, 1914.

The message also announced that the Senate had passed, with amendments, bill of the following title, in which the concurrence of the House of Representatives was requested:

H. R. 10523. An act making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1915, and for other purposes.

ENROLLED JOINT RESOLUTION SIGNED.

Mr. ASHBROOK from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled joint resolution of the following title, when the Speaker signed the same:

H. J. Res. 217. Joint resolution to convey the thanks of Congress to the captain of the American steamer *Kroonland*, of the Red Star Line, and through him to the officers and crew of said steamer, for the prompt and heroic service rendered by them in rescuing 89 lives from the burning steamer *Volturno* in the north Atlantic Ocean.

SENATE BILLS AND JOINT RESOLUTION REFERRED.

Under clause 2 of Rule XXIV, Senate bills and joint resolution of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 4255. An act to mark the approaches to the Cape Cod Canal and Buzzards Bay and Barnstable Bay; to the Committee on Interstate and Foreign Commerce.

S. 4714. An act to authorize Louis Eder to enter lands under the homestead laws; to the Committee on the Public Lands.

S. J. Res. 122. Joint resolution authorizing the Secretary of War to loan certain tents for the use of the Confederate Veterans' Reunion, to be held at Jacksonville, Fla., in May, 1914; to the Committee on Military Affairs.

CHANGE OF REFERENCE.

Mr. DENT, from the Committee on Military Affairs, asked unanimous consent that the reference of the bill (S. 751) to repeal section 3480 of the Revised Statutes of the United States be changed from the Committee on Military Affairs to the Committee on the Judiciary.

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, has not a similar bill been reported from the Committee on Military Affairs?

Mr. DENT. No; such a bill has not been considered by the Committee on Military Affairs. The section which this bill proposes to repeal is the section which prevents certain officers of the Army and cadets at the Military Academy prior to the Civil War from proving certain claims on account of their subsequent service in the Confederate Army.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. This is unanimous-consent day, and the Clerk will read the title to the first bill on the calendar.

ACTIONS FOR DEATH ON THE HIGH SEAS.

The first bill on the Calendar for Unanimous Consent was the bill (H. R. 6143) relating to the maintenance of actions for death on the high seas and other navigable waters.

Mr. BRYAN. Mr. Speaker, I object to that bill.

The SPEAKER. The gentleman from Washington objects, and it will be stricken from the calendar.

PATENTS TO PUBLIC LANDS.

The next bill on the Calendar for Unanimous Consent was the bill (H. R. 1651) to authorize the issuance of absolute and unqualified patents to public lands in certain cases.

Mr. TAYLOR of Colorado. Mr. Speaker, I ask that that bill be passed over without prejudice, for the reason that the Senate has passed a similar bill. It has been before the Public Lands Committee of the House, and it has the favorable report of the committee, and should have been on the calendar before this, but owing to some oversight on the part of the gentleman from Illinois [Mr. GRAHAM] it has not been reported.

Mr. MANN. The gentleman says it has not been reported?

Mr. TAYLOR of Colorado. It has been favorably recommended by the Committee on the Public Lands.

Mr. MANN. I do not think it is on the calendar. If it was, the gentleman might ask unanimous consent to substitute it, but he can not do that without having the original bill.

Mr. TAYLOR of Colorado. That is what I want to do. I can not take up the House bill without its being on the calendar. I ask unanimous consent that it go over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

MINE-RESCUE STATION AT M'ALESTER, OKLA.

The next bill on the Unanimous Consent Calendar was the bill (H. R. 3988) for the purchase of a building and lot as a mine-rescue station at McAlester, Okla.

Mr. FERRIS. Mr. Speaker, I see that both the gentleman from Oklahoma [Mr. CARTER] and the gentleman from Florida [Mr. CLARK] are not in the Chamber. I ask that that bill be passed without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma? [After a pause.] The Chair hears none.

BRIDGE ACROSS SWINOMISH SLOUGH.

The next bill on the Calendar for Unanimous Consent was the bill (H. R. 12594) to authorize the county commissioners of Skagit County, Wash., to construct a bridge across Swinomish Slough opposite the town of La Conner.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the county commissioners of Skagit County, Wash., are hereby authorized to construct, maintain, and operate a bridge and approaches thereto across Swinomish Slough, opposite the town of La Conner, at or near the end of Morris Street, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

With the following committee amendment:

Insert, page 1, line 6, after the word "Slough," the words "at a point suitable to the interests of navigation."

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. ADAMSON, a motion to reconsider the vote whereby the bill was passed was laid on the table.

TERMS OF COURT AT STEUBENVILLE, OHIO.

The next bill on the Calendar for Unanimous Consent was the bill (H. R. 5849) to amend section 100 of an act to codify, revise, and amend the laws relating to the judiciary approved March 3, 1911.

The SPEAKER. Is there objection?

Mr. MANN. I ask to have the bill reported.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That section 100 of the act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, be, and the same is hereby, amended so as to read as follows:

"SEC. 100. That the State of Ohio is divided into two judicial districts, to be known as the northern and southern districts of Ohio. The northern district shall include the territory embraced on the 1st day of July, 1910, in the counties of Ashland, Ashtabula, Cuyahoga, Carroll, Columbiana, Crawford, Geauga, Holmes, Lake, Lorain, Medina, Mahoning, Portage, Richland, Summit, Stark, Tuscarawas, Trumbull, and Wayne, which shall constitute the eastern division; also the territory embraced on the date last mentioned in the counties of Auglaize, Allen, Defiance, Erie, Fulton, Henry, Hancock, Hardin, Huron, Lucas, Mercer, Marion, Ottawa, Paulding, Putnam, Seneca, Sandusky, Van Wert, Williams, Wood, and Wyandot, which shall constitute the western division of said district. Terms of the district court for the eastern division shall be held at Cleveland on the first Tuesdays in February, April, and October, and at Youngstown on the first Tuesday after the first Monday in March; and for the western division, at Toledo on the last Tuesdays in April and October. Grand and petit jurors summoned for service at a term of court to be held at Cleveland may, if in the opinion of the court the public convenience so requires, be directed to serve also at the term then being held or authorized to be held at Youngstown. Crimes and offenses committed in the eastern division shall be cognizable at the terms held at Cleveland or at Youngstown, as the court may direct. Any suit brought in the eastern division may, in the discretion of the court, be tried at the term held at Youngstown. The southern district shall include the territory embraced on the 1st day of July, 1910, in the counties of Adams, Brown, Butler, Champaign, Clark, Clermont, Clinton, Darke, Greene, Hamilton, Highland, Lawrence, Miami, Montgomery, Preble, Scioto, Shelby, and Warren, which shall constitute the western division; also the territory embraced on the date last mentioned in the counties of Athens, Belmont, Coshocton, Delaware, Fairfield, Fayette, Franklin, Gallia, Guernsey, Harrison, Hocking, Jackson, Jefferson, Knox, Licking, Logan, Madison, Meigs, Monroe, Morgan, Morrow, Muskingum, Noble, Perry, Pickaway, Pike, Ross, Union, Vinton, and Washington, which shall constitute the eastern division of said district. Terms of the district court for the western division shall be held at Cincinnati on the first Tuesdays in February, April, and October; and for the eastern division at Columbus on the first Tuesdays in June and December, and at Steubenville on the first Tuesdays of March and October. Grand and petit jurors summoned for service at a term of court being held at Columbus may, if in the opinion of the court the public convenience so requires, be directed to serve also at the term being held or authorized to be held at Steubenville. Crimes and offenses committed in the eastern division shall be cognizable at the terms held at Columbus or at Steubenville, as the court may direct. Any suit brought in the eastern division may, in the discretion of the court, be tried at the term held at Steubenville: *Provided*, That suitable rooms and accommodations for holding court at Steubenville shall be furnished free of expense to the Government until the completion of the Federal building: *And provided further*, That terms of the district court for the southern district shall be held at Dayton on the first Mondays in May and November. Prosecutions for crimes and offenses committed in any part of said district shall also be cognizable at the terms held at Dayton. All suits which may be brought within the southern district, or either division thereof, may be instituted, tried, and determined at the terms held at Dayton."

Mr. MADDEN. Mr. Speaker, I reserve the right to object. I would like to know how many cases there will be tried at Steubenville in a year, and whether there are any cases, as a matter of fact, tried at Dayton, which already has a term of court fixed for it?

Mr. BRUMBAUGH. Mr. Speaker, if the gentleman will permit, I did not know that this bill was coming up for consideration at this time. I am going to ask unanimous consent that the bill be passed over without prejudice, as my understanding at present is that there is no necessity for a further division of this kind. I desire to look into the matter before it is put upon its passage.

Mr. MADDEN. I have no objection to its going over.

The SPEAKER. The gentleman from Ohio asks unanimous consent that the bill be passed over without prejudice. Is there objection?

There was no objection.

BRIDGE ACROSS TUG FORK, PIKE COUNTY, KY.

The next business on the Calendar for Unanimous Consent was the bill (S. 4019) to authorize the Tug River & Kentucky Railroad Co. to construct a bridge across the Tug Fork of the Big Sandy River at or near the mouth of Blackberry Creek, in Pike County, Ky.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the Tug River & Kentucky Railroad Co., a corporation organized under the laws of the State of Kentucky, its successors and assigns, be, and they are hereby, authorized to construct, maintain, and operate a bridge and approaches thereto across the Tug Fork of Big Sandy River at a point suitable to the interests of navigation near the mouth of Blackberry Creek, in Pike County, Ky., where the said Tug Fork forms the boundary line between the States of West Virginia and Kentucky, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. ADAMSON, a motion to reconsider the vote by which the bill was passed was laid on the table.

PATENTED LANDS IN YOSEMITE NATIONAL PARK.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 12533) to amend section 1 of an act of Congress approved April 9, 1912 (37 Stats., 80), entitled "An act to authorize the Secretary of the Interior to secure for the United States title to patented lands in the Yosemite National Park, and for other purposes."

The Clerk read the bill.

The SPEAKER. Is there objection?

Mr. MADDEN. Mr. Speaker, reserving the right to object, there has been a good deal of talk on the floor of the House during the last few days about the iniquity of transferring lands in one section of the country for lands in another section of the country, without knowing what the value of the land to be exchanged is, and unless there is some good reason shown here why these lands should be exchanged without any prejudice to the rights of the people or to the public interests I expect to object to the consideration of the bill.

Mr. RAKER. Mr. Speaker, I would call the gentleman's attention to the fact that in reading the report he will notice that the Secretary of Agriculture and the Secretary of the Interior have made a cruise of all of the timber upon the land desired to be exchanged by the Government, as well as the land the Government is to receive from the private individuals. The land adjoins the several tracts. Most of the land is in the Yosemite National Park, and that now desired to be obtained by the Government which is in private ownership is along the scenic road coming from the valley known as Wawona Road into the Yosemite Valley.

Mr. MADDEN. Mr. Speaker, how much of this land that is proposed to be exchanged for other lands is owned by railroad companies?

Mr. RAKER. Something like 2,500 acres.

Mr. MADDEN. Mr. Speaker, I object to the consideration of the bill.

The SPEAKER. The gentleman from Illinois objects, and the bill is stricken from the calendar.

Mr. RAKER. Mr. Speaker, I ask unanimous consent, and I know the gentleman will agree to this, that this bill be passed over without prejudice.

The SPEAKER. The gentleman from California asks unanimous consent that the bill be passed over without prejudice. Is there objection?

Mr. MADDEN. I object.

The SPEAKER. The gentleman from Illinois objects, and the bill is stricken from the calendar.

BOARD OF REGENTS, SMITHSONIAN INSTITUTION.

The next business on the Calendar for Unanimous Consent was Senate joint resolution 114, for the appointment of a member of the Board of Regents of the Smithsonian Institution.

The Clerk read the resolution, as follows:

*Resolved, etc.*, That the vacancy in the Board of Regents of the Smithsonian Institution in the class "other than Members of Congress" shall be filled by the reappointment of Charles F. Choate, jr., a citizen of Massachusetts.

The SPEAKER. Is there objection?

Mr. MURDOCK. Mr. Speaker, reserving the right to object, I would like to know if the gentleman from Massachusetts can explain how this Board of Regents is appointed—who constitutes the board?

Mr. THACHER. Mr. Speaker, there are 14 members on the board, which is composed of 3 Senators, 3 Representatives, the Chief Justice of the Supreme Court, the Vice President of the United States, and six private citizens.

Mr. MURDOCK. All appointed by joint resolution?

Mr. THACHER. They are appointed by the Congress.

Mr. ROBERTS of Massachusetts. Mr. Speaker, will the gentleman from Massachusetts yield?

Mr. THACHER. I yield.

Mr. ROBERTS of Massachusetts. Mr. Speaker, the three members from the Senate are appointed by the Senate; the three members of the House are appointed by the Speaker; the six nonofficial or noncongressional members are appointed by joint resolution.

Mr. MURDOCK. How is the Chief Justice appointed?

Mr. ROBERTS of Massachusetts. He is appointed by the statute, as is the Vice President of the United States.

Mr. MURDOCK. What is the tenure of office of this place? How long does the man appointed hold office?

Mr. ROBERTS of Massachusetts. My impression is that the civilian or noncongressional members hold office for six years. I will not be certain about that. The House members are appointed for two years, and I am not certain about the tenure of office of the Senate members.

Mr. MURDOCK. Does the gentleman know the tenure of office of the gentleman who is now seeking reelection?

Mr. THACHER. Mr. Speaker, this is to fill a vacancy. There are two vacancies at the present time, one caused by the death of Senator Bacon, of Georgia, and the other by the fact that the term of Mr. Choate expired on February 24. This is to fill the vacancy caused by expiration of the term of office; to reappoint him, in other words.

Mr. MURDOCK. What do these Regents do?

Mr. THACHER. We have a distinguished Member here who is a member of the Board of Regents, and I will yield to him to answer that question.

Mr. ROBERTS of Massachusetts. Mr. Speaker, I have only had the honor of being a Regent since the latter part of December last, but my understanding is that the Regents in a broad way direct the policy and activities of the Smithsonian Institution and that the practical work is carried out by the secretary of that institution.

Mr. MURDOCK. Well, I suppose the Regents are purely honorary positions?

Mr. ROBERTS of Massachusetts. Very largely so. I will say, so far as I am advised, there is an executive committee, which, I am rather of the opinion, is really the governing body.

Mr. SLAYDEN. Will the gentleman permit me to ask him a question?

Mr. ROBERTS of Massachusetts. Certainly.

Mr. SLAYDEN. Is it not the case the governing body there is the secretary of that institution, and the Board of Regents do what they are advised to do by him, as a matter of fact?

Mr. ROBERTS of Massachusetts. I am not able to state that, because of my short service on that board.

Mr. SLAYDEN. And they do well to be advised by him, I think.

Mr. ROBERTS of Massachusetts. I agree thoroughly with the gentleman from Texas that the secretary of the institution is a very able man and a very distinguished scientist as well.

Mr. SLAYDEN. I know that is true. What is the salary, by the way?

Mr. ROBERTS of Massachusetts. I do not know.

Mr. MANN. Ten thousand dollars a year.

Mr. MURDOCK. The gentleman from Illinois says the salary is $10,000 a year. I have no objection.

The SPEAKER. Is there objection?

Mr. MURDOCK. Reserving the right to object, do the Regents draw any salary?

Mr. THACHER. No, sir.

Mr. ROBERTS of Massachusetts. I have not received any and have not been advised that any was coming to me.

Mr. MURDOCK. Does my friend know what the tenure of office is?

Mr ROBERTS of Massachusetts. Yes, sir; the tenure of office of a Member of the House is two years. They must be reappointed every two years.

Mr. MURDOCK. Without salary?

Mr. THACHER. Without salary.

Mr. ROBERTS of Massachusetts. And without perquisites?

Mr. MANN. Oh, they get one perquisite—a ride to the meeting.

Mr. GOULDEN. Will my friend from Massachusetts inform me whether he has ever attended a meeting?

Mr. ROBERTS of Massachusetts. Mr. Speaker, in answer to the gentleman from New York, I will say I have attended one meeting of the board, the only one which has been called since I have been a member.

Mr. GOULDEN. Then my friend finds the office is not entirely ornamental, but useful as well.

Mr. ROBERTS of Massachusetts. It is not wholly ornamental.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed.

ASSAY OFFICE, NEW YORK CITY.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 13296) for the enlargement, etc., of the Wall Street front of the assay office in New York.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That all unexpended balances of appropriations heretofore made under the authority contained in the acts of Congress approved March 4, 1911, and August 26, 1912, for the enlargement, etc., of the Wall Street front of the assay office in New York City, and for vaults therefor, and architectural, engineering, and other technical services in connection therewith, are hereby reappropriated and made available for the erection of a new fireproof building on said Wall Street front, in continuation, or extension of the present assay office building fronting on Pine Street, together with suitable vaults for use of said assay office and the adjoining subtreasury, and, if necessary, an entrance from or connection with said subtreasury for access therefrom, at a total limit of cost of not exceeding in the aggregate the present limits of cost for building, vaults, connection with the subtreasury, and the architectural, engineering, or other technical services in connection therewith, of $607,408.

SEC. 2. That the authority heretofore given to the Secretary of the Treasury to employ, in his discretion, such architectural, engineering, or other technical services as he may deem necessary in connection with the enlargement, remodeling, or extension of the portion of the assay office in New York City fronting on Wall Street, and to pay for such services from the unexpended balance of the appropriation from which the rear portion of said assay office was constructed, is hereby continued with respect to said new building, payment therefor within the limit heretofore fixed to be made from the amounts herein reappropriated.

SEC. 3. That the Secretary of the Treasury be, and he is hereby, further authorized to employ in connection with the Supervising Architect's Office, and without regard to the civil-service laws, rules, or regulations for service, either within or without the District of Columbia, such other specially skilled technical, engineering, consulting, and superintending services as he may deem necessary; all such specially skilled technical, engineering, consulting, and superintending services to be exclusively employed in connection with the plans and specifications for said vaults and the foundations of said building and vaults. And the Secretary of the Treasury is hereby authorized to pay for such services mentioned in this paragraph such compensation and such actual necessary traveling and subsistence expenses in connection with such work as he may deem reasonable, from the amounts herein reappropriated, all such additional services and traveling expenses hereinbefore authorized to be in addition to and independent of the authorizations and appropriations for personal services and traveling expenses in said office otherwise made.

And in razing said Wall Street front the Secretary of the Treasury may dispose, by gift or otherwise, of the façade of said present building with a view to the preservation of said façade: *Provided*, That the United States shall not be put to any expense beyond that for said razing.

The committee amendments were read as follows:

Page 1, line 10, strike out the words "reappropriated and" and insert the words "authorized to be."

Page 2, line 17, strike out the word "reappropriated" and insert the word "authorized."

Page 3, line 8, strike out the word "reappropriated" and insert the word "authorized."

The SPEAKER. Is there objection?

Mr. FOSTER, Mr. MANN, Mr. BUCHANAN of Illinois, Mr. MOORE, and Mr. MURDOCK reserved the right to object.

The SPEAKER. Several gentlemen reserve the right to object.

Mr. FOSTER. Mr. Speaker, several provisions of this bill. It seems to me, that the House ought to have some explanation about. For instance, there is the employment of those men outside of the Supervising Architect's Office being paid travel-

ing expenses, and so on, and I think the House has by act done away with the employment of those men and I do not believe by special legislation, unless there is some very good reason for it, they ought to be in the bill reported specially for some project; and then I notice on page 1 it says, "enlargement, etc." I do not know just what that means. I suppose it refers to the old bill; and then there is another matter in giving away the façade of the present building. It seems to me we ought to have an explanation of this matter also, and I do not know who is in charge of this bill——

Mr. AUSTIN. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. The gentleman from Tennessee asks unanimous consent that this bill be passed over without prejudice.

Mr. AUSTIN. Mr. Speaker, I withdraw my request.

Mr. LOGUE. Mr. Speaker——

The SPEAKER. Is there objection?

Mr. MURDOCK. Mr. Speaker, reserving the right to object, I understand we are to have an explanation of the bill.

The SPEAKER. The gentleman will explain it.

Mr. LOGUE. Mr. Speaker, the Committee on Public Buildings and Grounds reported this bill favorably, based upon these facts: Under two acts of Congress appropriations equal in amount to that specified in the present bill were made for the alteration and improvement of the assay building in New York and the construction of vaults. An explanation of what change is to be made will be given by my colleague from New York [Mr. CANTOR], but I might say a new building can be erected and safes installed for exactly the same sum of money heretofore provided. This does not appropriate a single penny beyond that which has heretofore been provided. It merely authorizes the use for the erection of a new building of the money appropriated for repairs and alterations.

It actually enables a new building to be constructed for the sums of money heretofore appropriated.

Mr. MOORE. Will my colleague yield?

Mr. LOGUE. Certainly.

Mr. MOORE. Looking at the report I find that the erection of this new building became necessary, because of—

the involved nature of the existing legislation it is desired that amendatory legislation shall be passed which will not only authorize the construction of the new building but clear up the situation generally.

The bill presumes to appropriate $607,000. Can the gentleman explain the character of the involved legislation that is referred to?

Mr. LOGUE. It merely seeks to authorize the expenditure for a new building of that which was heretofore appropriated for alterations and repairs. And my colleague from New York [Mr. CANTOR] is familiar with the legislation, and I believe he can give the information the gentleman desires.

Mr. MOORE. I want to ask the gentleman——

Mr. FOSTER. Can the gentleman explain why it is?

Mr. MOORE. No. But I want to ask the gentleman from New York [Mr. CANTOR] again if the necessity for this did not arise out of the concentration of assay offices in the city of New York?

Mr. CANTOR. There is no change in that respect there.

Mr. MOORE. Is it not a fact that we abolished assay offices elsewhere and concentrated them at New York?

Mr. CANTOR. I can not answer that question. All I know is that this bill comes from the Treasury Department, and the present assay office in New York was discovered several years ago to be inadequate for the Government needs.

Mr. MOORE. This bill carries an authorization for $607,000.

Mr. CANTOR. It is a reappropriation only. Not a dollar of additional appropriation is made by this bill.

Mr. MOORE. Why, then, does not the committee recommend the substitution of "authorized" for "appropriated"?

Mr. CANTOR. Because it did not go to the Appropriations Committee. I will explain to the House that this bill was referred to the Committee on Public Buildings and Grounds by the Speaker.

Mr. MURDOCK. Will the gentleman yield there?

Mr. CANTOR. Yes.

Mr. MURDOCK. The bill to which he refers was a bill for the alteration of the building?

Mr. CANTOR. No and yes. The original bills were sent to the Committee on Appropriations. This bill provides for a reconstruction of a part of the building, which made it necessary under the rules for it to go to the Committee on Public Buildings and Grounds instead of to the Committee on Appropriations, and it therefore required a change in the phraseology of the bill.

Mr. MURDOCK. The original proposition was to alter this building?

Mr. CANTOR. Yes.

Mr. MURDOCK. And this is to construct a new building?

Mr. CANTOR. It is not.

Mr. REED. Will the gentleman from New York yield?

Mr. CANTOR. Yes.

Mr. REED. This bill, as I understand it, was in the last appropriation bill, and it went out on a point of order that I made against it, with many other similar items.

Mr. CANTOR. It did not.

Mr. REED. It went out because I made a point of order on it, following the rejection by the chairman of the committee of two or three other buildings of which I had knowledge.

Mr. CANTOR. That may have been so last year, but not this year, as I understand it; now, as to this bill, I have carefully watched it since I introduced it, and it did not find its way into the appropriation bill, so far as my knowledge extends. This bill was introduced by me at the request of the Secretary of the Treasury, and there being a change in the character of the construction to some extent, as I have tried to explain, the Speaker sent this bill where it properly belonged, namely, to the Committee on Public Buildings and Grounds, and not to the Appropriations Committee.

Mr. LOGUE. The money has been appropriated.

Mr. CANTOR. The money has been appropriated for this specific purpose.

Mr. MOORE and Mr. STAFFORD rose.

The SPEAKER. To whom does the gentleman yield?

Mr. CANTOR. I yield to the gentleman from Wisconsin [Mr. STAFFORD].

Mr. STAFFORD. I understood from the gentleman's explanatory remarks that this bill originated with the Treasury Department?

Mr. CANTOR. Yes.

Mr. STAFFORD. Before the gentleman took the floor I intended to direct this inquiry to the gentleman from Pennsylvania [Mr. LOGUE], who reported the bill. I notice in reading the report there is absent the customary recommendation from the Treasury Department. All reference as to whether the Treasury Department approves or does not approve of this bill is wanting, except an excerpt from some memorandum of the Supervising Architect. Will the gentleman from New York [Mr. CANTOR] yield to the gentleman from Pennsylvania [Mr. LOGUE] to state whether this bill has been submitted to the Treasury Department or not, and that the committee has had the recommendations of that department concerning this proposition?

Mr. CANTOR. The Secretary of the Treasury authorized one of his assistants in the Supervising Architect's Office to appear before the committee and he made an argument in favor of the bill.

Mr. LOGUE. He did actually appear before us and made an argument in favor of the bill.

Mr. BARTLETT. This proposition, if the gentleman will permit, was submitted in an appropriation on the deficiency bill of last year by the Secretary of the Treasury. It went out on a point of order.

Mr. CANTOR. Not this year?

Mr. BARTLETT. Last year. The Secretary of the Treasury recommended it to the Committee on Appropriations, and the Supervising Architect of the Treasury has twice appeared before the Committee on Appropriations, favoring this proposition.

Mr. STAFFORD. The gentleman is well aware that in bills of this character the reports generally contain the letter of the Secretary of the Treasury approving of the project. In this report there is no such recommendation.

Mr. BARTLETT. I understand that. I suppose the gentleman proceeded on the idea that the recommendation was properly contained in a statement to the Committee on Appropriations, and——

Mr. STAFFORD. The statement of the gentleman from Georgia [Mr. BARTLETT] is entirely satisfactory to me, so far as the want of a letter in the report is concerned.

Mr. BARTLETT. I know the Treasury Department thinks this the proper thing to do, and from the evidence before the subcommittee, of which I was a member, we thought it was the proper thing to do, and so reported.

Mr. CANTOR. And I will also add that the building is now under construction, and this bill is required to finish it.

Mr. MURDOCK. Will the gentleman explain why the Supervising Architect is relieved from the operation of the civil-service law?

Mr. CANTOR. I will tell you why. In the first place, Mr. Speaker, this is an exceptional part of New York. It is sur-

rounded by some of the largest buildings in the world, and it requires engineering experts for the foundation as well as for the architectural features of the building. That is the reason why the exception is made in this bill. There are buildings in that neighborhood ranging all the way from 15 to 40 stories high, and they have to go down to a considerable depth for a foundation to support the building, and we require the services of foundation experts in order to protect the building.

Mr. MURDOCK. Does the gentleman mean that the regular force in the Office of the Supervising Architect is not equal to the performance of this duty?

Mr. CANTOR. Yes. They have no experts suited for that work. It requires special skill, and there is no such expert in that department.

Mr. MURDOCK. I want to ask the gentleman whether the Supervising Architect so holds?

Mr. CANTOR. Yes; the Supervising Architect so holds.

Mr. MOORE. Is not this the result of the so-called policy of economy whereby the assay offices throughout the country were concentrated in the city of New York?

Mr. CANTOR. I can not tell the gentleman in detail what happened before I came here, but I now know that this building is under process of construction and ought to be finished.

Mr. MOORE. The department wanted to economize by abolishing assay offices elsewhere in the country and concentrated them in New York, and this building follows as a consequence of that policy.

Mr. CANTOR. I was not here at that time, I will say to the gentleman, and all I know is that the gentleman and his associates on this floor passed a bill two years ago for this work.

Mr. GOULDEN. The discontinuance of the other assay offices has largely added to the work here, I will say to the gentleman.

Mr. MOORE. The other offices were abolished, and this concentrates that work in the city of New York.

Mr. CANTOR. This appropriation was made before the concentration of the other assay offices in New York took place.

Mr. FOSTER. Mr. Speaker, can the gentleman inform us as to the reason why the Supervising Architect's Office is unable to do this work?

Mr. CANTOR. I tried to explain it to the gentleman from Kansas [Mr. MURDOCK] a little while ago. It requires engineering skill, and there is no one on the staff of the Supervising Architect's Office in the Treasury Department competent to answer the requirements of that particular kind of construction. That is a condition peculiar to the city of New York.

Mr. AUSTIN. Let me read to the gentleman from Illinois [Mr. FOSTER] what the Supervising Architect states.

Mr. CANTOR. A man of that kind who could undertake the engineering proposition that is required in this particular building could get all the money he wanted from some foundation company in New York City.

Mr. MURDOCK. What surprises me is that a Government officer should admit that he has not an officer under him competent for that work.

Mr. CANTOR. That is one reason, and——

Mr. BARTLETT. Another reason is that men with the proper qualifications are not on the eligible list for civil-service appointment, because if they were to apply for these positions they could not secure such a salary under the Government employ as their skill would command outside.

Mr. FOSTER. That is the case with reference to all these architects employed outside, according to the representation that is made concerning them.

Mr. AUSTIN. The executive officer of the Supervising Architect's Office stated this to the Committee on Public Buildings and Grounds in the hearings on this bill:

> This work calls for engineering skill of the first order, because it will be necessary to go down below the foundations of surrounding buildings. It is a piece of engineering work and calls for the employment of men possessing special training and experience with this kind of work in this locality. They have to go right down to bedrock in order to secure the proper foundations, and must protect the surrounding buildings against injury.

Then, in addition to that, he makes this statement:

> The building is in a very dangerous and dilapidated condition. The façade is what the historical societies want to save; if the Secretary takes it down, it can be set up elsewhere and be preserved. This involves no new expense.

Mr. CANTOR. I have tried to explain that condition, because of the fact that the subtreasury and the assay building are surrounded by high buildings, and it is a special engineering feat to put these foundations down a sufficient depth in the neighborhood of those tall buildings.

Mr. MURDOCK. Mr. Speaker, there is another question that I would like to ask of the gentleman.

Mr. CANTOR. Certainly.

Mr. MURDOCK. What is the idea of making a gift of this façade to these people?

Mr. CANTOR. I will explain to the gentleman about that. In the first place the façade is of historical value, and there has been a demand on the part of historical societies in our city to preserve that front. It is an old building, as the gentleman from Kansas probably knows, and a fine piece of architecture.

Mr. MURDOCK. Was it not in front of this building that George Washington was inaugurated as President?

Mr. CANTOR. No; it was in front of the Subtreasury, right adjoining. This assay office adjoins the Subtreasury. There has been a great demand on the part of historical societies to preserve this façade as an historical memento. The historical society has requested possession of it for some time. I do not know where they want to put it, but they want to preserve it, and it is of no use to the Government. It will be preserved as a relic of the early style of architecture found in Wall Street.

Mr. LOGUE. Yes; it will be preserved as a relic.

Mr. MOORE. It seems to me that is a particular feature of the bill that ought to be passed. There are a number of buildings in cities on the eastern coast that ought to be preserved for this reason, like that of the Bank of the United States, in Philadelphia.

Mr. CANTOR. A number of old buildings have been turned over to historical societies, and historical spots have been marked, while Fraunces Tavern, where Washington bade farewell to his officers, has been purchased by the Sons of the Revolution, and the Jumel Mansion is in charge of the Daughters of the American Revolution.

The SPEAKER. Is there objection?

Mr. REED. I object.

Mr. CANTOR. May I say to this gentleman before his objection is insisted on, Mr. Speaker, that this building is now in process of construction, and we need this bill to finish it?

The SPEAKER. The gentleman from New Hampshire has an absolute and indefeasible right to object.

Mr. CANTOR. I hope the gentleman will withdraw his objection.

The SPEAKER. The gentleman from New Hampshire [Mr. REED] objects, and the bill is stricken from the calendar. The Clerk will report the next one.

Mr. CANTOR. Is it possible, Mr. Speaker, at this time to suspend the rules and pass the bill?

The SPEAKER. It is not possible now. At about 5 o'clock in the afternoon they may get up to that. [Laughter.]

Mr. CANTOR. I will see then if the gentleman from New Hampshire is absent or not. [Laughter.]

The SPEAKER. The Clerk will report the next bill.

### MEDAWAKANTON AND WAHPAKOOTA (SANTEE) SIOUX INDIANS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11246) for the restoration of annuities to the Medawakanton and Wahpakoota (Santee) Sioux Indians, declared forfeited by the act of February 16, 1863.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 11246) for the restoration of annuities to the Medawakanton and Wahpakoota (Santee) Sioux Indians, declared forfeited by the act of February 16, 1863.

*Be it enacted, etc.*, That jurisdiction be, and hereby is, conferred upon the Court of Claims to hear, determine, and render final judgment for any balance that may be found due the Medawakanton and Wahpakoota Bands of Sioux Indians, otherwise known as Santee Sioux Indians, with right of appeal as in other cases for any annuities that may be ascertained to be due to the said bands of Indians under and by virtue of the treaties between said bands and the United States, dated September 29, 1837 (7 Stat. L., 538), and August 5, 1851 (10 Stat. L., 954), as if the act of forfeiture of the annuities of said bands approved February 16, 1863, had not been passed: *Provided*, That the court in rendering judgment shall ascertain and include therein the amount of accrued annuities under the treaty of September 29, 1837, up to the date of rendition of judgment, and shall determine and include the present value of the same, not including interest, and the capital sum of said annuity, which shall be in lieu of said perpetual annuity granted in said treaty; and to ascertain and set off against any amount found due under said treaties all moneys paid to said Indians or expended for their benefit by the Government of the United States since the treaties were abrogated by the act of 1863: *Provided*, That the treaty of 1868 shall not be a bar to recovery, but all equities and benefits received thereunder by the Santee Sioux Indians may, in the discretion of the court, be taken into consideration in the determination of the amount of recovery. Upon the rendition of such judgment and in conformity therewith the Secretary of the Interior is hereby directed to ascertain and determine which of said Indians now living took part in said outbreak, and to prepare a roll of the persons entitled to share in said judgment by placing thereon the names of all living members of said bands residing in the United States at the time of the passage of this act, excluding therefrom only the names of those found to have personally participated in the outbreak; and he is directed to distribute

the proceeds of such judgment, except as hereinafter provided, per capita, to the persons borne on the said roll.

Proceedings shall be commenced by petition verified by one of the attorneys who have been heretofore employed by said bands of Indians to prosecute their claims under this act under a contract which has been approved by the Commissioner of Indian Affairs and the Secretary of the Interior as provided by law, upon information and belief as to the existence of the facts stated in said petition, and no other verification shall be necessary. Upon final determination of the cause the Court of Claims shall decree such fees as the court shall find to be reasonable upon a quantum meruit for services performed or to be performed, to be paid to the attorney or attorneys so employed by the said band of Indians and their associates, and the same shall be paid out of the balance found to be due said bands of Indians when an appropriation therefor shall have been made by Congress: *Provided*, That in no case shall the fees decreed by the court amount in the aggregate to more than 5 per cent of the amount of the judgment recovered, and in no event shall the aggregate amount exceed $25,000: *Provided further*, That the court shall by its decree distribute such fees equitably between the attorneys who have been employed by said bands of Indians in said cause.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. MANN. Reserving the right to object, did we not have this bill up in the last Congress and have a vote on it?

Mr. STEPHENS of Nebraska. We had it up on this calendar in the last Congress, and this is practically the identical bill that was passed by this House on March 1, 1911. There is practically no change in it. At that time no objection was made. It passed under suspension of the rules. The gentleman from Illinois [Mr. MANN] assisted in shaping it up and defending some portions of the measure at that time.

Mr. MANN. Oh, the gentleman is mistaken. I did all I could to prevent its passage.

Mr. STEPHENS of Nebraska. The record shows that the gentleman from Illinois did not express himself as opposed to the bill. He did state that he approved of the provision at the end of the measure, regulating attorneys' fees, but he offered no objection whatever to any other provision of the bill at that time. I hope that the gentleman will not object to it at this time, because I believe there has never been a more meritorious measure before the House than this one.

The Government owes these Indians for land that it purchased from them in 1837 and 1851. When they went on the warpath in 1863 the Government abrogated its treaties with these Indians, and since then has paid them no money whatever under those treaties. What we ask is that this bill be sent to the Court of Claims, in order that the court may adjudicate the differences between these Indians and the Government. I believe that at the present time every other tribe of Indians in the United States has been forgiven whatever wrong it has done in the past, and all except these have had their treaty rights restored to them. The Five Civilized Tribes were at one time in rebellion against the Government, but they were forgiven their sins and taken back, and their treaties were restored to them, and considerable money paid to them besides the amount that the treaty guaranteed to them originally.

Mr. STAFFORD. Will the gentleman inform the committee as to the number of Indians now living in this tribe?

Mr. STEPHENS of Nebraska. There are something like 1,100 Indians now living on the reservation in Knox County, Nebr., in my district. At the time they were transferred to this reservation there were some 1,700 of them, but they were transferred to the Crow Creek Reservation, in South Dakota, three years prior to the time they moved to Nebraska, and 300 of them starved to death. They are poor people, living along the Missouri River bluffs in my State.

Mr. MILLER. Will the gentleman permit me to make a supplemental statement?

Mr. STEPHENS of Nebraska. Yes.

Mr. MILLER. The number in Nebraska is correctly stated by the gentleman. There are in the western part of Minnesota, near the Dakota line, to-day about 900 of these same Indians.

Mr. STAFFORD. How do they maintain themselves?

Mr. MILLER. There are no Indians in the United States who live a more precarious existence than those that have been mentioned here. My best information is that those along the Minnesota River in western Minnesota have subsisted mainly by catching frogs for the Minneapolis markets. During the winter season the frog-catching business is ofter at a very low stage.

Mr. LOBECK. Why do they not join the union?

Mr. MANN. Why do they not go to work?

Mr. MILLER. They do work as opportunity is given them. There is no work in the wintertime. That is a farming country. They do work in the summer. The children and women can not go out to work. The men do work as far as they can get it to do.

Mr. MANN. I have not gone over the bill and reports this year, but I put with my files a memorandum concerning the bill and report in the last Congress, and the recollection that comes to me is that this is a proposition to give these Indians annuities based upon a treaty 70 or 80 years old.

Mr. STEPHENS of Nebraska. The treaties of 1837 and 1851.

Mr. MANN. And the department having held that the annuities provided for in those treaties were barred by a treaty made subsequent to the war, the bill proposes to remove that bar. Is that correct?

Mr. STEPHENS of Nebraska? Yes; the bill proposes to take into consideration the money that has been paid to these Indians under the treaty of 1868.

Mr. MANN. Does it remove the bar of the treaty of 1868?

Mr. STEPHENS of Nebraska. Yes; that is not to be a bar to recovery. The reason for that is very apparent, because these Indians deeded to the Government a great portion of the States of Iowa and Minnesota, for which they only received some 12 payments under the treaty, until this outbreak took place. Then the Government, by act of Congress, abrogated the treaty. In 1868 the Government made a new treaty with these Indians, and the Government paid these Indians certain sums of money under the new treaty of 1868 for helping to police the Union Pacific Railroad during its construction.

Mr. MANN. I may have this bill slightly confused in my mind with another bill; but there was a bill, and I was under the impression that it was this one, which it was claimed would, if enacted, cost only a comparatively small amount of money; but I figure that it might cost $10,000,000 or $15,000,000. Is this that bill or is it another bill?

Mr. STEPHENS of Nebraska. It is another bill, Mr. Speaker. I will say to the gentleman from Illinois that this bill may possibly allow these Indians to recover $1,000,000. It will depend on whether or not the Court of Claims deducts certain amounts that were paid to them under the treaty of 1868 for assistance in policing the Union Pacific Railway. It is a matter that is not very easily ascertained without having a great deal of investigation, but it is impossible for them to receive under this bill any more than the original sum, which was only about $3,000,000, less the amount that the Government has paid them.

Mr. MILLER. Will the gentleman permit me to make a slight additional statement?

Mr. STEPHENS of Nebraska. I yield to the gentleman.

Mr. MILLER. Under the treaty of 1837 the United States agreed to pay these Indians $15,000 a year forever. Under the treaty of 1851 the United States agreed to pay these Indians $61,000 a year for 50 years. At the time Congress declared the treaties forfeited, in 1863, twelve payments had been made. When the treaty of 1868 was made apparently no attention was paid to either of the prior treaties that it was claimed had been forfeited.

Mr. MANN. Why should we remove a bar to the treaty which the gentleman says is no bar? Why should we legislate to remove a bar which the gentleman says is no bar, but which the courts may construe to be a bar? Ought not that to be left to the courts?

Mr. MILLER. I did not mean to state that superficially and perhaps legally it was a bar. I do mean to state that every equity and good conscience require us to say that none of the contracting parties at the time could have had under consideration those facts, because nothing is said about them in making the treaty. There was practically nothing given to the Indians in consideration of the treaty of 1868.

Further, and especially the Medawakanton and Wahpakoota Sioux Indians were never parties to that treaty as such. It was a treaty between the United States and 10 different bands of Indians. The Medawakanton and Wahpakoota Indians were scattered; they had no tribal existence, no council, no meetings, and the treaty, as far as it was signed, was signed by seven men then in Nebraska where the treaty was made and where the United States desired to secure certain benefits. They had no representatives, and we do not think in conscience and equity it should be held as a bar to their rights.

Mr. MANN. I suggest to the gentleman from Nebraska that he ask unanimous consent to pass this bill over without prejudice.

Mr. STEPHENS of Nebraska. Mr. Speaker, I ask unanimous consent that this bill be passed without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

IMMEDIATE TRANSPORTATION OF DUTIABLE MERCHANDISE, PROVIDENCE, R. I.

The next bill on the Calendar for Unanimous Consent was the bill (H. R. 11245) extending to the port of Providence, R. I., the privilege of section 1 of the act approved June 10, 1880, governing the immediate transportation of dutiable merchandise without appraisement.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the privileges of section 1 of the act approved June 10, 1880, governing the immediate transportation of dutiable merchandise without appraisement, be, and the same are hereby, extended to the port of Providence, in the State of Rhode Island.

The SPEAKER. Is there objection?

Mr. STAFFORD. Reserving the right to object, I see the author of the bill on the floor, and I would like to ask him to make some explanation of the needs for this action.

Mr. O'SHAUNESSY. It is a commercial necessity on the part of Providence, R. I. I am glad to say that Providence is growing, not by leaps and bounds, but commendably, and we want it given the I. T., which means "immediate transportation."

Mr. STAFFORD. It is "It" with a capital I?

Mr. O'SHAUNESSY. Yes. It will allow us to forward goods immediately without having them entered and appraised at Providence. They will go to the consignees, and that gives a wider latitude to the steamship companies making Providence a port of call or destination.

Mr. STAFFORD. This bill will remove the difficulty of appraising the goods in transit?

Mr. O'SHAUNESSY. That is all it amounts to.

Mr. SHERLEY. At what expense to the Government?

Mr. O'SHAUNESSY. None at all.

Mr. SHERLEY. How many ports have this privilege now?

Mr. O'SHAUNESSY. I can not answer the gentleman. It merely provides for the entry and appraisement of goods at the final port of destination rather than at an intermediate port.

Mr. SHERLEY. There must have been some reason why this privilege was not given to all ports. Why was exception made of any port?

Mr. O'SHAUNESSY. Ports that have not got the business to justify the privilege would not get it. Of course there is a very brief recommendation here from the Assistant Secretary of the Treasury. They have investigated the matter thoroughly through their agents, and they conclude that the necessity exists for constituting Providence a port for the shipment of merchandise under the immediate-transportation act. We have established a trans-Atlantic line of steamships, and they make Providence not only a port of call but ship freight and passengers through. We feel that the port of Providence, upon which the State is spending millions of dollars in conjunction with the Government—we have an immense pier there and are building another one, and we feel that all the facilities that ought to go with shipping should come to us, in order to make use of the development which has come to us by reason of the money that was appropriated by the Government of the United States and the State.

Mr. SHERLEY. I do not know but that it is perfectly proper that this bill should be enacted, but what I am trying to find out here is why the privilege was denied to certain cities in the first instance.

Mr. MOORE. If the gentleman will permit me, the general act provided for a number of cities, and Providence was not included. Certain coast cities were included, but Providence was not; this is a privilege asked for by cities as transportation increases. It is a facilitiy for the transit of oceanic shipments.

Mr. SHERLEY. Why was it denied to any city?

Mr. MOORE. It was not, except that at the time the original bill was passed those cities were included that seemed to require it.

Mr. SHERLEY. There must have been some reason why this privilege was not enacted in a general law.

Mr. MOORE. If the gentleman will give me time to get the act, I can name to him the cities to which the act gave the privilege. All cities were not put in, because in the judgment of the Treasury officials or of Congress they did not require the privilege; others have come in as the business increased. We accorded this privilege only a short time ago to the port of Perth Amboy and to Dallas, Tex., which is far up the river. They were included because business had increased and they desired to facilitate shipments in this way.

Mr. SHERLEY. I have no knowledge why this should not be granted, but I am trying to find out the theory on which the original act was passed.

Mr. MOORE. When the act was passed those cities that needed these facilities along the coast line were picked out and inserted by the framers of the act. Since that time other cities have come in and asked for the privilege which these other cities enjoy, and Providence is one.

Mr. SHERLEY. I suppose the House will have to take it on faith, though I must confess I do not yet understand the reason for discrimination.

Mr. MOORE. If the gentleman were framing a law, say, this act of June 10, 1880, and he were to designate certain cities to which this privilege ought to be accorded, he would probably pick out those large cities along the coast which were doing the business.

Mr. SHERLEY. Is there any reason why the privilege should not be accorded to any city?

Mr. MOORE. Not if the city shows the business and its worthiness for it. Dallas, Tex., for instance, might have been brought into question, but Dallas demonstrated to the satisfaction of the committee that it did enough business to enable it to have its business facilitated in this way, and the committee accorded it that privilege.

Mr. SHERLEY. If I understand the purpose of the bill, it is to practically permit goods to go in bond to their final destination.

Mr. MOORE. That is true; without being held up at that point for appraisement. It saves money to the Treasury in the matter of inspection, and it facilitates the business of the shipper.

Mr. SHERLEY. What I am trying to find out is why that privilege should not exist in case of goods shipped from any point in the United States.

Mr. MOORE. If the gentleman would read the act of 1880——

Mr. SHERLEY. Oh, I can not read it, because I have not got it here.

Mr. MOORE. I have not got it, but if the gentleman will continue the discussion for a moment, I will be very glad to produce it.

Mr. SHERLEY. I do not like to take the burden of objecting to a bill, but at the same time——

Mr. O'SHAUNESSY. I take it what the gentleman wants to know is why other cities do not get this privilege. They can get it if they can prove they have commerce enough to justify the customs department to recommend it.

Mr. SHERLEY. There must be some reason why the customs department does not want it to apply generally, and that must also involve both protection of revenues and cost of administration.

Mr. O'SHAUNESSY. I presume it is based on the amount of commerce at the port. It is done in order to facilitate the shipment of goods. Why delay? For instance, a Washington man imports merchandise to the port of Providence. Why should he be compelled to enter those goods at Providence and have them appraised there when they can come right through to Washington?

Mr. SHERLEY. Why should he if they came through at Mobile or Charleston or any other city——

Mr. O'SHAUNESSY. I presume that all of the cities the gentleman has named have the immediate transportation facilities.

Mr. SHERLEY. I do not know anything about it, but I think it is due to the House in asking unanimous consent that we get more information than has been given in this matter.

Mr. MOORE. Will the gentleman yield for a minute?

Mr. O'SHAUNESSY. I will.

Mr. MOORE. I now have the act of June 10, 1880, section 1, referred to in the report, which provides as follows:

That when any merchandise other than explosive articles and articles in bulk not provided for in section 4 of this act imported at the ports of New York, Philadelphia, Boston, Baltimore, Portland and Bath (in Maine), Chicago, Port Huron, Detroit, New Orleans, Norfolk, Charleston, Savannah, Mobile, Galveston, Pensacola (Fla.), Cleveland, Toledo, and San Francisco shall appear by the invoice or bill of lading and manifest of the importing vessel to be consigned to and destined for either of the ports specified in the seventh section of this act, the collector at the port of arrival shall allow the said merchandise to be shipped immediately after the entry prescribed in section 2 of this act has been made.

Certain cities, the gentleman will see, were designated, and they were, as a rule, cities along the Atlantic coast, around the Gulf, up on the Great Lakes, and on the Pacific coast. They did the business to justify this provision.

Mr. SHERLEY. If I caught the reading of that law rightly, it is entirely different from what has been suggested here, and that is that when the ultimate destination is one of these cities named the goods shall be carried through without being stopped at any other port at which they may enter. The statement made by the gentleman from Rhode Island [Mr. O'SHAUNESSY] was

to the effect that if the goods came into Providence and were to go somewhere else this act was to enable them to go to that other place, but the law the gentleman reads seems to be just the opposite of that.

Mr. MOORE. I can only say to the gentleman that a number of cities have come in since the passage of this act and asked for the same privilege that is herein granted specifically to cities enumerated, and they have done it upon the ground that their business warranted it and it was a matter of economy to the Government to have it done.

Mr. STAFFORD. Mr. Speaker, I have before me the act the gentleman has just read. As I construe the purpose of the bill in question, it is merely to include the port of Providence in the list of cities as are included in section 1, chapter 190, of the Forty-sixth Congress. This bill merely permits these imported goods, when they arrive at the port of Providence, to be shipped through to their destination without any further appraisement, if they are destined to the cities enumerated in section 7 of this same act. It merely postpones their appraisement to the time they arrive at final destination, final destination being at the places enumerated in section 7 of the act the gentleman is referring to, so that they will not be held up. It is a convenience that will be given to the traffic of Providence. There is no reason, if the traffic is of sufficient importance at Providence to warrant their entry, to have the goods held up there, but they should be given the same privilege as the ports of Portland, Bath, and others have been given.

I think the gentleman from Rhode Island [Mr. O'SHAUNESSY] at the outset expressed the purposes of the act in reply to the query I put to him.

Mr. MOORE. As to the importance of the bill, I would like to refer to the letter of the Assistant Secretary of the Treasury, Mr. Hamlin, who states the necessity for it. He says:

> From the report of said investigation it is concluded that a necessity——

The SPEAKER. Is there objection?

Mr. SHERLEY. Mr. Speaker, we are learning something about the bill.

Mr. MOORE. Mr. Hamlin says that, as a result of their investigation:

> It is concluded that a necessity exists for constituting Providence a port for the shipment of merchandise under the immediate-transportation act, and I therefore recommend to your committee that the bill be enacted into law.

I want to say in regard to the port of Providence—trespassing upon the prerogative of the gentleman from Rhode Island just for a moment—that the port does a business of nearly 3,000,000 tons, and it is gradually becoming one of the great ports of the Atlantic seaboard. If we grant these transportation facilities to Dallas, Tex., hundreds of miles up a river, as we did recently, and to Perth Amboy, N. J., and other cities not covered by the original act, certainly there is no reason in the world why the same privilege should not be extended to a great port like Providence, whose business has been constantly increasing.

Mr. SHERLEY. I have now had the opportunity of reading the law, but I do not quite see why the department should not permit the goods to go through any main port, providing they are going to a final place of destination where there are sufficient officers to take care of the appraisement and the collection of the duty.

Mr. STAFFORD. If the gentleman will permit me, the surmise arises in my mind that at these ports specified in section 1 the United States customs officials place a provisional visé upon the manifest and allow them to go through, whereas if this privilege was extended indiscriminately to all ports it would not give the officials the opportunity for scrutiny which might be necessary——

Mr. SHERLEY. But they got that scrutiny at the final place of destination.

Mr. STAFFORD. But to grant entry indiscriminately to all ports would not be a wise thing. For instance, there are only a few ports on the Lakes which are given the privilege of free passage en route for traffic to other places on the Lakes where appraisal is made, because the Government at the port of entry has opportunity to make sufficient scrutiny; but if all lake ports would have the privilege of having entry of goods, they would have to keep customs officials at each one of those places.

Mr. SHERLEY. That would be true if they are appraised there, but the very purpose of this act is to permit the appraisement of the goods at the places to which they are finally shipped.

Mr. STAFFORD. And also permit the Government customs officials to pass upon it provisionally at the first port of entry.

Mr. SHERLEY. To pass upon it as invoiced.

Mr. STAFFORD. Yes; a sort of checking en route, though the final appraisement is made at the place of destination.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. This bill is on the Union Calendar.

Mr. O'SHAUNESSY. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in the Committee of the Whole House on the state of the Union.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The bill was read.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. O'SHAUNESSY, a motion to reconsider the vote by which the bill was passed was laid on the table.

### RELIEF OF HOMESTEADERS UNDER THE RECLAMATION ACT.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 117) to amend the act of June 23, 1910, entitled "An act providing that entrymen for homesteads within the reclamation projects may assign their entries upon satisfactory proof of residence, improvement, and cultivation for five years, the same as though said entry had been made under the original homestead act."

The Clerk read as follows:

*Be it enacted, etc.*, That the act of June 23, 1910 (Public, 243, 36 Stats., p. 592), entitled "An act providing that entrymen for homesteads within reclamation projects may assign their entries upon satisfactory proof of residence, improvement, and cultivation for five years, the same as though said entry had been made under the original homestead act," is hereby amended by adding the following proviso:

"*Provided*, That any assignment made between June 23, 1910, and January 1, 1913, of which the assignor has submitted satisfactory final proof and the assignee purchased with the belief that the assignment was valid and under the act of June 23, 1910, are hereby confirmed, and the assignee shall be entitled to the land assigned as under the act of June 23, 1910, notwithstanding that said original entry was conformed to farm units and that the part assigned was canceled and eliminated from said entry prior to the date of assignment and prior to the date of final proof: *Provided further*, That such assignee shall in other respects comply with all of the provisions of the act of June 23, 1910."

The committee amendment was read, as follows:

Page 2, line 5, strike out the proviso and insert:

"*Provided*, That any assignments made between June 23, 1910, and January 1, 1914, of all or portions of homestead entries upon which the assignors have submitted satisfactory final proof and the assignees purchased with the belief that the assignments were valid, are hereby confirmed, notwithstanding the original entries were conformed to farm units and the portions assigned canceled or eliminated from the entries prior to the dates of assignment or prior to submission of final proof: *Provided further*, That all entries so assigned shall be subject to the limitations, terms, and conditions of the reclamation act and acts amendatory thereof or supplemental thereto, and all of said assignees whose entries are hereby confirmed shall, as a condition to receiving patent, make the proof heretofore required of assignees: *And provided further*, That this act shall not apply to any lands canceled and eliminated from any such entry and which have been embraced in any valid settlement or homestead entry of another."

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, I notice in the report upon this bill—and I would like to have the attention of the House to it—it says:

> In the administration of the reclamation act, the act of June 17, 1902 (32 Stat., 388), it has been found necessary to commit somewhat of an injustice upon the homesteaders. When a homesteader makes an entry for 160 acres within a second form reclamation withdrawal he is likely to have his area of 160 acres "conformed" or cut down to 120 acres, to 80 acres, or even to 40 acres.

Now, I apprehend that the gentleman who wrote the bill may know what that means. There may be other gentlemen in the House connected with irrigation matters who know what it means, but I am sure that nine-tenths of the Members of the House would not have the slightest notion what it did mean. I would like to give the gentleman a chance to explain what it means. What is a "second form reclamation withdrawal"?

Mr. RAKER. There was so much confusion I did not get the gentleman's question, although I was listening carefully.

Mr. STAFFORD. Mr. Speaker, I ask for order if the gentleman can not hear the query made by the gentleman from Illinois.

The SPEAKER. The House will be in order.

Mr. MANN. What does this mean: "When a homesteader makes an entry for 160 acres within a second-form reclamation withdrawal?"

What is the modus operandi and what does it mean?

Mr. RAKER. As I understand it, that means that under the act as it originally existed, when a withdrawal was made under the second form, only homestead entries and no other could be made. A man might make his application for 160 acres of land, stating in his application that he would conform to the unit as fixed and subject to the rules of the Department of the Interior in fixing the size, and so forth, of his final entry.

Mr. MANN. We have not reached that yet. I am asking what is the meaning of a prior provision?

Mr. RAKER. I am trying to explain it. I can not explain one without making the two plain.

Mr. MANN. They are entirely separated.

Mr. RAKER. The second form of withdrawal under the reclamation act is where he makes his homestead entry, and that alone, conform to the rules and regulations specified by the department, whether or not it shall be 160 acre, 80 acres, or 40 acres; whether they have determined the amount necessary for a man to support his family upon, and when he files his homestead entry he puts that in the homestead declaration. That is the meaning of that phrase there and the meaning of the law as it has been applied in many cases under the reclamation act. A withdrawal under the first form, withdrawal under the reclamation act, no filing of any kind can be made.

Mr. MANN. Let me ask the gentleman again, what is the "second-form reclamation withdrawal"?

Mr. RAKER. The law allows him to make homestead entry only.

Mr. MONDELL. Will the gentleman allow me?

Mr. RAKER. I will.

Mr. MONDELL. The second form of reclamation withdrawal is the form of withdrawal which withdraws the land from all except homestead entry. The first form of withdrawal is a withdrawal for the actual construction of works, and lands withdrawn under the first form are not enterable under any law.

Mr. ANDERSON. What has the homesteader to do with that?

Mr. MONDELL. He has nothing to do with it.

Mr. ANDERSON. This bill provides:

When a homesteader makes an entry for 160 acres within a second form reclamation withdrawal—

And so forth.

Mr. MONDELL. The second form of reclamation withdrawal is the withdrawal for homestead entry.

Mr. RAKER. And in addition, as I have explained, he must conform to the rules and regulations as adopted by the department, which is under the second-form entry.

Mr. MANN. The gentleman says he must conform to the rules and regulations. Is that the same meaning of the word "conform" that is used in the report here where it refers to the 160 acres that conformed?

Mr. RAKER. Yes. He conforms to the language as fixed by the department when they have determined the quantity of land that ought to be necessary for a man under the reclamation project to support himself and his family.

Mr. MANN. Well, when a man makes the entry, he takes it subject to the amount of land which the department fixes as a farm unit on the project?

Mr. RAKER. Afterwards; yes. That was the original——

Mr. MANN. If he takes it that way, why should he have any more rights than that?

Mr. RAKER. The people who filed believed that, up to the present time, that they would be given the right to consummate their residence, improvement, and final proof, on the entire 160 acres.

Mr. ANDERSON. What right did they have to believe that?

Mr. RAKER. On every act of the department up to the present time. Men have appeared before the department, records have been taken, and those men in the Salt River Valley, and others, firmly believed they had their rights. In view of that fact, Congress, on June 23, 1910, recognized the very conditions of all of these homestead entrymen, and permitted them to make final payment, and after that was done they could then sell their homestead entries over and above that which conformed to the farm unit.

Mr. MANN. Where did that act of June 23, 1910, originate? How did it get passed? Is it a separate law?

Mr. RAKER. It is a separate law. Here is the whole act, on page 2, to protect these men who believed honestly and fully they had a right to the whole 160 acres of land. They improved it, they cultivated it, and they irrigated it.

Mr. MANN. They improved it? They could not improve it without water.

Mr. RAKER. Lots of them did have water.

Mr. MANN. Where did they get the water?

Mr. RAKER. A good many of them had water under these projects before they were completed. These people irrigated their land.

Mr. MANN. The gentleman does not pretend that on many of the irrigation projects people have irrigated 160 acres?

Mr. RAKER. Some of them did.

Mr. MANN. And received water from the Government?

Mr. RAKER. Some of them did; yes.

Mr. MANN. He certainly will not pretend they paid anything for it?

Mr. RAKER. Yes.

Mr. MANN. They have not even paid anything toward the construction charges yet, to speak of.

Mr. RAKER. In many instances they made a number of payments. They paid for water, as the reports show.

Mr. MANN. The reports show there has been very little money coming in to the Government, either for construction cost or for maintenance cost, on any of these irrigation projects.

Mr. RAKER. A report has been made on that; but, of course, I did not expect to go into the amount of money that had been paid in and the amount of construction charges, I want to say to the gentleman.

Mr. MANN. Now, when the Government lays out an irrigation project and proposes to let people take the land and cultivate it, and fixes the limit which they can take under the law, what reason is there why we should permit some man to enter upon more and sell his rights instead of the Government giving the rights to innocent people?

Mr. RAKER. No; the gentleman has a wrong statement for his premises that he starts upon, and that is that they said under the reclamation act, "If men can have more than 160 acres, they are permitted to file under the old law on 160 acres," and did not conform to the farm unit until later. A law has been passed now that no man can file until the project is ready and until the farm unit has been fixed; but the officials of the Reclamation Service and of the Land Department, all of them, acquiesced in permitting a man to file on a full 160 acres of land. That was the law, and the officials did their duty in following it.

Mr. MANN. But subject to the right of the Government, when the water was turned on, to cut down the amount of land which a man could receive on that filing. Everybody understands that.

Mr. RAKER. Will the gentleman permit me to make a statement of this case? Then I shall be through. By the law of June 23, 1910, Congress recognized that these people made their filings of 160 acres under the project, and they thought they would eventually get the 160 acres. Congress recognized that the parties had filed with the contract and reservation that the Government should fix the farm unit, and then said that where you make final proof, where you make residence and payment, you may sell above the farm unit, and the party who is your assignee may obtain patent if he continues to conform to the law.

The special case involved here is that these people filed for 160 acres. They made final proof and made payments, and then had five years' residence upon the land; and after they had made final proof and complied with all the law, they sold 80 acres or 40 acres, as the case might be, to A and B. Not knowing the fact that it had not conformed to the farm unit, they sold a part of the tract to innocent parties. Those innocent parties paid all the way from a thousand to two thousand dollars for these 80-acre tracts. They have gone on the ground and made improvements, and they are living there now, and the department says it is justice that the Government should permit those innocent parties to obtain patents to the land.

Mr. MANN. Why can they not homestead it now? Supposing the assignment is not good, they can make entry. They have the prior right because they are on the land.

Mr. RAKER. There might be complications in that.

Mr. MANN. How?

Mr. RAKER. The man has spent his money; he has lived there for five years; and the land is under cultivation.

Mr. ANDERSON. Not the assignee.

Mr. MANN. None of them has cultivated the land for five years under the irrigation project.

Mr. RAKER. We are justified in accepting that man's sworn statement.

Mr. MANN. The department may take it, but we do not have to take it. Maybe we ought to take it. But when the irrigation law was passed it was repeatedly stated that no man could farm 160 acres on one of these irrigation projects where he was required to irrigate it. It was stated that 40 acres was probably the most at the outside that one man could cultivate, and 10 acres would probably be sufficient in most cases. Then you go ahead and let men make a homestead entry of 160 acres and sell it off without any right whatever; and then, because you say it is purchased by an innocent purchaser, you come in and want to have the law changed. I do not know anything about that. You say that the man who made this entry in the first place shall keep the money, and in order to protect the innocent purchaser you bring in this legislation, where the inno-

cent purchaser would be protected anyway, so far as that is concerned.

Mr. RAKER. Reading again the act of June 23, 1910, this Congress recognized the fact that a man who had filed on 160 acres of land on a reclamation project, who had lived upon it five years, who had cultivated it, and who has made final proof, might sell all above the farm unit as fixed to parties, and that they might obtain the title to that land.

Mr. MANN. Where does the gentleman find that language in the act of June 23, 1910?

Mr. RAKER. That is what it means, and that is what it says.

Mr. MANN. That is not what it says.

Mr. RAKER. I will read it. It says:

That from and after the filing with the Commissioner of the General Land Office of satisfactory proof of residence, improvement, and cultivation for the five years required by law persons who have or shall make homestead entries within reclamation projects under the provisions of the act of June 17, 1902, may assign such entries, or any part thereof, to other persons, and such assignees upon submitting proof of the reclamation of the lands and upon payment of the charges apportioned against the same as provided in the said act of June 17, 1902, may receive from the United States a patent for the lands: *Provided*, That all assignments made under the provisions of this act shall be subject to the limitations, charges, terms, and conditions of the reclamation act.

Now, when this assignee has obtained his 80-acre tract of land he must pay his proportion of the construction charges. If it is $50 an acre, he pays that to the Government. He must obtain a water right, and he pays for that; and he pays for the annual upkeep and maintenance of that project like anybody does. Now, Congress has said that that is legitimate and proper.

Mr. MANN. I do not find it in that law. When we passed that law we supposed that meant the right to assign the farm unit as fixed in the project before the matter was finally determined as to the cost, and so forth.

Mr. RAKER. Why, no. He could sell his farm unit anyhow after he made final proof. But this means and it says the assignee. That is not the original homestead applicant.

Mr. MANN. Certainly not. We provided that the homestead applicant might make an assignment before he made final proof, and that the assignee might make the final proof. That is what the law says.

Mr. RAKER. No; it does not. It has never been made that way, and never will be, that a man may sell his homestead before he makes the final proof.

Mr. MANN. That is what this says.

Mr. RAKER. No. That is the assignee.

Mr. MANN. Of course.

Mr. RAKER. The law provides that the claimant himself must live upon the land for five years, make final proof, and consummate it; and then when he has made final proof he can sell his claim. But this says that when there is a division of the land into farm units, he having resided on the place and cultivated it and improved it, he can sell those other tracts to the assignee, and the assignee under the law may obtain patent for that land.

Now the provision of the bill before the House is simply this. The only distinction is this, that where the homestead claimant has filed on a 160-acre tract and has made the five-year residence, and has made the necessary improvements for five years, and then after five years has made final proof, and after that time has sold a part of the tract which has been before his final proof divided into farm units, the Department of the Interior before he made his final proof fixes the farm unit. The assignee of this homesteader does not get a title under the law as it stands to-day, although he may have lived there every day since and paid $5,000 for the land.

The party having bought this claim in good faith and paid his money for it, the department says that in spite of the fact that he made proof subsequent to the order dividing the land into units he should have his patent if he conformed to all the rules and regulations of the law, on condition that he must obtain his water rights and pay the maintenance and upkeep.

Mr. MANN. Under the law can a homestead entryman assign his right before he has lived on the land five years?

Mr. RAKER. He can not.

Mr. MANN. And before he has made his proof?

Mr. RAKER. No.

Mr. MANN. But that is what the gentleman wants to let him do now?

Mr. RAKER. No; after he has made his final proof; after he has lived on the land five years; after he has complied with the law and his land has been subject to be divided by the department into farm units, his assignee may get a valid title without making new homestead entry and settlement; but he must continue the qualification under the new reclamation law and must pay all the charges.

Mr. MANN. This talk about paying all the charges is a joke. The gentleman from California knows that there is not a reclamation project in the United States in which the Government has any interest where the charges are paid up to date.

Mr. RAKER. Oh, yes; in the State of California, up to date, they have paid all the charges.

Mr. MANN. Where are those projects?

Mr. RAKER. At Orland reclamation project, California.

Mr. MANN. There is a bill pending now which they expect to call up, fixing it so that a man who wants to go on one of these projects may pay 5 per cent of the cost of construction, and then have nothing more to pay for five years, and then have the 95 per cent remaining divided into 15 installments. Talk about paying the charges! There is no intention of ever paying these construction charges.

Mr. RAKER. I want to say to the gentleman that I believe every dollar that the Government has put into these reclamation projects will be paid back, and that there is not a western man but who is in favor of and working to the end that the Government shall receive every dollar that has been placed in these projects.

Mr. MANN. That is another story.

Mr. RAKER. Yes; I know that is irrelevant to this.

Mr. MANN. But when the gentleman talks about paying these charges, they have not been paid, and it is not intended to pay them.

Mr. SMITH of Idaho. Mr. Speaker, I think the gentleman from Illinois [Mr. MANN] is mistaken in regard to these charges not having been paid.

Mr. MANN. My information comes from a very distinguished gentleman connected with this work.

Mr. SMITH of Idaho. It is a matter that can very easily be ascertained at the department. Take, for instance, the Minidoka project. You will find that only about 10 per cent of the entrymen there are in arrears on their payments. I think on the Boise-Payette project the percentage of those in arrears is probably less. I am not advised in regard to other projects, but I know it is the intention of the entrymen and the intention of the department that all of this money shall be paid back, including not only construction charges, but maintenance charges also.

Mr. MONDELL. Can the gentleman from California inform me where these entries are, and what projects they are located upon, where it is desired to permit this to be done?

Mr. RAKER. I did have a list. There are not over 10 or 15.

Mr. MONDELL. Are there that many?

Mr. RAKER. That may be doubtful.

Mr. MONDELL. Are there more than 2 or 3?

Mr. RAKER. I want to estimate it at the outside. I should think there are not more than from 5 to 8.

Mr. MONDELL. Where are the projects with which the gentleman is familiar?

Mr. RAKER. I can not give the names now. I would not like to state for fear of making a mistake.

Mr. MONDELL. There are none of them on the projects I am familiar with, so far as I know, and I would be glad to know where they are, if the gentleman can tell me.

Mr. RAKER. I know what they are, but I would not want to name the projects for fear of making a mistake.

Mr. MONDELL. This is something new—to provide for special cases in a general law.

Mr. RAKER. No; it is to conform to the law as it was intended.

Mr. MONDELL. Where are the two that the gentleman knows most about?

Mr. RAKER. I have not my memoranda here, and I could not give them.

Mr. MONDELL. I should like to have the gentleman's opinion as to just how the situation that it is proposed to correct could have arisen? The act of June 23, 1910, is the first and only act that gave any homestead settler the right of assignment. Prior to that, every homestead settler knew that he had no right of assignment. A man could relinquish, and if he handed his relinquishment to another qualified entryman, and that person got to the land office before anyone else and handed in the relinquishment with a filing he had a preference right.

Mr. RAKER. Always heretofore under the homestead law any man who had complied with the law and made his final proof and received his final certificate could sell his land?

Mr. MONDELL. Oh, yes.

Mr. RAKER. But under the reclamation act he could not even do that.

Mr. MONDELL. But I am speaking of the right of the entryman to assign. Of course, every homestead entryman can sell after he gets his full title; that is, after he has made his final proof and complied with all the provisions of the law.

In the case of the entryman entitled to the benefit of the act of 1910, his proof is proof of cultivation and residence only, and there are still payments and obligations to be met. The first law which changed the general homestead policy was the law of June 23, 1910, and all homestead settlers ought to have been informed that that was the only law under which assignments could be made. Now, what you propose to do is to legalize assignments made after the passage of that act and prior to January 1, 1914, made at a time when under that law, the only law on the subject, these homesteaders had no right of assignment. That is not all of it. It would seem that it was intended by this act to reinvest certain homestead settlers with portions of their entry that had been lost to them by cancellation and elimination.

Mr. RAKER. Oh, no; read the amendment.

Mr. MONDELL. I will make my statement, and then I will read the bill. To reinvest certain homestead settlers with portions of their entries that had been lost to them by cancellation.

Mr. RAKER. That is not the purpose of the bill at all.

Mr. MONDELL. I will read the bill.

Mr. RAKER. Read lines 9 to 13, page 3.

Mr. MONDELL (reading):

are hereby confirmed, notwithstanding the original entries were conformed to farm units and the portions assigned canceled or eliminated from the entries prior to the dates of assignment or prior to submission of final proof.

Mr. RAKER. Read lines 9 to 13.

Mr. MONDELL. What sort of a homestead entryman is one that, after he has been called upon to conform and the excess of his entry has been canceled and eliminated, thereafter proceeds to sell it to somebody, although at that very time he had not brought himself within the provisions of the assignment act of June 23, 1910? Can you conceive a man doing that sort of thing in good faith?

Mr. RAKER. There is nothing of that kind in the bill. If the gentleman will read lines 9 to 13——

Mr. MONDELL. Will the gentleman accept an amendment putting a comma after the word "entry," in line 11, and in addition the words "prior to assignment"? That is the usual saving clause. You can not pass any bill through the House without a saving clause, saving an intervening claimant in good faith. That is simply a clause to save the man who, without knowledge of the peculiar performance that was going on, had gone onto eliminated excess lands and made settlement. The gentleman when he read that evidently intended that we should understand that this bill did not apply to lands, excess portions, that had been canceled or eliminated before assignment, although right above the bill indicates that these are the only sort of areas that the bill applies to.

Mr. RAKER. Not at all. The gentleman does not want to get in that attitude, because it has no relation at all to the case where there has been a contest and elimination of the entries except as is provided here, where the homestead claimant himself, after final proof—the gentleman must not get up an imaginary case that does not apply to the bill—where the homestead claimant himself, having resided five years on 160 acres, having cultivated it and improved it as the law requires, having made final proof on the 160 acres, then and after that time he sells a part of that entry, because the department having in the meantime conformed the lands to the unit.

Mr. MONDELL. The gentleman knows perfectly well——

Mr. RAKER. This is what the report of the department says:

DEPARTMENT OF THE INTERIOR,
*Washington, July 21, 1913.*

Hon. W. R. SMITH,
*Chairman Committee on Irrigation of Arid Lands,*
*House of Representatives.*

SIR: In reply to your request of June 5, for report and recommendation upon H. R. 117, which proposes to amend the act of June 23, 1910 (36 Stat., 592), relating to assignments of homestead entries in reclamation projects, I have to advise as follows:

A number of homestead entrymen, within the limits of reclamation projects, whose entries were otherwise assignable under the act of June 23, 1910, supra, had been required to conform their entries to farm units prior to the time when they might submit proof of five years' residence, improvement, and cultivation upon the claims, or, where final proof had been submitted, had their entries conformed to farm units before they were able to effect assignments under the act of 1910; nevertheless, after such conformation they, in apparent good faith, executed assignments and received valuable consideration therefor, which assignments have been rejected by this department as not authorized under the terms of the act of June 23, 1910.

Namely, the innocent party, the party who believed that under the act of June 23, 1910, he had received an assignment, who is down there with his wife and family and made a home, who has paid valuable consideration to the original homesteader, now comes in and asks the Government to give him the same consideration that he believed he was honestly entitled to under the act of June 23, 1910.

Mr. MONDELL. Let me make this suggestion: The trouble with the departmental letter is that it does not state the situation. Whoever wrote the letter had not read the law. The letter says:

A number of homestead entrymen within the limits of reclamation projects, whose entries were otherwise assignable under the act of June 23, 1910.

Now, let us read the act of June 23, 1910. Under it an entry, or part of it, is assignable after a man has made final proof of residence, improvement, and cultivation. What do they mean in the department letter by "otherwise assignable"? There is no assignment possible until the man has made proof, and when the department talks about entries being otherwise assignable they evidently had not read the law.

Mr. RAKER. My friend from Wyoming misses the entire point when he passes by the fact that the homesteader provided for in this bill had resided five years, cultivated five years, made final proof, that he believed that he had a right to the assignment, and it had not been conformed to the reclamation project farm unit before final proof.

Mr. MONDELL. If there was any homesteader who had lived five years, cultivated five years, made final proof, he could assign under the act of 1910 and would not need this act. The only homesteader you are seeking to save is the homesteader who had not made proof prior to the time he assigned proof that the had performed cultivation and maintained residence.

The man who can come under this provision is a man of this sort. The gentleman knows perfectly well what the operation is under the reclamation law. When the farm unit is determined upon the entryman is called upon to conform.

Mr. RAKER. He does not conform until the order is made.

Mr. MONDELL. Let me finish my statement. He is called upon to conform. Many entrymen did not conform and continued to hold their entire entry, notwithstanding that they were called upon to conform. On the other hand, many entrymen did conform. Entrymen in my State conformed four or five years ago, without getting a penny for their excess acreage. On the project in the northern part of my State all of the entries were, I believe, conformed, and I do not think any entryman ever got a penny for his excess. But there were a lot of gentlemen who did not conform. They did not want to conform. They wanted to hold on and get the benefit of the values of the excess land. Then, to help them, we passed the act of 1910, and I think it was a good act. It did relieve those who had hung on in spite of the fact that they may have been called upon to conform. We relieved those by saying that if they lived on the lands long enough to make final proof of residence and cultivation they could assign the entire entry or any excess above the farm unit as a matter of course. I imagine there were some gentlemen who for some reason or other did just what many others did—conform—when they were called upon to conform. The entryman has not conformed to a farm unit until he performs the act required. These men had conformed in some cases. In some cases it is questionable whether they had, as a matter of fact, conformed; but whether they did or not, they had not made final proof. Therefore they had not brought themselves under the law of 1910 in any way——

Mr. RAKER. But this does not relieve those people.

Mr. MONDELL. And when the department talks about "otherwise assignable" I can not understand what they are talking about.

Mr. RAKER. This applies to those who made final proof, just as the gentleman is talking about.

The SPEAKER. Is there objection?

Mr. MONDELL. Mr. Speaker, reserving the right to object, they made final proof when? They made final proof after they assigned. If they had made final proof before they assigned, they would not be here asking this legislation, because they would have been authorized to assign by the law of 1910. They assigned and made final proof later. It is true the gentleman does not propose to relieve anyone who has not up to the time of the passage of this act made final proof, although that is rather indefinite.

Mr. RAKER. Surely not.

Mr. MONDELL. They made assignments before they made final proof. On what possible theory could a homestead entryman make an assignment under the law of 1910, or under any law, prior to making final proof? How could he imagine he had the right to do so?

Mr. RAKER. That is not the condition of this bill, and it does not apply to it. There is no need of discussing it on that ground, because these people made their final proof, but the reclamation project had been required to conform before they made their final proof.

Mr. LANGLEY. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. LANGLEY. I want to know if the House can be held up indefinitely under the rule in this way?

The SPEAKER. The House can be held up until some gentleman demands the regular order.

Mr. MANN. Mr. Speaker, may I ask the gentleman another question?

Mr. RAKER. Certainly; I yield.

Mr. MANN. I notice the gentleman was not able to say how many cases this act, if passed, would apply to.

Mr. RAKER. I am not.

Mr. MANN. That he did not have the number with him, but he knew of two cases?

Mr. RAKER. Yes.

Mr. MANN. I notice the report of the Assistant Secretary of the Interior says a number of homestead entries, and that in the report of the committee this language is used:

> In many instances, however, after making proof or about the time of making proof, such entrymen, acting under supposed sound advice, assigned and shrewd business men and bankers advanced money to intending purchasers fully believing that these assignments were within the law.

Can the gentleman ascertain how many of these assignments were made and whether this bill is for the purpose of protecting these "shrewd business men and bankers" who advanced the money to purchasers, and who undoubtedly hold mortgages on this property, when if they had had any common sense at all they would have known that the law did not provide for that?

Mr. RAKER. There is a great difference in that. We find many bills before the committee all of the time where there have been thorough investigation and examination and where men thought they had titles and find now that they have not. We relieve them. There was one case, but I do not remember the name of it, that had gone to the department. The department has ruled against a woman who has spent in the neighborhood of $3,000 upon improvements, and there are others. I did not gather the names, because I did not think it was necessary.

Mr. MANN. What interest have these shrewd business men and bankers who advanced money in this now?

Mr. RAKER. None that I know of. As a matter of fact, the men who advanced the money thought the title was good.

Mr. MANN. But the gentleman must have had some information or he would not have put that in the report.

Mr. RAKER. I took it from the statement of those who seemed to understand it.

I say that was the statement, that the parties advised the committee that business men and others believed that the title was good, that people felt that way, and that is the reason that that language is used. I have no knowledge of any business men having had anything to do with it in any way.

Mr. MANN. I understand; the gentleman would not have any knowledge except what was given before the committee. I think we ought to have information as to the number of these cases, and if the gentleman has a memorandum——

The SPEAKER. Is there objection?

Mr. STAFFORD. Mr. Speaker, I think this bill should be given more full consideration, and I object.

The SPEAKER. The gentleman from Wisconsin objects.

## PAYMENT OF DRAINAGE ASSESSMENTS ON INDIAN LANDS IN OKLAHOMA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 13133) to provide for the payment of drainage assessments on Indian lands in Oklahoma.

The Clerk read as follows:

*Be it enacted, etc.*, That the Secretary of the Interior be, and he is hereby, authorized, in his discretion, to approve the assessments, together with maps showing right of way and definite location of proposed drainage ditches, made under the laws of the State of Oklahoma upon the allottees in Salt Creek drainage district No. 2, in Pottawatomie County, Okla.

SEC. 2. That the Secretary of the Interior be, and he is hereby, authorized, in his discretion, to pay the amount assessed against each of said allotments: *Provided*, That said assessment shall not exceed $15 per acre on any allotment or portion thereof; and there is hereby appropriated for said purpose, out of any money in the Treasury not otherwise appropriated, the sum of $20,183.39, to be immediately available, the said sum to be reimbursable from the rentals of said allotments, not to exceed 50 per cent of the amount of rents received annually, or from any funds belonging to the said allottees, in the discretion of the Secretary of the Interior.

SEC. 3. That in the event any allottee shall receive a patent in fee to an allotment of land in any lawfully constituted drainage district within the State of Oklahoma before the United States shall have been wholly reimbursed as herein provided, the amount remaining unpaid shall become a first lien on such allotment, and the fact of such lien shall be recited on the face of each patent in fee issued and the amount of the lien set forth thereon, and the receipt of the Secretary of the Interior, or of the officer, agent, or employee duly authorized by him for that purpose, for the payment of the amount assessed against any allotment as herein provided shall, when duly recorded by the recorder of deeds in the county wherein the land is located, operate as a satisfaction of such lien.

SEC. 4. That the Secretary of the Interior is hereby authorized to perform any and all acts and to make such rules and regulations as may be necessary and proper for the purpose of carrying the provisions of this act into full force and effect.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, may I ask the gentleman from Oklahoma a question or two about this bill?

Mr. MURRAY of Oklahoma. Certainly.

Mr. MANN. While the title of the bill would seem to cover payment of drainage assessments on Indian lands in Oklahoma generally, as I understand it, the bill is only intended to apply to one particular drainage district.

Mr. MURRAY of Oklahoma. Yes, sir; that is all.

Mr. MANN. Would the gentleman have any objection to having the title fixed so it will indicate what the bill really is?

Mr. MURRAY of Oklahoma. No. Let me interrupt the gentleman——

Mr. MANN. It is not intended to apply to any case except this one?

Mr. MURRAY of Oklahoma. That is all. Let me make this explanation.

Mr. MANN. Let me ask the gentleman a question or two, if he will permit me, and then I do not care what explanation he may make afterwards. Is this assessment already made?

Mr. MURRAY of Oklahoma. It is made, so far as the district is concerned.

Mr. MANN. Has the assessment been made upon these Indian lands?

Mr. MURRAY of Oklahoma. That is, it has not been assessed, but it has been indicated——

Mr. MANN. Well, the bill says to approve assessments made upon the allottees. Now, have assessments been made or is it intended to approve assessments which may be made?

Mr. MURRAY of Oklahoma. I stated, assessments have been made, but I do not object to a change in the language.

Mr. MANN. Has the assessment been made?

Mr. MURRAY of Oklahoma. Yes, sir.

Mr. MANN. Upon these allottees?

Mr. MURRAY of Oklahoma. Yes.

Mr. MANN. Do they make assessments upon Indian lands, upon all the lands embraced in the area, regardless of the fact that a portion of them are Indian lands and they can not collect assessments in those cases?

Mr. MURRAY of Oklahoma. They assess them in view of payment by the Government, and they do not start the work until they get the appraisement. I will state this, Mr. Speaker, that I did not draw this bill. This bill is identical with the bill referred to in the letter from the Assistant Secretary to the Senate, and I introduced it without any change except as to the amount. I had a letter from the drainage commissioner, I believe, of this particular district, who informed me that they had $21,000 instead of $20,000, and I want to state to the gentleman from Illinois that I expect to offer this amendment: On page 2, line 4, to make it $21,183.39 and to add the words "or so much thereof as may be necessary."

Mr. MANN. Now, the gentleman stated this bill was identical with the Senate bill.

Mr. MURRAY of Oklahoma. With the exception of the amount.

Mr. MANN. This bill was not referred to the department for a report. There is no report upon this bill, but attached to it is a letter contained in the report on the Senate bill.

Mr. MURRAY of Oklahoma. I will call the attention of the gentleman to the fact that the Senate bill was introduced, I think, July 15, 1913—anyway it was in 1913—and at that time they had secured a partial investigation as to the valuation according to the benefits derived, and the bill was introduced in the Senate making it in round numbers $22,000. Since that time they have completed the calculation of assessments upon all the land, and therefore the amount ought to be $21,000 instead of $20,000.

Mr. MANN. As I understand this bill, it is practically a copy of the law in Thirty-seventh Revised Statutes at Large.

Mr. MURRAY of Oklahoma. Practically a copy of the law offered by Mr. FERRIS and passed June 3, 1912, for the district of Sacs and Fox in the same county, I think it was. These must be special acts, because these are not assessed until a statute

like this is passed. I think the gentleman is correct about the change of title.

Mr. MANN. I think it is desirable to have the title indicate something near what is contained in the bill.

Mr. MURRAY of Oklahoma. I think the gentleman is correct about that.

The SPEAKER. Is there objection. [After a pause.] The Chair hears none. This bill is on the Union Calendar.

Mr. MURRAY of Oklahoma. Mr. Speaker, I ask unanimous consent to consider the bill in the House as in Committee of the Whole House on the state of the Union.

The SPEAKER. The gentleman from Oklahoma asks unanimous consent to consider this bill in the House as in Committee of the Whole House on the state of the Union. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the bill.

The Clerk began the reading of the bill.

Mr. MANN. Mr. Speaker, the bill has been read.

Mr. MURRAY of Oklahoma. Mr. Speaker, I desire to offer the following amendment.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 2, line 4, after "$," strike out "20" and insert "21"; and in the same line, after the figures "39," insert the words "or so much thereof as may be necessary."

The question was taken, and the amendment was agreed to.

Mr. MANN. I do not know that it makes any difference, but I would like to say to the gentleman it is entirely unnecessary to insert in a bill of this kind "to be immediately available."

Mr. MURRAY of Oklahoma. Possibly that is true. That is like repealing laws in conflict herewith. I would ask the gentleman to suggest the change in the title.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

Mr. MANN. Mr. Speaker, I suggest the title be amended so as to read as follows.

The SPEAKER. The Clerk will report the amendment to the title.

The Clerk read as follows:

Amend the title so as to read:
"To provide for the approving and payment of drainage assessments on Indian lands in Salt Creek Drainage District No. 2, in Pottawatomie County, Okla."

The amendment was agreed to.

On motion of Mr. MURRAY of Oklahoma, a motion to reconsider the vote by which the bill was passed was laid on the table.

LEAVE OF ABSENCE.

Mr. KENT, by unanimous consent, was granted leave of absence for two weeks, on account of illness in his family.

BRIDGE AT BATON ROUGE, LA.

The SPEAKER. The Clerk will report the next bill.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 13985) to authorize the construction of a bridge across the Mississippi River at or near the city of Baton Rouge, La.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the Baton Rouge Bridge & Terminal Co., a corporation organized under the laws of the State of Louisiana, its successors and assigns, be, and are hereby, authorized to construct, maintain, and operate a bridge and approaches thereto across the Mississippi River at or near the city of Baton Rouge, La., at a point suitable to the interests of navigation, in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906: *Provided, however,* That reasonable rates of toll may be charged and received and no rate for passage of a single passenger on a railroad train shall exceed 25 cents.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

Also, the following committee amendment was read:

Strike out all of section 1 after the enacting clause, as follows:
"That the Baton Rouge Bridge & Terminal Co., a corporation organized under the laws of the State of Louisiana, its successors and assigns, be, and are hereby, authorized to construct, maintain, and operate a bridge and approaches thereto across the Mississippi River at or near the city of Baton Rouge, La., at a point suitable to the interests of navigation, in accordance with the provisions of an act entitled 'An act to regulate the construction of bridges over navigable waters,' approved March 23, 1906: *Provided, however,* That reasonable rates of toll may be charged and received and no rate for passage of a single passenger on a railroad train shall exceed 25 cents."

And insert in lieu thereof the following:
"That the time for commencing and completing the bridge authorized by the act of Congress approved March 2, 1913, to be built across the Mississippi River at or near the city of Baton Rouge, La., is hereby extended one year and three years, respectively, from date of approval hereof."

Mr. ADAMSON. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. ADAMSON. The committee has instructed me to recede from that amendment. Is it proper to withdraw the amendment or ask that it be disagreed to by the House?

The SPEAKER. It is proper to have it disagreed to. Is there objection?

Mr. STAFFORD. Reserving the right to object, Mr. Speaker, I fail to catch the suggestion of the chairman as to what the committee directed him to report.

Mr. ADAMSON. The committee desires that the committee amendment reported shall be disagreed to by the House for this reason: The War Department, when it reported on that bill to the committee, supposing it was the original proposition, suggested that we substitute for the bill merely an extension. We did that. We find that the people concerned desire the new bill, which does not include one or two of the provisions that were in the old bill; and because they were in there the enterprise failed.

Mr. STAFFORD. When I read the original bill, my attention was attracted to the part providing for the levying of tolls not to exceed a certain rate.

Mr. ADAMSON. That still goes in.

Mr. STAFFORD. Is that provision new to this bill or is it a part of the old measure?

Mr. ADAMSON. A part of the old measure and retained in the new bill.

Mr. STAFFORD. I would like to ask the chairman what is the practice as to levying of fares or charges by private corporations over these bridges which Congress authorizes? They do not come under the provision of the interstate act, because they are not common carriers.

Mr. ADAMSON. The general bridge act provides that where tolls are to be collected the Secretary of War shall regulate the amount to be charged. This bill is not in conflict with that. It simply says the maximum shall not be above 25 cents.

Mr. STAFFORD. It is in conflict only so far as it limits the amount?

Mr. ADAMSON. Yes. They can not go above 25 cents for each passenger.

Mr. STAFFORD. Will the gentleman inform the committee wherein this bill differs from the bill that has expired by limitation of time?

Mr. ADAMSON. On the demand of the local authorities the committee incorporated in the bill a provision that the railroad should also construct a bridge for pedestrians and vehicles in order to accommodate the public. As the railroad did not find sufficient inducement to do that, it could not find capital to finance it, and the public authorities have withdrawn that demand. They have informed the committee through their representative that they do not demand that, but are willing for that bridge to be constructed for railroad purposes.

Mr. MANN. Mr. Speaker, reserving the right to object, it is a very unusual thing to insert a specific toll provision in one of these bills, because under the general law the Secretary of War has authority.

Mr. ADAMSON. Yes, sir. They have that in the case of the Memphis bridge, and I think two or three bridges probably on the Mississippi River.

Mr. MANN. I do not think we put it in in the case of the Memphis bridge.

Mr. ADAMSON. Yes; it is in the Memphis bridge act, as there is a bill now pending to amend it.

Mr. MANN. I think the gentleman is mistaken about that. The Memphis bridge was built under the general law.

Mr. ADAMSON. There is a bill now pending to amend that.

Mr. MANN. There may be a bill now pending, but we refused to insert in the McKellar bill for the Memphis bridge a provision in reference to tolls.

Mr. ADAMSON. That is not the one I speak of.

Mr. MANN. They may have had one before the general law was passed.

Mr. ADAMSON. That is true.

Mr. MANN. I think there should be some good reason why it should be done.

Mr. ADAMSON. Well, I do not insist on it. I am perfectly willing to risk the Secretary of War in that respect.

Mr. MANN. It seems to me as long as the committee recommended an amendment we have the right to assume it was the amended substitute that was likely to be up for consideration instead of the original bill, and the gentleman had better ask unanimous consent to pass it over, so that we will have a chance on the original bill.

Mr. ADAMSON. The author of the bill does not insist on a maximum at all. I do not object to eliminating it.

Mr. MANN. I examined the substitute bill in this case, as in many others, where the complete substitute is presented, and

if gentlemen who have bills drafted or reported then want to entirely change the matter when it comes before the House I think we should have a chance to examine the bill.

Mr. ADAMSON. Does the gentleman from Illinois understand that the committee now recedes from the amendment or substitute?

Mr. MANN. I understand they desire to recede, but I understand that I read the substitute and examined it, supposing it was coming up, and the committee now, as a matter of surprise, recedes from that and proposes to bring something else up. I think the House should have an opportunity to examine it.

Mr. ADAMSON. Does the gentleman desire the bill should be passed over?

Mr. MANN. Yes.

Mr. ADAMSON. That is perfectly satisfactory, Mr. Speaker. I ask unanimous consent that the bill be passed on the calendar without prejudice.

The SPEAKER pro tempore (Mr. HOUSTON). Is there objection to the request that the bill be passed on the calendar without prejudice? [After a pause.] The Chair hears none. The Clerk will report the next bill.

BRIDGE ACROSS THE MISSOURI RIVER NEAR WELDON SPRINGS LANDING, MO.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 13771) extending the provisions of the act of March 3, 1913, authorizing the construction of a bridge over the Missouri River near Weldon Springs Landing, Mo.

The SPEAKER pro tempore. Is there objection to the consideration of the bill?

Mr. MANN. Let us have the bill reported, Mr. Speaker.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 13771) extending the provisions of the act of March 3, 1913, authorizing the construction of a bridge over the Missouri River near Weldon Springs Landing, Mo.

*Be it enacted, etc.*, That the provisions of the act of March 3, 1913, authorizing the construction of a bridge over the Missouri River near Weldon Springs Landing, in St. Charles County, Mo., subject to the provisions of the act of March 23, 1906, be, and they are hereby, extended to permit construction of said bridge to begin within one year from the date of the approval of this act, and to extend for three years from the date of the approval of this act the time for the completion of said bridge.

With a committee amendment:

Strike out all after the enacting clause, on page 1, and lines 1, 2, and 3, on page 2, and insert the following:

"That the time for commencing and completing the bridge authorized by the act entitled 'An act to authorize the St. Louis & Western Traction Co. to construct a bridge across the Missouri River near Weldon Springs Landing, in the State of Missouri,' approved March 4, 1913, is hereby extended one year and three years, respectively, from March 4, 1914.

"SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved."

The SPEAKER pro tempore. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from Georgia [Mr. ADAMSON] how far Weldon Springs Landing is from the mouth of the Missouri?

Mr. ADAMSON. I do not remember exactly.

Mr. CLARK of Missouri. It is somewhere in the neighborhood of 40 miles. I think it is 30 miles or 25, the way the river runs, to the mouth of the river, and this Weldon Springs Landing is 8 or 10 or 15 miles above St. Charles.

Mr. MANN. Are there any springs there?

Mr. CLARK of Missouri. No.

Mr. MOORE. Does the Speaker know the depth of water in the Missouri River at this point?

Mr. CLARK of Missouri. The Missouri River at that point is deep enough to float the *Grand Republic*. There is plenty of water. The springs used to be considered medicinal springs. There is no town there that amounts to anything. This bill has been in here and has been renewed three or four times. That rose out of the fact that the company that undertook to build this electric road from Kansas City to St. Louis went out of business, and a new company has gotten hold of it, and I think they will build the road this time. It ought to be built.

Mr. MOORE. I am very much obliged to the Speaker for that information.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill as amended.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. ADAMSON, a motion to reconsider the vote whereby the bill was passed was laid on the table.

BRIDGES ACROSS THE ARECIBO RIVER, P. R.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 12117) to authorize the government of Porto Rico to construct two bridges across the Arecibo River, near the city of Arecibo, P. R.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 12117) to authorize the government of Porto Rico to construct two bridges across the Arecibo River, near the city of Arecibo, P. R.

*Be it enacted, etc.*, That the government of Porto Rico be, and is hereby, authorized to construct, maintain, and operate two bridges and approaches thereto across the Arecibo River, near the city of Arecibo, P. R., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

With a committee amendment.

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, Mr. Speaker, what has become of the Senate bill?

Mr. ADAMSON. I do not remember. I guess it is still in committee.

Mr. MANN. I guess it is up in the gentleman's committee room.

Mr. ADAMSON. I guess it is.

Mr. MANN. I suggest to the gentleman that he had better pass this bill over momentarily and send up for it.

Mr. ADAMSON. Does the gentleman mean to pass the Senate bill instead of this one?

Mr. MANN. Yes.

Mr. ADAMSON. Well——

Mr. MANN. The Senate has passed an identical bill.

Mr. ADAMSON. I think we had better pass this one.

Mr. MANN. Oh, no; it is not courtesy to the other body when they pass a bill for us to pass one just like it and send it over. They have to ask to have that bill returned to them. I suggest to the gentleman that he ask that this bill be laid over for a few minutes and send up for the other bill.

Mr. ADAMSON. Mr. Speaker, I will ask that this bill be passed over momentarily until I can send up to the committee room to get the Senate bill.

The SPEAKER. The gentleman from Georgia [Mr. ADAMSON] asks unanimous consent that this bill be passed over momentarily. Is there objection?

There was no objection.

IMMIGRATION STATION AT BALTIMORE, MD.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11625) to increase the appropriation for the erection of an immigration station at Baltimore, Md.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 11625) to increase the appropriation for the erection of an immigration station at Baltimore, Md.

*Be it enacted, etc.*, That section 29 of the public building act approved March 4, 1913, providing for an immigration station at Baltimore, Md., is hereby amended so as to increase the limit of cost from $280,000 to $600,000.

With a committee amendment as follows:

On line 7, strike out the figures "$600,000" and insert in lieu thereof the figures "$550,000."

The SPEAKER. Is there objection?

Mr. LANGLEY. Mr. Speaker, the Committee on Public Buildings and Grounds, of which I am a member, had a public hearing in Baltimore on this bill providing for an immigration station there. While the committee was there a number of arguments were made before it in behalf of the bill, and several questions were asked by different members of the committee. Some questions asked by me have been made the subject of an editorial in the Louisville Times, one of the leading journals of Kentucky. This editorial wholly misstates my position on the important subject of immigration. I would like to address the House now, if I could, so that I might, as speedily as possible, correct in this public manner the injustice which the Times has done me, but, as you will observe, I am suffering from severe hoarseness, rendering it impossible for me to do that. I therefore ask unanimous consent to extend my remarks in the RECORD, in order that I may state the facts as they are and explain my position.

The SPEAKER. The gentleman from Kentucky [Mr. LANGLEY] asks unanimous consent to extend his remarks in the RECORD for the purposes indicated. Is there objection?

There was no objection.

Mr. LANGLEY. Mr. Speaker, during my public service, covering a period of a good many years, I have rarely made a reply to a newspaper criticism; and during my service of

nearly eight years in this body I do not recall that I have in a single instance taken any of its time to reply to anything that a newspaper has said about me. I recognize that it is the peculiar function of the newspapers to criticize the public acts of public officials, and I concede that they have rendered and are still rendering a great public service in that field. I want to say also that, as a general rule, I have found the great newspapers of the country, including the Louisville Times, just and accurate in their discussion of public servants, usually refraining from intentional misstatement of facts. But, Mr. Speaker, the Times editorial embodies such a gross misstatement of what has actually occurred that I feel that I owe it to myself and to my constituents to correct it in this manner.

I do not mean to say that this editorial is the outgrowth of malice. I do not know who wrote it, and I can not think of any event of the past or contingency of the future that might have inspired it. I have the pleasure of the personal acquaintance of some of the chief owners of that paper and hold them in the highest esteem, and I feel confident that nothing would appear in it by their direction that would be unjust or unfair to me, or to anyone else for that matter. If this had been the first editorial in the Times misrepresenting my position, I would perhaps have been less impressed by its injustice; but there was another one which appeared in the same paper early last month which was likewise a misrepresentation in part of what I had said. While I am about it, I want to straighten that out also. On the 4th of last February, while the Burnett immigration bill was pending in the House, and while the House was considering the amendment offered by the gentleman from California [Mr. HAYES] relating to Asiatic immigration, I made a few remarks on the amendment. The next day the Times contained the following editorial:

"TOMMYROT."

It is comforting, at first glance, to learn from Mr. LANGLEY, of Kentucky, in his official capacity as a Representative in the Congress of the United States, that the "Japanese war scarce is all tommyrot." Some measure of this comfort disappears, however, when Mr. LANGLEY proceeds to the unfolding of the reasons responsible for this categorical, if not authoritative, utterance.

It was to be hoped that Mr. LANGLEY had knowledge, concealed apparently from the administration, that Japan, under no circumstances, can be induced to undertake war with the United States. Disappointingly enough, it is made clear from Mr. LANGLEY'S statement in full that he is not possessed of such knowledge, but of the phamdool and flamboyant belief that licking Japan will be the easiest proposition imaginable.

Mr. LANGLEY generously concedes that Japan might take the Philippines. Naturally enough, he outlines no plan by which they could be easily retaken, since better-informed students of military affairs than Mr. LANGLEY are devoid of such knowledge.

Japan, he is sure, will never land an army in this country, and, if she did, Mr. LANGLEY is certain that it would never get farther than Kentucky. It is to be inferred, though it is not asserted, that Mr. LANGLEY and his constituents would in that event run it into Bitter Creek, where all of its officers and men would perish miserably.

The American Navy, Mr. LANGLEY argues, is superior to Japan's. Which is a patriotic expression of opinion. It is yet to be demonstrated that it is an assertion of fact.

But, whether fact or not, this much is true: Japan, with its navy and transport service, can land an army of 200,000 men in this country before the Atlantic Fleet could reach Pacific waters. To oppose such an army there are some 30,000 Regular troops, the half-trained militia, and the untrained and unequipped volunteers. It might well be that Japan would see fit not to make such a move. If she did, there would be nothing to prevent its successful execution, and the Pacific coast would pay the penalty.

Assuming, however, that Japan did not invade America. What would there be to prevent her taking the Philippines, Hawaii, and Alaska?

To recover them, the United States would practically have to double the strength of its Navy, and to create both an army and a transport service, which would take years and millions, and which, when done, would leave the United States no better off than before, since Japan has neither the money nor the territory requisite for adequate reimbursement.

What Mr. LANGLEY has to say "listens" well until dissected. The action of the Democratic majority in the House on the same day that Mr. LANGLEY was being delivered of his oration "listens" better the more it is dissected.

If war with Japan should ever come, it will be something more than a practice cruise for the Navy and an all-day outing for the Regulars, the Militia, and the Volunteers. If it does come, this country will no doubt prepare itself to pay the full cost of success. But the part of statesmanship, which, in the last analysis, is but educated patriotism, demands that no unwarranted act on the part of this country shall make it possible. That was the view taken by the House majority and by such members of the minority as Mr. MANN. In the adoption of this view it is to be noted with satisfaction that another Kentuckian, SWAGAR SHERLEY, played a leading part. In this instance, at least, it may be ventured that Mr. SHERLEY is more nearly right than Mr. LANGLEY.

So much of this editorial is based on things that I did not say and the inferences to be drawn from it are so likely to cause my position to be misunderstood, that I am going to reproduce from the CONGRESSIONAL RECORD (See p. 2823) my entire remarks on that occasion, which were quite brief:

Mr. LANGLEY. Mr. Chairman, I am opposed to the amendment offered by the gentleman from California [Mr. HAYES]—that is, I am opposed to ingrafting it on this bill—for two reasons. In the first place, those who are in a position to know, and in whose judgment I have the utmost confidence, say that the adoption of such an amendment will probably defeat the bill, and being anxious to see it enacted into law, and as speedily as possible, I shall vote against the amendment, although I am in favor of the purpose which the gentleman is seeking to accomplish and I would heartily support it as a separate proposition. I shall vote against it for the further reason that those who are in the confidence of the administration say that the adoption of such an amendment would embarrass the efforts that it is making for an amicable and honorable settlement of a perplexing international question. I am in hearty accord with the sentiments just expressed by the distinguished leader of the minority.

It is true that I belong to a political party not in sympathy with the domestic policies of the present administration, but, as the distinguished Secretary of the Navy recently said, it is the duty of every American citizen, regardless of politics, to sustain the head of our own Nation in any controversy with a foreign power. This is not a political duty, but a patriotic duty. Woodrow Wilson is a Democrat, but he is the President of all the people now, and William Jennings Bryan is the Secretary of State of all the people now, and we must assume that in dealing with this question they are actuated by the highest and most patriotic motives, and that they will handle it in a manner befitting the dignity, honor, and prestige of our Nation; and so long as they do, no partisan motive or advantage should be permitted to swerve us in the slightest from our duty to our country. [Applause.]

At the same time, Mr. Chairman, I can not permit the opportunity to pass of saying that I for one am growing weary of side-stepping the Japanese question. I do not close my eyes to the ever-darkening shadow of this Asiatic peril. I do not mean the shadow of grim-visaged war, for I think that phase of the situation is much exaggerated. I mean rather the menace of the industrial war which, unless we take steps to prevent it, is inevitable as a result of the industrial awakening among the teeming millions in the Orient who are responding with alarming rapidity to the touch of the spirit of this progressive age. I hope the promise given here to-day by the gentleman from Alabama [Mr. BURNETT] and others, that a separate measure dealing with this question will be brought before us at an early date, will be faithfully kept; and when it is, I hope to have the privilege of discussing it further. I do not know how other gentlemen may feel about it, but, speaking for myself alone, I do not think we have anything to fear about a war with Japan. Gentlemen who are alarmed on that question should remember that Japan is in no financial condition for such a conflict, and that we have a much more powerful Navy and many more people. Therefore they could not hope to cope with us either upon the sea or upon the land. I do not think there is the slightest danger of them sending an army of invasion into the United States; but if they should, and if the line of march should happen to extend through Kentucky, I think I can safely promise you that the army will never get any nearer to Washington. [Laughter and applause.]

It will be observed that I said nothing about the "Japanese war scare" being "all tommyrot." However, if what I did say about growing weary of so much side-stepping of the "Japanese question," and so much exaggeration of the probability of a war with Japan amounts to saying what the Times says I said, I am willing to let it go at that. I said nothing whatever about the Philippines. I did not even hint at them; so that a considerable portion of the criticism of me in this editorial is based upon the assertion that I said something which I did not say. At first it occurred to me that the editorial might have been based upon an inaccurate press report of my remarks, but, upon reading the editorial more carefully, and especially this language:

It was to be hoped that Mr. LANGLEY had knowledge, concealed apparently from the administration, that Japan under no circumstances can be induced to undertake war with the United States. Disappointingly enough, it is made clear from Mr. LANGLEY'S statement in full that he is not possessed of such knowledge, but of the phamdool and flamboyant belief that licking Japan will be the easiest proposition imaginable.

I must conclude that the writer of the editorial was familiar with my "full statement." And that makes out pretty nearly a prima facie case of intentional misrepresentation.

With some of this editorial I do not desire to take issue. Indeed, I concur in the logic of a part of it, and if its statement of facts and its inferences had been fair and accurate, I should probably have no criticism to offer to any of it, although I think the editor's estimate of what he terms "the half-trained militia and the untrained and unequipped volunteers" is wholly at variance with the splendid history of our citizen soldiery, for their intrepidity and valor constitute the real bulwark of our liberties. Let but a single bugle call sound the warning of danger to our country from a foreign foe and they would rise up by the millions from our hills and valleys and plains until even 200,000 Japanese, if the Times is correct about their ability to send that many, would look in comparison like a detachment of Texas Rangers on dress parade. The editor evidently does not understand that our standing Army is merely the nucleus of our military establishment and is not, even in a nominal degree, the measure of our military power. But, Mr. Speaker, Japan knows these things; and that is why I said what I did. The editorial pays a deserved tribute to the gentleman from Illinois [Mr. MANN] and to my colleague, Mr. SHERLEY, and commends the House majority for the action taken upon the amendment, but it seeks, by innuendo at least, to make it appear that I opposed their view and the action of that majority, when quite the contrary was true, as my vote and my language quoted above conclusively show. Of course my statement that an invading Japanese army would not get nearer Washington than Kentucky was only a pleasantry. The House so understood it at the time

and, so far as I am advised, everybody else so understood it except the writer of this editorial.

Although I spoke facetiously, I really felt, as I happen to know that many others feel, that there has been too much truckling and concession and not enough genuine Americanism practiced in handling our diplomatic affairs with Japan. I would also have been well within the truth if I had said that whenever Japan decides to make war upon this country—a thing which, in my humble judgment, she will never dare to do—the people of Kentucky will be found ready, as they have ever been in our country's wars, to do their full share in maintaining the honor of its flag. And if I had spoken frankly the sentiments that were in my heart I would have gone further and said that millions and millions of patriotic American citizens, proud of the traditions, conscious of the power and jealous of the prestige of our great Republic, were growing weary of the un-American policy of "watchful waiting" in handling matters "of even greater delicacy and nearer consequence," as our President puts it. I might also have said that a great majority of our people were longing for a return to the good old days of Republican American administration, and to have some one again at the helm of the ship of state with the indomitable courage and patriotic Americanism of a McKinley or a Roosevelt, or of some of the other matchless commanders in chief of our Army and Navy which the Grand Old Party has furnished the Nation, so that outrages upon our citizens would be swiftly redressed, rendering it unnecessary for the Texas Rangers to go upon foreign soil and bring back to his heartbroken family the mutilated remains of an American citizen, or for our ambassadors to make apologetic speeches in foreign courts, or for us to trucklingly yield up to the avarice of a rival foreign power the benefit of America's incomparable achievement, costing $400,000,000 of our people's treasure. But I refrained from doing this for the reasons stated at the time. Whether I did my duty then I shall leave for others to decide.

But, Mr. Speaker, returning to the main question, I would have allowed this editorial, incorrect and unfair as it was, to pass without notice if the Times had stopped there. It did not do so, however. On March 13 it contained the following editorial:

A KENTUCKY BOYCOTT.

Congressman JOHN W. LANGLEY reports the discovery that a secret organization in Europe has boycotted Kentucky. He says that in Austria and several other countries a warning bulletin has been issued and spread broadcast bearing the caption, "Don't go to Kentucky." He says maps are being distributed throughout Europe with certain States printed in black, and that Kentucky is sable-hued on the aforesaid map.

Mr. LANGLEY is considerably peeved over the prospect of losing the citizenship of such persons as might come to Kentucky if they were not influenced by these warning posters to stay away. He says it is a notorious fact that too many immigrants remain in the cities where they arrive—New York, Philadelphia, and New Orleans. He deplores the fact that the immigrants do not hasten to Kentucky.

Kentucky has been fortunate in the class of immigrants that have sought homes within her borders. It is doubtful if there is another State in the Union which can boast of so clean a record in the matter of immigration. The immigrants who have settled on Kentucky soil have in the main been of honest, thrifty, and sturdy stock, and they have distinguished themselves as good citizens.

There is a class of people, however, which contributes nothing to the welfare of a State, and Mr. LANGLEY might curb his impetuosity while he takes a look at the riffraff which drifts in from southwestern Europe. If these people are the object of his commiseration, then it might be said that the Kentucky boycott is a blessing.

I am sure that everyone who reads these remarks will be surprised to learn that this rather remarkable editorial had alone for its foundation the following: The mayor of the city and several other prominent gentlemen delivered short addresses to our committee at Baltimore. One of these was Mr. W. H. Manss, vice president and general manager of the Southern Settlement and Development Organization. I quote the following excerpts from the printed report of his address (see printed hearings No. 13) containing a reference to the matter which has been made the subject of this editorial:

Mr. MANSS. * * * Our organization is not for private purposes. We have nothing to sell and nothing to buy. We simply want to advance the interests of the South. The question was asked by my friend from Grand Rapids as to why the immigrants did not go on farms. There are two reasons, perhaps, condensed into one. The first is that there is a map circulating throughout this country showing all States southeast of the Mississippi River printed in the blackest ink of the printer, and at the end of the map are these words: "Do not locate here; they are unfair and unjust, and you do it to your disadvantage."

Mr. LANGLEY. Who does that?

Mr. MANSS. I am not here to state publicly; but that map exists, and I think Mr. Powderly has one in his possession, and those maps are circulated amongst the people of Europe. Consequently the people of Europe, as well as the people of the United States—and I say this for shame, because I should know something about the work—do not know what the resources of the South are. * * *

Mr. LANGLEY. Could you get me one of those black maps?

Mr. MANSS. You can get one from Mr. Powderly.

Mr. EAGAN. You are not for the literacy test?

Mr. MANSS. No; I do not think it is a true test. I think education is not the standard of morality.

Mr. BELL. What test would you prefer?

Mr. MANSS. I am not prepared to answer that.

Mr. PRESTON. Let everyone come in who is healthy.

Mr. KREIDER. You do not believe in spending several million dollars in building a railroad in Alaska?

Mr. MANSS. I think there is something in that, Mr. Congressman.

Mr. LANGLEY. Let them build a railroad down South.

* * * * * * *

Mr. LANGLEY. But the question is, Do you think a new immigration building will help the agricultural development of the State?

Mr. BELL. What about the Japanese? Would you want them to come in?

Mr. MANSS. No; you can keep them in California. Now, the tendency is to take the immigrants out into the congested cities, when we ought to send them into the South to settle on those 188,000,000 acres of land which can be bought at a very low price. We need more people to work our farms, and we ought to have such facilities as will induce the boats to come here with their passengers and freight, and we need such facilities of rail and water as to enable these people to go into the South, Southwest, and Southeast portions of the country. Baltimore is the natural port of entry for immigrants. Unless we have adequate facilities for landing immigrants the steamship companies will not bring their passengers here.

Mr. SMITH. What percentage of immigrants remain in the city after landing?

Mr. MANSS. In the year 1912, out of 135,000 immigrants who were booked as farmers, 2 per cent landed on farms, while 98 per cent went to cities.

Mr. SMITH. Why was that?

Mr. MANSS. Because they landed at ports where the call of the congested city was greater than the call of the farm, where they were grabbed hold of by speculators; and they remained in the cities rather than go to the farms. According to recent figures, less than 27 per cent of the total population of the United States is now on farms or in cities of 1,000 inhabitants or less.

Mr. BELL. Do you not think that some of these men are incorrectly booked at the point of embarkation?

Mr. MANSS. No; we find that the bookings are practically correct. Many of them come over here intending to go on farms, but they follow the call of the city. I wish you could see some of the letters that have been written by people who want to get back on the farms because of the misrepresentations and the inducements of work in the cities that were made to them when they arrived.

Mr. LANGLEY. You think there are greater advantages offered them in the cities than in the country, and therefore they choose the city?

Mr. MANSS. Yes, sir; and if we could show them the advantages of a farm life, they would go to the farms.

Mr. LANGLEY. That is, if somebody does not show them the advantages of Baltimore first.

From the foregoing it appears that the discussion took a rather wide range, and that both the membership of the committee and those who were addressing it were merely seeking to get at facts that were material to the general subject under consideration. My colleague, Mr. CANTRILL, and I were the only southern members of the committee who were in attendance. At the time Mr. Manss made the statement about the black map that he said was being circulated in Europe, warning immigrants against going to States southeast of the Mississippi River, my colleague was engaged in conversation with some one and apparently did not catch the remark. It struck me as a rather curious thing, and, as a southern Representative, I was naturally curious to know more about the matter, and feeling sure that the people of Kentucky would like to know the facts also, I asked the questions indicated. This is all that was said on the subject at that hearing except some friendly badinage of me on the part of my colleagues for being a Representative of "a black spot on the map," as they jokingly put it; and I have not at any time since then made a single statement regarding it that would warrant the comments in the Times editorial. Indeed, I have not given an interview on the subject at all, and if one has been published that justifies a single sentence in this editorial it is a fiction pure and simple. It is rather surprising, to say the least, that a Kentucky newspaper, and especially one with the standing of the Times, would so pervert the action of one of the State's Representatives in asking the questions I did about a matter that the people of the State would necessarily be interested in, as to put him in a false light, as this editorial does; and I shall be very glad indeed to learn that the Times has been misinformed as to the facts.

I can not expect a gentleman who is as busy as the editor of the Times must be to be familiar with what is contained in all the speeches of the delegation from his own State that appear in the CONGRESSIONAL RECORD, but the Times has contained on various occasions news items in its Washington dispatches showing that my position on this immigration question, ever since I have been a Member of the House, has been exactly the opposite of what this editorial represents it to be, and I think it would have been but fair for the editor to have made at least some inquiry before writing and publishing such an unfounded editorial. Only a little over a month before this editorial appeared I made some remarks in the House on this very question, and I am quite sure that some mention was made of it in the Kentucky papers, enough at least to make it certain that I did not entertain any such views as this editorial

states. I will insert these remarks here, as they are a complete refutation of the editorial:

Mr. LANGLEY. Mr. Chairman, I rise for the purpose of opposing the pending amendment. I am in favor of the paragraph as it stands. I voted against closing debate a few moments ago, however, although the motion was made by the gentleman in charge of the bill. I did this because I regard this paticular paragraph as embodying one of the most vital questions that has been considered in this Congress, and I am in favor of giving gentlemen on the other side of it full opportunity to be heard. It is a two-sided question, gentlemen, and we must concede that there is force in some of the arguments that are being presented against it. There is one thing that I am glad of, and that is that it is being treated as a nonpartisan measure, and I beg to suggest that perhaps the country might have been better off if such a rule of procedure had been adopted earlier in this Congress. [Applause.]

Mr. Chairman, I am as firm a believer as ever in the soundness of the fundamental tenets of the Republican Party, but I have never contended that it is free from error; and I question the eligibility to membership in this House of any gentleman who believes that his party is so constituted. If I were asked to point out what I regard as an error that my party committed while it was in power, I should reply that it was its failure, when erecting a tariff wall to restrict the coming in of the products of foreign labor, to also erect an immigration wall to restrict the coming in of the man on the job, as the gentleman from Washington [Mr. JOHNSON] would express it.

Mr. Chairman, the jewels of oratory have been quite abundant in this debate, but the jewels of consistency have been rare indeed. [Applause.] Some of the extreme protectionists have been the most vehement in their opposition to this bill. They want the products of foreign labor excluded, but they want the foreigners themselves brought in. On the other hand, some of the most vigorous enemies of protection who want competition with foreign products are just as vigorously opposed to competition with the foreign laborers themselves.

Mr. PLATT. Mr. Chairman, will the gentleman yield?

Mr. LANGLEY. No; I can not yield. I have not time enough, even if I do not permit an interruption, to say all that I would like to say.

Mr. PLATT. Just one question.

Mr. LANGLEY. Well, I will yield to my friend from New York for a short question.

Mr. PLATT. Does the gentleman think it inconsistent for Democrats to want us to buy goods abroad and compel people to stay abroad and make them?

Mr. LANGLEY. Well, as to that, Mr Chairman, the gentleman knows that we do not often find Democrats consistent, anyway; but I will say that I do not think that we should admit either the goods made abroad or the men, women, and children who come here from abroad in greater quantities than we can assimilate with advantage to our own people. It should be remembered that most of them who come here cut wages to get a chance to make the goods here; so that the opportunities of our own people for employment are reduced whether the foreigners come here or stay on the other side and send the products of their labor over here. Consistency requires that if we give protection to the man who pays the wages we should also give protection to the man who earns the wages, which means, of course, restriction of imports as well as of immigration. If the one proposition is sound economically, the other is also. I could give many illustrations of the inconsistency of gentlemen on both sides of the House on these two propositions. For example, the gentleman from Missouri [Mr. BARTHOLDT] is an ardent Republican and an orthodox protectionist. He never misses an opportunity to oppose competition with the products of cheap foreign labor, and yet he wants the cheap foreign laborer himself brought in.

Mr. BARTHOLDT. That is perfectly consistent——

Mr. LANGLEY. I think it is the height of inconsistency and that the gentleman is one of the brightest jewels in this crown of inconsistency.

Mr. BARTHOLDT (continuing). Because I want to make the newcomer a consumer in this country.

Mr. LANGLEY. Ah, but he becomes a competitive producer as well, and our experience has been that he produces more than he consumes, or, rather, that he takes more employment away from our own people than he furnishes employment to them by reason of what he consumes, and, besides, he must work to get wages to pay for what he consumes; so that we get the worst of it on that score, even if all the immigrants became desirable and ideal citizens of our country But, Mr. Chairman, I must decline to yield further.

Mr. CANTOR. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. The gentleman declines to yield.

Mr. LANGLEY. On the other hand, there is my friend and colleague, Mr. BARKLEY, the ardency of whose Democracy can not be questioned and who, although a new Member, has already impressed his strong mentality upon this House. He pitched his advocacy of this bill upon his desire to protect the opportunities of his own people against the competition of the foreigner, and yet he is opposed to the doctrine of protection and supported the Underwood tariff bill, which, by increasing imports, has already thrown thousands of our people out of employment and will do the same thing to thousands more.

Mr BARKLEY. Will my colleague yield to me for a question?

Mr. LANGLEY. Certainly, since I have referred to him.

Mr. BARKLEY. Does not the gentleman know that imports have not increased since the Underwood tariff bill went into operation, and therefore that no one has been thrown out of employment on account of increased imports under that law?

Mr. LANGLEY. I have not the figures before me, and indeed I do not think enough of them are available yet upon which a comparable statement for any considerable period can be based. It is true that the revenues derived from imports since the bill went into effect are less than they were before, because the duties were lowered, but it is my understanding that the value of our imports since the bill became effective is greater than before for the same period. I have not seen the figures, but I have been told that taking the imports and exports for the months of December, 1912, and December, 1913, the balance of trade in our favor for the latter month was forty-five or fifty millions less than it was for the same month in 1912. In other words, we bought more and sold less abroad in last December under your Democratic tariff than we did during the preceding December under a Republican tariff, and that must mean diminishing employment and decreasing prosperity for our own people. But my friend and I will have an opportunity to discuss that more fully and more accurately at a later date.

Mr. Chairman, these inconsistencies to which I have been referring constitute, to my mind, a political paradox that I am unable to fathom. [Laughter.]

It was once the boasted shibboleth of a great party that "the gates of Castle Garden swing inward." Then it was pointed to as an evidence of prosperity, but the gates have swung so far inward and so wide as to create a national menace that calls for a drastic remedy. Instead of proving national prosperity as it did then, it now threatens denationalization. The enormous increase of immigration in recent years has already been fully discussed in this debate, and I would not go over the ground again even if my time permitted. A friend of mine who recently visited New York City, and who has made some investigation of this question, tells me that there appear to be more Jews there than there ever were in Jerusalem, aye, even in Palestine, in the days when that God-favored people were at the zenith of their ancient glory, and more Italians than there were in Rome when the Roman legions were conquerors of the earth. I do not mean to leave the inference that they are not all good citizens, but I mention this as an evidence of how liberal our Government has been upon this question of immigration and of the growing importance of it to our people.

It has been repeatedly charged in this debate that the gentleman from Alabama [Mr. BURNETT] and his followers are actuated by motives that are anything but patriotic and that they are seeking to force this measure through by appeals to prejudice. Mr. Chairman, I can not persuade myself into the belief that a monopoly of patriotism and pure, impartial motives is enjoyed by gentlemen whose districts include immigration ports or large cities or other territory where the foreign vote predominates or is potent, or who for other manifest reasons share the sentiments of that class of voters. Why not let us be perfectly frank and fair with one another and concede that, primarily, each of us is endeavoring to carry out the wishes and promote the interests of his constituents?

The CHAIRMAN. The time of the gentleman from Kentucky has expired.

Mr. LANGLEY. Mr. Chairman, I hope the committee will permit me to proceed for two or three minutes longer. I ask unanimous consent, Mr. Chairman, that I may do so.

The CHAIRMAN. The gentleman from Kentucky [Mr. LANGLEY] asks unanimous consent to proceed for three minutes. Is there objection?

There was no objection.

Mr. LANGLEY. Mr. Chairman, I freely admit that I want these restrictions because a large majority of the people of my district want them and because I believe it will be to their interest to have them, and I concede the same high purpose to those who oppose the bill.

I hope I do not underestimate the weight of the arguments on the other side. I was greatly impressed with the eloquent appeal of the gentleman from New York [Mr. GOLDFOGLE] and the fervent words of the gentleman from Illinois [Mr. MANN], and I have listened with interest and profit to the arguments of many other gentlemen on that side of the question, but I remain unconvinced, for I still believe that, everything considered, the literacy test is the wisest and most effective method of dealing with the serious situation that confronts us.

Many gentlemen opposed to this bill have contended that there is no demand for such legislation, but none of them have undertaken to explain why, if that be true, that there is such an overwhelming majority of this great body, fresh from the people, in favor of it. My observation has uniformly been that when such a situation exists it is responsive to the demands of the people who sent them here.

That this literacy test will work hardships in individual cases, and will sometimes exclude those who would make desirable citizens, must be admitted; but we must also remember that oftentimes in the administration of the affairs of government such considerations must give way to the higher one of national expediency.

Of course, I had rather admit an illiterate patriot than an educated anarchist or disturber, and I wish it were practicable to segregate them on that basis, but it is not.

I would not in the least disparage the good influences that have been wrought by, nor minimize the deeds of valor and of patriotism that are recorded in the history of, the achievements of many of our foreign-born citizens. Many of them have written their names high upon the Nation's honor roll. All honor to these, and thrice welcome to those yet to come whose histories in their native lands give promise of such achievements here.

These are not the ones we seek to exclude, but rather those who come not here to stay, who have no sympathy with our institutions, who do not cherish and can not learn to cherish the sacred traditions of the Republic, who do not love and honor its flag, and who can not feel or comprehend the emotions in the bosom of the poet when he wrote:

> Breathes there the man with soul so dead
> Who never to himself hath said,
> This is my own, my native land!

[Applause.]

The CHAIRMAN. The time of the gentleman from Kentucky has again expired.

In view of what I said on this and previous occasions, it is utterly beyond my comprehension how the editor can find warrant for his statement that I am "considerably peeved over the prospect of losing the citizenship of such persons as might come to Kentucky if they were not influenced by these posters to stay away," or, for the further statement, that "he (I) deplore the fact that the immigrants do not hasten to Kentucky"; and when the editor says, or seeks to leave the impression, as he does, that I want Kentucky to get "the riffraff which drifts in from southwestern Europe" he simply makes a gratuitous misrepresentation of my attitude, and for the protection of their friends and the public generally, I trust that his employers will insist hereafter that he either keep posted on current events or make some inquiry as to the facts before delivering himself of such wild and reckless comments, that are utterly without foundation in fact.

I welcome criticism of my views and actions as a representative of the people, because such criticisms are oftentimes helpful to public men, but there is a vast difference between criticism actuated by honorable motives and a desire to be truthful and fair and that which masquerades as criticism, but which is in reality bald misrepresentation. The one is commendable, the other contemptible. The one accomplishes good, the other is fraught with evil. The one is instructive to the people and is

welcomed by them, while the other is destructive of their best interests. Unfortunately, there is sometimes too much of the latter resorted to in the discussion of public men and measures, and particularly if there are political considerations involved. Such a disposition was manifested in the recent discussion of the immigration bill. I could cite instances where gentlemen, instead of submitting legitimate arguments, resorted to misrepresentation, abuse, and ridicule, which are the favorite weapons of those who can not sustain their position by argument. Sometimes they even sought to question the motives of those who disagreed with them, and went so far as to cast unwarranted reflections upon certain sections of the country whence those with whom they disagreed came.

An echo of this disposition is found in the reference of the Times editorial to "Bitter Creek," the writer evidently feeling that by the use of that term he was casting some opprobrium upon the section of country which I represent. And, Mr. Speaker, I could give other instances, if it were necessary, which illustrate the entirely erroneous estimate which people, because of their utter lack of knowledge of the truth, have of that rich and beautiful section of the country and of the noble, patriotic people who inhabit it. I do not feel called upon to defend them, because they do not need any defense, but I want to take advantage of this opportunity to say that we of the mountains have grown tired of the disposition of people in some other sections of the country to look upon ours as a missionary field, where opportunities for education and refinement are lacking and where ambition and stimulus for advancement do not exist. Locked up in its mountains are untold millions of wealth, now being rapidly developed, which will make it in the not distant future the greatest industrial section of the State. The country is dotted over with churches and schoolhouses and rare indeed is the case where opportunities for education and Christian teaching are not open wide to its people. And the people themselves are of that intrepid industrious stock who are God-fearing and law-abiding, and whose thoughts center in the welfare of their families and in devotion to State and Nation. They are mainly the descendants of those sturdy Saxon and Huguenot families who trekked across the Cumberland from Virginia, Tennessee, and North Carolina and settled there more than a hundred years ago, and who by their indomitable will and perseverance have changed it from the wilderness it was then to what it is to-day, one of the fairest and most prosperous sections of our great Commonwealth and soon to lead the vanguard of its progress.

And, Mr. Speaker, let me take occasion to say further that I resent the common practice of newspaper writers and novelists who after a brief visit to the mountains think they know all about them and their people, and drawing on their imaginations for most of their facts proceed to take up an isolated character which in their hurried trip they may have run across and whose counterpart can be found now and then in almost any section—even within the shadow of this Capitol—and proceed to feature that character as if a typical example of the average conditions existing there. To those of us who were born and reared there and who know all about the country and the people these performances would be extremely funny, not to say ridiculous, but for the injustice and harm they sometimes do.

In recent years thousands of former citizens of other States have established their homes and business in our midst. To those who are law-abiding, as most of them are, and who come with honest purpose to invest and live and thrive among us we have extended a cordial welcome. We have been glad to have that class of people come and stay, and there is room for still more like them. I want to repeat in this connection what I said in the House of Representatives more than six years ago:

> Far be it from me, Mr. Chairman, to raise my voice against the kind of immigration which helped and to-day is helping to make this country the wonder of the world. Let us welcome those who join us in the great work in which, under the providence of the Almighty, this Nation is engaged. Let all who will enter who earnestly prize the boon of American citizenship; whose labor, in whatever field, will make for the progress of our people and the greatness of our Republic. We have room here for many more millions of this kind. But let us put up the bars against the great hordes that come for what spoil they may find, and whose coming can but serve to make harder the lot and heavier the burden of the American workingman.

As I have already pointed out, the Times editorial seeks to leave the impression that I am complaining because what he terms the "Kentucky boycott" is keeping the immigration from southwestern Europe out of Kentucky. Fortunately, I am on record on that question. In discussing the subject of immigration in the House of Representatives on January 20, 1908 (see p. 1589 of the CONGRESSIONAL RECORD of that session) I used this language:

> We have not done enough as yet in the way of restricting immigration. Other measures must be devised to check this influx of undesirable people. Something more will have to be done to keep the pauper labor of other countries from invading this country. The Government has in its possession irrefutable proof that the invasion of the country by the hordes of unskilled and illiterate denizens of southern Europe is encouraged by their respective Governments, and in almost every instance the object of such classes is to accumulate all they can and return to their native land, but under no circumstances to acquire American citizenship.

Mr. Speaker, if the editor of the Times does not know it, he will find by examining the CONGRESSIONAL RECORD that I have voted in favor of restricting immigration every time this body has voted on it since I have been a Member of it. I voted for the Burnett bill in the last Congress, and I voted to pass it over President Taft's veto. I voted for the Burnett bill which recently passed the present House and which will shortly pass the Senate, according to present indications, and if President Wilson vetoes it, as current report has it that he will, I shall vote to pass it over his veto. I repeat that it must be conceded that the literacy test will work a hardship in some instances, but these will be nothing to compare with the hardships that will be spared our own people by its adoption. If there were a better test that would accomplish the desired result, so essential to the preservation of our standard of citizenship, I should be glad to vote for it as a substitute; but those who have made an exhaustive study of the whole situation say that none other is practicable, and I agree with them.

The SPEAKER. Is there objection to the consideration of this bill?

Mr. MANN. I reserve the right to object.

Mr. BRUMBAUGH. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

Mr. MANN. On this bill?

Mr. BRUMBAUGH. No; not on this bill.

Mr. MANN. I have no objection.

The SPEAKER. The gentleman from Ohio [Mr. BRUMBAUGH] asks unanimous consent to extend his remarks. Is there objection?

There was no objection.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. MANN. Reserving the right to object, Mr. Speaker, let us hear what the gentleman has to say to show why we should increase a building limit from $280,000 to $550,000.

Mr. BRYAN. It may be as an emergency.

Mr. MANN. It is not an emergency.

Mr. MADDEN. Has the Secretary of the Treasury or anybody connected with the financial end of this Government, or the Department of Commerce, made a report as to the necessity of this increase in the matter of expense?

Mr. CANTRILL. Mr. Speaker, I think I can answer that question, if I have a chance.

This report is brought into the House after a personal investigation by almost the entire Committee on Public Buildings and Grounds. The committee went over to Baltimore and looked into the situation, and I think the committee is unanimous in the opinion that the conditions of affairs existing at Baltimore in the immigration station are a national disgrace, and should be speedily remedied.

The conditions existing in the hospital there are almost unspeakable. To require people coming into this country to be quartered as the immigrants are quartered at Baltimore when they arrive there sick is absolutely inhuman, and should no longer be tolerated in a civilized country like this.

Mr. MADDEN. Will the gentleman yield for a question?

Mr. CANTRILL. Yes.

Mr. MADDEN. How much of the $280,000 has been expended?

Mr. CANTRILL. As I understand it, practically none of it; because it seems that the authorization made in the last bill was not nearly sufficient for this project.

Mr. MADDEN. Were the committee of the opinion that $280,000 would not be adequate for the work?

Mr. CANTRILL. The committee are of the opinion that that amount is not sufficient. The Supervising Architect accompanied the committee to Baltimore upon this trip, of which I spoke a while ago, and looked over the ground. Upon his advice, his suggestions, and his plans, the committee have brought in this report, without any diversity of opinion, so far as the committee are concerned.

I wish to say further to the House that the immigration station at Baltimore now is practically a monopoly of the Baltimore & Ohio Railroad. The immigration pier there is controlled by the Baltimore & Ohio Railroad. No immigrant ship, no ship bearing immigrants, can land at that station without the consent of the Baltimore & Ohio Railroad, and no railroad can get in to that pier to reload these immigrants and distribute them out over the country except to trains of the Baltimore & Ohio

Railroad. It is a Baltimore & Ohio monopoly, and it is the purpose of the Committee on Public Buildings and Grounds not only to provide suitable quarters for immigrants who come to this country, in order that they may have some fair conception on arrival of the country to which they are coming, but to break up this monopoly of the Baltimore & Ohio Railroad.

The station proposed in this bill is to be built upon Government ground. It is to be built upon a site on a portion of old Fort McHenry. A railroad is now being constructed by the city of Baltimore, and I have on file letters from the mayor of Baltimore in which it is stated that this urban railroad will have access to this station that we propose to build, so that every railroad going into Baltimore shall have the use of this urban road to put its trains into the immigration station.

Mr. MADDEN. Is Fort McHenry the ground that we turned over to the city of Baltimore for a public park the other day?

Mr. CANTRILL. I understand some action has been taken along that line. The gentleman from Maryland [Mr. LINTHICUM] can answer that.

Mr. MADDEN. In view of the fact that we turned it over to the city of Baltimore for use as a public park, is it proposed now to take it away from public-park purposes and use it for other purposes?

Mr. CANTRILL. Only a very small portion of it, where this station is to be constructed, down on the bank, where a pier is to go out to the channel.

Mr. MADDEN. Is it proposed by the city of Baltimore to make a charge to the various railroads using this connecting link to the immigration building?

Mr. CANTRILL. I can not answer that. Of course, if a charge is made, it will apply to all railroads alike, whereas now it is absolutely a Baltimore & Ohio monopoly.

But I want to say to the House that, laying aside these financial considerations, every Member on this floor will agree with me that the present condition of affairs ought not to continue to exist. And if Members would go over there and look at this location I am sure no one would hesitate to make this appropriation for this immigration station.

Mr. STAFFORD. Can the gentleman inform the committee what site and what proposal the Committee on the Public Buildings and Grounds had in mind when they reported to this House a little over a year ago, in the public-building bill, an appropriation of $280,000 for this purpose?

Mr. CANTRILL. The gentleman from Baltimore [Mr. LINTHICUM] is familiar with that situation, and I will ask him to answer that.

Mr. LINTHICUM. After the gentleman from Kentucky completes his remarks.

Mr. STAFFORD. I will await the statement of the gentleman from Maryland [Mr. LINTHICUM], but I will make this suggestion to the gentleman from Kentucky: Several bills have been reported by the Committee on Public Buildings and Grounds in which there is an absence of any recommendation from the head of the department in the report. I do not find in this report any recommendation whatsoever from the Supervising Architect of the Treasury or any other departmental head.

Mr. CANTRILL. I will state that the report should have covered that, so far as this particular bill is concerned. I will say to the gentleman from Wisconsin that the Commissioner of Immigration is heartily in favor of the construction of this station. The commissioner at Baltimore, Mr. Stumph, accompanied us on our trip over there, pointed out many of these troubles which I have mentioned, and there is absolutely no doubt that the department heads are heartily in favor of the construction of this station.

Mr. MANN. Will the gentleman yield?

Mr. CANTRILL. Yes.

Mr. MANN. Does not the gentleman think the Members of the House have the right to have the departmental heads and the various Secretaries go on record on matters of this sort?

Mr. AUSTIN. They did go on record in this case and in the other cases mentioned.

Mr. MANN. We have a right to have their recommendations included in the report.

Mr. AUSTIN. It seems that they were omitted from this report.

Mr. MANN. We ought to have them. The committee ought to present them so that they can go into the RECORD in connection with this debate.

Mr. AUSTIN. I fully agree with the gentleman on that proposition.

Mr. MANN. I have known instances where the head of a department orally recommended some legislation, and then afterwards severely criticized Congress for enacting it. He probably forgot what his position was upon the point. It seems to me in all matters of this sort we ought to have in the record somewhere a statement from the head of the department.

Mr. AUSTIN. Those statements are in the custody of the Committee on Public Buildings and Grounds, and should have been included in the report. Why they were omitted I do not understand.

Mr. MANN. These bills are all referred to the Secretary of the Treasury for a report, are they not?

Mr. AUSTIN. Certainly; and the report of the Secretary of the Treasury is returned with each one.

Mr. MANN. The committee does not ordinarily act on them until it gets the report?

Mr. AUSTIN. Never. Every bill referred to the Committee on Public Buildings and Grounds is referred to the Treasury Department for a report. In this case there was a report from that department, and in the hearings a representative of the department appeared before the committee favoring the legislation.

Mr. MADDEN. Has the Secretary of the Treasury made an estimate upon which such an appropriation can be based?

Mr. AUSTIN. He has made such an estimate, and that is the reason there is a change in the figures. They have decided there is a necessity for a hospital building at Baltimore, whereas the original program did not provide for anything except an administration office and a detention building.

Mr. MADDEN. There is no such estimate or recommendation embodied in the report.

Mr. AUSTIN. Yes; on the second page of the report in the printed hearings and in the letters on file in the committee room, which should have been embraced in the report.

Mr. MADDEN. It is against the rules of the House to make appropriations without estimates being made for them by the Secretary of the Treasury.

Mr. AUSTIN. I will say to the gentleman that there is an estimate in this case and in every other case reported from the Committee on Public Buildings and Grounds. Through the neglect of some one they do not appear in the report that accompanies the bill now under consideration and other similar bills on the Unanimous Consent Calendar.

Mr. STAFFORD. Will the gentleman yield?

Mr. AUSTIN. Yes.

Mr. STAFFORD. I understood the gentleman to state that one reason for increasing the amount recommended by the committee last year was the necessity of erecting a hospital building. In the estimates printed on page 2 it is stated to be $110,000; but I notice in the last paragraph of the report it approves the plan and suggests that the hospital conditions sufficient to meet all requirements can be acquired for less than the amount stated by the Supervising Architect, and thereupon you cut down the total appropriation $50,000. It follows from a reasonable inference that you will cut down the allowance for the hospital building from $110,000 to $60,000. That only accounts for $60,000 out of the $270,000 increase.

Mr. AUSTIN. The original proposition carried with it the idea that 1,000 or 1,200 immigrants arrive per day at the Baltimore station. On investigation it was found that they unloaded as high sometimes as 3,000 immigrants a day. Under the rule requiring the examination of the entire shipload of immigrants in one day it was found necessary to enlarge the building. In addition to the cost of the immigration station, there was a necessity for the enlargement of the detention building and other buildings on account of the increase in the number of immigrats received at that port.

Mr. STAFFORD. The gentleman says there have been instances where they have brought in 2,000 immigrants a day.

Mr. AUSTIN. Three thousand.

Mr. STAFFORD. But it appears that there are only 23,596 arrivals in the entire year. The occasions must have been very rare when the ships brought in 3,000.

Mr. AUSTIN. It is not a question of the number delivered at a port during 12 months. In fixing the size of the immigration station the maximum must be the total discharge in a single day, and that total, according to the hearings on page 13, quoting from the local immigrant agent at Baltimore, is that at the port of Baltimore as many as 3,000 immigrants have been landed in one day.

Mr. STAFFORD. The gentleman is aware that there is every prospect that the immigration bill passed by the House will be reported in the Senate this week and passed with the restrictive literacy clause in it. Is not the gentleman proceeding on the theory that there will be unlimited immigration as in the past? If the bill should become a law with the literacy test in it, does the gentleman think there will be any instance where Baltimore will have 3,000 immigrants landed in one day, or 2,000 or 1,000?

Mr. AUSTIN. I think so, because we see in the public papers that President Wilson will veto the immigration bill.

Mr. GARDNER. Mr. Speaker, who has the floor?

The SPEAKER. The gentleman from Tennessee [Mr. AUSTIN].

Mr. GARDNER. I thought the gentleman from Kentucky [Mr. CANTRILL] asked unanimous consent for the consideration of this bill?

The SPEAKER. He did; but somebody reserved an objection, and the discussion has been going on since.

Mr. GARDNER. I am waiting for the gentleman from Kentucky to yield to me.

Mr. AUSTIN. I will yield to the gentleman from Massachusetts in a moment.

Mr. GARDNER. The gentleman can not yield to me.

Mr. AUSTIN. I can if the Speaker says I am entitled to the floor; and I have it.

Mr. GARDNER. But the gentleman can not yield the floor to me.

Mr. AUSTIN. Then I will give it up. Now, Mr. Speaker, on page 13 of the hearings before the Committee on Public Buildings and Grounds the Supervising Architect, Mr. Wenderoth, made this statement:

Mr. WENDEROTH. Yes, sir. The first intention was to build a detention house for the accommodation of immigrants overnight. It would include a few rooms for the sick, but would not be a complete hospital. It would also include administration offices. When the last public bill was in the course of preparation, Mr. LINTHICUM asked the Supervising Architect if it would be possible to use a part of the Fort McHenry Reservation as a site and asked for a revised estimate. We continued to estimate on the previous basis—that is, to assume that the examination work would remain at the pier—and we merely estimated for the detention house with administrative offices. That was our mistake. The whole scheme, as then contemplated, was a mistake. The plan of Mr. Stump, the resident commissioner, was not to have a portion of the layout at Fort McHenry and the receiving station at the pier over a quarter of a mile away. As I say, we continued to estimate on the previous basis, except that we found it necessary to figure for a larger detention house. On taking up the sketches recently we visited Baltimore and made a personal inspection of the situation. Mr. Stump also made an inspection of the various immigration stations at Boston, New York, and Philadelphia. With Mr. Stump's assistance we laid out a scheme for an immigration station at Baltimore which embodies the experience of this Government in immigration work since the starting of the Ellis Island station. This scheme consists of an administration building; an examination and receiving building, with the necessary detention rooms; a hospital; power house and landing pier. Taking Mr. Stump's data, we found that it would require a layout, the cost of which, with the necessary filling and grading of the approaches, would come up to about $600,000.

Mr. AUSTIN. Including the pier?

Mr. WENDEROTH. Yes, sir; it also includes the original site and a right of way. The net amount, therefore, would be $600,000 less $33,250, or $566,750. The size of an immigration station is not determined by the total number of immigrants that are landed in one year, but by the total number that may be landed in one day. The policy of the Immigration Service is to put through in 24 hours all the immigrants who arrive in one vessel, or who are landed during 24 hours. Therefore it is the individual landing that fixes the size of the station rather than the total number of immigrants that are landed a year. If the port receives, or lands, at one time, say, 2,000 immigrants, the station must be larger if there is but one landing a week than the station which lands 1,000 immigrants twice a week. The immigration port at Baltimore, Mr. Stump informs me, has landed as many as 3,000 immigrants in one day. Of course, if they had a landing every day as large as that it would bring the yearly total up to that of the Ellis Island station, or 900,000 immigrants. At the present Baltimore has three landings a week, I believe.

Mr. LINTHICUM. Sometimes two and sometimes three.

Mr. WENDEROTH. The first of the schemes we laid out recently was on the basis of a maximum capacity of 1,200 immigrants at one landing. That is rather small. It does not allow sufficiently for the normal increase in arrivals at the port. We feel that the receiving and examination building should be large enough to handle in 24 hours from 1,800 to 2,000 immigrants. That, of course, means a certain relative size for the hospital building, the detention quarters, and the other accommodations.

Mr. GARDNER. Mr. Speaker, I would like to ask the gentleman from Kentucky some questions. How long has there been an immigration station at Baltimore?

Mr. CANTRILL. I can not answer the gentleman.

Mr. GARDNER. Since about 1906?

Mr. COADY. There is no immigration station there now controlled by the Government.

Mr. GARDNER. There is no public building there, of course. Can the gentleman tell me how many immigrants come into Boston?

Mr. CANTRILL. I do not know.

Mr. GARDNER. Can the gentleman tell me the value of the plant in Boston?

Mr. CANTRILL. I can not.

Mr. GARDNER. Has the gentleman ever been there?

Mr. CANTRILL. I want to say to the gentleman that I do not profess to be a walking encyclopedia of these immigration facts.

Mr. GARDNER. No; but the gentleman reported the bill.

Mr. LINTHICUM. What was the question the gentleman wanted to have answered?

Mr. GARDNER. "Mr. CANTRILL, from the Committee on Public Buildings and Grounds, submits the following report," and so forth.

Mr. LINTHICUM. Mr. Speaker, I would like to answer the gentleman's question.

Mr. GARDNER. Very well. When was the immigration station founded in Baltimore?

Mr. LINTHICUM. I do not remember exactly how many years ago; but Mr. John W. Garrett, of the Baltimore & Ohio Railroad, began the service there, I suppose, some 25 years ago.

Mr. GARDNER. Does the gentleman know how many immigrants come into Boston in a year?

Mr. LINTHICUM. Yes; I have it right here. I will give it to the gentleman in a moment.

Mr. GARDNER. I say Boston, not Baltimore.

Mr. LINTHICUM. Sixty-six thousand three hundred and eighty-nine came in last year.

Mr. GARDNER. And does the gentleman suppose that the whole plant at Boston is worth $100,000—the whole immigrant station?

Mr. LINTHICUM. No; I think not, but I think there has been about $375,000 appropriated for it there, and they will need about $75,000 more.

Mr. GARDNER. Mr. Speaker, here are the facts. Ever since they began to have a little immigration trickling into Baltimore there has been one continuous appeal for legislation.

Mr. MANN. Mr. Speaker, will the gentleman yield for a question?

Mr. GARDNER. Yes.

Mr. MANN. Can the gentleman recall how many bills we have had in reference to the Baltimore immigration station, and have passed within the last three or four years?

Mr. GARDNER. I can not remember, because the jurisdiction has changed from the Committee on Immigration to the Committee on Public Buildings and Grounds.

Mr. COADY. Does the gentleman know what position Baltimore occupies respecting the number of immigrants that come there?

Mr. GARDNER. Yes.

Mr. COADY. Is it not about fourth or fifth?

Mr. GARDNER. About half the number land in Baltimore that land in Boston, and Boston is second. New York has about 1,000,000 and Boston 75,000 and Baltimore about 35,000.

Mr. COADY. Is not our position about fourth on the list?

Mr. GARDNER. Third, I think.

Mr. MOORE. No; Philadelphia is third.

Mr. MANN. What did the immigration station cost at Philadelphia?

Mr. MOORE. Originally $250,000 plus $105,000 which we obtained subsequently, or $355,000 in all; and now we want $15,000 more, which we can not get at this time. But I do not urge this if Baltimore needs it.

Mr. LINTHICUM. I would like to ask the gentleman from Pennsylvania a question. The gentleman says that Philadelphia is asking for $15,000 more?

Mr. MOORE. Yes.

Mr. LINTHICUM. That is to complete the inspection building?

Mr. MOORE. Yes.

Mr. LINTHICUM. But that does not give a hospital or hospital facilities of any kind?

Mr. MOORE. No. We have a detention house and a main administration building.

Mr. LINTHICUM. That does not include any hospital?

Mr. MOORE. No.

Mr. LINTHICUM. I merely want to suggest to the gentleman, so that the committee will have the full information, that the appropriations made two years ago did not include any hospital facilities, nor did they put up there a new administration building, as we are compelled to do in Baltimore. They used an old residence which was transformed into an administration building at a cost of about $20,000, so if they can get the additional $15,000 it will make about $370,000, and then they will not have hospital facilities and will not have a complete plant.

Mr. MOORE. I want the gentleman to clearly understand that I do not in any way want to set up any competition as between the stations in Philadelphia and Baltimore. Baltimore badly needs a station. There is no question about that. The original appropriation of $250,000 in Philadelphia was made to cover buildings and grounds. We could not get through with $250,000 and subsequently there was an appropriation of $105,000 to cover what we have to-day. That is to say, we bought grounds with a building on it, which building has been turned into an administration building, and we have since erected with

the additional money a detention house, but we need this little house out on the pier, which will cost $15,000.

Mr. GARDNER. This Baltimore immigration station question has been going on for some years. The Immigration Committee used to consider bills of this sort. Finally the Public Buildings and Grounds Committee took jurisdiction. Our committee was perfectly willing, because Mr. BURNETT, the chairman of the Committee on Immigration, was also acting chairman of the Committee on Public Buildings and Grounds. He looked into the matter very carefully; he looked into it from his knowledge of the immigration situation; and he decided that $280,000 was sufficient.

Mr. CANTRILL. Mr. Speaker, will the gentleman yield?

Mr. GARDNER. I ask the gentleman to wait until I get through with my statement. Here is what is bound to happen in the Baltimore immigration station: Officials are busy three days a week and for three days a week they have little to do. For pretty nearly half the year work is mighty slack down there in Baltimore. That, at all events, is my recollection of the situation down there. I do not say that they do not now and then have an enormous crowd come in there.

The fact that the present immigrant station is on the Baltimore & Ohio tracks has nothing whatever to do with the question. Either the immigrant's destination is Baltimore or else he comes with a through ticket to his destination, wherever it may be. It happened that originally the station was placed on Baltimore & Ohio land. Now, obviously, they ought to have new buildings; but $280,000 for buildings to take care of an immigration of only 33,000 a year is amply sufficient. I think that it is more in proportion than Boston has ever had and more in proportion than Philadelphia has ever had. What excuse does the committee give for this increase to $550,000? Because there is need for a hospital, they say. But a hospital will not cost $270,000, Mr. Speaker. The committee only allows $60,000 for the hospital, anyway. The Government architect's estimate for the hospital was $110,000. The committee thinks that it can be built cheaper than the estimate. They have cut down the gross appropriation by $50,000, because, as they tell us, the hospital can be built for less money. That leaves $60,000 as the estimate for the hospital. Yet they come before Congress asking for an increase of $270,000, just about double the amount which last year we decided to be sufficient. Think of spending $550,000 for buildings to take care of a trifle of 33,000 immigrants per year.

Mr. CANTRILL. Mr. Speaker, in reply to the gentleman from Massachusetts [Mr. GARDNER] I desire to say this amount of $550,000 is reported upon the recommendation of Mr. BURNETT, who is the ranking member of the Committee on Public Buildings and Grounds and chairman of the Committee on Immigration. In the last discussion before the committee, after the committee had in person inspected this station at Baltimore and found the condition of affairs there inhuman and a disgrace to this country, when we came back and discussed it in committee Mr. BURNETT stated to the committee that he thought $550,000 should be recommended for the construction of this station. I want to say to the gentleman from Massachusetts and the gentleman from Pennsylvania that, so far as I am concerned as a member of the Committee on Public Buildings and Grounds, if evils exist in your city similar to the conditions we saw at Baltimore, there will be no trouble whatever in securing my recommendation and support to get an increased appropriation for your city, because I believe that those people, strangers and foreigners, coming into this country, that it is important that their first conception of our country should be favorable. We stood there and saw a ship unload, and I want to say to this House that it was a high class of citizenship that came in a few weeks ago that are deserving of the protection of this Nation; at least they are human beings and are entitled to be treated better than we treat our horses and cattle on the farms, which treatment they do not secure under present conditions. Now, gentlemen, read this report, and I am frank to admit that this report is not as full as it should be, but I do say this as a Member of this House that I would rather have the recommendation of Members of Congress who as Members have gone in their official capacity to look over this proposition—I would rather have their recommendation upon which to base my vote for legislation than the report that can be secured through a department that has this matter in charge.

Mr. GARDNER. Will the gentleman yield?

Mr. CANTRILL. I will.

Mr. GARDNER. Would the gentleman set his opinion up as to the cost of improvements against that of the Supervising Architect's Office?

Mr. CANTRILL. The statement has already been made upon the floor that the Supervising Architect accompanied the committee upon this tour of inspection, and in a report he calls for $600,000, which is all set out in an itemized report. We desired to have the Commissioner of Immigration go over there with us, but when we got there we received a telegram from Commissioner General Caminetti saying that he was in favor of the proposition, but he could not attend on account of other business. I am frank to admit the gentleman from Illinois is correct in saying that these facts ought to be set out in the report, but as a Member of this House I would pay more attention to recommendations by the Members of this House when they go in person to look over a proposition and come back and report as to what the facts are than to any report that may be made by a chief clerk or the head of a department down here. [Applause.] Now, gentlemen, read this report here. It is a question of humanity; it is not a question of dollars and cents entirely:

> The present facilities are totally inadequate, a reproach to the Government, and offer no basis for comparison.

I see upon the floor of this House gentlemen who investigated this proposition—the gentleman from California, the gentleman from Nebraska, the gentleman from Kentucky, and other gentlemen who went over there and who know that this condition of affairs is a disgrace to this country.

As a result, during 1913 the contagious hospital connected with the present station treated 294 cases of measles, of which number there were 47 deaths. There were 47 deaths in that hospital out of 294 cases. Treated under proper conditions, treated under the conditions that would exist in your home and mine, and in the homes of the people of this country, the deaths would have amounted to practically nothing, and yet 47 out of 294 people died there in the year 1913 from the disease of measles alone. And with a condition of affairs like that existing, should we stand here and haggle about the expenditure of a few thousand, or a few hundred thousand, dollars to make this receiving station in accordance with the dignity of this Government, and to give these people, these high-class immigrants who come through this station to help us build and develop the country, a favorable impression of the country? Of course the gentleman from Massachusetts has the right to object, and I am not complaining about that, but I want to say to him that if he has conditions that need remedying, or these other gentlemen who have immigration stations in their districts have such conditions, let us bring them up to the point where they will be remedied. That is what the Committee on Public Buildings and Grounds is trying to do in this district and in other places of the country. As the gentleman from Illinois [Mr. BUCHANAN] said the other day, in connection with this subject, the people in this district are working in buildings that are inhuman, unfair, and unjust, and it is the purpose of the Committee on Public Buildings and Grounds, as fast as we can, to build great department buildings in order to take these people out of their cramped and unhealthy quarters, where they are subject to loss of life by fire, to health conditions that are unfair and unjust to any American citizen; and it is the purpose of our committee to remedy these conditions as far as possible. And I want to say to the gentleman that I would be glad to cooperate with him to remedy conditions in his city if there are conditions similar to those which exist at Baltimore.

Mr. GARDNER. Mr. Speaker, the gentleman argues as if the only question at issue was whether we are to leave conditions as they are now in Baltimore or go to this enormous expense. That is not the proposition at all. We have already appropriated an adequate sum of money to remedy the situation in Baltimore. We gave $280,000 to take care of that little stream of immigration which comes trickling into that port. Two hundred and eighty thousand dollars is more in proportion than is given to the great ports of Philadelphia and Boston to take care of their immigrants. Oh, conditions may be bad, gentlemen. They may be very bad when a man has only one meal a day. That may be reason for giving him two more meals a day, but when you have given him three meals a day that is no reason for giving him six. We have appropriated very handsomely to take care of that trivial immigration of 33,000 that comes into Baltimore every year, with half of the year none coming in at all to speak of. Three days a week the inspectors will sit in the administrative building and twiddle their thumbs and contemplate this magnificent building. For $280,000 we can give them leather-armed chairs and as handsome a building as you would wish to see. I admit that the accommodations for immigrants in Baltimore is insufficient. We have appropriated liberally to cure that condition. To say that for the trivial immigration which enters that port this Government must spend the gigantic

sum of $550,000 is like offering a bareheaded man two hats at the same time to keep his head warm.

Mr. LINTHICUM. Mr. Speaker——

Mr. MANN. Reserving the right to object——

Mr. LINTHICUM. I will yield to the gentleman.

Mr. MANN. No; I will yield to the gentleman from Maryland, if he wants to explain this matter.

Mr. LINTHICUM. I want to say in reference to this bill that I took this matter up with the Secretary of Labor and told him of the deplorable condition at the Baltimore immigration station. He took the matter up with the Secretary of the Treasury, and then the Secretary of the Treasury directed the Supervising Architect to take action in this matter.

I then went before the Supervising Architect and asked him to prepare drawings for these buildings, and he went to Baltimore and looked the situation over. He came back and said that he could not prepare drawings for the necessary buildings in Baltimore for any such sum as $280,000. I then asked him to figure on the very lowest he could build the immigration station for, and he sent in this estimate, which it took him some little time to prepare. It has been prepared with great care, and it sets forth that it will take $600,000 to build that immigration station complete. And let me say in this connection that there is not an immigration station on the Atlantic seaboard that is complete. The one at Philadelphia is not complete, the one at Boston is not complete, nor is the one at New York complete, although they have spent a great deal of money. This will be the first immigration station that will be built within the appropriation and complete. Every time they have had to come back and ask for more money.

Mr. MADDEN. Will the gentleman yield? I want to ask the gentleman how he knows this station will be built within the appropriation?

Mr. LINTHICUM. Because the Supervising Architect assures me that he proposes to make the drawings, and no contracts will be given out except they are within the appropriation.

Mr. MADDEN. They do that every day, and yet they exceed the appropriations.

Mr. LINTHICUM. I can only say what the Supervising Architect tells me. I am not an architect, of course. Now, the gentleman from Illinois asked if we knew how many bills had been introduced. Yes; there have been three bills. The first bill was $130,000. They went to Baltimore without consulting the immigration commissioner there at all, or his assistant, who is now immigration commissioner, and they bought a lot adjoining a fertilizer factory, a lumber mill, and a railroad switch, and they proposed to put a detention hospital for these immigrants there. The matter was taken up with the architect, and he said that he had no idea that we had not other accommodations there. He had thought we had everything else we needed except a detention station. And then we took the matter up, and it was referred to Mr. Taylor, the Supervising Architect, who told us what it would require to build a proper immigration station. And he seemed to have gone on the old basis that all we wanted was a detention house and heating plant, and for that he estimated $280,000. Then we had the present architect go there and look over the ground and get down to the making of the drawings, which seems to be the test in these matters. Merely telling you what it will cost does not seem to amount to anything. When they get down to make the drawings they are compelled to come up to the captain's office and tell you what it will actually cost.

Mr. MADDEN. Will the gentleman yield for another question?

Mr. LINTHICUM. Yes.

Mr. MADDEN. What has become of this lot that the gentleman described?

Mr. LINTHICUM. I am glad the gentleman called my attention to that. That lot is to be sold, and the amount—$13,250—covered into the Treasury. That is taken out of this appropriation. Therefore this appropriation is lessened by just that amount.

Mr. MANN. As I recall it, the original authorization was $130,000 for the site and the building.

Mr. LINTHICUM. That is right.

Mr. MANN. While they spent a small amount of money to purchase a site, we, since then, have presented to the Immigration Service a fine site without expense to them. The Government has done that.

Mr. LINTHICUM. Except for the right of way out through some private land, which will cost not to exceed $20,000.

Mr. MANN. We have given them a fine site.

Mr. LINTHICUM. I think it is an admirable site.

Mr. MANN. Does not the gentleman think it was rather a mistake to give them such a fine site, so they would then want to construct a monumental building there, and have an administration building to cost $50,000, a hospital to cost $110,000, and a detention building to cost $275,000, in order to comport with the surrounding park?

Mr. LINTHICUM. I would like to say to the gentleman that there is nothing at all monumental or ornamental about these buildings. They are to be built of brick, concrete, and steel. You can not put up a monumental building for any such sum of money. The gentleman from Illinois knows that.

Mr. MANN. Quite the contrary. I should say, for the administration work they have over there it is entirely useless to have an administration building that will cost $50,000; but then I do not set up to be an expert.

Mr. LINTHICUM. You can not construct a very fine building for $50,000; not a building of any size.

Mr. MANN. You can construct a much finer one than I can afford.

Mr. LINTHICUM. The object is to have a complete immigration station that will take care of immigrants for years to come.

Mr. MADDEN. Will the gentleman yield to me for one more question?

Mr. LINTHICUM. Yes.

Mr. MADDEN. How many men are to be employed in the administration building?

Mr. LINTHICUM. I do not know how many men.

Mr. MADDEN. How many have they in the immigration service in Baltimore?

Mr. LINTHICUM. I do not know. I presume they have a great many when the immigrants are coming in, and when they are not coming in I do not suppose they have so many.

Mr. MADDEN. What would be the maximum number of men employed there?

Mr. LINTHICUM. Not knowing, I would not like to say. It would be merely guesswork on my part.

Mr. MADDEN. You can put up a building about four stories high, 150 feet long, and 50 feet wide, of the best kind of construction, for about $35,000 to $40,000; and if they have not a very large number of men there, I submit that an administration building of that size would be totally too large for the work that is to be done there.

Mr. LINTHICUM. It seems to me that the gentleman must be wrong in his estimate as to the cost of the building.

Mr. MADDEN. I am a builder, and I have built a great many buildings.

Mr. LINTHICUM. I have had some experience in the building line myself.

Mr. MADDEN. It seems to me, if there are not more than 25 men—and it looks to me as if 25 men would be a large number of men to have employed regularly at this station—a building to accommodate 25 men for office work could be erected for $10,000, and it would be all the building that ought to be constructed and as monumental as it ought to be.

Mr. COADY. The cost of construction there is much greater than at the places the gentleman has in mind, for the reason that it is right on the water front, and no doubt a lot of piling will have to be done.

Mr. LINTHICUM. I do not know what you can construct for $10,000, but I do know that the rough brick building here—not so very large, either—would cost $10,000, and that about as ordinary as anything can be. I am the chairman of a commission that is putting up a school building in Maryland, and that building, 300 feet long and 150 feet wide, will cost $400,000. I think the architect ought to decide the matter of cost. It is merely guesswork on our part.

Mr. MADDEN. The whole question to be decided in my mind is whether you have a sufficient number of men to be housed in an office to justify a large expenditure of money for the construction of an office. That is the whole story.

Mr. LINTHICUM. The architect went into this very thoroughly, and he thinks he is right.

Mr. MADDEN. Somebody ought to know how many men you have employed in this service over there.

Mr. LINTHICUM. Probably we ought to know, but we do not.

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, I should like to make at least an observation or two.

When the Baltimore immigration station was authorized a few years ago, they subsequently came before Congress and asked for an appropriation for the building for the station, and after working themselves up to fever heat they arrived at the

idea that they could ask for as much as $130,000 for the site and the building, and that was granted. Well, Baltimore is so near, and the terrapin and the canvasback duck are so good—I have been over to Baltimore with some of these gentlemen and I know what you get when you go there—that in course of time they got to the point where they concluded they could ask for an increase from $130,000 to $280,000, and that was not hard to get. It got into a public building bill and it went through without any difficulty. And yet gentlemen saw that the limit was not reached.

Mr. MADDEN. The terrapin was better.

Mr. MANN. The terrapin was still good, and the canvasback duck was still good. So they reached the conclusion that they might get $600,000. First, there was an increase from $130,000 to $280,000—something more than double—and they thought they could double it again, and now they ask an increase from $280,000 to $600,000. I congratulate the Committee on Public Buildings and Grounds on the fact that, after going over to Baltimore and viewing the surroundings and taking dinner and luncheon at the club, they were able in an economical streak to insist upon cutting the amount down from $600,000 to $550,000, which only makes it an increase from $280,000 to $550,000—a little less than twice as much.

Mr. COADY. Mr. Speaker, will the gentleman yield for an observation?

Mr. MANN. Certainly.

Mr. COADY. I just want to say to the gentleman that the bill of fare did not contain any terrapin or canvasback duck.

Mr. MANN. Then the Committee on Public Buildings and Grounds will have a great grievance against the gentleman who took them over there.

Mr. COADY. According to the gentleman we might have got a million dollars if we had done that.

Mr. MANN. They would have a grievance if, when these Baltimore gentlemen take their friends over to Baltimore, they do not give them the best that Baltimore possesses. I have been on some of these trips. The Government lost a lighthouse station once by taking me over there. [Laughter.]

Mr. MADDEN. Mr. Speaker, will my colleague yield to me for a question?

Mr. MANN. Certainly.

Mr. MADDEN. Does not my colleague think, in view of the fact that this amount has increased all the way up from $130,000 to $280,000 and up to $550,000, that if the bill were allowed to rest for a few months we would get it up to a million dollars? It might be wise to let it rest, so that when the building is constructed you will in the end have a monumental building. [Laughter.]

Mr. MANN. If we could pass the bill and put in an appropriation that was irrepealable, a provision requiring that this appropriation should stand, the quicker we do it at $650,000 or $750,000 the better we would be off. But whenever we pass one of these bills the canvasback duck and the terrapin will remain, and that, you know, will in a short time double the amount. My complaint is not that my friends interested in this legislation went over to Baltimore to view the sights, but that the rest of us were not invited. [Laughter.]

Mr. LINTHICUM. Mr. Speaker, I would like to call the attention of the gentleman from Illinois to something here in this report. The gentleman should notice that all of this money does not go into buildings.

Mr. MANN. Which report is the gentleman reading from—the one which he filed or the one that the gentleman from Kentucky [Mr. CANTRILL] filed?

Mr. LINTHICUM. It is hardly fair for the gentleman to say that about a matter of misprint.

Mr. MANN. Here, I came into the House with a report upon this bill, filed by the gentleman from Maryland [Mr. LINTHICUM], and find after we get into the House and the bill is under consideration that the gentleman from Maryland did not file a report at all, although the RECORD indicates that he did.

Mr. LINTHICUM. I can not help it if I am so popular with the Public Printer that he attaches my name to a report when I did not make it.

Mr. MANN. I do not think the gentleman was fair to call it up before the House without explaining about it.

Mr. MADDEN. I understood the gentleman from Baltimore to say some time ago that the city of Baltimore was going to build this industrial railroad.

Mr. LINTHICUM. Yes. We are to build a belt-line railroad.

Mr. MADDEN. Now, I understand the road is to be built by the Government of the United States.

Mr. LINTHICUM. The gentleman is now talking about the belt line, not this industrial railway.

Mr. MADDEN. What is this?

Mr. LINTHICUM. This is a little railway to bring baggage, and so forth, from the pier to the station.

Mr. MADDEN. Then, the United States Government is going to enter upon the building of another railroad. Not satisfied with the railroad in Alaska, it is going to build a railroad in Baltimore.

Mr. LINTHICUM. One hundred and sixty-five thousand dollars of this appropriation does not go into the buildings at all.

Mr. GORDON. Where does it go?

Mr. CLARK of Florida. Mr. Speaker, I would like to say a word about this matter.

Mr. MADDEN. I would like to ask the gentleman where this $165,000 goes? Will the gentleman from Florida be kind enough to tell me where this $165,000 goes that the gentleman from Maryland refers to?

Mr. CLARK of Florida. I will, if the gentleman will contain his soul in patience.

Mr. MADDEN. I have not anything else but patience. That is the cheapest thing around there. [Laughter.]

Mr. CLARK of Florida. One hundred and sixty-five thousand dollars, not $75,000, of this money does not go into buildings at all. It goes into incidentals that must be built if this immigration station is to be worth anything at all. Now, I will call the gentleman's attention to those items.

Mr. MANN. Will the gentleman yield there for a question?

Mr. CLARK of Florida. Yes.

Mr. MANN. When we changed the site, was it not stated on the floor of the House that the new site would not be any more expensive to the Government than the old site?

Mr. CLARK of Florida. I do not remember about that. If the gentleman says so, I will accept that statement as true.

Mr. MANN. Here is $165,000 suggested——

Mr. PAYNE. You might have called that up several weeks ago.

Mr. CLARK of Florida. Mr. Speaker, who has the floor? These gentlemen are going on with their conversation while I am attempting to speak. Here are the items: Limit for right of way, $20,000; site, $13,250; dredging and incidentals, $10,000; approach work and conduits, $25,000; wood sidewalk shelter, $4,250; industry railway, $2,500; steel and concrete pier, $50,000; power house, $40,000; making a total of $165,000. In addition to that the committee struck $50,000 from the estimate of the Supervising Architect.

Now, Mr. Speaker, I want to say that anyone sitting in the gallery and not conversant with affairs on this floor might think that we had an aggregation of builders and supervising architects here. The Government has provided at some considerable expense an institution known as the Supervising Architect's Office of the Treasury Department.

Mr. MADDEN. Mr. Speaker, will the gentleman yield there for a question?

Mr. CLARK of Florida. Not just now. That outfit has been charged with the duty of rendering estimates to Congress for buildings of various character. Now, Mr. Speaker, that is quite an expensive establishment. If committees can not put any confidence at all in the estimates of this bureau, or if Congress can not repose any confidence at all in the estimates of this bureau, we ought to abolish it.

We ought to do something with it, and we ought not to be paying out the hundreds of thousands of dollars a year that it takes to maintain the Supervising Architect's establishment.

Mr. MADDEN. Will the gentleman yield?

Mr. CLARK of Florida. Certainly.

Mr. MADDEN. The gentleman would not preclude the membership of the House from questioning the recommendations?

Mr. CLARK of Florida. Not at all; but I would like to ask this question: Does the gentleman believe that a hospital building suitable for the purposes over there can be built for less than $110,000?

Mr. MADDEN. I would have to make a thorough investigation in order to determine that question.

Mr. CLARK of Florida. Exactly; and the Supervising Architect has made the investigation and has reported to the committee and to Congress that, in his judgment, it requires that much money.

Mr. MANN. Will the gentleman yield?

Mr. CLARK of Florida. I will.

Mr. MANN. The gentleman asked my colleague if he believed that a suitable hospital could be built for less than $110,000. I ask him if he believes that it can be built for less than that?

Mr. CLARK of Florida. I am not an architect and not a builder. I would not for a moment set my judgment up against

the judgment of the Supervising Architect of the Treasury. If I had believed it, I would not have voted to report this bill to Congress.

Mr. MANN. If that is true, why did the gentleman's committee make this report: Your committee approves the plan suggested, but believes that hospital accommodations sufficient to meet all requirements can be constructed for less than the amount named by the Supervising Architect. Why should gentlemen on the committee who know nothing about it overrule the recommendation of the Supervising Architect?

Mr. CLARK of Florida. Oh, we have members on the committee who do know something about building.

Mr. MANN. Produce them some time. [Laughter.]

Mr. CLARK of Florida. The gentleman from Alabama [Mr. BURNETT] has had a great deal of experience; he made a suggestion and the committee adopted it. The committee thought that $60,000 would be ample. Now, I want to ask the gentleman from Illinois if he thinks that a receiving building such as is needed there—is he so conversant with the conditions, does he know the situation so well that he is willing to say that a building suitable for that purpose and for the necessities of the business can be constructed for less than $275,000?

Mr. MANN. If the gentleman is addressing his question to me, I will answer that in a Yankee manner. Does the gentleman believe that the Supervising Architect's Office, which only a few years ago recommended a site and building be constructed at a cost of $130,000, afterwards gave an opinion that a full station would cost $280,000, is entitled to undue deference when it now says $600,000, all within a space of half the time that the gentleman and I have served in the House?

Mr. CLARK of Florida. I want to say that it is the idea of the Department of Labor and the idea of the immigration commissioner and those persons charged with the administration of the immigration laws to build at Baltimore a model immigrant station; to build there all the necessary appurtenances belonging to an immigration station; and this committee, after considerable inquiry and investigation, after a number of the committee—I think 10 or 12—made a visit to Baltimore and a personal investigation—and I will say to the gentleman that I did not go and did not get any of the terrapin that he talks about, which I regret—after these gentlemen made this investigation they reported unanimously that this building ought to be constructed, that it is a disgrace to this country, that it is a shame upon the civilization of this Republic that these conditions should be allowed to continue there any longer; and for that reason, acting upon the best information we have, upon the personal inspection of a majority of the committee, upon the statement of Government officials under oath to properly discharge their duties, and under the estimate of the building organization of the Government, your committee saw fit to report this bill. Of course, if Congress does not think the station ought to be built, it is for Congress to determine. We have done what we esteem to be our duty.

The SPEAKER. Is there objection?

Mr. GARDNER. I object.

Mr. LINTHICUM. May I ask the gentleman from Massachusetts whether he will let it go over without prejudice?

Mr. GARDNER. I do not see the gentleman on the Democratic side who said that he was going to object if I did not, and I told him that I should. I do not see how I can let it go over without prejudice under those circumstances.

Mr. LINTHICUM. I would like to have the bill passed without prejudice.

Mr. GARDNER. I think I shall have to object, Mr. Speaker.

The SPEAKER. The gentleman from Massachusetts objects.

### BRIDGES OVER THE ARECIBO RIVER, P. R.

Mr. ADAMSON. Mr. Speaker, in reference to the bill H. R. 12117, to construct bridges across the Arecibo River, P. R., which was passed momentarily, I have now the Senate bill. I find that the Senate bill went to the committee after the committee had reported the House bill. I ask unanimous consent to discharge the Committee on Interstate and Foreign Commerce from further consideration of the bill S. 4145 and consider it in lieu of the House bill.

The SPEAKER. The gentleman from Georgia asks unanimous consent that the Committee on Interstate and Foreign Commerce be discharged from the further consideration of the bill S. 4145 and consider it in lieu of the House bill of a similar tenor. The Clerk will report the Senate bill.

The Clerk read as follows:

An act (S. 4145) to authorize the government of Porto Rico to construct two bridges across the Arecibo River near the city of Arecibo, P. R.

*Be it enacted, etc.*, That the government of Porto Rico be, and is hereby, authorized to construct, maintain, and operate two bridges and approaches thereto across the Arecibo River near the city of Arecibo, P. R., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER. Is there objection to the request of the gentleman from Georgia that the Senate bill be considered in lieu of the House bill?

There was no objection.

The SPEAKER. Is there objection to the consideration of the Senate bill?

There was no objection.

Mr. ADAMSON. Now, Mr. Speaker, I offer the following amendment: Line 5, page 1, after the word "river," insert the words "at a point suitable to the interests of navigation."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 1, by inserting after the word "river," in line 5, the words "at a point suitable to the interests of navigation."

The amendment was agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. ADAMSON, a motion to reconsider the vote whereby the bill was passed was laid on the table.

The bill H. R. 12117 was laid on the table.

### PATENTED LANDS IN YOSEMITE NATIONAL PARK.

Mr. RAKER. Mr. Speaker, I ask unanimous consent to restore to the calendar the bill (H. R. 12533) to amend section 1 of an act of Congress approved April 9, 1912 (37 Stats., 80), entitled "An act to authorize the Secretary of the Interior to secure for the United States title to patented lands in the Yosemite National Park, and for other purposes," which was stricken from the calendar this afternoon on the objection of the gentleman from Illinois [Mr. MADDEN]. The gentleman from Illinois is present, and has no objection to having the bill restored to the calendar at this time.

The SPEAKER. The gentleman from California asks unanimous consent that the bill H. R. 12533 be restored to the calendar. Is there objection?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, I believe the gentleman has the privilege of restoring it himself.

Mr. RAKER. No; this is the second time the bill has been objected to.

The SPEAKER. Is there objection?

There was no objection.

Mr. RAKER. Mr. Speaker, I now ask unanimous consent that the bill may be passed over without prejudice.

The SPEAKER. Is there objection?

There was no objection.

### PUBLIC BUILDING AT MEMPHIS, TENN.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11747) to increase the limit of cost for the purchase of a site and the construction of a public building at Memphis, Tenn.

The Clerk proceeded to report the bill.

Mr. CLARK of Florida. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection?

There was no objection.

### PUBLIC BUILDING AT MONROE, N. C.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 12169) providing for an additional appropriation for a public building in the city of Monroe, N. C.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $3,000 for the completion of a post-office building now under construction in the city of Monroe, N. C., this same being necessary to carry out the original design for said building.

The SPEAKER. Is there objection?

Mr. MANN. I reserve the right to object.

Mr. PAGE of North Carolina. Mr. Speaker, I ask unanimous consent that the bill may be considered in the House as in the Committee of the Whole.

Mr. MANN. But we have not yet reached that point. As the gentleman from North Carolina is an expert grammarian, I would ask him whether he thinks the language "this same being necessary" is very good construction?

Mr. PAGE of North Carolina. Mr. Speaker, I think that language might be improved. I hope the gentleman has no objection other than that to the consideration of the bill.

Mr. MANN. Mr. Speaker, the gentleman from North Carolina is not only a distinguished and able member of the Committee on Appropriations, but he is a distinguished and able Member of the House. The gentleman knows that the Committee on Appropriations has consistently for many years fought the authority of the Committee on Public Buildings and Grounds to make an appropriation or consider a bill making an appropriation, insisting in season and out of season that while the Committee on Public Buildings and Grounds has jurisdiction over bills authorizing an appropriation, it must be left to the Committee on Appropriations to bring in a bill making an appropriation. I want to ask the gentleman now if he is ready to reverse himself in other cases as well as in his own case?

Mr. PAGE of North Carolina. Mr. Speaker, I will say to the gentleman that if a situation parallel to the one presented in this bill should come to the attention of the gentleman from North Carolina he would.

Mr. MANN. Does the gentleman think if this bill passes that it would be possible for a bill to come before him which would present a parallel case?

Mr. PAGE of North Carolina. I do not know. I would say in introducing this bill I had considerable difficulty in convincing the Committee on Public Buildings and Grounds of the emergency situation existing, and other gentlemen might find the same difficulty.

Mr. MANN. I shall not object.

Mr. MOORE. Mr. Speaker, is not the real difficulty this, that after a Member of the House becomes a member of the Committee on Appropriations it is impossible for him to get anything into an appropriation bill for his own district and he has to throw himself thereafter on the mercy of the other committee to obtain an appropriation.

Mr. PAGE of North Carolina. That observation does not apply to this gentleman, I would like to say. [Laughter.]

Mr. MANN. Does not the gentleman think he is unduly modest in bringing this matter before the House, where the House can vote upon it instead of pursuing the usual method of members of the Committee on Appropriations, which is to have the bill pass the House and then go over to the Senate and have the item inserted in the Senate, where they will pass anything, and then have the House conferees agree upon it? [Laughter.]

Mr. PAGE of North Carolina. I have no purpose of doing anything of that sort.

Mr. MANN. Oh, the gentleman is doing exactly the reverse, and I am seeking to compliment him on his leaving it to the mercies of the House. I think out of compliment to the gentleman there ought to be no objection.

Mr. MURDOCK. Mr. Speaker, how much is this additional appropriation?

Mr. PAGE of North Carolina. Three thousand dollars.

Mr. MURDOCK. How much was it originally?

Mr. PAGE of North Carolina. Sixty thousand dollars for building and site.

The SPEAKER. Is there objection?

There was no objection.

Mr. PAGE of North Carolina. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. PAGE of North Carolina, a motion to reconsider the vote by which the bill was passed was laid on the table.

### ARMY AVIATION SERVICE.

Mr. HAY. Mr. Speaker, I move to suspend the rules and pass the bill (H. R. 5304) to increase the efficiency of the aviation service of the Army, and for other purposes, with committee amendments, and with committee amendments amended, which I send to the desk and ask to have read.

The SPEAKER. The gentleman from Virginia moves to suspend the rules and pass the bill H. R. 5304 as amended, which the Clerk will report.

The Clerk proceeded to report the bill as amended.

Mr. MANN. Mr. Speaker, this is an important bill, and I make the point of order that there is no quorum present.

The SPEAKER. Evidently there is no quorum present.

Mr. UNDERWOOD. Mr. Speaker, I move that the House do now adjourn

The question was taken; and on a division (demanded by Mr. UNDERWOOD) there were—ayes 44, noes 9.

So the motion was agreed to; accordingly (at 4 o'clock and 7 minutes p. m.) the House adjourned until to-morrow, Tuesday, March 17, 1914, at 12 o'clock noon.

## EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the chairman of the Interstate Commerce Commission relative to providing a building for use of said commission (H. Doc. No. 831); to the Committee on Public Buildings and Grounds and ordered to be printed.

2. A letter from the Secretary of the Treasury submitting an item of legislation for sundry civil appropriation bill relative to the acquisition of square 143, Washington, D. C. (H. Doc. No. 832); to the Committee on Appropriations and ordered to be printed.

3. A letter from the Secretary of War, transmitting draft of bill to provide for publicity in the making of Government contracts (H. Doc. No. 833); to the Committee on Military Affairs and ordered to be printed.

4. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of channel to East Pass from Apalachicola River, Fla., by way of Crooked Channel, with a view to providing suitable ship channel (H. Doc. No. 834); to the Committee on Rivers and Harbors and ordered to be printed.

5. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Keweenaw Waterway, Portage Lake Ship Canal, Mich., with a view to making a cut-off at Princess Point (H. Doc. No. 835); to the Committee on Rivers and Harbors and ordered to be printed.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. MURRAY of Oklahoma, from the Committee on Indian Affairs, to which was referred the bill (H. R. 10845) to authorize the Secretary of the Interior to expend the proceeds arising from the sale and disposition of surplus agricultural lands and timber on surplus timber lands of the Spokane Indian Reservation, Wash., reported the same with amendment, accompanied by a report (No. 394), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. STEPHENS of Texas, from the Committee on Indian Affairs, to which was referred the bill (H. R. 10848) to amend an act entitled "An act to provide for the disposition and sale of lands known as the Klamath River Indian Reservation," approved June 17, 1892, reported the same with amendment, accompanied by a report (No. 395), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

He also, from the same committee, to which was referred the bill (H. R. 10834) to amend an act entitled "An act to provide for determining the heirs of deceased Indians, for the disposition and sale of allotments of deceased Indians, for the leasing of allotments, and for other purposes," approved June 25, 1910, reported the same with amendment, accompanied by a report (No. 396), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. HAYDEN, from the Committee on Indian Affairs, to which was referred the bill (H. R. 10505) authorizing the Secretary of the Interior to cause allotments to be made to Indians belonging and having tribal rights on the Morongo Indian Reservation, reported the same without amendment, accompanied by a report (No. 397), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. STEPHENS of Mississippi, from the Committee on Claims, to which was referred the bill (H. R. 13581) for the relief of the landowners on the east bank of the Mississippi River

in the counties of Warren, Claiborne, Jefferson, Adams, and Wilkinson, in the State of Mississippi, and in the parish of West Feliciana, State of Louisiana, reported the same without amendment, accompanied by a report (No. 390), which said bill and report were referred to the Private Calendar.

Mr. EDMONDS, from the Committee on Claims, to which was referred the bill (H. R. 1133) for the relief of Lieut. Col. Ormond M. Lissak, reported the same with amendment, accompanied by a report (No. 391), which said bill and report were referred to the Private Calendar.

Mr. METZ, from the Committee on Claims, to which was referred the bill (H. R. 1005) to reimburse William Van Derveer, of Millboro, Va., for excess revenue taxes assessed against and collected from him, reported the same without amendment, accompanied by a report (No. 392), which said bill and report were referred to the Private Calendar.

## ADVERSE REPORT.

Under clause 2 of Rule XIII,

Mr. STEPHENS of Mississippi, from the Committee on Claims, to which was referred the bill of the House (H. R. 6367) for the relief of the heirs of Edgar H. Bates, reported the same adversely, accompanied by a report (No. 393), which said bill and report were laid on the table.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. LENROOT: A bill (H. R. 14660) permitting the Wisconsin Central Railway Co. and the Minneapolis, St. Paul & Sault Ste. Marie Railway Co., its lessee, to construct, maintain, and operate a railroad bridge across the Chippewa River at Chippewa Falls, Wis.; to the Committee on Interstate and Foreign Commerce.

By Mr. PETERS of Massachusetts: A bill (H. R. 14661) to amend section 5 of "An act to provide for the opening, maintenance, protection, and operation of the Panama Canal and the sanitation and government of the Canal Zone," approved August 24, 1912; to the Committee on Interstate and Foreign Commerce.

By Mr. HAY: A bill (H. R. 14662) authorizing the President of the United States to appoint a major general in the Army; to the Committee on Military Affairs.

By Mr. JOHNSON of Kentucky (by request): A bill (H. R. 14663) to amend the act entitled "An act to regulate the business of loaning money on security of any kind by persons, firms, and corporations other than national banks, licensed bankers, trust companies, savings banks, building and loan associations, and real estate brokers in the District of Columbia," approved February 4, 1913; to the Committee on the District of Columbia.

By Mr. FERRIS: A bill (H. R. 14664) to amend an act entitled "An act to provide for an enlarged homestead"; to the Committee on the Public Lands.

By Mr. NEELEY of Kansas: A bill (H. R. 14665) to pension widow and minor children of any officer or enlisted man who served in the War with Spain or the Philippine insurrection; to the Committee on Pensions.

By Mr. BALTZ: Resolution (H. Res. 444) providing for the inspection as to safety from fire of certain buildings in the District of Columbia; to the Committee on the District of Columbia.

## PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANSBERRY: A bill (H. R. 14666) granting a pension to Clyde S. Houltry; to the Committee on Invalid Pensions.

By Mr. BURKE of Wisconsin: A bill (H. R. 14667) granting a pension to Lizzie Nichols Wood; to the Committee on Pensions.

Also, a bill (H. R. 14668) granting a pension to Martha J. Waldo; to the Committee on Invalid Pensions.

By Mr. COPLEY: A bill (H. R. 14669) granting a pension to Celia Bulger; to the Committee on Invalid Pensions.

By Mr. CURRY: A bill (H. R. 14670) granting a pension to Annie Taylor; to the Committee on Pensions.

Also, a bill (H. R. 14671) granting a pension to Rudolph Weidman; to the Committee on Pensions.

Also, a bill (H. R. 14672) to pay the several sums of money found due certain navy-yard employees of the Mare Island Navy Yard by the Court of Claims; to the Committee on Claims.

By Mr. CALDER: A bill (H. R. 14673) to waive for one year the age limit for the appointment as assistant paymaster in the United States Navy in the case of Chief Commissary Steward Carl H. Haggard, United States Navy; to the Committee on Naval Affairs.

By Mr. ESCH: A bill (H. R. 14674) granting an increase of pension to Calvin E. Boynton; to the Committee on Invalid Pensions.

By Mr. FORDNEY: A bill (H. R. 14675) granting a pension to Mary L. Alverson; to the Committee on Invalid Pensions.

By Mr. GERRY: A bill (H. R. 14676) to carry out the findings of the Court of Claims in the case of Herbert O. Dunn; to the Committee on Claims.

By Mr. HAMLIN: A bill (H. R. 14677) granting a pension to Lida Beal; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14678) granting a pension to Christiana Oetting; to the Committee on Pensions.

By Mr. HAY: A bill (H. R. 14679) for the relief of Clarence L. George; to the Committee on Claims.

By Mr. JOHNSON of Kentucky (by request): A bill (H. R. 14680) for the relief of Daniel O'Riley; to the Committee on War Claims.

By Mr. LEE of Georgia: A bill (H. R. 14681) for the relief of Frances L. Snell; to the Committee on War Claims.

By Mr. McKENZIE: A bill (H. R. 14682) granting an increase of pension to John Goodmiller; to the Committee on Invalid Pensions.

By Mr. O'SHAUNESSY: A bill (H. R. 14683) granting an increase of pension to Sophie M. Kinnicutt; to the Committee on Invalid Pensions.

By Mr. POU: A bill (H. R. 14684) for the relief of the Commissioner of Internal Revenue; to the Committee on Claims.

Also, a bill (H. R. 14685) to satisfy certain claims against the Government arising under the Navy Department; to the Committee on Claims.

By Mr. RUSSELL: A bill (H. R. 14686) granting an increase of pension to Thomas A. Moore; to the Committee on Invalid Pensions.

By Mr. SMITH of Maryland: A bill (H. R. 14687) to appropriate a sum of money to Herman Rehn for injuries sustained while in the employ of the naval authorities of the United States at the Naval Academy, Annapolis, Md.; to the Committee on Claims.

By Mr. TALBOTT of Maryland: A bill (H. R. 14688) granting a pension to Charles B. McCoon; to the Commitete on Invalid Pensions.

Also, a bill (H. R. 14689) for the relief of the heirs of Edmund Wolf; to the Committee on War Claims.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Memorials of the South Easton (Mass.) Branch and the Matthew Thornton Branch, of Philadelphia, Pa., American Continental League, protesting against the repeal of the canal-tolls exemption; to the Committee on Interstate and Foreign Commerce.

Also (by request), petition of sundry citizens of the ninth congressional district of Missouri, against national prohibition; to the Committee on the Judiciary.

Also (by request), petition of sundry citizens of Missouri, against national prohibition; to the Committee on the Judiciary.

Also (by request), memorial of the Women's Baptist Missionary Union, favoring amendment to the Constitution abolishing polygamy in the United States; to the Committee on the Judiciary.

Also (by request), memorial of the St. Patrick's Alliance, of Passaic, N. J., and the George Washington Branch of the American Continental League, protesting against the "One hundred years of peace celebration"; to the Committee on Foreign Affairs.

By Mr. ALLEN: Petitions of 472 citizens of Cincinnati and Hamilton County, Ohio, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. ANDERSON: Petition of the Norwegian Luther League of Waseca, Minn., favoring national prohibition; to the Committee on the Judiciary.

By Mr. ANSBERRY: Petitions of sundry citizens of Leipsic Methodist Episcopal Sunday School, of Ohio City, Ohio, and the Melbern Methodist Episcopal Sunday School, of Melburn, Ohio, favoring national prohibition; to the Committee on the Judiciary.

Also, memorial of the Volunteer Officers' Association of the Civil War of the State of Illinois, protesting against amendment to Senate bill 392, relative to three-fourths pay for retired volunteer officers; to the Committee on Military Affairs.

By Mr. BALTZ: Petitions of sundry citizens of the twenty-second district of Illinois, praying that the right of entry as second-class mail matter granted to a certain paper be investigated; to the Committee on the Post Office and Post Roads.

Also, petition of Local Union No. 353, International Association of Machinists, of Belleville, Ill., favoring passage of House bill 12740, the machinists' wage bill; to the Committee on Labor.

Also, petitions of Frank Amschl and other citizens of St. Clair and Madison Counties, Ill., and of sundry citizens of the twenty-second congressional district of Illinois, protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of the Diehm Grocer Co., of East St. Louis, Ill., relative to fixing prices by the manufacturer on trade-marked articles; to the Committee on the Judiciary.

By Mr. BARTHOLDT: Petitions of the Waiters' Union and the United Brotherhood of Carpenters and Joiners' Local No. 257, both of St. Louis, Mo., favoring the passage of the seamen's bill; to the Committee on the Merchant Marine and Fisheries.

Also, petition of sundry citizens of St. Louis, Mo., against Sabbath-observance bill; to the Committee on the District of Columbia.

Also, petitions of William H. Butler, Hugh T. McNeal, and Edward Woodson, of St. Louis, Mo., favoring passage of House bill 13044, widows and orphans' pension bill; to the Committee on Pensions.

Also, petition of the Colcord-Wright Machinery Co., of St. Louis, Mo., protesting against the bill to prohibit exclusive agency arrangements between manufacturers and dealers; to the Committee on the Judiciary.

Also, petition of Charles J. Mitchell, of Pine Lawn, Mo., and sundry citizens of St. Louis, Mo., protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of the Warner Jenkinson Co., of St. Louis, Mo., favoring passage of House bill 12303, exempting extract manufacturers from special tax; to the Committee on Ways and Means.

By Mr. BRUCKNER: Memorial of the Volunteer Officers' Association of the Civil War, of Chicago, Ill., protesting against amendment to Senate bill 392, relative to three-fourths pay; to the Committee on Military Affairs.

By Mr. BRUMBAUGH: Petition of the German Methodist Church and sundry citizens of Columbus, Ohio, favoring national prohibition; to the Committee on the Judiciary.

Also, petitions of sundry citizens of Columbus, Ohio, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. CALDER: Memorial of the Associated Chambers of Commerce of the Pacific Coast, protesting against repeal of canal-tools exemption; to the Committee on Interstate and Foreign Commerce.

Also, petitions of A. Leland Straag and others, of Brooklyn, N. Y., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. CANDLER of Mississippi: Petitions of 20 citizens of Guntown, 75 citizens of Saltillo, and 40 citizens of Booneville, all in the State of Mississippi, favoring national prohibition; to the Committee on the Judiciary.

By Mr. CARR: Petition of sundry citizens of Fayette and Somerset Counties, Pa., against national prohibition; to the Committee on the Judiciary.

By Mr. COX: Petition of sundry citizens of Indiana, against national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of Indiana, favoring national prohibition; to the Committee on the Judiciary.

By Mr. CURRY: Petition of the Sacramento Valley Development Association, favoring rural credits; to the Committee on Banking and Currency.

Also, petitions of sundry citizens of the State of California, protesting against passage of Sabbath-observance bill; to the Committee on the District of Columbia.

Also, petitions of sundry citizens of the third congressional district of California, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. DALE: Petitions of the American Trading Co. and the China & Japan Trading Co., of New York City, favoring passage of House joint resolution No. 173, relative to accounts of American citizens proving their losses; to the Committee on Foreign Affairs.

Also, petition of J. E. Bong, of Corning, N. Y., favoring passage of Owen-Goeke bill to eliminate the time guaranty on gold-filled watchcases; to the Committee on Interstate and Foreign Commerce.

Also, petition of Rudolf Wenzel, of Brooklyn, N. Y., protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of the Volunteer Officers' Association of the Civil War, protesting against amendment to Senate bill 392, relative to three-fourths pay for retired Volunteer officers; to the Committee on Military Affairs.

By Mr. EDMONDS: Petition of the Irish-American Club of Philadelphia, Pa., protesting against repeal of canal-tolls exemption; to the Committee on Interstate and Foreign Commerce.

By Mr. ESCH: Memorial of the Volunteer Officers' Association of the Civil War, of Chicago, Ill., protesting against amending Senate bill 392, relative to three-fourths pay for retired Volunteer officers; to the Committee on Military Affairs.

By Mr. GERRY: Petitions of 765 residents of Providence and Cranston, R. I., and Local Union No. 421, Bartenders, of Newport, R. I., protesting against House joint resolution No. 168 and Senate joint resolutions Nos. 88 and 50, relative to national prohibition; to the Committee on the Judiciary.

Also, petition of Quonocontaug Grange, No. 48, Patrons of Husbandry, of Westerly, R. I., urging the passage of House bill 11897, known as the Bathrick bill, relative to rural credits; to the Committee on Banking and Currency.

By Mr. GILMORE: Memorial of the Roxboro (Mass.) Board of Trade, relative to New York, New Haven & Hartford Railroad Co. continuing ownership, etc., of Sound line service between New England ports and New York City; to the Committee on Interstate and Foreign Commerce.

Also, petition of the International Molders' Union of North America, of Norwood, Mass., protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of the Volunteer Officers' Association of the Civil War of Chicago, Ill., protesting against amending Senate bill 392, relative to three-fourths pay for retired officers; to the Committee on Military Affairs.

Also, petition of the Boston Association of Photo-Engravers, protesting against passage of Bartlett-Bacon anti-injunction bills; to the Committee on the Judiciary.

By Mr. GOLDFOGLE: Petition of sundry citizens of New York, against national prohibition amendment; to the Committee on the Judiciary.

Also, petition of the National Association of Clothiers, against Bartlett-Bacon anti-injunction bill; to the Committee on the Judiciary.

Also, petition of the New York Navy Yard Painters' Association, relative to labor conditions at New York Navy Yard; to the Committee on Naval Affairs.

By Mr. WHITACRE: Petition of sundry citizens of Ohio, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of Alliance, Ohio, against House bill 12928, relative to compensatory time to postal employees; to the Committee on the Post Office and Post Roads.

Also, petition of sundry citizens of the United States, favoring a constitutional amendment forbidding polygamy in the United States; to the Committee on the Judiciary.

Also, petition of Journeymen Barbers' International Union of America, Local No. 307, of Massillon, Ohio, against national prohibition; to the Committee on the Judiciary.

By Mr. WILLIS: Papers to accompany a bill (H. R. 14659) granting a pension to Emanuel Garber; to the Committee on Invalid Pensions.

Also, petition of O. H. McAdams and 20 other citizens of Ada, Ohio, in favor of House joint resolution No. 168, relating to national prohibition; to the Committee on the Judiciary.

Also, petition of Jerome Fisher and other citizens of Kirby, Ohio, against House joint resolution No. 168, relating to national prohibition; to the Committee on the Judiciary.

Also, petition of Rev. W. R. Arnold and other citizens of Dunkirk and Kenton, Ohio, in favor of House joint resolution No. 168, relative to national prohibition; to the Committee on the Judiciary.

Also, petition of T. C. Gibson and 24 other citizens of Marysville, Ohio, in favor of House joint resolution No. 168, relative to national prohibition; to the Committee on the Judiciary.

By Mr. WOODRUFF: Petition of sundry citizens of Michigan, against national prohibition; to the Committee on the Judiciary.

## SENATE.

TUESDAY, *March 17, 1914.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, Thou hast set us very narrow limits of time. Thou dost require a great outcome of stewardship from our lives. Thou dost bring in immediate, striking, and startling contrast the demands of life. As the night and the day, so near together are the right and the wrong. We are in the midst of the perplexing problems of life; we feel our limitations, our weakness, our sin; we lament the strange lethargy that takes possession of our spiritual powers and holds us in bondage unto sin.

We lift our hearts to Thee, the author of life, the giver of every good and perfect gift. We pray that Thou wilt speak to us this day. May we hear the music of heaven in our hearts, and with glad wills may we turn to obey Thy will. For Christ's sake. Amen.

The VICE PRESIDENT resumed the chair.

The Journal of yesterday's proceedings was read and approved.

### MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the following bill and joint resolution:

S. 4019. An act to authorize the Tug River & Kentucky Railroad Co. to construct a bridge across the Tug Fork of the Big Sandy River at or near the mouth of Blackberry Creek, in Pike County, Ky.; and

S. J. Res. 114. Joint resolution for the appointment of a member of the Board of Regents of the Smithsonian Institution.

The message also announced that the House had passed the bill (S. 4145) to authorize the government of Porto Rico to construct two bridges across the Arecibo River near the city of Arecibo, P. R., with an amendment, in which it requested the concurrence of the Senate.

The message further announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 11245. An act extending to the port of Providence, R. I., the privileges of section 1 of the act approved June 10, 1880, governing the immediate transportation of dutiable merchandise without appraisement;

H. R. 12169. An act providing for an additional appropriation for a public building in the city of Monroe, N. C.;

H. R. 12594. An act to authorize the county commissioners of Skagit County, Wash., to construct a bridge across Swinomish Slough opposite the town of La Conner;

H. R. 13133. An act for the approving and payment of the drainage assessments on Indian lands in Salt Creek drainage district No. 2, in Pottawatomie County, Okla.; and

H. R. 13771. An act extending the provisions of the act of March 3, 1913, authorizing the construction of a bridge over the Missouri River near Weldon Springs Landing, Mo.

### ENROLLED BILL SIGNED.

The message also announced that the Speaker of the House had signed the enrolled bill (S. 746) for the relief of Capt. Frank Parker, and it was thereupon signed by the Vice President.

### PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented petitions of sundry citizens of Pittsburgh, Tarentum, and New Castle, in the State of Pennsylvania, and of sundry citizens of Struthers, Ohio, praying for the adoption of an amendment to the Constitution to prohibit polygamy, which were referred to the Committee on the Judiciary.

He also presented a memorial of sundry citizens of Byron, Brownsville, and South Byron, Wis., remonstrating against an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented a memorial of Matthew Thornton Branch, American Continental League, of Philadelphia, Pa., and a memorial of Local Branch, St. Patrick's Alliance of America, of Passaic, N. J., remonstrating against an appropriation for the celebration of the so-called "One hundred years of peace among English-speaking peoples," which were referred to the Committee on Foreign Relations.

Mr. OVERMAN presented a petition of the Chamber of Commerce of Rocky Mount, N. C., and a petition of the Chamber of Commerce of Fayetteville, N. C., praying for the enactment of legislation to establish a national park in the southern Appalachian Mountains, which were referred to the Committee on Agriculture and Forestry.

Mr. SHEPPARD presented memorials of sundry citizens of Houston, Sunset Heights, Dallas, and El Paso, and of Local Union No. 750, Bartenders' League, of Houston, all in the State of Texas, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a petition of the congregation of the Methodist Episcopal Church South, of Deu, Tex., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented a memorial of the Commercial Club of Riviera, Tex., remonstrating against the repeal of the clause of the Panama Canal act exempting American coastwise vessels from the payment of tolls, which was referred to the Committee on Interoceanic Canals.

Mr. WORKS presented a petition of the California Wholesale Grocers' Association, praying for the enactment of legislation to prevent discrimination in prices, etc., which was referred to the Committee on Interstate Commerce.

He also presented a petition of Local Branch, Sailors' Union of the Pacific, of San Francisco, Cal., praying that an appropriation of $500,000 be made for the erection of a marine-hospital building at San Francisco, Cal., which was ordered to lie on the table.

Mr. BRISTOW presented memorials of sundry citizens of Glasco and Maplehill, in the State of Kansas, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented memorials of sundry citizens of Tyro and Topeka, in the State of Kansas, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of Miami County, Kans., praying for the enactment of legislation to provide an educational test for immigrants to this country, which was referred to the Committee on Immigration.

Mr. SHAFROTH presented memorials of sundry citizens of Hugo, Elizabeth, Denver, Idaho Springs, Redcliff, Durango, Trinidad, Leadville, Las Animas, and Fort Collins, all in the State of Colorado, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented petitions of the congregations of the Methodist Episcopal Church of Palisades; the St. Paul's Methodist Episcopal Church, of Colorado Springs; and the Methodist Episcopal Church of Arvada; and of sundry citizens of Montrose, all in the State of Colorado, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented memorials of sundry citizens of Grand Junction, Ignacio, Denver, Collbran, and Cedar, all in the State of Colorado, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were referred to the Committee on the District of Columbia.

Mr. MYERS presented a memorial of Local Union No. 498, Bartenders' Union, of Lewiston, Mont., and a memorial of sundry citizens of Lewiston, Mont., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a petition of the Congregational Sunday School of Roundup, Mont., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. NELSON presented memorials of sundry citizens of Beaulieu, Moorhead, St. Paul, and Brainerd, all in the State of Minnesota, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented petitions of Morgenstjernan Lodge, No. 17, International Order of Good Templars, of Duluth; of Vikingolftet Lodge, No. 65, International Order of Good Templars, of Viking; and of the congregation of the Swedish Mission Church of Viking, all in the State of Minnesota, praying for the adoption of an amendment to the Constitution to prohibit the manu-

facture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a memorial of Local Branch, American Continental League, of Brainerd, Minn., remonstrating against intervention in Mexico on the part of the United States, which was referred to the Committee on Foreign Relations.

Mr. GALLINGER presented petitions of sundry citizens of East Rochester, N. H., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented the memorial of Thomas Laughlin, of Portsmouth, N. H., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. KENYON presented petitions of sundry citizens of Oakdale, Spring Lake, Nevada, Koszta, and Iowa City, all in the State of Iowa, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented memorials of sundry citizens of Davenport, Lyons, Clinton, Chancey, and Council Bluffs, all in the State of Iowa, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. NORRIS presented a memorial of sundry citizens of Lincoln, Nebr., and a memorial of Cigar Makers' Union No. 93, of Omaha, Nebr., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. WEEKS presented a petition of the faculty and students of the Newton Theological Institution, Newton Center, Mass., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. McLEAN presented a memorial of the board of directors of the Bridgeport Savings Bank, of Bridgeport, Conn., remonstrating against the proposed dismemberment of the New York, New Haven & Hartford Railroad system, which was referred to the Committee on the Judiciary.

He also presented a memorial of sundry citizens of Hartford, Conn., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented a memorial of the Irish-American Societies, of Ansonia, Conn., remonstrating against the repeal of the clause of the Panama Canal act exempting American coastwise vessels from the payment of tolls, which was referred to the Committee on Interoceanic Canals.

Mr. WARREN presented a memorial of Custer Post, No. 1, Department of Wyoming, Grand Army of the Republic, of Laramie, Wyo., remonstrating against any change being made in the United States flag, which was referred to the Committee on the Judiciary.

He also presented a petition of Custer Relief Corps, No. 20, of Laramie, Wyo., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. BRANDEGEE presented a memorial of the Bakers and Confectioners' Local Union, No. 92, of Norwalk, Conn., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented a memorial of sundry citizens of Middletown, Conn., remonstrating against the enactment of legislation compelling employees in the Postal Service to work on Sundays, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of Leeds Council, No. 16, Order United American Mechanics, of Stamford, Conn., praying for the enactment of legislation to further restrict immigration, which was referred to the Committee on Immigration.

He also presented a memorial of Nathan Hale Camp, No. 1, Connecticut Division, Sons of Veterans, of New Haven, Conn., remonstrating against any change being made in the American flag, which was referred to the Committee on the Judiciary.

He also presented petitions of the congregation of the Federated Church of Willington; of Connecticut State Grange, Patrons of Husbandry, of Glastonbury; and of sundry citizens of Willington, all in the State of Connecticut, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

### BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. OVERMAN (for Mr. SIMMONS):

A bill (S. 4922) for the relief of D. C. Whittington, heir of D. D. Whittington, deceased (with accompanying papers); to the Committee on Claims.

By Mr. OVERMAN:

A bill (S. 4923) for the relief of W. H. McFarland; to the Committee on Claims.

By Mr. THOMPSON:

A bill (S. 4924) granting a pension to Thomas E. Sims (with accompanying papers); and

A bill (S. 4925) granting a pension to Frances M. Dumenil (with accompanying papers); to the Committee on Pensions.

By Mr. GALLINGER:

A bill (S. 4926) granting an increase of pension to Amelia L. Love (with accompanying papers); to the Committee on Pensions.

By Mr. BRISTOW:

A bill (S. 4927) granting a pension to Elizabeth Ogden (with accompanying papers);

A bill (S. 4928) granting a pension to Lettie Viloth; and

A bill (S. 4929) granting a pension to Sue C. Tozier; to the Committee on Pensions.

A bill (S. 4930) for the relief of V. E. Schermerhorn, E. C. Caley, G. W. Campbell, and Philip Hudspeth (with accompanying papers); to the Committee on Claims.

By Mr. CATRON:

A bill (S. 4931) granting an increase of pension to Simona G. de Quintana; to the Committee on Pensions.

By Mr. WILLIAMS:

A bill (S. 4932) granting a pension to Sadie Winters; to the Committee on Pensions.

By Mr. NORRIS:

A bill (S. 4933) granting a pension to Mary J. Neary; to the Committee on Pensions.

By Mr. SHEPPARD:

A bill (S. 4934) providing for an investigation of the feasibility of irrigation by the reservoir system or plan in Texas in connection with a similar investigation heretofore proposed for Nebraska, Kansas, Oklahoma, New Mexico, and Colorado; to the Committee on Agriculture and Forestry.

By Mr. RANSDELL:

A bill (S. 4935) for the relief of the owners of the steamboat *W. B. Savory* (with accompanying papers); to the Committee on Claims.

By Mr. OLIVER:

A bill (S. 4936) granting an increase of pension to James J. Hasson (with accompanying papers); to the Committee on Pensions.

By Mr. POINDEXTER:

A bill (S. 4937) providing for the retirement and rank of certain men formerly composing the corps of general service clerks and general service messengers in the Army; to the Committee on Military Affairs.

A bill (S. 4938) granting a pension to Josephine Green; and

A bill (S. 4939) granting a pension to Jennie Farley; to the Committee on Pensions.

By Mr. SHAFROTH:

A bill (S. 4940) granting a pension to Margaret Cecilia Donovan; to the Committee on Pensions.

By Mr. SMITH of Georgia:

A joint resolution (S. J. Res. 127) providing for an American commission for the investigation of civic problems in Europe; to the Committee on Foreign Relations.

### AMENDMENTS TO NAVAL APPROPRIATION BILL.

Mr. TILLMAN submitted an amendment proposing to amend sections 1580 and 1581 of the Revised Statutes and the act of March 3, 1907, relating to rations in the Navy, etc., intended to be proposed by him to the naval appropriation bill, which was referred to the Committee on Naval Affairs and ordered to be printed.

He also submitted an amendment providing that hereafter no officer or enlisted man in active service in the Navy or Marine Corps who shall be incapacitated for duty on account of disease

resulting from his own intemperate use of drugs or alcoholic liquors, etc., shall receive pay for the period of such incapacity, intended to be proposed by him to the naval appropriation bill, which was referred to the Committee on Naval Affairs and ordered to be printed.

He also submitted an amendment providing that in case of emergency arising subsequent to and unforeseen at the time of submitting the annual estimates to Congress 10 per cent of the annual appropriations for the Naval Establishment, exclusive of the public works and increase of the Navy, shall be available, etc., intended to be proposed by him to the naval appropriation bill, which was referred to the Committee on Naval Affairs and ordered to be printed.

### OMNIBUS CLAIMS BILL.

Mr. CATRON submitted an amendment intended to be proposed by him to the omnibus claims bill, which was referred to the Committee on Claims and ordered to be printed.

Mr. SHIELDS submitted an amendment intended to be proposed by him to the omnibus claims bill, which was referred to the Committee on Claims and ordered to be printed.

### CHESAPEAKE & DELAWARE CANAL CO.

Mr. SAULSBURY submitted the following resolution (S. Res. 304), which was read and referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

*Resolved*, That the Committee on Coast and Insular Survey or any subcommittee thereof chosen by said committee be, and it hereby is, authorized and directed to investigate, ascertain, and report by whom the stock, bonds, and obligations of the Chesapeake & Delaware Canal Co. are owned, the value thereof, so far as the value of the said securities can be ascertained; the value, income, gross and net, and expenses of said canal; by whom and in whose interest the said canal is operated, owned, and controlled, and who is chiefly benefited by the manner of its operation; with authority to send for persons and papers, administer oaths, and to employ a stenographer at a cost not to exceed $1 per printed page, and to sit during the sessions of the Senate; the expense of said investigation to be paid out of the contingent fund of the Senate on vouchers to be approved by the Committee to Audit and Control the Contingent Expenses of the Senate.

### IRON AND STEEL INDUSTRY.

On motion of Mr. BORAH, it was

*Ordered*, That 5,000 copies of Senate Document No. 301, Sixty-second Congress, second session, being a summary of the wages and hours of labor from the report on conditions of employment in the iron and steel industry of the United States, prepared under the direction of Charles P. Neill, Commissioner of Labor, be printed for the use of the Senate document room.

### SENATOR TILLMAN ON PHYSICAL CULTURE.

Mr. TILLMAN. Mr. President, I have received so many letters asking for my speech on the antismoking resolution and making inquiry about what I have done to bring myself back from the grave, as it were, that I have had that speech printed for distribution to the letter writers.

I ask unanimous consent to have read an article I wrote for the Physical Culture Magazine, of New York City, some time ago, my purpose being to send this along with my speech to those who are making inquiry. I commend it to the careful and prayerful consideration of my brother Senators.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

The simultaneous deaths within the recent past of two of the most distinguished captains of industry in the South are very lamentable. Both of these men started at the bottom and worked their way to the very top of their profession—railroading. Neither ought to have died so young. One was 63 years of age, while the other was only 60. Had they known the value of self-control in eating and the use of hot water, they would have lived at least 10 years longer to serve their country and be with their families. Indeed, it may be said that just at the period when experience and study made them capable of doing their best work they were cut down. When the world loses such men the gap is not easily filled, although there are many who think they can fill it and are anxious to try.

Since I was paralyzed three years and a half ago for the second time I have learned a great deal about my own body, because during that time I have studied it more than all the balance of my life put together.

In the hope that my own personal experience may benefit others and save precious lives, I am going to recite briefly as possible how I now live and what I have done and am doing every day to restore and preserve my health. It is by no means fully restored, but my recovery is indeed marvelous to those who have watched its progress.

Most men will be skeptical and not believe what I say. The overwhelming number will not have the self-control to do what I advise, though it is neither hard nor painful. The trouble will be skepticism and the unwillingness to control their appetites.

I owe a great deal to suggestions from unknown friends, who have written me personal letters telling what they had discovered about themselves. I tried these, and have learned much in this way. The balance of my "system," if it may be called a system, has been evolved from my own study and experience. Of one thing I am sure—nothing contained in these hints will injure any normal man or woman.

Remember, I was never entirely helpless, although very nearly so, and it was only after several months of treatment at sanitariums that I grew strong enough to begin physical-culture exercises. But after I began them I steadily improved. The man who perseveres will thank me, for the result will immediately be good. The man who has mere curiosity and not will power enough to keep on had better not begin.

I passed my sixty-sixth birthday last August, and am therefore not very far from the Biblical limit of three score years and ten. But had I learned how to take care of my body in early manhood, I might have been likely to reach the age of 85 or 90, perhaps a hundred, because I inherited from my father and mother a very strong constitution.

The main idea I have had in devising this scheme to restore my health by the use of physical-culture exercises has been to increase the circulation and drive the blood to the brain and keep down rheumatism by working the joints and preventing calcareous deposits.

These calcareous deposits are like iron rust, and when allowed to accumulate they cause a great deal of pain and trouble. Hot water flushes the kidneys and washes these poisons out. Like any other machine, the human body should be kept in good order by constant exercise. Physical culture affords both the exercise and the lubricant to keep the hinges from creaking.

The following are the exercises I take on my bed each morning:

Before getting up in the morning take the head off the pillow and stretch out straight. Draw in a deep breath and begin by kicking the buttock with the heel of one foot fifteen times; then exhale. Draw in the breath again and kick with the heel of the other foot fifteen times, holding the breath until the movement is finished. Then let the air out and draw in a fresh breath and kick with both feet fifteen times. Draw in a fresh breath to the limit after each movement.

Next drop the heels on the bed with the knees drawn up. Then throw the knees as far apart as they can be carried and repeat movement twenty times.

Then throw first one foot and then the other toward the headboard with vigor, keeping the knee joints as straight as you can. A different set of muscles are brought into play by doing this with the knees drawn up and the knee joints limber.

Now kick out with both feet as wide apart as possible and kick with emphasis, as though you were kicking off a vicious dog.

Next place the hands under the small of the back, using these as a lever, elevate both feet at once and the lower part of the body toward the headboard, using the abdominal muscles to pull up the lower extremities. If in an iron bed, this movement can be facilitated by grasping the railing or round above the head with the hands, pulling up the legs and feet. This and the next movement are intended to reduce the paunch by changing the fat on the abdomen to muscle.

Then fasten the feet under something and pull the trunk to a sitting posture. Young, healthy people do not need to fasten the feet, but old and fat ones must do it. One ought to go about it cautiously until the muscles have become accustomed to the strain. Repeat four or five times.

Finally throw the head back with the feet on the bed and lift the body clear so that the shoulders do not touch, forming an arch. Repeat this as often as you wish.

I then take a cold bath, beginning with the water tepid and ending with it as cold as I can stand. I rub down briskly, put on undershirt and drawers, and get a light pair of iron dumb-bells—3½ pounds. These are to give momentum to the movements and bring the muscles into better play.

First stand erect with the dumb-bells firmly clinched. Throw the arms downward and backward, passing by the thighs. Repeat fifteen times. Continuing, bend the trunk forward as nearly horizontal as you can, and let the arms swing as near the floor as they can go, straightening up between each swing and repeating until you have bent down ten times.

Then, keeping the knees stiff, try to punch the big toe of each foot with both fists. Repeat as often as desired, straightening up between punches.

Next, using the dumb-bells, drop the hands full length of the arms a little to the front. Then begin by swinging the arms in unison first to the right and then to the left. As one goes up let the other come down, swaying the body from side to side as the movements are made. Elevate the hand that goes up as high above the head as possible, and put the other as near the floor as you can. This is called the "liver squeezer," and is very fine for stimulating that organ.

Then throw both arms behind the back hard so as to bring the back of the hands as near together as possible while holding the dumb-bells clinched.

Still holding the dumb-bells, throw one to the rear and the other to the front, looking first over one shoulder and then over the other, twisting the spine as far as possible and loosening the vertebræ.

Using one hand at a time, swing the dumb-bells upward, backward, downward, and forward, forming a circle with the armpit as a center. Then reverse and swing the other way.

Standing flat-footedly, elevate the hands above the head and bend forward and try to touch the floor while the knees are held stiff. Straighten up and repeat. Continue to do this until you succeed in reaching the floor. I usually reach it the third effort. At first I could hardly get lower than my knees.

Take hold of the bed and squat as low as you can. Straighten up and bend backward as far as you can. Then squat and repeat, straightening up and bending backward. This will loosen the vertebræ of the spine and relieve the pressure on the nerves inside the trunk. This to me is my most valuable exercise, as it enables me to mount my horse from the ground without assistance.

Caution: Never do any of these movements to the point of fatigue.

I practice these exercises morning and night before and after undressing. It takes about 10 minutes, not including the bath. I have found that deep breathing adds very much to my strength and has facilitated my return to health. Many do not know what this means. So I will describe my method.

First compress the diaphragm, driving all the breath out of the body you can. This is what the doctors call dead or residual air, and it remains in the lungs all the time unless it is expelled by will power. After you have cleaned out the lungs draw in all the fresh air you can. Hold it in the lungs while you count 10.

Then exhale slowly. One can increase the quantity more than he had supposed possible at first. This is the best thing I have ever found for insomnia, as almost before I know it, as I am counting the inhalations, I am asleep. I never remember to have done it more than ten times without going to sleep.

Another great blessing to me has been hot water. I drink it as hot as I can (about 160° F. in my case), using at least 3 quarts a day. Tepid water is rejected by some stomachs as it produces nausea. But hot water becomes acceptable to most people. I have gotten so I do not want any other kind. It cleanses the stomach in readiness for food. It aids digestion, taken at the right time—shortly after eating. It assists in keeping the bowels regular, and is a specific for indigestion, acute or otherwise. Indeed I can not say too much for it.

I have learned to aid the movement of the bowels by commencing with both hands on the right side above the groin, where the colon begins, and slowly kneading with inward pressure following the colon upward and across, then downward toward the rectum. It is of vital importance to paralytics especially to have the bowels move freely once a day. Fruit, both raw and cooked, will assist materially in this matter. I have to assist nature by the use of aloes once a day.

The four things which have contributed most to my restoration to health are careful diet, deep breathing, physical-culture exercises, and drinking hot water. All these working together have brought about the result so far attained. If I were to name them in the order of importance, they would come as above given. Without the physical culture I would now be tortured by rheumatism and perhaps be bedridden. I have literally kicked it out of bed. I am constantly reminded of my rheumatic condition by twinges of sciatica.

Mr. TILLMAN. Mr. President, I hope my colleagues will pardon me for a personal observation. I see many Senators smiling at what has just been read, and no doubt they think this is a fad of mine. But when they recall the fact that 23 men who worked in this Chamber with me four years ago have gone to their long account it ought to make them pause and consider things more seriously. I am afraid I will see many of you go to your graves yet before I myself am called.

ARECIBO RIVER BRIDGES.

The VICE PRESIDENT laid before the Senate the amendment of the House of Representatives to the bill (S. 4145) to authorize the government of Porto Rico to construct two bridges across the Arecibo River near the city of Arecibo, P. R., which was, in line 5, after "River," to insert "at a point suitable to the interests of navigation."

Mr. SHEPPARD. I move that the Senate concur in the amendment of the House of Representatives.

The motion was agreed to.

HOUSE BILLS REFERRED.

H. R. 11245. An act extending to the port of Providence, R. I., the privileges of section 1 of the act approved June 10, 1880, governing the immediate transportation of dutiable merchandise without appraisement, was read twice by its title and referred to the Committee on Finance.

H. R. 12169. An act providing for an additional appropriation for a public building in the city of Monroe, N. C., was read twice by its title and referred to the Committee on Public Buildings and Grounds.

H. R. 13133. An act for the approving and payment of the drainage assessments on Indian lands in Salt Creek drainage district No. 2, in Pottawatomie County, Okla., was read twice by its title and referred to the Committee on Indian Affairs.

H. R. 13771. An act extending the provisions of the act of March 3, 1913, authorizing the construction of a bridge over the Missouri River near Weldon Springs Landing, Mo., was read twice by its title and referred to the Committee on Commerce.

PANAMA CANAL TOLLS.

The VICE PRESIDENT. Morning business is closed.

Mr. JONES. Mr. President, before morning business is closed I wish to inquire if it will be in order to ask to take from the table Senate resolution 288, submitted by me, being a resolution calling on the President for information as to what nations have protested against the passage of coastwise vessels through the Panama Canal free of tolls.

The VICE PRESIDENT. The Senator can move to take from the table the resolution to which he refers.

Mr. JONES. I have no desire to do so this morning, because the Senator from North Dakota [Mr. MCCUMBER] is anxious to conclude his remarks; but I wish to state that I have been expecting for several days to call up the resolution to which I refer, and I shall endeavor to get it up on to-morrow at the conclusion of morning business.

Mr. MCCUMBER. I hope to conclude my remarks to-day in from one-half to three-quarters of an hour.

INSPECTION AND GRADING OF GRAIN.

Mr. MCCUMBER. I ask that Senate bill 120 be laid before the Senate.

The VICE PRESIDENT. The Chair lays the bill before the Senate. It will be read by title.

The SECRETARY. A bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce, and to secure uniformity in standards and classification of grain, and for other purposes.

Mr. MCCUMBER. Mr. President, I desire now to conclude my discussion of the evidence in this case. I can not close, however, without quoting the concluding remarks of Mr. J. W. Brafford, the State grain inspector, of Kansas City, Kans. In a letter Mr. Brafford says:

> The markets should be compelled to take their hands off of the throat of the business, as far as manipulating the inspection of grain, regardless of what it is; and to be prevented from so manipulating it that it matters not whether the market breaks or raises if they are able to order the grades tightened or loosened; they can make good on any feature of speculation they desire, and the balance of the trade, especially the producer and some more, are entirely at their mercy. There is no more justice, no more reason, or excuse for the great grain markets to dictate the different standards of grain and then construe the rules in grading it than there would be to permit these same markets to change the length of the yardstick, to increase or diminish the size of the standard bushel to suit their own conveniences and to make good on bad guessing of the markets.

There are some sections of our country that are not affected so much as others by the foreign demand. But that foreign demand has a great influence upon our home prices over the greater portion of the United States. If that demand is strong, if the trade is freed from contention and disappointment, if our grain grades can be relied upon, no one can deny that it will add to the value of our grain and the consequent legitimate profits of all persons interested in grain. But more important to us is the secondary effect of lack of confidence in our grades. The great effort of European buyers in the last few years has been to develop the Argentine grain trade, the grain trade from Russia and other sections and to avoid the American trade.

We have seen some result of this effort on the part of foreign dealers in grain to develop the Argentine production in the fact that their grain is being shipped as far into the interior of this country as Indianapolis itself. I am informed that Argentine corn has actually come into Indiana in competition with the home product.

For years all of our consular reports have been filled with bitter complaints made by foreign purchasers. They all sound the same note of warning, and declare that the grain trade in many sections has been declining, and that if such dissatisfaction, which is becoming general, is not overcome our export trade will be entirely destroyed at many points. The universal complaint there is that the grading is not up to the standard fixed by the rules at any of these great terminals, either in kind or quality; that the conditions are growing worse; that the purchaser there does not receive what he buys. The result is that the miller has ceased to buy American grain for his mill and the farmer for his stock, and European and other foreign grain is taking its place. It is useless to attempt to minimize or to attempt to explain away the universal dissatisfaction on the part of European buyers. So universal and so intense have these complaints grown that the whole European trade has organized a commission or association to deal with American grades, and, if possible, to secure some action on the part of our Government which will mitigate the evils which follow from fraudulent and improper certification of grain shipped abroad. Letters have been written by the head of this association to the Secretary of Agriculture and the President of the United States asking for some legislation which will remove the present incumbrance on our grain trade in Europe, due to the worse than uncertainties in our system of inspection and grading.

If there were little in these complaints, if they were imaginative only, still good business judgment would demand such change in the system as would eliminate them. If they are justified, as every report will clearly demonstrate, then a remedy is imperatively demanded. There never will be absolute confidence in our grain grading so long as the grades are established and controlled by those who are interested as purchasers only. If our grain is to be sold by grades—and no one will deny that under present conditions it must be so sold—then it follows that those grades should be established and fixed by an unbiased, independent, and competent authority.

This most forceful arraignment and condemnation of the American grades by European importers compelled the President and the Secretary of Agriculture to take cognizance of the chaotic conditions of our foreign grain trade. One of the best experts from the Agricultural Department was sent to Europe to investigate the complaints made by the European buyers and to ascertain what might be done to meet their just requirements. This agent spent a good part of a year abroad, visiting all of the European grain markets and making a most thorough and comprehensive examination of the whole subject of our grain export trade. He found that the complaints were well founded; that the whole trouble was due to improper certification of grades; that grain unfit for use was certified at a high grade; that in consequence enormous losses had been suffered by purchasers throughout Europe; and that the influence of all the exchanges was hostile to American grain. He also found that American wheat and corn, when in proper condition and measuring up to the standards certified, were considered better than the wheat and corn of any other country in the world; but by reason of the adulteration of the grades and the very considerable practice of attempting to foist damaged and inferior grain upon the European purchaser, our wheat and corn of certain grade was bought on the markets at considerably lower figures

than the same grade and character of grain from other countries. The president of the Hamburg Grain Dealers' Association informed the agent that the price of American wheat actually fell 5 per cent in that market immediately upon the arrival of the first of the season's shipment, because it did not measure up to its certification; that the delivery of this wheat on wheat contracts was condemned, and the European grain interests were warned against further purchases in a circular letter sent out by the Hamburg association, which was copied generally and freely commented upon by the press. Thus the insatiate greed of a few American exporters, who seek to work off a low grade of grain, purchased from the farmers at a low price, upon a high-grade certificate results not only in immediate diminution of the price of all our American grain and the loss of millions of dollars annually to the American producer, but also is a potent factor in diminishing and destroying our future export trade.

Now, Mr. President, I wish to call attention to some of these letters from foreign importers. I desire first to quote from a letter from Robert S. Patterson, chairman of the European International Committee on Grain Certificates. I have heretofore called attention to the fact that our grading has been done so carelessly or so unjustly that an organization has been established in Europe for the purpose of dealing with American grades. The chairman of this international committee was Mr. Robert S. Patterson, who writes:

European buyers have lost confidence in the reliability of United States certificates, and American grain consequently suffers in price, buyers giving a preference whenever possible to other grain, and only buying yours when compelled to do so or at a reduction in price sufficient, in their opinion, to compensate them for risks they run in buying certificate final.

I now quote from a letter from Mr. Patterson to the Secretary of Agriculture, in which he says:

By direction of the European international committee on American certificates I have the honor to inclose a copy of a letter I have addressed to His Excellency the President, which I think explains itself, and I have only to add that my committee, representing the European grain trade, desire me to say that they gladly welcome and warmly support such as measure as that now before Congress—

The same measure which I am pressing on the attention of Congress now—

by which the grading and certificating of grain, now in the hands of a number of various authorities, partly public and partly private, or, at any rate, in some cases open to the interference of private interests, will be transferred to a Government department where we consider we may rely not only on its thorough impartiality, but on such complete uniformity of administration at all ports that European importers will get in future a thoroughly trustworthy certificate.

In this belief my committee hope that you will succeed in getting your proposals accepted and that the results will prove generally acceptable to all honest dealers in grain.

That, Mr. President, is the sentiment of the foreign purchasers. I have a letter from the Rotterdam Corn Association, signed by the president of that association, in which he says:

During many years already the American grain-inspection certificates have been very unsatisfactory, and immense losses were caused to the buyers on this side by the careless inspection of American grain shipped for export.

* * * * * * *

Many important firms in the importing centers on this side have absolutely given up importing American corn, taught by the experience of several years, when a single parcel of this article, certified No. 2 mixed, sail mixed, etc., and still showing 30 to 90 per cent damage on arrival, caused a loss greater than the small gain made on many shipments together; they preferred to buy from Argentina, Russia, and the Danube. A better inspection, however, and certificates which give sufficient guaranty that the grade has really been given in accordance with the grain's quality and condition will induce these firms to take up the import of American corn again.

We don't object to the export of inferior grain, but to the fact that the grades are not given according to the condition of the grain, so that the certificates are entirely unreliable. Perhaps some buyers on this side want the inferior grain, but those who deal in the better qualities want to be sure that when they pay a better price for the higher grade the certificate gives them the guaranty to get this grade.

Mr. President, every one of these letters is an argument in itself in favor of Federal inspection. Our consul general at Marseille, France, Robert P. Skinner, took the matter up, and I now quote from a report made by him to the Department of Commerce and Labor:

It is highly desirable that certain facts in regard to American grain-selling methods be given immediate and wide circulation and that something be done, either by action of Congress or by the concerted action of American commercial bodies, to reform or, rather, standardize the system under which the great cereal-exporting business has been created.

There is little popular knowledge in the United States in regard to the fact that wheat, corn, grease, and similar products of American origin are not now sold abroad by sample, but by nominal grade. The European buyer knows nothing of the merchandise whatever before it reaches his possession. He imports and resells various classes of merchandise the quality or grade of which is certified to him not by the merchant who has sold him the article, but by the official inspector of a board of trade or other equivalent body at the port of shipment. He pays for the goods before he receives them, and when the exporter in the United States delivers to him a certificate of inspection, declaring the goods to be of a given grade, he has no alternative but to honor the drafts. The bargain is absolutely final upon the production to him of this certificate of inspection.

Although no two ports in the United States may absolutely agree as to the descriptive terms to be applied to a given grade of wheat, although previous shipments may have been of obviously different quality, if the certificate delivered conforms to the grade ordered, the buyer must accept delivery. These are "American conditions." The fact that for many years we have exported nearly all our surplus agricultural products under these conditions speaks well for American business methods, and the fact that these methods are generally acceptable is of advantage to the people of the United States.

Of late years the murmurs against this system have been increasing in Europe, and whereas a short time ago they took the form of isolated private complaints that goods did not always conform to the certified grade, they now take the form of organized protests. I have before me not merely private correspondence running through a number of years, but the recent proceedings of the London Corn Trade Association and the proceedings of a delegate conference held on December 12 at the Berlin Bourse, the general tenor of which is that foreign importers are vexed with prevailing conditions in the United States and are determined to force an improvement. At these two conferences a great many harsh things were said in regard to American certificates, and specific instances of irregularities were mentioned which I need not now repeat. The vital point which it will be well to separate from so much context is this.

Then he quotes a statement from Mr. Friedberg. He says:

Mr. FRIEDBERG (Hamburg). It is perfectly clear that if an American inspector certifies, we have no right to doubt, or if we do, we are asked, "Why do you go on buying?" I may assure this meeting that a good many of us are not going on buying. We have none of this trouble in South America. For the general trade I think that there are respectable people enough in America and I am wondering why they do not stop the glaring abuses that are complained of.

Why is it necessary, Mr. President, that these complaints should all be made against the North American exporter and none of them against the South American exporter?

I shall ask to insert the balance of the report of the consul general, which I have marked, without stopping to read it now.

The VICE PRESIDENT. Without objection, permission is granted.

The matter referred to is as follows:

It was the fact that not many years ago the vast bulk of our grain exportations went forward from New York and that every year standard samples of cereals were sent out to European buyers, bearing the seal of the New York commercial bodies which issued certificates of inspection. Under such circumstances, when European buyers received a certificate from New York stating that a certain cargo afloat was of X quality they could refer to their sample of this X grain, and there was at least a moral guaranty that sample and cargo would be alike. The practice of sending out standard samples is no longer followed, while grain is being shipped under certificates of inspection from Duluth, New York, Baltimore, New Orleans, Galveston, and probably elsewhere. In each port or place a commercial organization assumes the right to issue certificates of grade and yet no two ports or places have agreed upon the text of the terms which they use to describe the standard grades, let alone upon the grain itself. Nor is this all. I quote from the printed rules of a great board of trade:

"The committee on grain shall have full power and authority to establish grades of grains and to alter and amend the same as may be deemed necessary or expedient."

This instability is naturally one of the conditions of American business that is least acceptable to foreign importers, and what with rivalry between ports for export business it has created not only bitter feeling abroad, but definite differences in the prices at which grain of the same nominal grade is offered for sale at the different ports of shipment. There are "easy ports" and "good ports," and sometimes the "easy ports" are penalized, as thus explained in a recent letter from an importer to an officer of an American commercial organization:

"As you know, at present exporters have great difficulty selling on certificates, but where quality is reasonably assured they are willing to pay a premium over lower inspections. Newport News and Norfolk were excluded on the London and Liverpool contracts because of last year's No. 2 corn shipments, while, as you know, your inspection maintained a premium all last season over the Atlantic."

No wheat importers desire to pay a premium here, or to exact a penalty there, based upon their appreciation of inspection methods. Wheat will fix its own price readily enough, and what the importer wishes to know and has a right to know with as much certainty as attaches to any human transaction is that No. 1 white winter wheat, for example, is the same kind of grain, whether it be inspected at Duluth or New Orleans. The importer insists that if the American Government, commercial bodies, and individual exporters have not agreed upon the qualifications of various grains necessary that they may receive specific gradings, it is the result of their own negligence, very possibly encouraged in certain quarters by those who profit by this unsatisfactory state of affairs.

The remedy sought is so easy of application and the demand for its application is so entirely reasonable that to the importer protracted resistance is incomprehensible. The proper remedy may be applied either by our Government or by the cooperation of our trade bodies. The starting point of the reform would be naturally the establishment of standard descriptions by law. This done, if the Government were charged with the issuance of inspection certificates, the service would be removed from local influences, and our so-called official certificates would be rehabilitated. If this very rational proposition be objected to, the surest means of effectively combating it would be the holding of a conference of American grain-inspecting bodies for the adoption of grain standards and for the adoption of ways and means of drawing standard samples, to be deposited in American consulates at great European ports or to be issued upon demand to importers, and to provide for a board of inspectors, the members thereof to be transferred at intervals and liberated from every form of local pressure.

Mr. McCUMBER. I again call attention to a report from Consul General Thomas R. Wallace, from Crefeld, Germany. He says:

The grain dealers in northern and western Europe have been holding meetings, the principal purpose of which seems to be to take united action with regard to a change in the rules and methods of transacting

business with the United States in their line and to correct abuses now existing in the same.

The grain trade from the United States with this district has been declining for some time, and if such dissatisfaction becomes general throughout Europe the losses to the people of America in this important branch of their export trade will be enormous. To gain some idea of the causes of the complaints regarding the grain exported from the United States I have made personal inquiry among the millers and dealers in these products, and am told that the conditions complained of here are the same all over Europe.

A resolution of international committee in regard to American certificates, January 24, 1907, resolved to call upon boards of trade and commercial exchanges of United States and Canada to draw up uniform rules for the grading of grain for export; that should certificating authority refuse or neglect to issue and act upon such rules this committee shall report to the European associations with a view to exclusion of certificates of said authority.

Mr. President, I have covered much of the foreign complaint. There is a great deal more that I do not care to cite at this time.

I want to take up now, for a short time, the complaints in the different States of the Union, and cite but a few from each State. I want to show under this division that there is not a State in the Union where there are purchasers of grain from any of these terminals that do not plead for some relief from the uncertainty of the grades.

I will start in my own State by reading a resolution adopted by the Tri-State Grain Dealers' Association, whose members come from the three States of North and South Dakota and Minnesota. This resolution is as follows:

*Resolved*, That the McCumber Federal grain bill meets the hearty approval of this convention. Present system of juggling with grades and excessive dockage, of mixing hard wheat with inferior grades, calls for inspection far removed from local or State interests and from political manipulation. Demand that wheat shall sell in the markets of world upon its merits and that farmer shall receive for his product its full value, less reasonable commission for handling and transportation.

This is from the grain-trade producers of three States.

The North Dakota Bankers' Association, which took up this subject for the relief of our people, passed a resolution, from which I will quote only a sentence:

Your committee is of the opinion that the reforms outlined will be of material benefit to the grain growers of the State and will be a stepping-stone to a better system of inspection, viz, Federal inspection, which would do away entirely with the many conflicting inspections established in the various States.

I take now the Independent Grain Shippers' Association of North Dakota. They passed a resolution which reads as follows:

*Resolved*, That this association is in favor of passing a bill for Federal inspection of grain; that we favor the passage of a bill prohibiting the dockage of grain; that we favor a national law changing our present system of measuring grain by bushel to the hundredweight.

I take now an extract from a commission firm in Minneapolis doing business under this same system, and I especially call what they say to the attention of those Senators who claim that the people and the boards themselves are all satisfied with their own conditions. This is what they say:

They have certainly tightened up on grades here, but on account of the grades being so uneven there isn't a man living really could tell whether this sample of wheat would grade No. 3 or whether it would grade No. 4. To show you how uneven the grades are here we had a sample of wheat from one of our shippers a few days ago. We took the sample to the inspectors; one called it No. 1, another called it No. 2, and the board of appeal called it No. 3, and therefore there isn't a man living could tell what they are liable to grade your wheat when it arrives here.

And this is from a wheat-purchasing firm in the city of Minneapolis.

I now quote a letter from Charles D. Jones, of Memphis, Tenn. He says:

* * * My greatest fear about this whole proposition is that too many Senators and Representatives will listen to the wail that will be raised by the big exchanges of this country, who are enjoying such great privileges under the present inspection system, and in listening to them will agree on compromise, which will not give this country relief to which we are entitled.

To my mind few things in way of legislation have been offered in our National Congress for years which would as directly benefit as many thousand people as will the administration of your proposed law. It is impossible for me to buy from any large center a No. 3 white oat and have accurate idea of what real quality I will get under that inspection. One imposition on buyer is that often they do not get a certificate of inspection, and it is an acknowledged fact that a great many shippers will quote, for instance, No. 2 white corn and have no idea of shipping anything but No. 3 white corn.

Since last letter to you I have had great deal of correspondence with dealers all over the South, and they all seem enthusiastic over your bill, and know that the Senators and Representatives from Mississippi, Louisiana, Alabama, Georgia, Florida, North and South Carolina, and Tennessee have been written to regarding your bill and asked to support the measure.

I have here another from Minnesota. This is a resolution from the Minnesota Farmers' Eleva.or Association:

*Resolved*, That we recommend the enactment of a Federal-inspection law, as introduced in Congress by Senator MCCUMBER, * * * and that we specially call upon the Members of the Minnesota delegation in Congress to assist in the passage of such laws.

I quote one now from the Farmers' Cooperative Grain & Supply Co., of Minden, Nebr.:

*Resolved*, That it is the sense of this board that all grain should be inspected and graded by the Federal Government, and when exported should carry with it the seal and proper authority, so that it should have with it absolute confidence in every grain market of the world: *Resolved further*, That we heartily indorse Federal inspection and call upon our Representatives in Congress to do everything possible in their power to assist in passing such a bill.

I now go to the State of Illinois, and read a resolution from the Farmers' Grain Dealers' Association of Illinois:

*Resolved*, That we favor the inauguration of a system of Federal grain inspection and grading of grain along the lines provided for in the McCumber bill, and we call upon the Senators and Representatives from the State of Illinois to bend every effort toward securing the enactment of such legislation by Congress at an early date.

I have communications from the Kansas Board of Trade, of Kansas City, Kans., and the Farmers' Terminal Grain Co., both of which favor Federal grain inspection.

We then drop down to Alabama. W. C. Agee, of Birmingham, Ala., writes that—

the present system of inspecting grain throughout this country is corrupt and crooked as it can be, and it is a notorious fact that at practically no grain centers can we find an honest inspection of grain. We are sure that all reputable grain dealers and the farmers will welcome the passage of such a bill (Federal inspection bill).

A letter from Baker & Holmes Co., in Florida, says:

We wish to state emphatically that we will do whatever we can to aid you in the passage of this bill, and if we can be of any service to you, let us know the nature of same.

We think this is a move in the right direction and it will be of great benefit to those in the grain business, and we wish to assure you that you have our sympathy in every respect.

From Mississippi, from the Gibson Grocery Co.:

We take pleasure in recommending and indorsing your bill in reference to the uniform system of grading grain, and believe it should have the encouragement of every honest buyer and seller. There is not one average buyer in ten in this section of the country but that has at some time been imposed upon in this respect and with no recourse whatever.

Another letter from Threefoot Bros., Meridian, Miss.:

We note the bill offered in regard to grain inspection and wish to commend you for this, and hope it will become a law, as the present condition of grain is very unfavorable and detrimental to the dealers, as it is only occasionally that we get justice in accepting grain shipped by present certificates of inspection.

From the Sanford Grocery Co., of Sanford, N. C.:

We feel that the passing of this bill—Federal inspection bill—would be one of the greatest improvements for the grain receivers in the various sections of the United States, and especially in Southern States, that has ever happened, and we desire to express our deep and lasting appreciation, etc. As a rule the grain received by southern dealers has fallen far short of the grade at which it was billed, and as grain receivers we are always at a loss to know how to quote our trade here until we have received the grain and inspected it ourselves. We feel that the passage of the bill would greatly relieve the present situation, for if all grain is inspected by Federal inspectors we are confident we will get what our invoices call for. Under this law there will be less partiality and fewer discriminations in favor of the shippers and fairer and better treatment to the receivers at large, and will place competition amongst shippers on a level.

Here is another one from Missouri, which I think I have already quoted. It is from the Merchants' Exchange at St. Louis, which at that time favored the enactment of this measure.

I now go down to Georgia. I have several letters from that State, but I will cite one only, from the Bainbridge Grocery Co., of Bainbridge, Ga.:

Are glad to note that you have introduced a bill requiring Federal inspection of all grain. We wish to extend to you our hearty appreciation of your interest in this matter and urge that you use every effort to get such bill passed, as it has been a great imposition on the South for the past several years. All the northern and western shippers seem to have the idea that they can dump anything they please on the South and force them to accept it.

A letter from South Carolina:

We have read with interest notice of your bill and wish to say with reference thereto that in our opinion the enactment of this bill means much to the South. We hope that you will become more and more determined to push this matter through, as you shall not only deserve our commendation but of the whole South.

I have a letter here from Kansas. It is a little longer than I desire to read, and I will ask that it may be included in my remarks.

The VICE PRESIDENT. Without objection, that may be done.

The letter referred to is as follows:

KANSAS.

From letter of D. W. Troup, secretary of the Kansas Board of Trade, to Congressman Charles F. Scott, January 30, 1908:

"* * * We can readily see that the adoption of Federal inspection of grain would take away from the interests that now dominate the grain trade of our country a weapon that gives them almost absolute control of the business, and that under the present system they enjoy advantages which they would not obtain under Federal inspection of grain, and which is worth to them the difference between the value of the grain now arriving at the market centers and the value of grain after having been received at market centers by these interests of at least 3 to 5 cents per bushel. You understand that the

value of grain under the present system into a central market must be at least 3 to 5 cents per bushel higher than that required by the same inspection department when it is loaded out of terminal elevators, and after having come in possession of the aforesaid interests.

"It is the simplest matter possible to have uniform inspection of grain.

"The only influence that is fighting Federal inspection of grain today, so far as I can find out—and I have been going into this matter very thoroughly—is the boards of trade, who are profiting by the manipulation of the grain products of this country. That is, I mean to say, the boards of trade hereinbefore mentioned, all line-house concerns and their adherents, and the different grain dealers' associations, such as the Kansas Grain Dealers' Association, of this State, and we sincerely hope you are not lined up and allied with these interests and will not use your influence for the defeat of one of the greatest bills that has ever been introduced in Congress for the benefit of the producer and to rehabilitate the grain trade between this country and Europe, and to raise our standard of value of Kansas No. 2 'hard' wheat abroad, where it has been discredited by manipulation to such an extent that to-day it is almost impossible to sell our wheat abroad so long as the foreigner is able to buy from South America, Russia, and other competing countries.

"It is just as important that we should have uniform inspection of grain and some guarantee from the inspection department after a car of grain is inspected that the certificate will carry in somewhere as it is that we have uniform weights, and that when we sell a bushel of wheat in Kansas we understand that we have to deliver 60 pounds, no matter whether it is in New York State, Missouri, Kentucky, or Florida."

From the Grain Dealers' Association of Kansas, E. J. Smiley, secretary, December 9, 1907:

"The writer has given Federal inspection deep study and is almost convinced that such a measure will be necessary to secure unifrom grades throughout the country. He has discussed the question of Federal inspection with the official members of this association and they agree that Federal inspection must come in order to protect the producer and local grain dealer against imposition by the large elevator owners."

Mr. McCUMBER. Mr. President, I have read, possibly some will say at great length, quotations from the testimony taken in this matter. I have done so that I may bring together the important portions of that testimony upon a very important feature of the case. This evidence clearly established two facts, first, that all the grain producers favor this bill; second, that all the grain consumers favor it. There is therefore only the little coterie of grain dealers at the terminals who oppose it.

The present method is inefficient as well as unjust. I wish to call attention to only another little portion of the testimony, without quoting it. There is evidence in these hearings that a single inspector in the city of Chicago, at a time when there was more or less congestion, actually reported that he had inspected 250 cars in one-half of a day. That required him to travel 2½ miles down one side of the train loads of cars and 2½ miles back, open every car on the one side and on the other, and make the test. You can see that it would be a physical impossibility for him to have properly investigated and certified 25 cars in that length of time. All he could have done would have been to have made a very wild guess; and as all this grain must be sold upon his guess and upon the certificates that he would attach to each car you can see very easily the confusion that would naturally follow when the people who bought those carloads upon those certificates should open the cars.

Mr. President, we have here a new bill that is to take the place of the one introduced by me. This new bill is known as the Lever bill. Who drew the bill? That is an important question. The Agricultural Department admits that it was drawn by the trade. The trade in their statements to Senators state that they agreed upon a bill, and they had one that would be satisfactory to themselves. In other words, since 1890 we have been attempting to rid ourselves of the rules and regulations of these trades. Finally the trades themselves have drawn up a bill under which we are supposed to free ourselves from their clutches. The same power that made the rules that we are complaining of now fix a law for us. What reason have we to assume that they will be more liberal, more generous to the public and less selfish to themselves in a bill which they would draw than they would be in the rules which they established?

Mr. President, there is one good thing in the new bill, the Lever bill. It does provide for Federal standardization. That is practically all it does do. It provides for Federal supervision, but the provisions are such that the Federal supervision will be ineffective, just exactly as the board wants it to be. Then, under an ineffective Federal supervision, with the same control they have now of the individual inspectors, they can go on with the same nefarious practices that they have been indulging in for more than 30 years.

That bill, I understand, has been introduced here. I thought I had a copy of the bill with me, but I evidently have not. However, the principal feature that I note about the bill is that the Agricultural Department seems to know something of the nature of these exchanges. It has carefully guarded, in section 8, its employees by providing that the boards of exchange are prohibited from assaulting the employees who go there to make an inspection, and imposing a heavy penalty upon them if they do. I had supposed that the State laws were sufficient to protect all alike, but the Agricultural Department seems to think that they are not sufficient.

Mr. President, in closing I want again to ask this question, because I want an honest answer from any of those who oppose Federal inspection: What objection is there to the Government doing the inspecting itself? Why do the boards of trade want to employ the inspectors? These boards admit that the Government should have supervision, they admit that they should have people who are qualified to supervise the inspection, but they do not want the Government to inspect. If you admit, as they admit, that the Government should fix the grade and should fix the standard, then what objection is there that the Government employees who are to pass upon the grades should do the grading themselves?

It is stated with some force that the Agricultural Department have now changed front, and while in the evidence of the officers of that department before the committee they not only spoke in favor of Federal supervision but also Federal inspection, that they are now supporting a proposition which will call for Federal supervision only. I was therefore compelled to write to the department to ascertain if there was any reason that department could give why they should not have also the power of Federal inspection as well as supervision, and what reason there was, if any, for a change. In answer to my inquiry I received a letter from the Acting Secretary of Agriculture, I quote only a sentence from it:

In connection with our investigations relating to the handling, grading, and transportation of grain, and the fixing of definite grades thereof, it has been found that with but few exceptions the grain inspectors in the important markets are fully competent to inspect and grade grain if left free to exercise their own judgment as to the grade of the grain under normal movements.

Mr. President, I assume that, and that is the reason I assumed they were competent under Government employment.

I then wrote again to secure, if I could, any reason why the Department of Agriculture at the present time did not agree with its previous contention that we should have inspection as well as grading, and I received a reply. I will read both my letter and the reply. It was addressed to Hon. B. T. Galloway, Acting Secretary of Agriculture, on March 10:

MARCH 10, 1914.

Hon. B. T. GALLOWAY,
*Acting Secretary of Agriculture.*

MY DEAR MR. SECRETARY: I have your favor of the 6th instant in answer to my inquiry concerning investigations of the department relative to the handling, transporting, and grading of grain and the fixing of definite grades, etc.

You say:

"As a result of the investigations carried on under this project the department has arrived at the conclusion that effective Government supervision of the inspecting and grading of grain, together with the use of standard grades as fixed by the department, will solve the difficulties which are continuously arising in transactions in grain when bought and sold by grade."

I think both yourself and the former Secretary of Agriculture, Mr. Wilson, gave testimony before the Committee on Agriculture and Forestry some few years ago in which, if I remember correctly, both of you stated in substance that you would have no difficulty in taking over the inspectors at the various points of inspection and carrying on the grading and inspection under Government control.

I agree with you entirely that "with few exceptions grain inspectors in the important markets are fully competent to inspect and grade grain if left free to exercise their own judgment as to the grade of the grain under normal movements." All these inspectors need to understand is that they can use their own judgment and not the judgment of those to whom they are beholden for their positions. Just and competent inspection can be accomplished only by actual Government inspection unless the Government has one supervisor appointed for every wheat inspector, and if the supervisor so to be appointed is capable of supervising the work he certainly must be capable of doing the work.

If, as you have previously stated, the Federal Government could do the inspecting properly and efficiently, that they could take, for instance, the same force which are inspecting to-day under the divers systems and could use them under a uniform system, why do the various boards of trade oppose it? If these boards of trade really wish supervision for the purpose of enforcing correct inspection and certifying, and if the Government could insure such just and correct inspecting and handling, why do the boards oppose it? They would be relieved of all responsibility and all the labor now necessary to get the grain on the market by grades and could proceed to confine their business to buying and selling wheat. Their reasons for opposing Federal inspection by Federal inspectors are clear to me. I should be glad, however, if you would give me what you deem to be any legitimate reason on their part.

Very truly, yours,

PORTER J. McCUMBER.

That was addressed to the Acting Secretary of Agriculture to ascertain if the department knew of any legitimate reason why these boards should object to Government inspection, and I will read the reply. He says:

DEPARTMENT OF AGRICULTURE,
*Washington, March 12, 1914.*

Hon. P. J. McCUMBER,
*United States Senate, Washington, D. C.*

DEAR SENATOR McCUMBER: I have your favor of March 10, relating further to the inspection and grading of grain by the Federal Government, or under the supervision of the Federal Government, in which you make inquiry as to any legitimate reason why the grain exchanges

should oppose Federal inspection. In reply, I have to advise that while various objections have been raised by the grain exchanges in opposition to Federal inspection, the results of the investigations of this department do not indicate that either Federal inspection or Federal supervision would in any way be detrimental to the legitimate transactions in grain on any of the exchanges.

That is the complete answer, Mr. President, to those who are claiming that the Department of Agriculture desires to support a different character of bill. Further, he says:

It is clearly evident that there is urgent need—

I especially want to call the attention of Senators to that—

It is clearly evident that there is urgent need for some legislation which will bring about uniformity and reliability in the grading of grain in all markets, so that the producer will have some incentive to grow and market grain of better quality and that the consumer will get the grade that he buys. The investigations of this department during the past two or three years have led to the conclusion that a system of rigid Federal supervision will be equally as effective as Federal inspection, and likewise simpler in its operation. The department, however, stands ready to undertake the enforcement of whatever measure may be enacted by Congress to insure uniformity in the grading of grain entering into interstate and foreign commerce.

Very respectfully,

B. T. GALLOWAY, *Acting Secretary.*

"It is clearly evident that there is urgent need for some legislation." That is the key to the whole situation. The Department of Agriculture has been for years in favor of Government supervision and Government inspection. They have been in favor of it from the days of the first Secretary of Agriculture, Mr. Rusk, who reported in favor of it. The power of the grain trade has been sufficient to prevent any legislation on this subject until the present time. Now the grain trade has come over sufficiently to indicate its willingness to allow a bill to go through that will provide for Federal supervision, and undoubtedly the Agricultural Department is certain that if we can proceed thus far and get a bill of that kind through, the inspection will follow in a very short time, as I am certain that it will; but it is evident the Department of Agriculture would favor this other only because it thinks that there is a greater opportunity of getting it through at the present time.

But, Mr. President, there is no reason in the world why, if we have Federal supervision, those same supervisors can not do the inspecting; and, as is stated by the Acting Secretary of Agriculture, there can be no legitimate reason on the part of the boards of trade against Federal inspection.

## WATERWAY FROM GREAT LAKES TO ATLANTIC OCEAN.

Mr. TOWNSEND. Mr. President, my excuse for occupying a few minutes of the Senate's time to-day in discussing the proposition of an ocean waterway from the Great Lakes to the Atlantic by way of the Welland Canal and the St. Lawrence River is not alone to call attention to the theoretical value of such a project, but because it is a peculiarly live question in Canada now, and the highest interests of both countries demand a thorough knowledge of present conditions.

It is perhaps unnecessary for me on this occasion to occupy any time in demonstrating the fact and importance of transportation. The history of its development has been the history of civilization. From the time when man produced more than he consumed and desired other than what he himself created the means of transportation became necessary to commerce. Indeed, so intimately are transportation and commerce related that they can not exist separately. Commerce thrives only where transportation facilities are adequate, and transportation exists only where commerce is possible. This coordinate relation has been so inseparable that it sometimes seems as if the two were of equal primal importance. The great truth is, however, no matter how it may be involved, that commerce is the principal thing, but transportation is a necessary incident thereto. It is one of the main objects of government to promote commerce, and inasmuch as suitable and sufficient means for facilitating it are essential, transportation becomes the legitimate object of governmental concern and action.

The profits and losses of business have a direct relation to means of transportation. If these means are reasonable and adequate, there is likely to be a profit; if they are unreasonable and inadequate, there will always be unprofitable business, if there is any at all.

In what I may say I shall have in mind at all times the fact that transportation is the servant of commerce, but a necessary one, and entitled to proper compensation. The better the servant the greater compensation to which it is entitled; and, reversely, the greater the compensation the more efficient the servant should be. I shall not attempt to demonstrate at this time whether it is over or under paid. I shall briefly show what compensation it receives in comparison with other charges paid by the people whom it serves, and with the sole object of demonstrating the need of its development in the river and harbor branch. For some tables and statistical statements I desire to acknowledge my indebtedness to a monograph issued by the River and Harbor Congress, through Mr. S. A. Thompson. Its accuracy is vouched for by that distinguished and reliable waterway authority, the junior Senator from Louisiana [Mr. RANSDELL], so I quote liberally and confidently from it.

In order that the figures I shall give may be understood in their application to improved transportation facilities it is well to bear in mind that the cost of transportation enters into the cost of everything that is bought and sold. Into what we eat and what we wear. Into the construction of our homes and into everything which decorates or furnishes or preserves them. Little of commercial value exists that is not enhanced in cost to the user or consumer by the element of transportation. This cost can not be accurately segregated from the cost of production and from the profits of merchant and middleman. It must be paid, and though payment is made unconsciously and involuntarily it is nevertheless made and in the aggregate the sum is stupendous. It is to the interest of the people that such cost be as small as possible consistent with the most efficient service.

According to the Thirteenth Census, compiled under its competent director, E. Dana Durand, there was collected in duties and customs upon imported merchandise by the United States for the fiscal year ending June 30, 1907, $3.84 per capita for all the people of the United States. During that same year the per capita payment for railroad transportation on merchandise alone was $30.96. The Government receipts from all sources in 1907, save from the sale of bonds, were $9.84 per capita. The people paid the railroads more than three times as much money for transporting merchandise as was received by the Government from all sources, less the receipts from bond sales.

During the 15 years from 1894 to 1908, both inclusive, the railroad transportation tax upon the people was $16,711,000,000 more than the total receipts of the Government outside of bonds.

From the census report for the fiscal year ending June 30, 1902, we learn that the total receipts of the United States and of all the States and subdivisions thereof from all sources was as follows:

| | |
|---|---|
| National Government | $684,526,289 |
| States and Territories | 189,165,667 |
| Counties | 199,119,468 |
| Cities | 499,080,445 |
| All other minor subdivisions | 219,304,262 |
| Total | 1,791,895,522 |

The report of the Interstate Commerce Commission for the same period shows that the gross receipts of the railroads of the United States were $130,808,374 more than all public receipts, or a total of $1,922,703,896.

In the year of 1906–7 the railroads of the United States were paid only $5,268,812 less than the total revenues of France, the United Kingdom, Germany, Italy, Spain, Belgium, Austria-Hungary, and the Netherlands combined.

I have thus far spoken only of rail transportation. The census report shows that for the calendar year of 1906 the amount paid for water transportation in the coastwise, lake, canal, and river service in the United States was $294,854,532. This amount does not include lighterage and harbor work nor the amount paid for ocean traffic to and from foreign ports. It is estimated the latter amounts to $300,000,000, and thus we have in round numbers a total cost of water transportation of about $600,000,000.

It is impossible to obtain the exact cost of the transportation of the country's merchandise over wagon roads. It is known that the total tonnage handled by rail and water was, in 1907, about 1,100,000,000 tons. At least 600,000,000 tons of this traffic was hauled by wagons to rail and water, and at least 200,000,000 tons more found its way to market by wagons without passing over either rail or water. This would make a total of 800,000,000 tons of traffic handled by wagons. The average haul was 8 miles. It has been stated on seemingly good authority that the cost of wagon traffic is 25 cents per ton-mile. Applying this price, we have $1,600,000,000 as the total transportation cost of wagon-hauled merchandise.

Tabulating this we have:

| | |
|---|---|
| Railway transportation in United States in 1906–7 | $2,875,689,520 |
| Wagon transportation in United States in 1906–7 | 1,600,000,000 |
| Water transportation in United States in 1906–7 | 600,000,000 |
| Total | 5,075,689,520 |

From this I deduce that the per capita cost for supporting every form of government in the United States, from the road districts in a township to the National Government, in 1906–7 was less than $20, while the per capita cost for transportation for that fiscal year was about $60. So that, measured in terms of taxation, the transportation problem is by far the largest one imposed upon the people.

But perhaps the most illuminating comparison that can be made is that between the cost of transportation and the value of the things transported. Unfortunately I can not find statistics for exactly the same years. The cost of transportation which I have given is for the fiscal year 1906–7, while the merchandise value is for the census year 1909, the nearest date to 1907 for which I can obtain values. My determination of farm products sold is, I desire to admit, only an estimate, but I have given transportation the benefit of any doubt, and my figures of the actual amount of such products sold are possibly too high.

| | |
|---|---|
| The value of all farm products sold in 1909 was | $6,373,748,560 |
| The value of all American manufactures | 20,672,052,000 |
| The value of all mining products | 1,238,410,322 |
| The value of all imports | 1,311,920,224 |
| Total value of all articles transported | 29,596,131,106 |

We have found that the total transportation cost to the people of the United States was $5,075,689,520. Now, it is fair to assume that this cost in 1909 was at least $6,000,000,000. By comparison it is discovered that for every dollar's worth of merchandise marketed more than 20 cents is consumed by transportation.

I have said this much as a preface to the special plea I propose to make for the improvement of waterways, and particularly for the speedy and intelligent improvement of the natural watercourse extending from the head of the Great Lakes to the Gulf of St. Lawrence, an improvement having for its object the enlargement of that waterway to accommodate ocean-going vessels in their voyage from lake ports to foreign ports and for the benefit of transportation.

To the Great Lakes the greatest commerce of the world is tributary. The fertile fields, the exhaustless mines, the largest manufactories, and the mighty forests of the most productive regions of the United States and Canada would find their natural outlet to market over this waterway. The commerce possible to this course would exceed in one year the total commerce which the most optimistic estimator predicts will pass through the Panama Canal in 10 years. Last year there was locked through the Soo Canal more than 79,000,000 tons of freight. Much of that tonnage was destined for foreign shipment and much for consumption on or near the Atlantic seaboard. This had to be loaded onto the lake boats and carried to Buffalo or other Lake Erie ports and there transferred through elevators to rail cars or to the Erie Canal boats, and hauled to New York or other seaports where it was again transferred either for shipment abroad or to vehicles engaged in the domestic trade. The cost of handling in these transshipments was either destructive of reasonable profits to production or, what is more likely in many cases, both consumption and production were unwisely burdened.

It does not require a professional economist or an expert traffic man to show the economy which would result to the stupendous industry of the Middle West of the United States and Canada if the burdens of reshipment were removed and cargoes could be loaded at lake ports and unloaded at the ultimate point of destination, and this benefit would be increased by the similar advantages resulting to inbound freight from the near Atlantic coast and from foreign ports.

We are about to open the Panama Canal, and by it we have shortened the distance between our two seaboards by 8,000 miles. With the Welland-St. Lawrence oceanway completed, the center of population and production of the United States and Canada will have easy and favorable water communication not only with the far West, which will have been dissolved into the Far East, but with the Pacific States and Provinces as well, and those States and Provinces, which even now are looking for greater markets and wider opportunities, will load their argosies for ports on the Great Lakes, whence their cargoes will be distributed throughout the Central West.

But these benefits, coming directly from the actual use of the ocean waterway, would not be the only ones enjoyed by industry. Such a waterway would produce the result which has always flowed and which always will flow from the creation of water transportation, viz, it will cause a reduction of rail rates and an improvement of rail facilities from all points on even remotely competitive rail lines.

One of the great benefits which will be derived from the Panama Canal and which would flow from the project I propose would be a proper distribution of freight between rail and water. The railroads are hauling freight which can and ought to be carried by water. It can be more economically handled by boat, and by hauling such freight over the railroads much tonnage which can be profitably handled by rail is retarded and an economic waste is entailed upon industry. A natural division of freight will occur; better results not only to business but to the carriers will ensue.

In order to impress with practical effect the financial benefit to Lake and coast-bound shipping flowing from such an ocean waterway—for this would be making ocean ports of Lake ports—let us see what are the actual Lake and rail rates today. The Lake rates on freight passing through the Soo locks in 1907 was eight-tenths of 1 mill per ton-mile, while the average rail rate of the United States in that year was 7.82 mills per ton-mile. In other words, the rail rate was more than nine times higher than the Lake rate. Think of the possibilities for saving to producers and consumers resulting from the reduction, approximately to water rates, of the freight on the vast tonnage now charged with the rail rate. That this amount of saving would grow no one acquainted with the industrial and commercial possibilities of the United States and Canada would dispute. Not only would rail rates be reduced, but water rates on such a waterway would also be lowered. Many Lake boats which now run half the year and then tie up for the closed-navigation season would go down to sea and engage in the coastwise trade, and thus benefit the coast and intercoast shipping. Some of the present Lake boats are not fitted for ocean traffic, but every boat built after the waterway is decided upon would be constructed for ocean service. Thus not only will Lake carriers be benefited, but the carrying charge will be reduced through competition. But these benefits are not all that would come from this project.

The Middle West has fuel, the bulk of the Nation's raw material, and it contains the center of the population of Canada and the United States. The Lakes are within an hour of that center to-day. Why should not the regions of the Lakes be the very center of manufacture and distribution? When ocean vessels dock at Lake ports those ports will become what natural conditions will compel them to become, viz, such centers of production and distribution. Economy enormous would thus be effected, and every section of the country would thereby be benefited. This is not an idle vision of an enthusiast. It is but the statement of an invariable rule, demonstrated by every community which has had the superior advantages of ocean transportation. River and lake transportation are of great value to any city, but ocean transportation is of the very greatest importance, and the plan I advocate means, of course, the conversion of the Great Lakes into the ocean so far as shipping is concerned.

If a demonstration of this fact is necessary, I invite your attention to the map of the United States. Almost without exception, the most prosperous, thriving, and growing cities and sections of our country are those on and adjacent to great waterways. Along the Erie Canal are more great cities than are found in a dozen of the inland States combined. Can I well overstate the tremendous impetus that will be given to the Middle West by the construction of this ocean way?

I believe that such ocean way would have a beneficial effect upon our merchant marine. Our reconstructed Lake fleets would naturally add to the number of ships on the ocean, and certainly every thoughtful, patriotic American desires the restoration of the Stars and Stripes upon the sea. Many of our Lake boats could readily be converted into colliers. Why, the expense for colliers in our naval program could be largely avoided and the money thus saved would go far to construct this waterway.

I have already consumed too much time in demonstrating the axiom that an ocean way for the largest ocean vessels between Duluth and Montreal would be of almost inestimable value to the industry and commerce of the United States and Canada.

I will now discuss the plan itself, its probability, and feasibility.

That such a waterway will be constructed in time, either by Canada alone or by Canada and the United States, I have no doubt. Inasmuch as it must be for the mutual use and benefit of both nations, inasmuch as the waters to be improved and used are international, I hope that this great work may be performed at the joint expense of both and under such plans as will result in the greatest good to both.

Canada and the United States, with only an imaginary dividing line for 4,000 miles between them, inhabited by people from the same race, possessed of the same ideals for the general good, the habitable portions of both lying in the same zone and bounded on the east and west by the same oceans, these two great nations are equally interested in the extension of the Atlantic to the Lakes. At a time when the cost of living is so high these nations are alike interested in reducing to the minimum the expense of transferring products from the producer to

the consumer. Canada and the United States are or should be vitally interested in connecting their most abundant resources with their best possible markets.

So believing I introduced into the Senate at its last session a resolution authorizing the President to enter into treaty relations with Great Britain or the Dominion for the purpose of converting the boundary waters between the United States and Canada into ocean waterways. The resolution passed the Senate unanimously and went to the President. He referred it to the Secretary of State, who, under the act of January 11, 1909, creating the International Joint Commission, submitted certain questions relating to the proposed project to the Canadian Government, and if that Government approves these questions, either as they are or as they may be amended by the two Governments, they will be given to the said commission for investigation and report. If such report is favorable I shall hope and believe that this great enterprise will be undertaken and completed. I trust that the matter will be given the attention its importance deserves.

The Dominion of Canada is alive to the needs of ocean connection with the Lakes, and several projects are under consideration, and whether the United States acts in the matter or not, Canada probably will construct such a connection.

One Canadian project is from the Georgian Bay to the Ottawa River and thence to the St. Lawrence. Another is by canal from the lower end of Lake Huron to Lake Erie, and thence through the enlarged Welland Canal to Lake Ontario, and thence through locks and dams down the St. Lawrence to Montreal. I am not an engineer, but my investigation and study of reports of distinguished engineers who have reported on these projects compels me to believe that these two routes taken each in its entirety are unwise and the former route is also impracticable. The cost to construct the Georgian Bay project would be not less than $200,000,000 and if, after construction, its operation should prove impracticable the injury to Canada would be almost irreparable, and the ocean way would be postponed indefinitely. I am clear that this project would prove unwise. Almost the whole distance from Lake Huron to the St. Lawrence the course of this proposed way would be restricted.

According to a Canadian Government report on this project made in 1908 it would require three days for a boat to go from Georgian Bay to Montreal. According to such report this course would contain 116 curves, 77 of which would be of a 1-mile radius, while the route following the natural flow of the water from the head of the Lakes to Montreal would contain but one short curve, and that is at Neebish, in the Soo River. Sharp curves are a menace to navigation, and when they occur in narrow channels they are prohibitive. Furthermore, the water supply available for the summit of this route as proposed is inadequate, and probably no expert will be heard to claim that sufficient of such water can be obtained to meet the demands of the commerce which the people of Canada have a right to expect would seek this way to market. It at best would be but a limited course and could not be made to meet the great possible demands of the Dominion's commerce, let alone the needs of the United States, and its open season would be much shorter than that of the natural course.

I know of no man who has given more intelligent study to this great question than Mr. D. B. Detweiler, a gentleman of great experience and ability at Berlin, Ontario. He has been instrumental in securing for its consideration the most eminent engineers of Canada and the consensus of his and their opinion is adverse to the Georgian Bay project.

It appears that this route is advocated principally by promoters of private enterprise, and yet this improvement is one that private interests should not make nor control. It is not even small enough for national control. It is of international importance, and ambitious speculators should not be permitted to traffic in a matter so vital to the interests of a continent.

A canal from Lake Huron across to Lake Erie would be unwise. Already a 22-foot channel exists from Lake Huron to Lake Erie, and for the greater part of its course the sailing is open water and without sharp curves. This course could be enlarged into a 35-foot channel for less expense than the Huron-Erie Canal could be constructed, and the time required to travel the natural course improved would be less than that which would be required to make the all-canal route. Furthermore, Detroit and Toledo are of sufficient importance commercially to retain their positions on the chartered ocean route.

I have criticized these two projects not because I am improperly prejudiced against them or for any other reason than the belief that they are impracticable and that a practicable and feasible route can be established. The Great Lakes, as I have stated, constitute the basin into which the commerce of the great middle Northwest can naturally be drained. Any ocean waterway should include every one of these Lakes. To every one of them vast possibilities of commerce are tributary. They all have a common outlet to the sea. That outlet is the St. Lawrence River, with its actual source in Lakes Michigan and Superior. At various places in it there are shoals and rapids and falls. All of these obstructions have been overcome for the passage of boats drawing not to exceed 14 feet of water; some for the passage of 22-foot-draft boats and some for 25-foot boats. What has been done for boats of small draft can be done for the largest ships. The water is there and money back of engineering ability can convert that outlet into an ocean waterway without disturbing the lake levels. It is highly important, as I have suggested, that the level of the Lakes should not be disturbed. With proper compensating works this proposed plan would not affect that level. A deepening of the outlet of Lake Huron into Lake Erie to 35 feet would, in my judgment, reduce slightly the waters in Lakes Michigan and Huron, but this effect could easily be overcome by compensation sills constructed at reasonable cost in the upper St. Clair River and at the head of the rapids in the Niagara River above the Falls. The water now going to waste can be utilized to float a greater commerce than enters and clears at our entire seaboard to-day; greater than all that will lock through the Panama Canal plus all that passes in and out of Suez. That this project is possible, that it is more practicable than any other proposed plan, no properly informed man will deny. Then what stands in the way of its completion?

There are four great possible obstacles to overcome: The railroads, international complications, the cost, and sentiment. I will discuss these briefly in their order.

It is a strange fact that certain railroad interests seem to have opposed practically every great proposition to improve water transportation facilities. I say "strange," for history has demonstrated over and over again that improved waterways have increased traffic not only on the water improved but also on the competing railroads. Improved transportation facilities have created traffic. Have railroads suffered from the improvement of our rivers and harbors? On the contrary they have profited by such improvements. Even the electric lines which have paralleled our steam roads have not as a whole had a bad effect upon the income of the latter. The Panama Canal, if it shall carry all the tonnage which its advocates claim, will not, in my judgment, lessen the legitimate rail profits. And yet it is my honest opinion that the railroads oppose river improvements; they gave no aid to the Panama Canal project; they will not encourage the Welland-St. Lawrence ocean waterway. The railroad-owned boats on the Lakes will not ask that this course be constructed; but with no malice toward them and with no desire to injure them, I still insist that the waterway shall be constructed. It will be constructed. I hope that railroad men will recognize the inevitable, including its final benefit to them, and lend a hand.

There are international difficulties to overcome. Unfortunately, as it seems to me, there is not a universal good feeling for the United States in Canada. Political divisions among our neighbors at the north are made on the question of closer relations with us. The treaty of 1854, known as the Elgin treaty, was in force at a time when the conditions in both Canada and the United States were most abnormal. This country was in the throes of a great civil war, and Canada became the asylum for southern slaves, northern bounty jumpers, and slavery sympathizers. The bitterness engendered by the Revolutionary and 1812 Wars between England and the United States was not yet extinct. The termination of the Elgin treaty came at the close of the American rebellion and the relations between Canada and the United States were greatly strained. The feeling against the United States has been kept alive to some extent, and it is still conjured with by some politicians. When all other arguments fail a suggestion is made that the United States desires to dominate the Dominion and eventually to annex it. Of course, no sensible man believes that. Commercially the interests of the two countries are practically identical. Politically they are separate entities, and should remain so. I know there is absolutely no desire on the part of the United States or of any considerable number of its people to acquire Canadian territory or to secure any advantage over that country. It is strange that any party in any country can make political capital out of such shadows. The Great Lakes, their connecting waters, and to a great extent the St. Lawrence River are international. Their development would be equally beneficial to both countries. They can not be improved to the extent of their highest usefulness without the mutual consent and cooperation of both. That consent and cooperation should be secured and established at the beginning. Let the two nations work together as sane, intelligent, honest business men would do and the result will be of untold benefit to both.

It is probably true that the most expensive part of the construction of this project would be in territory wholly Canadian, and I would like to see some equitable arrangement made whereby the United States would materially contribute to this cost; but whether such an arrangement can and will be made, it is also true that great power-developing possibilities lie in wholly Canadian waters, and these can reduce if they can not be made entirely to cover the cost of the improvement. I shall speak of this again presently.

Whatever feeling there is antagonistic to the closest international relations between these two great English-speaking neighbors should be allayed, and, with the class of patriots on both sides of the boundary line who are working for the common good of both countries in earnest, it will be allayed, and all petty politics and unworthy prejudice will be submerged in the general demand for one of the greatest material benefits which ever has or ever can come to these sister nations.

The great practical question which will confront this project will be its cost. This will be a business proposition almost exclusively, and it is clear that the project must fail unless it can be demonstrated in advance that it will pay, measured by dollars and cents.

The United States has, by surveys and exact estimates, shown that to improve all the waters of the Great Lakes, from their heads to Buffalo, so as to accommodate boats drawing 25 feet of water, would cost $25,938,367. Increase this amount threefold and we would have more than the cost of a 35-foot channel. Of this estimated amount eleven and one-half millions were to be spent in improving the Detroit River, and since such estimate was reported that improvement has been made.

Already the Canadian Government has provided by way of appropriation or authorization for $50,000,000 to be expended in enlarging the Welland Canal locks to accommodate vessels of 30-foot draft, and I trust the report is true that it has wisely provided such improvement shall be made with a view to ultimate enlargement to a 35-foot depth.

What the improvement of the St. Lawrence from Lake Ontario to Montreal will cost I have no means of telling. An accurate survey should be made to determine that question. I do know, however, that a conservative estimate of the potential energy which could be developed by improving this stream is 4,000,000 horsepower. This power could be sold for at least $15,000,000 a year, and this would mean a 5 per cent return on a $300,000,000 investment. The St. Lawrence improvement will not cost $300,000,000. I do not believe it will cost two-thirds of that amount, but whatever the cost is it can be largely recouped in power value.

A few years ago a private corporation came to the American Congress for a permit to construct a power dam at the long Sault Rapids, and proposed not only to construct this dam in the interest of ocean navigation by building and operating adequate locks but was even willing to pay something for each horsepower of energy developed. The construction of these power dams would create deep pools or lakes over the shoals and rapids which would permit free open sailing for deep-water boats and all without expense to the Government, and the locks of such dams would be fewer and less expensive than those of any other route.

I have stated that these waters proposed to be improved are subject to the joint control of Canada and the United States. No change in them by either nation detrimental to the other can be permitted. The effect on lake levels, on power possibilities, on navigation, on the comity of the nations themselves must be observed and scrupulously regarded. Is it not clear, therefore, that the first great step to be taken is in the direction of closer and better relations between these two countries? With united harmonious action on this great plan all opposition of any importance would disappear and the greatest industrial and commercial project of the world would be consummated.

In the meanwhile, and until such joint action is secured, every improvement along this waterway should be made having in view the ultimate construction of a 35-foot channel from Duluth and Chicago to Montreal. The construction of great public works without due regard to inevitable future development is the folly of nations. It is certainly so in the United States, as witness our ordinary river and harbor improvements and our public-building construction. We scarcely complete a project before the needs for which it was built demand an enlargement, and this is secured at unreasonable expense. It will be economy to build for the future, for that future contains an unobstructed waterway for ocean leviathans from the Great Lakes to the Atlantic over nature's natural course.

Finally the element of sentiment exists, and it is by no means the least obstacle to overcome. Fortunately for highest civilization the sense of beauty, natural and artificial, exists in man. Throughout the civilized world there are found societies organized for the preservation and improvement of natural objects of beauty. In many places these objects have been capitalized by business genius and made the source of personal and corporate income. The marvelously beautiful scenery of the St. Lawrence River has attracted annually thousands of people, and steamboat companies have found the intricate navigation of that stream most profitable. These companies will not favor any project to utilize the St. Lawrence for commercial purposes, lest their profits should be disturbed. Many tourists who have been thrilled with the wonderful rapids and falls of that great river will see in this improvement only the desecration of nature's handiwork for financial gain.

No man to the extent of his ability has a higher appreciation or greater admiration for natural beauty than I have. I would not lay mercenary hands on any object of great natural beauty which is within the reach of the people if that object is the only one of its kind or if the reasonable ethical benefits which can be derived from it equal or outweigh the good which can come from its practical commercial use.

I want to preserve the Niagara Falls because there is but one Niagara. I voted to preserve the Hetch-Hetchy Valley because I thought that San Francisco could get a sufficient supply of equally pure water elsewhere; but, sir, when I measure the good that would come to the millions of the people in the United States and Canada through the development of an ocean way down the St. Lawrence and contrast that with the pleasure which would come to the comparatively few who are financially able to purchase a ticket on a St. Lawrence steamer; when I realize that reasonable prosperity is the prerequisite to the highest ethical enjoyment; when I understand also that this proposed improvement can be made and still preserve the most beautiful natural scenery in this river, as witness the fact that the Sault scenery was undisturbed by the construction of the Sault Canal and locks; when I realize that with this constructed improvement tourists can travel the river both ways, up as well as down; when, in fact, I consider the project as it really will be, I unhesitatingly commend it.

Throughout the United States and Canada are found as beautiful falls and rapids as those of the St. Lawrence, and they are not necessarily related to mighty possibilities for real practical industrial and commercial good.

Let nature lovers view this matter in all of its phases, and it seems to me that but one conclusion can be reached, and that is the one which recognizes an improvement that promises a degree of comfort and prosperity to the people unequaled by any other proposition of the times.

Mr. President, I have called the attention of the Senate to this great project because it is great. Greater than the Panama Canal, which, however, will supplement it; as great as the improvement of all the navigable rivers of the United States and Canada combined, because it furnishes a necessary, cheap, and efficient highway to and from the greatest center of natural resources of the world. It removes to a great extent the barriers between production and consumption and makes it possible for productive genius and constructive enterprise to enrich and bless the people of these two great countries. If by calling the attention of the Congress and the country to this matter I shall have induced thought and discussion, I shall be content, for it seems to me that an intelligent understanding will compel the improvement and use of a facility which for a century has been neglected for lesser things but which has greater possibilities for trade and commerce than all others.

## WOMAN SUFFRAGE.

The PRESIDING OFFICER (Mr. RANSDELL in the chair). The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which is Senate joint resolution No. 1.

The Senate resumed the consideration of the joint resolution (S. J. Res. 1) proposing an amendment to the Constitution of the United States extending the right of suffrage to women.

The PRESIDING OFFICER. The pending question is on the amendment offered by the Senator from Mississippi [Mr. VARDAMAN].

Mr. THOMAS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Chamberlain | James | Oliver |
| Borah | Chilton | Jones | Overman |
| Bradley | Clapp | Kern | Page |
| Brady | Clark, Wyo. | Lane | Perkins |
| Brandegee | Dillingham | Lea, Tenn. | Pittman |
| Bristow | Gallinger | Lee, Md. | Poindexter |
| Bryan | Gronna | McCumber | Ransdell |
| Burton | Hollis | Myers | Reed |
| Catron | Hughes | Norris | Robinson |

| | | | |
|---|---|---|---|
| Shafroth | Smith, S. C. | Thomas | Vardaman |
| Sheppard | Smoot | Thompson | West |
| Shields | Stephenson | Thornton | Williams |
| Smith, Ariz. | Sutherland | Tillman | |
| Smith, Ga. | Swanson | Townsend | |

Mr. OVERMAN. I desire to announce that my colleague [Mr. SIMMONS] is absent on account of sickness. He is paired with the Senator from Minnesota [Mr. CLAPP].

Mr. TOWNSEND. The senior Senator from Michigan [Mr. SMITH] is absent on important business. He has a general pair with the junior Senator from Missouri [Mr. REED]. This announcement may stand for the day.

Mr. REED. I announce the necessary absence of my colleague [Mr. STONE] on account of illness. I make this announcement for the day.

Mr. SHEPPARD. I announce the unavoidable absence of my colleague [Mr. CULBERSON], and will state that he is paired with the Senator from Delaware [Mr. DU PONT]. This announcement may stand for the day.

Mr. LEA of Tennessee. I desire to announce the necessary absence of the junior Senator from Ohio [Mr. POMERENE] on business of the Senate.

The PRESIDING OFFICER (Mr. WEST in the chair). Fifty-four Senators have answered to their names. There is a quorum present.

Mr. WILLIAMS. I desire to have the Secretary read the letter I send to the desk.

The PRESIDING OFFICER. Without objection, the Secretary will read as requested.

The Secretary read as follows:

OFFICE NATIONAL CONGRESSIONAL COMMITTEE OF THE NATIONAL AMERICAN WOMAN SUFFRAGE ASSOCIATION,
*Washington, D. C., March 16, 1914.*

MY DEAR SENATOR: In view of the fact that a number of telegrams have been sent to various Senators with reference to the time of taking a vote on joint resolution No. 1, will you permit me to say it has not been the policy of my committee, representing an organization of approximately half a million women, to ask these half a million individuals to wire you their ideas with reference to your method of procedure? We feel that it would be unfair to ask women in distant States who are not closely in touch with the situation here to decide when the Senate should vote. We feel such requests would be manifestly unfair to you.

We are legally authorized by our organization to represent that organization at Washington, and the matter of advising with you upon the management of the pending resolution is entirely in our hands, and, with the exception of having asked a few of the State presidents whom we have fully advised from day to day to communicate with their Senators, we have sent out no request that you be deluged with telegrams or letters.

Will you permit me to say to you again that I believe it is my duty to urge that our measure be voted upon at the conclusion of the speeches, for if it should happen that we should pass this opportunity and a vote should not be taken at this session the cause of suffrage would suffer an irrevocable setback, and we do not feel that this chance should be taken when the only gain would be added publicity for suffrage demonstrations to be given in May. Those demonstrations will be given throughout the United States under the direction of our own State organizations, but they will serve their purpose without the sacrifice of one jot of advantage gained here at Washington.

Thanking you in advance for your consideration of the views of my committee upon this matter, I am,

Yours, most sincerely, RUTH HANNA MCCORMICK,
*Chairman.*

Mr. SHEPPARD. Mr. President, I send to the desk a telegram I have received from the president of the Texas Woman Suffrage Association, and I ask to have it read.

The PRESIDING OFFICER. The Secretary will read the telegram.

The Secretary read as follows:

SAN ANTONIO, TEX.

Senator SHEPPARD,
*Senate Chamber, Washington, D. C.:*

We wish a vote on suffrage question promptly.

ELEANOR BRECKENRIDGE,
*President Texas Woman Suffrage Association.*

Mr. LANE. The joint resolution is now before the Senate and open to discussion, I understand.

The PRESIDING OFFICER. It is.

Mr. LANE. I wish to make a few remarks. In what I am going to advance I will not state anything which I have not often said before. The State in which I live has already adopted woman suffrage, and women vote there now on full equality with men. We have learned to have no fear of their participation in matters of public concern. In fact, we find that the women are as intelligent as are the men in their consideration of public affairs. We find that their interest is as great as that of the men, and that it arises from the same motives. I do not see, as a matter of fact, how anyone can make any question concerning the right of women to vote or their ability to do so if they care to exercise the franchise.

I have jotted down a few remarks, that they might be consecutive and in order that they might not consume too much time. They are principles in which I fully believe, and of which I myself have no doubt. I do not blame anyone, nor do I question his right to differ with me; and there are problems in certain portions of this country with which I am not familiar and upon which I make no criticism and acknowledge the superior information of those who have had a greater experience than mine. Yet I can not see, in the large way as I view it, that the same right given there to women would not inure to the general benefit the same as in every other section of the country; but, as I said, that is a matter upon which I do not make any criticism, nor do I wish to offer any advice. I shall refrain from doing so.

I believe that woman is man's full and equal partner in life and by right is justly entitled to a full and free participation with him in all of its affairs. By her we come into this world, and for aught I know, again dependent upon her willingness to undergo suffering for us, the measure of our gratitude for what she has already done for us may in part lie our best hope for future happiness. Having nourished us into being by parting with the very blood of her blood and bone of her bone, and having done so lovingly and with the prayer in her heart that we profit thereby to the fullest extent, what manner of creatures would we be or what hope of reward ought we to expect in the hereafter if we deny her the enjoyment of every privilege of which we avail ourselves? I have not the slightest fear that in rendering unto her the right to a voice in the conduct of public affairs that we incur any risk whatever. Nor would I be afraid, for that matter, to trust all legislative business to her. In some respects she is even better fitted for the work than we are. She possesses by Divine dispensation, for instance, the first and greatest requisite which would qualify her for a seat in the Senate, which is the use of the tongue and vocal cords, and I believe she could hold her own with the most verbose Member of this body, although I am willing to concede that her physical endurance might not be equal to the strain. I do not believe that the affairs of the people would suffer from any lack of judgment on her part, nor do I believe that she would make any more mistakes in legislation than we do, for the reason that it can not be done; it is not possible.

If after having secured the right to vote, however, it should prove that woman does not use it as wisely as we, I would be willing to assist in taking it away from her.

I do not consider that we, in granting her this franchise, confer any favor upon her at all, it being my opinion that she is now and always has been as much entitled to it as man ever was. Her interest in the management of Government affairs is as great as any man's can possibly be. In many ways, from her very nature, it is even greater.

A woman's love for and her interest in the welfare of her offspring exceeds that of man; for that reason if for no other she would work to secure the best conditions possible to obtain for their benefit.

Man's interest in his offspring is not so great as woman's, nor can it be, nor will it ever be, nor has it ever been in the past.

Into the world she brings them, frequently at the cost of her happiness or even her life.

Her great mother love will be a bar to bad legislation if she is allowed a voice in passing upon it. No being who has given of her life to nourish another into existence is going to do anything or assist in doing anything which will bring harm or suffering upon it after she has created it.

For these if for no other reasons I would not fear the votes of women on any question of public concern.

Some have expressed a doubt of her ability to master the duties which would devolve upon her. In answer I would say that ever since "this old round world began" she has stood elbow to elbow with man and helped him without stint to make it habitable; in war, in peace, in famine, through drought and flood.

In the heat of the desert and in the deathly stillness of the life-extracting cold of the north she goes with him, lives with him, and fights and lives or fights and dies with him and for him.

I was reading an account in the papers yesterday that after the battles which they are having in Mexico among those found among the dead were women who had been fighting by the side of husband, brother, father, or friend, willing to die or to go anywhere with them. To dive down into hades, farther than man has the nerve to go, or ever will, a woman will go for her offspring, and the question arises whether, with that love in her bosom, that unselfishness, it does not seem to be too small an affair for men to stand here and argue against granting her every right that he obtains.

We have not outgrown the ideas of our ancestors. Along in the sixth century our forebears, the early fathers of the Chris-

tian church, debated with great gravity and much dignity as to whether or not woman had a soul. At the council held at Macon, after much discussion such as has been indulged in here, it was voted upon, and woman won out by a majority of one vote. That was a great concession for man to make, was it not? It was quite an event in the sixth century; and now here in this day we are questioning her right to participate with ourselves upon full equality in the affairs of men. Whether we will decide it by one vote or not I do not know. I rather suspect that we will not be quite up to the mark set by the old fathers at Macon.

It has been urged that contact with political affairs would degrade woman and rob her of some of her charming womanly qualities. In answer to this argument I would say that when politics are carried on in a manner which will bring a blush of shame to the cheek of a modest woman, they are to the bad, not alone for her but for the men and the country as well, and for the sake of decency they can not be changed too quickly. Anyone who questions woman's fitness to legislate as well as men should in justice be compelled to come here and "sit out" some of the debates such as those upon the tariff or currency questions or some other economic problem affecting the interest of the people. He would find one side of the Chamber engaged in prophecies dire, which seem to be founded on the fond hope that the devil will bring a blight on the prosperity of the country in punishment for its not longer following their leadership, the while upon the other side there is exhibited a confiding trust in God and good luck that measures which carefully hobble many issues of vital importance and partially relieve others less so will prove a panacea for deep-grounded economic errors of the past long endured, which they will not. He would conclude, I think, that if a suffragette convention was turned loose on the scene it would not hurt and might, at least, add interest to the proceedings, if nothing else.

When it comes to a question of cool nerve and endurance of pain, woman will be found to be the superior of man. This fact is known to every surgeon.

It is my opinion that the fear of the southern Senators of women's votes is groundless. Indeed, I believe that they can and will prove of the greatest help to the men, and I have every confidence in their intelligence, their patriotism, and their ability to help solve a vexing and momentous question.

I am not one of those who fear that women can not fill positions of public trust, for I had the honor at one time to appoint two women, one as the head of an important department and the other in a most difficult position to fill. In both cases the services rendered by them were of the highest type and successful in every respect. If the conduct of all of the other departments of that city had been equally as well conducted, the people would have been saved much money and a higher type of municipal management would have been established.

In regard to the granting of the right to vote causing an increase of divorces, I have to say that divorces are increasing all over the world and marriages and births growing fewer in countries not only where women do not vote but where men are restricted in their suffrage as well. This is recognized to be due to economic conditions to a large degree, and to some extent to the restrictions and double standard of morals and living which is applied between the sexes. Divorces will no doubt continue to increase whether women vote or not, but the cause for the condition must be sought in some other source than suffrage.

I could urge many reasons for bestowing the ballot on women, but will not do so. Recognizing her, as I do, as my full partner in life—and, I hope, in the hereafter—I am bespeaking for her an equal share in the common property, as I feel it my duty to do.

Mr. THOMAS. Mr. President, a number of Senators have informed me of their desire to address the Senate upon the pending resolution before a final vote shall be taken either upon the resolution or the amendment of the Senator from Mississippi [Mr. VARDAMAN]. Inasmuch as I observe the absence of all of those Senators from the Chamber, and as I feel it incumbent upon myself as chairman of the committee to say something upon the measure, perhaps it is as well that I should discuss it now as to reserve the right to close the debate upon it.

I may say, Mr. President, by way of preliminary, that this resolution has been made the subject of consideration through the persistent effort of the Senator from Arizona [Mr. ASHURST], acting in behalf of and with my full support as the chairman of the committee, and actuated by the almost universal request of those directly interested for its disposition at the earliest possible moment. Acting upon this general and continued expression, he has frequently attempted to make this joint resolution the subject matter of discussion, and finally succeeded. The fact, therefore, that it is now up for final consideration is due both to the outside demand for it and to the persistence of the Senator heretofore having the measure in charge.

It is true, as the record abundantly discloses, that a very large and organized portion of the equal suffragists of the Nation have more recently suggested the expediency or propriety of the postponement of a final vote until some time in the ensuing spring; and, in justice to the Senator from Arizona, it should be said that his own view has to some extent recently concurred with that desire, while I, as the chairman of the committee, think otherwise. My belief is—and in saying this I voice the sentiment of the National Suffrage Association—that it is better to press the matter to an early determination, without reference to the result, inasmuch as it has been made the pending business of this body. I believe, Mr. President, in this policy because I think it is the policy which should be pursued in promoting any great question in which a large body of the people are directly interested. There never has been a change in existing conditions or an addition to a given régime which succeeded immediately or which did not succeed only after and because of its continued and persistent advocacy. I know of no other way in which to push to success any great political question, or, for that matter, any other object affecting us in any department of life.

For more than a quarter of a century, Mr. President, those who were behind the movement for the election of Senators of the United States by a direct vote of the people were constantly pressing its consideration. It was not at first successful; indeed, the initial lack of success was so conspicuous that it would not have been surprising if complete discouragement had resulted instead of those renewed efforts, which were finally crowned with success. So this movement, Mr. President, beginning more than half a century ago and growing slowly at first, but growing, nevertheless, overcoming an obstacle here, overriding a supposed argument there, marching always forward and onward to that goal of success which is ultimately to crown the movement, as it has crowned all other movements having for their purpose and object the establishment of an essential political right.

Therefore, Mr. President, so far as this joint resolution is concerned, it is my deliberate judgment that the committee has acted wisely, and that the consensus of public opinion will so determine in the near future, both in pressing in season and out of season for a consideration of the joint resolution, and in pressing it, after reaching the proper place upon the calendar, for a vote which will make some present disposition of it. When I say that I mean some disposition of the measure in its present form, not expecting that the battle will have been won or lost until other struggles shall have followed this one in swift and active succession. So believing, Mr. President, I shall for a short space of time refer to some of the statements and arguments that have here been presented by the opponents of this measure and to give some reasons which, in my judgment, are conclusive both as to the expediency and as to the justice of female suffrage.

This joint resolution is in itself a simple thing; by which I mean that it clearly, concisely, and briefly embodies the proposition in the shape of a constitutional amendment providing that hereafter sex shall not be an obstacle or an impediment to suffrage in the Nation. It has been modeled after another amendment, which years ago was the subject of as serious and bitter controversy as any amendment that has ever been or that ever will be made to the Constitution of the United States. It has been so modeled, not because of any advocacy of or opposition to that amendment, but simply because the phraseology there outlined can not very well be improved upon in the effort to accomplish a similar end.

The purpose, as I have said, of this amendment, Mr. President, is so obvious that it certainly needs no elaboration. I shall therefore proceed directly to the consideration of the question itself in connection with some of the things that have been urged here against its adoption.

It has been suggested with much force that we should not impose suffrage upon States which do not want it; that each State should be permitted within itself to determine questions of this and kindred import, and that the remaining States should not by sheer force of numbers change conditions that are not desirable or welcome to States objecting.

As a matter of abstract justice, Mr. President, we can all recognize the force of that argument; but, unfortunately, it proves too much, since, if we are to accept it in its entirety, it would be and would have been an insuperable objection to any change in our organic law; for, with the possible exception of the first 10 amendments to the Constitution, I do not believe it would have been possible to have made any other, by the unanimous action of all of the States composing the Union; and the

very fact of its impossibility is doubtless the reason why we find the Constitution written as it is, the machinery of which is designed to clothe a defined majority with the power, by mutual action, of overcoming the objections of a small minority in the interest of what the majority believes to be for the general welfare and the general good.

Take the last amendment, Mr. President, to which I have already referred, and which makes a fundamental change in the method of selecting Members of this body. A number of States opposed, and doubtless at this time dissent, from the new method of selecting United States Senators; but it is a part of our organic law, nevertheless, for the simple reason that it was enacted under the forms and through the processes of the Constitution itself. If this proposed amendment is adopted, it must be adopted by the same processes, through the operation of the same machinery, working in the same direction, and unless, therefore, we depart from the scheme of the Constitution itself, we must recognize the right of three-fourths of the States of the Union to impose their will upon the other fourth whenever in the constitutionally expressed judgment of three-fourths that right is crystallized into an amendment to the organic law. So, here, when two-thirds of the Members of both branches of Congress shall say that a change should be submitted to the consideration of the States, that submission must follow, notwithstanding the opposition, however implacable, of the small minority opposing it.

Mr. VARDAMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Mississippi?

Mr. THOMAS. I yield to the Senator.

Mr. VARDAMAN. I rise, Mr. President, to make a suggestion to the Senator from Colorado. The Senator from Arizona [Mr. ASHURST] has an important engagement this evening at Philadelphia, and is compelled to leave. He desires to be present when the vote is taken upon the joint resolution; and I rise to ask the Senator from Colorado if he will not, provided no other Senator desires to speak after he gets through, ask that the measure be laid aside until to-morrow, in order that the Senator from Arizona may be present when the vote is taken?

Mr. THOMAS. I have already given the Senator from Arizona the assurance, so far as any influence I may have goes, that the vote should not take place to-day if it could be avoided, and I will be very glad, if necessary, to follow that course.

Mr. VARDAMAN. Very well.

Mr. THOMAS. I have been informed, however, by a number of Members of the Senate that they desire to discuss this proposition, among others the Senator from Missouri [Mr. REED], who is now in his seat; and if a small proportion of the Senators who have so notified me shall respond, it is to some extent improbable that we can reach a vote to-morrow.

Mr. KERN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Indiana?

Mr. THOMAS. I yield to the Senator.

Mr. KERN. I was about to ask unanimous consent for a vote on the joint resolution before 6 o'clock this evening. It was urged by friends of the measure on yesterday that on account of the absence of the Senator from Colorado [Mr. THOMAS] it would be unfair to take up the joint resolution and vote on it on that day, and because of his absence a request for unanimous consent for a vote was not urged. It was desired to take the vote on yesterday because several Senators were obliged to leave the city yesterday, and others, including myself, are compelled to leave to-day. It seems the friends of this measure do not desire a vote to-day, but I think it would be manifestly unfair to a number of Senators who are compelled to go away to-day, in view of what occurred on yesterday, when the vote was postponed on account of the absence of one Senator, to postpone it to a time when a number of Senators can not be present. Referring to the proposition——

Mr. ASHURST. Mr. President——

The PRESIDING OFFICER. Does the Senator from Indiana yield to the Senator from Arizona?

Mr. KERN. In a moment. Referring to the suggestion that certain Senators desire to speak, I wish to say that there has been nothing in the world to prevent those Senators from speaking on any day for the past several days had they so desired, and I hope an arrangement can be made by which a vote may be taken on the pending amendment and on the joint resolution itself before adjournment to-day, otherwise several Senators will be deprived of the opportunity of voting thereon.

Mr. WILLIAMS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Indiana yield to the Senator from Mississippi?

Mr. KERN. The Senator from Arizona [Mr. ASHURST] first requested recognition, but I have finished and yield the floor.

Mr. ASHURST. I wish to say, Mr. President——

Mr. THOMAS. I think I have the floor, Mr. President.

The PRESIDING OFFICER. The Senator from Colorado has the floor.

Mr. ASHURST. Will the Senator yield to me for a moment?

Mr. THOMAS. Certainly.

Mr. ASHURST. I merely wish to say that I am perfectly willing to vote to-day, and if there is any assurance that there will be a vote to-day I shall remain, of course.

Mr. WILLIAMS. Mr. President, if the Senator from Colorado will pardon me, it is, of course, the fault of no Senator that the vote has been postponed, but I think it would be very unfair to have the vote to-day unless it were to be taken almost immediately, and even then it is now almost too late to take it. The junior Senator from New Jersey [Mr. MARTINE], the junior Senator from Kentucky [Mr. JAMES], and several other Senators have to leave town at 3 o'clock to keep engagements for various St. Patrick's Day celebrations in New Jersey and elsewhere, where they are expected to make speeches, and some of the rest of us will be obliged to leave at 5 o'clock and some at 6. All of us are anxious for our votes to be recorded when the roll is called on the pending joint resolution, and I should like to secure unanimous consent that a vote shall not be taken to-day, so that Senators who have been compelled to leave town—and some of them have left the Chamber already to take the 3 o'clock train and others will have to leave soon—may have an opportunity to vote when the measure is disposed of.

Mr. KERN. A number of Senators will not be able to return to-morrow.

Mr. WILLIAMS. Some of the Senators who are leaving, as the Senator from Indiana [Mr. KERN] suggests, he himself amongst others, because he has to journey all the way to Indiana, will not be able to return to-morrow.

Mr. KERN. Mr. President, I will say that my colleague [Mr. SHIVELY] has already left for Indiana; that the Senator from Arkansas [Mr. ROBINSON] is compelled to leave for Nebraska; and that I am also obliged to go to Indiana.

Mr. THOMAS. Mr. President, if we could get a vote to-day, I would suspend my remarks right now and not say another word upon the subject, but I was informed this morning when trying to get a unanimous-consent agreement that it would be impossible to do so, because of the objection of some Senators who are opposed to the immediate consideration of this matter and who, I feel very sure, would have prevented a vote if an attempt had been made to take one yesterday.

Mr. REED. Mr. President, if the Senator will pardon——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Missouri?

Mr. THOMAS. Certainly.

Mr. REED. I think if the Senator is in that frame of mind, if he will allow the roll to be called we can close this matter out mighty quick.

Mr. THOMAS. I am perfectly willing to do that, Mr. President.

Mr. REED. I wanted to say something on this question, but I will not do so if we can get a vote.

Mr. WILLIAMS (to Mr. THOMAS). Why not ask unanimous consent for a vote now, and see if that will be agreed to?

Mr. THOMAS. Very well; I ask unanimous consent to take a vote on this matter now.

Mr. HUGHES. Regular order, Mr. President.

Mr. THOMAS. I am willing to do anything that is agreeable, but it seems to me it is impossible to please everybody.

Mr. HUGHES. Regular order, Mr. President. As I understand, the regular order is the calling of the roll on the joint resolution, if no one desires to speak. I understand the Senator from Colorado is willing to have that course pursued.

Mr. THOMAS. One or two Senators not now present expected to discuss this matter, and I am in honor bound to inform them if we are going to have a vote right off. I think that they should be present.

Mr. VARDAMAN. I hardly think, if there are Senators who wish to be heard upon this question, that it ought to be forced right now. Why can it not be agreed that no vote shall be taken to-day? Then Senators can fill their engagements and be back here to-morrow. I ask unanimous consent that no vote be taken to-day.

The VICE PRESIDENT. Is there objection?

Mr. KERN. Mr. President, if no vote is to be taken to-day, but a vote is to be taken to-morrow, that will disfranchise a number of Senators who can not be here to-morrow.

Mr. VARDAMAN. Does the Senator from Indiana know when they can be here?

Mr. KERN. If the Senator will allow me, would he object to allowing the matter to go over until there can be a full vote in the Senate?

Mr. VARDAMAN. I should be very glad to see the matter take that course.

Mr. KERN. I suggested yesterday that, if a unanimous-consent agreement for a vote yesterday could not be reached, a date be fixed for a vote next week, say, on Monday, so that all Senators could have ample time to return.

Mr. VARDAMAN. That will be entirely satisfactory to me.

Mr. THOMAS. That would be agreeable to me, but I am satisfied that it can not and will not be done.

Mr. KERN. What can not be done?

Mr. THOMAS. The entering into of a unanimous-consent agreement fixing the time for a vote.

Mr. VARDAMAN. We can test the matter by asking unanimous consent that a vote be taken at 4 o'clock on Monday next.

Mr. THOMAS. Mr. President, I yield to the Senator for that purpose, with the understanding that I still have the floor.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Hughes | Perkins | Stephenson |
| Bankhead | Johnson | Pittman | Sterling |
| Borah | Jones | Poindexter | Sutherland |
| Brandegee | Kern | Ransdell | Thomas |
| Bristow | Lane | Reed | Thompson |
| Bryan | Lea, Tenn. | Robinson | Thornton |
| Burton | Lee, Md. | Saulsbury | Tillman |
| Chamberlain | McCumber | Shafroth | Vardaman |
| Chilton | Martin, Va. | Sheppard | West |
| Clark, Wyo. | Nelson | Shields | Williams |
| Dillingham | Norris | Smith, Ariz. | Works |
| du Pont | Oliver | Smith, Ga. | |
| Gallinger | Overman | Smith, S. C. | |
| Gore | Page | Smoot | |

Mr. KERN. I desire to announce the unavoidable absence of my colleague [Mr. SHIVELY]. This announcement may stand for the day.

Mr. ROBINSON. I desire to announce that the Senator from Michigan [Mr. TOWNSEND] and the Senator from Minnesota [Mr. CLAPP] are absent on the business of the Senate.

The VICE PRESIDENT. Fifty-three Senators have answered to the roll call. There is a quorum present.

Mr. VARDAMAN. Mr. President, in order that there may be a full attendance of Senators when the vote is taken upon this measure, I am going to ask unanimous consent that the vote on the joint resolution and amendments be taken at 4 o'clock Monday.

The VICE PRESIDENT. Is there any objection?

Mr. CATRON. Mr. President, I object. It will be impossible for me to be present here on Monday, or for several days thereafter, and I want to vote on this resolution.

Mr. VARDAMAN. Will Saturday be satisfactory to the Senator?

Mr. CATRON. Yes, sir; any time between now and adjournment on Saturday evening.

Mr. ROBINSON. I shall object to Saturday. I am ready to vote now.

Mr. SMOOT. If a unanimous-consent agreement is going to be asked, it seems to me the roll should be called.

The VICE PRESIDENT. The roll has just been called.

Mr. ROBINSON. I shall object to voting at any other time than to-day during the present week.

Mr. SHAFROTH. Make it Wednesday.

Mr. VARDAMAN. I will ask if next Tuesday will be satisfactory, or Wednesday or Thursday or Friday?

Mr. CATRON. No; I do not think I shall be here at any time during next week.

Mr. VARDAMAN. I see that I can not satisfy the Senator from New Mexico.

Mr. CATRON. You can satisfy me by voting at any time between now and Saturday night.

Mr. VARDAMAN. Will Monday week be satisfactory to the Senator from New Mexico?

Mr. CATRON. Not at all.

Mr. HUGHES. How about the 2d of May?

Mr. VARDAMAN. Will the Senator from New Mexico consent to vote at this time?

Mr. CATRON. Yes, sir.

Mr. VARDAMAN. I suggest that the roll be called, and we proceed to vote.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Mississippi.

Mr. POINDEXTER. Mr. President, I had not intended or desired to speak upon this joint resolution; but the friends of the resolution are desirous that certain things shall be put into the RECORD.

I ask unanimous consent to print, without reading it, as a part of my remarks, an article prepared by a woman, which contains some interesting matter bearing upon one phase of this subject—the State rights question.

The VICE PRESIDENT. Is there any objection? The Chair hears none, and it is so ordered.

The matter referred to is as follows:

THE STATE RIGHTS SHIBBOLETH.

[By Mary Beard.]

Women who are asking for a Federal amendment abolishing sex discrimination in the suffrage provisions of the Constitution are informed that the determination of the qualifications for voting is purely a State matter. They are dismissed with an air of finality not unlike that which follows a mathematic demonstration. The suffrage is a matter of State, not national, interest, and that is the end of the discussion.

There are some simple-minded persons who accept this dictum as the final word on the subject, but those women who have studied even a little American history and politics know very well that the border line between national and State matters can not be settled by a mathematical process or by an ipse dixit of some interested politician. They know that neither the Republican Party, the champion of nationalism, nor the Democratic Party, the champion of State rights, has been consistent in its attitude toward national and State rights. They know that each of them has leaned toward National or State Governments exactly whenever it has suited the party and economic interests.

Did not Thomas Jefferson and James Madison, founders of the Democratic Party, rend the air with cries of State rights against Federal usurpation when the Federalists chartered the first United States bank in 1791, and when the Federalist court, under the leadership of John Marshall, rendered one ringing nationalist decision after another upholding the rights of the Nation against the claims of the States? Yet Jefferson, as President, acquired the Louisiana Territory in what was admitted by him to be open violation of the Constitution, and the same James Madison who opposed the Federalist bank in 1790 as a violation of the Constitution and State rights cheerfully signed the bill rechartering that bank when it became useful to the fiscal interests of the Democratic Party. Jefferson was ready to nullify the alien and sedition laws and the Constitution of the United States in the Kentucky resolutions of 1798; the very Federalists who fought him in that day and denounced him as a traitor and nullifier lived to proclaim and practice doctrines of nullification in behalf of State rights during the War of 1812.

In the administration of Thomas Jefferson the National Government began the construction of the great national road without any express authority from the Constitution, and notwithstanding the fact that the construction of highways was admittedly a State matter. Eighteen years later a Democratic President, James Monroe, vetoed an act for the preservation and repair of the Cumberland Road and labored to prove that the whole venture was a violation of the Constitution and an invasion of rights reserved to the States. On August 24, 1912, the Congress of the United States, then controlled by the Democratic Party, voted $500,000 for the construction of experimental and rural delivery routes and to aid the States in highway construction. From high in the councils of that party we now have the advocacy of national ownership of railways, telegraph, and telephone lines. In the early days of the Republic the Democratic Party protested even in armed insurrection in Pennsylvania against the inquisitorial excise tax which, to use the language of the day, "penetrated a sphere of taxation reserved to the States"; to-day the Democratic Party places upon the statute books the most inquisitorial tax ever laid in the history of our country, and a wise and just tax, too, many believe. That same party, by an act of April 9, 1912, laid a tax on white phosphorus matches, not for the purpose of raising revenues, for which the taxing power is conferred, but admittedly for the purpose of destroying an industry which it could not touch otherwise. The match industry was found to be injurious to a few hundred working people; the Democratic Party wisely and justly cast to the four winds all talk about the right of States, made the match industry a national matter, and destroyed the dangerous features of the business. Men and women all over the country rose up and pronounced this a noble achievement. Republicans joined with Democrats in claiming the honor of that great humane service. Shades of departed Democrats! A taxing power which, according to Calhoun, could not be used for the purpose of protecting industries, may be used to destroy them. Consistency, where is thy virtue, and State rights, where is thy victory?

The State had the right to nullify Federal law in 1798—so Jefferson taught and Kentucky practiced. Half a century elapses. The State of Wisconsin, rock-ribbed Republican Wisconsin, nullified the fugitive-slave law, and in its pronunciamento of nullification quoted the very words which Jefferson had used in 1798. A Democratic Supreme Court at Washington, presided over by Chief Justice Taney, the arch apostle of State rights, answered Wisconsin in the very language of the Federalists of 1798, whom Jefferson despised and contemned: "The Constitution and laws of the United States are supreme, and the Supreme Court is the only and final arbiter of disputes between the State and National Governments. A few more years elapse. South Carolina declares the right of the State to nullify, and Wisconsin answers on the field of battle: 'The Constitution and laws of the National Government are supreme, so help us God.'"

At the close of that ever-to-be-regretted war the Nation wrote into the fourteenth and fifteenth amendments the fundamental principle that the suffrage is a national matter. Those amendments were intended to establish forever adult male suffrage throughout the American empire. It is true that those amendments are in many respects nullified by ingenious provisions. But there they stand. You are confronted by this dilemma: Either you must openly flaunt and scorn them, and thus virtually say to the Nation, We will obey just as much of the Constitution as we please, which is the doctrine of the anarchist; or you must say suffrage is by the Constitution a national matter and we abide by the Constitution.

All reasonably sophisticated persons know that anything is a State matter which we think is a State matter, and anything is a national matter that we think is a national matter. The women of this country—the women of the enfranchised States and the women of the States not yet enfranchised—think suffrage a national matter. Men may turn aside those women who expect to simper their way to the suffrage by saying, "Just one moment, please," or "Kindly step the other way,

please"; but they can not thus dismiss those who have read the long and inconsistent history of all parties.

From history women appeal to political science, and here they cite the example of the only great independent federation that deserves to be compared with the United States—the German Empire. The constitution of that confederation does not leave the determination of the qualifications for voters for the Reichstag to the mercies of the States; but solemnly and emphatically prescribes that every adult male German citizen shall vote for members of the Imperial Congress, whatever may be the qualifications for voters in the several States. The German constitution was made in the full light of modern political science and suffrage was there treated as a national matter.

If we turn to the other great federations of the world—Switzerland, Canada, and Australia—we find that their constitutions treat the suffrage for Federal offices as a national matter by empowering the Federal Parliaments to make uniform regulations with regard to qualifications for voters. The constitution of the Australian Commonwealth provides that the qualifications imposed on voters by the States shall remain until the (Federal) Parliament otherwise provides; and in 1902 the Federal Parliament established uniform qualifications throughout the Commonwealth as far as Federal elections were concerned, and enfranchised women in spite of the opposition in some of the States.

A study of the constitutional law shows, therefore, that in no federation is the suffrage regarded as a purely State matter. The Constitution of the United States does not allow the States to provide any qualifications they please for voters for Members of the House of Representatives or Senators, as is the rule in the case of the choice of presidential electors, where the State legislatures may make any qualifications they see fit. The constitution of Germany established universal manhood suffrage for Reichstag elections; the constitutions of Switzerland and Canada empower the Federal Parliaments to make uniform regulations whenever they see fit; the constitution of the Australian Commonwealth authorizes the Federal Parliament to make uniform qualifications, and the Federal Parliament almost immediately after the adoption of the constitution swept away sex discriminations in Federal elections.

Mr. POINDEXTER. Mr. President, we are slaves to custom. We boast of freedom, and yet are bound on every side by superstitions which have survived from the Dark Ages. We think we are free, and yet we are such intellectual bondsmen that the term "free thinker" is looked on with opprobrium. Nearly every action of our lives is governed by precedent and convention. Our age-old forms of law are, many of them, mere mummery; our civilized regalia, the pomp and heraldry of state, as absurd and childish as the trappings of a Zulu tribe. Habit is the most powerful factor governing the actions of men. The mind as well as the body is plastic and turns in sympathy to its familiars, and to those things to which it has been trained. For every man who has the initiative to leave the habitual path to seek a higher and a better way of life, a million insist on planting their feet exactly in the track of the myriads who have gone before. The old road seems easier, and, to most, it seems best. Not only do most of us, as a race, content ourselves with established forms and customs, but will resist to the utmost any change.

So it is that mankind has required a hundred thousand years to attain its present improved condition. Every step of the way has been a war against precedent. Every intellectual advance has had its martyrs to the cause of progress. Every man who dared to oppose the established order has been marked as a despised thing apart. The imprisonment of a Galileo, the excommunication of a Luther, the chains of a Columbus, the rebel's price upon the head of Washington, are but the protests of privilege against the enfranchisement of the human mind. In the suffering of heroes blooms the flower of progress.

Many are against the political emancipation of women solely because they do not want to change custom and the established order. If some among their ancestors had not the initiative to break away from the fixed routine, in generation upon generation, these opponents of change would have been savages in the forests of Europe, clad in the skins of wild beasts and feeding on raw meat. Because some dared and some aspired they are the heirs of genius and citizens of the American Republic. But why does convention, precedent, and custom deny to women the most precious privilege of citizenship? We have set in the law the tests of fitness of a man to participate in this primary and fundamental function of self-government. He shall be 21 years of age. A woman may hesitate to say so, but she can be 21 years of age. In some States it is required that he shall be able to read and write. Women in larger percentage than men can read and write. It is said that men are required to support the family. That is often true; but without woman he would not have any family to support; and many times the woman not only supplies the family, but supports it and the man as well. And in every home which affords a haven of peace and rest to those who enter its sacred door a woman's toiling hands or a woman's loving heart makes it so. Can he who is opposed to this resolution turn away for a moment from the heartlessness and the busy affairs of this forum and rest his mind's eyes upon the blessed features of his mother? What has she been to you? She gave you being. She gave you sustenance, and in your puny helplessness nurtured you with that unspeakable tenderness, the holy mystery of God's love upon this earth. She gave you instruction, and with love and sympathy guided your feeble and erring steps. She dreamed dreams for you, prayed for you, it may be, toiled for you. Her hopes and pride were the best incentive of your ambition. Now, in the seats of power, can you deny to her and to other mothers of a great people the right of franchise which the Constitution guarantees to every race and color of men? I have looked upon the heroic and noble face of my mother when the hand of God had smoothed from it all the cares and sufferings of this mortal life. I thought in grief too deep and intimate for any confidant of her labors and love for her children, of that rich legacy of loving instruction which she gave. I know how truly her heart and mind would have guided her in all the duties of citizenship, and rather that I should never announce another vote from this high place than that I should use its power to deny political freedom to such as she.

And to those other women who opened the gates of Paradise to you in the young morning of manhood and taught you the way of tenderness in the gardens of the Hesperides, can you deny the rights of citizens to them?

Qualifications for the franchise should be moral, spiritual, and intellectual fitness. Our own observation and the experience of history prove that in all these respects woman can meet any test men can satisfy. In literature, as in art, the inspiration of women has lightened the burdens of the world. The antisuffragists themselves have compiled data showing the good works of women. In this useful public service can the added power and influence of the ballot in any way lessen her efficiency? Some women say they do not want the ballot. They have organized against it as though anyone sought to force it upon them. No such proposition has ever been made. It is true the use of the ballot is a civic duty as well as a political right, but this resolution is intended for those women who appreciate that duty and who desire that right. Others will be left free to keep away from the contaminating touch of the voting precinct, if they so desire, just as millions of male citizens now do. It is said polling places are not suitable for women. There is no higher function of men than voting, and the polling place can be made as respectable as a school and, if need be, as holy as a church.

In view of her ability to comply with every test, why has custom, tradition, the law denied political equality to woman? For the same reason that she was formerly and still is, in many places, denied social and civil equality. It is only a few generations since woman had no individual status in this our society. She was a feme covert, a mere appanage of the man who owned her. He was in very truth her lord and master, and held over her the power of life and death. There was no law for her but the will of her lord. There are still some Tories, and strange to say, some women, who regret the departure of those good old times. And what was the reason for this personal chattel slavery of women? Physical force! All the institutions of society were then based on the law of force. A man was entitled to what he could take and hold. That was why it was necessary to build so many castles. Feudalism may have been a fine thing for the physically strong, but it was a hard and cruel law for the weak. It is always so, because the possessors of material power are often cruel, lustful, ignorant, and brutal. A state based upon such principles is in a stage of barbarism. With the Renaissance, the birth and progress of learning in the West, enlightened States have slowly evolved new and better principles of government. The growth of religious liberty, the consequent spread of the knowledge of the real teachings of Jesus Christ, have been most potent in this amelioration of the world. The discovery of America, doubling the opportunities, resources, and multiplying the comforts of mankind, has accelerated this advance. We have freed woman from personal bondage and given her an equal place of dignity and honor in the home. We have stricken from her the shackles of civil slavery, and have given her a standing in the courts as to all personal and property rights. No one can be heard nowadays to complain openly of this. On the contrary, we look upon this evolution of the status of woman as a wise, benign, and just policy.

Yet she remains in political slavery. This can only be explained as in geology the presence of certain rocks, apparently out of place, is the work of a glacial age, long disappeared, or as a rudimentary organ in the body whose functions have long since ceased. The difference is that this survival of feudalism in the twentieth century is positively injurious not only to women but to the entire State.

But it is said that this physical test is correct, because war requires physical prowess and women can not go to war. Men seem to be afraid that women, if vested with political power, would send men to war too freely. We can picture, in the vision of the mind, this future state controlled by women sending the

men to war, all the women remaining at home to hold carnival and revel. Wars are fought by boys. Can we imagine the mothers of the land too prone to send their smooth-faced sons to feed the hungry god of war, or wives and sweethearts careless of war because they themselves may not be soldiers? As a matter of fact, increased political power for women would afford the greatest force for peace that statesmanship can devise. But how as to war itself? All the army is not on the firing line. In hospitals and even on the field the ministering care of women comforts the wounded and blesses the dying. Where does war get its support but from the homes of the land, and upon whom does it levy a greater tribute, both of wealth and suffering, than upon the women of these homes? Women can not go to war, it is said. And yet this Nation now proposes to erect in this Capital a mighty monument to the sacrifices and devotion of the women of the North and South in the greatest war of our history. But for the courage, patriotism, and fortitude of women in war our independence could never have been won; and in every crisis of our history the high marks of daring and fame were reached through the encouragement, the love, and inspiration of heroic women. And can not women go to war? When at rare intervals the Divine Spirit incarnates itself in mortal flesh, it does not always choose a man as its medium. Women have been inspired—and it was a woman, a chaste maiden of less than 20 years of age, who came from her simple country life and gave hope, if she could not give courage, to her craven king. Joan of Arc, as pure and noble a figure as time has seen, led where there was no man to lead. She broke the power of the invader and led victorious armies for her country's freedom. She shed her blood in battle at the gates of Paris and made men of laggards and cowards. And yet she died the cruel death of fire—neglected by an ingrate king, the victim of ignorant and brutal men. Years after her body had been destroyed the same forces which urged her execution attempted to capitalize her sainted memory.

Free government means self-government. That selfishness which is a predominant trait of human nature can not be trusted, unrestrained, to use benevolently exclusive power. The only possible agency by which any class can secure justice from the Government is the vesting in that class a part in the control of the Government. If women have no voice in the Government, they are political slaves, and it is within the unrestricted power of another class to make them social and personal slaves. If their interests are to be protected, the only guaranty is to give them the means by which to protect themselves. It is upon this axiom that all the new agencies of popular government have been found necessary—that the people can not have just laws, justly enforced, unless the people themselves have political power. Free government means a free party, and so the movement has grown to put the party under the direct control of the people.

But it is not for women alone that their political liberation is sought. It is for the good of all. It is not a question of sex. It is a question of virtue. It is a wise philosophy that in this humane and enlightened age the humane impulses and the intelligent minds of women should have free play in solving the human problems of society. Some say woman's enfranchisement should be left to the States. But why? We have deemed it of sufficient importance to provide in the Federal Constitution that race or color should not stand in the way of the ballot. Why not write into this clause one other word and prevent the far more unwise and cruel discrimination against sex alone?

It is pertinent to observe, sir, that we are not seeking to take anything away from anybody, but to give the highest privilege of citizenship to a class which has been denied it. No man can oppose this resolution on the ground that anyone will lose a privilege they now enjoy. It is perfectly proper for the Democratic Party to oppose this resolution if the administration or the party see fit to do so. They are laboring under no compulsion. But it is likewise necessary and proper that both party and administration shall be held accountable before the country for their attitude. The President has declined to support it. Other agencies in the control of that party have acted adversely upon it. It is our contention that in doing so they are opposing the extension of free institutions and the political liberation of one-half of our people. The time to stand for woman suffrage is whenever the opportunity is offered, and the means to be used are whatever lawful means are available. This resolution affords such an opportunity and such a means. The men of our land will be better men if they are born of mothers who are politically free.

Mr. BORAH. Mr. President, I represent in part in this body a State which has enjoyed equal suffrage for a period of nearly 20 years. We have had an opportunity to observe its effect upon society and upon the politics of the State, and we are satisfied with the effect of woman suffrage. We have not observed that there is any neglect of the home by reason of it. If there are indications of that kind, or if there are to be, they have not yet in any outward sense developed. We do not believe any such thing will result from woman suffrage. We have never discovered any tendency toward what some people think will be the result of woman suffrage, and that is of masculinity, as it were, women departing from the avenues and walks of life for which they are particularly fitted and entering into other walks of life and engaging in a mode of life not in harmony with the highest ideals of womanhood. That condition has not yet developed in our State under woman suffrage. We do not believe it ever will develop.

We have never discovered either that there is any tendency on the part of women to abandon their particular sphere and engage exclusively in political duties, such as office holding, and so forth. The fact is that there is very little disposition upon the part of the women of my State apparently to hold office. They take an interest in politics; they take an interest in public questions; they are interested in public discussions; and I think the figures, if they could be gathered, would show that the percentage of votes upon the part of the women is practically as large as that upon the part of the men; but they have shown a keener interest in the things which have to do with molding public opinion than in enjoying the spoils of office. My own judgment is, from observations which I have made, that upon some questions, what might be called quasi-moral questions, the vote is larger and the interest greater upon the part of women than upon the part of men. In many of the most important questions which now concern the welfare of society their influence is controlling and always for the good.

Women do vote. They continue to vote, year by year and election after election. It is not a fad, it is not a fancy satisfied by an experience of one or two occasions, but they continue to take an interest in political affairs.

There is a great object lesson to everyone who has had the experience of campaigning where women vote and in a State where they do not. You will seldom speak to an audience in my State which is not composed of as many women as men, and perhaps more. You will find them active in all the different phases of political life, so far as those phases which go to make up public opinion and control and direct and shape and mold public opinion are concerned.

I say candidly and earnestly that after an observation of nearly 20 years, I am thoroughly in favor of equal suffrage. I believe it is to the benefit of society; I believe it is to the benefit of the body politic; I do not believe it is to the detriment of womankind; and therefore I have been and am an advocate of it. I began its advocacy 22 years ago and have never had cause to regret the humble part I had in securing the right of women to vote in my State.

There is one feature of woman's presence in politics which is not sufficiently accentuated, and that is what might be called her potential influence. Even if the women seldom went to the polls, even if they seldom took part in the more active phases of political activity, I would still be in favor of woman suffrage, for the reason that her presence in the political forum, the possibility of her taking part in political matters, the possibility that she may take an interest in a question or a candidate, has a potential and beneficial influence in politics which, to my mind, is even as great as that of her actual influence. I would not disparage my sex, but man is prone to be more careful when he knows his acts are to come under the surveillance of mother, wife, sister, or daughter.

Those who have attended political conventions and political gatherings before and after the advent of woman suffrage in a State will testify to the fact that no platform is ever written and no question advocated, no candidate's nomination sought, without some regard, more or less, as to how the women will view the candidate or the platform. I recall one instance in particular in my State, where there were only two women in the convention. It was during the old convention days, when the things were agreed upon mostly before the convention met. A platform and the candidates, or what was called a slate in "prehistoric times," had been agreed upon. There were not sufficient women in the convention or in touch with the convention to control the situation, but it was made known that a particular feature of the program of that convention would in all probability incur the displeasure and the opposition of the women vote of the State, and the slate was changed as promptly as if the votes had been in the convention to break it. This is the potential influence of woman, because no man knows what a woman will do when she is offended.

So I say, Mr. President, that the potential influence of woman, the knowledge that she has the power to enforce her

view of a particular question and that it can be made effective, is a powerful instrument and quality for good in political affairs.

I am, therefore, not particularly concerned with that argument which says that woman does not or should not attend political conventions or political gatherings, and so forth, for I repeat that if she exercise no other influence than the fact that she might become an effective censor of the action of a political party it would be a sufficient justification for giving her the vote.

We have had during all time certain arguments in favor of woman suffrage and arguments against woman suffrage. I am not going to undertake to review them to-day. They have been discussed here pro and con. I can only say that after nearly 20 years of observation and experience in the State of Idaho the arguments, so far as they are arguments, against woman suffrage have, in my judgment, been met. They have been met by actual experience, by actual fact, by the effect which it has had for the betterment of politics and political conditions.

I am not one of those, Mr. President, however, who claim that woman suffrage is a panacea for all the evils which afflict the body politic. Like all other reforms, those who advocate it expect too much of it, and those who oppose it attribute entirely too much to it in the way of fault. It is simply one of the important steps toward better politics and a better condition of affairs in political concerns. In my judgment, its entire tendency is for the good. Whether it is great or small, less than some might expect or more than others, the tendency of the presence of women in the political arena is for the good. Of that I entertain no doubt.

Mr. President, I have at different times throughout the East advocated equal suffrage, and I am going to insert in the RECORD some views which I have heretofore expressed. They may be of possible interest to those engaged in the cause of woman suffrage in the different States. At Newark, N. J., last October, at a woman-suffrage gathering, I said:

> There are no doubt those who truly believe that if woman is to vote, that if she is to consider of those questions which underlie and support the whole moral fabric of life, and, having considered of them, is to record her convictions, that she is to lose some of that charm which is exclusively hers. Let us be fair with ourselves and look with our eyes and not with our prejudices. I do not know of a nobler, more effectual, a more respected and refined power in the whole arena of social forces, and a more womanly woman, than the woman of to-day who is giving of her thought and her purpose, her invincible moral courage, in dealing with the social problems and social reforms with which we now have to deal, with which in the future we must contend more and more. Is she less respected by father, husband, and brother than the woman whose tastes lead her along other lines? And why withhold from this woman engaged in so noble an enterprise the instrumentality by which she can effectuate what her brain and purpose have planned and outlined? No woman can ever become less womanly from thinking and acting upon and in regard to those things which would protect the home, which would protect the child, which would protect society, and which would ameliorate and soften the harsh struggles of the countless thousands who are in earnest contest with adversity, but whose children must finally assume the duties and obligations which rest upon all the citizens of our blessed Republic.

Speaking later at Baltimore, I made this observation:

> I informed your committee when asked to speak upon this occasion that I would be glad to take part in this meeting, provided it did not commit me to the proposition of the proposed amendment to the Constitution now pending before Congress. I am an earnest advocate of woman suffrage, but I believe it to be both inexpedient and unwise to attempt to secure it otherwise than through the respective States.
> * * *
>
> Those of us who have had an opportunity to observe woman suffrage in actual practice through the course of years believe in it. We do not believe in it as a fad or a fancy, nor as an exigency in a national campaign, nor yet as a thing about which women should forfeit their poise and judgment, their sense of order, and their regard for law—we believe in it because we think it founded both in political justice and economic expediency, we think its tendency is all for the good, for cleaner and higher politics.
> * * * * * * *
>
> I think the campaign for woman suffrage has been carried on in this country with remarkable judgment and poise. It has been carried on in the States as it should be, through argument and reason, through discussion most ably conducted. It is bound to win. The continued appeal to the conscience and minds of the American people in an orderly and lawful way will win your cause and win it far more quickly and satisfactorily than it can be won in any other way. Two things those who are conducting truly great reforms ought at all times to bear in mind: First, that this is a government of order and law; and, secondly, that the people will in the end, and when fully informed, do the wise and just thing.

Mr. GALLINGER. Mr. President——

The VICE PRESIDENT. Does the Senator from Idaho yield to the Senator from New Hampshire?

Mr. BORAH. I do.

Mr. GALLINGER. I will ask the Senator from Idaho how long woman suffrage has existed in the State of Idaho?

Mr. BORAH. My remembrance is that it is 18 years, but I may be mistaken two years either way.

Mr. GALLINGER. I know that in the New England States men who are said to reside in the so-called woman-suffrage States on occasion say that it is working badly in those States. Now, the Senator represents a State where woman suffrage has existed for 15 years or more, and I will ask the Senator in all frankness whether or not he, from his observation and experience, is of the opinion that it is beneficial rather than otherwise?

Mr. BORAH. I have no doubt about the fact that it is beneficial. I may say that I have never in my observation discovered what I thought was an evil tendency of woman suffrage. I have, on the other hand, discovered many constant and persistent tendencies which I consider to be altogether for the good upon the part and by the reason of woman suffrage.

But, Mr. President, notwithstanding the fact that I am for woman suffrage, I must say that I am against this joint resolution. That requires some further remarks upon my part, because I will, of course, immediately be charged with being underzealous in regard to the cause. If the proposition presented were only and alone the question of woman suffrage, if there were no other propositions inhering in this controversy, if there were no other precedents to be set and no other consequences to follow, I would unhesitatingly give my vote for the joint resolution. But there are other things necessarily associated with it which, to my mind, must be controlling, so far as my vote is concerned.

I can not permit myself to overlook the fact that while woman suffrage may be obtained through the States, a precedent which we are about to establish here would be one which would appertain and relate to other questions and be controlling in my judgment with reference to other matters, and for that among other reasons I am not satisfied to vote for the joint resolution.

When I informed one of the good women who was advocating this cause some time ago that I could not vote for the resolution she stated that they had been wondering why it was, why one who was in favor of woman suffrage was not in favor of this proposition. I answered her that the first reason why I was against this resolution and in favor of woman suffrage was because this is the most impracticable, impossible way by which to get woman suffrage in this country.

If we adopt this resolution, it will require 36 States to be carried for woman suffrage before an additional woman is permitted to vote so far as her right to vote depends upon this amendment. You may carry 20 States, you may carry 25 States, you may carry 30 States, you may carry 35 States, and the energy and the time and the effort and the money which you put forth in trying to carry those 35 States will have been wholly lost unless you are able to carry one other State. In my judgment you will never carry for woman suffrage in this country 36 States in the Union until you repeal the fifteenth amendment of the Constitution. You have taken on the suffrage cause the heavy burden of race prejudice.

Mr. GALLINGER. Mr. President——

The VICE PRESIDENT. Will the Senator from Idaho yield to the Senator from New Hampshire?

Mr. BORAH. I yield.

Mr. GALLINGER. For my personal enlightenment, if the resolution as it stands before us to-day is agreed to—I do not expect it is going to be agreed to, but if it should be agreed to—would it not still be a fact that the individual State could confer suffrage upon the women?

Mr. BORAH. Certainly.

Mr. GALLINGER. I suppose the Senator's idea is that they would rest on their oars if this should prevail. Is that the idea?

Mr. BORAH. No; not exactly that; but you must take into consideration that you can not conduct a campaign for the legislature in 36 States of the Union without a vast amount of additional expenditure, a vast amount of additional time and energy, at the same time that you are conducting a campaign for the submission of a constitutional amendment in your own State or in a particular State. For instance, if you could have all the 36 States of the Union submit the proposition of woman suffrage in the State at the same time that you were fighting for the legislature to ratify this amendment you might conduct the campaign with some degree of success from the same headquarters and with the same amount of energy, time, and money, but while conducting a campaign in a certain State for woman suffrage, like Michigan, direct by the vote of the people, if you are making any headway at all you must be carrying on a campaign in 35 other States of the Union for the purpose of ratification, and in my judgment dividing your forces and dissipating your power. I think it requisite to success that all effort and power should be concentrated and directed along lines where ultimate results can be finally had.

The thing which confronts me as a practical proposition in regard to this method is the insurmountable and impassable

barrier which stands between the women and suffrage so long as the negro vote in this country is as it is. There are 16 States in the Union that will never ratify this amendment so long as the fifteenth amendment is in the Constitution of the United States. We had just as well be candid and fair and open about this proposition. The fifteenth amendment to the Constitution of the United States is a dead letter. It is not enforced in a single State of the Union by reason of the fact that it is the fifteenth amendment. Wherever the negro votes he would vote without the amendment and by reason of the action of the State. Fifty years ago we extended to the negroes of this country the right of suffrage and to-day they are as completely disfranchised as if the fifteenth amendment was out of the Constitution. There it is in the fundamental law ignored and defied and evaded, not by the action of the South alone but by consent of a whole Nation.

Now do we suppose that those people, feeling as they do the necessity of acting upon that premise, will enfranchise 2,000,000 additional voters of the same class? Are we to suppose that they will add to and accentuate the strength of Federal control over elections until that question in some way is settled, so that they are relieved of their fear of negro domination? Those States against such a proposition will stand as solid as a Macedonian phalanx.

Permit me to say to the women of this country that the moment they leave the campaign in the individual States for the enfranchisement of woman and take on the campaign from a national standpoint they load down the woman-suffrage question with the race question, which is far more difficult to handle and goes up against more insurmountable barriers and more uncontrollable passion by far than the question of woman suffrage. I have never been able to understand why they should court such a contest.

Why should the women in this country who want to vote take upon their shoulders the race question in their fight for enfranchisement? The energy, the money, the time, and the ability which would be spent in undertaking to carry those 16 States would put 10 States of the North into the Union for woman suffrage.

Therefore, Mr. President, as one who believes that in time women will vote, except in those cases where the insurmountable barrier of race prejudice prevents it, and should be permitted to vote, I would be opposed to this proposition as a practical

Let me say without challenging the good faith or the courage of any Senator who sits here with me I do not think there is a Senator in this Chamber who believes that 15 or 16 States of the Union will ever ratify this amendment so long as the fifteenth amendment is unrepealed. Therefore that will happen which happened the other day when the distinguished Senator from Mississippi rose in his place and, as an amendment to this constitutional provision, proposed a repeal of the fifteenth amendment. Whenever this constitutional amendment, if it is adopted by the Congress, passes a certain border line of States that amendment will not be attached to it by the Congress of the United States, but it will be attached to it by every State in which the vote is being sought; that is to say, it will never receive the approval of those States until you make this a white amendment. I can not encourage the women of this country to enter that fight. I would be insincere and hypocritical to them and false to the cause to encourage such a course.

There is another reason, Mr. President, kindred to that proposition, which is a strong and controlling reason with me. It may be a sentimental proposition, but I do not look at it that way. I am opposed, even if we could secure ratification, to putting into the Constitution of the United States a provision of the Constitution which is going to be violated 365 days out of the year. A great fundamental law, the incarnation and the crystallization of the public sentiment and the moral force of 90,000,000 people should be a law which is in force and to be in force in its every line and letter so long as it remains the law. The violation of law is bad of itself. It is demoralizing to the community, the State, and the Nation. For a people to live in open defiance of their fundamental law, for a whole nation to witness day after day and year after year and decade after decade the flagrant evasion of their charter of government is to breed that contempt for order, that disregard for authority, that defiance of law, that indifference to the rights of others which now curses with a withering, consuming curse some of the so-called Republics to the south. We of the North are quick to vote these things upon the South, to vex and complicate their tremendous burden more and more. But we neither offer to the South a remedy nor offer to the negro anything more than lip service for the realization of its constitutional right.

I do not stand here to-day to criticize those of the South who have to deal with this question, but I do say that it can not be otherwise than demoralizing to be constantly placing in the Constitution of the United States provisions which every Senator knows will not be enforced or be made protective to the entire people of the United States.

What must the other race of which we are not members think as they look up to the Constitution of the United States and hear it eulogized here year by year, as they look up to the flag under which they live, supposing that it represents the highest form of civilization and the perfection of human justice? What must they think when day after day, year after year, they know that in violation of that supreme law they are deprived of the privilege of casting their vote according to the guaranty of the Constitution? The Constitution may not be a sacred thing, but the duty, the obligation, and good faith of a superior and dominant race toward an inferior and dependent race are sacred things. No promise should be made that is not to be kept.

I am one of those, Mr. President, who has never hesitated to say that the writing into the Constitution of the United States of the fifteenth amendment at the time it was written there was a mistake. It was a serious mistake. It came before the hot passions of the Civil War had cooled and judgment had time to resume its sway, while the engendered feelings which had been accumulating through years of strife and conflict still prevailed. It came in a large measure as a sort of retaliation and revenge. The idea of taking a people and lifting them out of a thousand years of savagery and barbarism, of 300 years of slavery, and placing them in a position where they are required to perform all the duties and obligations of citizenship of a highly civilized Republic! No race in the history of the world has ever been equal to such a thing and no race in the history of the world could do such a thing. And then, when they did not measure up to the task we either turned upon them or left them to their political fate. Men rise to the duties and responsibilities of citizenship in a great republic under years of stress and strain and under years of tutelage and education. Yet we took and placed upon those men the right and obligation of civilization, stepping immediately from the brink of savagery and slavery. It was a mistake. There is no doubt about that.

What has been the result? The result has been that after the first fever was over we of the North consented and connived at the South in violating the Constitution, and the North to-day is just as much a party to the violation of that Constitution as the South.

Mr. President, until the time shall arrive when through some mode, which is not by any means clear to my vision, we shall devise a scheme by which to protect the colored man in his vote, when the time shall arrive when we shall devise a method by which he shall exercise the right of suffrage, so far as I am concerned, let the consequences be what they may, I shall not vote to write into the Constitution another provision which is to be constantly violated for the next 50 years. I will not vote to aggravate or accentuate that condition there existing until we devise some method to relieve it and disclose sufficient courage to put the method thus devised into execution. I will not help to put another false and deluding promise into the Constitution with which to tantalize and demoralize a race, a promise which we of the North have no intention of enforcing and which those of the South have every intention, and as they believe from necessity, of evading.

No, sir; until we devise some plan, some scheme by which to carry out the letter and execute the spirit of the Constitution as it is now written, I will not consent, so far as I am concerned, to play the hypocrite any further.

Mr. President, those are what I consider the practical objections to the impossibility of securing this right through this method.

But there is another reason—and it is even a more controlling reason to me, because it goes to what I conceive the very foundation principles of the Republic—and that is the old doctrine, discarded and worn, but vital and indispensable—the doctrine of State rights for local affairs. I can not conceive of a State, or anything of sufficient dignity to be called a State, which has lost the right to say who shall vote for its State officer.

Mr. President, at the time of the organization of this Government and during the first years of its existence there lived two of the most remarkable men in the history of politics—Alexander Hamilton and Thomas Jefferson. Seldom, if ever, have two men of the same era exerted so marked an influence upon their own times, and never has it been the lot of two men of the same period to extend their influence side by side so far into the future. Some would compare the lives of Fox

and Pitt, of Disraeli and Gladstone, but Jefferson and Hamilton stood about the creation of a new government, and their services were not only more effective in the days they were rendered, but more profound and momentous, more lasting and far-reaching in their import. Both were among the first to be associated with the arousing of the American colonies to an open breach with the mother country; both were loyal and active agents in the success of the cause; both men of personal probity, of unusual energy, of singularly powerful intellects, and both exerted their great influence in and about the building of the Government, and each sought to build in the integrity of his own convictions.

I have never, since I have been able and sufficiently tolerant to ascertain and measure the worth of these two men, to comprehend their theories of government, to measure the influence and effect of the work of the one upon the other, doubted that it was anything else than a providential blessing that both lived and wrought in those vital, formative days of the Republic. It was most fortunate that the advocates of a strong government did not in all their fullness prevail. It was equally fortunate that the advocates of State rights did not succeed in incorporating their doctrine in all its fullness into our dual form of government. The marvel, sir, in the building of this Government was the combining of powers sufficiently strong to insure and to enforce the guaranties which it proposed to give as a nation together with those principles of local self-government and individual initiative and personal freedom without which a free government could not long endure. This was the combined work of Hamilton and Jefferson more than any two other men. Nowhere in all this mighty structure is greater wisdom disclosed than in the matter of reserving and granting powers between the local and the General Government, thus adjusting with a singular mechanism the principles of local rule and of a representative agency to carry the expression of that local power into national affairs.

The strength of the Republic arises not out of the policies of Hamilton and not out of the policies of Jefferson, but out of that combination of policies which are everywhere interwoven into our system. The maintenance of these principles of government are essential. "Any serious departure," declared the late Justice Harlan, "from that principle would bring disaster upon the American system." And if you would know the secret of the sublime strength of Lincoln, the broad and comprehensive grasp of his statecraft you will find it here—in his fidelity to these principles embodied in our theory of government.

We forget in this day, both as Hamiltonians and as Jeffersonians, that the Government was not framed by Mr. Hamilton and that the Government was not framed by Mr. Jefferson. It represents neither the full view of Mr. Hamilton nor the full view of Mr. Jefferson. It is the result, the combination, the composite work of two of the most powerful and puissant minds that have ever lived in the tide of time. It is the Government as Thomas Jefferson and Alexander Hamilton made it, one of them believing in a government strong enough to guarantee all the blessings to the individual which it proposes to give, stable enough and powerful enough to protect them, and the other believing in the principle of local self-government, in the initiative upon the part of the individual citizen, and in reserving to the State everything of a local nature; it is such a government to which I give my allegiance. I believe the composite work of these men is infinitely stronger than either would be standing alone.

It is that government with its strong central power and its local initiative which constitutes the strength and makes this Government the insuperable barrier, if we retain those principles to time, as it is our duty to do, Mr. President, and to preserve those principles just as much as it was the duty of those who began in the first days of the Republic.

Mr. President, we are not a homogeneous people yet by any means. We have the oriental question on the Pacific slope, we have the negro question in the South, and we have the countless thousands of immigrants crowding to this country from southern Europe, who are yet to become acquainted with our theory of government and the duties and responsibilities of citizenship.

If I say to the State of New York what the measure of her electorate shall be, if I say to the State of Massachusetts what the measure of her electorate shall be, what argument shall I present to the State of Massachusetts and the State of New York when New York and Massachusetts say to Idaho, "We want to determine who shall own real estate in your State"? If I say to those people that we propose to take away from the States the right to control and determine the question of franchise, which has always been a question belonging to the State, what shall I say to New York when New York says, in order to lull the disturbance with Japan, in order that this Government may have power to settle all difficulties at Washington or that California and Idaho and Washington shall not disturb the situation by reason of the Japanese question, what argument can I urge when they say to me, "We want an amendment to the Constitution of the United States which says that you shall not discriminate as to who shall own your land or enter your schools"?

Suppose, in other words, Mr. President, that instead of the provision of the Constitution which we have we had this provision, and it would only take a word or two to change it, and it would not be upon any different principles, upon any different policy or interfere with any different States rights from that which it does now; suppose we should say, "The right of citizens of the United States to vote or to acquire real property shall not be denied or abridged by the United States or by any State on account of race, sex, or nationality"; what would the men of the Pacific slope say, who justly feel nervous over the fact that there is constantly crowding to our shores an aggressive and subtle and powerful nation, tormented with fatalism, desiring to take possession of the civilization upon the Pacific slope? If we begin to tear away the most vital things of State sovereignty, first the control of the franchise, next the control of real property, who shall call a halt and when? I believe in a great Federal Union and a Federal Union can not exist without strong, powerful, and dignified States upon which to rest.

Before some men now in this Chamber leave the Senate this country will have to meet the question whether the National Government shall control such a situation as that or whether the State shall be permitted to deal with it. There are 1000 Japanese and Chinese women in those States, and I have no particular desire to bestow suffrage upon them; I have not any desire to yield up to them a voice in deciding the question how we shall control our schools on the Pacific slope. With reference to those questions, so far as I am concerned, I would count myself derelict not only in my duty to the Pacific slope, but in my obligations to the very framework and foundation of this Government, if I should assist in establishing a precedent which could be invoked in favor of the National Government saying who should own the property of my State.

So, Mr. President, this joint resolution does not stand upon the question of woman suffrage. The minute you leave the States and thrust the campaign for equal suffrage into the national domain the women of this country take upon themselves the race question; they take upon themselves these complicated problems which arise by reason of conditions upon the Pacific slope; they take upon themselves numerous propositions wholly dissociated and divorced from the woman-suffrage question itself. Why do so?

Mr. VARDAMAN. Mr. President, I desire to ask the Senator from Idaho if the prejudice in California, where the Japanese are located, is not as intense as the race feeling which exists in the Southern States, where the negro is located?

Mr. BORAH. I think it is.

Mr. President, when the matter of the election of Senators by popular vote was before the Senate it will be recalled that there was a provision in the amendment as originally proposed by which the control of the elections of the Senators was taken from under the control of Congress. As my colleagues will remember, I advocated a change in the National Constitution so that each State might control the question of elections. The question here involved is not precisely the same as that, but it is kindred to it. I was in favor of leaving to the States the determination not only of the question as to who should vote, but I was in favor of leaving to the States the control of the election and the manner in which the vote should be cast and counted, because, say what you may and argue as you will, if the virtue has departed from the people at home, if the patriotism of those in the States has departed, or if their intelligence does not measure up, there is no salvation for the situation in Washington; in other words, if we can not trust the people in the respective States, among themselves, to settle these questions which are local, which are indigenous to their community—if they have not sufficient patriotism or breadth of mind to settle those questions, we may be assured that the representatives whom they send to Congress will not in the long run have any different or any higher capacity than the men who are at home.

In that debate I said:

Under this system, Mr. President—and I will state here now my exact opposition to and my reason for opposing the Sutherland amendment—under this system, in my judgment, Congress could of its own motion interfere with our entire election machinery, our system of registration, our primary law, our ballot, and the entire mechanism of conducting elections. When you have said that, in my judgment, you have

fixed the boundary line between what the Government may do under section 4 and the line beyond which they may do all that has been claimed that ought to be done without section 4.

I am not willing to concede for my own State that our system of holding elections or the manner of conducting them shall be prescribed by any others than those who are directly interested in the matter. I do not want a different time fixed; I do not want a different ballot; I do not want a different registration system; I do not want a different set of primary laws. These matters are matters of prime concern to the people who must elect all their officers and conduct all their elections and see that they are all clean, and they and they alone can best work out this matter in accordance with the local condition and situation which pertain to each individual State. This is a matter with which the people are familiar, which they are bound to take an interest in by reason of their State elections, and which to say they can not efficiently perform is to challenge their capacity for the discharge of the ordinary duties of civil life.

Mr. President, Abraham Lincoln said upon an important occasion:

To maintain inviolate the rights of the States to order and control, under the Constitution, their own affairs by their own judgment exclusively is essential for the preservation of the balance of power on which our institutions rest.

Mr. Lincoln passed through the terrific strain of four years of civil war. No man was ever tempted more than he to draw to himself all the power of an autocrat and dictator; no man was ever tempted more than he to doubt the efficiency and the strength of the Republic and of the Constitution of the United States. He was in the midst of a strife which involved, if successful, the dissolution of this Government. He was not only burdened with the strife at home, but most of the great civilized nations of the earth believed in and sympathized with the possibility of the downfall of the Republic.

I call upon those in this day who think it necessary to digress from the fundamental principles upon which this Republic was founded to remember that in the midst of such a strife he never for a moment lost faith either in the ultimate preservation and triumph of the Republic or the efficiency and the strength of the Constitution. I invite those who have studied his works and are familiar with his life to bring before us a word falling from the lips of the sainted martyr in all the struggle through which he passed indicating that he thought it was necessary to change the fundamental principles upon which the Republic was founded. In the very midst of that contest, at the time when it was raging most severely, he said that local affairs for the State government and national affairs for the National Government were essential to the preservation of the Union. Upon that principle he fought and won; and the people of this country owe to Abraham Lincoln a debt of gratitude commensurate with the debt of gratitude which they owe to him for his patience and his love; for the faith which he had in this old Republic and the Constitution of the United States; for the unswerving fidelity to our institutions with which he fought the fight to the end. Are we wiser than he? Is our task more tremendous or much different than the task which in the providence of God was assigned to him?

Mr. President, this is not a new subject or a new impression with me. I have thought over it much, and from my first knowledge of the Government I have felt that the distribution of power between the State and the National Governments upon the principles of the Constitution was and is indispensable to the preservation of the Government. In speaking before the Hamilton Club of Chicago in 1909 I took occasion to say:

Nowhere in their work was greater wisdom disclosed, a more searching and judicious knowledge of the great truths of history revealed than in this matter of reserving and granting powers between the local or State and the General Governments. With the utmost care and caution there was reserved for the States the control of all matters of domestic concern, of local interests, while there was granted to the General Government those great and general powers which encompass the welfare of all. We must not assume, we must not permit ourselves to believe that the reservation is of less moment or less beneficial to the American people than the grant. I am well aware that the phrase "State rights" has been discredited in our history. It is associated with unhappy days. It is a kind of intellectual tramp recognized for the last 50 years, mainly at the back door of the American statesman.

But the misuse or abuse of the term should not blind us to the great and inviolate political truth that upon the integrity of the States alone all rests the integrity and permanency of the Union, that upon the principle of local self-government rests the perpetuity of republican institutions. In this way and in this way alone the people may retain those rights and keep alive that public spirit which furnishes the brain power and the moral force to run the entire machinery of government, keep alive and strong and healthy the principle of the New England town meeting, expanded and fashioned on a larger scale, a principle born of a complete faith in the integrity and judgment and self-governing capacity of the masses. God pity this Government in the hour in which we shall look to Washington for that economy in public expenditures, that comprehension of the common needs, that devotion to the general interests, the power and the willingness to correct abuses and distribute justice, all so essential to a democratic form of government, rather than to enlighten public opinion gathered up and crystallized into law through those agencies of government which reach back and down to the great body of the people, the sole sovereignty of the Republic.

The makers of the Constitution did not grant to the General Government any powers which it is dangerous to exercise to the fullest constitutional limit. Moreover, I have a profound admiration for the men who would exercise these powers fully and completely in the interest of the Nation. But while extending and developing and building at the top, I would keep sound and safe and sure the foundation upon which the whole structure rests. For what shall it profit to enact laws, create commissions, and unfold the ambitious schemes of men who dream of international prestige and power unless we know what the electorate yonder in the field, factory, and mine is doing or is willing to do, unless we know the measure of its ability, the worth of its patriotism? Responsibility alone gives strength and initiative to citizenship, contact with government fosters public spirit, and local rule is the great school in which is reared and trained and equipped the kind of statesmen who take care that no harm comes to the Republic.

But, Mr. President, let me recall the words of those whose wisdom no one will question and the words of those who were and are known as the advocates of a strong government. Justice Miller, one of our greatest jurists, gave expression to the following view:

While the pendulum of public opinion has swung with force away from the extreme point of the State rights doctrine, there may be danger of its reaching an extreme point on the other side. In my opinion the just and equal observance of the rights of the States and of the General Government as defined by the Constitution is as necessary to the permanent prosperity of our country and to its existence for another century as it has been for the one whose close we are now celebrating.

Justice Harlan has represented as liberal a view toward the powers of the National Government as any man who has sat upon the bench at any time in its history. He rendered the dissenting opinion in the Civil Rights case and in the Knight case and wrote the majority opinion in the Securities case. In one of the last public utterances which he made this splendid old Roman said:

A National Government for national affairs and State governments for State affairs is the foundation rock upon which our institutions rest. Any serious departure from that principle would bring disaster upon the American system of free government.

But the fact is not as the pessimist alleges it to be. The American people are more determined than at any time in their history to maintain both National and State rights as those rights exist under the Union ordained by the Constitution. I say the people of the United States, for although the Constitution was accepted by the separate action of the people in their respective States, they moved together, in a collective capacity, as one people, in creating a Nation for certain specified objects of general concern. They will not patiently consider any suggestion or scheme that involves a Union upon any other basis. They will maintain, at whatever cost and in all their integrity, both National and State rights.

The best friends of State rights, permit me to say, are not those who habitually denounce as illegal everything done by the General Government, but those who recognize the Government of the Union as possessing all the powers granted to it in the Constitution, either expressly or by necessary implication; for without a General Government possessing controlling power in relation to matters of national concern, the States would have no prestige before the world and would be in perpetual conflict with one another. With equal truth it may be said that the best friends of the Union are those who hold that the States possess all governmental powers not granted to the General Government and that are not inconsistent with their own constitutions or with the Constitution of the United States or with a republican form of government. The people of the United States cherish, and will compel adherence to, the fundamental doctrine that the States are vital parts of the American system of government; and they will insist with no less determination upon the recognition of the just powers of the States—to be exerted always in subordination to the supreme law of the land—as essential to the preservation of our liberties. The Supreme Court of the United States has again and again declared, upon full consideration, that a close and firm Union is necessary for the happiness of the American people, and that "without the States in union there could be no such political body as the United States."

If, then, the matchless Government devised by the fathers and ordained by the people of the United States is to be preserved and handed down intact to posterity, National power and State power must go hand in hand in harmony with the Constitution.

No, Mr. President, the wisest have understood that there are certain principles indispensable to a Federal Union—a representative Republic and local self-government for local affairs is one of them.

There are those in these days who are fond of teaching the people of this country that our fathers who built this Government did not trust the people. I have just finished reading a wholly misleading book by a no doubt highly educated professor, who was greatly interested in proving that our fathers were in a conspiracy against popular government. These men err and greatly err by reason of the fact that they themselves have but an inadequate and vulgar conception of the real intelligence and the true self-governing power of the people, of their capacity to deal with great problems and measure up to great tasks. They have themselves but a faint and unsteady grasp of that firm and vital belief which enables a great soul to risk all upon the proposition that that which is permanent and enduring and wise will in the end meet their approving judgment. I believe in the utmost freedom of thought; that truth should be unrestrained, but the libeler of the dead, the slanderer of the patriots of the Republic, are just the same to me whether fumbling with a bomb or hiding under the name of an honored university the learned and solemn ignorance of anarchy.

At the time this Government was framed and submitted to the people for approval free government was looked upon as

the dream of enthusiasts. To transfer sovereignty from the rulers to the people was in itself regarded as the folly of madmen. The task, the gigantic task of building up and putting into operation against the world's prejudices and beliefs, and in the face of countless centuries of disaster and ruin, a government whose sole sovereignty was to be in the people, in whose power and glory the humblest might share and at the same time strong enough and stable enough to insure the individual citizen the fruits of the blessed guarantees which it professed to give, was the task of these men. It required something of the courage, something of the foresight, something of the wisdom which the sparing hand of Providence seldom bestows upon the children of men. What they did was so far in advance of anything which had gone before, so popular in its conception, that it met on every hand with doubt and discredit, if not with mockery and derision. And never until its seasoned timbers had withstood the deluge of civil war, until the people against whom it is said this conspiracy had been organized came from the farm and factory and mine tendering limb and life in its defense, never until the tragic figure of that fearful conflict had triumphantly foretold that this Government of the people by the people for the people should not perish from the earth did the world at large believe that the work of the fathers could endure; rather did it believe that amid dissension and discord it would pass on with the other Republics of the earth. To my way of thinking, no higher faith in the patriotism and self-governing capacity of the people was ever exhibited by any body of men than by those who calmly said this is the wisest and best that we can do, and it is submitted to you for approval; and no higher or greater proof of the self-governing capacity of the people could be given or will ever be recorded than was found in the approval which they gave.

The corner stone of that fabric, the indispensable element and principle which sheathes it with strength and bids it endure through the ages, is the right of local self-government as to affairs which are local. When you take away from the people the initiative, the right to determine for themselves such questions as are local, when you remove from their shoulders responsibility, you ultimately take from the people all interest in public questions, and you have what has been exemplified in the history of every republic that ever existed on the face of the earth, a republic in name only, governed and controlled at Washington, while the masses of the people look on and assume that they are enjoying the great fundamental rights of a republic, although the republic, in fact, has passed away. I am in favor of preserving intact every principle of local self-government. I am in favor of it, because I am in favor of popular government; I am in favor of it, because I believe that down there is the initiative and the patriotism and the intelligence to decide and settle every question. Popular government is a delusion, a pretense, without the principle of local self-government.

Let me say to the good women of this country that I believe after they have fought for 15 or 20 years for an amendment to the Constitution of the United States and for its ratification, in the end they will come back and make their appeal to the individual States, to the direct vote of the people, and in all those States where it is not met with the insuperable barrier of race conditions women will be given the right to vote.

For, Mr. President, woman suffrage is to prevail, equal suffrage is yet to obtain throughout the Republic. Honest prejudices entertained by great and noble men from St. Paul to the present hour, ancient customs and settled habits of mind more difficult to change than constitutions or forms of government, together with the sinister interests which dread her presence in the political forum, will not be sufficient to stay the sometimes slow but always certain movement toward that consummation when there will be called into council upon all affairs of state all the intelligence, all the virtue, and all the patriotism of the Commonwealth.

Neither expediency nor a false view of her sphere will be able to keep woman from that council board where more and more are to be considered the interests of the child, the integrity of the home, the moral and physical well-being of the citizen; where more and more are to be discussed and determined all those movements which reach down and take hold of those things upon which her sympathy, her intuition, her vision, and, above all, her optimism are at least equal in worth to the experience and the reasoning of men.

Free and untrammeled with an unoccupied world of opportunities before him, the time was when the State had need to look little into the personal affairs of the citizen—the 8-hour day, the employers' liability law, and the workmen's compensation act would have been wholly without a condition upon which to operate. But it is different now. The State dare not leave the child to the mercies of organized capitalism; the State dare not leave the home to contend alone against the intrusion of disease and poisoned food; the State dare not leave the laborer to contend against those powerful corporations which the State has endowed with all the powers of sovereignty; the State, in short, must meet the responsibilities of the hour and expand in scope and purposes with the expanding forces of industry. I ask you, whose judgment, whose force of character, whose miraculous power to detect the forces of right and wrong, would you prefer to have than hers who, in every great crisis of the world, has borne in full in camp, in hospital, in secret council, and in courts her due portion of the burden of the race? And why deprive her in this work of the most effective instrument for good in modern warfare—the ballot? Why withhold from her the effective instrument by which she can more surely effectuate her purposes and make permanent in the laws of her country her plans? No; equal suffrage will come. It will come through the votes of the respective States, as it should come, as the expressed will of the people. It will come like all the great reforms, not in a night, not before the people have lived up to it and seen the need of it, but through and by means of public opinion built up from year to year; it will come in harmony with the great fundamental principles upon which this Government is built, recognizing the indispensable principle of the distribution of powers between the State and the National Government. I think it was Dr. Lowell, of Harvard, who so wisely and delightfully said:

> A slow progress under the gradual pressure of a growing public sentiment does more for the advancement of civilization than a rapid movement followed by reaction. * * * The most valuable institution is not that which bears the earliest but that which bears the best fruit.

Mr. GALLINGER. Mr. President, will the Senator permit me to interrupt him?

The VICE PRESIDENT. Does the Senator from Idaho yield to the Senator from New Hamsphire?

Mr. BORAH. I yield to the Senator.

Mr. GALLINGER. Does the Senator consider the right of suffrage a local matter that the States should govern absolutely?

Mr. BORAH. I do.

Mr. GALLINGER. What is the meaning of Article IV, section 1, of the Constitution? How far does that go toward interfering with the rights of the States? I will read the first clause of it to the Senator:

> The United States shall guarantee to every State in this Union a republican form of government.

What is the exact meaning of that language? I ask the Senator for his interpretation of it.

Mr. BORAH. It would be impossible for me to say in all particulars what is a republican form of government in the view of that clause, because there are a thousand things, more or less, which enter into the question; but suffice it to say that at the time the fathers put into the Constitution of the United States the provision that the National Government should guarantee a republican form of government they sought just as earnestly for the right of the States to determine the question of franchise as they did with reference to this other proposition.

Mr. THOMAS. Mr. President——

Mr. BORAH. Just a moment. At the time they put that into the Constitution of the United States in a great many States of the Union there was no such thing as manhood suffrage at all. In most of the States of the Union men were permitted to vote by reason of property rights or property holdings or qualifications of that kind; yet it was a matter which they conceived to be for the local authorities to settle, and they believed, as I believe, that if there is no republican form of government at home there will not be any republican form of government at Washington. That clause had reference to matters wholly separate and apart from the question of suffrage, although, of course, such a condition can be conceived of that the question of suffrage might enter into it.

Mr. THOMAS. Mr. President——

The VICE PRESIDENT. Does the Senator from Idaho yield to the Senator from Colorado?

Mr. BORAH. I yield to the Senator.

Mr. THOMAS. The Senator has stated, with his accustomed vigor, his belief in the principle of woman suffrage, and also that, in his judgment, it will ultimately prevail in the States of the Union, except in those States where the race question is imminent, and that it will not prevail there because of that fact. The Senator believes in woman suffrage, and, therefore, in the benefit of its extension everywhere. I will therefore ask the Senator whether, either for the purpose of promoting this great cause or for any other reason, he would be willing to vote for the repeal of the fifteenth amendment?

Mr. BORAH. Mr. President, I say very frankly that if woman suffrage in this country depended upon the repeal of the fifteenth amendment, if there were no way to get woman suffrage except to get it through an amendment to the Constitution of the United States, and I believed that in order to get it the fifteenth amendment would have to be repealed, I would vote to repeal the fifteenth amendment. But no such necessity can ever arise; there is a wiser and easier way to get woman suffrage.

Mr. THOMAS. The Senator has stated, in substance, that suffrage is a local question and that our predecessors erred in the adoption of the fifteenth amendment in attempting to accomplish the impossible, of course interfering with the right of the States locally to control the elective suffrage. My question is whether, for the purpose of restoring prior conditions, the Senator would vote to repeal the fifteenth amendment?

Mr. BORAH. Mr. President, I am not at all afraid of the logic of my position, and I want to say to the Senator that if there is to be found no way in which to enforce the fifteenth amendment I would unhesitatingly vote to repeal it. It is a certainty now that it is a delusion and a snare; it misleads one race and it imposes upon another race a condition which ought not to be imposed upon them unless some good result flows from it. Mr. President, it is 50 years since that amendment was adopted.

Mr. VARDAMAN. Mr. President——

Mr. BORAH. Just a moment—50 years ago that amendment was adopted, and I have not a particle of doubt that the consensus of opinion of the country is, if it had the courage to say so, that it was a mistake at that time.

Mr. THOMAS. Mr. President——

Mr. BORAH. Just a moment. But 50 years have passed; the negro has made great strides in development, notwithstanding the conditions under which he has lived; and it would be a wholly different thing to put upon him the discouragement which would follow from its repeal. It would have been better for him to have passed through a probation and earned his franchise; and I conceive a repeal after 50 years a wholly different thing from its original enactment.

Mr. VARDAMAN and Mr. THOMAS addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Mississippi?

Mr. BORAH. I think I have yielded to the Senator from Colorado. Afterwards I will yield to the Senator from Mississippi.

Mr. THOMAS. I only desire to ask the Senator one more question. The Senator has stated that in its operation the effect of the fifteenth amendment on the colored vote has been a delusion and a snare. Is it not equally true that, so far as that vote is concerned, based upon the same logic, the amendment now proposed would be a delusion and a snare?

Mr. BORAH. Yes; and I do not propose to be a party to a delusion and a snare. The Senator is quite right in his inference.

Mr. VARDAMAN. Mr. President——

The VICE PRESIDENT. Does the Senator from Idaho yield to the Senator from Mississippi?

Mr. BORAH. I do.

Mr. VARDAMAN. I desire to state to the Senator from Idaho that the right of the negroes to vote in the South was not so violently antagonized by the white man in the South until it was discovered that the negro was wholly unfit for and incapable of performing properly the supreme function of citizenship and of understanding the genius of this Government. The white man endeavored honestly and sincerely to induce the negro to share with him in the government of the country. The negro declined to do so, and his domination was submitted to until the civilization of the South was simply vanishing, the public domain was squandered, the Public Treasury looted, and the civilization of the fathers passing away. Time has not, I submit to the Senator from Idaho, shown the negro's capacity for self-government, and as the negro has demonstrated no capacity for the government of himself, it follows as a logical sequence that he is incapable of governing the white man.

Mr. BORAH. Mr. President——

Mr. VARDAMAN. While the negro has made some progress in the acquisition of property, as a matter of fact, with all the assistance that has been rendered him by the white man, by the schools, by the churches, by the colleges, and by all the other agencies and instrumentalities provided by the white man, he is to-day as incompetent and unreliable not only in the South but in the North as he was 50 years ago.

Mr. BORAH. Mr. President, of course I would have to differ from my friend from Mississippi in the ultimate conclusion which he reaches. I have been discussing this matter as a question of fact and a question of history. I do not believe that you will find in the history of the world a race which has developed and proven itself so rapidly as the negro race has when you take into consideration——

Mr. VARDAMAN. In what respect does the Senator refer to his improvement?

Mr. BORAH. Well, Mr. President——

Mr. VARDAMAN. He is more criminal to-day as a race than he was in 1861.

Mr. BORAH. That is true of the white man in this country, too.

Mr. VARDAMAN. As a matter of fact, it is not.

Mr. BORAH. I do not mean the white man in the South, but the ratio of crime along certain lines is greater now than it has ever been in the history of this country. We are in some matters a lawless people.

Mr. VARDAMAN. As a matter of fact, the negro has increased in crime, and the records will show that as a race he is more criminal to-day than he was in 1861. That is the case in Pennsylvania and in Idaho, as it is the case in Mississippi.

Mr. BORAH. Mr. President, I have not the statistics with me with reference to the figures, and it may be that I am in error; but I have been of the opinion, and I entertain that opinion now, that the negro has advanced in many ways, not only in reference to the accumulation of property but with reference to acquiring those habits of settled vocation, of love of home and family, and so forth, which make for good citizenship; but, in my judgment, he has advanced most remarkably in his conception of government. I want to say, Mr. President, for the negro—and I say it in all sincerity—that while the negro may not understand the workings of our Government as the Senator from Mississippi and the anglo-Saxon generally understand them, there is no one who is more loyal as a matter of sentiment and as a matter of intuition to the flag which floats over him than is the black man.

Mr. VARDAMAN. On what does the Senator base that statement?

Mr. BORAH. This old Government and its flag are his religion. He may, by reason of the conditions under which he has lived for years, do many things which the white man criticizes, but when you come to talk to the negro about this Government and to ascertain what he thinks about it and what he is willing to do for it, you never hear a disloyal word from the lips of the negro; at least, I never have. The one vice, the one curse of this age—constant disparagement of government—that vice does not belong to his race. He is loyal as he understands it, and that is the basis of good citizenship.

Mr. VARDAMAN. You may not hear a disloyal word, but the Senator from Idaho very well understands that he has no idea whatever of loyalty to his obligations of citizenship. The Senator knows the negro in politics, and he knows his record in the national conventions, and he has never known one in his life whose vote could not be influenced by a very few dollars.

Mr. BORAH. Well, Mr. President, my observation has been different.

Mr. VARDAMAN. I will cite the Senator the example at Chicago at the last Republican convention.

Mr. BORAH. But, Mr. President, that argument is no compliment to the white man, because no negro ever bribed himself. It takes a white man to do it, and there are generally about 50 white men attempting to bribe 1 negro. So far as convention matters are concerned, if it were gone into it would be shown that the negro has withstood temptation with remarkable strength.

Mr. GALLINGER. And a great many white men have yielded.

Mr. BORAH. Yes.

Mr. President, I have been talking about the negro with reference to his treatment under the fifteenth amendment. I am not going into the other question at this time, but, so far as concerns the views which the Senator has expressed with reference to the negro's development, and so forth, I should have to disagree with him, although I do not propose at this time to discuss the matter. The time will come when the negro will have rights according to his developments. He will enjoy rights according to the faith which is in him and which he has proven to be in him.

I had intended to discuss one other feature of this matter, but——

Mr. POINDEXTER. Mr. President, before the Senator passes to that, I should like to ask him a question in order that I may understand exactly his theory of the relation of the Federal Government to the States with reference to the franchise.

The Senator from Idaho very eloquently and very accurately described the conflict of the rival views of Hamilton and Jefferson in the formation of the Constitution, and emphasized the

importance of preserving to the States their rights; and the Senator eulogized in the most eloquent way the great influence of Abraham Lincoln in preserving those rights. Am I correct in inferring from that and from the Senator's connecting that with the resolution now before the Senate, that the Senator from Idaho maintains that this resolution would involve any change in the theory or system upon which the respective powers of the State and the Federal Governments are maintained? Is it not simply a question of degree? And did not the Constitution as it was originally framed and before any of the amendments were adopted contain numerous inhibitions upon the powers of the States? The States were prevented from doing a great number of things which it might be desired by some particular States to do. Then the amendments to the Constitution, which were readily adopted almost at the first session of Congress after the Constitution was ratified, placed a number of other prohibitions upon the States. No State may issue a bill of attainder nor pass an ex post facto law. No State may pass any law which violates the obligation of contracts. No State may maintain troops or ships of war without the consent of the Federal Government.

Abraham Lincoln himself, in the great work of his life, was the leader in this country of the movement to destroy what had been one of the great central claims as to State rights, that negro slavery was a domestic State institution, with which the Federal Government had nothing to do, and the result of his efforts in that direction was that slavery in the States was prohibited by the Constitution of the United States.

If this resolution is adopted, of course it still leaves discretion in the States as to the qualification of the franchise, with the single exception, so far as this resolution is concerned, that woman shall not be prohibited from voting merely because of her sex. Does it not leave the entire framework and system which the Senator has described as being so essential to the perpetuity of our institutions the same as it was before?

Mr. BORAH. Mr. President, Mr. Lincoln during his entire career, until it became necessary as a war measure, always contended that the question of slavery was a domestic matter and should be left entirely to the States. He said in his debate with Mr. Douglas, and he said repeatedly, that he had no intention of interfering with the affairs of the Southern States with reference to slavery; and he was against slavery from his boyhood days. He denounced it early in his legislative career in the Legislature of Illinois. He was the man who offered in the Illinois Legislature a resolution against it; but he repeatedly stated in his public utterances and in his debate with Douglas and in his messages, that it never was his intention to interfere with it in the respective States; that it was a matter for them to settle; and he never did so until it became necessary, in his opinion and in the opinion of his Cabinet, to make the proclamation which resulted in the freedom of the slaves as a war measure for the preservation of the Union as a whole. Had Mr. Lincoln been permitted to pursue his way without the difficulties of war, he never would have interfered with slavery in the respective States, according to his declaration.

Mr. VARDAMAN. Mr. President, I think the Senator from Idaho is absolutely correct in his statement. Mr. Lincoln said, "The time has arrived when we must know whether the black man is for us or against us." It was purely a war measure; and the purpose was that the emancipation of the negro might so disorganize conditions in the South that it would bring about demoralization in the Southern Army. He thought that an insurrection among the negroes would follow the emancipation proclamation and that the Confederate soldier would be forced to lay down his arms and go back home to protect his family. It was purely a war measure. He stated in all of his addresses and in all of his campaigns that he knew he had no right to interfere with slavery in the States where it was recognized by law.

Mr. POINDEXTER. Mr. President——

The VICE PRESIDENT. Does the Senator from Idaho yield to the Senator from Washington?

Mr. BORAH. I yield.

Mr. POINDEXTER. Just one moment. The qualification which the Senator from Mississippi attached to his statement in the very last words he used destroys the force of the contention which he is making on this particular question. He said, "where it was recognized by law." Lincoln did not propose to abolish slavery in the States, but Lincoln proposed to change the law. I do not think it can be found in the writings of Lincoln that he was opposed to an amendment to the Constitution.

Mr. VARDAMAN. The Senator from Washington can not find an utterance in any of Mr. Lincoln's speeches or writings where that is stated. His purpose was to prevent its being carried into new States or Territories; but he maintained in all of his debates with Douglas that he had no right to interfere with it in the States where it was established.

Mr. POINDEXTER. Why, he did interfere with it in the States. He was opposed to the Dred Scott decision. He was opposed to Douglas's idea of squatter sovereignty; and his fame and reputation as a leader of his party in the United States, which finally brought him the Presidency, was based on his proposition that the new States should not set up the domestic institution of slavery within their borders. I do not know that he intended to interfere with those States where it was already established.

Mr. BORAH. Mr. President, the Senator from Washington is greatly in error. Mr. Lincoln never criticized the Dred Scott decision because he believed the National Government should interfere with slavery in the States, but for the reason that he believed that the effect of the decision was to take away from the State the right to determine whether or not it should have freedom for the slave or slavery for the slave. Mr. Lincoln said: Kansas has the right to say, when the negro comes within the lines of Kansas, that he shall be free, and that the National Government shall not send a slave into the State of Kansas and keep him a slave. Kansas may free him the moment he crosses the line, and then Illinois may welcome the slave from the South and give him his freedom when he crosses the line. He contended that the Dred Scott decision had the effect of saying that Illinois was deprived of her power to declare that proposition.

Mr. SHEPPARD. Mr. President, may I ask the Senator a question?

Mr. BORAH. I yield.

Mr. SHEPPARD. What distinction does the Senator draw between this proposed amendment, from the standpoint of the principle of local self-government, and the national prohibition amendment?

Mr. BORAH. I know the Senator from Texas is very anxious that no argument shall be made here against the national prohibition amendment.

Mr. SHEPPARD. I am.

Mr. BORAH. I will say to the Senator that the national prohibition amendment might be justified upon the theory that it would be dealing with a national question—interstate traffic—and that it is not local and can not be controlled as a local question; that the States can not deal with it, as it permeates and extends throughout the Union, disregardful of State lines. And here let me say that the doctrine of local self-government does not oppose the taking over by the National Government of those things once local but which through industrial and economic changes have become national in scope. If a subject really becomes national in scope and effect, the National Government should not hesitate to take hold of it. But the right to vote can never, in the very nature of things, be other than a local question, for upon it rests the very integrity and sovereignty of the State.

Mr. SUTHERLAND. Mr. President——

Mr. BORAH. I will yield to the Senator in just a moment. By reason of our industrial development a business matter which was local 50 years ago may be interstate or national at this time, and may be national in its scope. A commercial affair which was local at the time they did business with wheelbarrows and covered wagons may not have been national in its scope, but it may become so when you build railroads, and commerce thereby broadens the proposition. The only thing I have sought to contend for is that that which is local in its nature, as I conceive this matter to be, should be permitted to remain local, and that that which is national or becomes national by reason of industrial and commercial development may properly come under control of the National Government.

Mr. SUTHERLAND. Mr. President, the Senator from Idaho has passed from the point about which I wanted to ask him. He said, in answer to the Senator from Texas, that the proposed amendment on the prohibition question might be justified because it dealt with interstate commerce. In the first place, let me say that I do not understand that in making an amendment to the Constitution it is necessary that any authority for it shall be found in the existing Constitution. We may adopt an entirely new thing. Passing by that point, however, how does the Senator think the manufacture of intoxicating liquors is a matter of interstate commerce? I understand the manufacture is included within this bill.

Mr. BORAH. I have no desire to enter into a discussion of the prohibition question. I do not want all problems on my hands at once. I will say, however, that I have never accepted the doctrine of the Knight case, that the manufacture of goods intended to be exported and put into commerce was purely a local concern of the State. I think that is interstate commerce,

when it is manufactured and being put into interstate commerce. I think the act of manufacturing itself is part and parcel of the conduct of the business of interstate commerce when it is manufactured with a view of being shipped in interstate trade.

Mr. SUTHERLAND. But the proposed amendment would prohibit the manufacture of liquor to be used wholly within a State.

Mr. BORAH. That might be a result of prohibiting its manufacture for the purpose of shipping it between States. That would be an incident, however, and not the prime design.

Mr. President, in conclusion, very briefly, I will say that I have not a doubt that woman suffrage is going to prevail in this country. I have not any doubt that when it does prevail it will prevail through the action of the respective States in voting upon the proposition. I have not any doubt that that is the way in which it ought to prevail.

I have from the beginning, from the very first agitation of this question, earnestly supported the proposition of permitting the States to pass upon it. When I first came to Congress a proposed amendment to the Constitution was brought to me. I was told at that time that it was for educational purposes; that the design was to present it before the Congress and have it discussed, in order that it might have its educational effect in many States of the Union. I had no objection to that. I was thoroughly in favor of the proposition as an educational matter which by its reflex action would assist in the States. It was a desirable thing to do.

I have no criticism to make of those who are urging this resolution for the purpose of getting the matter before the Nation and calling attention to it in order that they may have a better means of reaching the public mind, in order that they may have the views of public men more directly carried to the people as an educational proposition. When, however, you turn from the educational phase of the matter and ask me to vote for an amendment to the Constitution which, in my judgment, never will be adopted, and which, if it were adopted, would be futile and a delusion in a number of the States of the Union, I feel that I am unable to concede the proposition.

### USE OF WATERS OF RIO GRANDE, COLO.

Mr. THOMAS. Mr. President, I desire to renew the notice I have given for March 18, and to state that I shall address the Senate on Monday, March 23, immediately upon the conclusion of the routine morning business, upon Senate joint resolution 117.

### PANAMA EXPOSITION (H. DOC. NO. 840).

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read and, with the accompanying papers, referred to the Committee on Foreign Relations and ordered to be printed:

*To the Senate and House of Representatives:*

I transmit herewith a report from the Secretary of State in relation to the invitation from the Government of Panama to this Government to participate in an exposition which is to open at the city of Panama on November 3, 1914, and I join with the Secretary of State in strongly recommending the authority of Congress for the acceptance of the invitation and an appropriation of $100,000 to enable suitable participation by the United States.

As the exposition will open as early as November 3 next, prompt action by Congress on the recommendation is essential to proper and adequate preparation for the participation.

WOODROW WILSON.

THE WHITE HOUSE, *March 17, 1914.*

### URGENT DEFICIENCY APPROPRIATIONS.

Mr. MARTIN of Virginia. I am directed by the Committee on Appropriations, to which was referred the bill (H. R. 13612) making appropriations to supply urgent deficiencies in appropriations for the fiscal year 1914, and for prior years, and for other purposes, to report it with amendments, and I submit a report (No. 350) thereon. I give notice that to-morrow at some convenient time I shall ask the Senate to take up the bill for consideration.

The VICE PRESIDENT. The bill will be placed on the calendar.

### EXECUTIVE SESSION.

Mr. KERN. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 30 minutes spent in executive session the doors were reopened, and (at 5 o'clock and 20 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, March 18, 1914, at 12 o'clock meridian.

## NOMINATIONS.

*Executive nominations received by the Senate March 17, 1914.*

S. H. Gardner to be postmaster at Honey Grove, Tex., in place of Thomas D. Bloys, deceased.

C. V. Gates to be postmaster at Gorman, Tex., in place of Robert F. Nelson. Incumbent's commission expires April 5, 1914.

George N. Gentry to be postmaster at Pecos, Tex., in place of George E. Sapp. Incumbent's commission expires April 20, 1914.

Reuben J. Kennedy to be postmaster at Whitesboro, Tex., in place of Frank W. Reast. Incumbent's commission expired February 18, 1914.

J. F. Kunkel to be postmaster at Clarksville, Tex., in place of Robert J. King. Incumbent's commission expires April 20, 1914.

William R. McAdams to be postmaster at Lorena, Tex., in place of Joe B. Ferrell. Incumbent's commission expires April 20, 1914.

W. H. McCurdy to be postmaster at Moody, Tex., in place of W. James Gilmore. Incumbent's commission expired February 8, 1914.

Joseph B. Patty to be postmaster at Brookshire, Tex., in place of Lee D. Ford, removed.

J. R. Ransone, jr., to be postmaster at Cleburne, Tex., in place of Carlton A. Dickson. Incumbent's commission expires April 20, 1914.

F. J. Reese to be postmaster at Comanche, Tex., in place of George L. Sullivan. Incumbent's commission expires April 5, 1914.

J. P. Rodgers to be postmaster at Hico, Tex., in place of Milton O. Gleason. Incumbent's commission expires March 18, 1914.

E. W. Sharman to be postmaster at Liberty, Tex., in place of Thomas F. Calhoon. Incumbent's commission expires December 20, 1914.

J. S. Spradley to be postmaster at Van Alstyne, Tex., in place of Gaines L. Burk, resigned.

UTAH.

George W. Young to be postmaster at Coalville, Utah, in place of E. A. Northcott. Incumbent's commission expired January 19, 1914.

VERMONT.

Robert H. Royce to be postmaster at Johnson, Vt., in place of Max A. Wilson. Incumbent's commission expired January 31, 1914.

VIRGINIA.

Richard P. Barham to be postmaster at Petersburg, Va., in place of Stith Bolling. Incumbent's commission expires April 5, 1914.

W. C. Lauck to be postmaster at Luray, Va., in place of Charles T. Holtzman. Incumbent's commission expired March 7, 1914.

John B. Norfleet to be postmaster at Suffolk, Va., in place of Edwin M. C. Quimby. Incumbent's commission expired March 10, 1914.

L. E. Stephenson to be postmaster at Wakefield, Va., in place of Emmet W. Brittle. Incumbent's commission expires April 5, 1914.

John S. White to be postmaster at Charlottesville, Va., in place of William S. Humbert. Incumbent's commission expires April 20, 1914.

WASHINGTON.

Mae O. Gray to be postmaster at Stevenson, Wash. Office became presidential January 1, 1914.

Anna P. Hanley to be postmaster at Enumclaw, Wash., in place of William F. Koenig. Incumbent's commission expires April 5, 1914.

Charles O. Jackson to be postmaster at Eatonville, Wash. Office became presidential January 1, 1914.

Charles H. Runkel to be postmaster at Arlington, Wash., in place of Charles H. Jones. Incumbent's commission expires March 17, 1914.

WEST VIRGINIA.

Harvey Ewart to be postmaster at Hinton, W. Va., in place of Sira W. Willey. Incumbent's commission expired March 16, 1914.

J. K. Kerwood to be postmaster at Ripley, W. Va., in place of Henry W. Deem. Incumbent's commission expires April 13, 1914.

Buckner F. Scott to be postmaster at Terra Alta, W. Va., in place of William T. White, resigned.

Joseph F. Thompson to be postmaster at Martinsburg, W. Va., in place of E. C. Henshaw. Incumbent's commission expires April 28, 1914.

A. H. Wiedebusch to be postmaster at Wheeling, W. Va., in place of Robert Hazlett, resigned.

James W. Wilson to be postmaster at Barboursville, W. Va., in place of James Brady, resigned.

WISCONSIN.

Lyle I. Daigneau to be postmaster at Boyceville, Wis. Office became presidential January 1, 1914.

WYOMING.

C. W. Dow to be postmaster at Newcastle, Wyo., in place of Frank B. Fawcett. Incumbent's commission expired March 16, 1914.

## CONFIRMATIONS.

*Executive nominations confirmed by the Senate March 17, 1914.*

POSTMASTERS.

MICHIGAN.

Charles E. Adair, Utica.
Edgar E. Bedell, Bellaire.
George L. Belcher, Leslie.
Samuel D. Bonner, Newaygo.
Ernest J. Dubé, Houghton.
Thomas G. Finucan, Charlevoix.
Michael Hoban, St. Ignace.
James L. Klett, Whitehall.
Christopher Lowney, Laurium.
Charles F. Parker, Middleville.
Jacob C. Rough, Buchanan.
John E. Shekell, Jackson.
N. C. Sutherland, Romeo.

VIRGINIA.

John S. White, Charlottesville.

## HOUSE OF REPRESENTATIVES.

### TUESDAY, *March 17, 1914.*

The House met at 12 o'clock noon.

Rev. Dr. Joseph H. Crooker, of Boston, Mass., offered the following prayer:

Almighty God, our Father, infinitely fatherly, a Friend forever friendly, we honor and glorify Thy high and holy name, and we thank Thee for the blessings of life that come to us from day to day; we thank Thee for our country, its schools, and courts, and churches; we thank Thee for the American home, woman's kingdom and man's paradise; we invoke Thy blessing, we seek Thy grace, we crave Thy forgiveness, we would learn Thy truth, we would obey Thy law, we would establish Thy kingdom on earth, and now we give Thee praise from grateful hearts evermore. In the name of our common Master. Amen.

The Journal of the proceedings of yesterday was read and approved.

CLERK PRO TEMPORE.

The SPEAKER laid before the House the following communication from the Clerk of the House:

To the SPEAKER OF THE HOUSE:

Desiring to be absent from my office for a short period of time, I hereby designate the Chief Clerk, J. C. South, Esq., to sign all papers that may require my official signature, and to do all other acts under the rules and practice of the House required to be done by the Clerk of the House.

Respectfully submitted.

SOUTH TRIMBLE,
*Clerk of the House.*

MARCH 17, 1914.

EXTENSION OF REMARKS.

Mr. SIMS. Mr. Speaker, I wish to ask unanimous consent to extend my remarks in the RECORD by publishing some letters I have pertaining to the proposition of the increase in the freight rates in the eastern district.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to extend his remarks by printing some letters on the subject of the increase in freight rates in the eastern division. Is there objection?

Mr. GORDON. Mr. Speaker, I object.

PENSIONS.

Mr. HELVERING. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House to consider pension bills on the Private Calendar; and, pending that, I want to ask unanimous consent that H. R. 14234 be considered in the House as in Committee of the Whole House.

The SPEAKER. The gentleman from Kansas moves that the House resolve itself into the Committee of the Whole House for the purpose of considering pension bills on the Private Calendar; and, pending that, he asks unanimous consent that H. R. 14234 be considered in the House as in Committee of the Whole House. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, the gentleman understands, of course, that provides for no general debate.

Mr. HELVERING. I will say to the gentleman from Illinois I understand there is no desire for general debate on this bill.

The SPEAKER. May the Chair inquire of the gentleman if this is the only bill he has?

Mr. HELVERING. This is the only bill reported by the Committee on Invalid Pensions. There is one from the Pensions Committee to be taken up.

The SPEAKER. Is there objection that the bill H. R. 14234 be considered in the Committee of the Whole House? [After a pause.] The Chair hears no objection. The question now is on the House resolving itself into the Committee of the Whole House for the consideration of pension bills.

The question was taken, and the motion was agreed to.

EXTENSION OF REMARKS.

Mr. SMITH of Minnesota. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. SMITH of Minnesota. Mr. Speaker, I wish to ask unanimous consent to extend my remarks in the RECORD on the subject of hydroelectric power by printing a petition from the Minneapolis Civic and Commerce Association.

The SPEAKER. The gentleman from Minnesota asks unanimous consent to extend his remarks on hydroelectric power. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the first bill.

PENSIONS.

The Clerk read as follows:

A bill (H. R. 14234) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war.

Mr. HELVERING. Mr. Speaker, I ask unanimous consent that the first reading of the bill be dispensed with.

The SPEAKER. The gentleman asks unanimous consent that the first reading of the bill be dispensed with. Is there objection. [After a pause.] The Chair hears none. Members will bear in mind that this bill is being read for amendment, section by section.

The Clerk read as follows:

The name of James Chambers, late of Company C, Forty-third Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

Mr. HELVERING. Mr. Speaker, I move, page 21, lines 21 to 24, to strike out the name of "James Chambers."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend by striking out, on page 21, lines 21, 22, 23, and 24.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

The name of William Eastlick, late of Company G, One hundredth Regiment Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

Mr. HULINGS. Mr. Speaker, I offer an amendment, page 28, line 3, by striking out "forty" and inserting "fifty."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 28, line 3, by striking out "$40" and inserting "$50."

Mr. HULINGS. Mr. Speaker, I had brought this to the attention of the chairman of the Committee on Pensions, Gen. SHERWOOD, and he agreed with me that under the circumstances this was a mistake, and that he would offer this amendment to-day. Now, the circumstances are very peculiar in this case. This man has served about four years, as will be seen by the report on page 60 of the report of the committee, and $40 will scarcely pay the physician's attendance, which he requires two or three times every day. The man is blind, totally helpless, has no revenues except the pension that he is now getting of $15 per month, and I would like to bring that to the attention of the House and have this amendment made.

The SPEAKER pro tempore (Mr. DIFENDERFER). The question is on agreeing to the amendment offered by the gentleman from Pennsylvania [Mr. HULINGS].

Mr. RUSSELL. Mr. Speaker, the gentleman from Ohio [Mr. SHERWOOD] is not present to-day. I know nothing about this arrangement between the gentleman from Pennsylvania [Mr. HULINGS] and the gentleman from Ohio. Of course, if Gen. SHERWOOD has agreed to offer this amendment himself as a member of the committee, I would not want to resist it, because I know that in all cases he, as chairman of the committee, tries to do that which he believes to be equitable and just to the soldiers of the country. This appears to be a very fair case, under our rules, for a $50 allowance. Why it was allowed for $40 I do not know. However, I do not feel disposed to support this motion, and I do not like under the circumstances to oppose it. I regret exceedingly that the gentleman from Ohio [Mr. SHERWOOD] is not here. I shall not support this amendment and do not like to oppose it, as I have said, under the circumstances.

Mr. GOULDEN. I would like to ask the gentleman from Missouri [Mr. RUSSELL] if he regards this as a case that should have been placed at $50, why the committee put it at $40?

Mr. RUSSELL. I have no personal recollection of it. The presumption would be with me that the examiner who wrote up and recommended this bill thought it was a $40 case and therefore allowed that amount. And in all probability the attention of the committee was not specifically called to this bill and therefore the amount was not increased. Now, the gentleman from Pennsylvania [Mr. HULINGS], as I understand, did not appear before the committee, but says that he had a conversation with Gen. SHERWOOD, which I have no occasion to doubt, and that Gen. SHERWOOD said it ought to be a $50 case, and that he himself would make a motion on the floor to increase it. Of course, I know nothing about that. I am told that the soldier is entirely blind and that he served four years. It would seem to be a good case for a $50 pension.

Mr. GOULDEN. Has not the chairman of the committee informed you? Of course, I would take the word of my friend from Pennsylvania [Mr. HULINGS].

Mr. RUSSELL. Gen. SHERWOOD went home to bury his wife, and therefore is not here to-day.

Mr. LANGLEY. If I correctly understand the facts, there is no question but what it is a $50 case under the rules of the committee.

Mr. RUSSELL. It would appear to be such. I imagine now that it was reduced to $40, because of this statement which I see in the report:

Claimant has real estate assessed at $900.

Mr. KINKAID of Nebraska. Will the gentleman yield for just a statement?

Mr. RUSSELL. I will yield for a question.

Mr. KINKAID of Nebraska. Mr. Speaker, I was present when this bill was up for consideration, and it was agreed by the committee that an amendment should be offered by some one on the floor.

Mr. LANGLEY. I do not think this is the bill. I think the gentleman is mistaken about this being the case.

Mr. KINKAID of Nebraska. Perhaps I am mistaken about the case, Mr. Speaker.

Mr. RUSSELL. I think the gentleman from Nebraska is mistaken about the case. I understand from the gentleman from Pennsylvania [Mr. HULINGS] that he did not appear before the committee.

Mr. HULINGS. The facts about the case are pretty well stated in the report of the committee. But the committee, I think, did not fully consider that this man, who served four years, suffered from gunshot wounds, from rheumatism and heart disease, contracted in the service, and is now receiving a pension of $15 a month, had become totally blind, and requires a constant attendant, and requires the attention of a physician two or three times every day in order that he may be catheterized. It is a very distressing case, and $40 a month will barely pay his physician's charges.

Mr. RUSSELL. The report also states that this gentleman is almost blind. It does not show he is totally blind.

Mr. HULINGS. He is totally blind to the extent that while able to distinguish between night and day he requires somebody to be with him all the time. He can not see for any practical purposes.

Mr. RUSSELL. And then this report states that he has $900 worth of property. It has been a rule of the committee to reduce the amount of pension where they have property.

Mr. HULINGS. He has a little bit of a place there, about $900 worth, a lot and a little house in which he lives, but he has no revenue except his pension.

Mr. RUSSELL. Will the gentleman yield again?

Mr. HULINGS. I will.

Mr. RUSSELL. Let me ask the gentleman if he will consent to let this item be stricken out of this bill and present it to the committee again when Gen. SHERWOOD returns?

Mr. HULINGS. Is there a probability of another bill being introduced in time, in order to get action at this session?

Mr. RUSSELL. Two weeks from to-day there will be another bill.

Mr. HULINGS. Yes; I will do that.

Mr. SIMS. Recommit it, in other words.

Mr. RUSSELL. Mr. Speaker, I ask unanimous consent that this paragraph of the bill be stricken out.

The SPEAKER pro tempore. The gentleman from Missouri [Mr. RUSSELL] asks unanimous consent that this section in the bill be stricken out. Is there objection?

Mr. HULINGS. Mr. Speaker, with the understanding that the amount shall be reported in the next bill at $50.

There was no objection.

## MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

The committee informally rose; and the Speaker having resumed the chair, a message, in writing, from the President of the United States was communicated to the House of Representatives by Mr. Latta, one of his secretaries, who also informed the House of Representatives that the President had approved and signed bills of the following titles:

On March 2, 1914:

H. R. 10258. An act authorizing the Secretary of the Interior to sell to the city of Lawton, Okla., a tract of land to be used for watershed and water-supply purposes.

On March 9, 1914:

H. R. 11338. An act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1915, and for other purposes;

H. R. 11331. An act to repeal an act regulating the construction of bridges across the Muskingum River in Ohio; and

H. R. 13365. An act to authorize the construction, maintenance, and operation of a bridge across the Tombigbee River near Old Cotton Gin Port, in Monroe County, Miss.

On March 11, 1914:

H. R. 13545. An act to extend the time for constructing a bridge across the Mississippi River at the town site of Sartell, Minn.

## PENSIONS.

The committee resumed its session.

The SPEAKER pro tempore. The Clerk will read.

The Clerk read as follows:

The name of James D. Gloud, late of Company H, One hundred and eighty-eighth Regiment New York Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

Mr. RUSSELL. Mr. Speaker, I move to amend line 19, on page 32, by striking out the word "Gloud" and inserting the word "Gload."

The SPEAKER pro tempore. The Clerk will report the amendment offered by the gentleman from Missouri.

The Clerk read as follows:

Amend, page 32, in line 19, by striking out the name "Gloud" and inserting the name "Gload."

The SPEAKER pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The Clerk will read.

The Clerk resumed and concluded the reading of the bill.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. HELVERING, a motion to reconsider the vote whereby the bill was passed was laid on the table.

The foregoing bill is a substitute for the following House bills, referred to the Committee on Invalid Pensions:

H. R. 958. John H. Stone.
H. R. 1254. Maria A. Ryburn.
H. R. 1317. Moses King, jr.
H. R. 1630. Lemuel H. Mahan.
H. R. 2045. Edwin B. Force.
H. R. 2084. William G. Irwin.
H. R. 2085. James S. Armstrong.
H. R. 2292. William F. Knisell.
H. R. 2341. Thomas R. Irons.
H. R. 2716. Mary E. Bousman.
H. R. 3029. Susan Querry.
H. R. 3037. Daniel C. Boswell.
H. R. 3045. James L. Spencer.
H. R. 3046. Ellen M. Cutler.
H. R. 3236. Robert C. Stanley.
H. R. 3245. Charles W. Botkin.
H. R. 3248. Francis M. Marsh.
H. R. 3254. Jonathan Colyar.
H. R. 3484. Mary A. Parker.
H. R. 3611. Kate R. Harner.
H. R. 3821. Jacob Smith.
H. R. 3959. Henry R. Miller.
H. R. 4093. Carrie A. Hollenbeck (now Knopple).
H. R. 4333. Julia A. Smith.
H. R. 4590. Hebron B. Miller.
H. R. 4599. James M. Dilley.
H. R. 4840. Michael Weber.
H. R. 4856. Henry Smith.
H. R. 5254. Thompson Decker.
H. R. 5288. Theodore Strunk.
H. R. 5411. Johanna Scully.
H. R. 5435. James A. Fossit.
H. R. 5455. William Foltz.
H. R. 6054. Ferdinand Walser.
H. R. 6078. John Bean.
H. R. 6121. Alfred A. Trover.
H. R. 6246. William Bales, alias William Shaffer.
H. R. 6249. William Syers.
H. R. 6253. Orin McCreedy.
H. R. 6274. Charles H. Hines.
H. R. 6430. Jennette A. Wickham.
H. R. 6547. Christianne C. Mentzer.
H. R. 6844. James B. Miller.
H. R. 6872. Josiah Summers.
H. R. 6900. Rebecca A. Libbey.
H. R. 6980. John Barbeau.
H. R. 7143. David S. Trent.
H. R. 7555. Ford Cusey.
H. R. 7815. Alfred Gordon.
H. R. 7844. Edward Lichtenstein.
H. R. 7907. Anna Windmeister.
H. R. 7930. Jeremiah Laughlin.
H. R. 8091. Jennie Saylor.
H. R. 8127. Louisa M. Carothers.
H. R. 8328. Elizabeth Mellady.
H. R. 8445. Charles S. Swineford.
H. R. 8884. Hattie Dannels.
H. R. 8929. Charles Dailey.
H. R. 8982. Jennie E. Miller.
H. R. 8706. Maria J. Burnham.
H. R. 8721. Joseph C. Bell.
H. R. 8774. Mary U. Hull.
H. R. 8860. Allen Rosebery.
H. R. 8916. James Aitken.
H. R. 9005. Hiram H. Rudd.
H. R. 9085. Solomon R. Beam.
H. R. 9152. Delia R. Goss.
H. R. 9357. Lenora Lathrop.
H. R. 9370. Narcisse Menard.
H. R. 9409. Frank M. Fry.
H. R. 9447. John Levingston.
H. R. 9504. Martha Jane B. Phillips.
H. R. 9611. Edgar H. Sampson.
H. R. 9627. Chester W. Lynds.
H. R. 9746. John M. Dodd.
H. R. 9775. Augustine M. Adams.
H. R. 9846. Samuel Faust.
H. R. 9868. Jane M. Brown.
H. R. 9939. Carrie Sheldon.
H. R. 10042. John S. Hall.
H. R. 10123. Mary M. Evans.
H. R. 10184. David C. Brown.
H. R. 10262. Michael Cavanagh.
H. R. 10264. John P. Bischoff.
H. R. 10288. Geneva Beha.
H. R. 10389. John W. Hendershott.
H. R. 10410. Cecilia Cochran.
H. R. 10412. Carolina Apfel.
H. R. 10450. Leander Chapman.
H. R. 10603. William M. King.
H. R. 10658. Robert H. Fields.
H. R. 10661. Pauline Kerr (incapable).
H. R. 10689. Sarah E. Freed.
H. R. 10692. Henry Lemke.
H. R. 10699. Levi M. Winchell.
H. R. 10701. Isaac N. Baker.
H. R. 10705. Joel H. Towner.
H. R. 10706. David S. Peters.
H. R. 10716. Seth Clark.
H. R. 10755. Andrew Sutton.
H. R. 10803. Allen S. Thatcher.
H. R. 10818. Helen G. Davis.

Mr. HELVERING. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Kansas [Mr. HELVERING] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. MURRAY of Oklahoma. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House——

The SPEAKER. That has already been done. The House resolves itself into Committee of the Whole House on the state of the Union, with the gentleman from Wisconsin [Mr. BURKE] in the chair.

Mr. MURRAY of Oklahoma. Pending that, I ask that an agreement for two hours' general debate on this bill, one hour to be controlled by the gentleman from Texas [Mr. DIES] and the other hour to be controlled by myself.

Mr. MANN rose.

The SPEAKER. For what purpose does the gentleman rise?

Mr. MANN. The House has not voted to go into Committee of the Whole yet.

The SPEAKER. The gentleman is mistaken. The way that came about was that the gentleman from Kansas [Mr. HELVERING] moved to go into the Committee of the Whole for the purpose of discussing this pension bill, and he asked, pending that, that this particular bill be considered in the House as in Committee of the Whole.

Mr. MANN. But the motion was not put.

The SPEAKER. The Chair begs the gentleman's pardon. The motion was put. The Reporter has it in his notes. But it will take less time to put it again than to hunt up the record. And pending that motion, the gentleman from Oklahoma [Mr. MURRAY] asks to consider what?

Mr. MURRAY of Oklahoma. To agree upon a division of time, whereby general debate shall be for two hours, one hour to be controlled by myself and the other by the gentleman from Texas [Mr. DIES].

Mr. TRIBBLE. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from Oklahoma a question.

Mr. MURRAY of Oklahoma. Very well.

Mr. TRIBBLE. Has the gentleman from Oklahoma charge of this bill?

Mr. MURRAY of Oklahoma. They authorized my name to be attached to the report.

Mr. TRIBBLE. I will ask the gentleman from Oklahoma if he has had his attention called to the bill introduced by myself for one Robert Wilson, who is paralyzed?

Mr. MURRAY of Oklahoma. No; I do not remember that I have had.

Mr. TRIBBLE. Does the gentleman recall the case where one of the officers in command of a company swore in these papers——

Mr. MURRAY of Oklahoma. No; I do not recall the case.

Mr. TRIBBLE. Maybe the gentleman will recall the case when I have asked him the question.

Mr. MURRAY of Oklahoma. I am sure I did not, Mr. Speaker, because the gentleman presented it to me privately a while ago.

Mr. TRIBBLE. Well, if the gentleman will allow me to ask him the question, he can answer it. One affidavit by one of his officers, by the name of Marcus B. Brewer, alleges that Robert Wilson was stricken with sunstroke at Chickamauga Park while in rank and was picked up and carried out of line. He testifies that he did have a sunstroke while in the service in line of duty. In this same case there are allegations of doctors who testify that this man is a paralytic and unable to do any work whatever, and they connect this paralysis with the sunstroke. Does the gentleman remember that case?

Mr. MURRAY of Oklahoma. No.

Mr. TRIBBLE. Has the committee considered this case?

Mr. MURRAY of Oklahoma. I do not really know.

Mr. TRIBBLE. Then I will say to the gentleman before I consent to any agreement I must have a promise from this committee to reconsider this case.

Mr. MURRAY of Oklahoma. I will say to the gentleman that the committee has considered the particular cases contained in this bill, but there are a number of other bills pending before the committee which constitute a good many more than are here. We have not had time yet to consider them. I will state to the gentleman that I have several bills myself before this committee, and not one has been reported to this House at this session. As soon as we get to the bills we will be able to do it. We have considered these bills that are embodied in the pending bill.

Now I will yield to the gentleman's question.

Mr. TRIBBLE. I will ask the gentleman if I did not write him a letter about two weeks ago, asking the committee to con-

sider this case? I now ask the gentleman if the committee did not refuse to consider it?

Mr. MURRAY of Oklahoma. I do not remember.

Mr. KEY of Ohio. Mr. Speaker, I want to state, for the benefit of the gentleman from Georgia [Mr. TRIBBLE], that that case was before the committee, and the committee saw fit to lay the case on the table.

Mr. TRIBBLE. Will you reconsider the action?

Mr. KEY of Ohio. The committee did consider it, and laid it on the table.

Mr. TRIBBLE. Will you give me a hearing on the case, and will you give my colleague from Georgia [Mr. BELL] a hearing?

Mr. MURRAY of Oklahoma. I think that would be fair.

Mr. KEY of Ohio. I think it would be necessary that the matter be taken up by a vote of the full committee. If the gentleman desires to appear before the committee he can appear before the subcommittee having that bill in charge.

Mr. TRIBBLE. Then with that understanding I will not object, Mr. Speaker, to further proceeding on the bill now before the House.

The SPEAKER. Does the gentleman from Oklahoma ask anything about the division of time in his request?

Mr. MURRAY of Oklahoma. Yes. One-half of the time to be controlled by myself and one-half to be controlled by the gentleman from Texas [Mr. DIES].

Mr. MANN. Mr. Speaker, may I ask is the debate intended to be confined to the bill?

Mr. DIES. I will say to the gentleman from Illinois that my part of it is to be confined to the bill.

Mr. MANN. To this bill?

Mr. DIES. To this bill.

Mr. MURRAY of Oklahoma. So far as I am concerned I do not care for any time at all.

Mr. MANN. We might want some time. I suppose in that event we could get it.

Mr. MURRAY of Oklahoma. Very well.

The SPEAKER. Pending the motion to go into the Committee of the Whole, the gentleman from Oklahoma [Mr. MURRAY] asks that the debate on House bill No. 14546 be limited to two hours; one half to be controlled by himself and the other half to be controlled by the gentleman from Texas [Mr. DIES]. Is there objection? [After a pause.] The Chair hears none, and it is so ordered. The question is on the motion to go into the Committee of the Whole House.

The motion was agreed to.

The SPEAKER. The gentleman from Wisconsin [Mr. BURKE] will take the chair.

The House accordingly resolved itself into Committee of the Whole House for the consideration of the bill H. R. 14546, with Mr. BURKE of Wisconsin in the chair.

The CHAIRMAN. The House is in Committee of the Whole for the consideration of H. R. 14546, the title of which will be reported by the Clerk.

The Clerk read the title of the bill (H. R. 14546) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors.

Mr. MURRAY of Oklahoma. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. If there be no objection, the first formal reading of the bill will be dispensed with.

There was no objection.

The bill is a substitute for the following House bills referred to the Committee on Pensions:

H. R. 821. Clarence B. Brown.
H. R. 917. Roy E. Knight.
H. R. 1255. Edward C. McDowell.
H. R. 1268. Hilda Furbom.

H. R. 13933. Pawil Wiczlas.
H. R. 13947. William E. Howell.

Mr. MURRAY of Oklahoma. Mr. Chairman, all I have to say about this bill is that we have considered these particular cases, and we have held pretty strictly to the line of the rules laid down for the guidance of the committee. Wherever we have found a case that in equity entitles the claimant to a pension we have tried to give it. We feel that the Pensions Committee in the House is similar to a court of equity, to supply the defects wherein the law is deficient. The department in many instances, because of the strictness of the statute, is unable to grant a pension and dismisses the application, when an examination shows that the applicant, by reason of destitute condition, in spite of inability to meet the cold letter of the law, is as much entitled to a pension as any person upon the roll. In all these cases, and especially the Spanish War cases, we have tried to ascertain the financial condition of the claimant and to grant pensions where, by reason of poverty, it was necessary to take care either of the soldier or his widow or children.

I reserve the balance of my time.

Mr. DIES. Mr. Chairman, I feel that the attention of the committee ought to be called to this legislation. If I did not believe that this bill was made up of a lot of cases that are wholly out of proportion not only to the law but to the pensions that are paid to soldiers of the Civil War, I would not take up the time of the committee to call their attention to the matter. I do not know but you can label any injustice under the sun a pension and so pass it through Congress. I am told by a gentleman who has been here many years longer than I have that you can pass any sort of an appropriation under heaven for anybody on earth if you will label it a pension.

If that is true, of course, it is not worth while to call your attention to the manifest injustice of this bill. It is not only an injustice to the taxpayers of this country, but it is an injustice to the old soldiers of the Civil War who are outclassed and outpaid by these younger men of the Spanish-American War. I warn you now that you are laying up trouble for yourselves by giving large pensions to healthy, able-bodied young men in this country who are going to walk along the same side of the street as the old, crippled, worn-out veterans of the Civil War; and those old veterans are going to take you to task, and they are going to ask you, "Why did you give this husky young fellow a greater pension than you gave to me? He is a young man who never smelled powder, and I am an old man tottering to my final fall, who went through one of the bloodiest wars in the annals of all history."

Moreover, this bill is the beginning of an old-age pension system in this country. I know many Members of Congress are in favor of old-age pensions, poverty pensions, if you please; indigent pensions. In a great many of its items this bill has nothing upon which to base a pension except the statement that the person needs it.

With this prefatory remark I want to call attention to certain specific cases. I want them to go into the RECORD. I want the people of this country to understand with what lavish hand we give from the Federal Treasury. When a case goes into the RECORD and is sent out into the country, very few people will see it this week. A few more will see it next week or week after next, because these bills come every two weeks, and if I live I purpose to call the attention of the committee to these legislative monstrosities every two weeks, as long as I am here; and at the conclusion of the consideration of this bill I am going to ask for a roll call. I probably will not get it, but I am going to ask for it in the House. I am going to ask for tellers in the committee, and I am going to ask for a roll call in the House, because I do believe that while there is no justification for a private pension bill in any case, even as to the Civil War, for we ought to have one law for all men alike, I do maintain that a system of private pensions every two weeks for the soldiers of the Regular Army and for the soldiers of the Spanish War ought to outrage the sense of justice of every Member of this body.

The first case to which I want to call attention is on page 5 of the report, in which case they propose to give the pensioner $50 a month.

Mr. KEATING. What case is that?

Mr. DIES. That is H. R. 917.

When you give a young man who was in the Spanish-American War a pension for life you give him from ten to twenty times as much money value as you give to a soldier of the Civil War to whom you give the same pension. Why? Because the actuarial value of a $10 pension to a soldier who is now 37 years old is from ten to twenty times the actuarial value of a pension to a soldier who is 70 years old. And in starting out now to take the soldiers of the Regular Army and the soldiers of the Spanish-American War and put them on the pension roll, is to do it with the knowledge before us that we are writing a debit

against the Government even more tremendous than that involved in special pension bills for the soldiers of the Civil War.

In this case the pensioner is to get $50 a month as long as he lives. He is now a young man 37 years old.

The records of the War Department fail to show the soldier was ever in the hospital for medical treatment, but do show he was reported as sick in quarters upon several occasions for a day or so, the nature of the illness not being stated. * * *

The soldier's rate of pension was increased to $24 per month from June 18, 1906, under a special act of Congress approved that date. He still receives pension at said rate.

Here is a Spanish War veteran, 37 years old, who has already had the benefit of one private pension bill increasing his pension to $24 a month, and here comes another to give him $50 a month.

The next case is on page 6 of the report, and this man is not entitled to a pension.

The records of the War Department fail to show the soldier was treated during his service for any disability, and they also show no physical examination was made at the date of his discharge.

No evidence has ever been given in this claim, and no medical examination by a board of surgeons was ever had.

There is no claim here in the record that he is entitled to a pension. The only statement upon which a pension could be based is this:

And that he had an honorable service in the Confederate Army—

Did you get that?

Mr. KEATING. What case is that?

Mr. DIES. This is H. R. 1255.

Mr. KEATING. On what page of the report?

Mr. DIES. It is on page 6 of the report—

And that he had an honorable service in the Confederate Army, and afterwards in the United States Army during the War with Spain.

But in the War with Spain he shows nothing that would entitle him to a pension. He did not go through the form of a physical examination; he made no pretense of any disability. Therefore he is to be pensioned as a Confederate solder, which is charitable, I admit. I know there were no braver soldiers in the world than the soldiers in the Confederate Army. Many believe that they are entitled to receive a pension. I myself never have believed that they ought to receive pensions at the hands of the Federal Government. It has always been my hope and belief that they will never apply to the Federal Government for a pension.

Mr. GOULDEN. Will the gentleman yield?

Mr. DIES. I will.

Mr. GOULDEN. How old is this pensioner?

Mr. DIES. Seventy-four years of age.

Mr. GOULDEN. Does my friend feel that at that age, with the man in his present condition, the fact that he has served his country as he thought right during the Civil War, and then in the Spanish War, that he ought not to receive a pension?

Mr. DIES. There are a great many Confederate soldiers who served as this man did, 74 years old. If you want to pension Confederate soldiers, why take one and give him a pension when there are a long line of them who served under Johnson, who served under Lee, who served under Beauregard, who are just as deserving as this man; why single him out to give him a pension?

Mr. GOULDEN. We are not pensioning him for his services in the Confederate Army.

Mr. DIES. He is not pensionable for his service in the Spanish War.

Mr. GOULDEN. The committee find him pensionable.

Mr. DIES. The committee says that the record shows that no physical examination was made at the date of discharge, and no evidence has ever been given in this claim, and no medical examination by a board of surgeons was ever had. There is no evidence at all upon which to base a pension for services during the Spanish War, and the only claim is that he is 74 years old and served in the Confederate Army.

Mr. GOULDEN. The gentleman from Texas evidently knows that at the close of the Spanish-American War, when they were mustered out, the men were asked if they were suffering from any wound or disability because of their service, and out of a spirit of patriotism and pride lots of men answered "no." I had a nephew who served in the Spanish-American War, very sick at the time, who answered this way.

Mr. DIES. I do not know why men when they were mustered out should make a false statement about it. If somebody asked him if he was sick, I do not see why he should not acknowledge it. If they asked him if he had lost a leg, I do not see why he should not admit it. If they asked him if he had malarial fever, I do not see why he could not say "yes" without reflecting upon his patriotism.

Mr. GOULDEN. They thought that in doing that it was not patriotic.

Mr. DIES. No; they knew in that day that they did not deserve a pension, and it is only after Congress allows it to be used for political purposes that they come and ask for pensions.

Now, the next case is on page 7 of the report.

Mr. KEY of Ohio. Will the gentleman yield?

Mr. DIES. For a question.

Mr. KEY of Ohio. I would like to ask the gentleman from Texas if he referred to the case of Roy E. Knight?

Mr. DIES. I want to call the attention of the committee to a number of cases and the facts under those cases.

Mr. KEY of Ohio. I wanted to call the gentleman's attention that he objected to the case of Roy E. Knight.

Mr. DIES. I am not objecting to anything; I am simply calling attention to these cases.

Mr. KEY of Ohio. Why did not the gentleman call attention to the fact that the man is almost totally blind?

Mr. DIES. Oh, I can not read all these reports in full. I call the committee's attention to the cases, and it is the Members' duty to read the report in full. The gentleman would not wait for me to read all these reports.

Mr. KEY of Ohio. But the gentleman picks out one particular point and does not go through the case. As I say, this soldier is almost totally blind.

Mr. DIES. I can not yield to the gentleman further. As I say, I can not read all of the reports in these cases or in any case. I give you the salient facts, and you can rely upon it that what I tell you about a case is true.

Now, the next case is, on page 7, the case of Hilda Fardom, of Kalmar, Kingdom of Sweden. The record shows that on February 17, 1902, the widow filed a claim relating the death of the soldier due to military service. This claim was rejected April 26, 1902, on the ground that the evidence on file does not establish the cause of the soldier's death or of its connection with the military service, and the claimant declares her inability to furnish additional evidence.

This is just another case where you are generous and tax the people of the United States for a pension unauthorized by law to some good woman who lives in the Kingdom of Sweden.

The next case is on page 11 of the report H. R. 1304. This is a beautiful case. This is the case of Rosie Scott, who is the widow of Robert Scott, who served in the United States Navy from April 6, 1872, to November 11, 1873, one year and 7 months. He drew from the Federal Government the sum of $1,698 in pensions. He had been drawing pensions of some sort for 37 years for that service, and this bill provides to pension his widow.

You will find on page 13 H. R. 1437. In this case the pensioner drew two pensions for many years. Under the law one person can not draw two pensions. The Bureau of Pensions dropped one pension, because no person can lawfully draw two. Now the committee proposes to leave her drawing the pension as a mother and to give her $30 per month as a widow. I call your attention to the fact that that which is a penitentiary offense under the pension laws of the country is written into the bill, and she is given two pensions for one person.

Mr. MURRAY of Oklahoma. Will the gentleman yield?

Mr. DIES. Yes.

Mr. MURRAY of Oklahoma. Is that the case of Parmelia R. Parris, of Hutchinson, Kans.?

Mr. DIES. Yes.

Mr. MURRAY of Oklahoma. She is a widow of a Mexican War veteran.

Mr. DIES. Yes. She is an old woman and had a son in the Civil War and a husband in the Mexican War. She drew two pensions for many years, and one of them was dropped. And you now go outside of the law to give her $30 per month and give her two pensions, which the law does not countenance. I do not know of a case under the great Civil War where any person, whether a general or the humblest soldier, or his wife, has ever been allowed lawfully to draw two pensions or is now drawing two pensions.

Mr. LANGLEY. Mr. Chairman, will the gentleman yield?

Mr. DIES. For a question.

Mr. LANGLEY. Is the gentleman certain that his statement is correct, that this claimant is to draw two pensions?

Mr. DIES. I am taking the report of the committee.

Mr. LANGLEY. Does this pension not take the place of a previous pension?

Mr. DIES. No.

Mr. KEATING. Mr. Chairman, will the gentleman yield for a moment?

Mr. DIES. No. I want to answer the gentleman's question.

Mr. KEATING. I am anxious that the gentleman answer it correctly.

Mr. DIES. The gentleman can not help me to do that.

Mr. KEATING. It will enable the gentleman to answer it correctly if he will read the bill, because the bill says that she shall be granted a pension at the rate of $30 a month in lieu of that she is now receiving, and when the gentleman says we grant her two pensions he is simply endeavoring to mislead the House.

Mr. DIES. I can not yield further. Here is the language of the committee. I will read it, and then we will see whether I am trying to mislead the House:

H. R. 1437. Parmelia R. Parris, Hutchinson, Kans., widow of Bennett Parris, deceased, who served during the War with Mexico in Company D, First Regiment United States Dragoons, from September 27, 1847, to August 12, 1848. (W. C. 807.)

The soldier died in 1866, and a pension was, on June 30, 1887, allowed to the petitioner as his widow from January 29, 1887, under the act of Congress approved that date, at $8 per month.

The petitioner was the mother of James L. Parris, who enlisted January 26, 1864, in Company H, Seventh Regiment Illinois Volunteer Infantry, and was killed in battle October 5, 1864, and she was granted a pension of $8 per month as his mother from the day following the soldier's death. She was receiving this pension when she applied for and was allowed a pension as the widow of her husband, who had served during the War with Mexico. She continued to draw the two pensions until 1896, and it was clearly shown she was innocent of any intent to defraud, and believed she was entitled to receive both pensions at one and the same time. She was given the right to elect which pension she wished to retain, and selected that as mother—they were the same rate, $8—and recovery was made of all erroneous payments and pension as widow was terminated. Under the act of April 19, 1908, the rate was increased in each class to $12, and she now receives pension as the mother at $12 per month.

She could, if she so elected, surrender the pension she draws as a mother and be restored to the rolls as a pensioner at the same rate—$12 per month—as widow of a Mexican War soldier.

I submit, Mr. Chairman——

Mr. KEATING. Finish the reading of the report.

Mr. DIES. Mr. Chairman, if the committee had not intelligence enough to say what they mean, then they ought not to be unfair enough to challenge my motives, to impugn my motives for following the language of the report.

Mr. KEATING. Will the gentleman yield?

Mr. DIES. For a question.

Mr. KEATING. For a suggestion.

Mr. DIES. I decline, Mr. Chairman, to yield for a suggestion.

Mr. KEATING. Then I will ask the gentleman a question. I will ask the gentleman if he will read to the committee the concluding paragraphs of this report?

Mr. DIES. I will read that:

The pending bill treats with the Mexican War claim, and the case is prepared to be considered as if she were now pensioned as the widow of a Mexican War soldier.

With the bill the petitioner files an affidavit in which she states that she is very old—she is over 80 years of age—and very feeble and has no property and no income other than her pension of $12 per month.

It is shown by competent testimony of several lay witnesses that the petitioner is the widow of the deceased Mexican War soldier, is very old and feeble, and possesses no property and has no income except her pension of $12 per month.

From the evidence submitted, your committee believe that an increase from $12 to $30 per month is warranted in this case, and it is so recommended.

What case? As the wife of a Mexican soldier. It is stated specifically that they do not deal with her pension that she is receiving now under the Civil War, but they are dealing with the Mexican War, and under that she is entitled to draw both pensions, according to my construction.

Mr. KEATING. Mr. Chairman, will the gentleman yield for a question?

Mr. DIES. I decline to yield further.

Mr. KEATING. Will the gentleman read the bill?

Mr. DIES. I decline to yield further. The gentleman has said that I am trying to deceive the committee, and if that is the opinion he has of me he ought not to ask me to yield to him.

Mr. KEATING. When the gentleman gets through——

Mr. DIES. Yes; when I get through just eat me up. Gentlemen who are in the habit of eating up the Public Treasury and the funds from the taxpayers of the country ought not to have much trouble in eating me up. I think if they will just eat me up and quit eating up the tax money for illegitimate pensions it will be a good thing for the country. I think the people who pay the taxes in this country could dispense with me a good better than they could with their hard-earned cash.

The first thing a man learns when he comes to Congress is how to get a private pension bill through. He learns to loot the Treasury under a private pension bill long before he learns the fundamental rules of the House of Representatives.

Let us take up the next case, on page 16 of the report, the case of James Pauley, of Carbondale, Colo. He served in the Regular establishment, in Company M, Nineteenth Regiment Kansas Volunteer Cavalry, from October 29, 1868, to April 18, 1869, when he was honorably discharged. I read from the report:

The records of the War Department fail to show the soldier was ever reported as sick or received medical treatment for any cause.

September 22, 1891, he filed a claim for pension based on hernia (rupture) of both sides, which he alleged was incurred in the service and line of duty. After a most thorough special examination the claim was rejected June 22, 1898, on the ground of no record and the claimant's inability, even though aided by a special examination, to furnish evidence necessary to show that the double hernia was incurred in the service and line of duty. No appeal was taken.

Yet this Committee on Pensions winds up their statement as follows:

From the evidence submitted your committee is of the opinion that the disabilities from which the soldier now suffers were incurred in service, and they therefore respectfully recommend the allowance of pension at the rate of $24 per month.

The next case to which I wish to invite the attention of the committee is on page 31 of the report (H. R. 4567), the case of William Feavel. This is the pension of a soldier from the Regular establishment who served his country a little while, was then paid all that the country agreed to pay him, and 30 years after his discharge he filed his first application for a pension, due no doubt to the fact that we no longer consider pension bills—we just pass them and give everyone what he asks for. We have a case here of a pension based upon service rendered more than 50 years ago by a man who never asked for a pension in his life.

Well, the very next case in page 33, H. R. 4968, Daniel Lawlor, Albany, N. Y. He served in the Regular Army, and for 40 years after he was paid off and duly discharged, he made no claim for a pension, no disability, not entitled to it under the law, and he comes now and is to receive a pension for having served in the Regular Army. Now, in that case to which I have just referred, where the man made no claim for a pension for 40 years, here is what the record shows:

The soldier, as shown by the records of the War Department, was 18 years of age at enlistment and a bartender by occupation. He was treated for a disease in October, 1866; for vulnus incis (incised wound), March 6 to April 5, 1867; for a disease in January and July, 1868; January, June, and December, 1869; and May and June, 1870; for "lacerated wound, altercation," July 18 and 19, 1870; and for disease in February, 1871. Nothing in the records, the War Department reports, specifically shows whether the disability treated March 6 to April 5, 1867, was incurred in line of duty.

No evidence was filed prior to the rejection of the claim, and no medical examination has been made.

And yet the committee reports:

From the evidence submitted your committee believe that the disabilities from which the soldier now suffers were incurred in service and line of duty, and recommend the allowance of pension at the rate of $12 per month.

The next case is H. R. 5129, page 34. This is the case of a man who served in the War with Spain, and the records of the War Department fail to show that he was during the service ever reported as sick or received medical treatment for any cause. When discharged he claimed to be suffering from no disability, and the medical officer who then examined him certified he could find none existing. However, he claimed that he had been sick in the service, and here is what the testimony shows:

The military records show that he was on furlough from October 8, 1898, to November 6, 1898, and on November 7, 1898, was examined at Wilmington, Del., preliminary to muster out. He was then asked whether he had any reason to believe that he was suffering from the effects of any wound, injury, or disease, or had any disability or impairment of health, and answered "No." The surgeon who examined him certified that he found no disability.

The claimant, being confronted with his own signed statement that he was free from disability on November 7, 1898, had no explanation to offer except that he did not recall making such a statement. He acknowledged that the signature was genuine.

That is the testimony, and from the testimony the Pensions Committee think that he is entitled to receive a pension.

The next is H. R. 5175, page 37 of the report. This soldier served 3 months and 8 days. After he served that time in the Spanish-American War he got married. The report says:

The records of the Navy Department fail to show any sickness or treatment of the soldier during his service.

He never filed any claim for a pension. Now the widow is to be pensioned, and the committee says:

From the evidence submitted in this case, your committee is of the opinion that a pension of $12 per month, with $2 additional for each of the two minor children until they, respectively, reach the age of 16 years, is fully justified and so recommend.

On page 38 you will find the case where a man 54 years ago, or, rather, this is the application of a widow of a man who 54 years ago did something. Nobody seems to know what, because the evidence shows that he did not do anything in the service of the United States, but he did something in California for 4 months and 20 days. The State of California filed a claim against the Federal Government, and the Government, as usual and always, paid the claim and California paid the soldier for his 4 months and 20 days' work, or whatever it was. Now, remember, that has been 54 years ago. Thirteen years after he did this 4 months and 20 days' work he got married, and at

this late date his widow applies for a pension, and the committee says:

From the evidence submitted your committee believe that a pension of $12 per month is fully warranted, and so recommends.

The next is the case of H. R. 6593, page 38. This good person comes from Georgia, served in the War with Spain, and he has filed a claim for a pension. The claim was rejected on the ground of no disability May 2, 1908, and again February 15, 1910, on the ground of no record, medical or other satisfactory evidence shown incurrent in service or existent at discharge of the alleged injury. The report goes on to say:

Reopening has been several times denied.

The soldier, as shown by the War Department records, was 23½ years of age at enlistment. The records of physical examination at enlistment show:

"Chills and fever at 21 years of age. Gonorrhea in 1898. One molar gone."

He was treated for causes other than the alleged injury of back—

I want to call attention to that "alleged injury to back"—

among which was preputial chancroids, multiple, not in line of duty, from January 26 to February 1, 1901. There is no record of treatment for injury of back, but he was treated October 25 to 28, 1901, for acute lumbago, both sides, cause unknown, in line of duty.

The claimant was examined by a board of surgeons at Macon, Ga., April 1, 1908. They reported his height as 5 feet 10½ inches, weight 160 pounds. The board said he was "well nourished. Heart and lungs negative. Urine negative. No evidence of injury to back except his word that he suffers pain there. He does regular work of farm hand daily. No evidence of specific disease."

And yet the committee say—

From the evidence submitted your committee believe that the disabilities from which the soldier now suffers were incurred in service and line of duty, and recommend the allowance of pension at the rate $12 per month.

If not, why not? [Laughter.] Here is a young man doing regular farm work, lively and husky, who led a dissolute life probably and occasionally has the backache as a result from it, but he is doing regular farm work, though, drawing a stipend every month, and this committee finds that he ought to go down into the Public Treasury and take out an annuity of $144 a year to be paid as long as this young man lives, contributed by the toiling millions of this country, an annuity to him, probably to aid him to buy a farm, I do not know.

On page 50—I will have to hurry along because I can only call attention to a few of these cases—here is a case, H. R. 7977, beginning page 49 of the report, and the report says:

The special examination disclosed the fact that the claimant had borne a pretty bad character prior to his enlistment, having been prosecuted for and convicted of larceny, but that since his discharge he has married and been a steady worker and kept out of trouble. He has always been a very thin man, and before and since service has gone by nickname "Skinny." It is not shown that he was ever ill prior to the service, and it is not shown that he has been sick to any very marked extent since his recovery from malarial fever, from which he was suffering very severely at the time of his discharge. In fact, he worked for some time prior to enlistment for two brothers—J. Fred and Chauncey Tyler—and has worked for them most of the time since his service, and these brothers both state that they can see no difference in his health since service from that he enjoyed prior thereto. He had lost practically no time from work after his recovery from malarial fever until 1909, when the special examination was had, and he turned in on an average about as much work since his service as he was accustomed to do prior thereto.

And yet—

From the evidence submitted your committee believe that the disabilities from which the soldier now suffers were incurred in service and line of duty and recommend the allowance of pension at the rate of $12 per month.

Mr. QUIN. Will the gentleman yield?

Mr. DIES. I will.

Mr. QUIN. Does not the gentleman think he is doing good service in working the Government?

Mr. DIES. Yes; he is a young man; he is getting a larger pension now than the old soldiers of the Civil War got when they were his age. He will be getting it when he dies. He will be getting it for injuries in the service long before he gets old, but of course these records will be all wiped out and the fact that the claim is allowed here and made will be prima facie evidence that he is an old soldier, a veteran in the service of his country, and who had a broken back in the service. [Laughter.]

Over on page 51 is the bill H. R. 8435, the case of William Miller. He is now in the National Home at Milwaukee, and being taken care of in good shape, no doubt. He was discharged 32 years ago, but he was neglected. It never occurred to him until this bill was introduced to ask the Government to give him a pension, and to give you some little idea now of what we may expect in regard to it, the soldier was examined by a board of surgeons on June 1, 1910, and they report that he ought to have $72 a month as a pension.

And then there is the case, on page 53, H. R. 8490, of Gambo C. Villines. He served a few years—from 1881 to 1886—in the Regular Army 28 years ago. He was paid off by his employer. Of course we all know that the Regular soldiers have to do an awful lot of hard work, but after he got through for Uncle Sam as a Regular soldier he was paid off. Twenty-eight years had gone by, and he heard, Mr. Chairman, that everybody got a pension who asked for it, and he asked for one, and gets it in this bimonthly bill.

And then there is the case over here, on page 55, H. R. 8653, where the man's troubles, according to the records of the Navy Department, were debauch, excessive use of alcoholics, and venereal disease. That is a claim, however, for a pension for his widow. He was married three times, and there is no record to show the death of but one of his three wives, and this allowance is for $12 per month, with an additional pension for each of the two minor children. We will have to pay three, or four, or five, or six pensions for this man who served his country principally in the canteen.

I am just skipping over these cases, but I will take the most glaring ones, although they are all glaring; they are all in violation of the general law; most of them unmeritorious, and none of them should be passed. This is a case, H. R. 11057, on page 71 of the report. This man is yet a young man. He is 37 years old. I want you to get this, members of the committee. He served a whole month and 18 days in the War with Spain, that bloody conflict. However, he never got into the bloody part of it. The records of the War Department fail to show that he ever reported as sick or ever received medical treatment while in the service. When discharged he claimed he was suffering from malaria. The medical officer by whom he was examined certified that no evidence of disability could be found to exist. Your committee says:

From the evidence submitted your committee believe that the disabilities from which the soldier now suffers were incurred in the service, and we respectfully recommend the allowance of the pension at the rate of $12 a month.

On page 76, H. R. 12964, is the case of a lady who wants to be pensioned as a nurse. She was not in the war, but probably in the Philippine Islands. She is not entitled to be pensioned under the general law. If she had served with Grant in his campaign against Lee and had administered to the needs of the dying soldiers on the battle fields between here and Richmond, she would be entitled to $12 a month, but not having been in that war or any war, your committee allows her $50 a month. It is true the good woman has lost her eyesight, but when she was examined before entering the service the report of the examination, dated December 20, 1905, shows that her left eye had a convergent squint, cloudiness of vitreous humor, and so forth, and that she had practically no vision in the left eye. She was in that condition when she went to work, but the Government paid a fair wage—better than she could get outside of the Government. She nursed one year or two years, I forget which, and then she left the service. Now, you are going to give her an annuity of $600 a year for life, just for a few months of service.

Now, Mr. Chairman, I have no prejudice against those who served in the Regular Army. I have no sort of prejudice against those who served in the War with Spain. It was not a war to be compared with the War between the States. I believe there were between 300 and 400 men killed in the Spanish War and probably between 1,000 and 2,000 wounded. I am not sure. The figures are very small, at any rate. I know that around El Caney and San Juan we lost between 200 and 300 men, and we had 1,100 or 1,200 wounded, and I believe that is about all the loss we sustained in the War with Spain.

I want to tell you that if you allow this thing to continue, long before the Civil War pension roll begins to decrease the 500,000 men entitled to consideration by this committee will have raised the pension expenditure hundreds of millions of dollars. You know that there are about 500,000 men who at some time or other are going to ask for a pension under these various demands, and their widows, their children, and the first, second, third, and fourth generations. They give it to a wife while she lives, and when the wife dies the mother inherits it. When the mother dies, there will be some child. There are always some children in the family of a pensioner. It would make a person disabled to know that by being disabled they could get a pension for being disabled. You are going to have disabled children and disabled members of the families of every soldier and sailor in the Regular Establishment and every soldier and sailor who was in the Spanish-American War. And you are going to ride this country down with pensions that are a thousand times worse than the old-age pensions. If you want to give old men and old women pensions without regard to service to this country, as an act of generosity, do not give one of them $10 and another $12 and

another $20. If you want to give an old-age pension in this country, give a small pension, as they do in England, to the old men and old worn outs throughout the country. I am opposed to that, because I know when you put a premium on pauperism, when you open the public crib that paupers may come in and feed, and every man can look to the Treasury in his old age, you will breed more paupers and indigents in this country than all the saloons and all the wars and all the pestilences have bred for a hundred years.

About this bill I have nothing but the kindest feelings for the magnificent gentlemen who are in charge of it. They are on the Pensions Committee, and all are good men and just as patriotic as I am. They are a part of the system, and that system you and I and all others are responsible for, namely, the private-pension system of this country. While they are on that committee they are compelled to report these bills. They are no more to blame for it than the Speaker of the House, or Mr. UNDERWOOD, or you, or myself. And I only say to you that you and I and all others ought to put a stop to all these private pension bills, and if we can not stop them all along the line, let us stop them for everything except the Civil War. Put a stop to them. Give them all fair and equal justice under the law and let that be an end of it, because we are laying up trouble for our Government and laying up trouble for ourselves if we do otherwise.

I want to say to the committee that I shall want a roll call on this bill. I want a record made in this committee by tellers, or by roll call in the House, whichever body we happen to be in when the time comes when we can get it. I want to get a record of whether in respect to this almost bloodless war we are going to start out to do what we did with reference to the bloody Civil War; whether we are going to pension nurses at $50 and whether we are going to give men large pensions who never saw actual service; whether we are going to pad this service with respect to the Regular Establishment. I want to give every man a chance to help me to get a roll call, and after we get it to help me vote against this bill.

Mr. Chairman, I have tried to state these cases fairly, but as some gentlemen think I have failed to do so, I insert the report of the Committee on Pensions, which speaks for itself.

[House Report No. 370, Sixty-third Congress, second session.]

PENSIONS AND INCREASE OF PENSIONS FOR CERTAIN SOLDIERS AND SAILORS OF THE REGULAR ARMY AND NAVY, ETC.

Mr. MURRAY of Oklahoma, from the Committee on Pensions, submitted the following report, to accompany H. R. 14546:

The Committee on Pensions, to whom was referred sundry bills granting pensions and increase of pensions for certain soldiers and sailors of the Regular Army and Navy, etc., submit the following report:

This bill is a substitute for the following House bills referred to said committee:

H. R. 821. Clarence B. Brown.
H. R. 917. Roy E. Knight.
H. R. 1255. Edward C. McDowell.
H. R. 1268. Hilda Furbom.
H. R. 1295. Walter E. Harris.
H. R. 1304. Rosie Scott.
H. R. 1437. Parmelia R. Parris.
H. R. 1544. Daniel A. Millard.
H. R. 1545. Charles Voos.
H. R. 1601. James M. Pauley.
H. R. 2007. James Turner.
H. R. 2511. Virginia M. Mills.
H. R. 2643. Louis K. Turner.
H. R. 2750. Stanley S. Stout.
H. R. 2813. Della A. Cooter.
H. R. 3030. Mary A. Barber.
H. R. 3063. Charlie L. Pennington.
H. R. 3082. James H. Kampo.
H. R. 3092. James H. George.
H. R. 3311. Martella M. George.
H. R. 3315. James E. Hooks.
H. R. 4567. William Feavel.
H. R. 4968. Daniel Lawlor.
H. R. 5129. Edward C. Franklin.
H. R. 5175. Emma J. Crocker.
H. R. 6549. Elizabeth A. Shull.
H. R. 6593. Crowell Lisenby.
H. R. 6627. Oscar E. Harper.
H. R. 6943. Charles F. Pandorf.
H. R. 6952. Hale F. Hamilton.
H. R. 7053. John D. Asbley.
H. R. 7830. Emma Fox.
H. R. 7977. George Oatten.
H. R. 8435. William Miller.
H. R. 8452. James H. Martin.
H. R. 8490. Gambo C. Villines.
H. R. 8653. Marian E. Keyes.
H. R. 9064. Andrew J. Wallace.
H. R. 9201. Peter H. Strumsky.
H. R. 9973. Samuel P. Shupe.
H. R. 10169. Edward F. Smith.
H. R. 10173. George B. Weesner.
H. R. 10193. William H. Franks.
H. R. 10357. John Hodges.
H. R. 10952. Otho E. Gepler.
H. R. 11057. Addison B. Burroughs.
H. R. 11260. James C. Hudson.
H. R. 11434. Wiley Gullett.
H. R. 11639. Ernest W. Hilliard.
H. R. 12964. Martha R. Allwein.
H. R. 13328. Mary A. Dow.
H. R. 13518. Catherean Mihalak.
H. R. 13933. Pawil Wiczias.
H. R. 13947. William E. Howell.

The following are the facts ascertained by the committee concerning the case of each beneficiary in said bills and the conclusions of the committee as to the proper amount of pension or increase of pension which should be granted:

H. R. 821. Clarence B. Brown, of Macon, Ga., served as a private in Company B, Third Regiment Georgia Volunteer Infantry, during the War with Spain, from July 14, 1898, to April 22, 1899, when mustered out with the company; in Company I, Ninth Regiment United States Infantry, from July 8, 1899, to April 26, 1902, when transferred to Company B, Fifth Regiment United States Infantry, from which he was discharged July 25, 1902, by expiration of his term of enlistment. He also served from September 28, 1904, in the Twentieth Battery, Field Artillery, United States Army, to February 6, 1905, when transferred to Troop K, Eighth Regiment United States Cavalry, from which he was discharged September 27, 1907, a cook, upon expiration of his term of enlistment. (I. O., 1288901.)

He applied for pension August 2, 1902, alleging that in the Philippine Islands in March, 1900, while in Company I, Ninth Regiment United States Infantry, he contracted stomach and bowel trouble, diarrhea, and dysentery, alternating with constipation; that in February, 1902, in same company, he incurred injury to back and resulting lumbago, caused by horse falling on him; also, that on October 16, 1899, while a member of Company B, Third Regiment Georgia Volunteer Infantry, and in the Philippines, he incurred severe deafness of right ear, caused by concussion, and also varicose veins of right leg.

He filed another declaration for pension March 9, 1909, alleging that on or about the 1st or 15th of November, 1905, in the Philippine Islands (while in Troop K, Eighth Regiment United States Cavalry), he incurred a swollen instep, caused from varicose veins, and that he was twice operated on for such disability by a contract surgeon, Dr. George Clayton.

September 3, 1909, he filed another application, stating that about October 15 or November 15, 1906, while in Troop K, Eighth Regiment United States Cavalry, in the Philippines, he contracted a fibrous tumor; that he was also treated in 1906 for tuberculosis and has ever since been troubled with lung disease.

The first two claims were rejected May 24, 1909—for piles—on the ground that such disease existed before enlistment in Company B, Third Regiment Georgia Volunteer Infantry, as shown by the records of the War Department; for varicose veins of right leg and swollen right instep, affection of right foot and leg, alleged as result of operation for varicose veins of right leg, on the ground that varicose veins existed prior to enlistment in Company I, Ninth Regiment United States Infantry, as shown by the records of the War Department; for diarrhea, dysentery, disease of bowels, stomach, and rectum, exclusive of piles, and constipation, injury of back and alleged resulting lumbago, and deafness of right ear, on the ground that a ratable degree of disability had not been shown since date of application.

From that action appeal was taken, and under date of August 20, 1909, the Assistant Secretary of the Interior affirmed the rejection.

The claim filed September 3, 1909, was rejected January 25, 1911, because a ratable degree of disability had not been shown from date of application from disease of lungs or bronchial trouble. The claim for varicose veins, realleged as fibrous tumors, was not reopened.

The War Department records show the soldier 22 years of age at his first enlistment and that he then had "small external piles." There is no record of medical treatment during that service, but he is reported on the company muster-out roll as sick in hospital August 12 and 13, in quarters August 19 to 25, 1898. Upon examination preliminary to discharge from first service he said he then had no disability and was corroborated by his captain, James M. Kimbrough, jr., and a surgeon.

The record of physical examination at enlistment (second) in Company I, Ninth Regiment United States Infantry, July 8, 1899, shows "slight varicose veins, both legs, below knees."

During this service he was treated for malarial fever December 19 to 21, 1899; January 17 and 18, February 10 to 18, and March 4 and 5, 1900; for acute diarrhea, March 27 and May 31 to ——— —, 1900; for acute external hemorrhoids, March 27 to 30, 1900, and November 23 to 27, 1901; for dental caries—teeth filled—June 2 to 5, 1900; for acute coryza (cold in head), January 18 to 28, 1901; for acute bronchitis, February 26 to March 5, 1901; for acute hepatitis, March 19 to 24, 1901; and for acute orchitis, right testicle, gonorrheal, April 19 to 30, 1901.

The record of physical examination at the third enlistment, September 28, 1904, showed:

"Varicosities both lower legs. Measles, mumps, whooping cough at 5 or 6 years of age. Dysentery at 25 years. Sore eyes at 10 years of age. Gonorrhea, sore on penis, and circumcision at 24 years of age."

He was treated during this service as follows: For fibromato, etc. (fibrous tumor of lower left leg or ankle), cause undetermined, but attributed to local irritation from legging or ill-fitting shoe. Complication. Fibromato removed, skin sutured under cocaine anesthesia January 16, 1906; from January 10 to February 6, 1906, for varicose veins internal surface right leg. Complication, March 3 to May 28, 1906. May 1, 1906, suspected tuberculosis of lungs, under observation and treatment since January 10, 1906. Tertiary syphilis manifested by general glandular enlargement of lymphatic glands, not in line of duty; multiple fibromato, right ankle, June 8 to August 5, 1906; intestinal colic, acute, October 23 and 24, 1906, and gastritis, acute, April 20 to 26, 1907.

The claimant was examined by a board of surgeons at Macon, Ga., February 18, 1903. They reported height 5 feet 6 inches, weight 125 pounds; that he had no dysentery; hemorrhoids, rated six-eighteenths; no sign of injury of back; no evidence of pain in small of back; no disease of ear nor deafness; varicose veins of right leg of moderate degree, no ulceration, rated two-eighteenths; no edema, or heart signs, cyanosis, or any sign of dyspnea; no lung disease, chest measures 33–37; no kidney disease; does not seem robust and strong; he is evidently suffering from syphilis.

He was examined by another board at the same place December 7, 1910. They reported weight 129 pounds; general appearance healthy; heart negative (rapid); urine negative; lungs 33½, 35½, left side does not expand as well as right, percussion negative. Posterior bronchovesic breathing along lower border of scapula left side. Coughed constantly during examination. No sign of cavity; pile tumors protrude on bearing down; no tumor on foot; scar anterior right ankle from operation; varicose veins right leg and thigh; pharynx congested—no disease of larynx; nose normal; slight enlargement of glands of body; no other sign of syphilis. No evidence of vicious habits. Rate, ten-eighteenths for varicose veins of leg and thigh.

Clarence H. Kelly, of Company M, Eighth Cavalry, testified that he was in hospital with the claimant in the Philippines; that the latter had an operation performed on his foot at that time and was also being treated for his lungs, both contracted, so far as he knew, in the Army.

William Castlen and J. L. Swint testified, jointly, March 2, 1909, that the claimant was then "more or less disabled" for manual labor; that they had noticed his leg was badly swollen ever since he came out of the Army; and that they had seen his foot and considered it in very bad shape.

M. V. Means and M. P. Weston testified, December 8, 1910, that they had known the claimant for three years and had noticed that he suffers with a severe cough, which causes him great trouble, which, they believe, renders him unable to do any manual labor. Also that he suffers from a crippled foot.

S. H. Smith, M. D., testified, May 8, 1903, that the claimant was in a low state of health on August 4, 1902, and has improved but little since; that he treated him in September, 1902, for chronic cystitis; that he had also treated him for chronic bronchitis (when not stated); and that he is suffering with varicose veins of right ankle which disable him from walking at times, and with internal and external hemorrhoids, which bleed profusely at times; that he was called to see claimant March 30, 1903, and found him suffering with colic, caused by indigestion; that he has such spells ever four or five weeks, which disable him for a week or 10 days at a time; that he considers claimant one-half disabled.

In another affidavit, made February 12, 1909, this witness said he met the claimant about October 15, 1907; that he had varicose veins of right leg and three scars from operation, foot and leg tender; that he has treated him off and on ever since, and he has not been able for manual labor half the time.

In an affidavit executed November 9, 1910, he said he had been the claimant's physician about three years; that he finds him troubled with catarrhal condition of stomach and bowels, varicose veins of right leg from thigh to foot, and that he is not able to do enough manual labor to earn a living for himself and family.

June 5, 1909, this witness testified that the claimant was suffering with catarrhal condition of stomach and bowels in the spring of 1903 and has so suffered ever since; that he has had several attacks of acute indigestion in the last 18 months; that he is almost deaf in right ear and has a weak back.

In an affidavit accompanying the bill the petitioner states that he is partially disabled by injury of right foot, by swelling of foot, and lung trouble; that he owns no property of any kind, and that his income from all sources is $300 a year.

Two lay witnesses state that he is in bad health and has been for two years, and has no means of support except from his daily labor, which is a very small amount owing to his physical condition.

The gentleman who introduced the bill states that the petitioner is in feeble health; has no means of support except his daily labor; is unable to engage in any steady or continuous employment, which facts he knows from acquaintance with the applicant and familiarity with his affairs.

Dr. James M. Gallargy testifies that he is examining officer for the United States Army at Macon, Ga., and on July 1, 1913, he examined the petitioner for entrance to the Army and rejected him because he is suffering from varicose veins.

Another affidavit has been filed by the soldier dated January 19, 1914, setting forth practically the same facts, circumstances, and conditions as outlined in his previous affidavit.

From the evidence submitted it is believed that a pension of $17 per month is fully warranted, and it is so recommended.

H. R. 947. Roy E. Knight, of Aurora, Ill., served during the War with Spain, in Company I, Third Regiment Illinois Volunteer Infantry, from April 26, 1898, to January 18, 1899, when honorably discharged. He was 21 years of age at enlistment. (I. C. 1077301.)

The records of the War Department fail to show the soldier was ever in the hospital for medical treatment, but do show he was reported as sick in quarters upon several occasions for a day or so, the nature of the illness not being stated.

When discharged he claimed to be suffering from diarrhea and cramps, but the medical officers by whom he was then examined could find no evidence of any disability existing and so certified.

He filed a claim for pension December 8, 1905, based on malarial poisoning, dysentery, and resulting disease of the rectum. He also alleged nearly total blindness of the left eye and impaired vision of the right eye, and claimed it was a result of malaria and rectum trouble. This claim was allowed from date of filing at the rate of $10 per month for malarial poisoning, dysentery, and resulting disease of the rectum, but blindness of the left eye and impaired vision of the right eye was not accepted as a result of said diseases.

The soldier's rate of pension was increased to $24 per month from June 18, 1906, under a special act of Congress approved that date. He still receives pension at said rate.

On March 9, 1912, he filed a claim in the Bureau of Pensions in which he stated that he had lost the sight of both eyes and believed same was due to malaria and rectum disease for which he was formerly pensioned, and asked to be allowed a pension at the rate for total blindness ($100 per month). This claim was approved for malarial poisoning and dysentery and resulting disease of the rectum at $10 per month, but the Pension Bureau refused to accept total blindness as a result of said disease.

An appeal was taken, and in a decision of December 18, 1912, the Assistant Secretary of the Interior sustained the adverse action of the Bureau of Pensions. In this decision it is admitted that in a few rare instances there has been found cases where blindness followed, and was due to malarial infection.

Dr. Thomas A. Woodruff, a very prominent surgeon of Chicago, Ill., who is in charge of the ophthalmic department of St. Luke's and St. Anthony's Hospitals of that city, states in an affidavit executed November 23, 1911, that he has examined the soldier and finds total blindness of both eyes, and a history of malarial poisoning, and disease of the rectum following dysentery, and that in affiant's opinion the blindness of this soldier is due to the malarial poisoning, diarrhea, dysentery, and resulting rectum disease contracted in the service. This eminent specialist goes into detail in describing the several forms of glaucoma (blindness), and the specific type from which the soldier suffers, and gives several citations of high medical authorities showing that this type of glaucoma can and does result in blindness by atrophy of the optic nerves, from which he states the soldier suffers. He cites Knies, Relations of the Eye to General Disease, page 401; Datzmann, Wien, page 514; Vachi, page 634; Kastowsky, page 281; Webster Fox, textbook, page 419 and page 412.

With the bill is filed a letter from the Member who introduced same, who states that he has filed an affidavit of the soldier with the office of this committee, in which it is stated by the soldier that he is totally blind and possesses no property, and that he also filed affidavits of lay witnesses showing the soldier has no property, and of a doctor showing he is totally blind. Such affidavits can not be found in the committee rooms, but were doubtless filed, as alleged, although a careful search has been made for same. However, as this Member (Mr Copley) states in a letter to the committee that the soldier is totally blind and possesses no property and no income except his pension of $24 per month, and his wife is forced to work as a bookkeeper.

The medical testimony recently filed in the Bureau of Pensions, which has been hereinbefore cited, shows the soldier is totally blind, and in the opinion of the doctor the blindness is the result of malaria and rectum troubles.

From the evidence submitted in this case your committee is of the opinion that an increase from $24 to $50 per month is fully warranted, and it so recommends.

H. R. 1255. Edward C. McDowell, Hanford, Wash., served as a captain, acting quartermaster, United States Volunteers, during the War with Spain, from May 31, 1898, until honorably discharged June 30, 1901. Served in the United States and Cuba. (I. O. 1407524.)

He applied for pension December 30, 1912, alleging that in Cuba in June, 1899, he contracted disease of the kidneys; same became normal and gave no trouble for years, but now affects him again and paralysis of left arm has resulted therefrom. The claim was rejected on January 31, 1913, on the ground of claimant's manifest inability to connect the alleged disabilities with his military service as shown by his sworn statement. No appeal was taken and no effort was made to reopen the claim.

The records of the War Department fail to show the soldier was treated during his service for any disability, and they also show no physical examination was made at the date of his discharge.

No evidence has ever been given in this claim and no medical examination by a board of surgeons was ever had.

With the bill, your petitioner files an affidavit in which he states that he is 74 years of age; suffers from rheumatism in legs and arms and partial paralysis of left shoulder and arm; that he does not know that these disabilities had their origin in the military service; that he is unable to perform any manual labor and has no property except about $50 worth of clothes and a trunk.

There is filed a certificate of the United States surgeon, of the transport vessel upon which the soldier served, in which it is set forth that the soldier was under this surgeon's professional care and treatment for several weeks during March, 1901, during service, suffering from gastric irritation and intestinal indigestion to an extent to sensibly impair his health and strength. The surgeon states that in his opinion these disabilities were due to the long service of the soldier upon transports and thus being exposed to contrasts of temperature met with between New York and the West Indies. Much of the soldier's service was rendered upon transports upon these waters.

Two witnesses testify that the soldier is 75 years of age, feeble and infirm in health, and unable to perform any manual labor, and is now without means; possesses no property of any kind; and that he had an honorable service in the Confederate Army, and afterwards in the United States Army during the War with Spain.

From the evidence submitted in this case it is believed that a pension of $24 per month is fully warranted, and it is so recommended.

H. R. 1268. Hilda Furbom, city of Kalmar, Kingdom of Sweden, is the widow of Charles O. Furbom, deceased, who served during the War with Spain, in Company H, First Regiment Illinois Volunteer Infantry, from April 26, to November 17, 1898, when he was honorably discharged. Some of his service was rendered in Cuba. He was 25 years of age at enlistment. (W. O. 756843.)

The records of the War Department show the following treatment: "August 20 to 22, 1898, diagnosis not stated, but in line of duty; August 31 to September 5, 1898, malaria in line of duty."

When discharged he alleged he was suffering from malarial poisoning and the medical officer by whom he was examined certified he was then suffering from "temporary malarial weakness."

April 1, 1901, the soldier filed a claim for pension based upon malarial poisoning which he also claimed had resulted in disease of the lungs. This claim was allowed at $6 per month from date of filing to January 13, 1902, the date of the soldier's death, for malarial poisoning. Disease of the lungs was rejected as it is not accepted by the Bureau of Pensions as a result of malarial poisoning. As the soldier had died prior to allowance of his claim payment of the pension was made to his widow.

February 17, 1902, the widow filed a claim alleging the death of the soldier was due to his military service. This claim was rejected April 26, 1902, on the ground "the evidence on file does not establish the cause of the soldier's death or of its connection with the military service, and the claimant declares her inability to furnish additional evidence."

The evidence in the claim of the widow clearly shows her to be the lawful widow of the soldier who died January 13, 1902. In her claim the widow contends the death of the soldier was due to the malarial poisoning that had been accepted as of service origin.

The evidence does not clearly and positively show what was the fatal disease from which the soldier died. There is record of treatment in the service for malaria, and when he was examined June 26, 1901, by a board of surgeons it found he was markedly emaciated and his general appearance was bad. He was then 28 years of age, 6 feet in height, and weighed only 120 pounds, and while there was some evidence of malarial poisoning the main disability the board found him suffering from was pulmonary tuberculosis, and they state as to this as follows:

"This claimant is so disabled from phthisis pulmonalis as to be incapacitated for the performance of any manual labor and is entitled to $30 per month."

Dr. W. C. Ward, of Chicago, testifies that he treated the soldier in January, 1890, for "a functional disturbance of the heart," and in January, February, and March, 1901, for phthisis pulmonalis, and then advised him to go to Colorado, California, or New Mexico. Affiant further states that he has no sort of doubt phthisis pulmonalis caused his death.

Shortly after March, 1901, the soldier took up his residence in Texas and came under the medical treatment of Dr. W. M. Gallaher, who testifies in April, 1902, that he treated the soldier in September and afterwards for malaria, stomatitis, and bronchitis, but did not see him for some time prior to the date of his death; that he was called to see him the day of his death, but arrived after he died. In a subsequent affidavit this witness states that in his opinion that "malarial poisoning was the true origin of his disease and death."

The widow appealed from the rejection of her claim, and in a decision of March 12, 1904, the Assistant Secretary of the Interior sustained the adverse action and held that all of the evidence pointed to pulmonary tuberculosis as the cause of the soldier's death, and that disease could not be accepted as a result of malarial poisoning. This decision will be found attached to the brief in the Pension Bureau file.

With the bill the petitioner files an affidavit stating the soldier was strong and well before service; that he contracted malarial poisoning in the service, which so weakened him that he fell a prey to pulmonary troubles from which he died, and she thus believes his death due to his service; that she is the lawful widow of the soldier and has no property or income except that derived from her own labor. This statement was made July 8, 1911.

Two lay witnesses on July 3, 1911, swear that the petitioner has not remarried since the death of the soldier, and is his lawful widow, and possesses no property or income except that which she earns by her own labor.

Another lay witness on April 8, 1913, swears to the same facts concerning lawful widowhood and possession of no property.

Dr. W. M. Gallaher swears that he believes the soldier's death was due to tuberculosis with malarial complications.

From the evidence submitted, your committee believes that a pension of $12 per month is fully warranted and so recommended.

H. R. 1295. Walter E. Harris, of Damariscotta Mills, Lincoln County, Me., served during the War with Spain from May 26, 1898, to October

5, 1898, as a landsman on the United States ships *Wabash*, *Frolic*, and *Franklin*. He was honorably discharged upon recommendation of a medical board survey by reason of physical disability. Chief part of service in waters about Porto Rico and Key West. He was 35 years of age at time of enlistment. (I. O. 44240.)

On December 6, 1898, the petitioner filed a claim for pension on account of gastric catarrh contracted between Porto Rico and Key West, Fla., in September, 1898.

The claim was rejected January 15, 1901, on the ground of no ratable disability since the date of filing.

Another claim was filed on December 14, 1910, and rejected April 18, 1912, on the same ground. Reopening was denied twice, June 10, 1912, and August 14, 1912, for the same cause.

The sailor served 58 days on the *Wabash* and was not reported sick at all. He served 54 days on the *Frolic* and was carried 11 days on the sick list. He was treated September 13, 1898, on the *Frolic* for "gastritis—acute—duty." Discharged September 14, 1898, to naval hospital New York (?). The hospital ticket states:

"Catarrhus gastricus acutus. There is good evidence that it was in line of duty, the man becoming debilitated while serving on this ship, and was complaining for several days prior to September 3, 1898, when he was placed on sick list, being unable to retain food on his stomach and unfit for duty. He has been very nervous for past two weeks and has been troubled by insomnia. Soups have been retained at times in stomach, but solid food has usually caused vomiting. For the past few nights man has had night sweats and chilly sensations. I have heard slightly prolonged and harsh breathing at right apex. Sputum has not been examined. Urine examined and found negative. Man at times seems to lose presence of mind and worries excessively. Case paper states: 'Catarrhus gastricus acutus. Origin, duty, incident to naval service. Stomach very irritable. Has slight cough. September 23, 1898, special duty, mild exercise. September 26, improving slowly. October 3, discharged to *Franklin* for discharge from service. Surveyed September 23, 1898.'"

The medical survey of September 23, 1898, states:

"Unfit for service; defective teeth, permanent; recommended that he be discharged from service. Origin, not in line of duty."

The petitioner swears he was strong and well before enlistment; that he contracted disease of stomach during service while near Porto Rico in September, 1898, and has never recovered from the disease, and is unable to perform manual labor as result thereof.

The only testimony in the claims proper, other than that of the sailor, is that of Dr. A. M. Card, of Head Lide, Lincoln County, Me.

In affidavits executed November 2, 1899; August 16, 1900; January 25, 1901; March 28, 1902; and January 25, 1912, he sets forth, under oath, that he has known the sailor since about 1885; was his family physician; that he was strong, rugged, and well prior to enlistment; that he returned from the service suffering from gastric catarrh of stomach and bowels in a very bad condition; that he has treated him as family physician all this time, as he did prior to his enlistment, and he has steadily grown worse from said disease until he is now a physical wreck and unable to do any kind of manual labor, and in his opinion he will never be able to earn his living; that his physical condition is entirely due to gastric catarrh of stomach and bowels, which he contracted in the United States service.

In connection with the application for reopening of the claims affidavits of Dr. Card, executed on May 14, 1912, and James E. Mulligan and Ruel T. York executed July 25, 1912, were filed. Dr. Card states that he had that day examined the sailor and found him suffering from disease of stomach, the objective and subjective symptoms of which were as follows:

"Pain and stricture in stomach, fullness of stomach, most of the time, caused by gas, loss of appetite, great distress in taking food, vomiting and chills, loss of strength and flesh, the coughing up of daily quantities of his meals, daily attended by pain."

Mulligan and York state that they knew the sailor prior to his enlistment, at date of his discharge, and ever since; that since discharge he has suffered from stomach disease every month, all of the time, and is, in their opinion, disabled one-half from earning his living by manual labor.

The claimant was first examined by a board of surgeons November 22, 1899, at Bath, Me. The board reported:

"Body well nourished, skin normal, tongue not coated, red, and indented by teeth. Throat and lungs normal, as evidenced by a careful examination. Inspiration 25, expiration 33. Heart: Cardiac dullness, action weak, sounds normal. No areus, senlles, or edema. Gastric catarrh: We find marked tenderness over the stomach and excessive tympany on percussion over an increased area; equals six-eighteenths. Hepatic dullness, medium line 3; nipple line 3½; ancillary line 4. Splenic dullness from eighth to twelfth ribs, increased forward; equals two-eighteenths. Spleen tender on percussion and palpation. No other disabilities found. No vicious habits."

On February 21, 1912, he was again examined, this time by board of surgeons at Augusta, Me. They reported:

"Urine: Acid, yellow, clear, ten-twentieths, no sugar or albumen. No evidence of disease of urinary organs. Rate, 0/18.

"Heart: Apex beat fifth space nipple line. Area dullness, fourth to sixth ribs. Heart action weak, regular, hurried; there is a deferred murmur, heard with greatest intesity over tricuspid area, general cyanosis, no edema, extremities cold, dyspnea on exercise. Rate, twelve-eighteenths.

"Lungs: Muscles soft, fairly nourished, form erect, chest full, expansion 35–38. Rate, 0/18.

"Disease of stomach: Eyes yellow, skin sallow, tongue red, fissured, liver dullness fourth space to 2½ inches below free costal border and 2 inches left of medium line, tender. Spleen extends forward to anterior axiliary line, sixth rib to crest of illum and tender, abdomen tender, epigastrium full tender, rectum normal. Rate, twelve-eighteenths.

"This claimant gives a clear history of chills and fever since service; says he has them every two or three weeks, and has since being discharged from the Navy. No other disabilities. No vicious habits."

Filed with the bill is an affidavit of the petitioner in which he says he is wholly unable to perform any manual labor by reason of disease of stomach, malaria, and heart trouble, and has no income or means of support and owns no property of any kind, and is a charge upon charity of friends.

There is an affidavit of Dr. Card, executed February 18, 1913, in which he states that petitioner is suffering from inflammation of stomach and bowels, chronic; also has malarial poisoning and hernia of stomach; that he has treated him for those diseases since he returned from his naval service, and he has suffered constantly from same; that he is unable to perform any manual labor; that he knows the petitioner was a sound and well man prior to his enlistment.

Two lay witnesses, Ruel T. York and George A. Tomlinson, testify that they have known the petitioner for 30 years; lived close neighbors to him; that since his discharge from the Navy he has suffered from some kind of stomach trouble constantly, under care of a physician a large part of this time, and is not able to perform any sort of manual labor; that he is without means, and is partly supported by charity.

Two other lay witneses, C. Joel Rankin and Fred W. Newcomb, upon the same date testified to the same facts, with the exception that they have only known petitioner for 15 years, or since his discharge from naval service.

From the evidence submitted it is believed that a pension of $12 per month is fully warranted, and it is so recommended.

H. R. 1304. Rosie Scott, of Greene, Me., is the widow of Ribert Scott, who served in the United States Navy from April 6, 1872, to November 11, 1873, when discharged on medical survey. He served in the United States Navy, Regular Establishment, *Vermont* to April 17, 1872, on the *Portsmouth* to June 27, 1872, on the *Lancaster* to March, 1873, and on the *Vermont* to date of discharge. (W. O. 967264.)

The sailor was pensioned as a landsman, U. S. S. *Lancaster*, January 21, 1874, at the rate of $3 per month from November 12, 1873, for the "effects of pleurisy."

On June 8, 1907, the name of disability was changed to disease of right lung, and the rate was increased to $8 per month from May 6, 1906. The rate was subsequently increased to $10 per month from December 15, 1909, and to $12 per month from October 19, 1910.

The pensioner died May 25, 1911, of disease of heart.

The widow applied for pension June 21, 1911, alleging the sailor's death from disease contracted on the *Lancaster*, United States Navy. The claim was rejected June 8, 1912, on the ground that the sailor's death from disease of heart was not a result of disease of right lung, for which he was pensioned, nor accepted as having been otherwise due to his naval service which ended 37 years before. Reopening was denied in July, 1912.

The sailor's original claim for pension was filed November 15, 1873, and was based on "disease of heart and pulmonary consumption."

The naval records show by medical survey made November 3, 1873, that he was then wholly disabled by disease of heart and pulmonary consumption due to exposure to atmospheric changes and dampness of ship doing duty on the U. S. S. *Lancaster* in the South Atlantic Fleet prior to August, 1872.

A medical survey made March 14, 1873, showed him unfit for service by valvular disease of heart, of indefinite future duration, which originated in line of duty from exposure to constant dampness of ship and atmospheric changes; that he had an attack of pleuritis in line of duty and has had trouble with his heart since then. First admitted to sick list August 27, 1872.

He was treated April 28, 1873, for rude respiration all over chest, slight crackles at apex of the left, posteriorly, and over the lower part of left chest, posteriorly.

An official medical examination made in the pension claim December 1873, disclosed no evidence of consumption or heart disease. The board said:

"The movements of the chest are limited to 1½ inches, with evident dullness on percussion over right lung, the result of pleuritis. The body is poorly nourished. General health impaired.

"Disability, one-half."

He was next examined September 6, 1877. The surgeon said he found no indication of disease of heart, but found some dullness on percussion on the right side; general health good. Rate, $3.

He was examined by a board September 24, 1877. They found no decided dullness over chest on percussion, but some heart trouble—action acceleration and some dyspnea on effort.

The next examination was made by a board on May 16, 1906. They reported:

"Age, 70 years; height, 5 feet 6 inches; weight, 160 pounds. Fairly well nourished.

"Lungs: Normal percussion resonance, no rales on pleuritis, friction sounds, though deep breathing excites a cough. Chest measures 33½, 35.

"Heart: Apex beat in fifth space and one-half inch to left of line of nipple. Area of dullness extends 2 inches to left of nipple. He is considerably cyanotic, which is increased by exertion; a good deal of dyspnœa after slight exertion. Heart's action very feeble, no arteriosclerosis, heart dilated.

"Rating, effects of pleurisy, $24."

He was examined by another board May 15, 1907. They reported six-eighteenths for effects of pleurisy, twelve-eighteenths for disease of heart.

Another board rated, October 19, 1910, seventeen-eighteenths for disease of right lung and ten-eighteenths for heart disease.

C. C. and Mary E. Stetson testified in April, 1912, that they had known the sailor since 1886; that he was affected by a shortness of breath and at times by a cough, which to them denoted heart and lung trouble.

The public death record shows death May 25, 1911, from valvular disease of heart; age 75 years 9 months and 13 days.

Dr. D. F. D. Russell testified that the sailor died May 25, 1911, of valvular disease of heart; that he dropped dead in church; that his right lung was diseased and he was weak and run down; that the duration of his last illness was from April 1910; that he had a severe cough, was short of breath, unable to walk a great deal, was very feeble, and would fall to the floor at times; that the remote or contributary cause of death was weakness following degeneration of lung and cardiac weakness.

In another affidavit this witness said the sailor had no valvular lesion, but a very weak heart and weak lungs.

In an affidavit filed with the bill the petitioner states that she is 68 years of age; that she owns no property and is supported by charity.

The petitioner in affidavit of January 6, 1913, again states that she has no means of support and is destitute. This is supported by affidavits of Everett L. Mower and O. E. Hanscom, recently filed.

In an affidavit executed January 19, 1914, the petitioner states that she is 69 years of age, and that all of the property possessed by her consists of household goods worth not more than $50.

Dr. O. E. Hannan testifies January 22, 1914, that the petitioner suffers from valvular disease of the heart, Bright's disease in chronic form, is feeble, and requires the constant attendance of another person.

Two lay witnesses testify January 22, 1914, that the widow is old and feeble and helpless, and has no property and depends upon charity for a living.

From the evidence submitted your committee believe that a pension of $12 per month is fully justified, and so recommend.

H. R. 1437. Parmelia R. Parris, Hutchinson, Kans., widow of Bennett Parris, deceased, who served during the War with Mexico in Company D, First Regiment United States Dragoons, from September 27, 1847, to August 12, 1848. (W. C. 807.)

The soldier died in 1866, and a pension was, on June 30, 1887, allowed to the petitioner as his widow from January 29, 1887, under the act of Congress approved that date, at $8 per month.

The petitioner was the mother of James L. Parris, who enlisted January 26, 1864, in Company H, Seventh Regiment Illinois Volunteer Infantry, and was killed in battle October 5, 1864, and she was granted a pension of $8 per month as his mother from the day following the soldier's death. She was receiving this pension when she applied for and was allowed a pension as the widow of her husband, who had served during the War with Mexico. She continued to draw the two pensions until 1896, and it was clearly shown she was innocent of any intent to defraud and believed she was entitled to receive both pensions at one and the same time. She was given the right to elect which pension she wished to retain and selected that as mother—they were the same rate, $8—and recovery was made of all erroneous payments and pension as widow was terminated. Under the act of April 19, 1908, the rate was increased in each class to $12, and she now receives pension as the mother at $12 per month.

She could, if she so elected, surrender the pension she draws as a mother and be restored to the rolls as a pensioner at the same rate—$12 per month—as widow of a Mexican War soldier. The pending bill treats with the Mexican War claim, and the case is prepared to be considered as if she were now pensioned as the widow of a Mexican War soldier.

With the bill the petitioner files an affidavit in which she states that she is very old—she is over 80 years of age—and very feeble and has no property and no income other than her pension of $12 per month.

It is shown by competent testimony of several lay witnesses that the petitioner is the widow of the deceased Mexican War soldier, is very old and feeble, and possesses no property and has no income except her pension of $12 per month.

From the evidence submitted your committee believe that an increase from $12 to $30 per month is warranted in this case, and it is so recommended.

H. R. 1544. Daniel A. Millard, of Gaylor Farm Sanitarium, Wallingford, Conn., served during the War with Spain in Company I, Sixth Regiment United States Cavalry, from June 18, 1898, to January 22, 1899, when honorably discharged. He was 23 years of age at enlistment. (I. O. 1398267.)

The records of the War Department show the following treatment: "July 14 to 19, 1898, abrasion of both knees; July 28 to 31, 1898, fever; August 2 to 27, 1898, typhoid fever; August 29 to October 12, 1898, typhoid fever, constipation, pains in limbs, and diarrhea. He was furloughed from October 12 to November 10, 1898, because of sickness. No additional record found."

He filed a claim for pension July 28, 1911, based on malarial poisoning and disease of stomach, which he claimed was the result of the malarial and typhoid fever which he suffered from in the service. This claim was rejected December 15, 1911, on the ground of no disability in a ratable degree from same since date of filing the claim. The claim was reopened September 17, 1912, and again rejected November 11, 1912, on the ground of no record, medical or other satisfactory evidence of origin in service, of the alleged disabilities and continuance of same from date of discharge until date of filing the claim. No appeal was taken.

James B. Randall testified, December 6, 1911, that he has known the soldier 17 years; that he returned from the service suffering from typhoid-malarial fever and in a terribly run-down condition, which continued until it resulted in some kind of stomach disease, which has so incapacitated him that the soldier has been unable to earn a living and has for some time been on the poor farm as a result.

John Harrington and Mrs. Myra Broodhead and Mrs. Katheryn Mitchell, all in 1911 and 1912, testified to substantially the same effect as does James B. Randall.

Dr. Daniel R. Lyman testified, July, 1912, that the soldier is suffering from an advanced case of tuberculosis of the lungs; that the soldier is now in a public institution and a hopeless invalid; that the soldier suffers from disease of the stomach. This affiant states that he believes the condition of the soldier is due to and the result of the severe typhoid-malarial fever from which he suffered during the service.

He was examined by a board of surgeons October 4, 1911, who report his age as 37 years, height 5 feet 7 inches, and weighing 117 pounds (skeleton). They found him suffering from disease of the lungs (tuberculosis), and rated same at six-eighteenths. They found he suffered from disease of the stomach, liver, and bowels and rectum, all treated as being due to disease of the stomach, and rated six-eighteenths. No other disabilities were found and no evidence of past or present vicious habits.

With the bill the petitioner files an affidavit stating he is wholly unable to perform any manual labor; that prior to his service he never had a sick day; during service he had a prolonged attack of typhoid-malarial fever and has never recovered; that stomach disease and tuberculosis have resulted; and that he is absolutely penniless, and he and his wife and children are supported by charity, he being an inmate of a public institution.

Two lay witnesses testify that the soldier is wholly unable to do any kind of work, is sick and feeble all the time, and an inmate of a public institution, and that he has no property, and he and his wife and five children are supported by charity.

Dr. D. R. Lyman testifies that the soldier now suffers from tuberculosis and malaria and stomach trouble and is an inmate of a public institution on charity basis and is wholly unable to do any work.

From the evidence submitted your committee is of the opinion that the disabilities from which the soldier now suffers may be safely accepted as due to service, and they respectfully recommend the allowance of pension at the rate of $24 per month.

H. R. 1545. Charles Voos, of the National Soldiers' Home, Tenn., served during the War with Spain in Company D, Third Regiment Connecticut Volunteer Infantry, from June 29, 1898, to March 20, 1899, when honorably discharged. He afterwards served from October 6, 1899, to July 1, 1901, in Company I, Forty-third Regiment United States Volunteer Infantry. He was 26 years of age at the date of the first enlistment. (I. O. 1375149.)

Service treatment:

"September 22 to October 3, 1898, malaria; November 29 to December 10, 1898, sprain of left ankle; October 25 and 26, 1899, and March 31, 1900, intercostal neuralgia. No additional record found."

When mustered out from each service he stated that he was suffering from no disability, and none was found to exist by the medical officers by whom he was examined upon these occasions.

He filed a claim for pension June 25, 1908, based on malarial poisoning (chills and fever). This claim was rejected April 26, 1910, on the ground of the claimant's inability to prove by medical or other satisfactory evidence that the disability existed at date of discharge and continually thereafter. No appeal was taken, but two efforts were made to have the claim reopened, and each was denied because evidence offered failed to warrant such action.

George Hennes and David Conner testify in 1910 that they were comrades of the soldier in the service, and know he, while in service, suffered from malaria and an attack of what they thought typhoid fever.

George F. Voos testifies in 1908 that he is a brother of the soldier and knows when the soldier came home from the service in the Philippines he was suffering from chills and fever and has since suffered from same constantly.

Dr. Frank Webb testifies in 1908 that the soldier has been under his professional care since 1902 until the date of the execution of the affidavit, suffering from a chronic form of malaria, which has weakened his heart, and he is unable to perform hard labor as a result thereof.

The soldier was examined by a board of surgeons August 19, 1908, who report that he is 36 years of age, 5 feet 7½ inches in height, and weighing 129 pounds. They found him suffering from malarial poisoning, with usual results of disordered stomach, liver, and spleen; rate, eight-eighteenths. They could find no disease of the heart or any disability not covered by the rate for malarial poisoning.

In the efforts to have the claim reopened other testimony was filed, but it is cumulative in its character and adds nothing to the merits of the case.

With the bill the petitioner files an affidavit, in which he states that he is wholly unable to earn a living by manual labor and possesses no property. He further states that he contracted a cough in the service, which continued after discharge and finally developed into tuberculosis, from which he now suffers.

Several witnesses testify that the soldier had a cough after his return from the service, and that he later began to suffer from tuberculosis, from which he is now a sufferer.

It is shown by lay testimony that the soldier possesses no property.

Three physicians testify that the soldier is a sufferer from tuberculosis, malaria, and disease of the heart, and not able to perform any manual labor.

The surgeon of the soldier's home certifies, November 27, 1913, that the soldier suffers severely from pulmonary tuberculosis, varicose veins, hemorrhoids, kyphosis, and diarrhea, and is unable to perform any kind of labor.

From the evidence submitted your committee believe that the disabilities from which the soldier now suffers may be safely accepted as due to his service, and they respectfully recommend the allowance of pension at the rate of $12 per month.

H. R. 1601. James M. Pauley, of Carbondale, Colo., served in the Regular Establishment, in Company M, Nineteenth Regiment Kansas Volunteer Cavalry, from October 29, 1868, to April 18, 1869, when honorably discharged. (I. O. 942223.)

The records of the War Department fail to show the soldier was ever reported as sick or received medical treatment for any cause.

September 22, 1891, he filed a claim for pension based on hernia (rupture) of both sides, which he alleged was incurred in the service and line of duty. After a most thorough special examination the claim was rejected June 22, 1898, on the ground of no record and the claimant's inability, even though aided by a special examination, to furnish evidence necessary to show that the double hernia was incurred in the service and line of duty. No appeal was taken.

The claimant swears that he incurred double hernia as a result of loading heavy wood on a wagon, in line of duty.

James Hurst, who was second lieutenant of the soldier's company, testifies while in line of duty in 1868 or 1869 the soldier, in lifting heavy wood and loading it upon a wagon, was seriously injured in both groins—ruptured.

Charles M. Priddy, who was a comrade in arms, testifies that about December, 1868, the soldier incurred an injury in service and line of duty which resulted in a serious hernia, and affiant saw same at that time.

This same witness states that prior to enlistment of the soldier, affiant was his neighbor, and often employed him and knows that he was not then ruptured, but was able to and did perform hard labor.

W. H. Jack testifies to the fact that prior to his enlistment the soldier was a well and strong man and free from rupture; that when he came home after service he was ruptured severely and has been sick ever since.

N. W. Titus testifies that when the soldier came home from the service he was ruptured, and has been ever since.

The special examination, while exhaustive, adds very little to the claim. It shows that prior to enlistment the soldier was known as a strong and well man and no one knew of any rupture, and that after his return home from the service, or very shortly thereafter, it became generally known that he suffered from a severe rupture of both groins (double hernia), from which he has since continued to suffer. The soldier and all but one or two of the many witnesses seen by the special examiners are rated as people of good character and standing.

He was examined April 6, 1892, by a board of surgeons who found him to be suffering from double inguinal hernia, and rated the disability from same at fourteen-eighteenths. They also found him suffering from rheumatism and rated it at six-eighteenths.

Anyone familiar with the character of service rendered by the Nineteenth Regiment Kansas Volunteer Cavalry, and the purpose for which the organization was mustered into the service, will not be at all surprised at the lack of medical treatment recorded. This regiment was mustered in for the purpose of fighting Indians, and the short campaign in which they engaged (about six months) was filled with most grave and serious hardships in a severe winter, and filled with hard fighting, and it is not to be expected that much attention was paid to medical records in such a campaign as this regiment underwent.

With the bill the petitioner filed an affidavit stating he is unable to perform manual labor because of double hernia, and possesses no property or income. He is now 65 years of age.

His allegations are fully sustained by the testimony of lay witnesses.

A physician testified December 14, 1913, that the soldier suffers from double inguinal hernia, and is unable, as a result of same, to perform any manual labor.

From the evidence submitted your committee is of the opinion that the disabilities from which the soldier now suffers were incurred in service, and they therefore respectfully recommend the allowance of pension at the rate of $24 per month.

H. R. 2007. James Turner, of the State soldiers' home, Erie County, Ohio, served in the Regular Establishment in Company A, Fourteenth Regiment United States Infantry, from May 31, 1867, to May 31, 1870, when honorably discharged at the expiration of his term of enlistment. (Certificate 407068.)

The records of the War Department show the soldier was treated on three occasions during the service; for brief attacks of diarrhea once and constipation twice.

He is now pensioned at $8 per month for gunshot wound of the right thigh and disease of the eyes. He was first pensioned at $4 per month from July 18, 1888, for said disabilities. The rate was increased February 6, 1889, to $6, and October 9, 1895, to $8, which he now receives. He has filed many claims for increase of rate since 1895, all of which have been rejected, the last action of this character having been taken November 5, 1913, and is based on the ground that the present rate of $8 is adequate to cover present disability from said gunshot wound and disease of the eyes.

Some medical testimony was filed in 1906 and prior to that time to the effect that the soldier's right leg is very stiff as a result of his gunshot wound, and that his sight is seriously affected by the disease of the eyes.

The board of surgeons that examined him January 30, 1907, is the last board to suggest a specific rate for each disability. They state that he is entitled to a rate of $8 for gunshot wound of the right thigh and $6 for disease of the eyes.

He was examined by two experts on eye diseases since, to wit, July 11, 1910, and October 15, 1913, and while in each case disease of the eyes is found to exist, and also gunshot wound of the right thigh, no specific rate is suggested for same. The last expert states simply that he would not suggest a change in rate. Whether he believed $8 for disease of eyes alone was proper does not appear; as he is an oculist, that is doubtless his meaning; if so, then he makes no provision for additional disability due to gunshot wound, which a former board of surgeons rated at $8.

With the bill the petitioner files an affidavit in which he states that he is wholly unable to perform any manual labor by reason of gunshot wound of the right thigh, disease of the eyes, and rheumatism, and resulting disease of the heart; that he is 72 years of age and possesses no property and has no income aside from the $8 per month pension with which to support his wife.

Two lay witnesses testify the soldier is unable to earn a support by any labor for himself and wife and has no property.

A physician testifies, January 30, 1914, that the soldier is now suffering to such an extent from gunshot wound of the right thigh and disease of eyes and rheumatism, and disease of the heart, liver, and spleen as to be unable to perform any kind of labor.

From the evidence submitted it is believed by your committee that an increase from $8 to $20 per month is fully warranted in this case, and it is so recommended.

H. R. 2511. Virginia M. Mills, of Leavenworth, Kans., is the widow of Frank H. Mills, deceased, who served in the Regular Establishment, Twenty-fourth Regiment United States Infantry, from October 1, 1873, to July 4, 1892, when he was retired. He held the rank of second lieutenant from October 1, 1873, to August 20, 1878, and first lieutenant from that date until November 1, 1882, and regimental quartermaster from then until April 18, 1887, and captain until July 4, 1892, when retired. He died July 29, 1899. (W. C. 528638.)

The widow filed a claim for pension February 8, 1900, which was granted at $17 per month from July 30, 1899, the day following the soldier's death from chronic rheumatism, which resulted in disease of the heart. This pension she now receives.

The records of the War Department show that the soldier contracted his fatal disease—chronic rheumatism—in 1880, at which time he held the rank of first lieutenant, and the general law fixes the rate of pension to which his widow is entitled at $17 per month. These records show that after contracting chronic rheumatism in 1880 the soldier continued to constantly suffer therefrom until his death as a result thereof. He held the rank of captain for five years prior to his being retired. The pending bill proposes to increase the rate of his widow's pension.

With the bill the petitioner files an affidavit in which she states that her only support is her monthly pension of $17, in addition to which all of the property she owns consists of $321 in cash and a note for $479; that she is unable to earn a support; and there is no one legally bound for her support.

The allegations of the widow as to being unable to earn a support and the amount of property she possesses and her income from all sources are sustained by the testimony of two lay witnesses.

From the evidence submitted, your committee believe that an increase from $17 to $25 per month is fully warranted, and so recommend.

H. R. 2643. Louis K. Turner, of Mauston, Juneau County, Wis., served during the War with Spain in Company D, Third Wisconsin Infantry, from June 22, 1898, to January 16, 1899, and unassigned Thirty-fourth United States Infantry and Company I, Thirty-ninth United States Infantry, from August 12, 1899, until February 15, 1901, when honorably discharged upon surgeon's certificate of disability. He was 42 years of age when he enlisted in 1898. Service was chiefly in the Philippine Islands. (I. C. 1079265.)

On February 25, 1901, he filed a claim for pension based upon right inguinal hernia, which was allowed at $10 per month.

On May 18, 1911, he filed a claim based upon right inguinal hernia, diarrhea, malarial poisoning (chills and fever), alleging piles, disease of lungs, and tuberculosis as results.

On September 27, 1911, he was allowed a rate of $14 for complete right inguinal hernia and piles, result of diarrhea.

That part of the claim based upon diarrhea and malarial poisoning was rejected on the ground of no ratable degree of disability from same since date of filing. That part alleging disease of lungs and tuberculosis as results was rejected because these disabilities are not accepted as results, and are not shown to have otherwise been due to or connected with the service.

The records of the War Department show treatment for diarrhea and malarial fever upon several occasions and for right inguinal hernia, all in line of duty. He was discharged on a surgeon's certificate of disability for inguinal hernia. These records show no treatment for any other disability.

It is shown by medical testimony that the soldier was suffering from diarrhea, malarial poisoning, and right inguinal hernia at discharge, and has suffered from same constantly since that date. Piles are shown to have resulted from the diarrhea during recent years.

He was examined June 26, 1901, by a board of surgeons at Mauston, Wis., who rated him ten-eighteenths for the right inguinal hernia and eight-eighteenths for the malarial poisoning. They found no other disability existing.

On July 5, 1911, he was examined by a board of surgeons at Baraboo, Wis., who rated ten-eighteenths for right inguinal hernia, 0/18 for diarrhea, six-eighteenths for piles, 0/18 for malarial poisoning, and eight-eighteenths for disease of heart. The board found some disease of lungs, but did not rate therefor.

With the bill the petitioner states in an affidavit that by reason of diarrhea, piles, hernia, malarial poisoning, and tuberculosis he is unable to perform any manual labor, and that he possesses no property.

One lay witness testifies that the soldier possesses no property of any kind, and is unable to perform any manual labor.

Two physicians testify that the petitioner is wholly unable to perform any manual labor; that he is suffering from tuberculosis, having had first hemorrhage in August, 1910, and the disease has rapidly progressed; that the soldier also has complete right inguinal hernia and a small hernia also upon left side.

From the evidence submitted your committee believe that an increase from $10 to $24 per month is fully warranted, and so recommend.

H. R. 2750. Stanley S. Stout, of Neva, Johnson County, Tenn., served during the War with Spain in Company C, Sixth Regiment United States Infantry, from July 1, 1898, to March 18, 1899, when honorably discharged. He was 21 years of age when he enlisted. Served some in Cuba. (I. O. 1254805.)

On September 25, 1900, he applied for pension, alleging as disabilities rheumatism and affection of the left side. This claim was rejected on July 12, 1901, on the ground of no ratable degree of disability since date of filing.

On August 13, 1902, he again filed a claim for pension, this time alleging gravel as the only disability. This claim was also rejected because no ratable degree of disability from gravel was found to exist.

On March 13, 1908, he again applied for a pension, alleging as disabilities rheumatism, jaundice, malaria, pleurisy of side, diarrhea, and gravel. This claim was rejected also as no ratable degree of disability was found to exist from any of the causes alleged.

He filed some testimony after the first rejection together with a request for reopening and reconsideration of the claim. This request was denied on February 24, 1909. He appealed the claim, and in a decision of April 30, 1909, the Secretary of the Interior sustained all of the adverse actions of the bureau. This decision is full, and sets forth all of the facts. It is attached to brief, and attention is invited to same by your examiner.

The records of the War Department show the following treatment:

"August 18, 1898, to ——— ——— (no diagnosis). Nothing additional found."

When mustered out the soldier claimed not to be suffering from any disability, and the officers by whom he was then examined certify that none existed.

The claimant has filed testimony of comrades and officers in which it is set forth that the soldier did suffer during September, 1898, in Cuba, from the several disabilities alleged, and the Bureau of Pensions in its several adverse actions in connection with the three claims did not question origin in service of any disability alleged.

Several physicians and several lay witnesses testify the soldier suffered from rheumatism, pain in left side, malarial poisoning, gravel, and diarrhea when he returned home from the service, and has suffered from same to more or less extent during the years since discharge until 1909.

The board of surgeons at Mountain City, Tenn., who examined the soldier, January 2, 1901, report as follows:

"We find no evidence of rheumatism or affection of left side. This claimant is, as far as we are able to ascertain, in sound physical condition and a proper subject for life insurance.

"This claimant's heart and lungs are in good shape."

He was examined by a board of surgeons at Elizabethton, Tenn., February 8, 1906, who report a slight stricture which causes at times a stopping of the flow of urine and necessitates use of the catheter; that the stricture is due to prostatic causes about the membranes of the urethra—rate six-eighteenths. This board finds no evidence of any other disabilities—reports all vital organs normal and in good condition and the soldier in a well-nourished, strong, and healthy physical condition.

The board of surgeons at Mountain City, Tenn., again examined the soldier, May 6, 1908, and report that they find a little rheumatism of the shoulders, hips, and knees, for which they rate four-eighteenths, and some malarial poisoning rated at two-eighteenths. The board states that after careful search for evidence of jaundice, pleurisy, diarrhea, and gravel they are unable to find any existing.

All of the boards state there is no evidence of any venereal disease or vicious habits.

With the bill the petitioner files an affidavit stating that by reason of rheumatism and malaria he is unable to earn a living by manual labor; that all of the property owned by him consists of 10 acres of land in Johnson County, Tenn., which is worth about $50.

Two comrades testify to the fact that the soldier was a well and strong man before enlistment, suffered during service from rheumatism, jaundice, and malaria, and has suffered ever since his discharge from said diseases.

Two lay witnesses testify that the soldier is without means of support, and all the property he owns consists of a few acres of land, worth about $50, and that he has five small children and an invalid wife.

Two physicians testify that the soldier suffers constantly from rheumatism and pleurisy and pains in left side and malarial poisoning to such an extent as to render him unable to earn a support by manual labor, and that the soldier's wife is an invalid.

Stanley S. Stout, the soldier, testifies, January 10, 1914, that on or about four months after return from the service he was taken down, and sent for Dr. J. G. Butler, who stated he was suffering from rheumatism and malaria. The doctor now claims he has no such record and no recollection of it.

J. M. Stout testifies, January 10, 1914, that about four months after his return from the service the soldier suffered from an attack of something from which he was "bad off," and Dr. J. C. Butler treated him, but has forgotten this and has no record of it.

January 10, 1914, J. L. Stout testifies that the soldier was very sick about four months after his return from the service and was

treated by Dr. J. G. Butler, and affiant has often since heard soldier complain.

January 10, 1914, J. B. Kidd testifies that about four months after return from service the soldier was very sick and treated by Dr. J. G. Butler.

None of these witnesses state the nature of the soldier's illness or how long it continued, and the physician, it is said, has no record of it and fails to recall same at all.

From the evidence submitted your committee believe that the disabilities from which the soldier now suffers were incurred in service and line of duty, and recommend the allowance of pension at the rate of $12 per month.

H. R. 2813. Della A. Cooter, of Greeneville, Tenn., served in the Regular Establishment, Sixty-ninth Company, United States Coast Artillery, from March 19, 1904, to March 18, 1907, when honorably discharged. He was 31 years 2 months of age at enlistment. (I. Ctf. 1147264.)

September 5, 1907, he filed a claim for pension, alleging sore eyes contracted in October, 1905, and rheumatism contracted in April, 1906, and piles, at Fort Monroe, Va. His claim for sore eyes was allowed June 8, 1908, at the rate of $6 per month from the date of filing. That part of the claim based upon rheumatism and piles was held in abeyance pending special examination as to origin in service of these disabilities. After the special examination the claim was rejected as to rheumatism and piles, on the ground of no record, and the best obtainable evidence is not deemed sufficient to satisfactorily establish origin in the service and line of duty. Rheumatism was also rejected upon the further ground of no ratable degree of disability from same since date of filing the claim.

Upon three occasions—August 31, 1909; October 13, 1909; and December 7, 1909—the Bureau of Pensions declined to reopen the claim on the ground of insufficiency of the evidence offered to warrant such action. No appeal was ever taken.

The records of the War Department show the following treatment:

"April 14 to 21, 1904, vaccinia in line of duty; January 20 to 30, 1907, eye strain, astigmatism, in line of duty. No aditional record found."

Comrade L. R. Williamson testifies that the soldier suffered from piles during the service, and that affiant gave him some ointment for use upon the piles. This witness, who is rated "good," sustained his testimony when seen by a special examiner.

Comrades George W. Pool, George Morris, and N. S. Lowe testify that the soldier suffered during the service from piles, rheumatism, and sore eyes. Before a special examiner they sustain their former testimony fairly well. They are rated "good" as to two of them and "fair" as to the other.

Dr. F. C. Britton, in affidavits filed in November, 1907, and January, 1908, states he treated the soldier from early in the fall of 1907 for rheumatism, piles, and disease of the eyes.

Three witnesses testified before a special examiner that the soldier was a well and strong man, free from disease of any kind, before his service, but that when he returned home he appeared to be and claimed that he was suffering from rheumatism, piles, and sore eyes, and has suffered from same ever since.

When examined by a board of surgeons November 6, 1907, the soldier was found to be suffering from sore or diseased eyes, for which they rated six-thirtieths; rheumatism, rated four-eighteenths; and piles, rated at six-eighteenths.

No other disability was found to exist, and no evidence of any vicious habits.

With the bill the petitioner files an affidavit in which he states that he is unable to perform any manual labor because of disease of the eyes, rheumatism, and piles, and owns no property of any kind and has no income other than his pension.

Several lay witnesses testify that the soldier can not do more than one-fourth of a day's manual labor and possesses no property and has no income aside from his pension.

Two physicians testify that they have examined the soldier and find him suffering from rheumatism, piles, and disease of the eyes. One of these witnesses further states the disabilities are of a permanent nature and prevent the soldier from doing more than one-half a day's work by manual labor.

Since this report was prepared an affidavit has been filed, executed by Dr. G. S. Hays, eye, ear, nose, and throat specialist, who testifies that on February 3, 1914, he examined the soldier and found him suffering from conjunctivitis in each eye. He is also suffering from astigmatism of each eye; he wears A + 100, ax 90, R. E. + 100, ax 1.80, L. E., for constant wear. Ophthalmantic examination reveals a very red retina with dark spots. Retinal vessels dilated. I am of the opinion that the condition of the retina is due to rheumatism.

Dr. F. C. Britton testifies February 3, 1914, that he that day examined the soldier and found him suffering from rheumatism of both shoulders and arms; the right arm is badly swollen at the elbow joint. He also has protuding piles, which are at times aggravated by constipation. He also has disease of eyes, and they are in bad condition and constantly grow worse. All of these disabilities are now chronic in character and incapacitate him for labor fully three-fourths.

From the evidence submitted in this case it is believed that an increase from $6 to $17 per month is fully warranted, and so recommend.

H. R. 3030. Mary A. Barber, Sapulpa, Okla., widow of Lafayette E. Barber, deceased, who served during the War with Spain in Company K, Thirty-third Regiment United States Volunteer Infantry, from August 15, 1899, to April 17, 1901, when honorably discharged. He was 25 years of age at date of his enlistment. (W. O. 938106.)

The records of the War Department show the following treatment:

"February 9 to 11, 1900, malarial fever, also termed intermittent tertian fever, in line of duty. No additional record found."

The records show he was reported as sick in quarters April 30 to May 10, 1900, June 5 to 12, and 16 to 20, 1900. The nature of this illness not stated.

When mustered out he claimed to be suffering from catarrh of head, rheumatism, and loss of smell. The medical officer who examined him certified he could find no evidence of said disabilities.

The soldier filed a claim for pension April 29, 1903, based on malarial poisoning, catarrh, rheumatism, disease of stomach and bowels, and diarrhea alternating with constipation. This claim was rejected February 6, 1906, as to malarial poisoning diarrhea, constipation, and disease of the stomach, on the ground of no ratable degree of disability therefrom since date of filing; and as to the other disabilities, on ground of no record, medical or other satisfactory evidence that the same were contracted in service and line of duty and existed at date of discharge.

The widow filed a claim March 16, 1910, which was rejected on the ground that the soldier's death on December 6, 1909, from typhoid fever was in no way connected with or due to his military service.

In the widow's claim the only evidence filed was an affidavit of attending physician showing the soldier died of typhoid fever December 6, 1909, with a history of having been a chronic sufferer from indigestion and diarrhea.

No evidence was filed in soldier's claim. He was twice examined by board of surgeons—August 7, 1901, and February 1, 1905. In each instance the only disability found to exist was catarrh of head, and both boards rated this at $6 per month. The first board stated the disability, in their opinion, was due to syphilitic causes; the second board did not agree in this view, and states that venereal disease has no connection with the catarrh. The evidence that soldier ever had syphilis consists of condition of his hair, nose, and penis, which the first board states looks as if he had had syphilis; and he said to them that he had had this disease.

With the bill the petitioner files an affidavit, in which she states that she is the widow of the deceased soldier; that she believes his death from typhoid fever was a result of the stomach and bowel trouble he contracted in military service, and from which he continued to suffer from date of his discharge until his death; that she has two small minor children and possesses no property or income.

Two lay witnesses testify the widow possesses no property and depends on her daily labor for support of herself and two small children.

A transcript of marriage record filed with the bill shows soldier and petitioner were duly married July 19, 1902.

Sherman S. Whiting and Mrs. Lizzie Buffington testify in affidavits filed with the bill that the soldier and the widow had never been married prior to their marriage to each other; that they lived continually together and were never divorced, and the widow has not remarried and has two minor children to support, and possesses no property.

Mrs. Cora A. Meeker and Mrs. Mollie L. Whiting testify in affidavits filed before the committee that the soldier left two minor children, born as follows: Bernice E. Barber, born October 19, 1905, and Basil E. H. Barber, born January 2, 1908. That the affiants have personal knowledge of the correct dates of birth of these two children, and that they are now living.

From the evidence submitted, your committee is of the opinion that a pension of $12 per month and $2 additional for each of the two minor children until they, respectively, reach the age of 16 years is fully warranted in this case, and so recommend.

H. R. 3063. Charlie L. Pennington, of Milledgeville, Ga., served in the Regular Establishment, in the Eighteenth Battery United States Field Artillery, from January 8, 1902, to December 28, 1904, when honorably discharged. He was 25 years and 9 months of age at enlistment. (I. C. 1156097.)

The records of the War Department show the following treatment:

"April 10 to 14, 1902, acute tonsillitis; February 14 to 25, 1903, subacute catarrhal appendicitis; April 24 to 28, 1903, wound contused right patella, kicked by a mule during drill, April 24, 1903, accidental; August 4 to 9, 1903, dengue, acute; September 18 to 20, 1903, indigestion, intestinal, acute; November 13 to 22, 1903, fracture, simple, anterior portion right rib, accidentally thrown from a mule in the field October 26, 1903; November 27 and 28, 1903, diarrhea. All in line of duty. No additional record found."

He filed a claim for pension March 27, 1909, based upon injury and fracture of the eighth rib on the right side. This claim was allowed at $6 per month, July 6, 1909, from date of filing, and he now receives a pension at that rate.

August 16, 1911, he again filed a claim for pension. This time basing it upon disease of the heart incurred in line of duty. This claim was rejected October 3, 1911, on the ground of no disability from disease of the heart in a ratable degree since date of filing the claim. He did not appeal, but did file some evidence in an effort to have the claim reopened, and such action was denied October 21, 1911, on the ground that the testimony offered did not warrant same.

The soldier had a rib or two broken in service, and is now receiving $6 per month pension for same, which, in the opinion of the Bureau of Pensions, is as high a rate as the evidence justifies for the disability resulting from said injury. In several sworn statements he alleges that the disease of the heart from which he now suffers was incurred in line of duty in service from exposure. In support of this allegation, he furnished testimony of Dr. J. H. Trout, who, in an affidavit of October 10, 1911, states that he treated the soldier for heart disease on January 10, 1905—about a month after discharge from service—February 7 and July 19, 1905, and he was, by reason of the same, then incapacitated for manual labor. He also furnished an affidavit of Dr. T. B. Perry, executed October 19, 1911, in which he states that he treated the soldier in August, 1911, for mitral disease of the heart which appeared to be of a chronic or long-standing nature and incurbale, and incapacitates him for the performance of manual labor. In addition to this medical testimony, one lay witness, in an affidavit executed September 19, 1911, states that the soldier was suffering from disease of the heart when he returned from the service in January, 1905, and has always since suffered from same, and is unable to perform manual labor by reason of the said disease.

The soldier was examined by boards of surgeons June 2, 1909; September 6, 1911; and November 1, 1911. The first board found him suffering only from the fracture of rib on the right side. They reported him as slight in build and very unhealthy in appearance, but they found no disease of the heart or any other disease save broken rib. The second board found about the same physical condition, except they report heart as very rapid in action, but no evidence of disease of the heart. They reported some slight trouble with the lungs—cough and spitting—and trouble in breathing. The last board states that the only disability they found which would warrant a rate of pension was that from injury—broken ninth and tenth rib of the right side—and suggested $6 per month as a proper rate therefor. As to disease of the heart they state:

"Apex beat of heart visible in fifth interspace on nipple line, impulse diffused over epigastrium area of dullness increased slightly downward and left to nipple line; second sound accentuated and sharp; no murmurs; pulse hard and rapid, irregular, and irritable; no intermission; no cyanosis or edema or dyspnea on exertion."

All of these boards report the soldier as anemic, being 5 feet 11 inches in height, and weighing from 128 to 135 pounds. He is only 37 years of age now. Each board certifies that there is no evidence of venereal disease past or present, and no vicious habits.

With the bill the petitioner files an affidavit in which he states that he is in part unable to earn a living by manual labor because of the disease of heart and fracture of the ribs, both incurred in his military service, and that he possesses no property of any kind.

Two lay witnesses testify that the soldier owns no property and is unable to earn a living by manual labor, and has a wife and minor child, both of whom are in feeble health.

Dr. T. M. Hall testifies November 8, 1913, that the soldier has an enlarged heart with serious valvular lesion, a deformity of the chest due to fracture of rib, and recurring dysentery. He also states that the soldier's wife is an invalid, suffering from pellagra, and a minor child is partially paralyzed from an injury received at its birth. He states the soldier is a very poor man, but a man of most excellent habits.

From the evidence submitted your committee is of the opinion that an increase from $6 to $24 per month is fully warranted in this case, and so recommend.

H. R. 3082. James H. Kampo, of Oconto, Oconto County, Wis., served during the War with Spain in First Battery United States Field Artillery, from April 26, 1898, to March 1, 1899, when he was honorably discharged at Tybee Island, Ga. He was 21 years of age at enlistment.

On March 26, 1904, he filed a claim (Inv. Clf., 1146333) for pension based upon disease of stomach and bowels, result of fever and measles contracted in May, 1898, at Tybee Island, Ga. He was examined by two boards of surgeons July 20, 1904, at Marionette, Wis., and April 1, 1908, at Green Bay, Wis. Both boards rated his disabilities disease of stomach and bowels at four-eighteenths. He was pensioned May 4, 1908, at $6 per month for these disabilities.

On June 6, 1912, he applied for an increase of pension, alleging increased disability from disease of bowels and stomach. July 10, 1912, he was examined by a board of surgeons at Shawano, Wis., who reported that he was entitled to only six-eighteenths for the disability due to disease of bowels and stomach, and six-eighteenths for disability due to disease of heart. No evidence of vicious habits. This claim was rejected on August 15, 1912, as far as disease of bowels and stomach was concerned, on the ground of no increase of disability therefrom. Disease of heart has never been claimed for, and there is no evidence upon file to show same due to the service. No appeal taken, and no effort made to reopen the rejected claim.

"May 4 to 6, 1898, acute indigestion; May 9 to 13, 1898, acute diarrhea; August 21 to 31, 1898, measles; September 27 to 28, 1898, acute diarrhea; November 25 to 26, 1898, acute indigestion; January 28 to 29, 1899, acute diarrhea. Returned to duty."

All the foregoing in line of duty.

With the bill your petitioner files an affidavit, executed January 13, 1913, in which he alleges that he is wholly unable to earn a support by manual labor by reason of disease of bowels, stomach, and heart, due to malarial fever and measles, which he contracted during his service; that all of the property owned by him is not worth over $200 and consists entirely of personal property.

Dr. C. W. Stoelting, in affidavit of January 8, 1913, states that he that day examined petitioner and found he suffered from a weak and dilated heart; that the condition of heart was first noticed by him on June 23, 1903, when he formerly examined soldier, and he thinks same due to exposure undergone by soldier during military service while convalescing from malarial fever, measles, and protracted siege of diarrhea; that he is also suffering from gastro-enteralgia, described by soldier as "cramps," which are the initial symptoms of a posterior spinal sclerosis, and at this date the deep patellar reflexes are greatly diminished; the coordination of muscle movements appear to be perfect, indicating the absence of Bomberg sign, and also the pupils respond very lively to light, showing absence of the Argyle-Robertson pupil. The affiant declares the petitioner, by reason of the foregoing disabilities, is wholly unable to earn a support by manual labor.

Two witnesses state the petitioner is without means of support and owns only a few household goods.

From the evidence submitted your committee believe that an increase from $6 to $12 per month is fully warranted in this case and so recommend.

H. R. 3092. James H. George, of Blairsville, Ind., served during the War with Spain in Company G, Forty-seventh Regiment United States Volunteer Infantry, from September 20, 1899, to July 2, 1901, when honorably discharged on surgeon's certificate of disability. He also served in Company D, Fifth Regiment Pennsylvania Volunteer Infantry, April 27, 1898, to November 7, 1898. He was 24 years of age at the first enlistment. (I. Clf. 1090388.)

The records of the War Department fail to show he was ever reported as sick or received any treatment during the first service. He was treated as follows during the second service:

"June 23 to 26, 1901, for mental observation, no fixed delusions, disconnected ideas and speech, no previous history in line of duty; June 26 to July 10, 1901, mania, acute with delusions of grandeur, in line of duty. Delusions violent, raves constantly day and night, and injures himself when not under restraint, in line of duty. Transferred to Government Hospital for the Insane, Washington, D. C., September 10, 1901. No additional record found."

He filed a claim for pension March 9, 1903, based on acute insanity which was allowed at $17 per month from date of filing to terminate September 24, 1902, the disability—insanity—having ceased.

On October 7, 1904, he again filed a claim asking his name be restored to the roll for insanity from date of dropping, and also alleging chronic diarrhea as an additional disability which he had contracted in service. This claim was rejected February 12, 1906, on the ground of no ratable degree of disability shown from said causes since date of filing.

Another claim filed December 23, 1907, with the same allegations was rejected April 20, 1908, on the same medical grounds. And one more claim with same allegations, filed June 19, 1908, was rejected May 27, 1909, on the same medical grounds.

March 4, 1911, he again filed a claim; this time based on chronic diarrhea alone, which was rejected April 28, 1911, on the ground of no ratable degree of disability therefrom since date of filing the claim.

The evidence, of course, shows incurrence in service and existence at discharge of insanity. As to chronic diarrhea two comrades, James B. Lucksinger and Samuel S. Reager, testify, in 1904 that the soldier was well known to them prior to his enlistment, and they know he was a well and strong man, free from any disease; that he suffered during the service with diarrhea and was suffering from same at discharge and has continued to suffer therefrom since. They also testify to the sudden attack of insanity the soldier incurred in the service.

Robert G. Johnson, Samuel A. Crawford, George W. Crede, J. G. Baldrige, and A. T. Rutledge, lay witnesses, testify, in 1905 and 1906, to the fact that the soldier was a well man prior to service, but when he came home after discharge he was insane and had to be confined for a long time in an asylum for the insane at Washington, D. C., and though now out of an asylum, in their opinion, is feeble in mind; they further testify he was suffering from diarrhea when he returned from the service and has continued since to suffer so from same as to render him unable to perform full manual labor or anything like full labor.

The claim was sent to the field for special examination, and sworn statements were obtained for the soldier, and 10 or 12 witnesses, all of whom were found to be people of good character and standing. The net result of this special examination shows that the soldier has lived all of his life in the same locality; that he was free from disease or disability prior to enlistment; that he returned home from final service suffering from acute mania and was sent to the insane asylum at Washington, D. C., where he remained until September 24, 1902, when discharged as "cured"; that he was regarded as more or less feeble-minded afterwards, and was so regarded when this investigation was held in 1904, and there was every indication of this mental condition being permanent; that the soldier had suffered more or less ever since his discharge and up to the time of the special examination from diarrhea of a chronic form and was prevented to a large extent by that and his mental condition from earning a living by manual labor.

The soldier was first examined by a board of surgeons July 1, 1902, who report him as 29 years of age, 5 feet 6 inches in height, and weighing 145 pounds. This board confined its examination to mental condition, concerning which they state:

"Claimant has a downcast, evasive expression of face. Has not returned to his usual occupation. Shows mental depression and has no desire for self-support. According to this own statement he has secluded himself from society and his former associates. When asked why he had done so, states that he does not know, except that he has no desire to be with former associates. Shows no evidence of delusions or hallucinations at this examination, but his condition is rather that of apathy. It is the opinion of this board that the claimant is suffering from chronic mania."

He was examined by other boards of surgeons November 23, 1904, May 16, 1906, and April 5, 1911. All of these boards found and reported the soldier's mental condition was weak, and most of them found chronic diarrhea actually existing at time of the examination, or evidence that the soldier does suffer from same from time to time. They rate from four-eighteenths to twelve-eighteenths for each of these disabilities, with the exception of the last board, which simply states conditions found as to said disabilities and is silent as to the proper rates therefor.

With the bill the petitioner files an affidavit in which he states he is wholly disabled by reason of diarrhea and mental trouble for performance of manual labor, and in possession of no property and no income.

Lay witnesses and the Member who introduced the bill state the soldier possesses no property and has no income and is regarded as feeble-minded and unable to earn a living by his own efforts.

Dr. A. T. Rutledge testifies, January 1, 1914, that the soldier is now and has been since discharge from the service physically unable to do any manual labor; that he suffers from pains in the head, and his mental condition is such that he can not concentrate his mind upon anything of any importance, becomes confused when he tries to do so; that he suffers now and has since discharge from diarrhea; that the only work he can do is light routine work about a pool room, and from his mental condition he is incapable of doing anything which requires any thought, except when told by others to do so and how to do it.

From the evidence submitted in this case it is believed that the disability from which the soldier now suffers (mental feebleness bordering upon imbecility) is due to the service, and a pension of $24 per month is fully justified, and it is so recommended.

H. R. 3311. Martella M. George, of Vandervoort, Ark., is the widow of Wallace E. George, deceased, who served during the War with Spain in Company D, Twentieth Regiment Kansas Volunteer Infantry, from June 14, 1898, to August 28, 1899, when honorably discharged. He was 21 years of age at enlistment. (W. O. 922268.)

The records of the War Department show the following treatment:

"July 5 to 24, 1898, acute gonorrhea; September 10 to 23, 1898, gonorrhea; December 11 to 21, 1898, gonorrhea; December 23, 1898, to March 5, 1899, phimosis gonorrheal. Gonorrheal chancroidal adenitis, both groins, chancroids on penis and syphilis; May 10 to June 5, 1899, syphilitic rheumatism, shoulders, back, and legs; June 9 to August 2, 1899, secondary syphilis, mucous patches mouth and throat; August 2 to 28, 1899, syphilis, secondary, mucous patches in mouth and throat. None of these in line of duty. Discharged August 28, 1899, services no longer required."

September 14, 1899, the soldier filed a claim for pension, based on rheumatism, bronchitis, and disease of the heart and lungs, which he claimed were contracted in the service in July, 1898. This claim was rejected April 30, 1902, on the ground of no disability in a ratable degree from causes alleged, independent of the result of the venereal disease from which he suffered during the service.

The widow filed a claim June 19, 1909, alleging her husband's death, August 17, 1908, from typhoid fever was a result of disabilities incurred by him during his military service. This claim was rejected September 7, 1909, on the ground that the soldier's death from typhoid fever nine years after his discharge can not be accepted as a result of any disability shown to have existed in the service, nor is it believed to be susceptible of proof that said fatal disease was in any wise due to the soldier's military service.

In the widow's claim the only evidence filed consists of the testimony of a physician, who attended the soldier in his fatal illness and some time before, who states that the soldier suffered from constipation and chronic bronchitis prior to the attack of typhoid fever that proved fatal, and, in the opinion of this physician, the bronchitis contributed to the soldier's cause of death.

In the claim of the soldier the only evidence to base any action upon consists of the report of the board of surgeons, by whom the soldier was examined on January 29, 1902, who report him as 25 years of age, 5 feet 8¼ inches in height, and weighing 145 pounds. This board made a careful examination and reported that all of the vital organs were normal and no disability of any kind could be found to exist which would warrant a rate of pension, and no rate for any cause was suggested by the board.

As to venereal disease, the board reported that they found evidence of gonorrhea in the past, but that if soldier had ever had syphilis a good recovery had been made, as no evidence thereof could be found to exist.

With the bill the petitioner files an affidavit in which she states that she believes her husband's death was due to his military service, that she is not strong, and that all of the property she owns consists of some land worth $600, and from which there is an income of $40 per annum.

Her statements are sustained by testimony of lay witnesses.

A physician testifies that the widow is a feeble woman and now suffers from appendicitis.

The original marriage certificate showing the soldier and the petitioner were married May 30, 1900, was filed with the committee. A copy thereof was made by your examiner and kept with the case, and the original returned, as it was highly prized by the widow.

The petitioner in an affidavit executed February 28, 1914, states the minor children of herself and soldier were born on the following dates: Wallace M. George, born October 11, 1901. Howard L. George, born September 12, 1904. Frances S. George, born February 24, 1906. Wayne E. George, born September 10, 1908.

The notary before whom this paper was executed certifies over her seal that she personally knows the dates of birth as given are correct from long personal acquaintance with the widow and her deceased husband.

Howard O. George and F. M. Usher testify, March 4, 1914, that they know from personal knowledge that the soldier and the petitioner were married May 30, 1900; that neither had been married before; that they were never divorced and lived constantly together, and she has not again married since his death; that the soldier left surviving four minor children born upon the dates set forth in a sworn statement of the petitioner, the correctness of which is personally known to affiants.

From the evidence submitted your committee is of the opinion that a pension of $12 per month and $2 additional for each minor child until same reaches the age of 16 years is justified, and so recommends.

H. R. 3315. James E. Hooks, of Foreman, Ark., is pensioned under the general law at the rate of $6 per month on account of disease of lungs incurred as a private in Company E, First Regiment Arkansas Volunteer Infantry, during the War with Spain. He enlisted May 16, and was mustered out with the company October 25, 1898.

The War Department records show that the soldier was treated for measles during service, and the testimony of a surgeon and others show that his hearing was impaired in service, and has been since discharge, but it is not shown that the hearing of both ears was impaired while the soldier was still in service. On the contrary, the pensioner himself states that it was a year or a year and a half after discharge before his left ear became affected. He claims impaired hearing of both ears as a result of the measles and pneumonia which the testimony shows he had during service.

The original claim was filed December 1, 1906, and allowed at $6 per month from that date, for disease of lungs. That action was taken July 14, 1910, after special examination, and at the same time the claim for impaired hearing was rejected for right ear because a ratable degree of disability was not shown and for left ear because not shown to have existed during service.

A claim for increase filed November 19, 1910, was rejected March 31, 1911, on the ground that a higher rate than $6 for disease of lungs was not warranted by the evidence, and impaired hearing of both ears was not shown due to service.

The pensioner was last examined before his pension was allowed by a board of surgeons at Texarkana, Ark., June 13, 1910. The board said they found no objective evidence of disease of lungs, but found—"chronic catarrhal condition of large bronchides, larynx, and pharynx, bronchial rales, looseness, cough, and hypertrophy of tonsils. Rating, 12/18."

Under the claim for increase he was examined at the same place January 28, 1911, by an expert, who said:

"An examination of his ears shows a slight thickening of drum membrane. Eustachian tubes are pervious. The nose and nasopharynx are normal. With a tuning fork this man denies hearing it either by bone conduction or when held away from right ear. In his left ear he says he hears slightly by bone conduction and when held away from ear. He is a shrewd malingerer, for he sat in my reception room and talked with a gentleman in ordinary conversation for half an hour when he thought I was not watching him. This I know, as I passed through the room frequently and heard parts of the conversation.

"His nose, nasopharynx, ears, and lungs are normal in other respects, save as noted above.

"He has a slight deafness in left ear; hears ordinary conversation at 5 feet.

"He also has slight deafness in right ear; he hears loud conversation at 3½ feet. He does not claim total deafness in either ear."

The degree of disability found from the evidence by the medical officers of the Pension Bureau entitled the pensioner to a rating of 2/18, or $2, under the official schedule of ratings, but under the act of March 2, 1895, the minimum rate allowed under the law is $6, so that rate was continued.

In an affidavit filed with the bill the petitioner states that he has practically no property, has a wife and two children to support, which he has much difficulty in doing, and that he is greatly debilitated and seriously afflicted by infirmities contracted as a soldier.

J. S. Ham, M. D., states that the petitioner is now seriously afflicted with ear affection—deafness—is a deserving and worthy citizen, and in view of his infirmities and financial condition is greatly in need of a pension.

Two other witnesses state that he is very deaf and "afflicted with physical infirmities" and is in very meager circumstances.

Sixty-nine persons have signed a petition setting forth that the pensioner is afflicted as a result of sickness contracted in service and that his present pension is wholly inadequate to requite him for such condition.

In affidavits executed December 5, 1913, T. B. Arnett, Frank Horner, and J. O. Linesay state that the soldier returned from service suffering from deafness and has constantly since suffered therefrom, and that now his lungs are affected, and he is much of the time unable to perform any manual labor as a result of these disabilities. They further state that the soldier is now and has always been a man of good, upright character with no vicious habits.

From the evidence submitted your committee believe that an increase from $6 to $12 per month is fully warranted and so recommend.

H. R. 4567. William Feavel, 311 East Foster Street, Ludington, Mich., served in the Regular Establishment, in Company E, Fourth Regiment United States Infantry, from September 28, 1866, to September 28, 1869, when honorably discharged at the expiration of his term of enlistment. He was 21 years of age at enlistment. (I. O. 1239699.)

The records of the War Department show the following treatment: "February 1 to March 1, 1867, rheumatism; February 2 and 3, 1868, otitis. No additional record found."

November 24, 1899, he filed a claim for pension based on malarial poisoning and rheumatism and resulting disease of the heart. That part of the claim based on rheumatism and resulting disease of the heart was rejected on the ground of the claimant's inability to furnish satisfactory evidence to show continuance of same from date of discharge until the date of filing the claim. That part based on malarial poisoning was rejected on the ground of no disability therefrom since date of filing the claim.

He again filed a claim September 12, 1910, based on the same alleged disabilities. The former rejection as to rheumatism and disease of heart was adhered to and malarial poisoning was this time rejected on the ground of no record or satisfactory evidence showing origin of same in the service. No appeal was taken.

One comrade, James Armstrong, testifies that the soldier suffered severely during the service from rheumatism.

Abram Kilburn testifies that he knows the soldier suffered in 1873 from rheumatism.

William R. Gore testifies the soldier suffered from rheumatism in 1875.

Willard Cates testifies the soldier suffered from rheumatism in 1878 and 1879.

Mrs. D. C. Cates testified that she knows the soldier suffered from rheumatism in the years 1879, 1880, 1899, and 1902, when she saw and knew him well.

Albert Bartlett testifies that he knew the soldier from 1878 to 1888, and during that period knows he suffered from rheumatism.

Jessie M. Ward testifies that affiant knows the soldier has suffered from rheumatism from 1888 to 1906 and also from disease of the heart.

Dr. E. N. Dundass testifies, in 1906, that he knows the soldier has suffered since 1893 from articular rheumatism and resulting heart disease.

Dr. Louis Pelletin testifies, in 1906, that he knows the soldier has suffered since 1901 from articular rheumatism and is totally disabled for any kind of work by same.

He was examined by a board of surgeons October 18, 1905, who report that he is 60 years of age, 5 feet 6 inches in height, and weighs 145 pounds. They found all joints tender and enlarged by rheumatism and the soldier stiffened thereby—rate, twelve-eighteenths. They found a severe derangement of the functions of the heart due to rheumatism—rate, seventeen-eighteenths. They found no evidence of any malarial poisoning or results of any other disability except the rheumatism and resulting disease of the heart.

With the bill the petitioner has filed an affidavit in which he states that he is 68 years of age and is wholly disabled by rheumatism and disease of the heart and possesses no property and has no income.

His allegations are sustained by testimony of lay witnesses.

Two physicians testify that the soldier is so crippled by articular rheumatism and resulting disease of the heart as to not only be rendered unable to perform any kind of work but to actually require the aid and attendance of another person in the ordinary daily affairs of life.

From the evidence submitted your committee believe that the disabilities from which the soldier now suffers may be safely accepted as due to service and recommend the allowance of pension at the rate of $12 per month.

H. R. 4968. Daniel Lawlor, of Albany, N. Y., served as a private, corporal, and sergeant in Troop C, Eighth Regiment United States Cavalry, Regular Establishment, from September 15, 1866, to September 15, 1871, when discharged upon the expiration of his term of enlistment, a first sergeant. (I. O. 1397182.)

He applied for pension May 23, 1911, alleging that while—

"in line of duty at Fort Vancouver, Wash., on or about the 1st day of February, 1867, he, from stab wound on right side over the lung, another stab wound close to left groin—that the aforementioned wound near the left groin being the cause of varicose veins in the left leg; that he also is suffering with double hernia."

In subsequent affidavits he stated that he was going from the fort toward the town of Vancouver under verbal instructions from his captain to ascertain whether any of the troop were in town without authority, and that while questioning a member of the troop he was attacked without warning by Pvt. Kennedy, of another regiment, the alleged wounds being the result.

The claim was rejected October 11, 1911, for stab wound over right lung and left groin, causing varicose veins of left leg, on the ground that the claimant was apparently unable to furnish satisfactory evidence showing that the wounds were incurred in line of duty; for double hernia, because of no record, medical or other satisfactory evidence, showing incurrence in service and line of duty.

The soldier, as shown by the records of the War Department, was 18 years of age at enlistment and a bartender by occupation. He was treated for a disease in October, 1866; for vulnus incis (incised wound), March 6 to April 5, 1867; for a disease in January and July, 1868; January, June, and December, 1869; and May and June, 1870; for "lacerated wound, altercation," July 18 and 19, 1870; and for disease in February, 1871. Nothing in the records, the War Department reports, specifically shows whether the disability treated March 6 to April 5, 1867, was incurred in line of duty.

No evidence was filed prior to the rejection of the claim, and no medical examination has been made.

Reopening has twice been denied since the evidence hereinafter noted was filed.

Henry Firth, private and wagoner of the claimant's troop, testified December 12, 1911, that—

"I am thoroughly familiar with and recall the circumstances leading up to the time of he, Daniel Lawlor, receiving the wounds for which he claimed pension. That it was myself who received orders from the captain of my company to summon the aforesaid Daniel Lawlor to appear before him, and remember the soldier aforesaid, Daniel Lawlor, got instructions from the captain of his company to proceed to the town of Vancouver and to see if there was any members of his company in town who had not received the necessary permission from the proper authorities. That while in the act of performing his duty he was attacked by one of the soldiers, who at that time belonged to another regiment, and who at that time was on detached duty."

That affidavit was executed in Branch County, Mich.

John Brinson, private of the claimant's troop, made a similar affidavit December 30, 1911, executed in Hill County, Tex.

These affidavits are in the same handwriting, except as to the signatures and jurats, and in the same handwriting as affidavits executed by the claimant.

In a sworn statement filed with the bill the petitioner states that he is wholly disabled for manual labor by reason of stab wound on right side over the lung, and stab wound on left leg near the groin, double hernia, and rheumatism; that he owns no property, and that his annual income is $96, "as outdoor releave from National Home."

Reliable evidence shows that he has received assistance from the department of charities, city of Albany, N. Y., during the past three years.

Dr. W. J. Wansboro testifies that he has known the petitioner for three years, and on examination found an atrophy of left thigh, scar about the size of a silver half dollar on anterior surface right thigh about 4 inches below Poupart's ligament, and another scar size of silver quarter about 3 inches below the first one described, the veins of left leg much enlarged, and the varicosed condition is secondary to injuries which caused the scars; right thigh measures 19½ inches between extremities of femur, the left 18 inches; a scar 1½ by ½ inches along posterior axillary line at eighth rib; a double hernia, the scars resulting from radical operation of which are visible; chronic sciatica left side, causing atrophy and permanent deformity, causing impairment of left lower leg, which will probably grow worse; that he is not able to do any work nor to dress himself without help; disability complete.

From the evidence submitted your committee believe that the disabilities from which the soldier now suffers were incurred in service and line of duty, and recommend the allowance of pension at the rate of $12 per month.

H. R. 5129. Edward C. Franklin, of 335 London Street, Buffalo, N. Y., served during the War with Spain in Company L, First Regiment Delaware Volunteer Infantry, from May 16, 1898, to November 16, 1898, when he was honorably discharged. He was 32 years of age at enlistment. (I. O. 1386666.)

The records of the War Department fail to show he was during the service ever reported as sick or received medical treatment for any cause.

When discharged he claimed to be suffering from no disability and the medical officer who then examined him certified he could find none existing.

September 23, 1909, he filed a claim based on disease of the heart, stomach, and liver, which he claimed were results of typhoid fever he suffered from in the service. This claim was rejected December 10, 1910, on the ground of no record, medical or other satisfactory evidence, that the soldier suffered and was treated for typhoid fever or any of the alleged results in the service or that they existed at discharge and continually thereafter.

Considerable testimony was filed in the case to show the soldier did suffer from typhoid fever in service and from alleged results thereafter, and a thorough special examination was held for the purpose of ascertaining the true merits of the claim. A medical examination by a board of surgeons, November 3, 1909, shows the soldier was at that time suffering from disease of the heart, for which a rate of twelve-eighteenths was given, and from disease of the stomach and liver, rated at four-eighteenths. No other disabilities were found to exist.

After rejection of the claim the soldier appealed, and in a decision of February 25, 1911, the Assistant Secretary of the Interior sustained the adverse action, and in doing so stated as follows:

"The claimant's statement is that while at Camp Meade, Pa., shortly before the regiment was ordered to Wilmington, Del., he began to have severe headache, with loss of appetite and disorder of the stomach and bowels; that after reaching Wilmington, where the regiment was furloughed for 30 days, he went to the house of friends, Mr. and Mrs. William Carter, and on arriving there was so sick that he was compelled to go to bed; that his wife, then at his home at Middletown, Del., and a physician were sent for, the physician being Dr. Jakes, the surgeon of his regiment; that Dr. Jakes diagnosed the case as typhoid fever and treated him for about three weeks and at the end of which time he was convalescent; that he then went to his home at Middletown, where he was treated for some time by his family physician, Dr. Charles A. Ritchie; that while he was attended by Dr. Jakes he had stomach trouble (vomiting and pain), and brown spots appeared on his body and limbs, which the doctor said were due to affection of the liver; that Dr. Jakes also told him, after an examination, that his heart was slightly affected; and that these organs—the heart, stomach, and liver—have never recovered their normal condition. When mustered out he says he was so weak that he could not walk any distance.

"The military records show that he was on furlough from October 8, 1898, to November 6, 1898, and on November 7, 1898, was examined at Wilmington, Del., preliminary to muster out. He was then asked whether he had any reason to believe that he was suffering from the effects of any wound, injury, or disease, or had any disability or impairment of health, and answered "No." The surgeon who examined him certified that he found no disability.

"The claimant, being confronted with his own signed statement that he was free from disability on November 7, 1898, had no explanation to offer except that he did not recall making such a statement. He acknowledged that the signature was genuine.

"Dr. Jakes is dead. The case, so far as service origin of the alleged disease is concerned, rests mainly upon the testimony of Florence M. and William Carter and Dr. Ritchie, the only other material witness being the claimant's wife.

"The Carters made a joint affidavit on November 9, 1910, to the effect that they were well and personally acquainted with the claimant, he and his wife having boarded with them for about a year from some time in February, 1893; that about the middle of October, 1898, the claimant came to their house sick and the next day was compelled to take to his bed, and Dr. Jakes was called in and pronounced his case typhoid fever; that he remained there about a month and then returned to his regiment to be mustered out; and that during the last two weeks of his sickness he suffered from difficulty in breathing and weak heart action and was very yellow, his stomach and liver being affected.

"On special examination, Mrs. Carter, who had taken the precaution to retain a copy of her former affidavit and referred to it to refresh her memory before beginning her testimony, could not add anything to what was therein stated and, in fact, appeared to have very little independent recollection of the claimant's illness. Being asked whether he had rheumatism, liver or bowel trouble, heart disease, or indigestion she stated:

"'I know he was complaining, and it seems it may have been some one or all of these troubles he had, but I myself was sick all of this time and had little time to think of the ailments of others.'

"Her husband, William Carter, who stated that he had been advised by his wife to look over the copy of their affidavit but had been too busy to do so, could not recall the nature of the claimant's alleged sickness at his house, nor how long he was sick, 'nor anything about it,' even when questioned specifically in regard to typhoid fever, heart disease, liver disease, etc., but after hearing his affidavit read stated that he was willing to 'stick by' it, as he consulted with his wife at the time of making it.

"Dr. Charles A. Ritchie testified, by affidavit dated December 8, 1909, that he treated the claimant from November 7, 1898, to November 23, 1898, for disease of the heart, liver, and stomach, resulting from typhoid fever, from which he was then just recovering. On special examination he testified that the only treatment shown by his records was on November 11, 1898, when he gave him some tablets to act on his bowels and liver. Claimant told him that he had had typhoid fever in the service, but witness could not recall that he exhibited any marked symptoms of a recent attack of typhoid fever, and his impression at the time was that it was malarial.

"'I can not recall,' said witness, 'anything definite about his symptoms in detail further than I have stated; that is, he had some temperature, and I gave him remedies for his liver and bowels, as I would in an ordinary malarial or bilious attack. * * * As to the condition of his heart, liver, or digestion while under my care I do not recall.'

"The evidence is clearly insufficient to show that the claimant had typhoid fever while in the service, or that he was afflicted with disease of the heart, liver, or stomach at the time of his discharge. It is incredible that a man just out of bed after an attack of typhoid fever and scarcely able to walk should have declared that he had no disability or impairment of health from any cause, and that a surgeon should have so reported after physical examination.

"The special examiner took the testimony of several of his comrades who had not previously testified. None of them could recall that he was sick or ailing in any way while at Camp Meade, or at the time of muster out, and had no recollection of ever hearing that he had typhoid fever while on furlough. 'They remembered seeing him occasionally after discharge, but could not recall that he appeared to be otherwise than in good health or that he made any complaint.

"John W. Dickerson, a resident of Middletown, Del., testified:

"'I became acquainted with him about a year before the War with Spain. * * * After his muster out he returned here; remained only a few weeks, then left, and I have had no personal knowledge of him since. While he was here he lived just across the street from me; often came to my house and sat and talked with me. His health was good while he was here, both before and after his service while I knew him. Yes; I remember his being here after his discharge from the Army, for in November, 1898, we went partridge hunting. This was after the 15th of the month, when the hunting season begins. No; I do not remember that after his discharge I heard he had been sick in service, or that he was sick or ailing while here after discharge.'

"From a careful examination of all the evidence it is believed that the claim was properly rejected, and the rejection is accordingly affirmed."

This decision gives such a fair view of the material facts that it has been quoted.

With the bill the petitioner files an affidavit stating he is wholly unable to earn a living by manual labor because of disease of the heart, liver, and stomach, and believes same was due to his military service, in which he contracted typhoid fever, from which same resulted. He further states that he possesses no property or income for support of himself and wife.

Many lay witnesses sustain the allegations of the soldier as to inability to perform manual labor and possessing no property. Some of these are comrades, who testify that he did suffer from the alleged typhoid fever in service with results as claimed of disease of the stomach, heart, and liver. Some are friends, who also testify to the same effect. The typhoid fever is alleged to have developed while the soldier was on furlough, it will be noted.

Two physicians testify that the soldier does suffer from a severe form of disease of the heart, liver, and stomach, and same could result from typhoid fever. They state he is unable to perform manual labor.

From the evidence submitted your committee is of the opinion that the disabilities from which the soldier now suffers may be safely accepted as due to his service, and recommend the allowance of pension at the rate of $12 per month.

H. R. 5175. Emma J. Crocker, of Rockville Center, N. Y., is the widow of Frank H. Crocker, deceased, who served during the War with Spain in the United States Navy from June 9, 1898, to September 17, 1898, when honorably discharged because his services were no longer needed. He was 25 years of age at enlistment. (W. O. 29027.)

The records of the Navy Department fail to show any sickness or medical treatment of the soldier during his service.

The sailor never filed a claim for pension. The widow filed a claim on May 11, 1910, which was rejected June 23, 1910, on the ground of no record, medical or other satisfactory evidence, of service origin of any disability, and the inability of the widow to furnish necessary evidence to connect the cause of the sailor's death (cerebral hemorrhage) with his naval service.

The transcript from the death records show the sailor died August 2, 1909, from cerebral hemorrhage.

Dr. D. N. Bulson, the attending physician, testifies that he was the family physician of the soldier for years, and knows his condition of health was good prior to service; that after service he constantly complained of pains in his head, defective vision, and rheumatism until his death from hemorrhage of the brain, which the affiant believes was due to these causes.

Dr. Arthus D. Jaques testifies to same effect as Dr. Bulson, and Dr. Jaques was the attending physician at death, according to the death record.

With the bill the petitioner files an affidavit in which she states that she believes the sailor's death was due to his naval service; that she has no property and no income aside from that which she earns by her own labor, and has two minor children to support.

That the widow has no property is shown by testimony of several lay witnesses.

Frank L. Wisner and C. R. Ankers testify that from personal knowledge they know the sailor and the petitioner were never married until they married each other in 1900; that they were never divorced, but lived together until his death, and that the widow has not married again since his death and is now his lawful widow.

John Watts, a notary public, certifies over his seal that the widow presented to him her family Bible and he found entered therein the following entries: Frank H. Crocker, born February 16, 1901; William F. Crocker, born October 10, 1905; and said entries show no erasures and appear genuine.

It is shown by testimony of lay witnesses that said minor children are now living.

Several lay witnesses testify that the sailor was a strong and well man before service, but since discharge had suffered constantly from pains in his head, defective eyesight, and rheumatism, and gradually lost his health completely until he died August 2, 1909.

From the evidence submitted in this case, your committee is of the opinion that a pension of $12 per month, with $2 additional for each of the two minor children until they, respectively, reach the age of 16 years, is fully justified, and so recommend.

H. R. 6549. Elizabeth A. Shull, of Pendleton, Oreg., is the widow of A. P. Shull, deceased, who served in the Kibbe Rangers, Capt. William Byrne's company, First Brigade, Sixth Division, California Militia, Indian wars, from August 16, 1859, to January 4, 1860. (W. O. 8407.)

The soldier died about May 28, 1897. He never applied for a pension. The widow filed a claim August 9, 1902, which was rejected on May 20, 1903, on the ground of no title, as the soldier's service was rendered subsequent to the period of any of the Indian wars pensionable under the acts of July 27, 1892, and June 27, 1902.

The records of the War Department fail to show the organization in which the soldier served was mustered into the service of the United States. The records of the Auditor for the War Department, however, show said organization did render service as a State organization and the State of California was afterwards reimbursed by the United States for the expense of said service, and the soldier was paid for the period of 4 months and 20 days.

The evidence on file shows the soldier was first married in 1866 to one Florence Schub, who died in the year 1872; that on January 1, 1873, he married the petitioner, who had never been previously married, and lived with him until his death, about May 28, 1897, and that she has not remarried and is now his lawful widow.

The service alleged was rendered by the soldier and the petitioner is his lawful widow. Her claim in the Pension Bureau was rejected simply because there is no existing law providing pension for soldiers and their widows who rendered such service—it was in connection with none of the Indian wars for which pensions are provided by the several acts of Congress relative to Indian war service.

With the bill the petitioner files an affidavit stating she is 61 years of age and has no property or income and is unable to earn a living.

A physician testifies that the widow is a sufferer from chronic lumbago, rheumatism, and bronchitis, and not able to earn a living and has no property.

That she has no property is amply shown by other lay testimony.

From the evidence submitted your committee believe that a pension of $12 per month is fully warranted, and so recommend.

H. R. 6593. Crowell Lisenby, of Pinehurst, R. F. D., Dooley County, Ga., was, during the War with Spain, a private in Company G, Third Regiment United States Infantry, from July 19, 1899, to July 18, 1902, when discharged upon the expiration of his term of enlistment.

He applied for pension February 6, 1908, stating that in October, 1901, while in the Philippines he was riding as an escort on an Army wagon going for wood; that the wagon fell through a bridge a distance of 7 feet, and that in the fall his back was struck with great force by the back of the seat, causing a permanent injury of the back, for which he was treated in hospital.

The claim was rejected on the ground of no disability May 2, 1908, and again February 15, 1910, on the ground of no record, medical, or other satisfactory evidence showing incurrence in service or existence at discharge of the alleged injury.

Reopening has been several times denied.

The soldier, as shown by the War Department records, was 23⅝ years of age at enlistment. The records of physical examination at enlistment show:

"Chills and fever at 21 years of age. Gonorrhea in 1898. One molar gone."

He was treated for causes other than the alleged injury of back, among which was preputial chancroids, multiple, not in line of duty, from January 26 to February 1, 1901. There is no record of treatment for injury of back, but he was treated October 25 to 28, 1901, for acute lumbago, both sides, cause unknown, in line of duty.

The claimant was examined by a board of surgeons at Macon, Ga., April 1, 1908. They reported his height as 5 feet 10¼ inches, weight 160 pounds. The board said he was "well nourished. Heart and lungs negative. Urine negative. No evidence of injury to back except his word that he suffers pain there. He does regular work of farm hand daily. No evidence of specific disease."

One comrade stated in 1910 that the soldier was thrown from a wagon and injured his back in October, 1901, and that he gained his knowledge of the matter by talking to the soldier shortly after the alleged injury was received.

Another stated at the same time that the soldier was thrown from an escort wagon in October, 1901, and that his information was derived by his knowing he was in hospital for injury of back.

Laymen state that the claimant has complained of his back and has not been able to do much continued labor since service.

One physician testified in November, 1908, that he did not find any objective evidence of disability, but that the claimant complained of pains, soreness, and weakness in left lumbar region of back.

Another said there was a tender spot on the left of spinal column in region of third and fourth lumbar vertebræ and that he was then totally disabled, judging from subjective symptoms.

Another said there was tenderness in region of third and fourth lumbar vertebræ which impaired ability for manual labor, and a month later in 1908 he said the condition was worse and that he constantly complained.

In an affidavit accompanying the bill the petitioner states that he is wholly disabled by injury of back and general debility; that he owns no property, and has no income.

Two laymen corroborate his statement as to financial condition, and a physician testifies that he examined the claimant March 25, 1912, and "find him unable to do manual labor owing to an organic heart lesion and kidney troubles."

Two comrades swear this soldier was injured in the back while in the service and line of duty, as he alleges; four lay witnesses and the soldier himself swear he has been disabled by pain and weakness of the back ever since discharge; and other lay witnesses and physicians testify he has suffered more or less from a disabled back from a short while after his discharge until the present time. The physicians also state he has some heart trouble.

After the final refusal to reopen the claim at the Pension Bureau an appeal was taken, and in a decision of October 4, 1913, the Assistant Secretary of the Interior sustained the rejection of the claim and refusal to reopen same. This decision will be found attached to the brief and gives the view of the bureau and the department regarding the merits of the claim, and attention is invited thereto by your examiner.

From the evidence submitted your committee believe that the disabilities from which the soldier now suffers were incurred in service and line of duty, and recommend the allowance of pension at the rate of $12 per month.

H. R. 6627. Oscar E. Harper, of Posen, Mich., served during the War with Spain in Company C, Second Regiment Ohio Volunteer Infantry, from April 25, 1898, until honorably discharged February 10, 1899. He was 20 years of age at enlistment. Service was chiefly in Georgia. (I. O. 1261363.)

He filed a claim January 30, 1901, based on typhoid-malarial poisoning and ulceration of skin and general debility. This claim was rejected October 14, 1901, on the ground of no ratable degree of disability from any of the alleged disabilities since the date of filing the claim.

On June 6, 1908, he filed another claim for pension based on weakened physical condition and varicose veins of both legs, all of which are alleged to be results of typhoid fever, from which he suffered during his service. The claim was rejected on April 23, 1910, on the ground of no record of the alleged varicose veins of both legs below the knees, no medical or other evidence showing existence of the same in service, and the claimant's failure and evident inability to furnish the evidence necessary to establish the claim.

No appeal was taken and no effort made to reopen the claim.

The records of the War Department show treatment as follows:

"July 20, 1898, malarial fever, tertian, also shown by diagnosis typhoid fever, in line of duty. Returned to duty September 13, 1898. Nothing additional found."

When discharged he claimed to be suffering from no disability, and those by whom he was examined found none, save slight left varicocele, which soldier said had existed prior to service.

Capt. Frank H. Bell, in affidavit of March 18, 1909, states that the soldier suffered during the service from a severe attack of typhoid fever; that he knew the soldier prior to enlistment, and he was a strong and healthy man, free from any disability; that the soldier's health has been very bad since his discharge.

Dr. L. Bigler testified, November 27, 1901, that he had treated the soldier since July, 1901, and found him suffering from disease of liver and spleen and heart and eczema of both legs below knees.

Dr. L. D. Applewhite testified, December 21, 1907, that he had treated the soldier from 1904 for varicose veins and eczema of both legs; that affiant believes disease of legs to be result of typhoid fever the soldier suffered from during service.

He was examined by a board of surgeons at Sandusky, Ohio, April 3, 1901, who reported that, aside from some ulceration of left leg below knee of 7 by 4 inches, for which they state no rate was warranted, they found soldier suffering from no disability at all and not entitled to any rate.

February 10, 1909, he was examined by a board of surgeons at Chicago, Ill., who reported all organs normal, except both legs. They found varicose veins of both legs below knees of a very severe nature and equal to loss of use of wrist or one ankle in preventing manual labor. Rate, ten-eighteenths.

With the bill the petitioner files two affidavits in which he alleges that he was strong and well prior to enlistment; that he contracted typhoid fever of severe form in the service, which has resulted in varicose veins of both legs below the knees so bad as to require removal of some of the veins of left leg by operation; the resulting varicose veins came on gradually after his service; that he is unfitted for any kind of manual labor; that he possesses no property except a few household goods.

Three lay witnesses by their testimony sustain the soldier's allegations as to owning no property. One of these also testifies that the soldier suffered from typhoid fever in service, has had disease of both legs since as a result, and has not been able to perform any manual labor for some years because of the diseased legs.

Dr. J. M. Jones testifies, January 9, 1913, that he has treated the soldier for the past two years for varicose veins of both legs; one limb has been operated upon and the other must be soon; that he is unable to perform manual labor and owns no property.

Dr. V. H. Dumond in an affidavit states substantially the same thing as Dr. Jones.

Dr. Alex W. Campbell, on March 6, 1913, testifies that he has attended the soldier at various times for the past year or so; that the soldier has varicose veins of both legs below knees, and the left leg shows scar 16 inches long made by an operation to remove veins, and right leg will require a similar operation; that the diseased condition of both legs prevents manual labor to at least 50 per cent.

From the evidence submitted your committee believe that the disabilities from which the soldier now suffers may be safely accepted as due to service, and they respectfully recommend the allowance of pension at the rate of $12 per month.

H. R. 6943. Charles F. Pandorf, of the National Military Home, Montgomery County, Ohio, served during the War with Spain, in Company I, Third Ohio Volunteer Infantry, from June 21, 1898, to October 26, 1898, when honorably discharged. He was 19 years of age at enlistment. (I. O. 1354178.)

November 19, 1906, he applied for pension based on rheumatism, disease of the kidneys, and malarial poisoning, alleged to have been contracted in the service. This claim was rejected on February 17, 1908, as to disease of the kidneys and malarial poisoning on the ground of no ratable degree of disability from same since date of filing, and as to rheumatism on the ground of no record evidence of origin or treatment therefor in the service, and the claimant's statement on file declaring that said disability did not originate until after the soldier's discharge from the service.

April 28, 1909, he filed a claim for pension alleging malarial poisoning and disease of the kidneys, contracted at Huntsville, Ala., in the fall of 1898. This claim was rejected on October 21, 1909, as to disease of the kidneys on the ground of no record and the claimant's manifest inability to show origin in service and continuance from discharge by satisfactory evidence, and as to malarial poisoning on the ground of no ratable degree of disability therefrom since date of filing the claim.

The claimant appealed after the second rejection of his claim and stated that subsequent to filing these claims he had undergone treatment at the Mercy Hospital, Baltimore, Md., where it was found his greatest disability was tuberculosis of the spine, and that it is shown by medical science tuberculosis of the spine can and does result from malarial poisoning. The Secretary of the Interior, November 25, 1910, gave a decision sustaining the former actions of rejection and holding the claimant must file a new declaration amending the former declarations, if he desired tuberculosis of the spine considered as a result of malarial fever from which he suffered in the service. After this decision the claimant filed an amendatory declaration December 22, 1910, alleging the spinal tuberculosis was due to malarial fever from which he suffered during the service. This claim was rejected January 7, 1911, on the ground of no record, medical or other satisfactory evidence, showing origin of spinal tuberculosis in the service, or

continuance thereof from discharge, and the claimant's evident inability to connect the origin of the same with his military service, as a result of the malarial poisoning, or otherwise.

No appeal has been taken to this last action of rejection, and no effort was made to reopen the claim for reconsideration, although this was a legal rejection, and thus cut off the medical authorities from passing upon the question as to whether or not tuberculosis of the spine could or would be accepted as a result of the malarial fever.

The records of the War Department show the soldier was treated for remittent fever from July 31 to August 3, 1898 (diagnosis also as myalgia). These records also show he was on furlough from September 15 to October 15, 1898, and furlough was extended from October 15 to October 26, 1898, on a physician's certificate.

When mustered out the soldier claimed to be suffering from kidney disease and malarial fever. The medical officer who then examined him states:

"Soldier is emaciated and anemic and asthenic, probably due to a recent attack of some continued fever of which he gives a history (possibly typhoid). Urinary disturbance probably due to disturbance of digestion and a febrile temperature."

This surgeon regarded the soldier's physical condition as temporary, stating that with care he should be well again in a month or six weeks. He stated that the soldier was then, however, totally disabled physically.

Capt. and Asst. Surg. F. C. Weaver testifies that the soldier was ill in the service in October, 1898, with malarial fever; that since the service during 1905 and 1906 affiant treated him for rheumatism.

Capt. B. F. Boyer testifies that the soldier became ill with malarial fever and kidney disease about September 7, 1898, in line of duty; that the hammocks were turned in and the soldiers had to sleep on the ground with only a blanket in September, 1898; that since service the soldier has suffered from rheumatism, and he is now misshapen and unable to work.

Charles Bobb testifies that the soldier has suffered since December, 1898, with rheumatism, and once so badly he had to go to Hot Springs, Ark., for it.

James Taylor testifies that the soldier has suffered since 1901 with rheumatism.

George L. Hussman testifies that the soldier was well and strong before service, but came home from same a physical wreck and has constantly since suffered from malarial poisoning and kidney trouble.

R. A. Caples testifies that the soldier has suffered from malarial poisoning and kidney trouble since 1898, after his discharge.

George L. Pumphrey testifies that the soldier has suffered ever since affiant met him in 1901 with kidney trouble and malarial poisoning.

J. F. Flanigan testifies the soldier went to Hot Springs, Ark., in February, 1899, and March, 1904, for baths for rheumatism.

Dr. C. L. Patterson testifies he treated the soldier from October 10 to November 7, 1898, for malarial fever.

Dr. W. M. Blaine testifies that he treated the soldier from August, 1903, to June, 1904, for severe articular rheumatism, and he suffered so severely from same as to be wholly unable to do any work.

The board of surgeons at Columbus, Ohio, who examined the soldier December 26, 1906, states as to rheumatism:

"Rheumatic crepitus in both shoulders, with pain in these joints on elevating arms above 110°. Passive elevation restricted to 135°. Considerable atrophy of lumbar muscles. Marked posterior kyphosis involving dorsal vertebra, the curvature being somewhat regular throughout upper three-fourths costal vertebræ. No evidence of disease of any vertebræ further than the deformity above described. No tender joints. No pronounced prominence of any one vertebræ. The curvature seems too pronounced and inflexible to have resulted from position or occupation. No evidence in any other joints, muscles, or tendons of rheumatism. Eight-eighteenths rheumatism, including curvature of spine."

They found no disease of the kidneys, and as to malarial poisoning state:

"Area of hepatic dullness normal, extending from seventh rib to three-fourths inch below costal border. Spleen in normal position and can not be felt beneath border of ribs. Skin normal. Conjunctive clear. No icterus. No special tenderness over liver, spleen, or stomach. No evidence of malarial poisoning. No rate."

They find no other disability of any kind except a very irritable heart, rate six-eighteenths, and no evidence of venereal disease or vicious habits.

This board treats curvature of the spine as result of the rheumatism, it will be noted.

He was examined by a board of surgeons at Washington, D. C., July 23, 1909, who report they could find no evidence of rheumatism, malarial poisoning, or disease of the heart. This board found the soldier to be suffering from only one disease, to wit, acute nephritis, for which they rate him ten-eighteenths. This board makes no mention of curvature of the spine.

With the bill you petitioner files an affidavit stating that by reason of rheumatism, spinal tuberculosis, and malarial poisoning he is wholly unable to perform any manual labor, and that he possesses no property or income.

Three lay witnesses testify that the soldier is unable to perform any manual labor and owns no property at all.

The surgeon of the Soldiers' Home certifies that the soldier is now suffering from Potts' disease, tuberculosis of the spine, pulmonary tuberculosis, and chronic articular rheumatism, and marked kyphosis of dorsal region of spine.

The soldier is now in the hospital of the Soldiers' Home.

With the bill will be found two photographs of the soldier recently taken, from which it will be seen that he is in a horrible physical condition, and, of course, unable to do any kind of work.

From the evidence submitted your committee believe that the disabilities from which the soldier now suffers may safely be accepted as due to service, and recommend the allowance of pension at the rate of $12 per month.

H. R. 6952. Hale F. Hamilton, of the National Military Home (Company 19), Montgomery County, Ohio, served in the War with Spain from April 25, 1898, to November 5, 1898, as a private in Company N, Fifth Ohio Infantry, and from January 4 to May 31, 1900, in Company E, Twelfth United States Infantry, when honorably discharged on a surgeon's certificate of disability. Service chiefly in the Philippine Islands. Age 25 at last enlistment. (Invalid certificate 1055697.)

June 7, 1900, he filed a claim for pension alleging chronic diarrhea, dysentery, and malarial fever, resulting in disease of kidneys, impaired sight, and gastritis; loss of teeth, general debility, and cold resulting in catarrh, all contracted in the Philippines. He was allowed a pension of $8 per month March 5, 1903, from date of filing, for chronic diarrhea and loss of part of teeth. This approval and rate to cover all disability from dysentery and gastritis. No disability shown since date of filing from malarial fever, chills and fever, disease of kidneys, and impaired sight.

Under an exhaustive special examination evidence was secured showing that the loss of claimant's teeth was not due to his military service, but due to disease of teeth and gums which existed prior to his enlistment. June 2, 1904, he was pensioned for chronic diarrhea at $6 per month, and the pension on account of loss of part of teeth was discontinued.

A claim for increase of pension was rejected February 17, 1910. December 9, 1910, he was granted an increase of rate to $10 per month for chronic diarrhea, but the claim for restoration for loss of part of teeth was rejected, as the evidence failed to show that this disability was due to service and line of duty. A request to reopen the rejected part of the claim was denied March 20, 1912. No appeal was taken.

"May 29 and 30, 1899, intermittent malarial fever in line of duty; June 22 to July 2, 1899, acute diarrhea; July 3 to 9, 1899, acute diarrhea; August 6 to 14, 1899, acute diarrhea; August 15 to November 16, 1899, chronic gastroenteritis; November 17 to December 27, 1899, chronic gastroenteritis; December 27, 1899, to February 13, 1900, chronic dysentery, complicated with spine; February 13 to May 31, 1900, chronic dysentery, complicated with loss of teeth and inability to masticate food; in line of duty. Discharged May 31, 1900, on surgeon's certificate of disability."

No testimony was filed in the original claim, it being adjudicated upon the record evidence. November 7, 1900, the board of surgeons at Youngstown, Ohio, examined the claimant and reported that he was suffering from chronic diarrhea and that 13 teeth were missing. They also found disease of liver and stomach, result of malarial fever, and rated eight-eighteenths for same and three-eighteenths for loss of teeth; catarrh, two-eighteenths; and disease of heart, one-eighteenth. The board of surgeons at Warren, Ohio, on June 19, 1901, report that he is entitled to twelve-eighteenths for chronic diarrhea, six-eighteenths for disease of lungs, four-eighteenths for loss of teeth, and two-eighteenths for catarrh. The board of surgeons at Columbus, Ohio, January 26, 1910, state that he has slight diarrhea, but not enough for them to rate; two-eighteenths for loss of teeth, four eighteenths for rheumatism, and no other disability found. On November 16, 1910, the board at Marion, Ohio, report that he is entitled to twelve-eighteenths for chronic diarrhea, six-eighteenths for disease of heart, and that eight upper and eight lower teeth are missing. The board at the National Military Home, Ohio, on January 10, 1912, find his appearance anemic, heart enlarged, lungs in good shape, stomach and rectum inflamed and tender, urine in good order, and rate ten-eighteenths for chronic diarrhea and four-eighteenths for disease of heart.

During the special examination several comrades and an officer testified that when claimant joined the regiment he had bad and diseased teeth and also had lost a good many of the most important teeth. A dentist who had treated his teeth also stated that his teeth had always been brittle, diseased, and bad. This dentist is very old, and upon cross-examination repudiated some of his testimony as to bad teeth to such an extent as to cast some doubt over the question as to the real value which should be placed upon his testimony as a whole. However, taken with the other adverse testimony, it would appear to show he is correct in stating the claimant's teeth were bad from boyhood days and in no sense due to service and line of duty.

With the bill your petitioner files an affidavit in which he states he is unable, by reason of diarrhea and resulting constipation, to earn a living by manual labor, and that he owns no property of any sort.

Two lay witnesses, in affidavits, sustain the allegations of the petitioner as to owning no property.

Dr. C. G. Rogers testifies he has examined the petitioner, August 5, 1913, and finds he is suffering from chronic diarrhea and resulting periodical constipation and intestinal trouble, and is wholly unable to perform manual labor.

Dr. J. W. McKinney testifies, November 7, 1913, that he had that day examined the petitioner and found him suffering from chronic diarrhea, alternating with constipation, with resulting prostitis and pain and distress in the intestines; some involuntary bowel evacuation which caused continual soiling of clothes (was soiled at examination); chronic gastritis with distention of stomach, causing palpitation and dyspnea and vertigo; diarrhea and pain marked over stomach and intestines upon exercise, and because of these disabilities he is wholly disabled for performance of manual labor.

From the evidence submitted your committee believe that an increase from $10 to $12 per month is fully warranted, and so recommend.

H. R. 7053. John D. Ashley, of 1115 Twelfth Street, Pueblo, Colo., served during the War with Spain in Troop A, Second United States Cavalry, from May 1, 1898, to October 24, 1898, when honorably discharged. He was 35 years of age at enlistment. (I. O. 1388000.)

On January 17, 1900, he applied for pension, based upon rheumatism, alleged to have been contracted in Jacksonville, Fla., in July, 1898. The claim was rejected December 22, 1911, on the ground that the rheumatism existed prior to enlistment, as shown by the evidence on file. No appeal was taken and no effort, beyond some correspondence without any testimony, was made to reopen the rejected claim.

The records of the War Department show the following treatment:

"July 11 to 25, 1898, acute articular rheumatism in both knees and feet, in line of duty; July 25 to September 3, 1898, rheumatic fever, in line of duty. Returned to duty. Furloughed September 4, 1898. No additional record of disability found."

When discharged he claimed to be suffering from inflammatory rheumatism and stomach trouble. The officers by whom he was then examined certified that the soldier was then suffering from subacute articular rheumatism, which was contracted in the service and line of duty.

In support of his claim the soldier filed affidavits of two physicians, who testified to treating him for rheumatism from about 1907 on to 1910, and affidavits of two lay witnesses testifying to the fact that for about 10 years prior to 1910 the soldier had suffered from rheumatism.

He was examined by a board of surgeons at Pueblo, Colo., April 6, 1910, who reported him to be then suffering from general rheumatism and rated 8/18. This board found no other disability existing.

The claim underwent a thorough special examination for the purpose of ascertaining if the soldier had been free from rheumatism prior to his enlistment. This action was due to the fact that before and after enlistment the soldier's occupation was that of a miner working far underneath the ground, and such people are very apt to, and usually do, contract rheumatism, and also because he so soon after enlistment suffered so severely and so persistently from rheumatism.

A vast array of testimony and evidence was secured by this special examination from witnesses who are rated as good men and women, which can be briefly summarized as follows.

The soldier's father and mother, two sisters, and a brother-in-law state that he was a peculiarly strong and well man prior to enlistment, free from any physical disability; that he returned to their home immediately after discharge, when he was suffering very severely with rheumatism of both knees, ankles, legs, and shoulders and back, from which he has continued to suffer.

Five lay witnesses who knew the soldier for periods of from seven months to several years before his enlistment state that he never suffered from rheumatism prior to the service.

One comrade and three lay witnesses testify that the soldier never suffered from rheumatism prior to enlistment, but did suffer from same immediately after discharge and ever since that date.

Five lay witnesses testify that the soldier has suffered from rheumatism during the period of their acquaintance with him, which covered the time from date of discharge until 1910.

Five physicians testify to treating the soldier for rheumatism since his discharge. Their treatment pretty well covers the period of from date of discharge to 1910.

So much for the evidence which is favorable to the claim.

The adverse testimony and that which affords the basis for action of rejection of the claim is substantially as follows:

William H. Rose states that he knew the soldier very well for years before enlistment; that the soldier lived in affiant's home; that at one time the soldier went on crutches and appeared to be suffering severely from rheumatism of the legs, knees, and back, and did, in fact, tell the affiant that he was then suffering from rheumatism.

Subsequently to giving this testimony and after the rejection of the claim, this witness repudiated, as far as a disavowal of the former sworn statement could be repudiated, his statement to the special examiner as to the soldier's suffering from rheumatism prior to enlistment and being on crutches from that disease. In doing this the witness claims his memory of facts was at fault, and that the cause for use of crutches was an accidental injury of one of the soldier's knees and not rheumatism, and so far as he knows the soldier never suffered from rheumatism before enlistment. This witness alleges the special examiner was overzealous in an effort to show that the rheumatism did exist prior to service, and then caused the witness to seemingly swear to things he had no intention of testifying concerning. The Commissioner of Pensions refused to accept the repudiation of said adverse testimony. (See copies of letters attached to brief.)

Two lay witnesses testified that the soldier did go upon crutches for some time at the time Mr. Rose had stated, but these witnesses told the special examiner they did not know the cause for using crutches, and they also stated they never knew the soldier to suffer from rheumatism before his enlistment.

All of the medical officers by whom the soldier has been examined report no evidence of venereal disease.

The soldier explains the use of the crutches at the time alleged, and upon at least one other occasion, by stating that he had then injured one of his knees and upon these other occasions he had suffered injuries to the other knee and to both ankles. The evidence shows that one knee and perhaps both ankles of the soldier have been injured at various times in his life.

With the bill your petitioner files an affidavit stating that by reason of rheumatism, which he firmly believes due to his military service, he is wholly unable to earn a support by manual labor; that he owns no property and has no income from any source.

Two lay witnesses by their testimony sustain the allegations of the soldier as to his inability to perform manual labor and possession of no property.

Dr. W. D. Borland testifies the soldier suffers from chronic rheumatism of hips, knees, and feet; that he suffers great pain from same and the joints are enlarged, and he is totally unable to perform any ordinary manual labor.

From the evidence submitted it is believed that a pension of $24 per month is fully warranted and it is so recommended.

H. R. 7830. Emma Fox, of 97 Mulberry Street, Cincinnati, Ohio, is the widow of Fred L. Fox, who served during the War with Spain in Troop F, Seventh United States Cavalry, from August 8, 1898, to May 12, 1899, when honorably discharged. He was 19½ years of age at enlistment. (Wid. Orig. 996699.)

The widow filed a claim for pension November 20, 1912, alleging the soldier's death, on September 24, 1912, was due to his military service. This claim was rejected February 14, 1913, on the ground of the claimant's inability to furnish competent evidence to connect the cause of the soldier's death (abscess of the brain and meningitis due to disease of left ear) with his military service. No appeal was taken and no effort was made to reopen the claim.

The records of the War Department show treatment as follows:

"September 2 to 27, 1898, acute tonsilitis, both sides; November 22 to 23, 1898, coryza, acute; December 2 to 4, 1898, malaria, acute fever; December 3 to 20, 1898, malaria, remittent; December 22 to 25, 1898, bronchitis, acute; December 30, 1898, to January 4, 1899, malaria, intermittent; returned to duty. All the foregoing in line of duty. No additional record of disability found."

The death records show the soldier died September 24, 1912, from abscess of the brain and meningitis, with mastoid disease as a contributing cause, and Dr. Victor Ray as attending physician.

Dr. Victor Ray testifies, December 10, 1912, that the soldier came under affiant's treatment September, 1912, for chronic inflammation of the left ear; that the soldier told affiant the ear had been discharging ever since his discharge from the military service; that this disease of ear resulted in an abscess of the brain and meningitis which caused death; that the disease of ear when affiant first treated same in September, 1912, gave every evidence of having existed for a long time, as alleged by the soldier.

Elizabeth Shiner testifies that she knew the soldier well for a number of years, and when he returned from his service he was deaf in the left ear, and informed the affiant this deafness was due to typhoid fever he had in the service.

The other evidence on file relates only to the lawful widowhood of the claimant and dates of birth of minor children for whom pension is claimed.

The soldier never filed a claim for pension and was never examined by a board of surgeons.

With the bill the petitioner files an affidavit stating that she is without means of any kind, owning no property of any description; that she is an invalid and is forced to live with and depend upon her parents for support of herself and children.

Two lay witnesses testify that the petitioner is the widow of the deceased soldier and is absolutely without means of support, as she possesses no property at all, and that she is physically unable to perform any manual labor.

Dr. Henry Buchanan testifies, May 3, 1913, that the petitioner is under his treatment and is unable to perform any kind of manual labor, as she is subject to epileptic attacks, in one of which she fell upon a stove and sustained very severe burns from which she was months recovering.

It is shown by record evidence that two minor children, born August 30, 1901, and December 1, 1903, are now living.

From the evidence submitted your committee believe that a pension of $12 per month, with $2 additional for each of the two minor children, is fully warranted and so recommend.

H. R. 7977. George Oatten, of Saginaw, West Side, Mich., served during the War with Spain in Company E, Thirty-third Regiment Michigan Volunteer Infantry, from April 26, 1898, to December 22, 1898. He was 21 years of age at enlistment. Much of the service was performed in Cuba. (I. O. 1345470.)

The military records of the War Department show he was sick in the hospital at Siboney, Cuba, from July 15 to August 16, 1898. The medical records show as follows:

"* * * to July 29, 1898, malaria; July 29 to August 2, 1898, malarial remittent fever; August 10 to 11, 1898, malaria; August 11 to 15, 1898, insolation (sunstroke) complication, malarial remittent fever—in line of duty. No additional record found."

February 16, 1906, he applied for pension based upon malarial poisoning, which he alleged had resulted in disease of the stomach, bowels, liver, spleen, heart, nervous debility, intolerance of heat, and dizziness. This claim was rejected January 27, 1908, on the ground of no ratable degree of disability from the causes alleged.

He again filed a claim March 3, 1908, and this time based it upon malarial poisoning, resulting disease of the stomach, bowels, liver, spleen, and that sunstroke has resulted in nervous debility, vertigo, intolerance of heat, and dizzy spells. This claim was rejected on May 17, 1909, as to sunstroke and results, on the ground that the best obtainable testimony fails to show existence of the alleged disabilities at the date of discharge and continuance thereafter.

He again filed a claim June 7, 1909, realleging same disabilities, and this was rejected November 10, 1910, as to malarial poisoning to cover disease of stomach, bowels, liver, and spleen, on the ground of the claimant's evident inability to furnish medical or other satisfactory evidence of the continuance thereof since the date of discharge. That part of the claim based upon alleged results of sunstroke was not considered, having been rejected and not reopened. No appeal was taken, but four efforts have been made to have the claim reopened, and all were denied on the ground of insufficiency of the testimony offered to warrant such action.

The claimant, in all papers executed and filed by him, and also in a sworn statement before a special examiner, alleges he suffered during the service from but two disabilities, to wit, malarial fever and sunstroke. He claims disease of stomach, bowels, liver, heart, and spleen resulted from the malarial fever, and the sunstroke resulted in nervous debility, vertigo, intolerance of heat, and dizzy spells, from which he has suffered constantly since his discharge.

Several officers and half a dozen comrades have testified in affidavits or before the special examiners to the fact that the soldier was very ill in the summer of 1898 in Cuba with malarial fever and returned home in terrible physical condition, having to be placed in a hospital in Detroit, Mich., for a day or so while en route home, and was ill for a long while afterwards from malarial fever. When he was discharged he claimed he was then suffering from chills and fever, and the surgeon by whom he was examined certified he was then suffering from malarial poisoning.

None of these officers or comrades have any personal knowledge of any sunstroke the claimant suffered from in the service, and he himself can not and will not swear he was ever unconscious from sunstroke or collapsed from overheat during the service. However, there is the record of treatment in the service from sunstroke.

Many lay witnesses testify that the soldier returned home from service suffering from malarial fever, was confined to bed with same for some time, and has constantly suffered since that time from malarial troubles—that is, with disease of stomach, bowels, liver, heart, and spleen.

Three doctors testify to the fact that the soldier has suffered since about 1904 from malarial poisoning and its usual results. Two of these physicians and several lay witnesses testify to a spell of temporary insanity from which soldier suffered in July, 1905, that lasted for a week or more. He was confined in jail and underwent official examination at that time for the mental trouble.

He was examined by a board of surgeons at Saginaw, Mich., April 18, 1906, who report him as 27 years of age, 5 feet 9 inches in height, and weighs 127 pounds. This board found he was suffering from malarial poisoning and rated same at eight-eighteenths. They state he suffered from no other disability and there was no disability of vicious habits. They found no evidence of any results from sunstroke.

The special examination disclosed the fact that the claimant had borne a pretty bad character prior to his enlistment, having been prosecuted for and convicted of larceny, but that since his discharge he has married and been a steady worker and kept out of trouble. He has always been a very thin man, and before and since service has gone by nickname "Skinny." It is not shown that he was ever ill prior to the service, and it is not shown that he has been sick to any very marked extent since his recovery from malarial fever, from which he was suffering very severely at the time of his discharge. In fact, he worked for some time prior to enlistment for two brothers—J. Fred and Chauncey Tyler—and has worked for them most of the time since his service, and these brothers both state that they can see no difference in his health since service from that he enjoyed prior thereto. He had lost practically no time from work after his recovery from malarial fever until 1909, when the special examination was had, and he turned in on an average about as much work since his service as he was accustomed to do prior thereto.

With the bill your petitioner files an affidavit stating he is wholly unable to perform any manual labor because of sunstroke and malarial poisoning and the results of same and that he posseses no property and has no income.

His allegations are sustained by testimony of two lay witnesses.

Dr. S. C. J. Ostrom, a member of the board of surgeons of the Pension Bureau, certifies on September 22, 1913, that he finds the soldier suffering from malarial poisoning, with diseased liver and spleen, and pains of back and shoulders, and upon several occasions he has attended the soldier for chills and fever; that he is 36 years old, 5 feet 9½ inches in height, and weighs 130 pounds; is listless, weak, and anemic; and has dyspnea after exercise; his stomach is out of order and the digestive organs do not work properly; that he does not use alcohol; and is unfit for manual labor.

From the evidence submitted your committee believe that the disabilities from which the soldier now suffers were incurred in service and line of duty and recommend the allowance of pension at the rate of $12 per month.

H. R. 8435. William Miller, of the National Home, Milwaukee, Wis., served in the Regular Establishment in Company H, Second United States Cavalry, from November 25, 1873, until November 25, 1878, when he was honorably discharged at the expiration of his term of enlistment. He was 24 years of age at enlistment. (I. O. 1389423.)

The records of the War Department show the following treatment:

"January 28 to February 23, 1878, punctured wound of the right thigh by sharp point of blacksmith's anvil on January 27, 1878; April 1 and 2, 1878, sprained back on March 31, 1878; July 16 and 17, 1878, catarrh. No additional record found."

March 22, 1910, the soldier filed a claim for pension based upon injury of stomach, which he alleged he received by being kicked in the stomach by a horse in 1875. This claim was rejected October 17, 1910, on the ground that no disability in a ratable degree was shown to exist from the alleged injury of stomach. No appeal was taken, but the claimant twice attempted to have the claim reopened, and each time such action was refused by the Pension Bureau because the evidence offered was not deemed sufficient to warrant same.

The claimant swears that while shoeing a horse in the service (in discharge of the duties assigned him) he was kicked in the stomach by the horse and received an injury from which he has suffered ever since; that he is unable to furnish testimony of but one comrade as to incurrence of said injury, as the officers, surgeons, and all other comrades who knew of the same are dead or in parts unknown to him.

Comrade Thomas B. Gilmore testifies, November 9, 1910, that prior to being kicked by a horse in the service the claimant was well and strong, but afterwards suffered from the results of this injury and never was well again as long as affiant knew him; that the soldier suffered from stomach trouble and claimed same was due to the injury from the horse kicking him; that he was confined for a time in the hospital and underwent medical treatment after the horse kicked him.

Three lay witnesses, who testify that they have known the soldier for periods ranging from 1881, 1885, and 1893, state he has always since they knew him suffered from some trouble or disease of the stomach, and claimed same was the result of having been kicked by a horse when in the military service.

Dr. H. F. Smith testified December 27, 1910, that he that day examined the soldier and found him suffering from disease of the stomach, which claimant alleged was the result of having been kicked by a horse in the military service; that the stomach is painful and after meals there is nausea and as a physician he suspects there may be carcinoma of the stomach. This physician states he had never before this examination treated the soldier.

The soldier was examined by a board of surgeons June 1, 1910, who reported him 61 years of age, 5 feet 9 inches in height, and weighing 145 pounds. Pulse, 76, 84, 96; respiration, 20, 21, 22, and temperature, 98⅘. This board reports both of soldier's eyes are badly impaired as to sight; that there is marked general senile decay of the man; and that he is wholly unable to do any manual labor. The board does not specifically state or give a rate for any especial disability. They simply describe him as an old worn-out man, and say he is entitled to $72 per month pension.

He was again examined by a board of surgeons on March 1, 1911, who state that they find no scars or other signs of the alleged injury to the stomach, but do find enlarged liver, sallow skin, enlarged and tender spleen, and a small pile, and that the prostate is enlarged. They find cataract of the left eye and impaired sight of the right eye. They suggest a rate of $18 per month for disease of the stomach and bowels and twelve-eighteenths for impaired sight.

With the bill the petitioner files an affidavit in which he states that he is wholly unable to earn a living by labor by reason of disease of the stomach, due to a horse kicking him during his military service, and that he is totally blind now, having lost the sight of both eyes; that he is without means or income of any kind and unable to earn a support for himself and his wife.

It is shown by the testimony of several lay witnesses that the soldier is totally blind and suffers from stomach trouble and owns no property and has no income.

Dr. F. A. Stratton testifies, June 7, 1913, that the soldier is totally blind in both eyes and suffers from rheumatism and cystitis, both in chronic form, and wholly unable to perform any kind of manual labor.

From the evidence submitted in this case it is believed that the disability of the soldier was due to the service. In view of that fact the committee respectfully recommend the rate of pension of $12 per month.

H. R. 8452. James H. Martin, Oronton, Mo., served in the Regular Establishment, United States Navy, from October 10, 1902, to October 9, 1906, when honorably discharged at the expiration of his term of enlistment. He was 24 years of age at enlistment. (I. C. 38958.)

The records of the Navy Department show that during his service he was treated for appendicitis on two occasions, hernia (rupture), and bowel trouble, all in line of duty.

On December 7, 1906, he filed a claim for pension based on right hernia and rheumatism. This claim was allowed as to hernia at $10 per month from date of filing, which is the maximum rate provided by law for that disability. That part of the claim based on rheumatism was rejected on both the ground of no record, medical or other satisfactory evidence, showing it was contracted in the service, and because there was no disability shown to exist from same since the date of filing.

There is no evidence to show origin in the service of the alleged rheumatism.

When examined by a board of surgeons on May 1, 1907, they reported that the only evidence they could find of rheumatism was a general tenderness of the muscles and a slight stiffness of some joints, which would not warrant a rate. They did find some slight derangement of the functions of the heart that could result from rheumatism and rated it at six-eighteenths. The only real disability they found was complete right inguinal hernia, for which they rated fourteen-eighteenths.

With the bill the petitioner files an affidavit stating he is unable to earn a living by manual labor, and the only property he owns is a small house and lot worth about $400 which is mortgaged for $300, and he is unable to support his wife and children.

Lay witnesses by their testimony sustain the sailor's allegations as to property he owns, debts he owes, and his inability to perform manual labor.

A physician testifies the sailor suffers so severely from right inguinal hernia and "other physical disabilities" as to be unable to earn a support by any ordinary occupation.

From the evidence submitted your committee believe that an increase from $10 to $17 per month is fully warranted, and so recommend.

H. R. 8490. Gambo C. Villines, of Cross Prairie, Tenn., served in the Regular Establishment in Company B, Fifteenth Regiment United States Volunteer Infantry, from January 18, 1881, to January 17, 1886, when honorably discharged at the expiration of his term of enlistment. He also afterwards served in Company E, Eighth Regiment United States Volunteer Infantry, from September 13, 1886, to June 4, 1890, when honorably discharged by favor, and in Company B, Fifteenth Regiment United States Volunteer Infantry, from August 24, 1891, to August 24, 1892, when again honorably discharged by favor, and in Company H, Eighth Regiment United States Volunteer Infantry, from March 12, 1894, to December 16, 1895, when transferred to Company F, Sixth Regiment United States Volunteer Infantry, from which he was finally honorably discharged June 11, 1897. He was 25½ years of age at the first enlistment. (I. O. 1238555.)

The records of the War Department show the following treatment in each service:

First service—

"March 3 to 6, 1881, neuralgia; March 27 to April 2, 1881, fever; April 10 to 17, 1881, inflammation of pleura; April 24, 1881, catarrh; November 4 to 6, 1882, contusion of scalp; November 17 to 23, 1882, contusion of scalp, right side of head, caused by beer bottle; May 18 to 21, 1883, acute bronchitis; January 11 to February 9, 1884, acute rheumatism."

Second service—

"August 5 and 6, 1887, acute diarrhea."

Third service—

"January 4 to 21, 1882, slight contused wound of the right hand, hit a man in the teeth, not in line of duty; April 6 to 8, 1892, chronic inflammation of the mediastinum, was overheated while rescuing a drowning person, in line of duty; July 6 to 25, 1892, acute gonorrhea, not in line of duty. Nothing additional found."

He was not reported sick and received no medical treatment at all during his final service from March 12, 1894, to June 11, 1897, according to the War Department.

On November 4, 1899, he filed a claim for pension based upon rheumatism, which he alleged he had contracted during his first service in Company B, Fifteenth Regiment United States Volunteer Infantry, about January, 1884. This claim was first rejected June 25, 1901, on the ground of no disability in a ratable degree from rheumatism since date of filing.

He again filed a claim May 26, 1906, realleging the same disability and same time and place of contracting it. This claim was rejected May 15, 1913, on the ground that the evidence on file, the best obtainable, fails to satisfactorily show that rheumatism has continued since January 17, 1886, the date of the discharge from the first service, or to connect any now existing disability therefrom with the claimant's military service. No appeal was taken, and no effort has been made to reopen the claim.

The soldier states that he contracted this rheumatism during his first service; was suffering from same when discharged from the service; and has constantly since suffered therefrom. He furnished testimony of several lay witnesses to the effect that when he came home in 1886 from the first service he was suffering from rheumatism, and these witnesses state that when they saw and knew him in 1890, 1893, 1897, and 1899 he continued to suffer from same. There is a record of treatment in the service for rheumatism in January and February, 1884.

There is both lay and medical testimony showing he has suffered from rheumatism from about 1900, in addition to the lay testimony before mentioned. The soldier explains his inability to furnish medical evidence showing treatment for rheumatism prior to about 1900 by saying the physician who treated him has since died.

The claim was sent to the field for special examination, but this action resulted in throwing little, if any, light upon its merits beyond showing the character of soldier and his witnesses are good and the facts to which they have testified true, and one witness, a comrade in the final service, was found who testified the soldier did suffer during this final service from rheumatism, and that he had no disability of any kind prior to the first service.

The Bureau of Pensions rejected this claim because of the fact that after being discharged from the service in 1886 in which the soldier claims he contracted rheumatism he three times again enlisted and served continuously practically from 1886 until 1897 and never was treated in any of these subsequent services for rheumatism, nor in any one of the medical examinations when he enlisted for same was rheumatism discovered to exist and so noted.

When he was examined by a board of surgeons November 28, 1900, they reported as to rheumatism as follows:

"No objective marks of rheumatism in any muscle, tendon, or joint, and all movements normal. No other disability alleged or found. No signs of gonorrhea or other venereal disease. No ratable disability found."

When he was examined by another board of surgeons July 18, 1906, they reported:

"Rheumatism: Crepitation in all joints; pain on motion in all joints; motion limited one-third in all joints; lumbar muscles involved; no atrophy of muscles or contraction of tendons; rate, eight-eighteenths. Heart: No murmur; no hypertrophy; no dilation; there is dyspnea; heart irritable; no edema; no cyanosis; no rate."

With the bill the petitioner files an affidavit in which he states that he is unable to earn a living by manual labor because of rheumatism and results contracted in the service, and that he has no property or income.

It is shown by lay testimony that the soldier has no property and suffers so from rheumatism as to be unable to earn a living.

Dr. A. C. Moore testifies that he has treated the soldier for years now for typical case of articular rheumatism, and the remedies for same have caused stomach trouble to result so as to make it at times almost impossible for him to retain food sufficient to keep him alive; that the soldier is a man of good habits and character and is unable because of articular rheumatism and its results to do any manual labor.

From the evidence submitted your committee is of the opinion that the disabilities from which the soldier now suffers may be safely accepted as due to the service, and respectfully recommend the allowance of pension at the rate of $12 per month.

H. R. 8653. Marian E. Keyes, of 637 East Capitol Street, Washington, D. C., is the widow of Charles H. Keyes, deceased, who served in the Regular Establishment, United States Marine Corps, from June 3, 1885, to June 2, 1890; June 10, 1890, to June 9, 1895; June 17, 1897, to

June 23, 1900; August 4, 1900, to August 3, 1905; August 4, 1906, to July 10, 1911, when retired honorably. (W. O. 988051.)

The records of the Navy Department show the following treatment: "October 10 to 12, 1886, debauch, excessive use of alcoholics; April 30 to May 4, 1888, tonsillitis; May 29 to June 1, 1891, catarrhus epidemicus; December 6 to 9, 1892, alcoholism; January 1 to 13, 1893, chancroids, venereal; June 17 to 29, 1895, alcoholism; December 25, 1898, catarrh; January 9, 1899, catarrh; June 20 to June 24, 1903, gastric catarrh, due to excessive use of alcohol. He died April 13, 1912, from catarrhus epidemicus."

All of the foregoing were of line of duty origin except those due to syphilis and alcoholism.

The widow filed a claim for pension June 10, 1912, which was rejected August 19, 1912, on the ground that the marine's death from pneumonia nearly six years after his retirement can not be accepted as a result of any disease for which he was treated while in active service, and the claimant is manifestly unable to furnish medical or other evidence which would connect his fatal illness with his marine service.

Nothing but the declaration and the transcript from official records of the Navy Department were filed in the claim in the Bureau of Pensions.

With the bill the petitioner files an affidavit stating she possesses no property at all and that she has no income.

Two lay witnesses sustain the claimant's statements that she has no property or income.

Marian L. Kerr testifies that she knew Charles H. Keyes well, and said Keyes often told affiant that he had been married in 1879 or 1880, and that this wife died in childbirth about one year thereafter; that afterwards he married one Josephine Grace, who died to affiant's knowledge on September 5, 1905; that he afterwards married Marian E. Kerr, with whom he lived until his death, and who is now his widow, and who has two minor children, by the soldier, now living.

E. B. Hesse testifies that the petitioner was never married prior to marrying Charles H. Keyes, with whom she lived until his death, and whose widow she now is, and that she has two minor children to support. This affiant always understood the said Keyes had two former wives, both of whom had died prior to his marriage to the petitioner.

Record evidence of the death of the second wife, "Josie," on September 5, 1905, is furnished.

Record evidence of the marriage of Charles H. Keyes and the petitioner on July 12, 1906, is filed.

Record evidence of the death of Charles H. Keyes on April 13, 1912, is furnished.

J. D. Cummings testifies that he knows the wife of the said Charles H. Keyes died in Sidney, Ohio. (Note: The second wife of the soldier died in Washington, D. C., and the third wife is living now, so this must refer to the first wife and is in keeping with other testimony.)

Record evidence is filed showing the birth of the following children of said Keyes: Elsie Miller Keyes, born May 6, 1907; Mary Louise Keyes, born March 12, 1912.

From the evidence submitted your committee is of the opinion that the petitioner is the lawful widow of the deceased marine, and as such is entitled to a pension of $12 per month, with $2 additional for each of the two minor children until they become 16 years of age, and so recommend.

H. R. 9064. Andrew J. Wallace, of Coal Creek, Tenn., served during the War with Spain in Company G, Sixth Regiment United States Volunteer Infantry, from July 2, 1898, to March 15, 1899, when he was honorably discharged. He was 38 years of age at enlistment. (I. O. 1264931.)

The records of the War Department show the soldier was treated August 16, 1898, and October 26, 1898; nature of illness not given. He is also reported as absent from duty from November 30 to December 3, 1898, as sick; nature of same not given.

When mustered out he claimed to be suffering from an injury to his breast. The medical officer by whom he was then examined certified that the soldier was then spitting up blood and claimed same was a result of an injury received in October, 1898.

He filed a claim for pension March 26, 1901, based on an injury to the right breast received in service which had fractured the right collar bone and caused hemorrhage of the lungs. This claim was rejected November 25, 1901, on the ground of no ratable degree of disability since date of filing the claim.

On January 17, 1907, he again filed a claim which was based on piles, which he claimed to have contracted from becoming overheated in Knoxville, Tenn., July 15, 1898, and that in Porto Rico in line of duty unloading a car of supplies, a box of guns fell upon him, breaking his right collar bone and two of his left ribs and his left side of jawbone, from which injuries he had always since suffered from diseased lungs, which caused hemorrhages. This claim was rejected December 5, 1908, as to piles, on the ground of no record, medical or other satisfactory evidence, showing origin in service, existence at date of discharge or for some time thereafter; and as to alleged injury to right collar bone, left ribs, and left side jawbone, on the ground that there was no disability shown therefrom in a ratable degree since filing the claim.

On July 26, 1909, he once more filed a claim, based on piles and disease of the lungs, which he alleges resulted from the injury in service that had broken his right collar bone, two left ribs, and left jawbone. This claim was rejected August 17, 1909, on the ground of no record or satisfactory evidence of medical treatment or other satisfactory evidence showing origin or existence in service, or at date of discharge, and the evident inability of the claimant to furnish such evidence. No appeal was taken, but there have been several attempts made to have the claim reopened, all of which were declined by the Bureau of Pensions on the ground that the evidence offered failed to warrant such action.

The soldier, in several sworn statements, alleges that in the fall of 1898, in Porto Rico, while in line of duty unloading supplies from cars, a heavy box of guns fell on him and broke his right collar bone, two left ribs, and left side of jawbone, and as a result his lungs were injured by this accident, and soon afterwards began bleeding and have continued ever since to bleed and are diseased; he also swears that he contracted piles in the service in July, 1898, at Knoxville, Tenn., and has suffered ever since therefrom.

On December 9, 1907, the soldier visited Dr. Z. D. Massy, who was the surgeon of his command, and who recognized him at once and made an affidavit in which the doctor testifies that in Porto Rico, in the fall of 1898, he treated the soldier for hemorrhage of the lungs, and the soldier then informed affiant that hemorrhage of the lungs was the result of an accident he had received while unloading supplies a short time before, when a box of guns had fallen upon him, breaking some of his ribs.

Cary F. Spence, who was captain of the soldier's company, testifies, May 17, 1904, that in Porto Rico in the fall of 1898 the soldier was injured by lifting a heavy box of guns and was off duty for quite a while as a result of the injury, and several months afterwards when mustered out the soldier complained to affiant that his lungs had become diseased as a result of said injury and were constantly bleeding.

Six comrades have testified, in addition to the surgeon and captain, that the soldier suffered during the service from bleeding of the lungs, and claimed to them that same was the result of an injury received while he was engaged in unloading supplies and a heavy box of guns fell on him. Some of these comrades state that the soldier informed them that he preferred to receive treatment in quarters to going to the hospital.

One comrade alone testifies that the soldier suffered from piles in the service, and he states that he never saw the piles, and only had the soldier's word for it that he did suffer from same.

There is both lay and medical evidence to show that the soldier was well and strong prior to enlistment, but that when he came home after discharge he had a broken collar bone and claimed to have broken two left ribs and left side of jawbone, and was spitting up blood, and claimed that his lungs had been bleeding ever since the injury which he alleged he had received when a box of guns fell on him while unloading supplies in Porto Rico. The medical evidence shows the ribs were broken, as well as the collar bone and jawbone, and that the lungs are and have been diseased since the soldier's return from the service.

The soldier never alleged piles as a disability until 1907, nearly 10 years after discharge, and the medical evidence only shows existence of piles since about 1907.

The claim underwent a thorough special examination, with the result that all of the witnesses who had testified were persons of fair and good reputations as to truth, and they substantially sustained the testimony previously given by them in the claim.

Not one of the comrades who testified was present and saw the accident when the box fell on the soldier, and he was not able to give the name of one who was then present, but all of those who testified knew his lungs were bleeding in the service and they were bleeding when he was discharged therefrom.

The special examination resulted in the soldier's failure to produce witnesses who could testify to the existence of piles prior to about 1906 or 1907 from personal knowledge. One comrade and one or two witnesses here and there can and do state that the soldier said he had piles in the service and after discharge, but his wife is the only person who swears they existed and who saw them prior to 1906.

The soldier was examined by a board of surgeons June 12, 1901, who report him as 39 years of age, 5 feet 10 inches in height, and weighing 159 pounds. This board states that the soldier's right collar bone had been broken, but that they could find no evidence of any broken ribs of either side, or any disease of the lungs or any other disease or disability. They further state that they could find no disability of any character which would warrant their suggesting any rate therefor, and they therefore suggested no rating.

He was again examined by a board of surgeons March 20, 1907, who found him weighing 165 pounds, 47 years of age, and 5 feet 10 inches in height. His tongue was coated and he suffered from alternating constipation and diarrhea, and there was one large internal pile. They rated this 6/18. This board did find that not only had the right collar bone been broken, as found by the first board, but also two of the left ribs and the left side of the jawbone had been fractured, and rated injuries and results at 2/18. They found the heart and other organs in normal condition and no disabilities existing other than piles, constipation, diarrhea, and fractures as noted. There were no indications of vicious habits. The board failed to find anything wrong with the lungs of a serious enough nature to mention, other than the soldier alleged they had been injured by the box falling on him.

With the bill the petitioner files an affidavit in which he states that he is in part incapacitated for performance of manual labor by injuries to the left side and piles and has no property or income.

Two lay witnesses sustain the soldier's allegations as to owning no property and being unable to perform manual labor much of the time.

Two comrades testify in affidavits before the committee that the soldier's lungs were bleeding in the service, and he claimed same was due to being injured by a box of guns falling upon him.

A physician testifies, November 25, 1913, that he has treated the soldier at various times since 1901 and for broken right collar bone and injuries to the left side, which soldier claims he received as a result of a box falling on him in the service in Porto Rico in 1898; that the soldier suffers from repeated and oft-occurring hemorrhages from the lungs as a result of these injuries, and that he also suffers from severe form of piles and hemorrhoids and is disabled at least half of the time for the performance of any kind of labor.

From the evidence submitted in this case it is believed that the disabilities from which the soldier now suffers may be safely accepted as due to the service, and a pension of $12 per month is recommended.

H. R. 9201. Peter H. Strumsky, 2518 West Baltimore Street, Baltimore, Md., served in the Regular Establishment in Company A, First United States Cavalry, from October 10, 1899, to March 29, 1900, when transferred to Hospital Corps, United States Army, from which he was discharged October 25, 1902. He was 21 years of age at enlistment. (I. O. 1335819.)

The records of the War Department show the following treatment: "November 2 to 26, 1900, malarial fever; November 16, 1900, gastritis, due to lead poisoning prior to enlistment, not in line of duty. No additional record found."

In several efforts which have been made by the soldier to have the claim reopened, all of which have been denied by the bureau, testimony of many witnesses has been filed by him. It is all of a similar character to that filed herein, and only cumulative.

Peter H. Strumsky, a private in the Hospital Corps, United States Army, from October 10, 1899, to October 22, 1902, filed a claim for pension under the general law November 1, 1906, alleging that while at Santa Mesa, P. I., in November, 1900, he contracted chronic diarrhea and constipation, affecting rectum. He asked a reconsideration of his original application for pension on account of rheumatism, disease of heart and stomach, which he claims to have contracted in July, August, and September, 1902.

On April 19, 1909, that part of the claim based on disease of heart was rejected on the ground of no record and claimant's inability to furnish satisfactory evidence of origin in service or existence at dis-

charge, and diarrhea, constipation, and disease of rectum on the ground of no record, no medical or other satisfactory evidence of origin in service or at discharge, and claimant's inability to furnish same, and on the further medical ground that a ratable degree of disability had not been shown since filing of claim.

May 15, 1909, rheumatism was rejected on the ground of no medical or other satisfactory evidence of treatment or existence of said disability since discharge prior to October, 1905, and claimant's inability to obtain such evidence.

In an appeal filed June 1, 1909, it is contended that the action of the bureau is contrary to the evidence.

Dr. H. C. Moses says, in affidavit filed July 30, 1907, that while on the way from Manila, P. I., to San Francisco, Cal., in September, 1902, he treated claimant for rheumatism, with probable heart complications, and that rheumatism was incurred in line of duty. Dr. Moses was acting assistant surgeon on board transport *Sherman*.

Comrade J. F. Sprinkle says in affidavit filed May 18, 1907, that he has been with claimant almost daily since November, 1902, and that he has suffered from rheumatism, heart trouble, and diarrhea.

Affidavit of William J. Marshall, filed May 18, 1907, is to the same effect as that of affiant Sprinkle, except he says he first heard soldier complain of the alleged disabilities in August, 1903.

Dr. Wilfred M. Barton says, in affidavit filed February 6, 1907, that he has treated claimant at intervals during the last three years for chronic gastritis, constipation, and diarrhea.

Dr. Charles C. McDowell states in affidavit filed March 11, 1907, that he prescribed for claimant November 4, 1903, for constipation and indigestion.

Soldier was examined by a board January 31, 1907, which reported as follows:

"Age, 27 years; height, 5 feet 11 inches; weight, 156 pounds; pulse rate, 85, 95, 120; respiration, 18, 20, 24; and temperature normal.

"Tongue slightly coated and indented. Teeth sufficient. Liver extends from sixth rib to costal margin and not tender. Stomach normal in size and otherwise. Spleen extends from ninth to eleventh rib; not tender or palpable. General abdominal tenderness, with great tenderness over descending colon and sigmoid; some tympany; no piles, fissures, or fistula. No diarrhea at present.

"Heart: Beats seen, felt, and heard, fifth space, nipple line. Three systolic murmurs heard at apex and transmitted to left. Another heard at second right interspace; third heard junction of fourth rib on both sides with the sternum, marked epigastric pulsation; increase of cardiac over right and systolic venous pulsation in the jugulars; action regular but heaving. There is cyanosis of chest and hands. No edema or dyspnea.

"Rheumatism: Slight stiffness in shoulders and stiffness and crepitus in knees and ankles. No atrophy, contraction, or limitation of motion.

"Urine: 1016, clear, acid, amber. No albumin or sugar."

A special examination was held, at which claimant and others testified. Claimant's testimony of May 25, 1908, and August 5 and 28, 1908, is a reiteration of the allegations contained in his declarations. He explained, however, that by stomach trouble he meant dysentery.

In supplemental deposition dated March 15, 1909, claimant says he received treatment at Santa Mesa Hospital, P. I., for malarial fever and dysentery or diarrhea, and that, while his heart was weak during the latter part of his service in the Philippine Islands, it was while on the transport *Sherman* "that the rheumatism actually developed with heart complications."

William J. Marshall testified August 10, 1908, that he first heard soldier complain of rheumatism, stomach trouble, and diarrhea in March, 1904, and of heart trouble in August, 1904.

Louis Strumsky, father of soldier, testified August 11, 1908, that when he returned from the Army his health was bad and he was suffering from chills and fever and stomach trouble, and that since his return he has suffered from said causes, and that he had diarrhea when he came home after discharge. Also, that he first knew of soldier using liniments for rheumatism about three or four years ago.

The evidence of William L. Strumsky, a brother of claimant, taken August 11, 1908, is to the same effect as that of Louis Strumsky, except he says soldier had rheumatism when he returned from the Army; that about a year ago soldier "took Swamproot for his kidneys" and that he complained of piles several years ago. Both these deponents say claimant was healthy when he enlisted.

Mary Strumsky, mother of claimant, testified August 7, 1908, that he was healthy when he enlisted and that when he returned he was pale and did not look well, but that she did not know what was the matter with him, as he did not tell her.

On March 13, 1908, Howard W. Rowe testified that he has been acquainted with soldier practically all his life; that when he returned from the Army he complained of chills and fever and rheumatism, and that his health was good when he entered the service. Deponent adds that he has not heard soldier complain of chills or fever since the expiration of about one year after discharge.

H. C. Conrad testified, August 18, 1908, that when claimant returned from the Army he complained of rheumatism and stomach trouble; that he has seen soldier once or twice each week since discharge, and that he has complained of rheumatism and stomach trouble all that period, but that he did not hear him complain of heart trouble for a year or so after he returned from the Army.

Edward H. Koch testified, August 6, 1908, that he knew of no ailment with which claimant was suffering until several months prior to the date of his testimony, when soldier told deponent "his stomach bothered him."

On August 14, 1908, Louis Bayer testified that so far as he knew claimant had never suffered from any of the alleged disabilities.

Stephen C. Hess testified, August 27, 1908, to filling two prescriptions for a man representing himself to be the claimant. The ingredients of one indicate it was for indigestion, and the other seems to have been for nervous trouble.

Dr. C. C. McDowell says in deposition of August 6, 1908, that he treated soldier November 4 and 7, 1903, for "indigestion, constipation, etc.," and that he does not remember of having treated him for any other trouble.

Dr. W. L. Nicholls testified, August 25, 1908, that he had known soldier about one year, and that he treated him twice for stomach trouble, nervous indigestion, or nervous dyspepsia. He also testified that soldier had a weak and irregular heart from anemia.

Dr. John G. Hollyday testified, August 22, 1908, that he treated claimant shortly after he returned from the Army, but that he had no definite recollection of what the treatment was for.

Dr. H. C. Moses testified, September 14, 1908, that he was acting assistant surgeon, United States Army, from 1898 to 1903, and that on return from Manila to San Francisco, aboard transport *Sherman*, about September, 1902, he treated claimant for rheumatism and heart complications.

Dr. Wilfred M. Barton testified, December 15, 1908, that in 1903 he treated claimant for heart trouble, diarrhea, and dysentery; that he did not have valvular disease of the heart, "but the pulse was weak, rapid, and irregular"; that he treated him in October and November, 1905, July and August and October and November, 1906, January, 1907, and March, 1908, for rheumatism, which deponent attributes to diarrhea; that soldier had trouble with his bowels, and there were remnants of dysentery during 1907 and 1908. Deponent also says he treated soldier in 1903 and 1904 for hemorrhoids, and that he is not sure whether he treated claimant for heart trouble after 1904.

Fred J. Koch testified, December 14, 1908, that soldier complained of rheumatism, diarrhea, or dysentery when he returned from the Army, and that he walked with a cane.

A. Engle says in deposition of December 14, 1908, that he first met claimant in 1903 or 1904, at which time he complained of suffering with his back and stomach and also rheumatism.

Fred W. Schulz says in deposition of December 15, 1908, that he knew claimant from boyhood to the time he enlisted; that he met him about six months after he returned from the Army, and that up to about a year ago he had seen soldier quite often. Deponent also says soldier's health was good when he enlisted; that when he met him after discharge "his stomach was all out of gear" and he complained of stomach trouble, rheumatism, and diarrhea.

Andrew Roden testified, March 13, 1909, he first met claimant during the summer of 1901 at San Francisco; that deponent was in the general hospital and met claimant on the grounds; that there were several hospitals, and he does not know which one claimant was in; that he did not know what was the matter with claimant, but that he limped, which indicated he had rheumatism; that when he next met soldier, in 1905, he still limped and "complained of one leg" and of rheumatism, also of stomach trouble and chills and fever.

John J. Carlin testified, March 15, 1909, that he first met claimant in 1899 in the Philippine Islands at Santa Mesa Hospital; that claimant was in the surgical and fever ward; and that while deponent does not remember what was the matter with him, cases of dysentery and typhoid malaria were sent to one section of said ward, and "his ailment must have been for some stomach or bowel trouble or some malarial fever condition."

Comrade William T. Baker testified, March 15, 1909, that soldier suffered from rheumatism and stomach trouble while in the service, and that he was in the hospital because of stomach trouble.

Dr. Frank Huwatcheck testified, March 27, 1909, that he was a member of the Hospital Corps from 1899 to 1902, and that claimant was sick in the hospital at Santa Mesa, P. I., in 1901, with malarial fever and complained of stomach trouble.

The records of the War Department do not show that claimant was treated for rheumatism while in the service, or that he was suffering therefrom at discharge. Alleged diarrhea, constipation, and disease of rectum have not been shown to exist in a ratable degree of disability since claim was filed. Claimant is only 10 pounds under standard weight.

Although Dr. H. C. Moses testified that claimant was treated in September, 1902, on transport *Sherman* for rheumatism and heart complications, there is no record showing treatment for either while in the service or since discharge until 1903, for heart trouble, and October, 1905, for rheumatism.

With the bill petitioner files an affidavit stating he is wholly incapacitated for performance of manual labor and possesses no property of any kind and has no income.

The allegations of the soldier are fully sustained by the testimony of many lay witnesses.

Dr. F. K. Nichols testifies, February 3, 1914, that upon examination of the soldier that day he finds him to be suffering from severe form of disease of heart, and the action and functions of the heart are deranged materially, and, further, that he suffers from arthritis, which has seriously affected the left knee.

Several other doctors have testified that the soldier suffers from rheumatism and a resulting disease of the heart and is wholly unable to perform manual labor.

From the evidence submitted your committee believe that disabilities from which the soldier now suffers were incurred in service and line of duty and recommend the allowance of pension at the rate of $12 per month.

H. R. 9973. Samuel P. Shupe, R. F. D. No. 2, Hagan, Va., served during the War with Spain in Company I, Sixth Regiment United States Volunteer Infantry, from July 10, 1898, to March 15, 1899, when honorably discharged. He was 21 years of age at enlistment. (I. O. 1279307.)

The records of the War Department fail to show he was ever reported as being sick or received any medical treatment for any cause. When discharged he claimed to be suffering from no disability. The medical officer by whom he was examined certified that an enlarged left testicle was all the disability found to then exist.

On January 9, 1902, he filed a claim for pension based on rupture from fall in the service. He also alleged that a very slight varicocele, which had existed prior to enlistment, had been made a great deal worse by service. This claim was rejected May 28, 1903, on the ground the rupture or varicocele existed prior to enlistment, as shown by the statements of the soldier.

He again filed a claim April 10, 1907, based on rupture, diabetes, disease of the stomach, and general debility. This claim was rejected as to diabetes and disease of stomach on the ground of no disability in a ratable degree since date of filing the claim. Former rejection as to rupture was adhered to. The claim was reopened by order of the Commissioner of Pensions September 25, 1912, as to diabetes and disease of the stomach, for the purpose of a test medical examination. The claim was again rejected after this test examination, because there was no ratable degree of disability shown from diabetes and disease of stomach, the former rejection as to rupture being still adhered to, and not reopened. No appeal was taken.

The claimant alleges that he did contract diabetes and disease of the stomach while in the service and still suffers from same. He further alleges that he incurred rupture in the service, and maintains that he never stated, or at least never intended to state, that rupture existed prior to enlistment; that what he stated in regard to same was that if it existed prior to his enlistment it was so slight as to be unknown to him, for he never knew it; and he believes the rupture was incurred in service and line of duty as a result of the fall.

Comrade G. R. Hylen testifies, May 1, 1912, that in Porto Rico the soldier was sick and suffering for at least two months with diabetes and stomach trouble; that the corporal wished the soldier to go to a hospital, but he would not do so; that affiant knows it was disease of stomach, because he could not eat and retain food, and he was in this condition at discharge.

M. G. Ely and William H. Kinser testify, November 29, 1907, that they knew the soldier before enlistment, and he was then well and strong and free from disease, but when he came home from the service he appeared to be sickly and complained of rupture and something wrong with his "waterworks," and he has never been stout and strong since service, and is not able to do much work.

Dr. W. L. Spencer testifies, December 21, 1907, that he treated the soldier in July and August, 1903, for varicocele; that he knows the soldier was well and strong prior to service, but since service has given indication of one suffering from nervous trouble and he has been unable to do very much manual labor; that affiant advised an operation for varicocele, but the soldier refused to have one.

The soldier was examined by a board of surgeons September 3, 1902, who reported him as 24 years of age, 5 feet 6 inches in height, and weighing 130 pounds. General appearance, fairly good; rupture or varicocele present on left side; tumor 2 inches in diameter; wears no truss. Rate, ten-eighteenths. Diabetes as shown by urine. Rate, eight-eighteenths. No other disease or disability.

Another board, who examined him June 5, 1907, found physical condition about the same and suggested six-eighteenths for rupture and four-eighteenths for disease of the stomach.

The last board to examine him, September 4, 1912, stated that they could find no disability existing except a small varicocele, for which they rated two-eighteenths.

With the bill the petitioner states in an affidavit that he is in part unable to earn a living by manual labor because of liver and stomach disease and diabetes, rupture, and varicocele, and that he possesses no property and no income.

Dr. J. S. Ewing testifies that the soldier suffers from an enlarged liver and indigestion.

The soldier, in an additional affidavit, states that he suffers constantly from some chronic form of stomach disorder, which doctors have treated him for since discharge, but without giving him relief, and that he also suffers from rupture which he contracted in the service.

The Member who introduced the pending bill has written two letters to the committee. In one he states that he has known the soldier for years and knows he has no property or income. In the other he states that the soldier is a man of good character, who would make no statement which was not true; that the soldier had good health prior to his service and ever since his discharge has been in poor health, and the boards of surgeons who have examined the soldier have so found in connection with his claim for pension.

From the evidence submitted to your committee in this claim it is believed that it is safe to accept the disability from which the soldier now suffers as due to service, and a pension of $12 per month is therefore recommended.

H. R. 10169. Edward F. Smith, of Washington, D. C., served during the War with Spain in Company H, Third Regiment United States Artillery, from March 12, 1900, to January 25, 1901, when transferred to Company C, which afterwards became the Fifth Battery, United States Field Artillery, from which he was honorably discharged March 11, 1903, at the expiration of his term of enlistment. Prior to this the soldier had served from February 14, 1892, in Companies B and F, Fifth Regiment United States Artillery, to February 3, 1897, and from March 11, 1897, to March 10, 1900, in Companies A and L, Ninth Regiment United States Infantry. He also served from June 11, 1903, to October 20, 1904, in Company K, Ninth Regiment United States Infantry, and was honorably discharged under the provisions of section 4 of the act of June 16, 1890. (I. Ctf. 1148609.)

The records of the War Department show that during his several services the soldier suffered from several attacks of malarial fever, two of which were severe and resulted in anemia; that he repeatedly was treated for diarrhea, bronchitis, and gastritis, rheumatism, dyspepsia, some bruises, and slight injuries. He was a victim of constantly recurring boils and stomach disease. All were incurred in line of duty. The only sickness he suffered from during the whole time which was not due to line of duty was an acute attack of gonorrhea in 1892, for which he was treated several days.

He first filed a claim for pension May 2, 1905, based on malarial poisoning, rheumatism, gastritis, indigestion, cramps, and bloating, which was rejected on March 16, 1907, on the ground of no disability in a ratable degree therefrom. The claim was reopened and allowed July 30, 1908, from date of filing at $6 per month for gastritis. The rejection of other disabilities was adhered to.

A claim for increase filed May 10, 1909, was rejected October 19, 1909, on the ground that no increase in disability was shown to exist.

He again filed a claim for increase August 13, 1912, and also claimed for disease of the stomach and intestines, as results of gastritis. This claim was rejected on October 23, 1912, on the ground of no increase in disability from gastritis, for which pensioned, and that disease of the stomach was covered by the rate for gastritis. As to disease of the intestines, that was held not to be a result of gastritis, and not otherwise shown to be due to service origin. An effort to have the claim reopened was denied November 16, 1912.

The record in the War Department is sufficient to show any disability the soldier may have suffered from since discharge from malarial poisoning, rheumatism, diarrhea, disease of the stomach, and gastritis could safely be accepted as having been due to the service.

Dr. Joseph S. Wall testifies, August 10, 1907, that during the previous two years the soldier had been under affiant's professional care for chronic gastritis and malaria, the malaria being of a severe and stubborn form, and that during these two years the soldier has been incapacitated for the performance of any manual labor. This doctor, in 1909, again certifies to about the same physical condition of the soldier from same disabilities.

Dr. Louis Kolipinski testifies, November 5, 1912, that from May, 1912, to date, the soldier has been under his professional care, and during that time suffered from repeated attacks of diarrhea, flatulence, tenderness of the stomach and bowels, vomiting, and inability at times to evacuate the bowels, and is now confined to bed and unable to perform any kind of manual labor.

The soldier has been examined by four boards of surgeons. The first, July 10, 1905, reported aged 38, height 6 feet, weight 172 pounds. They found no evidence of any rheumatism; no rate. No evidence of malaria or malarial poisoning; no rate. They found liver and spleen enlarged and tender, and rated eight-eighteenths for disease of digestive organs (gastritis). No disease of rectum or any other disability, and no vicious habit.

The next board, July 15, 1908, found substantially the same physical condition and rated six-eighteenths for gastritis and nothing for anything else.

The board that examined him October 1, 1909, found the only disabilities existing were those due to gastritis and intestinal catarrh, and rated ten-eighteenths for those two together and treated them as one and the same. The Bureau of Pensions refused to regard them as one and the same.

The last board to examine the soldier, September 25, 1912, found enlarged liver and spleen, with tenderness of same and stomach, but otherwise the digestive organs were in normal condition; rate eight-eighteenths. They found no other disability existing and specifically refused to rate for anything except gastritis.

With the bill the petitioner files an affidavit in which he states that by reason of gastritis of the stomach he is wholly unable to perform any manual labor and owns no property except about $500 worth of household goods, and no income other than the $6 per months pension.

The testimony of lay witnesses and statement of the Member who introduced the bill sustain the soldier's allegations as to property, and the Member further states that he is informed the soldier is now confined to bed in hospital.

Dr. Charles H. Waters testifies, December 15, 1913, that the soldier is under his professional care and treatment for chronic gastritis, thickening of the walls of the stomach, and such obstruction of bowels that an operation seems advisable, and affiant believes there can be no doubt the present condition is due to disease contracted in his military service.

From the evidence submitted your committee believe that an increase from $6 to $17 per month is fully warranted in this case, and so recommended.

H. R. 10173. George B. Wessner, of Emporia, Kans., served during the War with Spain in Company D, Thirty-second Regiment United States Volunteer Infantry, from August 5, 1899, to May 8, 1901, when he was honorably discharged. He was 18 years of age at enlistment. (I. O. 1407069.)

The records of the War Department show the following treatment:

"August 29 and 30, 1899, diarrhea; October 9 to 14, 1899, diarrhea; December 17 and 18, 1899, lumbago; December 18 to 30, 1899, gastro-enteritis and malarial fever; December 30, 1899, to January 9, 1900, malarial cachexia; January 10 and 11, 1900, diarrhea; January 26 to 31, 1900, diarrhea; July 5 to 8, 1900, diarrhea; August 7 to 9, 1900, diarrhea. No additional record found."

When discharged he claimed to be suffering from no disability, and the medical officer who then examined him certified no disability or disease existed.

He filed a claim for pension November 19, 1912, based on malarial poisoning and diarrhea, and alleged that tubercular disease of the spine had resulted from these diseases, and all were due to his service. This claim was rejected on March 12, 1913, as to malarial poisoning and diarrhea on the ground of no ratable degree of disability from the same since date of filing the claim; and as to affection of the spine, on the ground that the same is not due to service origin, as shown by the claimant's own statements that it first appeared in 1912. No appeal was taken.

Dr. William Muffet testifies he treated the soldier during July, August, and September, 1901, for malaria and diarrhea.

Dr. J. F. Osborn testifies he treated the soldier in the years 1902 and 1903 for malaria and diarrhea.

Dr. G. W. Smith testifies he treated the soldier in the year 1904 for chronic form of malaria, with enlarged spleen and liver and other symptoms and results of that disease.

Dr. F. A. Endall testifies he treated the soldier during the years 1905, 1906, 1907, 1908, 1909, 1910, and 1911 for chronic malaria, and that during this time the soldier began to suffer severe pain in his back, which finally resulted in tubercular trouble of the spine, and he now suffers from this, and from all of the said diseases he is wholly disabled, as far as any manual labor is concerned.

Dr. J. P. Kaster testifies that the records of the hospital of which he is surgeon show the soldier came there in August, 1912, complaining of great pain in the back and side, and upon examination it was found that he was suffering from curvature of the spine, produced by tuberculosis, and affiant is not able to state the cause or origin of same, but that it wholly disabled him for all manual labor.

The soldier was examined January 15, 1913, by a board of surgeons, who report him as 31 years of age, 5 feet 11 inches in height, weight 175 pounds. They found chronic form of malarial poisoning with its usual results, enlarged spleen and liver—rate six-eighteenths. They found history of a chronic form of diarrhea which had resulted in chronic constipation, with inflamed rectum and piles—rate six-eighteenths. They found a pretty severe curvature of the spine, due to tuberculosis of the spine, and rated this disability alone at $24. All other vital organs were normal. No vicious habits. They state in conclusion:

"This claimant is so disabled from malarial poisoning, rectum disease, result of chronic diarrhea, and curvature of spine as to be incapacitated for the performance of any manual labor, and is entitled to $30 per month."

With the bill the petitioner files an affidavit in which he states that by reason of malarial poisoning, diarrhea, and its results, and curvature of the spine, all of which he believes are due to his service, he is wholly unable to earn a living by any kind of manual labor for himself, wife, and three small children, and that he possesses no property and is in debt and has to ask help of his relatives.

The testimony of several witnesses sustains the petitioner's allegations as to owning no property, having to ask help of relatives, and being unable to earn a living.

The physical condition of the soldier is clearly shown by the report of the board of surgeons of the Bureau of Pensions and medical testimony on file in his claim, which has hereinbefore been referred to.

From the evidence submitted in this case it is believed that a pension of $30 per month is fully warranted, and it is so recommended.

H. R. 10193. William H. Franks, of Laurence, S. C., served in the Regular Establishment, Troop F, First Regiment United States Cavalry, from September 18, 1855, to September 18, 1860, when honorably discharged at the expiration of his term of enlistment. He was 18 years of age when he enlisted. (I. O. 6343.)

It does not appear from the records of the War Department that the soldier was ever reported sick or received medical treatment for any cause during his service.

The first and only claim filed by the soldier in the Bureau of Pensions was filed August 27, 1902, under the acts of July 27, 1892, and

June 27, 1902, which relate to Indian wars. This claim was rejected March 18, 1903, on the ground the soldier rendered no service in any of the Indian wars covered by the provisions of said laws.

The records of the War Department do show that the organization of which soldier was a member did serve from May to September, 1860, in campaigns against the Indians in Kansas and Indian Territory. Such service is not, however, covered by the Indian wars pension acts cited.

The soldier is manifestly unable to establish a claim for pension under the general laws, and consideration of the pending bill is requested under the committee rule relating to such cases.

With the bill the petitioner files an affidavit stating he is eighty-odd years of age, very feeble wholly unable to perform any manual labor, and believes his disabilities, particularly piles, are the result of his five years' service in the United States Cavalry. He further states that he has no property or income.

Several witnesses testify the soldier is very old and very feeble, and is wholly unable to perform any kind of labor, and that he possesses no property or income.

The Member who introduced this bill (Mr. J. T. Johnson) writes the committee that he personally knows the soldier is so old and feeble as to be unable to perform any labor, and is a great sufferer, and can not possibly live but a short while, and possesses no property or income. Mr. Johnson invites attention to a letter of February 16, 1914, from a Mr. R. C. Grat, stating the soldier is fast growing more and more feeble and suffers so from piles that much of the time he can not sit down and is liable to die now at any time.

From the evidence submitted in this case it is believed that a pension of $12 per month is fully warranted, and it is so recommended.

H. R. 10357. John Hodges, of Pascola, Mo., served in the Regular Establishment in Company B, First Regiment United States Infantry, from February 6, 1867, to February 6, 1870, when honorably discharged at the expiration of his term of enlistment. (I. O. 731425.)

The records of the War Department show that during his service the soldier suffered from an attack of yellow fever and another attack intermittent fever, and also diarrhea.

September 30, 1889, the soldier filed a claim for pension based on yellow fever, rheumatism, and disease of the lungs. This claim was rejected June 12, 1900, on the ground of no ratable disability from alleged diseases since date of filing.

He again filed a claim August 3, 1912, based on the same disabilities, and also bronchitis, as an additional disability. This claim was rejected as to rheumatism and bronchitis and disease of the lungs on May 28, 1913, on the ground of no record, medical or other satisfactory evidence, showing origin of said disabilities in the service at discharge, or for about nine years thereafter, and the inability of the claimant to furnish competent evidence to connect any disability from which he now suffers with his military service, either as a result of yellow fever or otherwise. No appeal was taken.

Three comrades testify the soldier suffered from yellow fever during the service, but mention no other disability. The record shows he did have an attack of yellow fever.

S. Russell testifies he has known the soldier since before his service; that when he came home from the service he was suffering from rheumatism and has since continually suffered therefrom.

Elizabeth Greenwell and Maria Hodges testify the soldier suffered from time of his discharge until 1891, when they ceased to see him, with rheumatism, and much of the time he was rendered almost helpless thereby.

Carroll Allen testifies that he knows the soldier suffered from 1871 to 1884 from rheumatism and disease of the lungs.

Dr. W. C. Moxey testifies he treated the soldier in 1879 and 1880 for rheumatism and pneumonia.

Dr. E. J. Ganse testifies he treated the soldier from 1884 to 1887 for rheumatism and disease of the lungs.

Dr. J. L. Curd testifies to treatment in 1891 for rheumatism and chronic bronchitis.

Dr. A. F. Bugg testifies to treating the soldier in 1903 and afterwards for rheumatism and disease of the heart and lungs. He also later testifies again to the same effect.

Dr. C. A. Wells testifies that when he examined the soldier in 1907 he found him suffering from articular and muscular rheumatism and disease of the heart and lungs.

When the soldier was examined by a board of surgeons January 15, 1890, the only disease or disability that they could find from which he then suffered was disease of the lungs, for which they rated four-eighteenths.

He was again examined, and for the last time, by a board of surgeons November 1, 1899, who report him as 53 years of age, 5 feet 5 inches in height, and weighing 136 pounds. This board states that the soldier appears to be in good physical condition; they could find no evidence of rheumatism, disease of the heart or lungs, or any other disease or disability, and state that he is not entitled to any rate of pension.

With the bill the petitioner files an affidavit stating he is 67 years of age and wholly unable to do any kind of work because of rheumatism and bronchial or lung disease, and possesses no property other than $50 worth of personal property.

His statements are sustained by testimony of lay witnesses.

A physician testifies, February 14, 1914, that the soldier suffers from articular rheumatism and bronchial and lung disease to such an extent as to be unable to perform any manual labor and is very poor financially.

From the evidence submitted your committee believe that the disabilities from which the soldier now suffers may be safely accepted as due to service, and recommend the allowance of pension at the rate of $12 per month.

H. R. 10952. Otho E. Gepler, of Albany, Ind., served during the War with Spain in Company D, First Regiment Ohio Volunteer Cavalry, from April 29, 1898, to October 23, 1898, when honorably discharged. He afterwards again served in the band, Thirty-first Regiment United States Volunteer Infantry, from July 14, 1899, to June 18, 1901. He was 33 years of age at enlistment. (I. O. 1321575.)

The records of the War Department show the following treatment during the first service:

"May 25 to 29, 1898, exhaustion, fatigue; June 27 to 30, 1898, adenitis right inguinal glands; July 7 to 13, 1898, bubo d'embles (no urethritis); July 18 to 20, 1898, urticaria. All foregoing in line of duty. Nothing additional found."

He was not recorded as sick and received no medical treatment for any cause during the second and final service.

When discharged from the first service he claimed to be suffering from bruised groin. The medical officer who examined him states:

"I find an open ulcer resulting from an abscess in right inguinal region, the result of saddle bruise; a scar below this shows a former opening. The wound discharges pus. No other disability found. This not caused by venereal disease."

When discharged from the final service the soldier claimed to be suffering from no disability, and none was found to exist by the officers by whom he was examined.

July 27, 1904, he filed a claim for pension based on injury to the right groin, resulting in an abscess, caused by a horse falling on him while in drill, and nasal catarrh contracted in the Philippines. This claim was rejected February 3, 1906, as to abscess of groin on the ground of inability of claimant to show continuance from date of discharge from the first service and through period of second service and since; and as to catarrh on ground of no record or medical evidence showing existence in service, at date of discharge, and since. Both disabilities were also rejected on the further ground of no disability therefrom since date of filing the claim. No appeal was taken and no effort was made to reopen the claim.

Byron L. Bargar, who was captain of the soldier's company—D, First Regiment Ohio Volunteer Cavalry—testifies July 24, 1904, that at Camp Thomas, Ga., the soldier was lame and appeared to have been in some way injured about the hips. Affiant did not see the accident when he was hurt.

Comrade Fremont Kipp testifies, July 28, 1904, that the soldier's horse fell on him in drill at Camp Thomas, Ga., in June, 1898, and he was for some time on sick list as a result thereof.

W. G. White, who was captain of Company B, Fourth Regiment Ohio Volunteer Infantry, testifies, July 28, 1904, that he knew the soldier before his enlistment in Company D, First Regiment Ohio Volunteer Cavalry; that affiant recalls the fact that the soldier, during the service in Georgia, came to see him and was then lame and used a cane, and said he was excused from duty because of this disability.

John E. Stick, who was a comrade of the soldier in the last service, in band, Thirty-first Regiment United States Volunteer Infantry, testifies, October 28, 1904, that the soldier during this final service suffered from catarrh, as shown by sniffling and repeated headache, and trouble with his ears, complaining of sensation of thumping in same.

Mark M. Young, who was also a comrade in the soldier's final service, testifies, October 24, 1904, that the soldier during this service suffered from catarrh, which was shown by his red nose and sniffling and bad breath.

He was examined by a board of surgeons October 26, 1904, who reported him as 40 years of age, 5 feet 9 inches in height, and weighing 180 pounds. The board states as follows:

"In right groin are two small scars, one about 1 inch above and the other three-quarters of an inch below Ponpart's ligament, each being about one-half inch in diameter, considerably depressed, slightly adherent but slightly dragging. No evidence that spermatic cords or other important structures in groin were injured. No special tenderness of cords or testicles. Testicles normal in size. No limitation in motion of right leg and no atrophy. No evidence of disability from injury of right groin. No rating.

"Nasal catarrh: Mucous membrane of nasal fossæ and also of the pharynx slightly inflamed, hypertrophied, with slight catarrhal exudate evident. Eustachian tubes pervious. Hearing normal. But slight disability from catarrh of nose and pharynx; rate two-eighteenths."

The board found all other vital organs in normal shape except the heart, which was somewhat dull, a little weak, and irritable. They rated this four-eighteenths. No vicious habits, past or present.

With the bill the petitioner files an affidavit stating that by reason of piles, fistula, and disease of the rectum he is partially disabled for the performance of any manual labor, and that he has no property and no income.

John B. Stick, who was a comrade in service with the soldier, testifies that the soldier suffers from bowel and rectum diseases to such an extent as to often confine him to his home, and that in the service he complained of stomach disease.

There is lay testimony showing the soldier has no property and suffers from disease of the stomach and rectum.

Two physicians testify that the soldier is now and has been for several years suffering so severely from disease of the stomach, bowels, and rectum, with piles, hemorrhoids, and fistula, as to be much of the time unable to do any kind of manual labor.

From the evidence submitted your committee believe that the disabilities from which the soldier now suffers were incurred in service and line of duty, and recommend the allowance of pension at the rate of $12 per month.

H. R. 11057. Addison B. Burroughs, of Hackensack, N. J., served during the War with Spain in Company G, Second Regiment New Jersey Volunteer Infantry, from May 2, 1898, to June 29, 1898, when transferred to the Second Battalion, Second Regiment New Jersey Volunteer Infantry, from which he was honorably discharged November 17, 1898. He was 21 years of age at enlistment. (I. O., 1352041.)

The records of the War Department fail to show he was ever reported as sick or ever received medical treatment while in the service.

When discharged he claimed he was suffering from malaria. The medical officer by whom he was then examined certified no evidence of any disability could be found to then exist.

He filed a claim September 5, 1906, based on malaria which he claimed he had contracted in August, 1898, in the service. This claim was rejected November 14, 1913, on the ground of no ratable degree of disability shown to exist since date of filing from malaria. No appeal was taken.

Aside from the statement of the soldier that he had contracted malaria in the service, no evidence was filed.

He was examined by a board of surgeons July 2, 1913, who reported him as 36 years of age, 5 feet 10 inches in height, and weighing 157 pounds. The board found the heart, bowels, and stomach normal, except some evidence of constipation. They found the skin a little pale and spleen enlarged, and he was then having chills and fever. They rated malarial poisoning at six-eighteenths. They also found joints somewhat enlarged and some rheumatism, rate six-eighteenths. No other disability found, and no evidence of vicious habits.

With the bill the petitioner files an affidavit in which he states that he is in part incapacitated for the performance of manual labor by malarial poisoning, and the only property he owns is wearing apparel worth $50.

A. T. Holley, who was first lieutenant of the soldier's command, testified February 2, 1914, that he has known the soldier for years and has been in almost daily contact with him since his discharge, and knows he has suffered from constipation and what doctors called malaria, and has been often disabled thereby, some of the time in bed from same, and still suffers from the said disease.

Dr. Frank H. White testified January 31, 1914, that the soldier returned from the service in 1898 suffering from malaria; soon had fever

which ran into typhoid form; and after this the malaria became chronic and returned every spring up to 1906, when he applied for pension for said disability; that the teeth became decayed from this disease and mastication of food was not proper and digestive organs thus became affected; in 1907 chills did not return, but constipation and piles continued, and in 1908 chills returned and returned each year up until 1912, when affiant ceased to be the soldier's attending physician; that the soldier is not able to earn a living, and is a sufferer from chronic malarial poisoning and also suffers from rheumatism.

Dr. J. V. Bergie testifies, February 5, 1914, that he treated the soldier during 1911 and 1912 for chronic malarial poisoning and rheumatism and general weakness, and he is unable to do any real hard work because of said disease.

Dr. Frank Hopkins testifies, January 24, 1913, that the soldier was under his treatment at Hot Springs, Va., from March 5 to April 8, 1913, for chronic rheumatism.

While none of the witnesses specifically so state in terms, yet the tenor of their testimony indicates that the soldier has no property or income.

From the evidence submitted, your committee is of the opinion that the disabilities from which the soldier now suffers may be safely accepted as due to service, and they respectfully recommend the allowance of pension at the rate of $12 per month.

H. R. 11269. James C. Hudson, of the Soldiers' Home, Washington, D. C., served in the Regular Establishment, in Company C, Twenty-first Regiment United States Infantry, from August 27, 1890, to December 14, 1891, when honorably discharged. Prior to this term of service he had served continuously in the Regular Establishment from July 12, 1875. (I. C. 870687.)

It is shown by the records of the War Department that during his long service the soldier was treated for rheumatism, abscess, diarrhea, dislocation of the shoulder, wound of the right finger, sprain of the right leg, headache, dyspepsia, deafness, disturbed vision, and vertigo. This disturbed vision and vertigo finally developed into Menier's disease. The rheumatism was constant and became chronic while he was in the service.

He filed a claim for pension December 18, 1891, based on vertigo, disturbed vision, numbness, and weakness. This claim was allowed at $24 per month from date of filing for Menier's disease to cover all of the disabilities alleged. He now receives a pension of $24.

Four claims for increase in rate have been rejected on the ground the rate of $24 per month fully covers the degree of disability existing. The last rejection was September 29, 1913, on medical ground in which the medical examination was denied.

A board of surgeons which examined the soldier on March 10, 1892, states that he is so disabled by Menier's disease (vertigo and disturbed vision) as to be entitled to $24 per month, and from rheumatism as to warrant two-eighteenths. No other disability was found to exist. It was upon the strength of this report that a pension of $24 was allowed.

A board of surgeons, March 21, 1894, reported about the same physical condition of the soldier.

June 7, 1905, a board states that the soldier should have $30 per month for pension cause—Menier's disease—and that he was totally incapacitated for any manual labor.

On January 31, 1911, a board reports that the soldier was so incapacitated by Menier's disease as to require attendance of another person and recommended the rate allowed by law for persons in such condition. This rate is $50 per month when attendance, as in this case, is periodically required.

With the bill the petitioner files an affidavit, in which he states that he is totally disabled for any kind of labor and has no property.

The Member who introduced the bill assures the committee that the soldier has no property and his only income consists of his $24 per month pension.

A physician testified, August 18, 1913, in the claim in the Pension Bureau, that he has treated the soldier for the last 15 years, and all of that time he has suffered so from Menier's disease as to be unable to perform any kind of labor, and the disease is constantly growing worse and will continue to do so.

From the evidence submitted your committee is of the opinion that an increase from $24 to $30 per month is fully justified, and so recommend.

H. R. 11434. Wiley Gullett, of Sallyersville, Ky., served during the War with Spain in Company F, Twenty-eighth Regiment United States Volunteer Infantry, from April 23, 1901, to April 22, 1904, when honorably discharged at the expiration of his term of enlistment. (I. C. 1161920.)

The records show that during the service he was treated at various times for constipation, measles, vaccinia, rheumatism, mumps, orchitis (of nonspecific or venereal cause), and malarial fever.

He filed a claim for a pension January 29, 1908, based on left varicocele and impaired vision of the left eye. The claim was allowed for left varicocele at $6 per month from date of filing, which he now receives. That part of the claim based on impaired vision of the left eye was rejected on the ground that the evidence fails to show same was due to service origin.

He filed a claim for increase of pension April 30, 1912, which was rejected September 12, 1912, on the ground of no increase in the disability.

Dr. Cisco testified, June 7, 1912, that the varicocele of the left testicle was causing constant enlargement thereof with great pain and tenderness and to a great extent prevented manual labor of any kind—in his opinion fully two-thirds.

A board of surgeons who examined him, August 14, 1912, states as follows as to varicocele:

"Varicocele: Marked varicocele of left side, rate four-eighteenths; small varicocele of right side, rate two-eighteenths."

This board states that they found no other disability existing of any kind.

With the bill the petitioner files an affidavit stating he is wholly unable to earn a living by manual labor by reason of varicocele of the left and right sides, and all the property he possesses consists of about $100 worth of personal property, and his only income is the $6 per month pension he receives.

Lay witnesses sustain his allegations.

Dr. Dixon testifies, January 20, 1914, that the soldier suffers from a left varicocele, which is in such enlarged condition as to prevent manual labor.

From the evidence submitted your committee is of the opinion that an increase from $6 to $12 per month is fully warranted, and so recommend.

H. R. 11639. Ernest W. Hilliard, of Bristow, Okla., served during the War with Spain in Company K, Fifteenth Regiment Pennsylvania Volunteer Infantry, from June 17, 1898, to January 31, 1899, when honorably discharged. He was 21 years of age at enlistment. (I. C. 1296664.)

The records of the War Department fail to show the soldier was ever in the hospital for medical treatment during his service, but do show he was reported as sick in quarters July 16 to 20 and August 6 to 11 and 15 to 31, 1898, the nature of illness not stated.

When mustered out he stated that he was not suffering from any disability, and the medical officer who examined him certified he could find none existing.

He filed a claim for pension February 17, 1903, based on rheumatism, malarial poisoning, and alleged resulting disease of the spine. This claim was rejected February 1, 1904, on the ground of no ratable degree of disability since filing the claim from rheumatism and malarial poisoning; and as to disease of the spine, on the ground it is not accepted as a result of rheumatism or malarial poisoning.

After filing considerable testimony seeking to have the claim reopened, and being denied such action, an appeal was taken, and in a decision of February 28, 1905, the Assistant Secretary of the Interior sustained the bureau action.

The soldier was examined at his home by a board of surgeons (composed of one physician) July 13, 1903, who reported: Age, 27 years; height, 5 feet 8 inches; weight, 125 pounds. As to rheumatism, this physician stated there was no evidence thereof except a stiffened and tender condition of some of the muscles of the back about the spinal column. As to malarial poisoning, he states:

"Skin pale and sallow, tongue coated and fissured, tender over gastric region, spleen normal, liver extends up to sixth rib and slightly below costal cartilage, and he claims to suffer from bowels being constipated and then lax; much diarrhea."

As to disease of the spine, he states:

"No history or evidence of vicious habits (venereal disease). This claimant is so disabled by caries of spine (tuberculosis), the probable result of exposure in military service, as to require the frequent and periodical attendance of another person and is entitled to $50 per month."

A great deal of evidence was filed in the claim and secured by means of special examination to show the soldier contracted rheumatism and malarial poisoning in the service and suffered from same until he filed the claim for pension. A great deal of this evidence related to the fact that the soldier soon after service began to suffer from trouble with his spine and has since suffered from same. It is shown the spinal disease is tubercular and disables the soldier completely, as far as any kind of labor is concerned. He does not claim same was contracted in the service per se, but alleges it is a result of either rheumatism or malarial poisoning or both, and that they were contracted in the service.

The Pension Bureau rejected the claim as to rheumatism and malarial poisoning, not because they were not contracted in the service but because no disability from same was shown to exist. The tuberculosis of the spine was alleged as a result of the other disabilities and was rejected because it could not be accepted as a result of either.

In appealing the soldier did not appeal as to stand taken as to spinal trouble not being a result, but confined his appeal to the fact that a ratable degree of disability did exist from rheumatism and malarial poisoning.

The material portion of this decision is herewith set forth, as it so clearly shows the view of the claim taken by officials of the Interior Department:

"While this claim was pending considerable testimony was taken on special examination, and there was also considerable evidence offered by the appellant's attorney in the form of ex parte affidavits. These, however, refer to soldier's condition due to the cause not here considered and the soldier's condition prior to his enlistment.

"Under the claim in question soldier was examined at his home by the president of the Butler (Pa.) board of examining surgeons July 13, 1903, less than five months after the date of filing the claim under consideration. The certificate of this examination, while it shows that soldier was then totally disabled, also clearly shows that his condition was not due to the causes alleged, except the cause which is not here considered. There was no evidence whatever of the existence of rheumatism, and, except for the statement that soldier was sallow, that his tongue was coated and fissured, there was no evidence of the existence of malarial poisoning either at the date of this examination or previous to said date. The certificate shows that soldier's spleen at the date of this examination was apparently normal, as was also his liver. Claimant alleged that his bowels were constipated and lax alternately, which, however, is not necessarily a result of the cause alleged, but in the present case, the soldier being confined to his bed, it is probably due to this fact.

"The only evidence offered to show the existence of the causes here considered consists of the affidavit of one of the soldier's attending physicians, in which he stated that subsequent to the soldier's return from the service he (affiant) treated the soldier for the alleged causes. This affiant in the same affidavit, however, stated that later the trouble for which he was treating soldier developed to be tubercular.

"The question of continuance of the alleged disabilities since soldier's discharge, however, need not be here considered under the grounds assigned for the action appealed from. The certificate of examination upon which said action was based clearly shows that a ratable degree of disability from these causes had not existed since the date of same."

With the bill the petitioner files an affidavit stating he is wholly disabled for the performance of any labor by reason of tuberculosis of the spine and bones of right leg and hip, and that he possesses no property or income.

Several lay witnesses testify the soldier is now confined to his bed all of the time by tuberculosis of the spine and leg, and has no property and is a public charge, and physicians state his case is hopeless and incurable; that he has been in bed since February, 1912, and has a wife, who owns a small house which is not worth, with the lot upon which it stands, over $250, and she, with her own labor and the $10 per month given by the county, supports herself and soldier.

Two doctors testify the soldier is now, and has been for over two years, bedridden and will never recover, as his disease (tuberculosis of spine and hip and leg) is incurable; that he is totally helpless, and these physicians state it as their belief that the disease is a result of his exposure in tropical climate in his military service.

From the evidence submitted it is believed that a pension of $24 per month is fully warranted, and it is so recommended.

H. R. 12964. Martha R. Aliwein, Lebanon, Pa., served as a nurse in the Regular Establishment, United States Army, from December 1, 1904, to April 14, 1908, when discharged at her own request. She is spoken of by the Surgeon General of the United States Army as a com-

petent woman, who gave satisfactory service in every respect. She served at San Francisco, Cal., from 1904 to January, 1906, and in the Philippines from January, 1906, to October, 1907, and again at San Francisco, Cal., from October, 1907, until her discharge.

As there is no law by which she could be pensioned as a nurse for service rendered by her (the only law as to pensions for nurses is limited to those who served during the Civil War), she has filed no claim in the Pension Bureau, and consideration of the pending bill is requested under the committee rule (No. 2) as to cases where it is manifest that no pensionable status under existing law exists.

With the bill the petitioner files an affidavit in which she states that she served from December, 1904, to April, 1908, and of this time she served for nearly two years in the Philippines, and that she finally was discharged because her sight had become so impaired that her eyes required treatment.

Drs. Glininger and Gerberich and 16 other witnesses state that prior to her service in the United States Army the petitioner was a woman of good health, but since discharge she has constantly suffered from some impairment of sight until now she is totally blind.

Maj. Slact states that during 1906 and 1907 the petitioner served under him in the United States Army Hospital in Manila, P. I., and was most efficient and faithful in the performance of her duties.

Brig. Gen. W. S. Edwards states that the petitioner nursed his wife in sickness in the Philippines and was a most competent, faithful, and efficient Army nurse and was so esteemed by all who knew her.

"JANUARY 23, 1914.

"This is to certify that I first saw Miss Martha Allwein, of Lebanon, Pa., on May 2, 1908. She then gave the following history: Age, about 30; occupation, trained nurse on service in the United States medical service in the Philippines, but home on leave. She was referred to me by my colleague, Dr. Francis M. Perkins, of 1428 Pine Street, Philadelphia, Pa., who stated that eight years previously he had treated her at St. Agnes Hospital (Philadelphia) for an intraocular inflammation of the left eye, that left her without useful vision in that eye."

During 1906 she went out to the Philippines, and soon after noticed that what vision she had previously had had begun to grow dim, and that the pupil of the left eye had begun to take on a grayish hue. Since then the left eye has become entirely blind and the pupil became a whitish gray. The condition at the time I saw her was one of complete mature cataract in the left eye, the pupil being 5 mm. in diameter and showing no reaction to light. There was not even light preception in the left eye at this time. The tension of the eye was normal. There were no inflammatory adhesions between the iris and the lens. The right eye was normal in all respects. She consulted me in reference to the removal of the cataract in the left eye, and I informed her that there was some slight risk that in the healing of the left eye the right one might become compromised and even seriously infected, but that the risk was a slight one.

She decided to accept the risk, and on May 20, 1908, Dr. Perkins and I did an extraction of the cataract in the left eye under local anesthesia. The cataract came away easily but left behind it a dense opaque capsule, which was finally drawn out through the wound by means of very gentle traction. Atropia was immediately instilled and the eye closed. Two days later she was ordered a course of calomel (usual treatment) and the atropin used three times a day, as the eye was red and angry and not healing properly. On June 1, 1908 (10 days later), the eye was fairly quiet, and she was allowed to go home to keep up her treatment. Ten days later she returned with signs of beginning sympathetic opthalmia in the right (normal) eye.

In spite of vigorous treatment from the start with mercury, iodides, soda salicylate (1 grain for every pound of body weight in 24 hours=170 grains daily), sweats, inoculations (and enucleation of the offending left eye at the Polyclinic Hospital on June 17, 1908), the vitreous humor of the right eye clouded up and the right optic nerve inflamed and swelled up frighffully (4 D). She was seen in consultation with Dr. de Schweinitz, but all the suggestions as to additional treatment were unavailing. She gradually lost the major portion of the vision in her right (remaining) eye, and when last seen, August 22, 1908, could count hand movements at 2 meters.

In our judgment Miss Allwein's left eye developed its cataract because of the exposure to the unusual glare of the sunlight in that region. Moreover, we believe the resistance of her right eye was also somewhat compromised by the same circumstances, and that in consequence of her residence there for almost two years she was much more liable to develop the horrible postoperative sequalæ that presented in her case.

To-day, despite good surgery and most thoroughgoing exhaustive treatment, she is a blind woman, and that in all likelihood because of the debilitating effect of the Philippine climate upon her health.

WENDELL REBER.

Sworn to and subscribed before me this 24th day of January, A. D. 1914.

CHAS. IRWIN, Jr., *Notary Public.*

The Member who introduces this bill (Mr. KREIDER) assures the committee, by letter, that the petitioner is absolutely without property and dependent on charity.

The Surgeon General of the United States Army reports, March 2, 1914, as follows in this case:

"Prior to her appointment she was examined, on September 15, 1904, by a civilian physician in Philadelphia, who reported her free from disability. She was examined by an Army surgeon at the general hospital, San Francisco, on December 4, 1904 (eight days after her appointment), and a report of this examination shows that she had practically no vision in her left eye, and also shows a mitral systolic heart murmur. A report from the hospital, dated December 31, 1904, shows 'vitreous opacities in left eye of seven years' standing.' A report of examination, dated December 20, 1905, shows 'left eye has convergent squint, cloudiness of vitreous humor. Vision, counts fingers at distance of 2 feet.' Her examination, made November 26, 1907, by an Army surgeon at the general hospital, Presidio, San Francisco, shows a complete cataract left eye; only perception of light."

From the evidence submitted, your committee is of the opinion that the disabilities from which this nurse now suffers may be safely accepted as due to the service, and they respectfully recommend the allowance of pension at the rate of $50 per month.

H. R. 13328. Mary A. Dow, Haverhill, Mass., mother of William C. Dow, deceased, who served during the War with Spain as captain, Forty-third Regiment United States Infantry. He was appointed first lieutenant, to date from August 17, 1898, promoted to the rank of captain on November 8, 1899, and discharged because of disability December 31, 1900. He had prior to this service served in Company F, Eighth Regiment Massachusetts Volunteer Infantry, from April 28, 1898, to April 28, 1899. He was 33 years of age at the first enlistment. (M. O. 1018359.)

The soldier died March 26, 1901, of disease of the lungs, which the evidence shows was contracted in the service. He had a claim for pension pending at the date of his death, which was allowed from date of filing until date of death, and payment under same was made to his widow at the same time as first payment to her in her own claim as the soldier's widow, which was allowed from date of the soldier's death, and which she received until her own death on December 16, 1906.

After the death of the widow the mother of the deceased soldier filed a claim for pension, November 25, 1913, which was rejected on the ground of no title, as the soldier left no widow surviving him.

With the bill the petitioner files an affidavit stating that she is 74 years of age; that her husband is dead; that she possesses no property and has no income; that she is the mother of the deceased soldier; that the soldier left a widow, who died December 16, 1906; and that the soldier left no minor child.

The evidence filed with the committee shows the husband of the petitioner died on October 5, 1913; that the widow of the soldier died December 16, 1906; that the soldier left no minor child; that the petitioner is the mother of the deceased soldier; and that she possesses no property or income.

The fact that the soldier obtained two life insurance policies in favor of his mother may be accepted as evidence of his desire to contribute to her support. His father lived until after the soldier died, and actual support of his mother by the soldier was not necessary.

The mother never received any money from the life insurance policies, as the widow survived the soldier.

From the evidence submitted it is believed that a pension of $12 per month is fully warranted, and it is so recommended.

H. R. 13518. Catherean Mihalak, Grand Rapids, Mich., widow of Frank Mihalak, deceased, who served during the War with Spain in Troop M, Fifth Regiment United States Cavalry, from May 14, 1898, to April 30, 1899, when honorably discharged. He was 21 years of age at enlistment. (W. O. 963423.)

The records of the War Department show the following treatment:

"August 24 to 30, 1898, fever; no additional record found."

It is shown that he was reported as sick in quarters October 31, 1898. He was furloughed for 30 days, and it was extended for an additional 30 days because he was sick, the nature of the illness not being given.

The soldier applied for a pension March 22, 1910, based on malarial poisoning and disease of the kidneys and bladder. He was allowed a pension from date of filing the claim for malarial poisoning at $10 per month. That part of the claim based on disease of kidneys and bladder was rejected on the ground of no ratable degree of disability therefrom since date of filing the claim.

The soldier died on January 22, 1911, from tuberculosis, and his widow filed a claim for pension April 22, 1911, that was rejected May 27, 1911, on the ground that the fatal tuberculosis of the soldier was not a result of malarial poisoning, for which he was pensioned, and there was no record, medical or other satisfactory evidence, to show origin of same in the service and continuance thereof since his discharge.

The soldier never alleged tuberculosis as a disability in his own claim filed about one year before his death from that disease. The evidence and testimony filed by him does not seek to show tuberculosis was contracted in the service, existed at the date of his discharge, and continued to exist thereafter. He was examined by a board of surgeons May 4, 1910, who reported his lungs were normal and free from disease. They, however, stated that he appeared to be in poor health and weakened physical condition, but they attributed this to malarial poisoning and its resulting disease of stomach, liver, and spleen; rated at fourteen-eighteenths. They also found disease of nose and throat; rated at eight-eighteenths.

The widow attempts, by the testimony filed in her claim, to show that the soldier was suffering from tuberculosis when he was discharged, and from then to his death. This testimony, however, like that in the claim of the soldier, simply shows that the soldier was never, after his discharge, a well and strong man, and that his health gradually gave way, but there is no convincing testimony that would show origin in the service of tuberculosis, unless the medical witnesses who testify diagnosed as malarial poisoning the disability which was in truth not malarial poisoning, but tuberculosis. This has happened in cases where no test was taken of sputa or blood bacilli.

The evidence shows the petitioner is the lawful widow of the deceased soldier, and that she has two minor children, born April 19, 1901, and July 23, 1906.

With the bill the petitioner files an affidavit in which she states that she possesses no property and has to earn her own living and that of the two minor children by working in a factory.

Several lay witnesses sustain her allegations as to owning no property and working in a factory to support herself and two little children.

A physician testifies that since the death of the soldier the widow has had to undergo an operation for removal of diseased ovary and suffers now from nervous disorder following this trouble, and is really not able to perform any work, although she has to do so for support of herself and two small children.

From the evidence submitted your committee is of the opinion that a pension of $12 per month and $2 additional for each of two minor children until they reach the age of 16 years is fully warranted, and they so recommend.

H. R. 13933. Pawil Wiczlas, of 217 Berry Street, Brooklyn, N. Y., served during the War with Spain in Companies D and C, Twenty-first Regiment United States Infantry, from June 20, 1894, to June 19, 1899, when honorably discharged from Company C, Seventh Regiment United States Infantry, to which he had been transferred, on surgeon's certificate of disability. He was 21 years of age at enlistment. (C. Cff. 1064304.)

The records of the War Department show the following treatment:

"October 11 to 14, 1894, abrasion right foot; September 29 to 30, 1897, myalgia; January 27 to February 8, 1898, under observation suspected mental aberration, no evidence of same discovered; November 18 to December 7, 1898, malaria; January 5 to 11, 1899, malaria; January 22 to February 2, 1899, malaria; April 26 to May 3, 1899, malaria; May 23 to June 20, 1899, malaria; discharged June 20, 1899, on surgeon's certificate of disability, due to malarial poisoning. No additional record found."

He filed a claim for pension on June 24, 1899, based on deafness of the left ear, malarial fever, rheumatism, disease of the heart and stomach, dysentery, and typhoid fever. This claim was rejected May 14, 1900, on the ground of no ratable degree of disability from any of the alleged disabilities since the date of filing the claim. The claim was reopened as to malarial poisoning and allowed at $6 per month therefor from date of filing, to terminate August 14, 1900, the dis-

ability having ceased to exist. Former rejections as to all other alleged disabilities were adhered to.

His name was restored to the rolls June 24, 1904, at $6 per month from date of dropping for malarial poisoning, and he is now pensioned at that rate.

On November 21, 1913, he filed another claim, this time based on ruptured and varicosed veins of the right leg and deafness of the right ear, the result of sunstroke. This claim was rejected February 16, 1914, as to rupture of the veins of the leg on the ground that same was not incurred in service, but according to the soldier's own statement was developed some time after his discharge. Former rejection as to deafness was adhered to.

The claim for malarial poisoning was filed only a few days after discharge because of said disability, and was allowed for same, and he now receives pension therefor.

Dr. H. S. Shlevin testifies, August 17, 1901, that he has treated the soldier since about the time of his discharge, and he has suffered from malarial poisoning, rheumatism, disease of the heart and stomach, dysentery, and deafness of the right ear so as to be unable to do any manual labor. This physician states substantially the same thing in an affidavit in September, 1903, and May, 1904, showing medical treatment for said disabilities up to May, 1904.
